UNDERGRADUATE CATALOG 2008-10

(Revised May 2009)

“With thy watchwords Honor, Duty...”
Old Missouri, the Alma Mater

A STATEMENT OF VALUES

The University of Missouri, as the state’s major land-grant university, honors the public trust placed in it and accepts the associated accountability to the people of Missouri for its stewardship of that trust. Our duty is to acquire, create, transmit, and preserve knowledge, and to promote understanding.

We the students, faculty, and staff of MU hold the following values to be the foundation of our identity as a community. We pledge ourselves to act, in the totality of our life together, in accord with these values.

RESPECT

Respect for one’s self and for others is the foundation of honor and the basis of integrity. A hallmark of our community is respect—for the process by which we seek truths and for those who engage in that process. Such respect is essential for nurturing the free and open discourse, exploration, and creative expression that characterize a university. Respect results in dedication to individual as well as collective expressions of truth and honesty. Respect is demonstrated by a commitment to act ethically, to welcome difference, and to engage in open exchange about both ideas and decisions.

RESPONSIBILITY

A sense of responsibility requires careful reflection on one’s moral obligations. Being responsible imposes the duty on us and our university to make decisions by acknowledging the context and considering consequences, both intended and unintended, of any course of action. Being responsible requires us to be thoughtful stewards of resources—accountable to ourselves, each other, and the publics we serve.

DISCOVERY

Learning requires trust in the process of discovery. Discovery often fractures existing world views and requires acceptance of uncertainty and ambiguity. Therefore, the university must support all its members in this lifelong process that is both challenging and rewarding. As we seek greater understanding and wisdom, we also recognize that knowledge itself has boundaries—what we know is not all that is.

EXCELLENCE

We aspire to an excellence that is approached through diligent effort, both individual and collective. Pursuing excellence means being satisfied with no less than the highest goals we can envision. Pursuing excellence involves being informed by regional, national, and global standards, as well as our personal expectations. We recognize and accept the sacrifices, risks, and responsibilities involved in pursuing excellence, and so we celebrate each other’s successes. We commit ourselves to this process in an ethical and moral manner.

These statements are mere words until we integrate them as values in our individual lives and reflect them in our institutional policies and practices. We pledge ourselves to make them effective in the very fabric of our lives, our community, and all our relationships with others, thereby enhancing the development of individuals and the well-being of society.

University of Missouri

Alma Mater

“Old Missouri”

Old Missouri fair Missouri

Dear old varsity.

Ours are hearts that fondly love thee

Here’s a health to thee.

Proud art thou in classic beauty

Of thy noble past

With thy watch words honour, duty,

Thy high fame shall last

Every True Son/Daughter

Every true son, so happy hearted,

Skies above us are blue,

There’s a spirit so deep within us,

Old Missouri here’s to you (rah rah!);

When the band plays the Tiger war song,

And when the fray is through,

We will tramp, tramp, tramp, around the columns,

With a cheer, for Old Mizzou!

HIT IT!

HOORAY, HURRAH, MIZZOU, MIZZOU!

HOORAY, HURRAH, MIZZOU, MIZZOU!

HOORAY, HURRAH, AND A BULLY FOR OLD MIZZOU,

RAH! RAH! RAH! RAH!

MIZ-ZOU-RAH! MIZ-ZOU-RAH! MIZ-ZOU-RAH, TIGERS!

Fight Tiger

Fight, Tigers, fight for Old Mizzou,

Right behind you, everyone is with you,

Break the line and follow down the field,

And you’ll be, on the top, upon the top;

Fight, Tigers, you will always win,

Proudly keep the colors flying skyward,

In the end we’ll win the victory,

So Tigers, fight for Old Mizzou!

	DAY	DATE
Class work begins @ 7:30 a.m.	Monday	June 07
First 4-week session closes @ 5:30 p.m.	Friday	July 02
SECOND 4-WEEK SESSION 2010		
	DAY	DATE
Class work begins @ 7:30 a.m.	Tuesday	July 06
Second 4-week session closes @ 5:30 p.m.	Friday	July 30

*Close of day is defined as including late afternoon and evening classes.

It is the policy of the University of Missouri to respect the diversity of our students. The faculty is reminded that students might want to observe religious holidays and days of special commemoration and is encouraged to accommodate students who have a conflict with a class period, test or activity because of these obligations.

Approved by the MU Faculty Council on October 18, 2007.

"All statements in this publication are announcements of present policies only and are subject to change without notice. They are not to be regarded as offers to contract."

ACCREDITATION

The University of Missouri is accredited by the Higher Learning Commission of the North Central Association of Colleges and Schools. Various schools, colleges and departments are also accredited by their respective professional associations and accrediting agencies.

MU'S NOTICE OF NONDISCRIMINATION

The University of Missouri does not discriminate on the basis of race, color, religion, sex, sexual orientation, national origin, age, disability, protected veterans. Any person having inquiries concerning the University of Missouri's compliance with implementing Title VI of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act of 1990, or other civil rights laws should contact the Assistant Vice Chancellor, Human Resource Services, University of Missouri, 130 Heinkel Building, Columbia, MO 65211, (573) 882-4256, or the Assistant Secretary for Civil Rights, US Department of Education.

ACCOMMODATIONS FOR STUDENTS WITH DISABILITIES

The University of Missouri complies with the Americans with Disabilities Act and other applicable laws and regulations. If you have a disability and need accommodations, please contact Disability Services, S5 Memorial Union, Voice (573) 882-4696, TTY (573) 882-8054, or email disabilityservices@missouri.edu as soon as possible so that appropriate arrangements can be made. For more information please visit the website at <http://disabilityservices.missouri.edu>. If you need this information in an alternative format (Braille, large print, or digital format), Disability Services can provide assistance.

FAMILY EDUCATION RIGHTS AND PRIVACY ACT (FERPA)

The University of Missouri policies and procedures adhere to this federal law passed in 1974. Students have the right to restrict the release of directory information. Directory information for MU is defined as: a student's name, address, telephone listing, e-mail address, date and place of birth, major field of study, participation in officially recognized activities and sports, weight and height of members of athletic teams, dates of attendance, degrees and awards received, enrollment status in any past and present semester (i.e. full/part-time), and the most recent previous educational agency or institution attended by the student.

To request restriction of this information, students may contact the Office of the University Registrar-Registration, 130 Jesse Hall, or may print and complete form available on the University Registrar's web site. For the full policy, go to <http://registrar.missouri.edu> and type FERPA in the search box.

Note: The University does not release grades to parents unless the student specifically authorizes it in writing in the Office of the University Registrar or a parent shows proof that the student is a dependent as defined in Section 152 of the Internal Revenue Code of 1954. "Parent" means a parent of a student and includes a natural parent, a guardian, or an individual acting as a parent in the absence of a parent or guardian.

EQUITY IN ATHLETICS DISCLOSURE ACT

The University of Missouri complies with the Equity in Athletics Disclosure Act of 1994, Section 360B of Pub.L. 103-382. This act and accompanying federal regulations require that certain information with regard to intercollegiate athletics, including operating expenses, revenue, salaries and participation rates, be made available to current and prospective students and the public. This report is available from the Department of Intercollegiate Athletics at (573) 882-6501.

TIGER PRIDE POINTS

- The University of Missouri, with its 19 schools and colleges, is Missouri's flagship university, with the breadth of programs associated with a nationally competitive institution.
- MU is one of only 34 public US universities, and the only public institution in Missouri, to be selected for membership in the Association of American Universities and designated "Doctoral/Research Extensive" by the Carnegie Foundation for the Advancement of Teaching. AAU members are the nation's most prestigious research institutions. The other AAU member in Missouri is Washington University.
- One of only six public universities in the country with medicine, veterinary medicine and law all on one campus, Mizzou has a statewide role in professional education. The University is the top provider of practicing physicians for Missouri. More than two-thirds of Missouri veterinarians are MU graduates. One-quarter of all attorneys in Missouri were educated at MU's law school. MU's academic medical center treats patients from every county.
- MU attracts more Curators Scholars, Bright Flight Scholars and valedictorians than any other college or university in the state. Nearly one-fourth of MU freshmen ranked in the top 10 percent of their high school classes, and 46.6 % come from the top 20 percent.
- The National Science Foundation has recognized MU as one of the top ten universities in the country for successfully integrating research into undergraduate education.
- MU is unique in Missouri in the comprehensiveness of its educational inquiry. The campus provides a rich environment in which students and teachers can reach beyond traditional fields of study and expand their educational experiences. A broad spectrum of programs is available outside the classroom, including seminars and colloquia, speeches and lectures by well-known public figures, open houses, concerts, a film series, museums, and musical and dramatic productions.
- Whether students enter the job market immediately after graduation or continue to advanced study, they find that an MU education — with its broad liberal arts foundation, emphasis on writing and reasoning skills, and directed study in a specialized field — prepares them well. Nearly 3,000 companies and organizations regularly recruit MU students, including about 200 Fortune 500 companies.

IMPORTANT FACTS

History

The University of Missouri was established in Columbia in 1839 as the first public university west of the Mississippi River, and the first public university in Thomas Jefferson's Louisiana Purchase territory.

In 1870, the University of Missouri was approved as a land-grant university under the Morrill Act of 1862. The original mission of land-grant institutions was to make higher education accessible to more people. Gradually that mission has expanded to include research, service and outreach; enabling the state's citizens to benefit directly from the knowledge gained through university research.

As Missouri's flagship university, MU continues its historic mission through its emphasis on excellence in teaching, research, service and economic development.

Students

- Students come from all 50 states and more than 100 countries. The diversity of backgrounds, opinions and lifestyles improves the overall quality of the student experience.
- The University has more than 23,000 undergraduate students, who choose courses from a broad range of academic disciplines.
- The University also has more than 7,000 graduate and professional students enrolled in more than 90 different degree programs. The professional schools include more than 1,000 students in law, medicine and veterinary medicine.
- MU is nationally recognized for its Freshman Interest Groups, where students with shared academic interests live in the same residence hall and often attend classes together. These communities provide a strong academic and social foundation for freshmen, as well as increased faculty involvement with students.

The Campus

- The 1,372-acre MU campus owns and rents 372 buildings -- more than 15 million square feet of space -- in Columbia.
- There are 21 residence halls on campus as well as 50 national social fraternities and sororities, including three multicultural sororities and six historically African-American sororities and fraternities.
- National magazines and newspapers consistently rank Columbia, MO., among the top cities in the nation for its excellent quality of life.

GRADUATE STUDY

Founded in 1896, MU's Graduate School enrolls more than 5,000 graduate students in more than 90 graduate degree programs. In its history, the school has granted a total of more than 65,000 graduate degrees. It is a member of the Association of Graduate Schools and the Council of Graduate Schools.

The MU Graduate Catalog is available online at <http://gradschool.missouri.edu/policies/graduate-catalog/>. **For more information, contact the Graduate School at 210 Jesse Hall, 573-882-6311, <http://gradschool.missouri.edu>.**

PROFESSIONAL SCHOOLS

The University of Missouri has three professional schools.

School of Law

The school was established in 1872 and has been a powerful force in Missouri and the nation ever since. Graduates have served at the highest levels of national, state and local governments. Many Missouri laws have been written by MU alumni. The School of Law educates lawyers who practice in Missouri and throughout the world. The law school has a national reputation, especially in dispute resolution. The Center for the Study of Dispute Resolution has been rated as one of the premier program in the country for over a decade. (See Dual Enrollment and Roberts Scholars information later in this catalog.)

For more information about the School of Law, call 573-882-6487.

School of Medicine

Established in 1841, the school offers an innovative problem-based curriculum that provides medical students with early exposure to clinical training. The MU School of Medicine educates physicians to provide patient centered care for people of Missouri and beyond. In addition to undergraduate medical education, the school offers a master's degree in health administration and boasts well-established residency and continuing education programs. It is recognized nationally for its primary care and rural training programs. The Health Sciences Center provides health care for patients from every Missouri county. The School of Health Professions and the Sinclair School of Nursing are described elsewhere in this catalog.

For more information about the School of Medicine, call 573-882-9219.

College of Veterinary Medicine

The college was established in 1946. It offers a four-year program leading to the doctor of veterinary medicine (DVM) degree. The college provides diagnostic and patient-care services for animals. Graduates are qualified for private practice or employment in government, industry and academic environments.

The college has a national reputation for excellent student-to-instructor ratio and state-of-the-art facilities. The 140,000-square-foot Veterinary Medical Teaching Hospital, Clydesdale Hall, boasts programs in numerous clinical specialties.

Biomedical science courses available to undergraduate students are listed in this catalog.

The college also offers post-graduate training to interns, residents in various specialties and graduate students.

For more information about the College of Veterinary Medicine, call 573-882-3768.

MU owes its existence to 900 citizens of Boone County. In 1839, they pledged \$117,921 in cash and land to win the bid to locate the new state university in Columbia. At the time, Columbia had eight dry-goods stores, one bookstore and one church.

WELCOME TO MIZZOU

OUR MISSION

Our distinct mission, as Missouri's only state-supported member of the Association of American Universities, is to provide all Missourians the benefits of a world-class education enriched by service and global interaction. We are stewards and builders of a priceless state resource, a unique physical infrastructure and scholarly environment in which our tightly interlocked missions of teaching, research and service work together on behalf of all citizens. Students work side by side with some of the world's best faculty to advance the arts and humanities, the sciences and the professions. Scholarship and teaching are driven by a sense of public service — the obligation to produce and disseminate knowledge that will improve the quality of life in the state, the nation and the world.

We are MU — Missouri's Flagship University

We are a diverse group of students, faculty and staff who value the excitement and learning that come from interaction among people with richly different backgrounds and ideas.

We challenge talented undergraduates to stretch their minds and imaginations with the unique strengths of a research-extensive university. Our students experience an interwoven web of learning experiences — in classrooms, in residence hall learning communities, and in collaborative research and creative, artistic and service projects with faculty.

We develop the world leaders of tomorrow through rigorous graduate and professional programs across the broadest range of disciplines offered on a Missouri campus.

We ensure improving the quality of Missouri's University through a financial model that supplements taxpayer support with rational tuition and student aid, public-private partnerships and aggressive fund raising. Our responsible fiscal planning assures both excellence and access for all well-prepared students, regardless of socioeconomic status.

We live and work in a community of scholars. We treasure our core values of respect, responsibility, discovery and excellence.

As a 21st century land-grant university, we are an economic engine for Missouri. We generate businesses and jobs by creating and disseminating the knowledge that fuels the new economy.

We use our unique intellectual resources to improve the civic, economic, health and educational well-being of Missourians from all walks of life and all corners of the state. We are committed to improving the quality of life of students and their families and communities through the creative and performing arts and the application of new knowledge.

HOW TO READ THE CATALOG

The *Undergraduate Catalog* for the University of Missouri has been organized to enhance readability. The initial sections are related to University-wide programs, policies and procedures. The second section provides the listing of academic offerings, organized by the academic units (also may be called colleges or schools) that offer the courses and/or the degrees (major, minor or certificate) that students seek to earn. In addition to the Table of Contents, the Faculty listing and Index at the back of the catalog are invaluable for locating a person or topic quickly. An electronic version is also on the MU web site.

