Alma Mater Hymn

COMPOSED BY THEODORE M. BURTON

*Across the quad at eventide the shadows softly fall,
The tower of Old Main appears and peace rests over all.
The lighted "A" upon the hill stands out against the
blue;
Oh, Alma Mater, Utah State, my heart sings out to
you.*

*And through the years as time rolls on and student
friendships grow,
We'll ne'er forget the joys we had, those days we used
to know,
Thy mem'ries ever will be new, thy friends be ever true.
Oh, Alma Mater, Utah State, my heart sings out to
you.*

of Art.*

Academic Heraldry

The history of academic heraldry reaches far back into the early days of the oldest universities. A statute of 1321 required that all "Doctors, Licentiates, and Bachelors" of the University of Coimbra wear gowns. In England, in the second half of the fourteenth century, the statutes of certain colleges forbade "excess in apparel" and prescribed the wearing of a long gown, which may have been counted necessary for warmth in the unheated buildings frequented by medieval scholars. Hoods were used to cover the head until later replaced by the skull cap and eventually by academic caps. Both Cambridge and Oxford have made academic dress a matter of university control to the inclusion of even its minor details; and in Laudian days in Oxford, any tailor who departed from the authorized design "even by a nail's breadth" was to be punished by the vice-chancellor of the University.

When American colleges and universities desired to adopt some suitable system of academic apparel, it seemed best to agree on some definite system which all might follow. Accordingly, there was held on May 16, 1895, at Columbia University, a conference of representatives of the governing boards of various interested institutions. From that meeting came a code of academic dress for the colleges and universities of the United States, which most institutions of higher learning have adopted and followed.

Gowns

The academic gown for the bachelors degree has pointed sleeves and is designed to be worn closed. The gown for the masters degree has an oblong sleeve, open at the wrist, like the others. The sleeve base hangs down in the traditional manner. The rear part of its oblong shape is square cut and the front part has an arc cut away. The gown is so designed that it may be worn open or closed. The gown for the doctors degree has bell-shaped sleeves and may also be worn open or closed.

Colors

For all academic purposes, including trimmings of doctoral gowns, edging of hoods, and tassels of caps, the colors associated with the different academic disciplines are as follows:

| | |
|-------------|------------|
| Agriculture | Maize |
| Business | Drab |
| Education | Light Blue |
| Family Life | Maroon |

| | |
|---|-------------|
| Engineering | Orange |
| Humanities, Arts, Social Sciences | White |
| Natural Resources Science | Russett |
| School of Graduate Studies (EdD, PhD) | Gold-yellow |
| | Gold |

Hoods

Academic hoods are worn by recipients of advanced degrees. The masters degree hoods are three and one-half feet in length and are lined with the official color or colors of the college or university conferring the degree, which at Utah State University are navy blue and white, displayed in a heraldic chevron. The doctoral hood consists of a larger and longer assemblage of institutional color draped over the recipient's shoulders and falling well down the back. The binding or edging of the hoods is of velvet or velveteen, three inches wide and five inches wide for the masters and doctors degrees, respectively.

