---

Gahagan, Ben and Elzey, Scott, "Case Studies IV: Adaptive Management of Fish Passage at a Pool and Weir Fishway" (2016).  
*International Conference on Engineering and Ecohydrology for Fish Passage*. 10.  
[https://scholarworks.umass.edu/fishpassage\\_conference/2016/June21/10](https://scholarworks.umass.edu/fishpassage_conference/2016/June21/10)

This Event is brought to you for free and open access by the Fish Passage Community at UMass Amherst at ScholarWorks@UMass Amherst. It has been accepted for inclusion in International Conference on Engineering and Ecohydrology for Fish Passage by an authorized administrator of ScholarWorks@UMass Amherst. For more information, please contact [scholarworks@library.umass.edu](mailto:scholarworks@library.umass.edu).

# ADAPTIVE MANAGEMENT OF FISH PASSAGE AT A POOL AND WEIR FISHWAY

**Marine Fisheries**  
Commonwealth of Massachusetts

BEN GAHAGAN AND SCOTT ELZEY

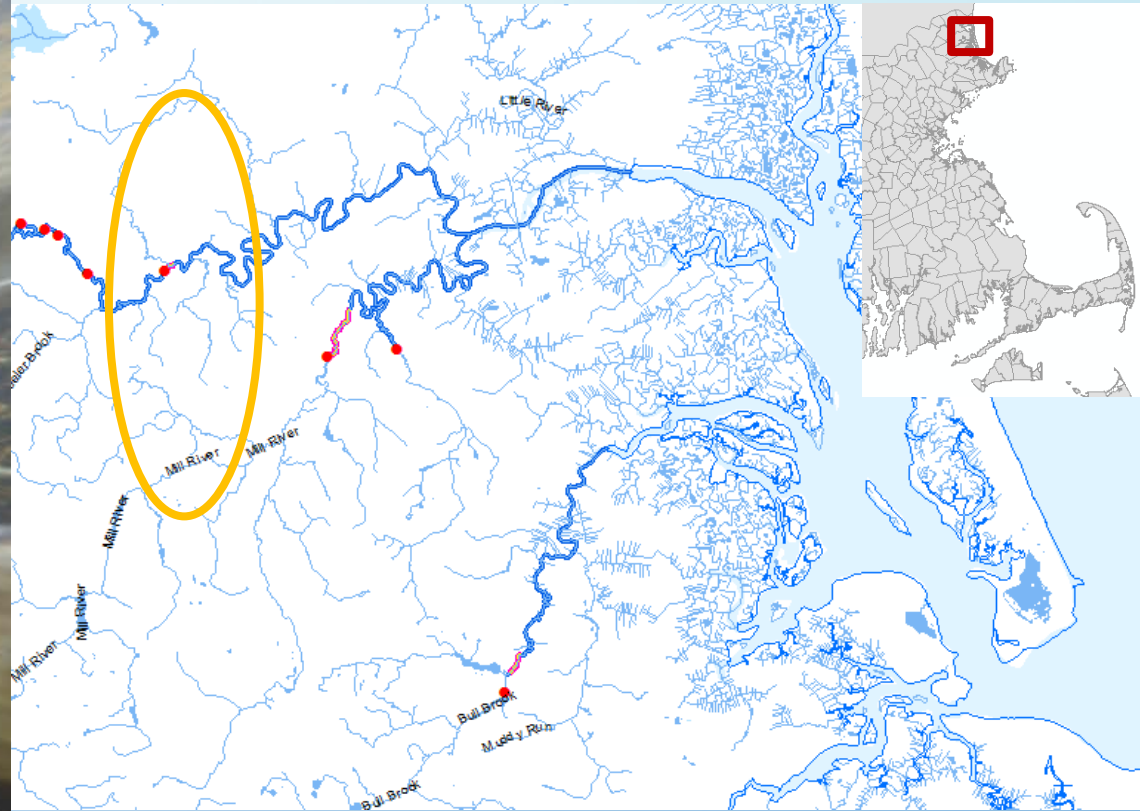

MASSACHUSETTS DIVISION OF MARINE FISHERIES

2016 INTERNATIONAL CONFERENCE ON RIVER CONNECTIVITY

6/21/2016

# THE PARKER RIVER

- D
- A
- L
- T
- I
- B
- D

# ADAPTIVE MANAGEMENT

- PROPOSED AND DEVELOPED BY HOLLING (1978), WALTERS (1986)
  - ITERATIVE
  - MONITORING TO PROVIDE NEW INFORMATION
  - ADJUSTMENTS BASED ON MONITORING

