CIPE to WorldCat

- 11 Universities, 11 millions of bibliographic records to WorldCat

Aims:

- giving more visibility to the librarian Italian heritage;
- sizing the opportunity of participating, via WorldCat, to VIAF and to structure the data thought linked data;
- encouraging the adhesion to the CIPE-WorldCat project from other Italian universities;
 - Recently The National Library of Rome has also reversed its data in WorldCat
- d) promoting internationally the relevance of the Italian research outputs

Reality. Local cooperation in Italy

- **SHARE** (Scholarly Heritage and Access to Research):
 - SHARE Catalogue of 7 universities of the South of Italy.

Data are enriched and exposed as Linked Data to the semantic web

 - SHARE Discovery
 - SHARE Press (e-Journals and e-Books)
- **SBART**. Sistema Bibliotecario Atenei Regione Toscana.
 - OneSearch, Collaborative Online Reference Service (Question Point)
-

SHARE Catalogue

The banner features the SHARE CATALOGUE logo on the left, with navigation links for 'Biblioteche', 'Info', and 'Contattaci' on the right. Below the logo is the tagline 'Scholarly Heritage and Access to Research - Catalogue'. A search bar is present with a 'Persona' dropdown menu, a 'SCORRI' button, and a 'Vai a pubblicazioni' link.

IL PORTALE

SHARE CATALOGUE è una piattaforma tecnologica per navigare cataloghi bibliografici organizzati secondo il data model BIBFRAME Linked Data. Il portale, quale unico punto di accesso al patrimonio delle risorse integrate (libri, documenti, ...), permette di ottimizzare tempi e raffinare modi dell'esperienza di ricerca, restituendo risultati arricchiti da fonti esterne ai cataloghi.

BIBFRAME

BIBFRAME (Bibliographic framework) è un modello di struttura bibliografica che, recependo le evoluzioni in atto sulle nuove modalità di condivisione di dati, documenti e risorse digitali tra ambiti culturali che utilizzano regole e standard differenti, attua la transizione dal formato MARC verso i Linked Open Data e il web semantico. Il modello, basato sul concetto entità-relazione di FRBR e RDA, crea strutture bibliografiche in linked open data, portando così i dati dei cataloghi nel web semantico e arricchendo notevolmente le informazioni messe al servizio degli utenti.

IL PROGETTO

Al progetto SHARE CATALOGUE partecipano le seguenti Università:

- Università degli Studi di Napoli Federico II
- Università degli Studi della Basilicata
- Università degli Studi del Sannio
- Università degli Studi di Salerno
- Università degli Studi di Napoli Parthenope
- Università degli Studi del Salento
- Università degli Studi di Napoli L'Orientale

- Altmetrics
- Open Educational Resources

Desire. Digital preservation network

- Magazzini digitali, Portico
- The local loading CINECA NERA platform will be dismissed

Main Issues:

- Local loading, Post Cancellation Access, Digital Legal Deposit, Text Mining
- Portico is not a good solution for
 - Italian publishers
 - **non digital** born material
 - Portico's D-Collection Service preserves content on behalf of participating publishers

Desire. Digital preservation network

- Create a Digital preservation network based on university Infrastructure
- Cattolica University and IUE are 2 Global LOCKSS nodes

Desire. National Publishing Platform

- Many universities have developed their own OA publishing platform:
- <http://riviste.unimi.it/>
- <http://www.ojs.unito.it/>
- Or University Press
- <http://www.universitypressitaliane.it/>

Desire:

- A stronger coordination of all the (OA and TA) publishing activities
- A long term national strategy
- A National OA Publishing Platform