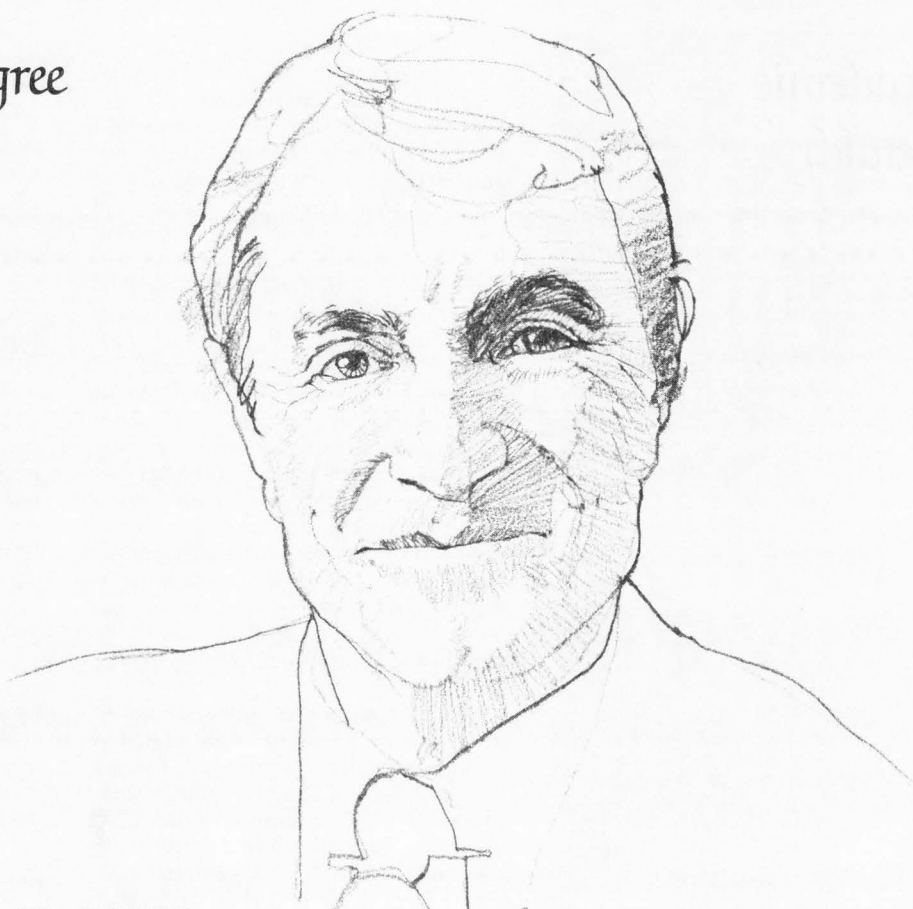

Caps

Academic caps come in two forms, the traditional mortarboard (from Oxford), a square cap; and a soft cap which resembles an oversized beret (the Cambridge model). The mortarboard, used by Utah State University, is worn with a tassel. Black tassels designate any degree, colored tassels designate the major field of learning, and gold tassels indicate doctors and governing officials of institutions.

Academic Procession

The commencement procession originates at the Old Main building and the line of march extends down Eighth East Street to the Spectrum. The procession is composed of three divisions: (1) the speakers, Regents and Institutional Council members, administrative officers, and other members of the platform party; (2) the faculty; and (3) candidates for degrees, with candidates for advanced degrees in the lead and others in groups according to the degrees for which they are candidates. The procession enters the Spectrum in the above order for the Baccalaureate Services. For the morning of Commencement, the procession will stop at the tunnel entrance to the Spectrum, the first two divisions dividing so that the candidates for graduation pass between them and enter the hall first.