Graduate and professional programs (Law, Medicine and Veterinary Medicine) have separate catalogs.

WHAT CATALOG APPLIES TO WHOM UNDER WHAT CIRCUMSTANCES

These policies concern the application of the University of Missouri's graduation, divisional and departmental degree requirements. MU students' academic requirements for graduation are typically met as follows:

University general education and other University-wide policies:

- Students must complete the graduation requirements in effect for the term that they first enroll at MU or they may choose those in effect for the term that their degree is awarded with the agreement of their academic unit.
- This policy applies to newly admitted freshmen as well as transfer students.
- Students who have a lapse in enrollment must meet the degree requirements in effect at the time the students are readmitted to MU.

Divisional, departmental and other degree requirements:

- Students must meet the specified divisional, departmental and major requirements for the degree(s) that were in effect when they were admitted as degree seeking to the program track or may choose those in effect for the term in which they will graduate, with the agreement of their division or department.
- Students who have a lapse in enrollment must meet the standards of the degree requirements in effect when they return to MU.

After consulting with an advisor, students may appeal. Requests for exceptions to the above policy may be made to the academic dean for the academic unit in which the student is enrolled. Some academic units may have unique "grandfathering" policies that apply to changes in their programs and that supercede this policy. Students should consult with an advisor in all cases.

CATALOG TERMS DEFINED

Below are definitions of the academic terms used throughout this catalog. Additional policy information can be found in later sections and in the *Faculty Handbook*, which is available on the University of Missouri's web site.

Academic Action: Students who do not meet requirements for University academic standing requirements are subject to academic action, such as being placed on probation or being declared ineligible to enroll, which is often called dismissal. NOTE: Academic units may have more restrictive standards. (Also refer to Academic Standing and Satisfactory Progress for

additional policy information.)

Academic Progress for Financial Aid: Students who have attempted at least 60 credits will not be making satisfactory progress for financial aid purposes if their cumulative GPA is less than 1.67.

Academic Standing: Academic performance is represented by academic standing, of which there are three levels: regular, academic probation, and ineligible to re-enroll. (See Academic Procedures, Rules and Regulations later in this catalog for further details.)

Regular Academic Standing: Students whose term and cumulative GPA are 2.0 or higher are in regular academic standing.

Probation: Students in regular standing whose term GPA subsequently falls below 2.0 but is 1.0 or above are placed on academic probation. Students on academic probation must establish a 2.0 cumulative GPA within two successive terms of enrollment; otherwise they are ineligible to re-enroll.

Ineligible to enroll: Students whose term GPA falls below 1.0 are ineligible to re-enroll. Students on academic probation must establish a 2.0 cumulative GPA within two successive terms of enrollment; otherwise they are ineligible to re-enroll.

Academic Unit: Colleges and schools are approved to offer degree programs or oversee degree or non-degree programs approved by the state Coordinating Board of Higher Education. Because the organization of these units varies across the campus, these entities are referred to as academic units, or AUs for short.

Add/Drop: The process for changing/dropping class; may require an advisor's approval.

A&S: Either the College of Arts and Sciences or the Arts and Science Building, next to Brady Commons.

Applied Course: A course that is focused on the personal practice of the subject matter. Applied courses are typically found in music, art, physical education and courses preparing for certain vocations.

Basic Skills Courses: Courses for which credit does not apply to the degree to be earned. These courses may be considered remedial or preparatory for course work that follows.

CAAP Test: The goal of the CAAP exam is to assess University general education. The CAAP exam consists of five sections: writing, reading, mathematics, critical thinking and science reasoning and is typically administered in the capstone class.

CAFNR: College of Agriculture, Food and Natural Resources. Sometimes listed as A,F&NR.

Capstone Experience: An academic activity that integrates general knowledge with the specialized knowledge each student has developed in the major area and, when appropriate, the related field.

Certificate: A program of study that requires completion of a minimum of 12 credits. It is part of a degree program or may be completed in addition to a degree program. Officially approved Certificates are listed on transcripts.

Commencement: In May and December, each MU school and college holds commencement ceremonies for graduates, during which students walk across the stage and are recognized individually. Ceremonies are not held for summer session graduates; however, these students are invited to participate in May or December commencements.

Component: A portion or part, (i.e. subset) of a course or degree requirement.

Concurrent Courses: Two or more courses that must be taken in the same term. They may or may not have inter-dependent information. Exceptions may be made with overrides.

Consent Required: Courses that require the permission of the instructor, department or division.

Co-requisite: A course or requirement that must be met prior to or concurrent with enrolling in a course. Exceptions may be made with overrides.

Core Requirements: The basic, required courses or standards that students must meet for a given major, degree, minor, emphasis or concentration.

Course Types: (See How to Read a Course Description section of the catalog.)

- **Lab:** The “practice” portion of a course in which experimentation, class projects or other exercises, in conjunction with material presentation, are performed. May also refer to a room in which these activities are completed.
- **Lecture:** A course or part of a course that is primarily in a face-to-face format. While it is usually presented in a group setting led by a faculty member, the course might also include group activities.
- **Independent Study:** A course or section for a specific individual to work one-on-one with a faculty member. May be an on-campus course or one offered through the Center for Distance and Independent Study.
- **Recitation:** A course or section that is designated for a small discussion group.

Credit by Exam: Credit earned by passing advanced-standing examinations in a subject-matter field. Examinations can include: departmental exams, CLEP subject-matter exams and International Baccalaureate and Advance Placement exams given by the College Entrance Examination Board of Princeton, N.J. (See Advanced Standing section later in the catalog for a full explanation of requirements and the College of Arts and Science.)

Credit: One credit represents approximately three hours of a student's time each week for one term. This may mean one hour in lecture or laboratory, in addition to two hours spent in preparation.

According to State of Missouri policy, a credit hour is a permanently transcribed instructional activity in which one semester credit hour shall consist of a minimum of 750 minutes (for example, 15 weeks x 50 minutes per week) of classroom experiences, such as lecture, discussion, or similar instructional approaches, or a minimum of 1,500 minutes of such experiences as laboratory, studio or equivalent experiences. Both of the above are exclusive of registration and final examination time. Greater amounts of supervised practicum or internship instruction are normally required to be the equivalent of one credit.

Cross-level Course: A cross-level course is a course offered at both the undergraduate and the graduate level. Undergraduate students enroll in a course numbered in the 4000 range and graduate students enroll in a course numbered in the 7000 range. Lectures and discussions may be held jointly, but different graduate level work will be required of students in the 7000-level courses.

Cross-listed Course: A course that is considered the same as, and often may meet with a section of, another course with a different curricular abbreviation and possibly a different course number.

Curriculum: An organized program of study arranged to provide integrated cultural or professional education. (See abbreviation list later in the catalog.)

DARS Report: MU uses a degree audit system called DARS for short. Many academic units and departments use these reports to assist in advising students. Students may look at their own DARS reports using MyZou.

Dean's Signature: The dean's signature is the mark of approval

for certain academic actions, such as approvals to withdraw at certain points in the term. Usually a “dean's signature” refers to a stamped signature from the academic advising office within the academic unit. A dean's signature may also be the signature of the dean or associate dean of the college or school. When instructions indicate that a student should obtain a dean's signature for approval of a process, students should first inquire in the academic advising office for their degree program.

Degree: A formal award or title conferred upon an individual for the completion of a program or courses of study.

Degree Program: A primary field of specialized study that is also referred to as a major. (See Academic Program/Degree Structure section of the catalog.)

Discipline: A branch of learning or field of study (e.g., mathematics, history or psychology).

Dual Degree: The completion of two degrees simultaneously. All requirements for both degrees must be met and at least 12 credits beyond the first degree must be successfully completed for the second. (See the *Faculty Handbook*.)

Dual Enrollment: Enrollment in undergraduate and graduate credit simultaneously. Also, this may be the enrollment in two or more institutions simultaneously. Routinely, “dual enrollment” refers to high school students who are also enrolled in college-level courses. (See Dual Enrollment section in Academic Procedures, Rules and Regulations.)

Electives: Courses that students may choose to take, as contrasted with required courses.

Emphasis Area: A subarea of specialized study within a major that has been formally approved. Emphasis areas are printed on students' transcripts. (See Academic Program/Degree Structure section of the catalog.)

Financial Enrollment: Students must make a minimum payment to retain classes they have reserved during registration. Meeting this minimum requirement makes a student “financially enrolled” and eligible to begin the term. Additional payments must be made to fulfill the student's financial obligation to MU. (See section on Fees and Fee Payment in the catalog.)

Full-time Student: Undergraduate students must be enrolled in a minimum of 12 credits for the spring and fall semesters and 6 for the summer to be considered full time for most purposes.

General Education (University): The MU Faculty has developed a comprehensive program of University general education course work that equips students with the skills, knowledge and foundations in the disciplines required of all informed citizens. All MU students must satisfy University general education requirements as a part of their undergraduate degrees. (See details in University General Education section of the catalog.)

GPA of Record: The GPA is the grade point average. A GPA of record is the official GPA. (See GPA in the Rules and Regulations section of the catalog or in the *Faculty Handbook*.)

Graded Course: A course in which credit is awarded if successfully completed. A course in which a student has enrolled as a “Hearer” is not regarded as a graded course for that student.

Grading Option: The grading system used to assign a grade. Letter grades are routinely assigned unless a course was set up to use only the S/U grading option. Students may choose, in some cases, to opt for S/U grading or to enroll in a course as a Hearer. (See Grades section later in the catalog.)

Graduation: The act of having the degree(s) conferred.

HES: College of Human and Environmental Science.

Honors Course: A course limited to honor-eligible students.

Honors Credit: Credit earned for taking a General Honors or Departmental Honors course. (See Course Numbering

System.)

HP: School of Health Professions.

Interdisciplinary or Multidisciplinary: A course of study that combines two or more academic disciplines.

Lower Division: Undergraduate courses numbered less than 3000.

Major: A primary field of specialized study that is referred to as a degree program. (See Academic Program/Degree Structure section of the catalog.)

Minor: A secondary field of specialized study. (See Academic Program/Degree Structure section of the catalog.)

Option: A track or other portion of a major that may be required or optional. A separate designation is not made on the transcript or diploma for an option or track.

Prerequisite: A course or requirement that must be met prior to enrolling in a course. Exceptions may be made with overrides.

Readmission: (See Admissions sections for information on the readmission process and standards.)

Readmission after Being Ineligible to Re-enroll: A student who has been ineligible to re-enroll for a period of one year may be readmitted only upon the approval of the dean of the division in which the student desires to enroll. As a condition of readmission, the dean may set forth stipulations with regard to minimum standards of academic work that must be maintained by the student. If the student after readmission again becomes ineligible to enroll, that ineligibility to re-enroll is normally considered permanent.

Recommended: A course or standard that it is beneficial or preferred for the student to have taken before enrolling in a particular course. It is a strong suggestion but not a requirement.

Registration: The act of enrolling in classes for a given semester or term. At the University of Missouri, registration refers to the process in which students select course work for a term and, reserve spaces (enroll) in the courses in the University's computer system. This may be done by computer (MyZou).

Regularly Admitted: A student admitted into a degree-seeking program who meets the University's admission requirements, including core courses and grades, class rank and test scores.

Repeatable for Credit: Courses that may be taken more than once for credit (e.g., music performance courses.)

Requirement: A course, activity or accomplishment that must be completed successfully.

S/U Grading: Grading method that assigns grades of Satisfactory or Unsatisfactory rather than A-F letter grades. If a student receives a U, this would be a D- in letter grades. (See Grades section of the catalog.)

Satisfactory Progress: The time progression in meeting the requirements of the student's established educational objective, typically, the completion of a degree program. Satisfactory progress is based on two concepts:

- Minimum number of credits completed expressed as a percentage of total credits attempted

- Maximum time to complete the degree as expressed by a total number of credits attempted

The term may also refer to financial aid requirements. (See Financial Aid section.)

Second, Undergraduate Degree: A second undergraduate degree a student pursues after earning one degree.

Sequence of Courses: Two or three closely related courses that must be taken in specified order.

Student Level: Students are assigned to a particular class level based upon the number of credits they have completed. (i.e. freshmen, sophomore, junior and senior.) (See Student Level under Academic Procedures, Rules and Regulations.)

T.A.: Teaching Assistant. They may also be called Graduate Teaching Assistants (GTA).

Track: An option or other portion of a major that may be required or optional. A separate designation is not made on the transcript or diploma for an option or track.

Truman: The name of the University of Missouri's mascot.

Upper Division: Undergraduate courses numbered 3000-4000.

Variable Credit: For some courses, the student may choose the number of credits. For these courses, a range of possible credits is shown in the course description.

Waive: To set aside without credit certain requirements for a degree.

UNIVERSITY ORGANIZATION

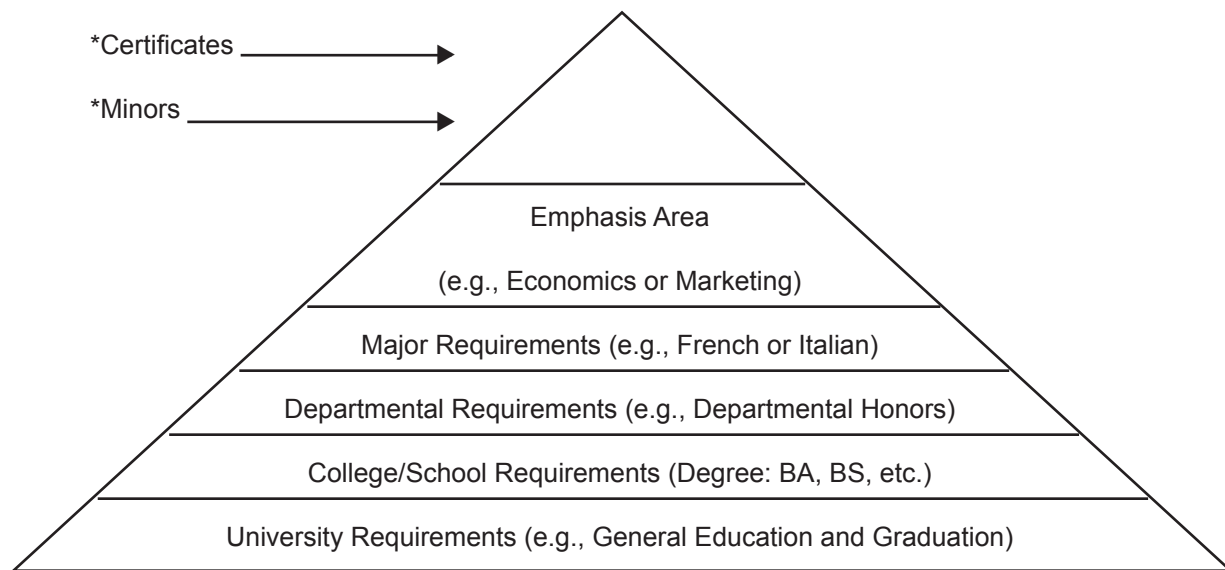

The largest academic units at the University of Missouri are its colleges and schools. Each college and school may consist of smaller units called departments. Some colleges have divisions within them as well. By long tradition, some of the smaller units are also called schools.

The academic year is divided into two semesters (fall and spring) and summer sessions. The January intersession is considered part of the spring semester for registration and financial aid purposes. The May intersession is considered part of the summer session.

