# VERBAL PHRASES IN LHASA TIBETAN—III

By R. K. SPRIGG

## əW : EXPONENTS OF 'ə'; PROSODIC AND PHONEMATIC SYSTEMS

There is one important respect in which əW differs from yW and wW. For these last it was sufficient to state exponents of 'y' and 'w'; the exponents of 'ə' however can be stated only by introducing a further prosodic system, of the initial syllable, y/w, i.e. 'y neutral words' (yəW) and 'w neutral words' (wəW). The prosodic and phonematic systems of yəW resemble those stated above for the initial syllable of yW, and those of wəW resemble the systems stated for the initial syllable of wW, i.e.

The two-term y/w system (yə/wə) is stated for the initial syllable of the (ə) word, and is not to be confused with the two-term prosodic system of the syllable initial (y/wI). The exponents of y and w in the initial syllable (CVC) of əW comprise :—

	<i>y</i>	<i>w</i>
A. -V- : frontness + spreading	frontness — spreading, backness ;	
B. C- :	velarity, absence of consonant articulation	
e.g.		
A. -V- : y :		
tre <u>gəjɪ:</u> (ત୍ରେ.ଗେ.ଜି) re <u>berə:</u> (ରେ.ବେ.ରେ) ce <u>raɹə:</u> (ଚେ.ରା.ରେ)		
	w :	
ca <u>nəre:</u> (କୁନେ.ରେ) t <u>ea:bəjɪ:</u> (ତେଅ.ବେ.ଜି) pa <u>gɪdu:</u> (ପୁଗ୍ରୀ.ବେ.ଦୁ)		
'n <u>agɪdu:</u> (ନ୍ଯୁ.ଗ୍ରୀ.ଦୁ) la <u>bəjɪ:</u> (ଲ୍ଯା.ବେ.ଜି)		
B. C- :		
ka <u>ləməre:</u> (କୁଲେ.ମେ.ରେ) u <u>ra:bərə:</u> (ଉରେ.ବେ.ରେ) 'b <u>gɪdu:</u> (ବୁଗ୍ରୀ.ବେ.ଦୁ)		
C. -C :		

The phonetic exponents need to be stated with reference to the c/o system :—

	<i>c</i>	<i>o</i>
w :	labiality	velarity, e.g.
cW :	'b <u>gɪdu:</u> (ବୁଗ୍ରୀ.ବେ.ଦୁ)	'b <u>gɪdu:</u> (ବୁଗ୍ରୀ.ବେ.ଦୁ)
	'd <u>amgɪdu:</u> (ଦୁମ୍ବୁଗ୍ରୀ.ବେ.ଦୁ)	'd <u>amgɪdu:</u> (ଦୁମ୍ବୁଗ୍ରୀ.ବେ.ଦୁ)
oW :	t <u>ea:gəbəjɪ:</u> (ତେଅ.ଗେ.ବେ.ଜି)	t <u>ea:gəbəjɪ:</u> (ତେଅ.ଗେ.ବେ.ଜି)
	'l <u>a:nəre:</u> (ଲ୍ଯା.ନେ.ରେ)	'l <u>a:nəre:</u> (ଲ୍ଯା.ନେ.ରେ)

Where the -C term is -T, there are as exponents of y/w :—

y : long duration of vowel ; w : short duration of vowel (cf. also yW, wW), e.g.

w : magidu: (ད་པ්-རුකු) (|'m̥a.d̥i.d̥u:) nabere (ན-ප-ན්-ද) (n̥a.b̥e.re) 'sabere (ස-ප-න්-ද) (s̥a.b̥e.re)

y : berewa: (ද-ප-න්-ද) (d̥a.b̥e.re.wa:) se:gejih (ස-ප-ෂු-න්-ද) (s̥a.b̥e.ge.ji.h)

### I. EXPONENTS OF 'ə'

Exponents<sup>1</sup> of 'ə' may be stated for the initial and medial syllables ; exponents of non-'w' may be stated for the final syllable also.

The exponents of ə are as follows :—

#### A. Initial Syllable (CVC)

(1) -V- is characterized by

(a) backness — rounding (cf. wW ; backness + rounding)

(b) frontness — spreading (,, yW ; frontness + spreading),

e.g. :—

(a) barbare (པ-ර-ප-න්-ද) (pa.r̥a.p̥e.n̥a.d̥) tangejih (ཏ-ක-ඡ-යිහ) (ta.ng̥e.ji.h) magidu: (ද-ම-ඩ-ඕ-රුකු) (d̥a.m̥a.d̥i.d̥u:)

lalbgidu: (ල-බ-ඩ-ඕ-රුකු) (la.l̥b̥i.d̥u:)

(b) nabere (ນ-ප-න්-ද) (n̥a.b̥e.re)

tanaji (ຕ-ආ-ජ-යි) (ta.n̥a.ji)

(2) C- (wəW)

(a) absence of lip-spreading or lip-rounding (cf. yW/wW),

(b) absence of consonant articulation, e.g. :—

(a) trabere (ත-බ-ප-න්-ද) (t̥a.b̥e.re)

lapare (ල-ප-ප-න්-ද) (la.p̥a.p̥e.n̥a.d̥)

(b) berewa: (ද-ප-න්-ද)

#### B. Medial Syllable (C<sub>1</sub>V<sub>1</sub>)

In cW -V<sub>1</sub> may be characterized by centralization, e.g. :—

de:gejih (ද-ෂ-ඡ-යිහ) (d̥e.ge.ji.h) te:gejih (ຕ-ෂ-ඡ-යිහ) (ta.ge.ji.h) la:bgejih (ල-බ-ඡ-යිහ) (la.b̥e.ge.ji.h)

#### C. Final Syllable (C<sub>2</sub>V<sub>2</sub>)

Exponents may be stated for 'non-w', but not for 'ə'.

The stating of the exponents of 'ə' completes that of the three terms w/y/ə. It is, however, also possible to state exponents for two of these terms as against the third, e.g. of (A) 'non-y', (B) 'non-w', and of (C) 'w' and 'wə' as against 'y' and 'yə', e.g. 'non-y/yə' :—

<sup>1</sup> Following the precedent set by Parts I and II only those exponents of terms in prosodic systems which are phonetically different from each other have been stated. Thus where it appears in the text that no exponents may be stated for a particular prosodic term in a particular prosodic context, it must be understood that the exponents of the prosodic term are in this context phonetically identical with those of the other term(s) in the system.

A. non-y : (C-) dental nasality, e.g. :—

<u>w</u>	<u>ea</u>	<u>ey</u>
<u>aredebum</u> (ஆர்க்க-ப-ய-ம-உ-ம)	<u>angidu</u> (ஏங்கி-து)	<u>erewem</u> (எரே-க-வ-எ-ம)

B. non-w : (C<sub>2</sub>-) palatal semi vowel,  
absence of rounding,

(-V<sub>1</sub>) absence of rounding, e.g. :—

<i>y</i>	<i>ye</i>	<i>ea</i>
<i>singijø:</i> (सेव्यू.ग्यू.यूः।)	<i>'de:gijø:</i> (पाल्यू.ग्यू.यूः।)	<i>tangijø:</i> (पाल्यू.ग्यू.यूः।)
<i>singire:</i> (सेव्यू.ग्यू.इः।)	<i>'de:gidu:</i> (पाल्यू.ग्यू.एडुः।)	<i>tangere:</i> (पाल्यू.ग्यू.एडेरः।)

### C. non-y/yə : (C-) velarity

<i>w</i>	<i>wa</i>
<u>ugidu:</u> (ウギドウ)	<u>ugidu:</u> (ウギドウ)
<u>ereb:ayu'</u>	<u>kamab</u> (カマバ)
<u>kugydu:</u> (クギドウ)	<u>khaŋgare</u> (カハングラ)

## II. PROSODIC AND PHONEMATIC SYSTEMS

For  $\partial W$  prosodic and phonematic systems are stated as follows :—

#### A. Prosodic Systems :—

- (1) Word : c/o  
 (2) Syllable Initial (I) : (a) r/nr ; (b) y/w (Initial Syllable)

#### B. Phonematic Terms and Systems :—

#### A. Prosodic Systems

(1) WORD : c/o

Exponents of c/o may be stated for the initial and medial syllables (CVC, C<sub>1</sub>V<sub>1</sub>). They comprise :—

(a) *Medial Syllable*

(i)  $-V_1 :$

c : a close degree of aperture

O : an open „ „ „ „ , e.g. :-

c : **tsəbgidu:** (ટેસ-ગીડુ) 'de:gijø: (દે-ગિજો) **tsəxigidu:** (ટેસ-શીડુ) (ટેસ-શી-ડુ)

o : **təarajø** (ટેન-દી-યંડુ) 'lsbandu (એસ-બાંડુ) **terajø** (ટેરા-યંડુ)

The examples given for 'o' above are of  ${}^n1C_1V_1$  (see below, Medial and Final Syllables; Prosodic System of Medial Syllable, 1/ ${}^n1$ ); none may be given for  $1C_1V_1$ .