# TIMELINE

- **SPRING 2013:** NO IMPROVEMENTS, NAÏVE TO FISHWAY PERFORMANCE AT FLOWS, TAGGED
- **FALL 2013:** CONSTRUCTION TO REPAIR AND REINFORCE CULVERT WEIRS
  - ADD BOARD SLOT ABOVE FISHWAY ENTRANCE
- **SPRING 2014:** ADVERSE HYDRAULIC CONDITIONS FROM “FIX”, TAGGED
  - ALLEVIATED ON 5/1 WITH STONE WEIR BELOW DOWNSTREAM WEIR
- **FALL 2014:** ADDED FLASHBOARDS TO WEIRS
  - ALLOWED FOR RAISED BOARD AT SLOT ABOVE ENTRANCE
- **SPRING 2015:** IMPROVED ENTRANCE CONDITIONS (?), 2 YEARS OF EXPERIENCE WITH FISHWAY OPERATION, TAGGED

# DATA COLLECTION

## DAILY RESOLUTION

- POOL DEPTHS AND ENTRANCE HEIGHT
- TEMPERATURE
- FLOW FROM USGS GAGE
- PASSAGE NUMBERS
  - 2013: SMITH-ROOT 1601
  - 2014 & 2015: INFRA-RED LIGHTED VIDEO

# IN FISHWAY FLOWS

- CALCULATED ENERGY DISSIPATION FACTOR AT LOW, MEDIUM, AND HIGH FLOWS
  - LOW:  $M^3 * SEC^{-1} < 1.0$
  - MEDIUM:  $1.0 < M^3 * SEC^{-1} < 1.5$
  - HIGH:  $M^3 * SEC^{-1} > 1.5$
- $X^2$  TO TEST DIFFERENCES AMONG YEARS

