University of Pretoria etd – Thomas, H E (2006)

The sustainable implementation of computers in school districts: A case study in the Free State Province of South Africa

By
Herbert Ernest Thomas

Submitted in partial fulfilment of the requirements for the degree

Philosophiae Doctor

In the
Department of Curriculum Studies
Faculty of Education

of the
University of Pretoria

Supervisor: Prof. Johannes Cronje

March 2006

TABLE OF CONTENTS

List of Figures iv
List of Tables iv
Chapter 1: Introduction and orientation 1
1.1 Introduction 1
1.2 Background 1
1.3 Problem statement 3
1.4 Research questions 4
1.5 Purpose of the study 4
1.6 Objectives 5
1.7 The scope and context of the study 5
1.8 Exclusions from the study 5
1.9 Limitations of the study 6
1.10 Significance and potential contribution of the study 6
1.11 Research method 7
1.12 Research design 7
1.12.1 Population and sampling 8
1.12.2 Data collection 10
1.12.3 Data analysis 10
1.12.4 Authenticity and trustworthiness 11
1.12.5 Crystallisation 13
1.13 Literature control 14
1.14 Ethical considerations 14
1.14.1 Informed consent 14
1.14.2 Anonymity or recognition 14
1.14.3 Withdrawal from the project 15
1.15 Role of the researcher 15
1.16 Outline of the study 15
1.17 Summary 16
Chapter 2: Literature review and conceptual framework 17
2.1 Introduction 17
2.2 The search for sources 17
2.3 Current and recently completed work in the field 18
2.4 Issues raised in the literature 18
2.4.1 Demarcating the field 18
2.4.2 The integration and use of computers in schools 25
2.4.3 The integration and use of school-based computers in developing countries 37
2.5 Summary of issues raised in the literature 40
2.6 Research questions 41
2.7 Conceptual framework 42
2.7.1 Postmodernism, chaos, autonomous systems and complexity 44
2.7.2 Education, change and complexity 47
2.7.3 Ecological or viral change in educational systems 48
2.7.4 Sustainability in dynamic, complex educational systems 51
2.8 Summary 55

University of Pretoria etd – Thomas, H E (2006)

Chapter 3: Research methodology and research design 57
3.1 Introduction 57
3.2 Hypothesis, conceptualisation, definitions, key variables 57
3.3 Research approach 61
3.4 Research design 61
3.5 Issues of measurement and data capturing vehicles 62
3.6 Sample design and sampling methods 66
3.7 Data collection methods and fieldwork practice 69
3.8 Data capturing, data editing and data analysis 71
3.9 Validity, reliability and generalizability 79
3.10 Shortcomings and sources of error 82
3.11 Conclusion 82
Chapter 4: Results: presentation and discussion 84
4.1 Introduction 84
4.2 The participants 85
4.3 Synchronic, diachronic and metaphoric systemic structure 90
4.3.1 Personal influences 92
4.3.2 Programmatic influences 128
4.3.3 Physical influences 167
4.3.4 Systemic influences 179
4.3.5 Metaphoric patterning 194
4.4 Summary 223
Chapter 5: Conclusions and recommendations 224
5.1 Overview of chapter 224
5.2 Summary of this research 224
5.2.1 Research Question 1 225
5.2.2 Research Question 2: 228
5.2.3 Research question 3: 232
5.2.4 Research question 4: 235
5.2.5 Research question 5: 237
5.3 Synthesis 240
5.3.1 Summary of findings 240
5.3.2 Anomalies and differences between findings and the literature 242
5.3.3 Updated conceptual framework 243
5.4 Reflection 244
5.4.1 Methodological reflection 244
5.4.2 Substantive reflection 245
5.4.3 Scientific reflection 246
5.4.4 Reflection on exploratory journey 246
5.5 Recommendations 247
5.5.1 Recommendations for policy and practice 247
5.5.2 Recommendations for further research 248
5.6 Conclusion 249