(ii) C<sub>1</sub>-:

c : velarity ; o : labiality, e.g. :—

c : 'de:gəjɪ: (བྱଶ୍‌ସୁ.ୟିନ୍) la:bgidu: (ସଲ୍‌ପଣ.ସୁ.ରୁକ୍ଷ) 'tɕengidu: (ରୁ.ସୁ.ରୁକ୍ଷ)

o : 'de:i:bəjɪ (ସଲ୍‌ପଣ.ୟିନ୍) la:bəjɪ (ସଲ୍‌ପଣ.ୟିନ୍) 'tɕembəre (ରୁ.ୟା.ନ୍ଦ)

(b) Initial Syllable (CVC)

(i) -V-:

The exponents of c/o are stated here in relation to the prosodic system f/s (fS/sS, Part I) and to the -C systems;

(a) yəW :	o	c						
-T :	half-open degree of aperture	half-close degree of aperture						
-L :	<table border="0"> <tr> <td style="vertical-align: top; padding-right: 10px;">(sS)</td> <td style="text-align: center;">" " "</td> <td style="text-align: right;">" " "</td> </tr> <tr> <td style="vertical-align: top; padding-right: 10px;">(fS)</td> <td style="text-align: center;">" " "</td> <td style="text-align: right;">" " "</td> </tr> </table> short duration	(sS)	" " "	" " "	(fS)	" " "	" " "	long duration
(sS)	" " "	" " "						
(fS)	" " "	" " "						

(β) wəW :

(fS)	ts:rərə (ରୂତ୍‌ସୁ.ନ୍ଦ)																			

(β) *əw* :

-T	<i>erep<u>ən</u></i>	(ရ.မ.နှင့်)	<i>n<u>əg</u></i> idu:	(ရ.ပါ.ကြုံ)
	<i>'ga<u>pe</u>re</i>	(ရ.မ.နှင့်)	<i>'g<u>ag</u></i> idu:	(ရ.မ.နှင့်)
	<i>'sa<u>pe</u>re</i>	(ရ.မ.နှင့်)	<i>'s<u>ag</u></i> idu:	(ရ.မ.နှင့်)
-L	(sS) <i>arep<u>əd</u>e</i>	{ (ရ.မ.နှင့်)	<i>aregi<u>və</u></i>	(ရ.မ.နှင့်)
	(fS) <i>are<u>pa</u>re</i>	{ (ရ.မ.နှင့်)		
	(sS) <i>te<u>pe</u>re</i>	{ (ရ.မ.နှင့်)		
	(fS) <i>te<u>ra</u>re</i>	{ (ရ.မ.နှင့်)	<i>te<u>ge</u>iv<u>ə</u></i>	(ရ.မ.နှင့်)
	(sS) <i>re<u>pe</u>re</i>	{ (ရ.မ.နှင့်)	<i>re<u>gi</u>idu:</i>	(ရ.မ.နှင့်)
	(fS) <i>re<u>ra</u>re</i>	{ (ရ.မ.နှင့်)		
-K	(sS) <i>arep<u>əg</u>e</i>	{ (ရ.မ.နှင့်)	<i>aregi<u>və</u></i>	(ရ.မ.နှင့်)
	(fS) { <i>are<u>pa</u>g<u>ə</u>e</i>	{ (ရ.မ.နှင့်)		
	<i>are<u>ga</u>re</i>			
	(sS) <i>te<u>pe</u>g<u>ə</u>re</i>	{ (ရ.မ.နှင့်)		
	(fS) { <i>te<u>ra</u>g<u>ə</u>re</i>	{ (ရ.မ.နှင့်)	<i>te<u>ge</u>iv<u>ə</u></i>	(ရ.မ.နှင့်)
	<i>te<u>ga</u>re</i>			
-M	(sS) <i>re<u>pe</u>b<u>ə</u>re</i>	{ (ရ.မ.နှင့်)	<i>tu<u>gi</u>idu:</i>	(ရ.မ.နှင့်)
	(fS) <i>re<u>ra</u>b<u>ə</u>re</i>	{ (ရ.မ.နှင့်)		
	<i>s<u>am</u>be<u>re</u></i>	(ရ.မ.နှင့်)	<i>s<u>am</u>gi<u>du</u></i> :	(ရ.မ.နှင့်)
-D	(sS) <i>ta<u>pə</u>ji</i>	{ (ရ.မ.နှင့်)	<i>tu<u>ge</u>j<u>i</u></i>	(ရ.မ.နှင့်)
	(fS) <i>ta<u>naj</u>i</i>	{ (ရ.မ.နှင့်)		
	(sS) <i>na<u>pə</u>ji</i>	{ (ရ.မ.နှင့်)	<i>nu<u>gi</u>idu:</i>	(ရ.မ.နှင့်)
	(fS) <i>na<u>naj</u>i</i>	{ (ရ.မ.နှင့်)		
	(sS) <i>'pa<u>pə</u>re</i>	{ (ရ.မ.နှင့်)	<i>'aregi<u>və</u></i>	(ရ.မ.နှင့်)
	(fS) <i>'pa<u>naj</u>e</i>	{ (ရ.မ.နှင့်)		

In sS examples were recorded in which *yəW* with -L as final consonant were distinguished phonetically in accordance with an orthographic distinction, i.e. whether the vowel symbol was ရဲ့ or zero, e.g. —

ཇླେନ୍-ସୁ' :	<u>te:bere</u>	(ཇླେନ୍-ସୁ'-'ନ୍ଦ୍ର)
zero :	<u>'erebzap'</u>	(ମୁହ୍ୟ-ସୁ'-'ନ୍ଦ୍ର)

This distinction is thought to be due to the influence of the spelling ; there was no phonetic distinction in fS.

(ii) -C :

For -C the following exponents of c/o may be stated :—

	<i>o</i>	<i>c</i>													
-L(fS) :	friction (x)														
-K :	velarity														
-P :		labiality													
-N :	labiality	velarity, e.g. :—

(c) *Final Syllable (C<sub>2</sub>V<sub>2</sub>)*

In fS C<sub>2</sub>- is characterized by the following exponents of c/o :—

c : plosion, e.g.                    tə:gəgidiu: (ପନ୍ଦ-ସୁ'-'କୁଣ୍ଡ)      nə:gəgidiu: (ଫନ୍-ସୁ'-'କୁଣ୍ଡ)

o : nasality + plosion, e.g. tʃə:gəbandu (ପନ୍ଦ-ସୁ'-'କୁଣ୍ଡ)      nə:gəbandu (ଫନ୍-ସୁ'-'କୁଣ୍ଡ)

It is of interest that the vowel of  $y\emptyset W$  in a 'close' prosodic context ( $cW$ ) may be identical phonetically with the vowel -E- of a  $yW$  in an open prosodic context, ( $oW$ ) e.g. :—

- (a) -E- ( $oW$ ) : phe:bare (पेप्सा.प॒द्॑) le:bare (लैप्सा.प॒द्॑)
- (b) - $y\emptyset V$ - ( $cW$ ) : the:gəre: (थैगेर॑) se:gəre: (सैगेर॑)

but in comparable prosodic contexts there is no such phonetic identity, e.g. :—

- (a) -E- ( $oW$ ) : phe:bare (पेप्सा.प॒द्॑) le:bare (लैप्सा.प॒द्॑)
- (b) - $y\emptyset V$ - ( $oW$ ) the:bare (थैबेर॑) se:bare (सैबेर॑)

where the -C term is -N there is, however, a phonetic identity of vowel-quality as between the vowel of  $yW$  and  $y\emptyset W$  in the 'open' prosodic context, e.g. :—