ACADEMIC PROGRAMS AND DEGREE STRUCTURE

To earn a degree from the University of Missouri, students must complete all University, college and/or school, departmental and major requirements. In some cases, the major requirements may include emphasis areas and/or minors. In other cases, they may be options or tracks, which do not appear on transcripts. The accompanying diagram below illustrates how students build from the broad, University-wide requirements, to the very specific requirements for majors as they complete their degree.

The Academic Program/Degree Hierarchy:

*Certificates and minors generally have separate requirements. Completion of a minor, may, however, be part of a degree requirement.

DEGREES AND DEGREE PROGRAMS

The University of Missouri offers a wide variety of academic offerings. As a research intensive, Division I University this includes bachelors, masters, professional and doctorate degrees. In addition, in some fields students may earn minors or certificates in conjunction with their degrees.

The following definitions are provided to explain the academic structure of MU. Specific requirements are listed elsewhere in the catalog.

Degree: Students earn a degree (bachelor, master or doctorate level) based upon the total summary of courses taken. A bachelor's includes the University general education and additional

major requirements. MU offers a variety of bachelor-level degrees. Examples include the Bachelor of Science and Bachelor of Arts. For a complete list, see the degree list. Degrees are noted on the transcript and the diploma.

Major (degree program): A major (or degree program) is the subject area in which the student has focused his or her studies, within the degree. For example, a student may earn a Bachelor of Arts degree with majors in French, English or Philosophy. In some subject areas, a major may be available with two different types of bachelor's degrees. A degree program is the combination of the degree (e.g., Bachelor of Arts or a Bachelor of Science) with the subject area or major in (e.g., Biology). The degree program is noted on the transcript.

Emphasis area: An emphasis is related to a degree program and is a set of related course work that students complete within the subject area. Officially recognized emphasis areas are listed on the transcript.

Minor: A minor is a smaller grouping of courses (15-18 credits of course work) focused on a particular subject area outside the student's degree program. Minors must be earned in conjunction with a degree program of study. A minor is noted on the transcript. To earn a minor, students must contact the academic unit that offers the minor to complete appropriate paperwork.

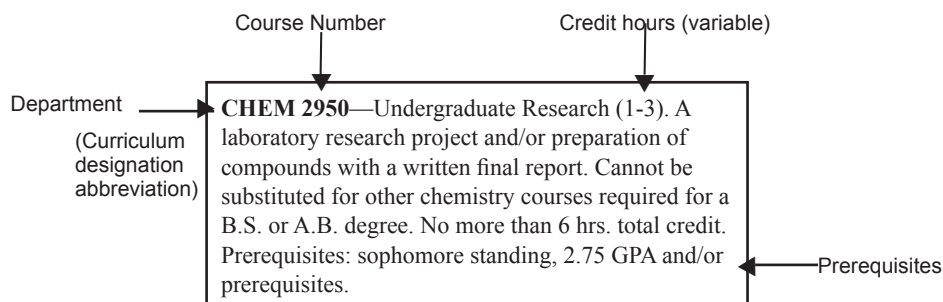

Certificate: A certificate is similar to a minor, but is more focused. It consists of 12-18 credits of course work in a given area. At MU, certificates are awarded only to degree-seeking students who also earn a bachelor's degree. An example is the certificate offered in Environmental Studies. Completion of a certificate program will be noted on a student's transcript at the

end of the term in which all of the degree requirements and certificate requirements have been completed. The degree and certificate must be awarded simultaneously. A separate certificate document is issued from the Office of the University Registrar. For more information on certificates: See http://provost.missouri.edu/program/ug_cert.

State licensure may require certificates that are not issued by MU, such as the State of Missouri's Teaching Certificate. Academic units will assist students in identifying and meeting requirements to earn these certificates.

HOW TO READ A COURSE DESCRIPTION

Course descriptions can be found in the second half of this catalog. Course descriptions may contain the information shown below. The curriculum abbreviations and course-numbering system are explained in the following pages.

COURSE-NUMBERING SYSTEM

Effective with the fall 2004 semester, the University of Missouri moved from a three-digit course numbering system to a four-digit system. Undergraduate courses are those numbered below 5000. A crosswalk of old numbers to new ones may be found at: https://musis1.missouri.edu/sis/course_num_select.cfm

Skill Development courses	0000-0999	Courses that do not count toward degree requirements
Freshmen-level courses	1000-1999	Entry-level courses
Sophomore-level courses	2000-2999	Intended primarily for second-year or sophomore students
Junior/Senior-level courses	3000-3999	Upper-division courses that may NOT be cross-listed with graduate-level courses
Junior/Senior-level courses	4000-4999	Upper-division courses that may be cross-listed with graduate-level courses
Extended Research & Problems courses	4950-4959	Multiple term duration courses based on research
Extended Research & Departmental Honors course	4995	Multiple term duration courses based on research
Capstone courses	4970-4994	
Capstone/Honor courses	4991	Courses that are both capstone and departmental honors courses
Capstone/Reading courses	4992	
Capstone/Internship courses	4993	
Capstone/Research courses	4994	
Departmental Honors courses	4996-4999	
Professional-level courses	5000-6999	See Medical, Law and Veterinary school catalogs.
Graduate-level courses	7000-9999	See Graduate School catalog.

"H" after a number indicates that it is a General Honors course.

Undergraduate Topics Courses

Final two digits represent the distribution category within the University requirements.

- 01 General
- 02 Biological/physical/mathematical sciences
- 03 Behavioral sciences
- 04 Social sciences
- 05 Humanities

Guidelines for Cross-Listed and Cross-Level Courses

Overview: With the new numbering scheme we can now manage better our cross-listed and cross-level courses. Per the faculty approved policies, only 4000 and 7000 level courses may be cross-level listed. Courses that are cross-listed should be from different departments, but cover the same content.

Cross-Listed Courses:

Courses that are cross-listed *must* be:

- At the same level
- Cover the same content

Courses that are cross-listed *may*:

- Meet different general education requirements (i.e. social science for one and humanities for another)
- Not have the exact same number, but it is preferred if they do
- Have different additional fees. However, students may need to enroll in a specific course to meet a requirement and may or may not be allowed to substitute the cross-listed course to avoid the fee. There are limits on enrollment and space may not be available in the non-fee course or section.

Exceptions:

- Fine art and music “skills” classes such as painting or drawing may have different levels meeting in the same room at the same time, such as 1000, 2000, etc. with the instructor requiring the appropriate additional quality and/or quantity of work for the respective level.

Cross-Level Courses:

- *Only 4000 and 7000-level courses may be* cross-level listed.
- The 7000-level course must require work appropriate for graduate credit and be approved as such by the Graduate Faculty Senate.
- Courses that are not cross-level *may not* meet in the same room at the same time or near each other at the same time so that they attempt to “get around” this rule.

CURRICULUM DESIGNATION ABBREVIATIONS

The abbreviations listed below are used in course descriptions. They may be called Curriculum Designators.

Abbreviation	Department Name	Division
ACCTCY	Accountancy	BUS

How to Navigate Through MU: Academic and Administrative Regulations

ADMISSION INFORMATION

Admission Procedures

Students can apply via the World Wide Web at: <http://admissions.missouri.edu/howtoapply/index.php>.

Applicants should complete the application form and send it along with the application fee to the Director of Admissions, 230 Jesse Hall, Columbia, Mo., 65211. Transcripts should be sent to the same address after submitting the application. The criteria described below are employed to determine admissibility to the University of Missouri. Meeting the minimum requirements, however, does not guarantee admission. The Office of Admissions will notify applicants in a timely manner whether they have been accepted, denied or placed on a waiting list.

Students may be admitted as freshmen to the colleges of Agriculture, Food and Natural Resources; Arts and Science; Business; Education; Engineering; and Human Environmental Sciences and to the schools of Natural Resources, Nursing, Health Professions, Social Work and Journalism.

Freshmen

Admission to the freshman class is based on a student's probability of success with MU course work. Admissions criteria are based on a combination of the student's class rank, standardized test scores and high school course work. The core high school work required by MU is listed below.

Required high school core course work

- 4 units of math (Algebra I and higher)
- 4 units of English
- 3 units of science
- 3 units of social studies
- 2 units of the same foreign language, and
- 1 unit of fine art

Test Score / Class Rank Requirements:

ACT	SAT	High School Class %Rank
23	1050-1080	48 (top 52%)
22	1020-1040	54 (top 46%)
21	980-1010	62 (top 38%)
20	940-970	69 (top 31%)
19	900-930	78 (top 22%)
18	860-890	86 (top 14%)
17	820-850	94 (top 6%)

Students whose ACT Composite score is 24 or higher or whose total of SAT verbal and math scores is 1090 or higher, and who have completed the required curriculum, meet the requirement for admission to Mizzou. Students whose ACT composite is 17 to 23 or whose total of SAT verbal and math is 820 to 1080, must meet the above-listed high school class rank level to be admitted to Mizzou. Students with ACT scores of less than 17 or SAT total scores of less than 820 are generally not admissible to MU.

Conley Scholars Program (School of Medicine)

High school seniors from Missouri and states bordering Missouri with a minimum ACT composite score of 30 or a

minimum SAT critical reading plus math score of 1300 are eligible to apply to the Conley Scholars Program (CSP). This program guarantees acceptance into the School of Medicine upon completion of undergraduate and CSP requirements.

Conley Scholars are required to take a minimum of one year of course work in biology, general chemistry, organic chemistry and physics, earning at least B grades in these required courses. They also must maintain a minimum cumulative GPA of 3.3 and a cumulative science GPA of 3.3. Additionally, program participants must complete 20 credits in honors courses leading toward the Honors Certificate and meet the expectations of the School of Medicine for outstanding personal development.

Application materials are available on the web at <http://som.missouri.edu>. Deadline for applying is February 1. After review of completed application files, selected applicants are invited to interview at the Medical School. Notification of admission status is made by April 30.

Roberts Scholars (School of Law)

The Judge Ross Roberts Scholars Program guarantees admission to the School of Law for an undergraduate student who enrolls at MU as a freshman under the program and who meets the following criteria:

- An ACT composite score of 32 or an SAT score of 1410 or higher (verbal & math); AND
- Graduates from MU with a cumulative grade point average of 3.5 or higher (as calculated by LSDAS); AND
- Scores at the 75th percentile or higher on the LSAT (the actual score may vary from test to test, the 75th percentile is approximately a 157); AND
- Applies and is accepted to the Roberts Scholar Program BEFORE taking the LSAT; AND
- Enters law school in the fall semester immediately upon graduation from college; AND

Students must have a complete law school application by the Roberts Scholar application deadline. (The actual deadline date will vary depending on the year applying to law school, but is typically in January. Please see the law school application checklist by the MU school of Law Admissions Office. This includes all supporting documents and your LSDAS report.) Students who do not meet the required levels of performance for the Roberts Scholars Program may still apply for regular admission to the School of Law.

Preveterinary Medicine Scholars Program

This program provides early assurance of admission to the MU College of Veterinary Medicine to selected students pursuing undergraduate studies at the University of Missouri. High school seniors and MU freshman with an ACT composite score of 30 or more, or an equivalent SAT score may apply.

Students must maintain a cumulative GPA of at least 3.3, maintain an average course load of 15 hours per semester. Students must obtain observation hours with clinical veterinarians and be an active member in the [Pre-Veterinary Medicine Club](#). A minimum program score must be obtained on either the Graduate Record Examination (1120) or the Medical College Admission Test (24). For a complete description of the program and its requirements, please contact the Office of Academic Affairs at the College of Veterinary Medicine.

AgScholars Program

MU freshmen and high school seniors with an ACT composite score of 27 or more are eligible to apply to the AgScholars Program (AgSP). This program guarantees acceptance into the

The 2008 freshman class boasts an ACT average of 25.5, compared with the national average of 21.1 and the state average of 21.6. Twenty-five percent come from the top 10 percent of their high school classes.

Veterinary Medical College upon completion of undergraduate and AgSP requirements.

AgScholars are required to average 15 credits each semester, earn an A or B grade in required courses and maintain a minimum cumulative GPA of 3.3.

Application materials are available in the Veterinary Medical College's Office of Academic Affairs.

Nursing Scholars

Nursing scholars is a program for high school seniors, current MU students, and transfer students that guarantees acceptance into the clinical nursing major. Students must be admitted to the Honors College before applying to Nursing Scholars. High School seniors must have an ACT composite of 29 or higher or equivalent SAT score and be in the top 10 percent of their graduating class to apply to the Honors College and potentially be considered for Nursing scholars.

MU freshmen may be admitted to Nursing Scholars if they have a 3.5 MU GPA after 30 college credits and have been admitted to the Honors College. Transfer students must have a 3.5 MU GPA after 15 credits at MU and must have two semesters of pre-nursing coursework remaining.

All Nursing Scholar students must maintain a 3.3 or higher cumulative GPA, complete 12 credit hours of honors coursework prior to beginning clinical coursework upon nursing clinical acceptance, and earn a B grade (or higher) in required courses.

School of Health Professions Scholars

General Information:

The School of Health Professions (SHP) offers a guaranteed admission program for high school seniors and first semester MU freshmen to the following degree programs: Clinical Laboratory Science, Communication Science and Disorders (guaranteed admission is for the Bachelor's Program only), Occupational Therapy, Physical Therapy (guaranteed admission to the DPT upon successful completion of a baccalaureate degree), Radiography, Nuclear Medicine, Diagnostic Medical Ultrasound, and Respiratory Therapy. Students selected as SHarP scholars are guaranteed a position into a School of Health Professions major by completing and maintaining the following requirements:

Eligibility Requirements for the SHarP Scholar's Program:

Currently enrolled as a high school senior or first semester MU student in the School of Health Professions.

Minimum 30 composite ACT score (1320 SAT).

Top 10% high school rank at the time of application. This is subject to interpretation regarding school and curriculum.

Performance in college courses completed prior to HS graduation will be considered by the admissions committee.

Completed application postmarked on or before December 1 of the senior year of high school to December 1 of the first semester freshman year at MU.

Four (4) hours of clinical observation in the discipline of choice (documented on the SHarP application).

All applications must include recommendations from a HS teacher and from a HS counselor or principal.

Acceptance as a SHarP Scholar:

Acceptance to the University of Missouri.

Acceptance by the designated degree program as a SHarP Scholar; some departments may require an interview.

Maintenance of a 3.3 term grade point average (on a 4.0 scale) during the senior year of high school.

Maintaining Participant Status Requires:

Continuous enrollment (excluding summers) at MU

Maintain an MU cumulative GPA of 3.30.

Enrollment in a SHarP faculty advisor approved, full-time schedule for Fall and Spring semesters.

Minimum of B-grades on all required courses. Students are allowed one semester to rectify a deficient course grade or GPA; remediation must be accomplished at MU, efficiently advance the student toward completion of prerequisites, and be approved by the SHarP faculty advisor.

Comply with the academic and behavioral standards established by the department for pre-professional and professional students (i.e., prerequisite courses, additional clinical observation, meetings with a mentor).