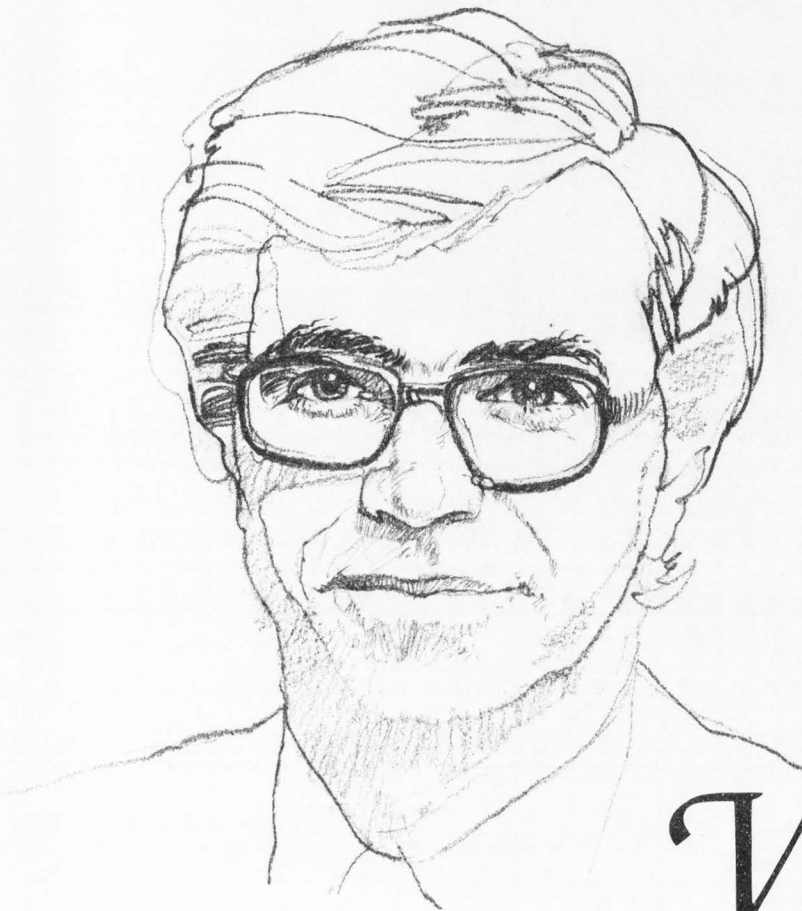

Honorary Degree

NEAL A. MAXWELL,

scholar and a public servant, has acquired a prodigious amount of learning and experience and has used this to serve mankind. His earlier career as a university administrator proved him to be an effective advocate for higher education and his positive position has redounded to the benefit of this University as well as the others in the state. His influence has likewise been felt as a result of his significant contributions to the governance of the state—notable among them his Chairmanship of the Utah Constitutional Revision Commission. □ A decade ago he was called by his church to direct its world-wide educational services. In this capacity he has become a world traveler and a world citizen. His administration of this system comprising tens-of-thousands of students in scores of countries has had the admiration and respect of all who have taken the time to examine it. □ For many people such a heavy administrative load would have written finis to scholarly publications. He apparently regarded it as only another challenge. In moments stolen here and there, in airport waiting rooms, on transoceanic flights in the middle of the night, on desert drives with a dictaphone his only companion, he has distilled wisdom from his ample store and gestated scholarly books at regular intervals. □ His second appearance as USU's Baccalaureate speaker indicates that this University holds the same high opinion as scores of other institutions and organizations who have sought to share in the spell of his rhetoric and oratory, and be lifted by his erudition. □ In the words of Baron Macaulay: "We cannot regard without admiration the amplitude and fertility of [his] intellect," his abundant vocabulary, his genius with the written and the spoken word, and his scholarship which knows no circumscription. Utah State University takes pride in conferring on Neal Maxwell its honorary degree, Doctor of Humanities.

Honorary Degree

W

YATT THOMAS JOHNSON

has distinguished himself as a journalist and has served the national government in high places. His experience with newspapers began when he was a teenager and led through the University of Georgia's School of Journalism and Harvard's Master of Business Administration program. He served as a White House Fellow, as Assistant and Deputy Press Secretary, and as Special and Executive Assistant to the President of the United States. □ His return to work with the news media in 1973 marked the beginning of his meteoric rise to the prestigious position he now holds as Publisher and Chief Executive Officer of the *Los Angeles Times*. On the way up he was honored by *Time* magazine for his leadership and contribution as Editor and Publisher of the *Dallas Times Herald*. Many other signal honors have come to him. □ Recognition of his abilities has followed as he has moved from place to place and from responsibility to responsibility: In 1967 he was named one of five outstanding young men of Georgia; in 1973, one of the five most outstanding Texans; and in 1974, one of the ten outstanding young men in the United States. □ His high and influential positions in national government and his leadership roles in major communications media have provided for him an unusual opportunity to assay the influence of each on the other. He has recognized the power of public opinion, and today he is in a position, as the leader of one of America's greatest newspapers, to utilize the power of the press as a sacred trust in shaping public opinion. □ Further, it must be recognized that his myriad honors have come in so few years. A young man of great stature, he still has much to look forward to. Utah State University recognizes the contributions he has made to society and affirms its faith in his potential by conferring on him the honorary degree, Doctor of Humanities.