- |                         |                           |                            |             |   |        |
|-------------------------|---------------------------|----------------------------|-------------|---|--------|
| <u>(a) yW</u>           | <u>se:mber</u> (सैम्बेर॑) | <u>thembere</u> (थैम्बेर॑) | <u>(१८)</u> | } | $(oW)$ |
| <u>(b) y\emptyset W</u> | <u>tambere</u> (तैम्बेर॑) | <u>sambere</u> (सैम्बेर॑)  | <u>(१९)</u> |   |        |

but not in the 'close', e.g. :—

- |                         |                               |                                |             |   |        |
|-------------------------|-------------------------------|--------------------------------|-------------|---|--------|
| <u>(a) yW</u>           | <u>singijə:</u> (सैंगि.जू.य॑) | <u>thingidu:</u> (थैंगि.डू.य॑) | <u>(२०)</u> | } | $(cW)$ |
| <u>(b) y\emptyset W</u> | <u>tengijə:</u> (तैंगि.जू.य॑) | <u>senigidu:</u> (सैंगि.डू.य॑) | <u>(२१)</u> |   |        |

## (2) PROSODIC SYSTEMS OF SYLLABLE INITIAL (I)

Two prosodic systems are recognized for I in  $\emptyset W$  just as in  $wW$  and  $yW$  :—

- (a) r/non-r ( $r/n_r$ ) ;
- (b) y/w

The exponents of these two systems may characterize both C- and -V-, i.e. CV(C).

- (a)  $r/n_r$

The exponents of r comprise :—

- C- : fricative release (ɪ) ;

the exponents of  $n_r$  comprise :—

- (i) C- : A release other than alveolar fricative (ɪ), e.g. alveolar fricative (s), alveolar lateral, plosive, etc.

In  $yI$  syllables, lip-spreading.

- (ii) -V- : In  $yI$  syllables, a greater degree of frontness in  $w\emptyset W$ , and of closeness in  $y\emptyset W$ , than is appropriate to 'r', e.g. :—

r : ti:egəjɪ: (ती.एग॑.जिः) ti:əbəjɪ (ती.ए.भ॑.जिः) tra:bəre (त्राप॑.भ॑.रे)

$n_r$  : se:igəjɪ: (सैग॑.एग॑.जिः) se:əbəjɪ (सैग॑.ए.भ॑.जिः) sa:+bəre (सैग॑.ए.भ॑.रे)

(yI) (yI)

- (b) For the stating of  $n_r I$  a two-term system (y/w) is also required for  $\emptyset W$ . The phonetic exponents of y/w comprise :—

- (i) -V- :

y : a greater degree of closeness ( $y\emptyset W$ ) and frontness ( $w\emptyset W$ ) than is appropriate to 'w' in otherwise the same prosodic context, e.g. :—

y :	<u>se:gəjɪ</u> (पूर्व-पी-यिक्)	<u>se:bəjɪ</u> (पूर्व-पी-यिक्)	<u>ca:re:pərə</u> (पूर्व-पी-रेपेर)
w :	<u>se:gəwərə</u> (पूर्व-पी-वेरेर)	<u>se:bəwərə</u> (पूर्व-पी-वेरेर)	<u>ka:bərə</u> (पूर्व-पी-केरेर)
y :	<u>ca:ga:lə</u> (पूर्व-पी-गाले)		
w :	<u>kha:gidi:</u> (पूर्व-पी-खगिदु)	<u>kha-pərə</u> (पूर्व-पी-खपेरे)	

## (ii) C- :

y : lip-spreading,

articulations as below, in relation to the C- systems (§ B 2a)

w : articulations as below, in relation to the C- systems (§ B 2a) :—

	<i>y</i>	<i>w</i>
P- :	Alveolar (occlusion) + fricative release	Labial (occlusion) + plosive release
T- :	{ (1W) Alveolar (occlusion) + fricative release (2W) Alveolar friction (z)	Dental (occlusion) + plosive release
K- :	Palatal (plosion)	Velar (plosion)
Q- :	Palatal semi-vowel	Absence of consonant articulation
L- :	(Alveolar) lateral	(Alveolar) friction (r)
S- :	Alveolo-palatal (friction)	Alveolar (friction) (s)
N- :	Palatal (nasality)	Dental
		Labial (nasality), e.g. Velar

	<i>y</i>	<i>w</i>
P- :	<u>tʃa:bərə</u> (क्ष-पी-रेरेर)	<u>pʰvəgidi:</u> (पूर्व-पी-खगिदु)
	<u>'dʒərəjɪ</u> (मृद्ध-पी-यिक्)	<u>phe:giwu:</u> (ख्येत्त-पी-खगिदु)
T- :	<u>tshagidi:</u> (क्ष-षी-खगिदु)	<u>tsbəgidi:</u> (ख्येत्त-पी-खगिदु)
	<u>tse:giwu:</u> (ख्येत्त-पी-खगिदु)	<u>te:rəjɪ</u> (ख्येत्त-पी-यिक्)
K- :	<u>arepəf:</u> (क्षुपी-पी-रेरेर)	<u>kəbgidi:</u> (पूर्व-पी-खगिदु)
	<u>ce:ra:wə</u> (स्फृत-पी-रेरेर)	<u>kambərə</u> (पूर्व-मृद्ध-पी-रेरेर)
	<u>jembərə</u> (स्फृत-पी-रेरेर)	<u>'apəgidi:</u> (ख्येत्त-पी-खगिदु)
Q- :	<u>'je:giwu:</u> (य्येत्त-पी-खगिदु)	<u>'apəgidi:</u> (ख्येत्त-पी-खगिदु)
	<u>ləvgijø:</u> (स्फृत-पी-लेरेर)	<u>re:pərə</u> (ह्य-पी-रेरेर)
L- :	<u>lə'rebərə</u> (स्फृत-पी-रेरेर)	<u>arepə:zər</u> (ह्य-पी-रेरेर)
	<u>'ca:ga:lə</u> (पूर्व-पी-गाले)	<u>'apəgids:</u> (ह्य-षी-खगिदु)
S- :	<u>se:gidi:</u> (पूर्व-पी-खगिदु)	<u>arepə:sər</u> (ह्य-पी-रेरेर)
		<u>arepə:nər</u> (ह्य-पी-रेरेर)

	<i>y</i>	<i>w</i>	
N- : <u>aravaj</u>	(अ॒रा॒व॑ज)	<u>arembere</u>	(ए॒रे॒म्बे॑र)
<u>aravidu:</u>	(अ॒रा॒वि॑दुः)	<u>magidu:</u>	(अ॒मा॒दि॑दुः)
<u>arebañ</u>	(अ॒रे॒बा॑न्)	<u>uagidu:</u>	(अ॒य॑गि॒दुः)
		<u>arebañ</u>	(अ॒रे॒बा॑न्)

### B. Phonematic Systems (Initial Syllable — CVC)

(1) -V- :

For the exponents of -V- in eW one must take into account the following prosodic systems :—

- |  |           |
|--|-----------|
| (a) f/s (Sentence—S)                         | Part I    |
| (b) c/o (Word—W)                             | § II A 1  |
| (c) y/w (Syllable—S)                         | § I       |
| (d) r/ <sup>n</sup> r } (Syllable Initial—I) | § II A 2, |
| (e) y/w }                                    |           |

and the phonematic systems stated below (-C, § B 2b).

-V- :

yS/cW/rI/(-T/-L) :	e: <u>terejgi:</u>	(त्व॑रे॒जे॑गि॒)
„ „ „ -N :	e <u>terengidu:</u>	(त्व॑रे॒ंगि॑दुः)
„ „ <sup>n</sup> rI/yI/(-T/-L) :	e: <u>cegeji</u>	(स॒गे॑जि॒)
„ „ „ -N :	e <u>terengidu:</u>	(त्व॑रे॒ंगि॑दुः)
„ „ „ wI/(-T/-L) :	e: <u>tegege:</u>	(त्व॑रे॒ंगे॑गे॒)

„ „ „ ssS :	a- <u>ka:gəre</u>	( „ „ )
„ „ „ -P :	¤ <u>ka:bəre</u>	( <b>ସମତ</b> · <b>ପ</b> · <b>ନ୍ତର</b> )

## (2) C SYSTEMS

## (a) C- Systems

Separate C- systems need to be stated for y<sub>o</sub>W and w<sub>o</sub>W.