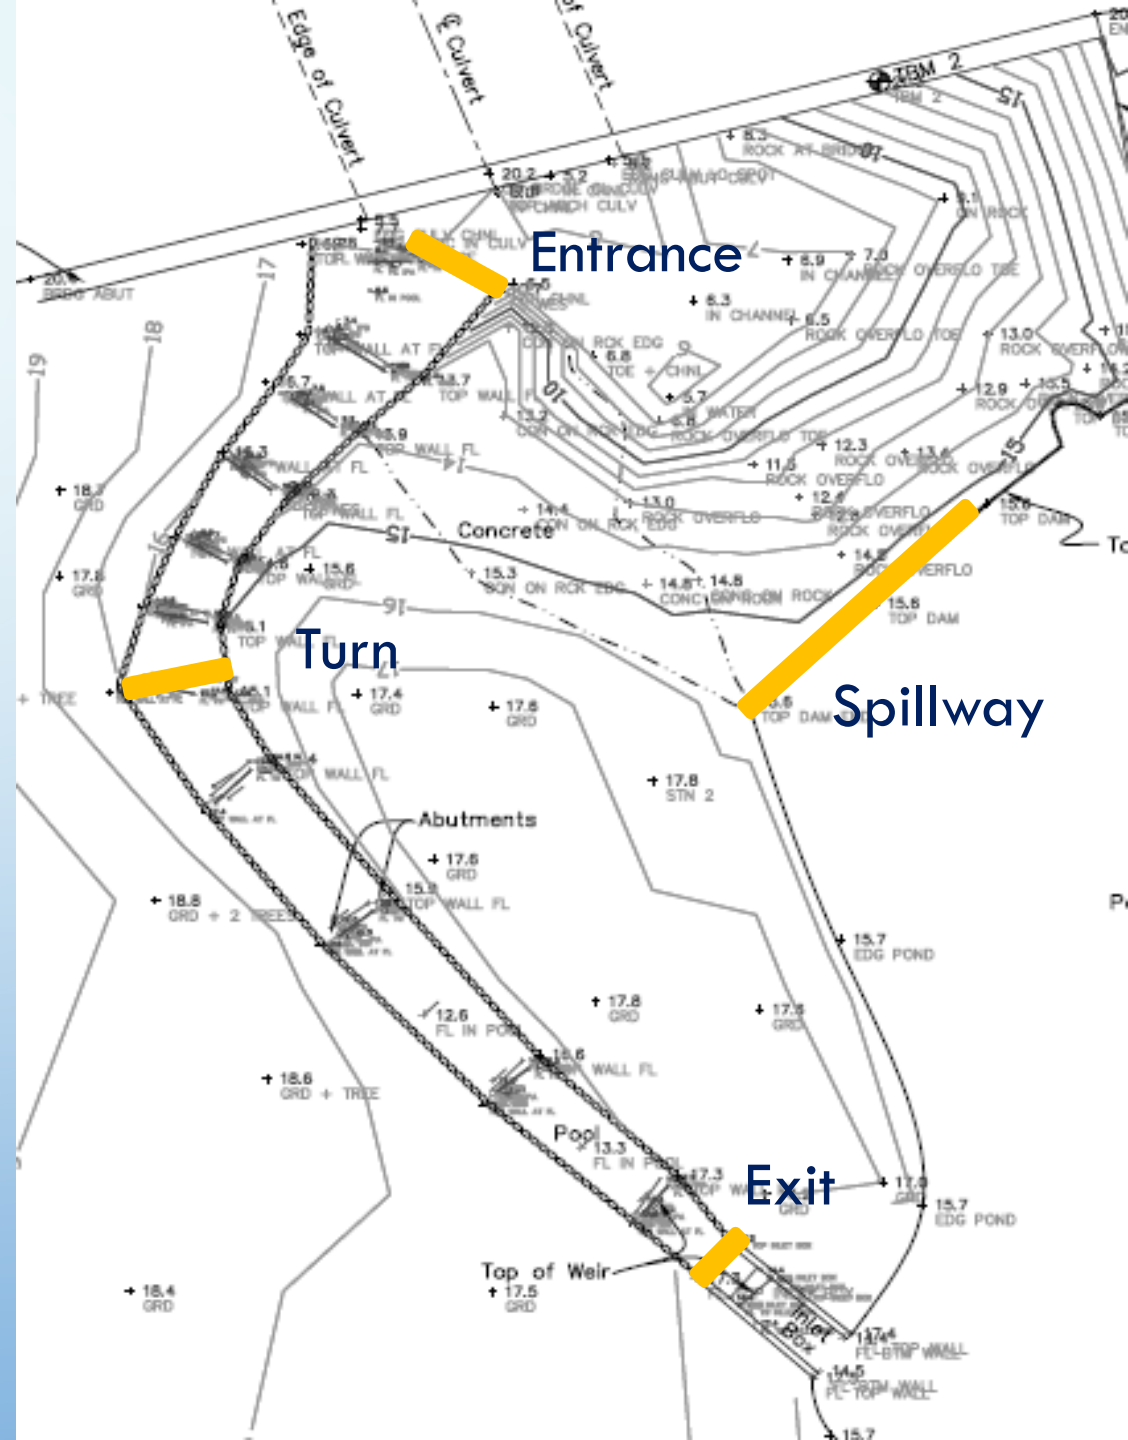

DESIGN	$\Psi = \frac{\gamma Q D}{EDF}$	EVALUATE	$EDF = \frac{\gamma Q D}{\Psi}$
--------	---------------------------------	----------	---------------------------------

where:

- EDF is the volumetric energy dissipation rate in ft-lb/s/ft<sup>3</sup>
- $\Psi$  is the water volume in the fishway step pool in ft<sup>3</sup>
- D is the hydraulic drop from one pool to the next in ft
- Q is the flow over the weir crests, through the fishway, in cfs
- $\gamma$  is the unit weight of water (62.4 lbs/ft<sup>3</sup>)

# PIT ARRAY

- MULTIREADER SYSTEM
  - 3 ANTENNAS IN FISHWAY
    - ENTRANCE
    - TURN
    - EXIT
- FOURTH ANTENNA ON SPILLWAY WITH LOW FLOW CHANNEL

# TAGGING

- FISH COLLECTED DOWNSTREAM OF ENTRANCE USING DIP NETS
- 23MM HALF-DUPLEX TAG, FOLLOWED THE INTRAPERITONEAL METHOD DESCRIBED IN CASTRO-SANTOS AND VONO (2013)
- FOR EACH FISH THE SPECIES, SEX, TOTAL LENGTH (TL), AND AN ESTIMATION OF SCALE LOSS WAS RECORDED
- HANDLING TIME, OR TIME OUT OF WATER, WAS KEPT TO A MINIMUM (MEAN = 18.65 SEC, SD = 1.51)