McNair Scholars Program

The McNair Scholars Program provides paid research opportunities to junior and senior MU students who meet federal income guidelines whose parents have not completed an undergraduate degree and/or students who are African American, Native American, and Hispanic. The purpose of the program is to prepare talented undergraduate students for doctoral study. In addition to the research internship, McNair Scholars travel to academic conferences with their faculty mentors. The program provides an extensive workshop series on how to get into and succeed in graduate school, GRE preparation, and preparation to be a teaching assistant. The program is funded by the U.S. Department of Education, Federal TRIO Programs, Ronald E. McNair Post-baccalaureate Achievement Programs.

Contact: NaTashua Davis, DavisNat@missouri.edu at 882-1962, 536 Clark Hall.

<http://mcnair.missouri.edu>

Dual Credit and AP Advanced Placement Credit

MU gives credit for some AP course work and for dual credit. Many students earn Advanced Placement or Dual Credit while still enrolled in high school. AP minimum scores for awarding credit vary by department. Students may find that information on the MU web site. College credit also may be received for dual credit once the official college transcript is sent to MU. Dual credit, however, may not be used to become admissible to MU for a student who does not meet the regular admission requirements. (See Advanced Standing section of this catalog.)

For FAQ on Dual Credit please visit

http://admissions.missouri.edu/applying/transfer/dual_credit_faqs.php

Transfer Admission Requirements

The following minimal requirements are established for general admission of transfer students. They do not include more stringent requirements that may be established by the faculties of the individual schools, colleges or campuses, or the requirements of special programs within some schools. It is the responsibility of

Currently, MU's \$248 research operation has a \$481 million economic impact on Missouri and supports 9,746 jobs. Over the last decade \$2 billion of research at MU has had nearly a \$4 billion economic impact on the state.

the transfer student to check with the school, college, department or program concerning more specific requirements.

1. Transfer applicants to MU must have a 2.5 gpa in college level courses to be admissible. Transfer applicants who do not also meet MU's Freshman admission requirements must have completed at least 24 college level credits and must have completed one of the following:

a. A college algebra course with at least a C- or better.

OR

b. The equivalent of MU's EN 1000 with at least a C-grade.

2. Transfer students with an AA degree from a regionally accredited Missouri Community college are admissible to MU.

3. Full-time transfer students from other UM system campuses need only a 2.0 to be eligible to transfer to MU.

Notes:

a. Admission to MU does not guarantee admission to specific programs, as some are highly competitive.

Please see our website at <http://admissions.missouri.edu/howtoapply/transfer/requirements/deptTransferPolicies.php> for specific program requirements.

b. Students enrolling with an Associate in Arts degree with 60 or more transferable academic credits with a 2.0 or better will be considered as having junior level standing and having completed the general education requirements.

Deadlines

We urge you to apply for transfer admission seven to nine months before the semester you wish to enter. This will give you time to find out what you will need to submit or complete before the semester begins.

- Fall admission deadline: July 1
- Spring admission deadline: Dec. 1
- Summer admission deadline: May 1

Transfer from a Regionally Accredited Missouri College

Articulation Agreements

Contact departmental advisers for information on articulation programs and agreements.

Associate of Arts Degree

An Associate of Arts degree (AA) is a two-year program that indicates the completion of a student's lower-division education. It also is a specific transfer degree for entry, at the junior level, into the general range of baccalaureate degree programs offered by the University.

Students transferring to MU from a regionally accredited Missouri college or university with an associate of arts degree and a certified 2.0 average will be accepted with junior standing. They will also have completed lower-division general education requirements if the AA degree consisted of at least 60 credits of college-level work. These 60 credits must include completion of an institutionally approved general education program of not fewer than 39 credits.

Students holding the AA degree are admissible to MU but are not necessarily admissible to specific programs. Some of the specific programs with specialized lower-division requirements are the colleges of Business, Education, Human Environmental Sciences and the schools of Health Professions, Journalism, Nursing and Social Work. The transfer requirements for all academic units may be found in later sections of this catalog.

Students applying with an AA degree from another state will have their courses reviewed for equivalency on an individual basis.

Associate of Science Degree

An associate of science degree (AS) is a specialized degree intended for transfer into a specific preprofessional program. Junior standing is guaranteed to the transfer student only if curricular details have been agreed on by MU and the institution granting the AS. Students who receive a specialized AS degree do not automatically qualify for junior standing in all MU programs. To enroll in some degree programs, students may have to take additional general education courses.

Students Without Associate Degrees

Students transferring without associate degrees must meet regular MU transfer admission standards.

Transfer Within the UM System

Students may transfer among campuses within the University of Missouri System. Any course that leads to an undergraduate degree on any campus of the University of Missouri System is accepted in transfer toward the same degree on each campus of the UM System offering that degree.

Appeal of Transfer Decisions

The University of Missouri provides an appeal process for transfer students who wish to appeal decisions on admission and transfer of credits.

Appeals are heard by a faculty committee and the Admissions Review Committee. Appeals may be initiated by writing to the Director of Admissions, 230 Jesse Hall, Columbia, MO, 65211.

International Students

More than 1,000 students from more than 110 countries currently are enrolled at MU. All prospective undergraduate students who are neither US citizens nor permanent residents of the United States should contact the International Admissions Office, 230 Jesse Hall, Columbia, Mo., 65211. This office is responsible for answering all initial inquiries about admission to the University.

In addition to the English language requirement for admission, all undergraduate international students are required to take the English Language Support Program Test prior to registering for courses.

Readmission of Previously Enrolled Students

Students who are returning to MU after an absence of at least one semester must contact the Office of Admissions in 230 Jesse Hall, Columbia, MO, 65211 to apply for readmission.

Appeal of Admission Decisions

Students who are denied admission as a freshman or transfer to the institution may write a letter of appeal to the Director of Admissions, 230 Jesse Hall, Columbia, MO, 65211. Students who are denied readmission must direct their appeal to the appropriate dean's office of the school or college to which they were denied readmission.

Easy Access Program

The Easy Access program is intended to serve non-degree-seeking individuals. Easy Access students may enroll only as part-time students (maximum of 6 credits each semester or 3 in the summer). Community residents who are high school graduates may register for any course on a space-available basis without providing previous transcripts. Compliance with course prereq-

uisites is necessary and is the student's responsibility.

Students who have completed work at another institution must provide evidence of eligibility to re-enroll. They do so by presenting a letter of good standing from the institution or completing a provisional form until a letter is received. Students on dismissal status from any institution, including MU, are not eligible to participate in this program until one year has elapsed since their dismissal.

Easy Access enrollment will not meet immigration guidelines for a non-citizen on a student visa. If a student has a visa that allows for part-time enrollment, a current TOEFL of at least 500/173 is required to enroll in courses.

Students enrolled through Easy Access are not eligible to receive Veterans Administration benefits or most financial aid.

Easy Access students may elect to receive grades and undergraduate credit for their courses. Payment of fees is on the same basis as regularly enrolled undergraduate students. Easy Access students may enroll only as part-time students (maximum of 6 credits each semester or 3 in the summer). If Easy Access students later decide to become regular students, they must apply to MU for a future semester. Credit received while enrolled in Easy Access will be evaluated by the division selected for enrollment. A student regularly enrolled in a division cannot transfer to Easy Access during the semester.

This program is administered by the Office of the University Registrar - Registration, 130 Jesse Hall.

Reciprocal Agreements

Kansas - Missouri Agreement for Exchange of Students

Reciprocal tuition agreement exists between the Kansas Board of Regents, the Missouri Coordinating Board for Higher Education, and the Curators of the University of Missouri for Missouri residents desiring to enroll in architecture programs at The University of Kansas and Kansas State University and for Kansas students desiring to enroll in the dentistry program at the University of Missouri-Kansas City or in optometry programs at the University of Missouri-St. Louis. For further information about these programs, contact the admissions office at the institution offering the program.

Nebraska - Missouri Agreement for Exchange of Students

By joint agreement of the Board of Regents of the University of Nebraska and the Board of Curators of the University of Missouri System, qualified Missouri students may enroll at the University of Nebraska in certain educational programs and be charged fees at the rate paid by Nebraska residents. A qualified student is one who meets the residence requirements of MU and who meets the minimum academic admission requirements of the University of Nebraska. Undergraduate programs available for Missouri students include architecture, community and regional planning, construction management and actuarial science.

All graduate programs (not including professional degrees) at the University of Nebraska and the University of Missouri are available in a separate agreement under which eligible persons from either state are treated as residents. For further information, call or write the director of admissions at the institution offering the specific program.

Midwest Student Exchange Program

The Midwest Student Exchange Program is an interstate initiative established by the Midwestern Higher Education Commission (MHEC) to increase educational opportunities for students in

its member states. This program enables residents of Kansas, Michigan, Minnesota, Missouri and Nebraska to enroll in designated institutions and selected programs at reduced tuition levels outside of their home state. For further information please visit www.mhec.org/studentaccess_studentexchange.html.

Mid-Missouri Associated Colleges and Universities (MMACU)

MMACU was formed in 1964 to encourage the sharing of experiences and resources among its members. In addition to MU, consortium institutions include William Woods University, Stephens College, Westminster College and Lincoln University. Full-time undergraduate students of the five MMACU institutions may take courses for credit at any of the five campuses on a space-available basis with the permission of their home institution. The intent of cross-registration is to support students' educational needs when a desired course is unavailable at the home institution or when there are inherent schedule conflicts. To qualify for cross-registration, a student must be in good academic standing and enrolled full-time as an undergraduate. (MU defines full-time as 12 or more credits during the fall and spring semesters and 6 or more credits during the summer, which includes credits taken at the cooperating institution.) Non-native English speakers must meet all English Language Proficiency requirements of the school in which they wish to enroll.

Forms and additional information are available from the Office of the University Registrar-Registration, 130 Jesse Hall, (573) 882-7881.

Cooperative Agreement between MU and

Columbia College

Full-time undergraduate students from one institution may enroll in undergraduate classes offered by the other institution if the course in which the student enrolls, or its equivalent, is not offered during the semester for which the student is enrolling in the schedule of courses of the home institution. (Students will be considered full time if they are taking a combination of 12 credits from both institutions.) Further information and regulations regarding this agreement are available in 130 Jesse Hall, (573) 882-7881.

TRANSFER WITHIN MU – CHANGING DEGREE PROGRAMS

Transfer from one MU College or School to Another

Students may transfer from one MU school or college to another in accordance with college and school policies as noted below and in the college and school sections of the catalog. Currently enrolled students may obtain a Transfer of Division form from their academic unit. Signatures are needed from the deans of the colleges or schools the student is entering.

REGISTRATION

Procedural Overview

The University of Missouri uses online (MyZou) registration. Students learn the processes during Summer and Spring Welcome sessions. In addition, step-by-step instructions are available on the University Registrar's web site, which is linked to the MU home page, www.missouri.edu. Students must be admitted prior to being eligible to register for courses. Once a student is

admitted, a MyZou account is created for them. Students are also assigned a student identification number. Their MyZou account is used to access the registration process and protect the student's private information. For more information, contact the Office of the University Registrar-Registration, 130 Jesse Hall, (573) 882-7881.

Summer and Spring Welcome

New students who will begin course work in the fall term are invited to Summer Welcome. During the two-day event, students complete their registration. All students may be enrolled in up to three courses prior to attending Summer Welcome. Students participate in orientation sessions to assist in the transition to MU. Guests such as parents or spouses may accompany students. There are additional fees for guests.

New students who will begin course work in the spring term are invited to Winter Welcome. During this one-day event, students complete registration. The orientation sessions are streamlined for spring starters.

Students receive detailed information regarding these two welcome programs in the mail after they are admitted to MU.

Adding a Course

Students may add courses through the end of the business day one week following the first day of classes in regular session, (Example: Monday-Monday) or the equivalent thereof in a shorter session. For specific dates and deadlines, contact the Office of the University Registrar-Registration, 130 Jesse Hall (573-882-7881) or visit www.missouri.edu.

- An advisor's and dean's approval may be required; it is suggested that you consult with your academic advisement unit for guidance.
- Courses that start after the first day of the semester may be added prior to the first day of instruction by visiting the Registration office at 130 Jesse Hall.
- Problems, special readings or research courses may be added at any time in the semester with an add/drop form signed by the student's academic advising unit. The form is processed by the Office of the University Registrar staff in 130 Jesse Hall.

Section Changes

Course-section changes occur when a student moves from one meeting time of a course to another, within the same course. Section changes are initiated by the student. Students may change sections through the end of the business day, one week following the first day of classes, in regular session (Example: Monday-Monday) or the equivalent thereof in a shorter session.

Easy Access Registration

Students who are non-degree seekers at MU may enroll in up to 6 undergraduate credits on a space-available basis. Registration is held just before the term begins. Interested students should contact the Office of the University Registrar-Registration for additional information or check the MU web site for dates and times of registration. International students must demonstrate English language skills with appropriate TOEFL scores. Students who have been dismissed from MU must wait one full year before registering via Easy Access. Students registering through Easy Access are subject to University academic requirements and other policies, which dictate that students may be dismissed for low academic performance.

Senior citizens enrolled in Easy Access are eligible for discounted fees if they meet certain conditions. Contact the Office of the

University Registrar, (573) 882-7881, for more information.

Center for Distance and Independent Study

A broad curriculum of approximately 160 online or print-based university courses is available through independent study. Each online course is offered by an academic department at one or more of the campuses of the University of Missouri. Independent study provides a valuable learning alternative for students when scheduling conflicts, financial problems or other barriers interrupt the flow of education. Courses provide varying levels of interactivity. Students can enroll in independent study any time of the year and take anywhere from six weeks to nine months to complete each course.

The Board of Curators has stipulated that credit earned through independent study may be applied toward a bachelor's degree, subject to the approval of the college or division offering the degree. Students should consult their adviser or dean's office before enrolling in an independent study course.

The independent study curriculum includes online and traditional print-based courses. Students who enroll in online courses use the Internet to access their lessons and complete their assignments. Students who enroll in print-based courses receive a study guide that provides all lesson assignments and instructions needed to complete the course. Students can submit completed lesson assignments to the Center for processing in person, by mail, or online for most print-based courses.

Textbooks and other supplementary materials required to complete independent study courses can be purchased from the Center. Most courses require two supervised examinations, which are administered at the Center and other designated testing areas.

Using <http://cdis.missouri.edu>, students can request a course listing, preview course offerings, enroll in or withdraw from a course, submit lessons for computer-evaluated and online courses, access their online courses, send the Center a message, check their status in independent study courses, change their address, view their account balance, order textbooks, and request to have an exam sent to an exam proctor.

The Center for Distance and Independent Study course list is available in Ellis Library, the Office of Admissions at 230 Jesse Hall, and at the Center for Distance and Independent Study at 136 Clark Hall, Columbia, Mo, 65211, (573) 882-2491 or 1-800-609-3727.

ACADEMIC PROCEDURES, RULES AND REGULATIONS

The academic rules and regulations of the University of Missouri are published in the *Rules and Regulations of the University of Missouri* and the *MU Faculty Council Academic Regulations*. (Both are available on the web from MU's home page.) The following are selected policies and procedures. Many are summarized as a guide for students. Students needing additional information on academic regulations in specific colleges and schools may obtain this information from their deans' offices.