(i) w<sub>o</sub>W

(a) C<sub>a-</sub>:

The C<sub>a-</sub> system is that which is appropriate to words for which the following prosodic systems have to be taken into account :—

$$\left. \begin{array}{c} h/nh \\ v/nv \end{array} \right\} r/nrC-$$

rC<sub>a-</sub> :

In examples in rI (§ A 2a) no system may be stated for C<sub>a-</sub>. C<sub>a-</sub> is characterized by alveolar-affricate (*tʂ*) articulation :—

1W : hrC<sub>a-</sub> : *tʂerebətʃ* (ରେବେଟ୍ଜ)

"hrC<sub>a-</sub> : *tʂerebɪnʃ* (ରେବିନ୍ଜ)      *tʂangidu:* (ଙ୍ଗାଙ୍ଗିଡୁ)

2W : vrC<sub>a-</sub> : *dʐeraʃpɪ* (ରେଶ୍ପି)

"vrC<sub>a-</sub> : *tʂtɻɔ:gɪdu:* (ତ୍ରୋଙ୍ଗିଡୁ)

Where, however, the syllable-initial prosody is *n<sup>r</sup>*, and the y/w prosodic system may be set up for the syllable initial, i.e.

$$n^r \left\{ \begin{array}{c} h/nh \\ v/nv \end{array} \right\} y/wC-,$$

a three-term system P-/T-/K- is recognized :—

P/1W(h)/yI : *tʂeħ tʂharbəre* (ତ୍ରାହ ତ୍ରାର୍ବେରେ)

" " wI : *ph phambəre* (ଫାମ୍ବେରେ)      *pharaləre* (ଫାରାଲେରେ)

" ,,(nh)/yI : *tʂe tʂəraʃjɪ* (ତ୍ରାରାଶ୍ଯି)

" " wI : *p pa:gɪdu:* (ପାଙ୍ଗିଡୁ)

,, 2W(v)/yI : *dʐ ɻdʐarəre* (ରେଶ୍ପି)

" " wI : *b bʌ:gɪdu:* (ବାଙ୍ଗିଡୁ)      *bʌŋgɪdu:* (ବାଙ୍ଗିଡୁ)

" ,,(nv)/yI : none recorded

" " wI : *phvbgɪdu:* (ଫବ୍ରାଙ୍ଗିଡୁ)

T/1W(h)/yI : *tʂhaʃəre* (ତ୍ରାଶ୍ରେରେ)      *tʂagɪdu:* (ତ୍ରାଙ୍ଗିଡୁ)

" " wI : *th thaʃəre* (ଥାଶ୍ରେରେ)

" ,,(nh)/yI : *ts tsvbgɪdu:* (ଚାଙ୍ଗିଡୁ)

" " wI : *t tʂbgɪdu:* (ତ୍ରାଙ୍ଗିଡୁ)      *tʂagɪdu:* (ତ୍ରାଙ୍ଗିଡୁ)

,, 2W/yI : *z zʌ:gɪdu:* (ଜାଙ୍ଗିଡୁ)      *zə:gɪdu:* (ଜାଙ୍ଗିଡୁ)

" ,,(v)/wI : *d dambəre* (ଦାଂବେରେ)

" ,,(nv)/wI : *th thʌ:gɪdu:* (ଥାଙ୍ଗିଡୁ)

K/1W(h)/yI : *ch chəbəre* (ଚାହେରେ)

" " wI : *kh khaŋbəre* (କାଙ୍ଗେରେ)

" ,,(nh)/yI : *c caŋare* (କାଙ୍ଗାରେ)      *cʂbgɪdu:* (କାଙ୍ଗାର୍ବିଡୁ)

" " wI : *k kambəre* (କାଂବେରେ)      *kʂbəre* (କାଂବ୍ରେରେ)

- K/2W(v)/yI : **j** **ja:gəjɪ:** (៥୍ୟ.୩୍.ୟିତ'।) **la:ngidu:** (୯ୟଦ୍ୟ.୩୍.ୟକୁଣ'।)  
 „ „ wI : **g** **ga:gidu:** (୯ୟଦ୍ୟ.୩୍.ୟକୁଣ'।)  
 „ „ (nv)/yI : none recorded  
 „ „ wI : **kh** **khybgidu:** (୧୨ୟ.୩୍.ୟକୁଣ'।)

(β) C<sub>β</sub>- :

In syllables where the y/w prosodic system (§ A 2a) may be stated, i.e. y/wC-, a four-term system is recognized :—

Q-/L-/S-/D-, e.g. :—

- Q/1W/yI : **j** **ja:gəjɪ:** (୧ୟଦ୍ୟ.୩୍.ୟିତ'।) **la:ngidu:** (୧ୟଦ୍ୟ.୩୍.ୟକୁଣ'।)  
 „ „ wI : none recorded  
 „ „ 2W/yI : **j** **ja:regevɪ:** (୧ୟଦ୍ୟ.୩୍.ରେତ'।)  
 „ „ wI : **zbgidu:** (୧ୟଦ୍ୟ.୩୍.ୟକୁଣ'।)

- L/1W/yI : **l** **la:bgejɪ:** (୧ୟଲାବ୍ୟ.୩୍.ୟିତ'।) **la:ngidu:** (୧ୟଲାବ୍ୟ.୩୍.ୟକୁଣ'।)  
 „ „ wI : none recorded  
 „ „ 2W/yI : **l** **la:ngidu:** (୧ୟଲାବ୍ୟ.୩୍.ୟକୁଣ'।) **la:rebatɪ:** (୧ୟଲାବ୍ୟ.୩୍.ରେବାତ'।)  
 „ „ wI : **r** **ra:rebatɪ:** (୧ୟରାବ୍ୟ.୩୍.ରେବାତ'।)

- S/1W/yI : **s** **sa:ra:rə:** (୧ୟସାରାରେ.୩୍.ରେତ'।)  
 „ „ wI : **s** **sa:mgidu:** (୧ୟସାମାଗ୍ରୀ.୩୍.ୟକୁଣ'।)  
 „ „ 2W/yI : **s** **sa:ŋa:ra:** (୧ୟଶାଙ୍କାରା.୩୍.ରେତ'।) **sa:ra:rə:** (୧ୟଶାଙ୍କାରା.୩୍.ରେବାତ'।)  
 „ „ wI : **s** **sa:sidu:** (୧ୟଶାଙ୍କା.୩୍.ୟକୁଣ'।)

- D/1W/yW : none recorded  
 „ „ wW : **ŋ** **ŋa:ngidu:** (୧ୟନାଂଗ୍ରୀ.୩୍.ୟକୁଣ'।) **ŋa:rebatɪ:** (୧ୟନାଂଗ୍ରୀ.୩୍.ରେବାତ'।)  
 „ „ 2W/yW : **ŋ** **ŋa:ra:rə:** (୧ୟନାଂଗ୍ରୀ.୩୍.ରେତ'।) **ŋa:ngidu:** (୧ୟନାଂଗ୍ରୀ.୩୍.ୟକୁଣ'।)  
 „ „ wW : none recorded

In addition to the two examples given for L/1W/yI there were two recorded for which voice alternated with voicelessness, e.g. (**tra**) **la:ngidu:/la:ngidu:**, **la:rebatɪ:/la:rebatɪ** and (**nyɪ**) **la:ngidu:/la:ngidu:** (ନ୍ୟାନ୍ୟାବ୍ୟ.୩୍.ୟକୁଣ'।), ନ୍ୟାନ୍ୟାବ୍ୟ.୩୍.ରେବାତ'।), (ନ୍ୟାନ୍ୟାବ୍ୟ.୩୍.ୟକୁଣ'।). If the voiceless-lateral examples were to be admitted, L- would have to be removed from the C<sub>β</sub>- system ; they have here been disregarded in favour of the more often recorded voiced-lateral examples.