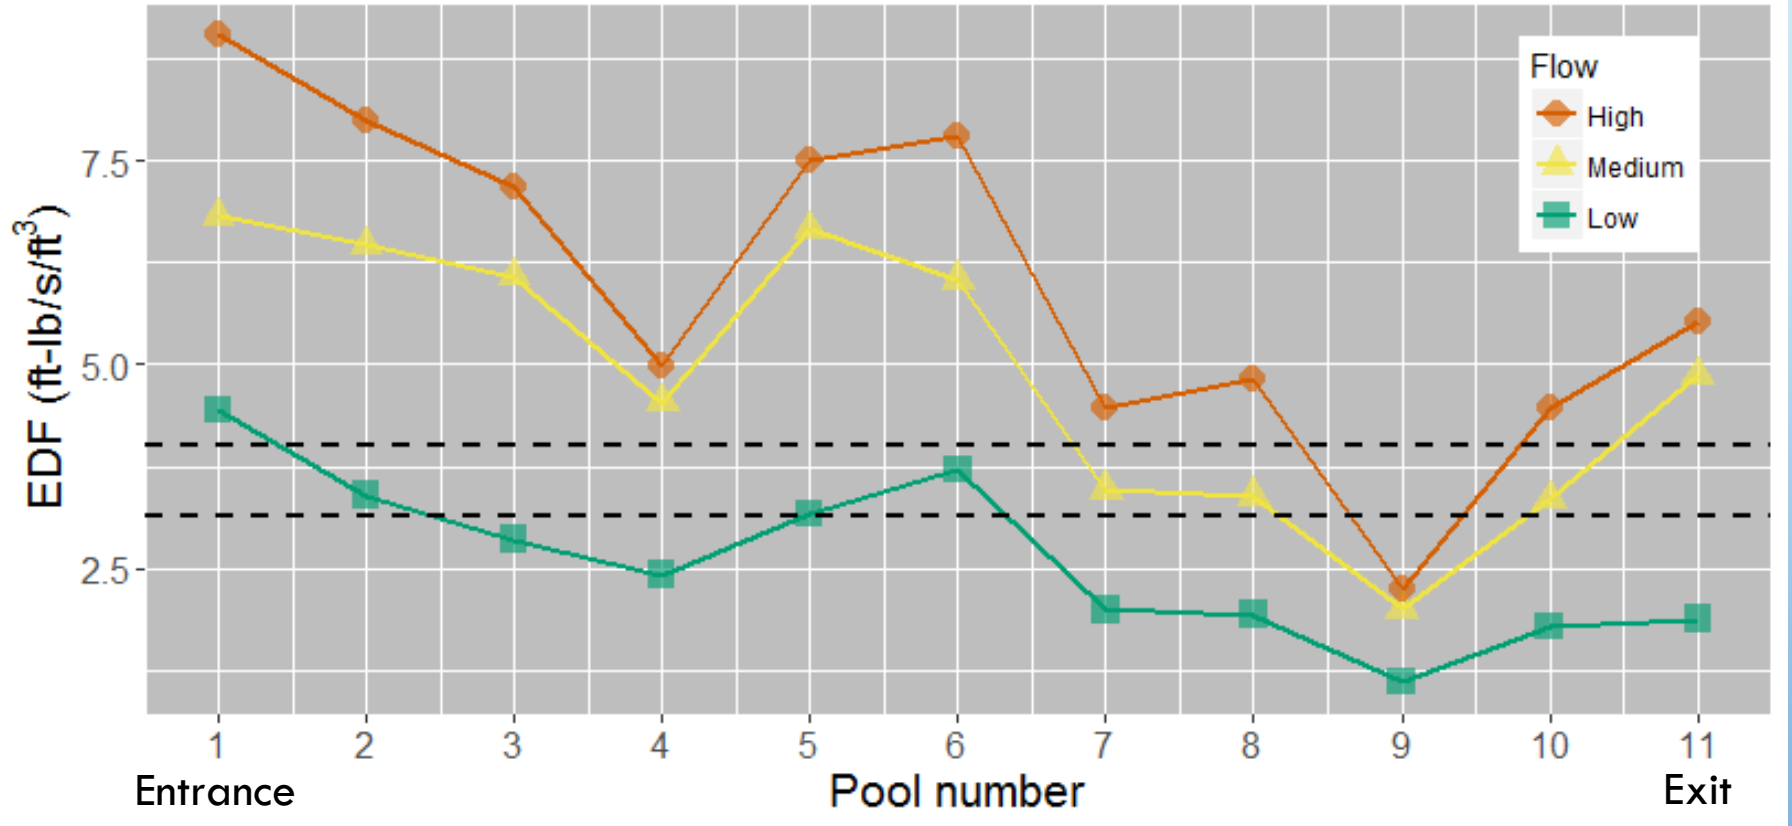

# MULTIPLE LOGISTIC REGRESSION

- BINARY RESPONSE: PASS (0), FAIL (1)
- INDEPENDENT VARIABLES:
  - ENVIRONMENTAL  
RIVER FLOW, TEMPERATURE, IN FISHWAY  
FLOWS (CAT), ENTRANCE HEIGHT, \*JULIAN DATE
  - BIOLOGICAL  
TOTAL LENGTH, SEX, SPECIES, SCALE LOSS,  
YEAR TAGGED (2014, 2015, ALL)
- FOR EACH YEAR: STEPWISE MODEL SELECTION
  - LOG LIKELIHOOD TEST AND AIC; WALD TEST,  
HOSMER-LEMESHOW GOODNESS OF FIT
  - *INDIVIDUAL YEAR MODELS FOR ALEWIFE ONLY*
- ALL YEARS
  - MIXED EFFECT FOR FISH, ADDED ENTRANCE CONFIGURATION
  - *BOTH SPECIES INCLUDED*