Absences

Students are expected to attend all scheduled class sessions. A student who does not complete assigned academic work because of absence from class is responsible for making up that work in accordance with instructions provided by the faculty member consistent with any policy established by the faculty of the respective department, school or college. A school or

college faculty, a department faculty, a course director or an individual instructor may establish attendance standards and will determine whether a student will be permitted to make up work missed as a result of absence(s). There is no dean's excuse or official absence.

Academic Dishonesty

Academic honesty is essential to the intellectual life of the University. Thus, academic dishonesty, such as cheating and plagiarism, is a basis for disciplinary action. In all cases of academic dishonesty, the faculty member makes an academic judgment about the student's grade on that work and in that course and reports all incidents to the provost for disciplinary action. (See the Student Responsibility section later in this catalog.)

Academic Renewal

Students who are returning to the University of Missouri to pursue an undergraduate degree after an extended absence may request permission to remove one or more complete academic terms from future degree and GPA considerations.

Eligibility: To be eligible for academic renewal consideration, students must meet these requirements:

- Students must not have enrolled as degree-seeking at the University of Missouri for four or more consecutive years.
- Students must not have graduated from the University of Missouri- Columbia.
- Students must either:
 - be admitted as degree-seeking and have earned a minimum of 12.0 credits with at least a 2.5 GPA of record for those credits at the University of Missouri within the past 12 months; or
 - have attempted, as a non-degree-seeking student, and have earned thereby a minimum of 12.0 credits with at least a 2.5 GPA of record for those credits at the University of Missouri within the past 12 months and subsequently have been admitted as degree-seeking by the University.

Conditions: Academic renewal is based on the following conditions:

- All courses and credits taken during the chosen terms will be removed from consideration for GPA and degree requirements. Students may not combine individual courses from multiple terms to comprise the semester(s) dropped. All courses and grades for the chosen terms will remain on the student's academic record.
- Renewal may be applied only to academic terms completed prior to the student's extended absence.
- Students may be granted only one academic renewal.
- Students who choose academic renewal must meet the degree requirements of the University of Missouri undergraduate catalog at the time of their readmission.
- Degree requirements met during the dropped terms must be repeated.
- To be eligible for a degree, students must complete a minimum of 24 credits at the University of Missouri after the granting of academic renewal.

Procedures:

- Students should discuss their desire to pursue academic renewal with an academic advisor in the college they wish to enter.
- Students should submit an application for academic renewal to the Office of the University Registrar.
- For each term approved for academic renewal, a note will appear on the transcript.

Questions may be directed to the Office of the University Registrar-Records, 126 Jesse Hall, (573) 882-4249.

Academic Standing

Academic performance is represented by academic standing, according to the *Faculty Handbook*, of which there are three levels: regular, academic probation, and ineligible to enroll. For the purposes of this policy, "term" may refer to a semester or summer term.

Regular Academic Standing: Students whose term and cumulative GPAs are 2.0 or higher are in regular academic standing.

Probation: Students in regular standing whose term GPA subsequently falls below 2.0 but is 1.0 or above are placed on probation. Students on probation must establish a 2.0 cumulative GPA within two successive terms of enrollment; otherwise they are ineligible to enroll.

Any beginning student admitted to the University of Missouri who does not meet the minimum entrance standards as specified in the *Faculty Handbook*, Article II, Admissions, Advanced Standing, and Classification will enter on scholastic probation and will have one semester in which to remove probation.

Ineligible to enroll: Students whose term GPA falls below 1.0 are ineligible to re-enroll. Students on probation must establish a 2.0 cumulative GPA within two successive terms of enrollment; otherwise they are ineligible to enroll.

In the application of the foregoing rules, the dean or faculty committee of the division concerned will determine how an incomplete grade in a course will be considered in determining a student's academic standing. A student who has been ineligible to enroll for a period of one year may be readmitted only upon the approval of the dean of the school or college in which the student desires to enroll. If a readmitted student again becomes ineligible to enroll, his or her ineligibility is normally considered permanent. These regulations are the prescribed minimal standards but do not limit the authority of the faculty of any school or college to adopt and enforce additional regulations affecting students enrolled therein.

Active Military Duty

Enrolled students called into active service in the armed forces of the United States prior to the completion of the semester, whether voluntarily or involuntarily, but not including active service for training, shall be eligible for either of the options listed below: **NOTE:** Students must choose either option 1 or 2

Option 1 - Withdrawal from all courses for semester

- They may choose to withdraw from all classes. In such cases, a student may request either:
 - A) That the official transcript indicate the courses from which he or she has withdrawn, the date of withdrawal and the reason for withdrawal. Students choosing this option will have their tuition and fee charges and their student financial aid eligibility calculated effective with their official withdrawal date.
 - B) Or the student may request that all courses for that semester be expunged from the student's academic record. Students taking this option will receive a complete refund of all educational and incidental fees paid by the student for enrollment for that semester. However, students who have received federal, state or institutionally funded financial aid must return all aid disbursed to them for the semester

NOTE: Students must see their Academic Advising Unit to withdraw and return the form to Office of the University Registrar, 130 Jesse Hall.

Refunds will not be immediately available. Refunds are based on your last method of payment (i.e. credit card, check, etc). Refund checks will be sent to your mailing address unless a

forwarding address is left with the University.

Option 2 - Receive Incompletes in all courses for the semester

The student may choose to receive an incomplete in all courses not yet completed for the semester. In that case the following rules apply:

- The student must complete all course work for the semester to the satisfaction of the instructor(s), and the time a student spends on active military duty shall not be counted against time allowed for the completion of an “Incomplete” grade.
- **I to F policy:** Students called to active military duty will be exempted from the one-year automated changes of I to F grades for the term of deployment and the year prior to deployment. In accordance with State statute, students may complete work upon their return from duty or may choose to maintain the I grade. Therefore, I grades for students called to active military duty will remain listed as “I” until a change of grade is submitted by the faculty member, or indefinitely, if so desired by the student.
- **N to F Policy:** Military duty will be exempted from the one-year automated changes of NR to F grades for the term of deployment and the year prior to deployment. In accordance with State statute, students may choose to maintain the NR grade. Therefore, NR grades for students called to active military duty will remain listed as “NR” indefinitely, if so desired by the student.

Upon completion of all coursework for the semester, the student may choose either to:

- A) Have the grade earned for the course and have the “Incomplete expunged from his or her official record OR
- B) Have the “Incomplete” grade remain as the final grade with reason for the “Incomplete” noted on his or her official record

NOTE: No refunds will be given for option 2.

Residential life: Residential life will be contacted and informed of your intent to exit the University. Room, board and social fees will be prorated and applied to your University student account based on the effective date of your official check out from the residence hall or other University accommodations.

Financial Aid: The Office of Student Financial Aid will be informed of your student status and your official withdrawal date and may make adjustments according to federal, State of Missouri and institutional guidelines.

Scholarships: Scholarships may or may not be applicable upon the student’s return to the University. For example, Section 41.948.2, RSMo, provides that if a student has been awarded a scholarship to be used to pursue an academic program in any higher education institution in Missouri and he or she is not able to complete the term for which the scholarship was granted, the student shall be awarded that scholarship at any subsequent academic term provided the student returns to the academic program at the same institution at the beginning of the next academic term after the completion of active military service. If a student has any scholarships or other aid or award, he or she should contact the issuer to determine whether it will be applicable on his or her return and whether he or she will need to satisfy any other conditions.

Contact:

Office of the University Registrar - Registration
130 Jesse Hall
The University of Missouri - Columbia

Columbia, MO 65211

Office: (573) 882-7881

Fax: (573) 884-4530

The Office of the University Registrar will require the following information:

- A copy of your military orders, as soon as possible
- Forwarding Address
- Name, address and phone number of a contact or your representative
- Your name as it is on MU records
- MU ID number
- Which option student wishes to choose for classes

This information may be brought to 130 Jesse Hall or faxed to (573) 884-4530.

Re-admission of Previously Enrolled Students: Students who are returning to MU after an absence of at least one semester must complete Request to Re-enroll in Undergraduate Studies form (PDF) and return it to the Office of Admissions, 230 Jesse Hall, Columbia, MO 65211-1300 or fax to (573) 882-7887.

To view Missouri Revised Statutes Chapter 41 (41.948): <http://www.moga.state.mo.us/statutes/c000-099/0410000948.htm>

This policy is implemented to assure that students called to active duty prior to the end of a term receive fair and just treatment, both financially and academically. **Contact the Office of the University Registrar-Registration for more information at (573) 882-7881.**

Advanced Standing Options-Credits by Examination

MU offers the opportunity for advanced credit by examination to any student with fewer than 90 credits. Credit may be awarded, but no grades or honors points are recorded. General eligibility to receive advanced standing at MU does not guarantee its applicability to a degree program. A brochure, *Credit by Examination*, available from the Admissions Office, provides additional information. The programs described below are used to award credit.

Advanced Placement Program

The Advanced Placement Program of the College Board is accepted by MU. The examinations are prepared and graded by national committees, and the results are furnished to MU on request of the student. Students who receive a sufficiently high score are eligible for college credit. Students should contact their academic units if they have questions.

College Level Examination Program

The College Level Examination Program of the College Board provides general examinations and subject examinations. Credit may be awarded for CLEP subject exams only. Credit must be applicable in students’ programs of study. (Refer to the appropriate section in this catalog for the school or college, or contact the academic unit to ascertain the specific limitations for CLEP examinations.)

Credit by Examination for Mathematics Courses

It is possible to receive credit in the following math courses by passing the appropriate examination:

- MATH 1100: College Algebra (3)
- MATH 1140: Trigonometry (2)
- MATH 1160: Pre-calculus (5)
- MATH 1360: Geometric Concepts for Teachers (3)
- MATH 1500: Analytic Geometry and Calculus (5)
- MATH 1700: Calculus II (5)

To inquire about these examinations, contact either the Group Testing Program, 220 Parker Hall, (573) 882-4801, or the departmental representative on testing for advanced placement. Credit for a course by examination is not available to students who have essentially covered the material of the course in college or university courses.

Departmental Examinations

Departmental examinations are limited to students with fewer than 90 credits and with no official record of previous enrollment in the course(s) in which credit is to be received.

Departmental examinations are comparable to final examinations given in the various courses offered on campus. The examinations are objective or essay formats and are prepared and graded by the faculty of the department concerned and MU Testing Services. Arrangements for departmental examinations should be made through Testing Services. (Also see the College of Arts and Science information on departmental exams.)

International Baccalaureate

MU recognizes the International Baccalaureate Program. Students may receive credit and/or advanced standing for proficiency on the higher-level subject examinations. No credit is granted for subsidiary-level examinations.

Additional College Course Work

MU recognizes college course work completed before high school graduation if the college attended provides an official transcript of the course work.

Freshman Placement Tests

Placement in English is based on ACT score in English. Math placement is based on ACT math score.

Subject Examinations

Subject examinations are limited to students with fewer than 90 credits. The subject examinations are generally accepted by most schools and colleges but may not be considered for credit in all degree programs.

Application for Degree

Students should contact their academic unit at least a full semester before they anticipate graduating to complete the appropriate steps and paperwork to apply for receiving their degree. The University does *not* automatically anticipate or calculate who will be degree candidates each term.

Auditing a Course (Hearer)

Students who wish to obtain knowledge from a course, but do not need or want the credit for graduation, may enroll in the course(s) as auditors/hearers.

- Hearers receive no credit toward a degree and an H grade appears on the transcript.
- Students pay standard fees for the course(s).
- Students may not change their registration status, (hearer vs. credit) after the expiration of 2 weeks following the first day of classes in regular session or the equivalent thereof in a shorter session.
- Contact the Office of the University Registrar-Registration, (573) 882-7881, for deadlines for each semester.
- Students must obtain dean's approval from the academic advising unit on an add/drop form prior to processing it in the Office of the University Registrar-Registration, 130 Jesse Hall.
- Students who fail to meet class requirements *may* be dropped

from the course by their academic advising unit upon request of their instructor and with the dean's stamp.

- Normally, a hearer will attend the course on a regular basis; either the department or an individual instructor will stipulate the requirements for enrollment in a course as a hearer.

Completion of a Course

A course is considered complete if the student earns a grade of A, B, C, D, F or U, and the "+" or "-" sign if appropriate, or S for the course. A course in which the student receives a grade of W, NR, or I is not considered a completed course.

- The faculty of the division concerned will determine how the grade of I in a course and a grade in a repeated course will be considered in determining a student's academic standing. However, for financial aid purposes the grade of I is not considered a completed course and a repeated course will be counted as additional credits attempted.
- The dean of the relevant division may, after consulting with relevant faculty, waive any of the regulations governing a student's eligibility to re-enroll. However, the Financial Aid Advisory Committee shall have authority concerning students' satisfactory progress toward their educational objectives and eligibility to receive federal, state and institutional student financial aid.

Distance Education Courses

See Center for Distance and Independent Study.

Course Repeat Policy

The Course Repeat Policy will *not* automatically be applied to a student's GPA. After completing the second attempt of a course, a student must submit a *Request for GPA Adjustment Form* to the University Registrar's Office 126 Jesse Hall.

When a grade received in an initial attempt, for an undergraduate course at University of Missouri, is a "C-", "D+", "D", "D-", or "F", the grade will be replaced in the calculation of the GPA by the grade received in any second attempt of the same course at the University of Missouri (unless the repeat grade is an "I" or "W"). All grades received in second and subsequent attempts will be included in GPA calculations. No more than 15 semester hours will be dropped from the calculation of the student's GPA. All attempts of a given course will appear on the official transcript with the grade(s) earned. The transcript will have an explanation that the GPA is calculated using all grades earned in a course except the initial attempt when a course has been repeated. *This policy is effective with course work where the initial enrollment and completion of the course was Fall Semester 2000 and thereafter.*

Any course being repeated may not be taken on an S/U basis.

This policy does not imply a guarantee that openings will be available in courses if and when students wish to retake them, and instructors will not ordinarily know whether a student is enrolled in a course for the second time. When a course is repeated all applicable fees apply.

Degree credit may be earned only once for a particular course unless a department or division has, in other policies, allowed for multiple-credit from that course.

Students are strongly encouraged to visit with an adviser to determine whether reenrollment is advisable (certain department or divisional policies may be important in this connection). Further, students should be aware that repeating a course may have an impact on financial aid, insurance, entrance to professional

schools, participation in athletics, immigration status, and other non-academic matters.

The academic status of a student in a given semester will not change as a result of repeating a course.

The policy is applicable to undergraduate students only.

Clarifying Comments

Students should not re-enroll in a course for which they have been assigned a grade of “I”.

Students may not apply the course repeat policy to courses once they have graduated. This also applies to students who are seeking a second undergraduate degree.

For the purposes of this policy, an undergraduate course is any course an undergraduate student attempts for undergraduate credit regardless of the course level. A student may not apply the course repeat policy to a course repeated as an undergraduate student for graduate credit.

If the department or course number has changed since the student completed the first attempt of a course, the department offering the course will verify that the subsequent course is substantially the same and the course repeat policy may apply.

If the initial course is a cross-listed course, a student may apply the course repeat policy if the student subsequently completes the cross-listed course offered by the alternate department.

Courses for which a NR, W or a grade of I are assigned are not considered attempts since no final grade has been recorded.