(γ) C<sub>γ</sub>- :

The nasal-initial system comprises the two terms M-/N-, for wI syllables, e.g. :—

M/1W : m mʌ:gɪdu: (मम् शृं रुष्णः।)

,, 2W : none recorded

N/1W : n nʌŋɪdu: (एन् शृं रुष्णः।)

,, 2W : n 'nabəre (न् न्यूरे)

(ii) yəW

For yəW the C- systems stated for wəW are not valid. The C- systems in yəW are not identical with those of yW, but resemble them. They comprise :—

(a) C<sub>a-</sub>:

The C-system is that which is appropriate to words for which the following prosodic systems have to be taken into account :—

$$\left. \begin{array}{c} h/nh \\ v/nv \end{array} \right\} r/nrC-$$

rC<sub>a-</sub>

In examples in rI (§ A 2a) C<sub>a-</sub> is characterized by alveolarity with fricative

(i) release, e.g. :—

1W : hrC- : tʃ tʃe:bəre (र॒ शृं वा॒ रुद्धः।)

<sup>n</sup>hrC- : tʃ tre:gəjɪ: (र॒ शृं शृं यित्तः।)

2W : vrC- : none recorded

<sup>n</sup>vrC- : tʃ 'tʃengɪdu: (क॒ शृं रुष्णः।)      re:bəre (स॒ वा॒ रुद्धः।)

In syllables in <sup>n</sup>rI, where the y/w prosodic system may be stated for the syllable initial, i.e. :—

$$\left. \begin{array}{c} h/nh \\ v/nv \end{array} \right\} y/wC-,$$

A two-term system, P/T, may be stated, as opposed to the three-term system (P/T/K) of wəW.

P/1W(h)/yI : tʃh tʃe:be:re (क॒ वा॒ रुद्धः।)

,, , wI : ph phe:gidu: (र॒ व्यैवा॒ शृं रुष्णः।)

,, , (nh)/yI : tʃe tʃe:be:re (एठ्ड॒ वा॒ रुद्धः।)

,, , wI : p pe:gidu: (स्वैवा॒ शृं रुष्णः।)

,, , 2/(v)/yI : dʒ dʒe:ra:rəre (र॒ क्षैवा॒ वा॒ रुद्धः।)

,, , wI : none recorded

,, , (nv)/yI : tʃh 'tʃe:be:ji (इ॒ वा॒ यित्तः।)

,, , wI : none recorded

T/1W(h)/yI : tsh tshə:rəre (र॒ क्षैवा॒ वा॒ रुद्धः।)

,, , wI : th the:be:re (र॒ व्यैवा॒ वा॒ रुद्धः।)

,, , (nh)/yI : ts tse:gərə: (र॒ क्षैवा॒ शृं रुद्धः।)

,, , wI : t te:bəre (प॒ खैवा॒ वा॒ रुद्धः।)      te:ra:jə (स॒ वा॒ यित्तः।)

T/2W/yI : none recorded

„ „ wI : d de:ge:ji: (པཱ་ོ་ྃྂྃྂ)

„ „ wI : th 'the:ra:re (ནྔ'ནྔ'ନ୍ଦ୍ର)

Where the C- term is K-, i.e. :—

$$n_T \left\{ \begin{array}{l} h/nh \\ v/nv \end{array} \right\} yC_{\alpha^-},$$

the following are the exponents of K- :—

K/1W(h) :	ch	<u>che:ra:re</u>	(ଚେଳ୍ମାପିନ୍ଦା)	<u>che:ra:re</u>	(ଚେଳ୍ମାପିନ୍ଦା)
„ „ (nh) :	c	<u>ce:ra:re</u>	(ଚେଳ୍ମାପିନ୍ଦା)	<u>ce:ra:re</u>	(ଚେଳ୍ମାପିନ୍ଦା)
, 2W(v) :	j	<u>'era:re:j'</u>	(ଏରାରେଜ)	<u>'era:re:j'</u>	(ଏରାରେଜ)
„ „ (nv) :	ch	<u>'che:gi:du:</u>	(ଚେଳ୍ମାପିନ୍ଦା)		

(β) C<sub>β</sub>- :

In words for which the prosodic systems h/nh and v/nv are inapplicable, but for which y/w may be stated for the syllable initial, i.e. y/wC-, a two-term system, L-/S-, may be stated. The exponents of L- and S- are :—

L/1W/yI : l le:bare (ଲେବାରେ)

„ „ wI : r re:bare (ରେବାରେ)

, 2W/yI : none recorded

„ „ wI : r. re:bare:j' (ରେବାରେଜ)

S/1W/yI : c ce:ge:ji (ଚେଳ୍ମାପିନ୍ଦା)

„ „ wI : s se:s (ଚେଳ୍ମାପିନ୍ଦା)

, eW/yI : none recorded

„ „ wI : 'era:re (ଏରାରେ)

The example of L/1W/yI, le:bare, was also recorded as le:bare, the former being the more frequently recorded of the two. The form with the voiceless-lateral initial has been excluded from the present study. It could not be stated in the same terms as the form with voiced lateral initial.

The Q- term is not, as in w<sub>o</sub>W, included in the same system as L-/S-, but in a system for which the y/wI system is not appropriate, i.e. C<sub>γ</sub>-, together with D-. The exponents of Q- are :—

Q/1W : j je:mbare (ଜେମବାରେ)

, 2W : j 'era:re (ଏରାରେ)

D- in this prosodic context resembles K- ; together with Q- it is confined to yI syllables, e.g. :—

D/1W :	<u>ŋ</u>	ŋ <u>ərəzən</u> (င်္မံ့ပါ·ပါ·နှံ့)	<u>ŋəbəzən</u> (င်္မံ့ပါ·ပါ·နှံ့)
,, 2W :	<u>ŋ</u>	ŋ <u>ərəbzən'</u> (ဒုန်္မံ့ပါ·ပါ·နှံ့)	<u>ŋəbzən'</u> (ဒုန်္မံ့ပါ·ပါ·နှံ့)

N- is confined to wI syllables :—

N/1W :	<u>n</u>	<u>nəmbəre</u> (ဧနားပါ·ပါ·နှံ့)
,, 2W :		none recorded

It is surprising that labiality is not a co-articulation of nasality in this prosodic context, for it is in yW, but no examples of initial-labial nasality were recorded. The way in which nasality is stated in əW differs considerably from the statements made for it in wW and yW. The əW type of statement has been adopted in order to avoid having to treat the alternation of velar with palatal nasal for C- in the example ŋagidu:/nɛibəre (င်္မံ့ပါ·ဒုက္ခာ့/င်္မံ့ပါ·ပါ·နှံ့) as a change of consonant. In the above statement the C- term D- is preserved in both yəW and wəW, but with a change of prosody, from the y/wC- system ( $C_\beta$ ) to a system for which y/wI are not statable ( $C_\gamma$ ). In  $C_\gamma$ - D- is limited to yI syllables, its phonetic exponent being therefore palatal nasality. The two forms may be symbolized as follows :—

wəwDVT ŋagidu: (င်္မံ့ပါ·ဒုက္ခာ့)      yəDVT nɛibəre (င်္မံ့ပါ·ပါ·နှံ့)

#### (b) -C Systems

As in the case of the C- systems the -C systems must be stated with reference to the prosodic system of the initial syllable of əW, i.e. y/w, hence wəW/yəW. Certain consonants may be stated for both, while others are restricted to one or the other, e.g. :—

- |               |             |                |
|---------------|-------------|----------------|
| (i) wəW/yəW : | T, L.       | (2)      (-Ca) |
| (ii) yəW :    | N.          | (1)            |
| (iii) wəW :   | P, K, M, D. | (4)      (-Cb) |

The exponents of the -C systems require a statement in terms of cW and oW. The exponents of the -Ca system are :—

c	o	
-T : Absence of consonant articulation	Absence of consonant articulation	
-L :      "	"      "      "	{ (sS) Alveolar friction <sup>1</sup> (fS)

<sup>1</sup> An interesting contrast with LT was observed for the Tsang dialect of Tibetan. Where in LT alveolar friction (1) was the sole recorded exponent of -L in both yF and wF alike, in Tsang Tibetan alveolar friction (1) was recorded for wF and an alveolar lateral articulation for yF, e.g.