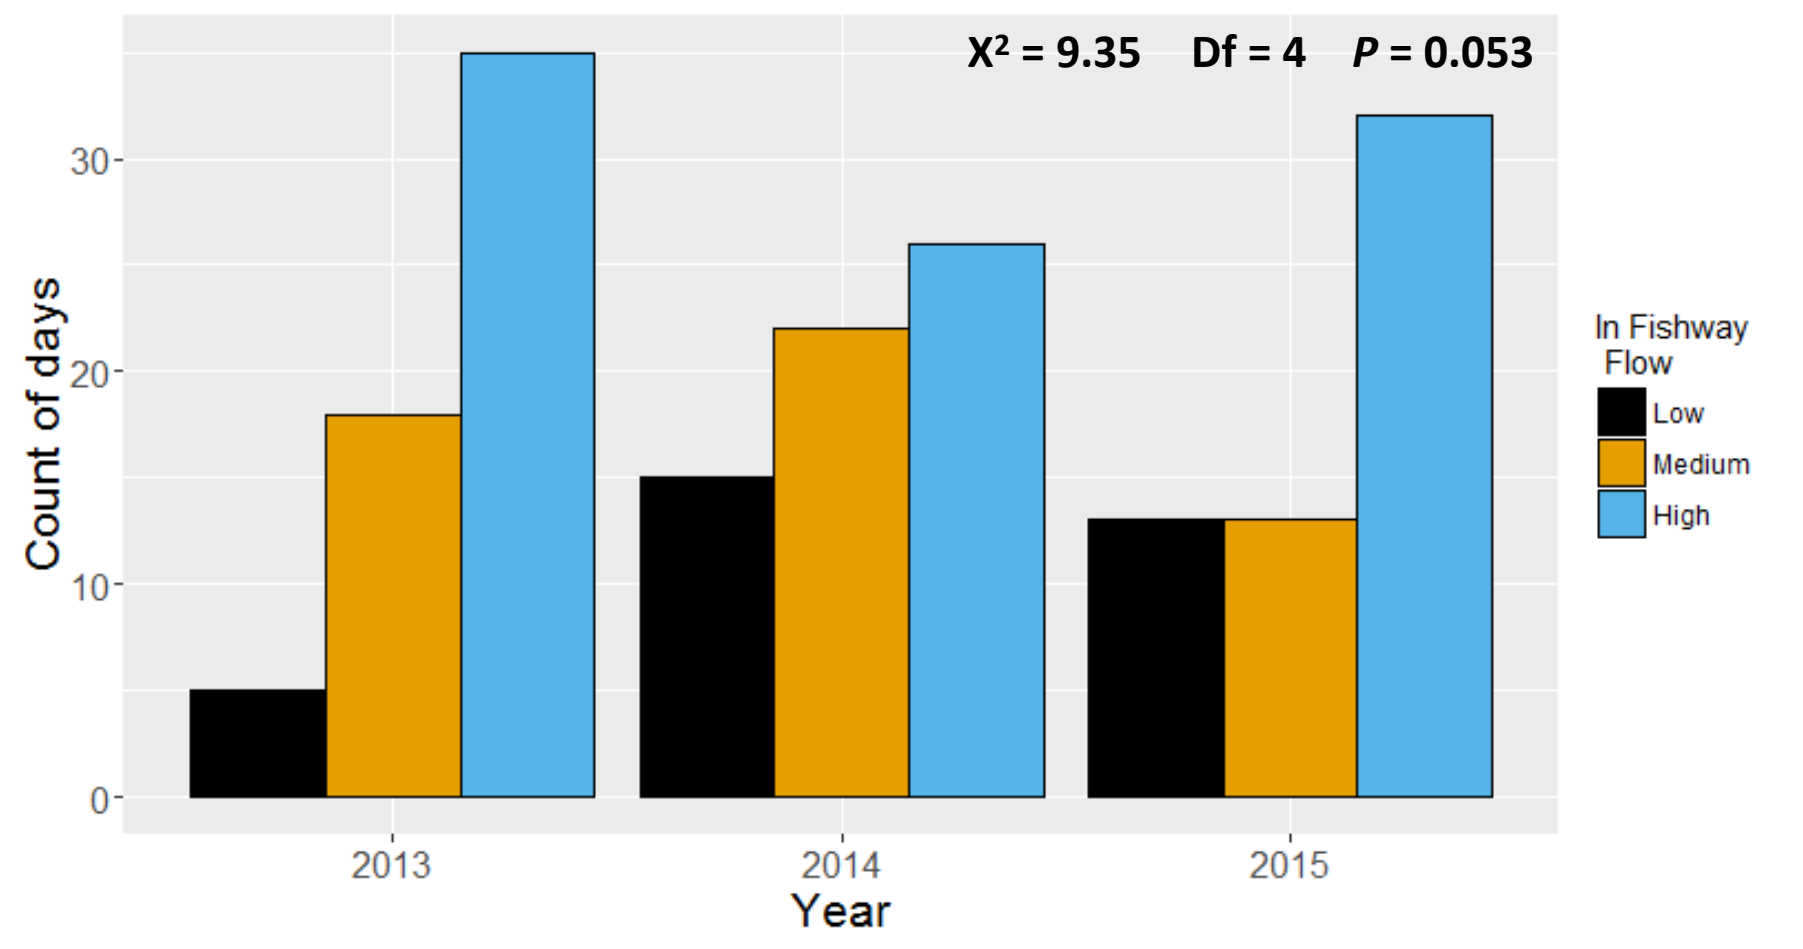

# IN FISHWAY FLOWS

## EDFs at reference flows

FT-LB/S/FT <sup>3</sup>	RECOMMENDATIONS & REQUIREMENTS
5	<b>ATLANTIC SALMON (4.0 ft-lb/s/ft<sup>3</sup>)</b> salmonids, adult (3.13 ft-lb/s/ft <sup>3</sup> ); NOAA (2011)
4	<b>AMERICAN SHAD (3.15 ft-lb/s/ft<sup>3</sup>)</b> trout (3.13 ft-lb/s/ft <sup>3</sup> ); EA UK (2010)
3	non-salmonids (2.09 ft-lb/s/ft <sup>3</sup> ); EA UK (2010)
2	step-pools at turns (2.09 ft-lb/s/ft <sup>3</sup> ); EA UK (2010)
1	salmonids, juvenile (2.0 ft-lb/s/ft <sup>3</sup> ); NOAA (2011)
0	resting pools (1.04 ft-lb/s/ft <sup>3</sup> ); FAO and DWVK (2002)
0	Denil resting pools (0.52 ft-lb/s/ft <sup>3</sup> ); FAO and DWVK (2002)

