ACKNOWLEDGEMENTS

I want to express my sincere gratitude to the following people:

- Professor Dr. J.G. Maree, my promoter, for his constant and endless encouragement and support as well as the keen interest he displayed in the research, for his careful and critical reading of the draft of the thesis, for the valuable suggestions he made and the precious time given to make this work possible. My decision to undertake this demanding study under his guidance is an expression of my esteem for his expertise. It was a privilege and an enriching experience for me to work under him. May he be a blessing to those who will study under him.
- The North West Province Department of Education and Culture for granting me permission to use schools under its jurisdiction as samples for this study.
- Principals, teachers and pupils of participating schools for their lively interest and ready co-operation in the completion of research questionnaires.
- Van der Walt Advertising for the typing, editing and technical preparation of this thesis.
- Mr. A. Thorne of the Department of Information Management at the University of Pretoria, for his assistance with the processing of data and Mr. David le Roux of the Department of Statistics, for his invaluable assistance with statistical analysis.

- My mother, Maria Matlala Sedibe and my sister Rosetta, who after the death of my father managed to see me through the university education with their limited income. They more than deserve my sincerest gratitude.

- My wife, Mabatho, who proved to be a pillar of strength during the difficult times of this study. A special thanks for her outstanding support and sense of understanding, appreciation and faith in my work.

- My two sons Molefe and Tebatso and my daughter Mmathapelo, for their unwavering moral support and daily assistance during the long hours of this study.

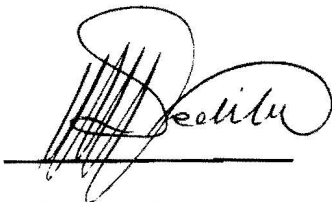

- Above all, I owe gratitude and praise to God for the wisdom and strength bestowed upon me, without which this study would have been impossible.