-L	$\left\{ \begin{array}{l} wF : \underline{k}u\underline{rare} (င်္မံ့ပါ·ပါ·နှံ့) \\ yF : \underline{kylaji} (င်္မံ့ပါ·ပါ·မိုး) \end{array} \right.$	$\left\{ \begin{array}{l} \underline{p}u\underline{rare} (ဧော်ပါ·ပါ·နှံ့) \\ \underline{p}u\underline{rlare} (ဧော်ပါ·ပါ·လှံ့) \end{array} \right.$
----	---	--

The exponents of the -C<sub>b</sub> system are :—

c	o	
-P : Labial occlusion		Absence of consonant articulation
-K : Absence of consonant articulation	{	}
	Velar plosion	(fS)
	,,	(sS)
-M : Labial nasality		Labial nasality
-D : Velar „,		Velar „,

Where nasality characterizes -C in a yF syllable (-N, as opposed to -M/-D) its exponents are :—

c	o	
-N : velar nasality		labial nasality

In the examples below the phonological structure of the initial syllable, together with the relevant prosodies of the word, is given in the right-hand column.

o	c	
(i) -T(wə) :		
'rebe <u>n</u> a	(բ.թ.Ռ.ն.)( )	'nagidu: (բ.Ն.Ռ.Ջ.ն.)( ) (wə2NVT)

<u>tr<u>ab</u>gare</u> (fS)		

(v) -M :

<u>samb<u>er</u>e</u>	(ষশম·প·দ্ৰ)(।)	<u>sam<u>gi</u>du:</u> (ষশম·ষি·ডু)(।) (əlwSVM)
<u>re<u>mb</u>amp;</u>	(ষশমন্দ·প·দ্ৰ)(।)	<u>dam<u>gi</u>du:</u> (ষশমন্দ·ষি·ডু)(।) (əvwTVM)

(vi) -D :

<u>nang<u>er</u>a</u>		
<u>re<u>nd</u>an<u>a</u></u>	(ষন্দন·প·দ্ৰ)(।)	<u>nang<u>idu:</u></u> (ষন্দন·ষি·ডু)(।) (əlNVD)
<u>re<u>nd</u>an<u>u</u></u>		
<u>re<u>nd</u>an<u>u</u></u>	(ষন্দন·প·দ্ৰ)(।)	<u>lang<u>idu:</u></u> (ষন্দন·ষি·ডু)(।) (ə2yLVD)

(vii) -N :

<u>teng<u>er</u>e</u>	(�শন·প·দ্ৰ)(।)	<u>teng<u>idu:</u></u> (ষশন·ষি·ডু)(।) (ənhwTVN)
<u>se<u>ng</u>er</u>	(ষশন·প·দ্ৰ)(।)	<u>sen<u>gi</u>du:</u> (ষশন·ষি·ডু)(।) (əlySVN)

One or two instances have been recorded of a phonetic exponent of -M (in cW) other than labial nasality, i.e. velar nasality, e.g. :—

sangidu: (ষশম·ষি·ডু)(।),

and of -D (in oW) other than velar nasality, i.e. labial nasality, e.g. :—

tambere (ষত্ত্বন·প·দ্ৰ)(।)      cambere (ষশন্দন·প·দ্ৰ)(।)

The prosodic and phonematic systems of the medial and final syllables are stated in the following section.

### MEDIAL AND FINAL SYLLABLES; PROSODIC AND PHONEMATIC SYSTEMS

Much of the material now to be stated for the medial (C<sub>1</sub>V<sub>1</sub>) and final (C<sub>2</sub>V<sub>2</sub>) syllables has been stated above under the heading of the prosodic systems of the word y/w/ə and c/o, especially as regards the medial syllable; but the phonematic systems of these two syllables have so far gone unstated, for the reason that they are constant in yW, wW, əW, and in cW and oW alike. In the initial syllable (CVC) the systems stated for C-, -V-, and -C were related to the prosodic system y/w/ə, and were stated in terms of it. There are in addition to

the as yet unstated phonematic systems of the medial and final syllables, prosodic systems statable for these two syllables but not for the initial syllable. The form of statement adopted for the medial and final syllables is :—

### I. Prosodic Systems

- A. Medial and Final syllables ( $C_1V_1 + C_2V_2$ )
- B. (1) Medial Syllable
- (2) Final Syllable

### II. Phonematic Systems

- A.  $C_1V_1$
- B.  $C_2V_2$

#### I. PROSODIC SYSTEMS

##### A. *Medial and Final Syllables ( $C_1V_1 + C_2V_2$ )*

A two-term prosodic system : y/w, hence ‘w Medial and Final’ (wMF), and ‘y Medial and Final’ (yMF). The exponents of y/w need a statement in terms of c/o. In cW they may be stated only for  $\partial W$ , not for wW and yW. These exponents are :—

$(c\partial W)$	$-V_1$	$-C_2$	$-V_2$
w :	closeness + frontness	dental plosion	rounding
y :	openness + centralization	alveolar friction	spreading, e.g. nasality
w :	<u>ce:gijə:</u> (ස୍ଫାଦ·ସ୍କ୍ରିଯ୍ଦା)	<u>lvbgidu:</u> (ପଶ୍ଚମା·ସ୍କ୍ରିଯ୍ଦା)	<u>te:gidu:</u> (ଫାନ୍ଦ·ସ୍କ୍ରିଯ୍ଦା)
y :	<u>ce:gəjɪ:</u> (ସ୍ଫାଦ·ସ୍କ୍ରିଯ୍ଦା)	<u>lvbgare:</u> (ପଶ୍ଚମା·ସ୍କ୍ରିଯ୍ଦା)	<u>te:gəjɪ:</u> (ଫାନ୍ଦ·ସ୍କ୍ରିଯ୍ଦା)

In oW exponents of y/w may be stated only where the prosody of the medial syllable is 1 (§ B 1 below, 1M/<sup>n</sup>1M), e.g. :—

$(oW/1M)$	$-V_1$	$C_2-$	$-V_2$
w :	openness + frontness	dental nasality + plosion	rounding
y :	closeness + centralization	alveolar friction	spreading $\pm$ nasality, e.g.
w :	<u>ee:bajə:</u> (ସ୍ଫାଦ·ୟ·ୟିତା)	<u>'jɔŋbandu</u> (ୟିତା·ୟ·ୟିତା)	<u>'si:bandu</u> (ସ୍କ୍ରିଷ୍ଣା·ୟ·ୟିତା)
y :	<u>ee:bəjɪ:</u> (ସ୍ଫାଦ·ୟ·ୟିତା)	<u>'jɔŋbare:</u> (ୟିତା·ୟ·ୟିତା)	<u>'si:bare</u> (ସ୍କ୍ରିଷ୍ଣା·ୟ·ୟିତା)

##### B. (1) *Medial Syllable ( $C_1V_1$ )*

Labialization : a two-term system 1/<sup>n</sup>1, hence ‘labial Medial (1M)’, and ‘non-labial Medial’ (<sup>n</sup>1M). Exponents of this system may be stated only for the prosodic context yMF (§ A above). The phonetic exponents of these terms are :—

1 :	(1) $C_1-$ : labial articulation
	(2) $V_1-$ : half-closeness + central quality
$\eta$ :	$V_1-$ : openness + frontness, e.g. :—
1 :	<u>ee:bəjɪ:</u> (ସ୍ଫାଦ·ୟ·ୟିତା)
$\eta$ :	<u>'jɔŋbejɪ:</u> (ୟିତା·ୟ·ୟିତା)
1 :	<u>'si:bandu</u> (ସ୍କ୍ରିଷ୍ଣା·ୟ·ୟିତା)
$\eta$ :	<u>'jɔŋbare:</u> (ୟିତା·ୟ·ୟିତା)
1 :	<u>'si:bare</u> (ସ୍କ୍ରିଷ୍ଣା·ୟ·ୟିତା)
$\eta$ :	<u>'jɔŋbəjɪ:</u> (ୟିତା·ୟ·ୟିତା)
1 :	<u>'si:bjədə:</u> (ସ୍କ୍ରିଷ୍ଣା·ୟ·ୟିତା)
$\eta$ :	<u>'si:gare</u> (ସ୍କ୍ରିଷ୍ଣା·ୟ·ୟିତା)