# IN FISHWAY FLOWS

# TAGGING

## RIVER HERRING DETECTED

YEAR	ALEWIFE	BLUEBACK	TOTAL
2013	114 (.48)	45 (.22)	<b>156 (.35)</b>
2014	66 (.33)	28 (.15)	<b>94 (.22)</b>
2015	63 (.55)	42 (.19)	<b>105 (.31)</b>
<b>TOTAL</b>	<b>243 (.44)</b>	<b>115 (.18)</b>	<b>355 (.30)</b>

### Length frequency of tagged herring

# PASSAGE RATES

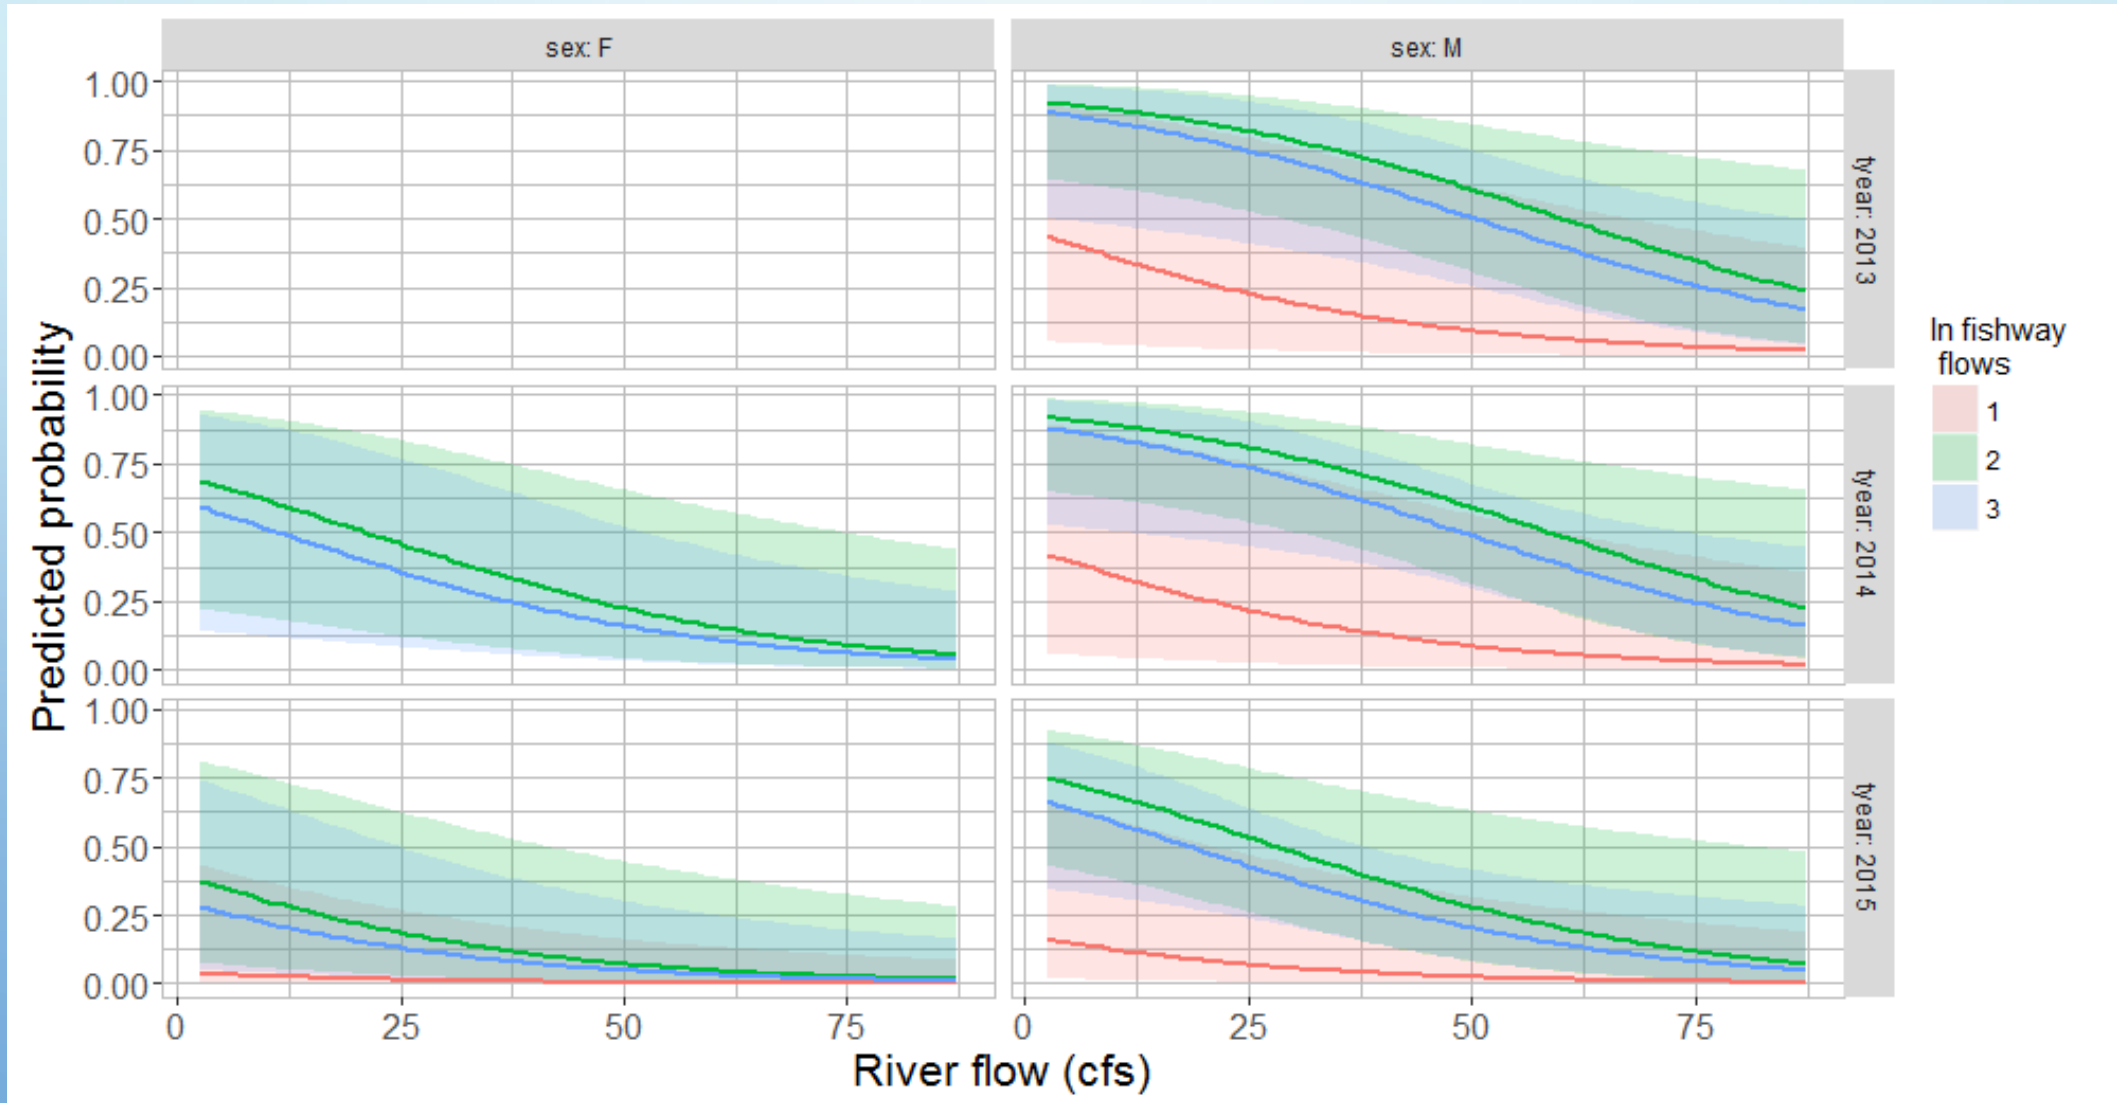

# LOGISTIC REGRESSION MODELS

	Terms	n	AIC	$\Delta$ AIC	H-L GOF			Likelihood Ratio
					$\chi^2$	df	<i>P</i>	
2013	TL, Temperature, In Fishway Flows	59	55.57	1.597	16.026	8	0.042	<i>P</i> = 0.002
2014	River Flow, Entrance Height	66	42.07	0.63	7.176	6	0.305	<i>P</i> = 0.014
2015	In Fishway Flows, Sex, River Flow, Year Tagged	87	118	0.03	9.529	8	0.3209	<i>P</i> = 0.019
All	TL, River Flow, Entrance Height, Sex, Species, Years since tagging	354	248.1	1.35			NA	