If the initial attempt of a course contained an attribute such as; honors, writing intensive, math reasoning proficiency, service learning, or computer proficiency, the second attempt is not required to contain the same course attribute for the purpose of the course repeat policy. Students should be aware that if the second course does not have the same attribute as the initial course they will no longer be allowed to count the initial attribute toward any graduation requirement.

Grades of C or greater may not be repeated under the Course Repeat Policy because these grades are considered acceptable work and would not prevent a student from graduating from MU.

Students cannot replace the grade earned from a course at the University of Missouri with a grade earned in an equivalent course at another University of Missouri campus or other college or university. *Effective summer term 2003, MU-authored Center for Distance and Independent Study (CDIS) courses may be used in conjunction with the Course Repeat Policy.*

Credit by Exam

See Advanced Standing.

Dual Enrollment

Undergraduate/ Graduate Enrollment

With the approval of the school or college and the graduate dean’s office, final-semester seniors in the upper half of their classes, who have a “B” average in the most recent 45 semester hours of credit and are within 15 credits of completing graduation requirements, may enroll dually for up to 6 graduate credits in their undergraduate division and the Graduate School for courses sufficient to make a full program. Specific circumstances exist in which exceptions to this rule are made; college and school rules should be consulted.

An application for dual enrollment must be completed and approved by the Graduate School prior to registering for the graduate level course *Students who graduate with excess credit*

without registering in the Graduate School will not receive graduate credit for that work.

This program also is available to seniors in other Missouri colleges. Additional information may be obtained from the Graduate School dean’s office.

Undergraduate/Law Enrollment (90-Credit Program)

With prior written approval, select undergraduate MU Arts and Science students may have up to 30 credits in courses from the School of Law, which are acceptable to the faculty of the College of Arts and Science, applied toward a Bachelor of Arts degree. This combined curriculum enables students to obtain both the Bachelor of Arts (BA) and the Juris Doctor (JD) degrees in six years.

Other university divisions, and some colleges and universities other than MU, accept the Juris Doctorate in lieu of the fourth year of college and award a baccalaureate degree upon graduation from MU’s Law School. Students interested in this program should check with the dean of their college early in their undergraduate careers to ensure compliance with all requirements.

The undergraduate degree is a requirement for the Juris Doctor degree. Students entering law school under this combined degree program must make arrangements with their undergraduate schools to complete all requirements for their undergraduate degree.

Students with Bright Flight or MU awarded scholarships, such as Curators, Excellence, and Diversity, may use these awards in the law school. Check with the Office of Financial Aid.

Please note: While not a problem in the state of Missouri, prior to participating in the 90-credit program, students should determine whether participation would adversely affect admission to the bar in the jurisdiction in which they expect to practice. Some states will not admit to their bar persons with fewer than 14 semesters of university work or who did not have their bachelor’s degree before entering law school.

Full-time/Part-time Status

A minimum of 120 credits is required for graduation, regardless of the number of terms attended. See degree requirements and definitions below for details.

- **Full-time undergraduate student:** A full-time undergraduate student is enrolled in at least 12 credits during the fall and spring semesters or an equivalent number of hours during summer session. The typical course load for a full-time student is 13 to 16 credits. Students wishing to drop below 12 credits after enrollment should contact their academic unit. Dropping below 12 credits may negatively affect financial aid, athletic eligibility, and certification for insurance purposes. Students may not enroll for more than 18 credits without permission from their academic units.
- **A 3/4-time undergraduate student:** A 3/4-time undergraduate student is enrolled in at least 9 credits during the fall and spring semesters or an equivalent number of credits during summer session.
- **A 1/2-time undergraduate student:** A 1/2-time undergraduate student is enrolled in at least 6 credits during the fall and spring semesters or an equivalent number of credits during summer session.

Grades

GPA of Record

The grade point average for any period is obtained by dividing the quality points earned by the total number of credits for which the student was enrolled during that period. Grades of S, U, H, W, NR, or I are not included in determining the grade

point average.

The University of Missouri GPA includes all grades, credits and quality points attempted at any campus of the University of Missouri, including all grades, credits and points for any course that is repeated. In computing the grade point average for students' transfer work from any campus of the University of Missouri System, the grades and quality points are used that would have been assigned if the courses had been taken on the campus calculating the GPA. Repeated courses, marked R, are excluded from the GPA calculation.

GPA Calculator Web Site

To calculate a grade point average, go to the GPA Calculator Web Site at <http://registrar.missouri.edu/grades-transcripts-records/gpa-calculator.php>

Plus-Minus Grading System

The purpose of the grading system is to provide a framework in which the faculty can report evaluation of student performance and achievement. For the internal purposes of a school or college, its faculty may adopt a variant of the campus grading system.

The A through F grading system is appropriate for those subjects and situations that allow discrimination in quality of achievement and performance. The S/U grading system is more appropriate for students wishing to take elective courses in a subject matter field in which they will be competing with majors, for mastery learning situations, and for courses graded primarily on the basis of attendance.

Grades carrying credit are: A+/-, B+/-, C+/-, D+/-, and S. Grades calculated in the grade point average are A+ (4.00), A (4.00), A- (3.7), B+ (3.3), B (3.00), B- (2.7), C+ (2.3), C (2.00), C- (1.7), D+ (1.3), D (1.00), D- (0.7), and F (0). The grades of S, U, NR, and W are not incorporated in the grade point average.

Students must have a cumulative GPA of 2.00 to remain in good academic standing.

All regulations currently applicable on a course-by-course basis and tied to a specific letter grade are interpreted to mean a specific letter grade range. Hence, if a student must achieve a C in one course in order to proceed to another course, under the plus-minus grading system, that student must achieve a grade in the "C range," which would include the grade of C-.

All regulations currently tied to a specific grade average are interpreted to mean the numerical average currently associated with that specific grade. Hence, the required "C average or better" on all courses is a "2.00 average or better."

The grade of S (on S/U basis) is defined as equivalent to the letter grade of C- or higher.

Students seeking Missouri teacher certification must receive a C (2.0) or better in written and oral communication and mathematics in each of the courses required in these areas within the University general education requirements of the College of Education. Students also must obtain a C (2.0) or better in the professional education courses required. Students should contact the associate dean in the College of Education for further information.

Satisfactory/Unsatisfactory Grading System

Students may elect to take courses under the S/U (pass/fail) grading system in several MU colleges and schools. Before electing to take a course on a pass/fail basis, the student should evaluate the advantages and disadvantages of the S/U grading system. The S/U grading status is indicated in the appropriate column on the registration or add/drop form. Students may change to or from the S/U status only through the tenth day of classes in a semester.

In general, the teacher of a course does not know which students, if any, are enrolled on the S/U system, and a grade of A-/+ , B-/+ , C-/+ , D-/+ or F for each student is reported to the Office of the University Registrar-MU. The Office of the University Registrar-MU staff members ascertain which students are enrolled on the S/U system and assign a grade of U to those reported for grades of D-/+ or F, and a grade of S for those reported A-/+ , B-/+ or C-/+ . Grades of S and U are not included in the computing of grade point averages.

Enrollment in courses under the S/U system is subject to the following restrictions by the University faculty:

- Students cannot change from one grading system to the other after the tenth day of classes in the fall or spring semesters, or the equivalent thereof in a shorter session.
- Students cannot elect to enroll in more than one course on an S/U basis in a given semester. This excludes courses taught only with the S/U grading system.
- First-semester freshmen and students on scholastic probation are not eligible to enroll in courses on an S/U system. This excludes courses taught only with the S/U grading system.
- A+/-, B+/-, and C+/- grades are recorded on the transcript as an S. S grades are not included in the semester or cumulative grade point average on the transcript. Full credit is earned for courses completed with a grade of S.
- D+/- and F grades are recorded on the transcript as a U. U grades are not included in the semester or cumulative grade point average on the transcript and no academic credit is awarded for courses completed with a grade of U.
- Courses completed with a grade of S may be accepted in an area of concentration only with the prior approval of the area adviser.

Courses completed with a grade of S may constitute no more than 20 percent of the total credits for the baccalaureate degree.

- Taking S/U courses may affect eligibility for Latin or other graduation honors for undergraduate students. Contact the academic advising unit for information.
- Some specified courses may not be taken on S/U basis to meet graduation or degree program requirements. Contact the academic advising unit for S/U approval.

Selecting Grading Options (S/U vs. A through F)

Students must choose to change their grading option no later than after the expiration of 2 weeks following the first day of classes in regular session or the equivalent thereof in a shorter session. Contact the Office of the University Registrar-Registration for specific dates for each semester and for classes of irregular or non-standard length.

How Dropping/Withdrawing from a Class Affects the GPA

Students may drop a course through the end of the business day of the 5th week or the 25th class day of the semester. It will have no effect on the grade point average. After the 25th class day, the signature of the course instructor and/or dean of the academic unit is required. After the last day to drop, students are "withdrawing" from a course if they choose to leave the course. Students may withdraw from a course through the end of the business day of the 10th week or 50th class day of the semester. At this point a grade of W for withdraw is recorded if the student was passing at the time of withdrawal. If the student was failing at the time of withdrawal, the course grade is F. The instructor determines which grade to assign. A W grade does not affect the grade point average, while a grade of F does. The grade generally will not appear until all grades for the course are submitted at the end of the semester.

Grades for Students Who Officially Withdraw from the University

No grade will be assigned to a student who officially drops prior to the 26th day of the fall or spring semester or an equivalent period in a summer session (other non-standard classes are also adjusted accordingly).

Students who officially withdraw from a standard 16-week course on or after the 26th day are required to obtain the signature of the course instructor on the Class Withdrawal Form, available from the academic advising unit. This will inform the student of the grade (W or F) that will be submitted to the Office of the University Registrar at the end of the semester. A grade of F is assigned if the student is judged to be failing at the time of the withdrawal and will be calculated into the grade point average. Once the class withdrawal form is completed, students should return the form to their academic advising unit to obtain the dean's signature (stamp of approval) on an add/drop form. The add/drop form is submitted to 130 Jesse Hall for processing.

Dropping or withdrawing from all classes for a term is considered withdrawing from the University. If done after the first day of standard classes, and if the student is financially enrolled for the term, the student remains eligible to pre-register for the following term. If a term elapses (other than summer) between enrollments, the student must apply for readmission. NOTE: Refund dates are different from withdrawal dates. (See the Withdrawing from the University and Refund sections in this catalog.)

Grade Appeal

Guidelines for grade changes are as follows:

- Students who believe that they have been graded unfairly or incorrectly should see the course instructor.
- If still dissatisfied, the student may appeal to the chair of the department. (If the course has a large number of sections, it may have a course director. If so, the student should see the director before appealing the grade to the department chair.)
- The chair of the department will conduct an investigation. The chair cannot substitute his or her judgment for that of the instructor concerning the quality of the student's work.
- If the instructor of the course also is the department chair, the dean of the school or college will handle grade appeals.
- No one may substitute personal judgment for that of the instructor concerning the quality of the student's work. However, mathematical or mechanical errors in scoring examinations may be corrected.
- No grade shall be otherwise changed unless there is clear, convincing and unequivocal evidence that it was a direct result of arbitrary and capricious conduct by the instructor.

Incomplete Grades (Grade of I)

Whenever students cannot be assigned a grade at the end of a course in which they have been enrolled because their work is for good reason incomplete, the instructor will postpone the grades, reporting I grades to the University Registrar.

An I grade may be assigned only when:

- 1) The completed portion of the student's work in the course is of passing quality and
- 2) There is such evidence of hardship as to make it unjust to hold the student to the limits previously fixed for the completion of the work.

Each department of the schools and colleges maintains a record of I grades in courses of that department. (Exemptions are made for research courses and problems courses related to research assignments.) This record, on a specially designated form completed by the instructor at the time the I grade is awarded,

will include:

- The name of the student
- The course number, title and credits
- Semester and year of enrollment
- The signature of the instructor
- A brief statement of the reason for delaying the grade
- An adequate guide for the removal of the I grade along with a suggested final grade in the event of the departure or extended absence of the instructor from the campus

A copy of the form will accompany the grade report to the Office of the University Registrar, which will in turn notify the appropriate dean.

An undergraduate student who receives an "I" grade must complete the course requirements either (1) within one year from the date it was recorded (unless the course is numbered 4950-4959 or 4995), or (2) before the date of graduation (whichever comes first). When an incomplete is satisfactorily resolved, the faculty member responsible for the grade change will notify the Registrar of the revised grade. Otherwise, the Registrar will remove the "I" and record a grade of "F" in classes graded A-F for a grade of "U" in classes graded S/U. Any student planning to graduate with an unresolved "I" grade should be aware that translation to an "F" could drop the GPA below requirements for graduation. As with any academic deficiency, the low GPA would delay the student's graduation until all requirements for graduation are met. When the incomplete work is accomplished, proper notification of the grade to be assigned will be provided to the University Registrar and the student.

Note:

- A grade of I is not figured into the grade point average.
- Students should not re-enroll in a course for which they have been assigned a grade of I.
- For further information, see the *Faculty Handbook*, Academic Regulations.
- Exceptions to unresolved incomplete grades changing to an "F" are as follows:
 - Courses taken for graduate level credit
 - Courses taken prior to Fall 2003
 - Undergraduate research, honors research or problems courses that are approved for multiple terms of continuous research
- Questions may be directed to the Office of the University Registrar-Records, (573) 882-4249.

Unassigned or Erroneous Grades

To correct a grade erroneously reported, proper notification is sent from instructors and their department chairs to the Office of the University Registrar-Records on a form provided for that purpose.

Note: Grade corrections must be processed within one year of the original reporting date.

In situations when there is a failure to record a grade on the official grade sheet, the Registrar will record a NR (not reported) and send a written notification of this action to the faculty member and relevant department chair. The faculty member is responsible for submitting a corrected entry. After 12 months NR will change to an F.

No student may be re-examined for the purpose of changing a grade after a final grade has been reported to the University Registrar. For further information see the *Faculty Handbook*, Academic Regulations. Questions may be directed to the Office of the University Registrar-Records, (573) 882-4249.

Hearer

See Auditing a Course.

Holds

There are several types of holds, which are restrictions that may block registration. Students are notified in their registration email if they have a hold. They should go to the office indicated in the email to resolve the hold.

Student Level

Students are assigned to a particular class level based upon the number of credits they have completed in accordance with the following limitations:

Freshman	0 to 29 credits
Sophomore	30 to 59 credits
Junior	60 to 89 credits
Senior	90 or more credits

For registration purposes, student level will be determined by earned credits plus those credits in progress at MU. For instance, students who have completed 15 credits and are enrolled in 15 credits for the current semester will receive registration appointment times with sophomore-level students for the next semester.

Undergraduate students pursuing degree programs at other institutions who enroll at MU as visiting students will generally be considered as freshmen non-degree students. They are not assigned to a school or college. This applies to students who enroll under agreements with the Mid-Missouri Associated Colleges and Universities as well as those from other colleges and universities.

University of Missouri Course Work Required

MU requires that 30 of a student's last 36 credits must be MU course work. Center for Distance and Independent Study courses authored by MU faculty are acceptable as are courses offered for credit through MU Direct. (NOTE: This policy has replaced the requirement for courses to be taken "in residence.")