### B. (2) Final Syllable ( $C_2V_2$ )

For the final syllable a prosodic system of closure may be stated : 'close' and 'open' (c/o), hence 'close Final' (cF) and 'open Final' (oF). The exponents of this system are :—

	$C_2$	$-V_2$
c :	dental plosion $\pm$ nasality	{ closeness (yMF/wMF) nasality (yMF)
o :	alveolar friction	half-closeness, e.g. :—
c :	<u>lvgidu:</u> (पञ्चपात्रूः रुः रुः)	<u>te:gəjɪ:</u> (तेद् शुः यिक्)
o :	<u>ce:bajə:</u> (पन्द्रप्यूः रुः रुः)	<u>lvgərə:</u> (पञ्चपात्रूः रुः रुः) <u>ce:gijə:</u> (पन्द्रप्यूः रुः रुः)

## II. PHONEMATIC SYSTEMS

### A. Medial Syllable ( $C_1V_1$ )

The phonematic structure of the medial syllable comprises the following single terms in various prosodic contexts :—

(1)  $-V_1$       (2)  $C_1-$

(1)  $-V_1$  :

For the phonetic exponents of  $-V_1$  the following prosodic systems must be taken into account :—

- (a) y/w/ə (Word—W)
- (b) c/o (,, )
- (c) y/w (Medial and Final Syllables—MF)
- (d) l/nl (Medial Syllable—M)

$-V_1$  :

cW/wW :	<u>drugydu:</u> (द्रूः शि॒रु॒षा॑)	<u>jungydu:</u> (जैंद॒शि॒रु॒षा॑)
,, yW :	<u>singijə:</u> (सैन्य॒प्यूः य॒रुः)	<u>çehigidu:</u> (चेद॒शु॒रु॒षा॑)
,, əW/yMF :	<u>de:gəjɪ:</u> (पञ्चद॒शु॒यिक्)	<u>te:gərə:</u> (पठन्द॒शु॒रेद्वा॑)
,, ,, wMF :	<u>de:gijə:</u> (पञ्चद॒शु॒यूः)	<u>te:ga:gidu:</u> (पठन्द॒शु॒रु॒षा॑)
oW/nlM :	<u>si:gare</u> (पञ्चपात्र॒प्यूः रुः)	<u>na:ra:re</u> (नक्षद॒प्यूः रुः)
,, lM/yMF :	<u>ce:bəjɪ:</u> (पन्द्रप्यूः यिक्)	<u>re:berə:</u> (र्यैद॒प्यूः रुः)
,, ,, wMF :	<u>ce:bajə:</u> (पन्द्रप्यूः यूः)	<u>re:berə:jɪ:</u> (र्यैद॒प्यूः रुः)

(2)  $C_1-$  :

For the phonetic exponents of  $C_1-$  the following prosodic systems, together with the -C phonematic terms, must be taken into account :—

- f/s (Sentence -S)
- c/o (Word -W)
- y/w/ə (,, -W)
- l/nl (Medial Syllable -M)

and the -C systems, e.g. :—

C<sub>1</sub>- :

cW/wW/(-T/-L/-K)/fS :

‘g **tsugydu:** (རྩྫ. ཆྱ. རྩྭྫ)      **khygydu:** (རྩྫ. ཁྱ. རྩྭྫ)

(ଅର୍ଯ୍ୟ. ପ୍ଯା. ରେଜାପ)

B. Final Syllable (C<sub>2</sub>V<sub>2</sub>)

The phonematic structure of the final syllable comprise the following single terms in various prosodic contexts : (1) -V<sub>2</sub>, (2) C<sub>2</sub>-.

(1) -V<sub>2</sub>

For the exponents of -V<sub>2</sub> the following prosodic systems must be taken into account :—

- (1) 1/2 (Sentence—S ; (a) of one word only ; (b) of more than one word, pp. 141–6 above).
- (2) c/o (Word—W)
- (3) y/w (Medial and Final Syllables—MF)
- (4) c/o (Final Syllable—F), e.g. :—

-V<sub>2</sub>

## 1S(a)/cW/wMF/cF :

u: 'jungydu: (ঝং'ঝং'ঝুঝু') ee:gidiu: (ঘঘ'ঝ'ঝুঝু')

,,(b) „ „ „ :

ux: 'jungydu: ( „ „ ) ee:gidiu: ( „ „ )

## 2S(a) „ „ „ :

u: 'jungydu: ( „ „ ) ee:gidiu: ( „ „ )

,,(b) „ „ „ :

u 'jungydu: ( „ „ ) ee:gidiu: ( „ „ )

oW „ „ :

	e	'jøŋ <u>re:j</u>	(	ཡ	ද·ປ·න්ද· )	se:bø <u>re:j</u>	(	බ	බ·ཡ්ද· )

(2) C<sub>2</sub>-

For the exponents of C<sub>2</sub>- the following prosodic systems have to be taken into account :—

f/s	(Sentence—S)
c/o	(Word —W)
w/ <sup>n</sup> w	( „ — „ )
y/w	(Medial and Final Syllables—MF)
c/o	(Final Syllable—F), e.g. :—

fS/cW/wMF/cF :	d	'jungydu:	(	ཡ	ද·ປ·රුණ· )	se:gidu:	(	බ	බ·රුණ· )
sS/	„	„	:						
	nd	'jungy <u>ndu:</u>	(	"	)	se:g <u>indu:</u>	(	"	)
oW/	„	„	:						
	nd	'jøŋ <u>ndu</u>	(	ཡ	ද·ປ·රුණ· )	se:bandu	(	බ	බ·රුණ· )
wW/cW/	„	/oF:							
	q	'jungy <u>qø:</u>	(	ཡ	ද·ປ·ය්ද· )	'dugy <u>qø:</u>	(	ඩ	ඩ·ය්ද· )
<sup>n</sup> wW/	„	„	:						
	j	'tshigijø:	(	ශ	ද·ෂ·ය්ද· )	tca:gi <u>jø:</u>	(	ත	ත·ය්ද· )
oW/	„	„	:						
	j	'jøŋajø	(	ཡ	ද·ປ·ය්ද· )	se:bajø	(	බ	බ·ය්ද· )

yMF/cF :

j 'jungyji: (ཡੁੰਗ୍-ୟି-ଙ୍କି:) ce:be:ji: (ସେବେ-ଜି:)

wW/cW/ „ /oF :

r 'jungy\_re: (ୟି-ଙ୍କ୍-ରେ:) e:mugy\_re: (ୟି-ମୁଙ୍କ୍-ରେ:)

nwW/ „ „ :

r 'tshigicre: (ତ୍ଶିଗି-ଚେ:) tse:ta:ge\_re: (ସେତା-ଗେ-ରେ:)

oW/ „ „ :

r 'ja:je:re (ୟା-ଜେ-ରେ) ce:be:re (ସେବେ-ରେ)

The prosodic and phonematic statements made above are limited to the trisyllabic verbal phrase. If that were to be extended by the addition of particles, e.g. 'jungyduge', 'jungyisbe', 'jungyiebe', 'jungyimbe' (ୟି-ଙ୍କ୍-ଦୁଗ୍-ସା|, ୟି-ଯି-ପ୍ରଦ-ସା|, ୟି-କ୍ଷି-ଦେହ-ସା|, ୟି-କ୍ଷି-ଫିଙ୍କ-ସା|) the structure stated for the Particle 2 might need to be reconsidered.

A point that seems clearly to emerge from the prosodic and phonematic statements made for the Final Syllable (Particle 2) is that no useful purpose is served by identifying the Particle-2 forms (-ଫିଙ୍କ/ -ପ୍ରଦ/ -ଦେହ/ -ଫିଙ୍କ୍ଷା) with the (in the Tibetan script) homographic verbal forms ଫିଙ୍କ/ ପ୍ରଦ/ ଦେହ/ ଫିଙ୍କ୍ଷା (verb complement). The prosodic statements made for the particle would not be valid for the verb complement. Still more unsatisfactory, and for the same reason, would be any attempt to identify the Particle 1 (କ୍ଷ/ ତ୍ରୀ/ ତ୍ରୀ and ଏ/ ଏ/ ଏ/ ଏ/ ଏ) of the trisyllabic verbal phrase with homographic noun particles କ୍ଷ/ ତ୍ରୀ/ ତ୍ରୀ and ଏ/ ଏ, for it is such an identification as this that is the basis of the references :—

'The Tibeto-Burman verb is properly a noun,' '... the nominal character of the Tibetan verb ...'<sup>1</sup>. Such statements cannot stand for contemporary LT, if phonological and grammatical statements are to be congruent.