# 2015: IN FISHWAY FLOWS, SEX, RIVER FLOW, YEAR TAGGED

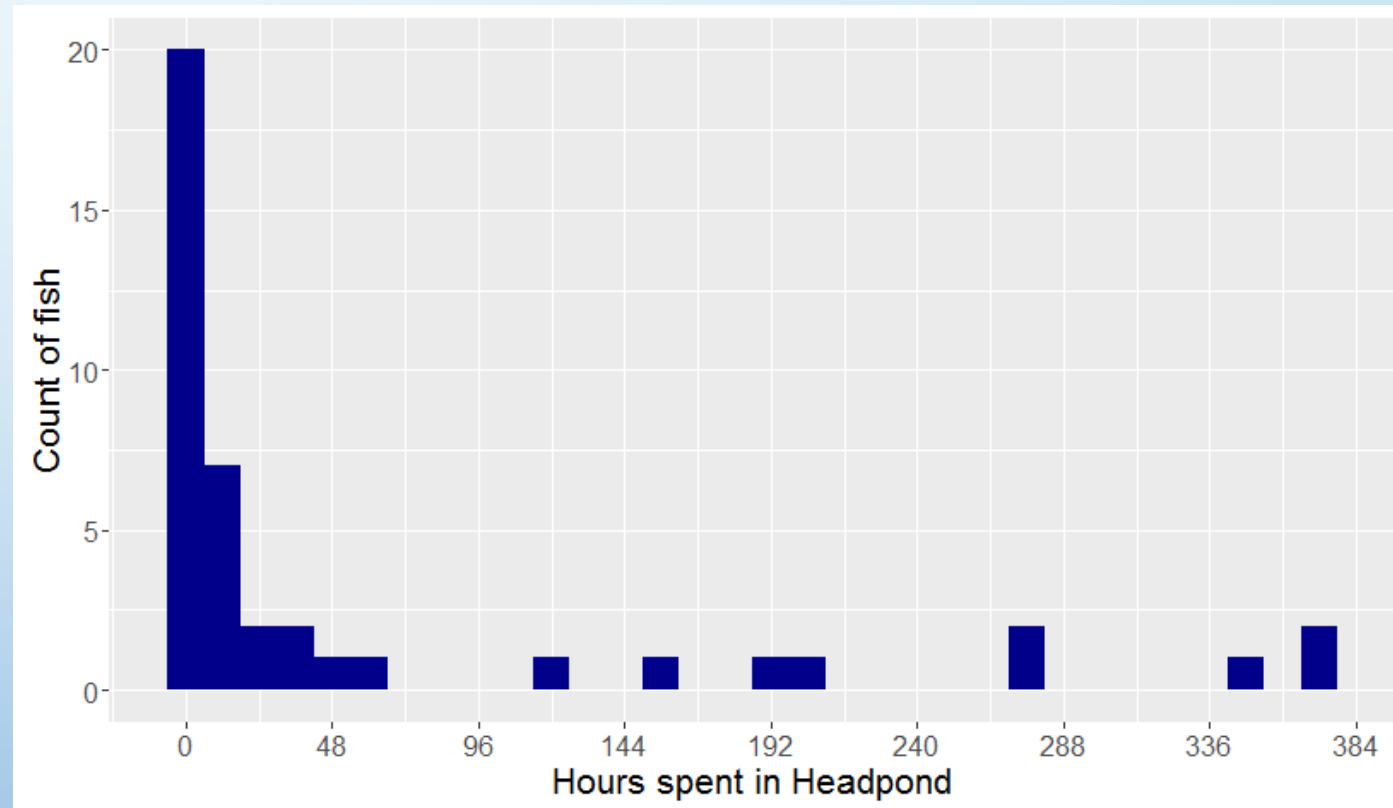

# ALL YEARS: TOTAL LENGTH, RIVER FLOW, ENTRANCE HEIGHT, SEX, SPECIES, YEARS SINCE TAGGING

# CONCLUSIONS

- PASSAGE RATES HAVE IMPROVED, BUT REMAIN LOW
- BLUEBACKS DO NOT PASS WELL
- POSSIBLE WITHIN YEAR EFFECT OF TAGGING
- PATTERN OF PASSAGE OF TAGGED FISH MATCHES FISH COUNTED
- MOTIVATION OF THIS POPULATION?

# ACKNOWLEDGEMENTS

- DAVE ANDREWS, NICOLE WARD, RYAN JOYCE, ED, CLARK, KATIE ROGERS, KIM TRULL, KEVIN SULLIVAN, ANDREW JONES, ALEX HARO, TED CASTRO-SANTOS, BRIAN WAZ, MICAH DEAN, GARY NELSON, SCOTT AND KARIN LEPANNEN, BILL AND DIANE LORD, PARKER RIVER CLEAN WATER ASSOCIATION, USFWS, LUCY

# NEXT STEPS

- ADD 2016 DATA
- INCORPORATE APPROACH ANTENNA FROM 2015 AND 2016
- FURTHER QUANTIFY INDIVIDUAL PASSAGE METRICS SUCH AS # OF ATTEMPTS, DELAY, ETC.
- CONDUCT TIME TO EVENT ANALYSES
- BY SPECIES ANALYSES

# ANTENNA PERFORMANCE

```
> table(Y15$loc, Y15$year)
```

	2013	2014	2015