Honorary Degree

DOROTHY MYERS CARSON,

a distinguished member of the bar and a learned occupant of the judicial bench, is honored by Utah State University as an illustrious alumna. Her extraordinary ability and accomplishments have been widely noted and have brought many honors to herself, to her native state, and to this University, her Alma Mater. To have been selected as America's Business Woman of the Year by the national American Business Women's Association is to have reached a unique pinnacle. Where does one go from there? □ To be a judge is a high calling and a frightening one. Freedom, property rights, and even life itself are sometimes at stake. She has brought to the hall of justice a keen intellect, scrupulous honesty, a warm humaneness, and a ready wit. She has always been a disciple of hard work and a champion for human rights. □ She is active in the American Bar Association, American Judicature Society, Arizona Judges Association, Business and Professional Women's Club, Interclub Council, Soroptimist International, American Association of University Women, and Alpha Chi Omega. It says a great deal about her values to note that in addition to active participation in all these professional groups she is also serving as a Sunday School teacher and as a member of the Salvation Army Women's Auxiliary. Notwithstanding the accolades for achievement which bid fair to inundate her physical self, she has not lost the common touch and has found time to serve her home state by appearing as featured speaker at USU's Mothers Weekend and as a member of the National Advisory Board of Utah State University. □ Utah State University takes pleasure in honoring Judge Carson as a graduate and as a native daughter of this state by conferring upon her the honorary degree, Doctor of Laws.

Honorary Degree

ELDON J. GARDNER

is honored by Utah State University for the distinguished service and leadership he has rendered to the University, the state and nation, and the world. As one of Utah's most illustrious professors he has excelled in the discovery of new scientific truths, in their digestion and interpretation for students, and in their application for the betterment of mankind. For four decades he and his colleagues have conducted fundamental studies which have moved forward the science of genetics. His publication record of more than two hundred scientific papers and several text books stands out preeminently. His influence as a teacher is well known. Hundreds of students have had their appreciation of life heightened from exposure to his lectures and his text on the *History of Biology*. Hundreds more have become professional biologists because of his direct influence or his writings. □ As an example of the application of newly acquired knowledge to the public good, his discovery of the heritability of a type of colon cancer which can be successfully treated in early stages has literally saved the lives of many members of the affected families. His medical colleagues have honored him by naming this malady "Gardner's Syndrome." □ In addition to his distinguished service as a discoverer and purveyor of new knowledge, the University recognizes his warm-hearted humanitarianism, his willingness to cooperate with his colleagues, his friendly approachability, and his perpetual optimism and good humor. He has lent his support and frequently his leadership to many civic and service organizations. He is a distinguished citizen as well as a distinguished professor. □ In recognition of his manifold contributions to society and his exemplary character, Utah State University is proud to confer on Eldon J. Gardner, whom it owes much, the honorary degree, Doctor of Science.

D. Wynne Thorne Research Award

PETER M. BANKS,

professor of physics and head, Department of Physics at Utah State University, has made significant contributions to the understanding of complex physical phenomena occurring in the interactions between the earth's atmosphere and surrounding space. His experiments have explained many diverse observations and opened the way to a better appreciation of the electrical coupling that exists between the magnetosphere and the ionosphere. Related to this has been his theoretical work defining the high latitude ionosphere, which now forms the basis for interpretation of most experimental work done in the high latitude regions. Thus his contributions are of two kinds: first in understanding complex physical problems, and second in the design and execution of convincing experiments and the facilities needed to perform them. □ He has exerted considerable influence at a national level in designing and giving direction to programs in upper atmosphere research. Several entirely new classes of scientific experiments have been initiated by him or by national committees under his chairmanship. □ Wide recognition of his work is evidenced by his having received the Space Science Award of the American Institute of Aeronautics and Astronautics and the Appleton Prize of the Royal Society, London. For his unusual contributions to space science nationally and internationally, Dr. Banks has been awarded the D. Wynne Thorne Research Award.
