

Eurofleets 2

New operational steps towards an
alliance of
European research fleets

Overview on Marine Research Infrastructures, Scientific capacities, areas of research operations

EU_PolarNet meeting, Lisbon, 6th October 2015

OBJECTIVES

Polar Vision

General:

Polar Vision within **EUROFLEETS2** aiming at **integrating the European Polar Research Vessel (PRV) establishing models for implementing a joint coordination** of PRV, together with the collaboration of other Nations.

Objectives

Main Aims:

- **determining the available capacities of Polar Research Vessels,**
- comparing that with the scientific demand, in accordance with IASC (International Arctic Science Committee) and SCAR (Scientific Committee on Antarctic Research), for research in the Polar Oceans and
- **establishing models for optimization of this fleet by better coordination of the vessels' scheduling and by harmonizing the deployment of ice-strengthened research vessels with the heavy icebreakers.**

WP3 main deliverables contributions from EF2

DELIVERABLES:

- **D3.1** Survey of the **existing polar research data systems and infrastructures**, including their architectures, standards/good practice baselines, policies and scopes (M12) (CNR-DTA)
- **D3.2 European Polar Infrastructure Catalogue incl. all types of polar infrastructures**, facilities and large instruments (such as AUV's and ROV's) based on the model of the INTERACT Arctic station catalogue and with the agreement and participation of the INTERACT community. It will provide all necessary information on the capacities of European Arctic and Antarctic infrastructures to support science and their availability to international scientists. (M16) (IPEV)
- **D3.3** Survey of **existing use of space assets by European polar operators**, including recommendations for improved coordination (M24) (NERC-BAS).

Report on the feasibility of year round, regular research operations in ice-covered areas:

Related to :

- A.- Determination on the available capacities for PRV's
- B.- Summer and Winter Operations
- C.- Areas access Polar Areas

New IMO Polar categories and its equivalents in IACS.