Withdrawing from a Course

If a student wishes to drop a course after the last day to drop a course without a grade, the process is referred to as "withdrawing" from a course. To withdraw from a course, students must begin in their academic advising unit. Following the approval from the academic advising unit, the student takes the form for processing to the Office of the University Registrar-Registration, 130 Jesse Hall. (See the section under Grades on withdrawing from a course, as well as the Refund section.)

NOTE: Students may not withdraw from all courses or their last course via MyZou. This must be done in the academic advising unit.

FINANCIAL AID

Applying for Aid

To apply for financial aid, students must complete a Free Application for Federal Student Aid (FAFSA). Students must complete the application by March 1 to receive priority consideration for the following academic year.

The FAFSA can be filed online at www.fafsa.ed.gov. For assistance with problems or difficulties while using FAFSA on the Web, or for specific questions about FAFSA, call the Federal Student Aid Information Center at 1-800-4-FED-AID (1-800-433-3243). If you are hearing-impaired and have questions, contact the TTY line at 1-800-730-8913.

Graduating high school seniors may apply for academic scholarships by completing the Scholarship Application for Entering Freshmen Students by December 1 of the student's senior year. The application is available online, if you do not have internet access a printed application is in the Application Packet available from the office of Admissions. Continuing MU students and new transfer students may apply for scholarships by completing the online form. The Continuing and Transfer Student Scholarship Applications must be submitted by February 1 of each year. All online applications may be found at www.sfa.missouri.edu.

Satisfactory Academic Progress Policy for Financial Aid Eligibility

To receive financial aid, you must be making satisfactory academic progress per financial aid guidelines. In general, there are three basic requirements:

- (1) Students must pass 75 percent of credit hours attempted.
- (2) Students must have attempted fewer than 181 credit hours.
- (3) Students must have the following minimum cumulative MU GPA:
 - 1.67 if fewer than 60 credit hours attempted.
 - 2.00 if 60 credit hours or more attempted.

FEE ASSESSMENT

To review the MU statement of financial responsibility and its terms visit:

<http://cashiers.missouri.edu/stmtfinresp.htm>

This statement allows students to confirm their understanding of financial implications of registering each semester.

Fees and Expenses

Information on all current fee rates may be found on the MU Cashiers web site.

<http://cashiers.missouri.edu/cost.htm>

Undergraduate Educational Fee

All students enrolled at the University of Missouri are required to pay Educational Fees based on the number of credits of instruction they are receiving. Courses taken as a hearer (auditor) are charged at their normal credit value when computing the amount of fees to be paid.

Non-Resident Educational Fee

Students who are not residents of Missouri, as defined by the *Residence and Educational Fee Assessment Rules*, will be assessed Educational Fees at non-resident rates. The Office of Admissions at 230 Jesse Hall will furnish, upon request, the brochure *Residence and Educational Fee Assessment Rules*.

Student Activities Fee

Students registered for 12 credits in the fall or spring semesters or 6 credits in the summer, in classes taught on the Columbia campus, are required to pay the Student Activities Fee. For less than full-time enrollment, the Student Activities Fee is calculated per credit, and for any fraction thereof. No Student Activities Fee is charged for classes taught off campus. This fee is allocated to various campus organizations and improvement plans.

Information Technology Fee

An Information Technology Fee is assessed per credit for all students enrolled in all courses. This fee is allocated to the campus computing division, to offset the costs of usage, maintenance and upgrading of the computer facilities and services for students.

Mizzou attracts more Valedictorians, Curators Scholars and twice as many of the state's Bright Flight Scholars than any other college or university in Missouri.

Recreation Facility Fee

Students enrolled in more than 6 credits will be assessed a Recreation Facility Fee. Students who are enrolled in fewer than 7 credits, or who are taking classes off campus, will not automatically be charged the Recreation Facility Fee, but may opt to include the charge if they would like to access the recreation facilities.

The Recreation Facility Fee allows students to use campus-based indoor and outdoor facilities as self-service participants. Recreation facilities include an aquatic complex, basketball courts, a fitness center, racquetball courts, indoor and outdoor tracks and tennis courts.

Prepaid Health Fee

This mandatory fee will charge students enrolled in more than 6 hours. Students who are enrolled less than 7 hours in the Fall and Spring, 6 hours in the summer, or who are taking classes off campus will not automatically be charged the Prepaid Health Fee, but may opt to include the charge if they need the services of the Student Health Center.

The fee allows students to consult a health practitioner at the Student Health Center in non-emergency situations, at no cost to the student, including some limited lab work.

Credit Hour Surcharges**Applied Music Fee**

This once-per-semester, flat fee is charged to all students enrolled in an applied music course or courses.

Cooperative Work-Study Program

A processing fee is charged for students registered with the College of Engineering and other select departments for work experience as part of the degree program. No credit is awarded for the semester enrolled in this program.

Music Ensemble Fee

A fee for music ensemble courses is assessed but is offset by a scholarship award.

Supplemental Fees

Fees charged per credit for courses taught within certain departments (e.g. Journalism, Engineering, Health Professions, etc.). For a listing of those departmental fees, please visit the Cashier's website (<http://cashiers.missouri.edu/cost.htm>) and choose the appropriate semester for the current fees.

Study Abroad Fee

This processing fee is charged once per academic year to all students enrolled in the MU Study Abroad Program.

Optional Charges

Optional charges are offered to students enrolled at the University of Missouri. The availability of options may vary each semester. Examples include MU Alumni Association, MU Parents Association, MU Theater Tickets, Student Museum Association, Major Medical Insurance, Concert Series Student Discount Passport, Student Museum Associate and University Club Membership. Contact the Cashiers Office at (573) 882-3097 for more information concerning these options.

Miscellaneous Fees and Charges**Expendable Materials Fee**

These fees are charged for specific courses offered by the Art Department requiring the extensive use of materials in classroom instruction.

Late Registration Fee

Any student registering on or after the first day of classes is charged a non-refundable Late Registration Fee in addition to all other fees. No Late Registration Fee is charged to students who are adding courses to their existing schedules.

Residence Halls

For information on residence hall charges and billing, contact the Department of Residential Life, (573) 882-7275, or 1-800-225-6075 (in Missouri or Illinois). Online, visit <http://www.reslife.missouri.edu/>.

FEE PAYMENT**Time and Method of Payment**

Students must make satisfactory payment arrangements or registration is subject to cancellation. Students are required to make satisfactory payment arrangements with the Cashiers Office before being allowed to register again. Students are responsible for payment whether or not they receive a bill.

The following arrangements may be made for payment of fees:

- Pay the "adjusted amount due" from the monthly billing statement in full by the due date as it appears on the bill.
- Alternatively, students may pay the "minimum payment due" from the monthly billing statement by the due date as it appears on the bill.
- If anticipated financial aid exceeds the total amount due on the student account. A credit balance appears on the monthly billing statement and no payment is required to retain the student's classes.
- If fees are to be paid by a third-party sponsor, such as an agency or embassy, the student's financial enrollment may be completed by verifying with Sponsored Billing that a billing authorization has been received. However, the student may still be responsible for a minimum payment for any balance not to be paid by the sponsor. If so, a minimum payment must be paid by the due date of the monthly billing statement to retain the student's classes.

Note: Students who elect the minimum payment plan must pay a 1% monthly finance charge on the unpaid billed balance. Also, students who fail to pay by the scheduled due date on their monthly billing statement are subject to a Late Payment Fee. Continued failure to pay an outstanding debt may result in escalated collection efforts including placement with a collection agency and the addition of the collection agency fee to the student account.

The Cashiers Office accepts the following methods of payment for fees:

- In person at 15 Jesse Hall: money orders, cashiers checks, travelers checks, personal checks, or cash
- By Mail: money orders, cashiers checks, travelers checks, and personal checks.
- Online: (for students who consent) eCheck, ACH withdrawal from checking or savings, creditcards: Mastercard and Discover. A 2.75% fee applies for all credit card transactions.

Note: Transcripts and diplomas will not be released if a student's financial obligation to MU is past due.

There were two people in the first MU graduating class, and they were honored with a three-hour commencement ceremony.

Refund of Fees Policy

Fees subject to the refund schedule include the Educational Fee, Student Activities Fee, Information Technology Fee and any related miscellaneous fees that may be assessed.

Students who have registered for credit courses and made payment of fees and who subsequently choose to cancel their registration before the first day of classes are eligible for a full refund less a \$20 Cancellation Fee.

Students who withdraw from the University, reduce course loads, or are cancelled for non-payment after classes have begun, are subject to the following refund schedule:

REFUND PERCENTAGES

Full refund:	Before classes begin, less \$20 Cancellation Fee
90 percent refund:	10% of class length
50 percent refund:	10%-25% of class length
25 percent refund:	25%-50% of class length
No refund:	80% of class length

Class days are counted by including Saturdays, Sundays and holidays. For courses that do not run for the full 16 weeks of the semester, the refund percentage periods are adjusted to be proportionally similar to the regular refund periods. The appropriate *Schedule of Courses* and Cashiers Office web site list the specific dates of the refund percentage periods for each term or semester.

The date to be used in determining the amount of the refund shall be the date shown on the add/drop or other applicable form, the postmarked date if the drop or withdrawal is by mail, or the system generated date if the drop is through MyZou. You cannot withdraw from all your classes through MyZou.

Refunds are subject to the following conditions:

- No refund shall exceed the amount of fees paid, less a \$20 cancellation fee.
- Refunds based on credit card payments will be electronically refunded to the credit card.
- Financial Aid refunds are mailed to the student's local address, or may be direct deposited into the student's bank account. Students may manage their direct deposit online through the student center in myZou. Contact Cashiers at (573) 882-6351 for more information concerning direct deposit of refunds. Contact Cashiers: Refunds at (573) 882-3745 concerning financial aid refunds.
- Non-credit card refunds and refunds due to withdrawal from the University are subject to various conditions. Contact Cashiers: Refunds at (573) 882-3745 for more information.
- Deductions may be made from the refund amount for any other financial obligations to the University of Missouri.
- Refund of Fees & Non Residential Fees. Students who withdraw from a study abroad program will be refunded only those costs that can be recovered by MU or the MU Partner Program.

In exceptional cases, such as the death of a student, a 100% refund may be authorized at any time during the semester.

A student who believes a greater refund should be authorized than provided for in the established schedule may fill out a Refund Appeal Form in the Office of the Registrar, 130 Jesse Hall. All appeals of refunds must be submitted within three months of the withdrawal date of the course work in question.

Return of MU Student Aid Funds

Recipients of MU funded scholarships, grants and loans who withdraw from the University are required to return the unearned portion of aid received. The unearned percentage of aid is equal

to the refund percentages shown in the Refund of Fees Policy and applied to individual aid recipients. The calculation of the return of these funds may result in the student owing a balance to the University.

Return of Federal and State Student Aid Funds

Recipients of federal and state funded grants and loans who withdraw from MU or stop attending classes before 60 percent of the semester has passed, are required to return any unearned portion of federal Title IV and State of Missouri student aid received.

Examples of aid programs included in this policy are: Federal Pell Grant, Federal Supplemental Education Opportunity Grant, Federal Perkins Loan, Ford Federal Direct Loan, Federal PLUS Loan, Missouri Access Grants. The calculation of the return of these funds may result in the student owing a balance to the University, the State of Missouri and/or the federal government. All or a portion of the required repayment may come from a refund of fees. Refer to the Refund of Fees Policy.

For purposes of refunds of federal and state aid, if a student does not formally withdraw from the University, the official withdrawal date is the midpoint of the semester or the last date the student engaged in an academically related activity, whichever is later. Therefore, it is extremely important that students who cease attending classes initiate formal withdrawal from the University by filing a withdrawal form available in the academic unit advising office of the school or college in which they are registered.

For more information about fees, billing and refunds, contact the Cashiers Office, 15 Jesse Hall, (573) 882-3097, or visit <http://cashiers.missouri.edu>

Getting to Graduation: Academic Programs and University Requirements

STUDENT RESPONSIBILITY

Academic honesty is fundamental to the activities and principles of the University. All members of the academic community must be confident that each person's work has been responsibly and honorably acquired, developed and presented. Any effort to gain an advantage not given to all students is dishonest whether or not the effort is successful. The academic community regards academic dishonesty as an extremely serious matter, with serious consequences that range from probation to expulsion. When in doubt about plagiarism, paraphrasing, quoting or collaboration, consult the course instructor. Refer to the *Collected Rules and Regulations*, Section 200.010, Standard of Conduct, and Section 200.020, Rules of Procedures in Student Conduct Matters for more specific details. (The Collected Rules are available on the University of Missouri System web site.) According to the UM Rules of Procedures in Student Conduct Matters, when they suspect that academic dishonesty has occurred, faculty members have an obligation to report an incident to the Office of the Vice Provost for investigation.

UNIVERSITY REQUIREMENTS

Students must complete all University requirements, including graduation and University general education requirements, as well as all requirements specified for the degree(s) and major(s),

and requirements of the college or school, and department offering the degree.

University Graduation Requirements

All students must complete University graduation requirements beyond the University general education requirements. These include the following:

- A second MU Writing Intensive course¹ must be completed in a student's major. It needs to be a 3000/4000 level MU WI course approved as part of the curriculum by the faculty of a student's major.
- Complete an approved capstone course¹ with MU course work in the student's major
- Complete 30 of the last 36 credits with MU courses
- Complete no fewer than 120 credits, with no more than 64 credits transferred from a two-year institution, unless specified by an approved articulation agreement
- Complete all University general education requirements (See the University General Education Requirements section later in the catalog.)
- Earn no less than a 2.00 GPA, as defined by the GPA of Record
- Complete any additional divisional, degree or major requirements as specified by the academic unit offering the degree

¹Must be completed with a grade of C - or better.

ACADEMIC ASSESSMENT

All students are required to participate in the University's (processes/program) for assessing student learning in general education and in the major fields. The purpose of assessment at MU is to provide faculty and administrators with the information they need to ensure high levels of student learning. The key goal is to improve how and what students learn in their programs and to increase how much they learn. At the same time, the process provides documentation of student learning to help programs and the University meet external requirements, including those of accreditation organizations.

Faculty members develop assessment strategies specific to each degree program and conduct assessments at appropriate points in their students' undergraduate careers. Each program at the University has defined learning objectives for their students that form the basis of assessments. Students participate in assessments of discipline-specific learning objectives and of learning objectives aligned with the University's learning objectives for all students.

In order to meet the needs of the people of the state of Missouri, the nation and the global society, the University of Missouri shall provide its baccalaureate graduates with a sound intellectual foundation in the liberal arts and sciences and in the student's chosen major fields of study. Toward that end, in addition to having every Bachelor's degree recipient fulfill appropriate coursework requirements for general education and for degree programs, MU strives to have all students achieve the following goals:

Goal 1: Graduates of MU will be able to identify and evaluate new information in light of previous knowledge.

MU Graduates will be able to:

- Identify issues and problems important to society, define their scope, and identify information needed to address them.
- Find existing sources of information on a topic.
- Evaluate the accuracy, validity, and reliability of information presented in a wide variety of media.
- Conduct appropriately focused library, field or laboratory

research.

- Analyze and synthesize information gathered, demonstrating strategic and logical reasoning skills.
- Demonstrate understanding of costs, benefits, and/or consequences of proposed resolutions of issues and problems important to society.
- Organize information, data and ideas for further analysis and/or presentation.

