Hyrax

Hyrax Features - http://bit.ly/hyrax_features

- Upload files and folders
- Describe works with (vocab-backed) metadata
- Derivative generation
- Characterization of files
- Full-text extraction
- Virus scanning
- Internationalized UI (7 languages)
- Create new/restore old versions
- Batch upload / batch editing
- Faceted search and browse
- Role-sensitive user dashboard
- Google Analytics support
- User profiles
- Tweak UI colors via UI
- User notifications
- Single-use links for private works
- Configurable workflows (e.g., mediated deposit)
- Toggle features on/off in UI
- Reporting/metrics in UI
- Proxy deposit
- Contact form
- User-defined, nestable object types
- ResourceSync API
- (Always more coming soon...)

Featured Researcher

Leah Minc - Associate Professor of Anthropology

Compositional analyses of archaeological materials play a significant role in the investigation of past human behavior and ancient economies. Through trace-element characterization of artifacts, raw materials, human remains, and botanical samples, archaeologists are able to address a host of questions concerning resource utilization, trade and exchange, subsistence practices, and the environmental adaptations of past cultures.