Icebreakers & Ice Classified RV's for research Polar Regions

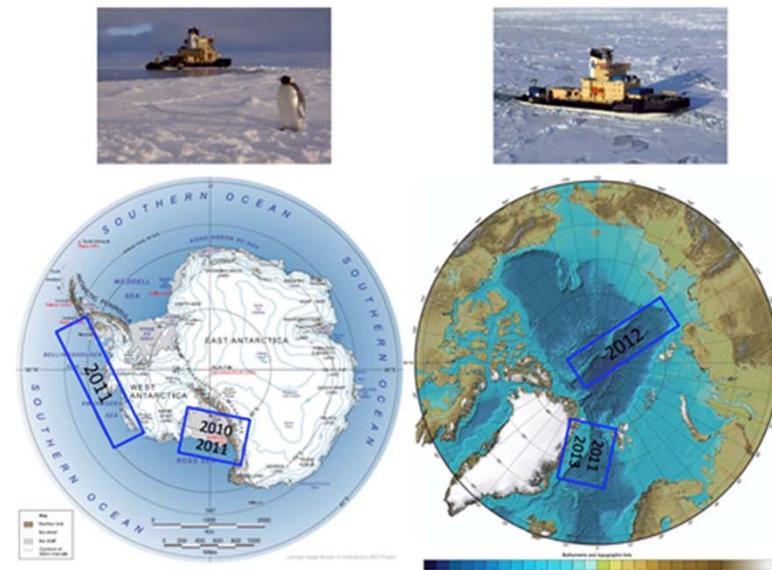

OPERATIONAL AREA'S FROM THE LAST 5 YEARS AT ARCTIC AND ANTARCTIC POLAR REGIONS

PRV POLARSTERN

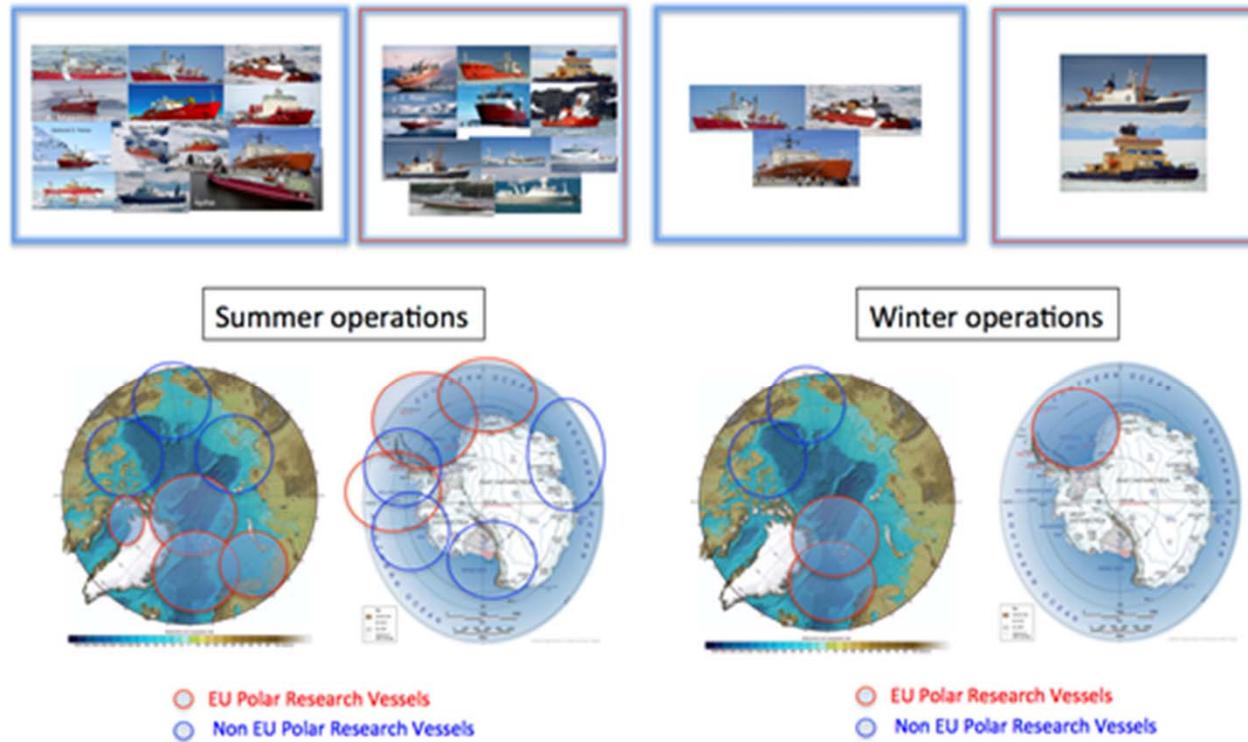

These pictures show that in summer time PC1-PC3 PRV's like Polarstern and Oden are capable to reach almost anywhere of multi-year ice.

PRV ODEN

WORLD WIDE OPERATIONAL AREAS FROM THE LAST 5 YEARS AT ARCTIC AND ANTARCTIC POLAR REGIONS.

Summary

Status of the European and International Polar Research Fleets & equipment

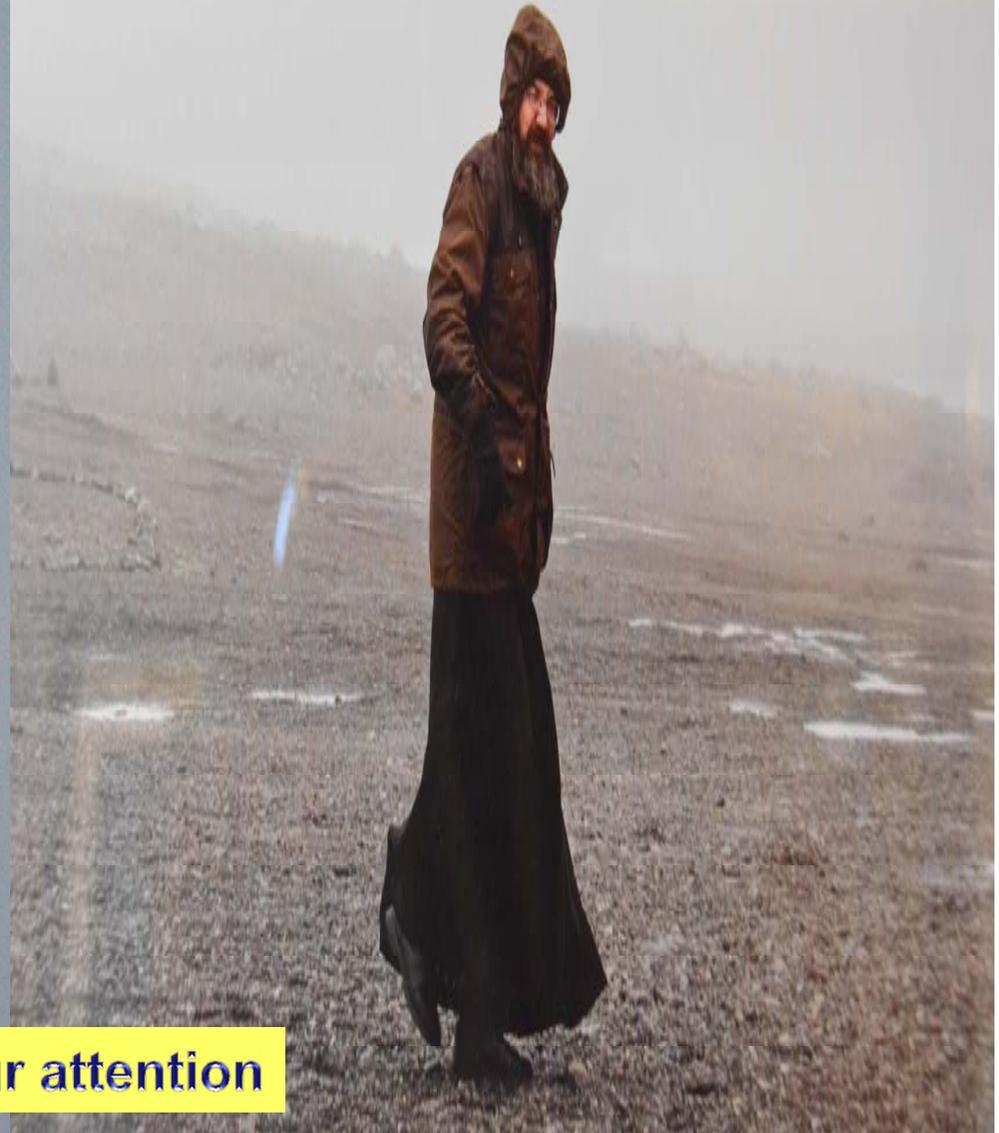

Compilation of PRV's

- **Characteristics of Full Range Icebreakers (Arctic & Antarctic)**
Ship Capabilities, including scientific equipment's, laboratories type, cargo capacity, etc.
- **Characteristics of Ice Classified Vessels (Arctic & Antarctic)**
Ship Capabilities, including scientific equipment's, cargo capacity, etc.
- Ice Type and Ice extent PRV's at both Poles**
- Areas of Activity, Cruises and Research**
- PRV'S Seasonal Operations (winter, summer) Worldwide**
- Overview of EU PRV'S Operations within the last 5 years**
