## RESUME OF PAUL MARSHMAN CARRICK

Paul M. Carrick was born in Lakewood, Ohio, in 1926. He entered the United States Navy immediately upon graduation from Maine Township High School in Park Ridge, Illinois, in June 1944, and served as a Fire Control Man until his honorable discharge in 1946.

He received his undergraduate training at Oberlin College, Oberlin, Ohio, and at Northwestern University, Evanston, Illinois, where he received a Bachelor in Business Administration in 1949. His major was in business finance and minors in economics and mathematics. He then enrolled at the University of California at Berkeley for graduate work in economics and mathematical statistics. He received the Ph.D. in 1956. His dissertation, "The Psychology of Rationality," was under the direction of Professors Robert A. Brady and Andreas Papandreou.

He has had extensive research and business experience. He has taught at the University of Texas at Austin, and at San Diego State College. During an extended career at the General Dynamics Corp. in San Diego, his varied assignments included serving as a Senior Research Engineer, a Design Specialist, and a Project Administrator in Advanced Product Planning. He later served as a Senior Economist with General Electric-TEMPO in Santa Barbara, and the Stanford Research Institute at Menlo Park. He has participated in the systems analysis and design of commercial aircraft, missiles, orbital weapons systems, logistics support systems, nuclear power generation systems and management information, and control systems.

In June 1969 he joined the faculty of the Naval Postgraduate School where he is teaching in the Department of Administrative Sciences. His current research interests are dynamic models of micro-economic processes and large scale resource management systems.

He is a member of the American Mathematical Society, the American Economic Association, and the Institute of Management Sciences.