This congruence of statement, which has been the aim of the phonological analysis of the material presented above, is illustrated in the following section.

### PROSODIC SYSTEM OF THE SYLLABLE FINAL, TENSE, AND ASPECT

A prosodic system of the syllable final (y/wF) has been stated for the initial syllable of wW and yW, and is implicit in the stating of oW in terms of the prosodic system of y/w for the initial syllable as a whole. It is this system

<sup>1</sup> *Linguistic Survey of India*, vol. iii, pt. i, Calcutta, 1909, pp. 8 and 9 respectively. cf. also Hannah : 'As a matter of fact the only real verb in Tibetan is the verb *To be*, whether in the form of ଫିଙ୍କ-ପା' *Yin-pa*, or ପ୍ରଦ-ପା' *Yo-pa*. All other verbs are practically a kind of noun-phrase, dependent for their significations upon the various moods and tenses of these two verbs ଫିଙ୍କ-ପା and ପ୍ରଦ-ପା', (Herbert Bruce Hannah, *A Grammar of the Tibetan Language*, Calcutta, 1912).

which was referred to in Part I under the term flexion as one of the criteria for defining the verb. The system was particularly associated with the -C term -T. For many, but not all, syllables in -T, all of them being at the grammatical level of analysis verbs, it would be possible to state the w and y terms of the F system as phonological exponents, among other exponents, of tense (present and past respectively).<sup>1</sup> Examples of these verbs in -T are as follows :—

-T		<i>wF</i>		<i>yF</i>
wW	-U-	'sugyji: (蜀·齊· <u>يِكِ</u> )	'cy: <u>bəjɪ</u>	( <u>قُوْسِيَّ</u> · <u>بِهِجِ</u> )
		t <u>ʃugyji:</u> (蜀· <u>شِعِ</u> · <u>يِكِ</u> )	t <u>ʃy:bəjɪ</u>	( <u>قُوْسِيَّ</u> · <u>شِبِهِجِ</u> )
		'jugydu: (蜀·齊· <u>دُكِ</u> )	er <u>əbədə:<u>لِتِ</u></u>	( <u>قُوْسِيَّ</u> · <u>دِكِ</u> )

<sup>1</sup> Having committed myself in Part II to the stating of certain phonetic features as exponents of a -C term -T, with the implication that for syllables in -T a prosodic system of the syllable final (y/w) may be stated in yW and wW, and a y/w prosodic system of the syllable for eW, I am unable at this late stage to reconsider and restate this material. I should now prefer, however, to restate as syllables of a CV structure those syllables which I have hitherto stated as syllables in the -C term -T, and to retain as syllables of a CVC structure syllables hitherto stated as syllables in -C term other than -T (i.e. -L/-P/-M, etc.). The grounds for this change in statement are that while it is advantageous to state a y/wF system for syllables treated above as syllables in -T in order to secure congruence with a particular grammatical statement no such consideration applies to syllables in -C terms other than those in -T. In my grammatical statement I shall need to distinguish two categories of verb; the possibility of stating a CV structure as a phonological exponent of one category and a CVC structure as an ex<sup>\*</sup>ponent of the other should not be left unexploited.

-T		wF	yF
eW	-V-	's <u>agidu:</u> (š'·q'·č'č'k'w)	er <u>eberəs'</u> (q'č'č'č'k'w)
		t <u>agidu:</u> (č'č'č'č'k'w)	er <u>eberə</u> (č'č'č'č'k'w)
		ŋ <u>agidu:</u> (č'č'č'č'k'w)	er <u>eberə</u> (č'č'č'č'k'w)
		l <u>agidu:</u> (č'č'č'č'k'w)	er <u>eberə</u> (č'č'č'č'k'w)

Among the verbs in -T for which wF and yF prosodies may not be stated as phonological exponents of tense categories are the following; for them only wF is statable:—

	-U-	None recorded.		
wW	-U-	'r <u>ugyij:</u> (č'č'č'č'č'w)	er <u>eberp'</u> (č'č'č'č'č'w)	
		'k <u>hugydu:</u> (č'č'č'č'č'k'w)	er <u>eberə</u> (č'č'č'č'č'k'w)	
	-O-	c <u>ugydu:</u> (č'č'č'č'č'k'w)	er <u>eberə</u> (č'č'č'č'č'k'w)	
	-I-	s <u>igidu:</u> (č'č'č'č'č'k'w)	er <u>eberə</u> (č'č'č'č'č'k'w)	
yW	-E-	's <u>igidu:</u> (č'č'č'č'č'k'w)	si <u>berə</u> (č'č'č'č'č'k'w)	
		t <u>chigidu:</u> (č'č'č'č'č'k'w)	te <u>berə</u> (č'č'č'č'č'k'w)	
eW	-V-	'g <u>agidu:</u> (č'č'č'č'č'k'w)	ga <u>berə</u> (č'č'č'č'č'k'w)	
		'n <u>agidu:</u> (č'č'č'č'č'k'w)	re <u>berən'</u> (č'č'č'č'č'k'w)	

For one verb in -T both wF and yF prosodies have been recorded, but together with yW in one prosodic context (cW) and with eW in the other (oW); all other examples of verbs in -T have a common prosodic feature, whether w, y, or e, in oW and cW alike:—

yW, wF	eW, yF
't <u>chigij:</u> (č'č'č'č'č'w)	't <u>chē:bejī</u> (č'č'č'č'č'w)

In the above examples the wF forms have been confined to cW and the yF to oW. Examples have, however, been recorded where both yF and wF might be stated for oW, e.g.

		wF	yF
wW	-U-	er <u>eberu:</u> (č'č'č'č'č'w)	er <u>eberu:</u> (č'č'č'č'č'w)
		er <u>eberu:</u> (č'č'č'č'č'w)	er <u>eberu:</u> (č'č'č'č'č'w)
	-O-	er <u>eberə:</u> (č'č'č'č'č'w)	er <u>eberə:</u> (č'č'č'č'č'w)
		er <u>eberə:</u> (č'č'č'č'č'w)	er <u>eberə:</u> (č'č'č'č'č'w)
yW	-E-	er <u>eberə:</u> (č'č'č'č'č'w)	ts <u>eberə:</u> (č'č'č'č'č'w)
eW	-V-	er <u>eberə:</u> (č'č'č'č'č'w)	er <u>eberə:</u> (č'č'č'č'č'w)

Where both terms of the prosodic system of the syllable final may be stated for oW for a given verb the two terms may be treated as phonological exponents of a grammatical category of aspect. Thus wF might be stated as an exponent of 'habitual' and yF of 'incidental' aspect,<sup>1</sup> e.g.

Statements such as those above cannot, however, be made for all verbs in -T; certain verbs have only one form, either yF or wF, in the same prosodic context (oW), e.g.

- I. yF : **ይ** (ይ'ብ'ና'ይ'ብ'ና) *yebeqye*  
 II. wF : **ወ** (ወ'ብ'ና'ወ'ብ'ና) *wabeqwe*

<sup>1</sup> The two terms referred to here as 'habitual' and 'incidental' do not constitute a closed system of aspect; such a system would comprise more than these two terms, with exponents, both in Verbal and Nominal Phrase, different from those exemplified here, and beyond the scope of the present article. It should, however, be emphasized that the words ପ୍ରସ୍ତାବିକ୍ରମ (subare) and ପ୍ରେସବେର୍ବାକ୍ରମ (sebore) collocate with ଅପାକ୍ରମ, while ପ୍ରସ୍ତାବିକ୍ରମ୍ସମ୍ବନ୍ଧ (sybore) and ପ୍ରେସବେର୍ବାକ୍ରମ୍ସମ୍ବନ୍ଧ (sgebore) do not. It would, in addition, be possible to set up a category of 'habitual' noun, which would include ଅପାକ୍ରମ, and which would colligate with verbs in wF and not with verbs in yF. A similarly established category of 'incidental' noun, including ମାତ୍ରାକ୍ରମ, would colligate with verbs in yF.