Goal 2: Graduates of MU will possess the knowledge, abilities, and skills necessary to communicate effectively.

MU Graduates will be able to:

- Communicate information to a variety of audiences and purposes.
- Revise and edit their presentations to improve clarity and accuracy.
- Engage in the healthy and positive exchange of ideas.
- Apply communication skills in furthering their post-MU careers.
- Use multiple formats and technologies to communicate ideas effectively.

Goal 3: Graduates of MU will possess the knowledge, abilities, and skills necessary to serve society responsibly.

MU Graduates will be able to:

- Understand the duties of being a responsible citizen.
- Identify and analyze the requisite behaviors for carrying out their academic and professional lives with integrity.
- Work collaboratively with others where appropriate.

Goal 4: Graduates of MU will possess knowledge to observe and critically analyze the diverse human experience.

MU Graduates will be able to:

- Engage in life-long learning.
- Appreciate fine art and literature.
- Understand the contributions of diverse groups and experiences to life at the individual, community, national, and the world levels.

In addition, some students will be required to take standardized tests in their major field and/or for general education.

University General Education Assessment

Each year, a sample of Seniors will participate in a University general education assessment examination known as the CAAP Exam which addresses University general education competencies of MU students in the areas of mathematics, science reasoning, reading, writing and critical thinking.

Major Field Assessment

Prior to graduation, all seniors will participate in assessment of their mastery of course work in their major field. The assessment program is determined by the faculty of each department to measure the extent to which students are achieving instructional goals and outcomes for graduates in that field. The methods of assessment are appropriate to the educational goals for students in their respective major fields. Information on subject field assessment is included with the college and school sections of this catalog. Methods may include:

- Nationally-normed examinations
- Portfolio review
- Performance review
- Capstone project
- Faculty-developed exit examinations
- Exit interviews

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

General education requirements are the foundation of knowledge upon which all University of Missouri degrees are built. They are specifically intended to prepare students as citizens who must make informed judgments about issues that go beyond the narrow area of their academic specialization. Students must complete the University general education requirements listed below. With careful planning, some courses may be chosen to meet both University general education requirements and one or more of the divisional, degree and major requirements. Students are strongly encouraged (and in some divisions they are required) to meet with an academic adviser to ensure adequate progress towards the selected degree and major.

Common University General Education Requirements for all MU degrees:

- College Algebra (MATH 1100 or 1120) or transferable equivalent¹ (3 credits)
 - Students may satisfy this requirement by completing an appropriate math course (MATH 1100, 1120, 1160 or higher), completing a math course that has MATH 1100 or higher as a prerequisite, or passing a test that demonstrates proficiency in college algebra. Information regarding MMPT test may be found at <http://testing.missouri.edu/place.html>
- English Exposition and Argumentation (ENGLISH 1000 or 1000H) or transferable equivalent¹ (3 credits)
 - This course in expository prose, which stresses writing as a process involving critical reading and thinking skills, should be taken during your freshman year.
- Writing Intensive course^{1 2 3} (3 credits)
- American History or Government^{2 5} (3 credits)
- Math Reasoning Proficiency Course^{1 2} (these courses must state that College Algebra is a prerequisite)
- Distribution Requirement (27 credits) providing a breadth and depth of knowledge in three broad areas of study. The course work must include at least one course numbered 2000 or higher in two of the areas of distribution as described below.
 - Must include 9 credits in these sciences: biological science, physical science, and / or mathematical science⁴
 - including at least one biological or physical science and its related laboratory component
 - representing two different areas of science
 - Must include 9 credits of behavioral and/or social science
 - Courses must be from at least two different departments in these areas
 - Must include 9 credits of humanities and/or fine arts
 - including courses from at least two different departments in these areas

¹ Must be completed with a grade of C- or better.

² Designated courses may also be used toward the distribution requirement.

³ Course must be taken at MU unless requirement is waived via completion of an AA degree from a regionally accredited Missouri institution.

⁴ Must be courses in mathematics or statistics with College Algebra as a prerequisite.

⁵ Fulfills State Law Requirement.

Transfer Students and University General Education Requirements

All University general education requirements are considered completed for students who transfer to MU with an AA degree from a regionally-accredited Missouri institution. Transfer credits for other students are evaluated on a course-by-course basis. All students must complete University graduation requirements

beyond the University general education requirements.

NOTE: Many departments, degrees and majors have more specific requirements for foundation course work in addition to the University general education requirement. However, the reverse is *not* true. Departments or academic units may *not* have fewer general education requirements than described by the University general education requirements. Careful planning will allow students to simultaneously meet University general education requirements and prepare for many of the more specific foundation courses required by their field of study.

CHECKLISTS FOR STUDENTS

GETTING STARTED

Checklist for Freshmen

- Determine which college or school (academic unit) admission has been granted. Students who are unsure should check with the Office of Admissions in 230 Jesse Hall, (573) 882-7786.
 - Students entering a program that admits first-year students into the major: contact that department to declare the major officially or to inquire when it is appropriate to do so.
 - Students entering a program that has selective admissions: check with an academic advisor in the program to make appropriate course selections and find out the requirements to be admitted into the program.
 - Students who are unsure of their major or feel that the current major is not right for them: consult with the academic advisor to discuss other options. Students may want to visit the Student Success Center to work with the Career Center or an academic adviser to see what majors or careers might be of interest to them.
- Look through the *Undergraduate Catalog*, the online academic guides on the University Registrar's web site and the online *Schedule of Courses*. The catalog lists requirements for each major, prerequisites for courses and course descriptions. The *Schedule of Courses* lists offerings by terms, prerequisites, meeting times, special examination dates, etc. The academic guides provide requirement information, an eight-semester guide to suggested courses as well as career and other major-related information.
- Develop a list of possible courses to take for the next semester. It is important to meet with an adviser regularly for assistance with long-range academic guidance. At a minimum, students should meet with their academic advisors to prepare for registration each semester. Students who do not know how to contact the academic adviser should check with the academic unit. When meeting with an advisor, students should bring a list of possible courses, academic goals and concerns.
- Enroll as soon after the initial registration appointment time as possible. Currently-enrolled students should receive an email each semester telling them to check MyZou center in MyZou for their enrollment appointment time and date.
- There are two ways to register: on the computer using MyZou (myzou.missouri.edu). To register using MyZou, students need their PawPrint (Single sign on ID)
- Get involved in a student organization or in volunteer activities.
- Begin looking into study abroad or internship opportunities.
- Make sure that permanent and local addresses are updated. Addresses may be updated using MyZou.
- Pay fees by the due date on the bill.

STAYING ON TRACK

Checklist for Sophomores

- Review the checklist for first-year students.
- Consult with an academic advisor in the academic unit to determine what courses and grade point average are required for the major. Some academic units and some departments within academic units have competitive admission requirements. To check degree progress, consult a degree audit (DARS), if available.
- Visit the International Center or attend a fair to learn more about study-abroad opportunities.
- Start researching internship opportunities by visiting the MU Career Center or the Office of Service Learning or by talking with the academic advisor or faculty in the selected major.
- Continue involvement with student organizations and volunteering. Consider taking on more leadership responsibilities.
- Make sure that permanent and local addresses are updated. Addresses may be updated using MyZou.
- Register and pay fees by the appropriate deadlines.

PREPARING FOR THE FINAL STEP

Checklist for Juniors

- Continue contact with academic unit(s) to determine if any official forms need to be filed.
- Meet with an academic advisor to verify appropriate degree progress.
- Make necessary arrangements for internships, study abroad or field experiences if appropriate.
- Begin building an employment portfolio. Students should visit the MU Career Center or the career services office of the academic unit.
- Begin research if planning to apply to professional or graduate programs. Prepare for and take any required professional/graduate examinations.
- Make sure that permanent and local addresses are updated. Addresses may be updated using MyZou.
- Register and pay fees by the appropriate deadlines.

FINISHING UP...ISSUES THAT CONCERN YOUR LAST SEMESTER(S)

Checklist for Seniors

- Determine what type of application is necessary for graduation in the selected academic unit and file the form at the appropriate time.
- Confirm that all requirements will be fulfilled by the end of last term of enrollment. See the academic unit for a degree check.
Students who experience academic difficulty with any course(s) during their senior year should contact the academic unit to determine a plan of action to complete the undergraduate degree.
- Obtain information concerning graduation activities from the academic unit awarding the degree(s). Information concerning the Honors Convocation will be sent by the Office of the University Registrar in an email to each student's University account. Commencement dates and times of ceremonies are listed on the Commencement web site.
- Check with the University Bookstore or attend the University Bookstore Graduation Fair for information concerning caps, gowns, announcements, class rings, etc.
- Begin an employment search or make application to graduate or professional schools. For assistance, visit the MU Career Center or the career services office of the academic unit.

- Make sure that permanent, parent and local addresses are updated in MyZou to ensure receiving graduation information.
- Make sure the permanent address to be used after graduation is updated to ensure that the diploma is sent to the correct address.
- Pay any outstanding fees to ensure release of diploma(s) and transcripts.
- If you borrowed any student loans while at MU, you must complete Exit Counseling. There will be a hold on your transcripts and/or diploma until this requirement is fulfilled. For information regarding Exit Counseling go to <http://muloans.missouri.edu/> or call (573) 882-6654.

How to Get Through it All: Student Services

ACADEMIC RETENTION SERVICES

Academic Retention Services (ARS) is a comprehensive retention support unit that enhances the success of underrepresented ethnic minority students, transitioning from high school to the first year of college until the completion of an undergraduate degree. Highly beneficial programs are offered that are centrally coordinated with other campus programs and services to enhance personal and academic success. Most importantly, the programs and services are designed to promote student involvement in the many opportunities at MU. ARS hallmark programs include Summer Transition, MAP, and STARS Leadership. Through many informal, co-curricular activities, such as orientation, intercession advising, mid-semester progress checks, walk-in services and academic recognition activities, students can receive invaluable information to assist them in reaching their fullest potential and maximizing their undergraduate experience. There are two office locations, 101 Student Success Center and 508 Clark Hall. **For additional information, stop by or call (573) 882-9208 or visit <http://ars.missouri.edu>.**

CAMPUS WRITING PROGRAM (CWP)

Writing Intensive (WI) courses help students reason critically and communicate with clear and effective language. The writing requirement at MU consists of ENGLSH 1000 followed by two WI courses. One WI may be taken anywhere in the curriculum. The other WI must be an upper division (3000 or 4000 level) course in the student's major. More than 130 WI courses are offered each semester. For current information about available WI courses, on the myZou webpage, limit your search with the class-attribute value "Writing Intensive course" under the Additional Search Criteria. For current information about available WI courses visit <http://cwp.missouri.edu>. **For further information, contact the Campus Writing Program, Conley House, (573) 882-4881.**

COUNSELING CENTER

The Counseling Center, 119 Parker Hall, provides a variety of services to MU students including counseling and psychotherapy, crisis intervention, psycho-educational programming, consultation, and psychological and academic testing. The Center offers confidential individual, couples, and group therapy for up to

12 sessions per academic year. Services are available to all MU students currently enrolled in on-campus courses. Within the Center, Testing Services offers a variety of paper-based and computer-based tests, including high school equivalency, admissions, placement, credit by examination and credentialing for technical and professional fields. Proctoring of special tests is also offered for distance learning courses requiring a secure test environment.

Call (573) 882-6601 for Counseling Center information or (573) 882-4801 for Testing Services information. For additional detailed information, please visit our website at <http://counseling.missouri.edu> or for Testing Services, <http://testing.missouri.edu>.

DISABILITY SERVICES

The Office of Disability Services provides accommodations and support services, within the resources of the University, that ensure all students with disabilities the opportunity to competitively pursue a college education limited only by their abilities, not their disabilities. Accommodations may include:

- Extended time on exams
- Distraction-reduced testing rooms
- Alternate formats for texts
- Note takers
- Readers, and scribes
- Adaptive equipment
- Interpreters

For more information, write the office at S5 Memorial Union or call (573) 882-4696 or (TTY) (573) 882-8054, or email <http://disabilityservices.missouri.edu>

DIVISION OF INFORMATION TECHNOLOGY

From high-speed Internet access to personal Web space and long-distance service, the Division of IT is MU's information technology resource. The Division of IT offers a wide variety of products and services to the campus community, including:

- Internet and wireless Internet service
- E-mail
- Web site hosting
- Computer software training
- Cable television
- Local and long-distance phone service
- Conveniently located computing sites
- ID cards

The Division of IT Web site is a great starting point for up-to-date information on information technology services at MU: <http://doit.missouri.edu/>

INTENSIVE ENGLISH PROGRAM AND ENGLISH LANGUAGE SUPPORT PROGRAM

The Intensive English Program (IEP) offers international students opportunities to acquire the language proficiency and study skills needed to function successfully in an American university environment. The IEP offers 25 hours of instruction each week in reading, composition, grammar, pronunciation, vocabulary, note-taking, and oral presentation skills. Simultaneous enrollment in academic course work is not permitted.

The English Language Support Program (ELSP) offers supplemental English language courses for MU's international students and visiting scholars. Instruction emphasizes reading, writing

and speaking skills. Placement in language course work is based on the results of the MU English Language Test administered at the beginning of every academic term.

For additional information on either program, write or call IEP/ELSP, 208 McReynolds Hall, (573) 882-7523, email iepmu@missouri.edu or visit the web site: <http://iep.missouri.edu>

INTERNATIONAL STUDENTS AND SCHOLARS

International Student and Scholar Services (ISSS) is the office within the International Center that provides comprehensive support services to international students, faculty, staff and their dependents representing more than 100 different nationalities. ISSS orients students and scholars to the MU community and American culture, informs them of changes in University policies and procedures, advises them on a variety of immigration, academic, financial and personal issues and advocates on their behalf to ensure a positive educational experience.

ISSS oversees University compliance with federal immigration laws pertaining to student and scholar nonimmigrant status, including electronic reporting requirements stipulated by the Student Exchange Visitor Information System (SEVIS). ISSS provides tailored support services to international sponsored students and their sponsoring agencies, including Fulbright, Ford Foundation, Muskie, and Ron Brown Fellows. ISSS promotes intercultural understanding within the MU community through a variety of special events and collaborative projects with other departments and student/scholar organizations.

For more information, call (573) 882-6007.

STUDENT HEALTH CENTER

Student Health Center is an integrated service providing medical care to students and spouses for acute and chronic illnesses and injuries, mental health services, individual discussions and group presentations on timely health topics, and immunizations including those needed to meet University requirements. The Health Center is located on the corner of Hitt Street and Hospital Drive on the fourth floor of the University Physicians Medical Building (UPMB). **To schedule an appointment or for more information call (573) 882-7481. <http://www.studenthealth.missouri.edu>**

STUDENT SUCCESS CENTER

The Student Success Center is a central place that provides academic support as well as connections to the total campus. The Student Success Center is home to Academic Exploration and Advising Services, Academic Retention Services, the Career Center and the Learning Center. Through these four services, the Student Success Center helps students make academic and career transitions, provides support systems to enhance academic success, enables students to make informed choices regarding academic programs and career services, and assists students in securing meaningful employment and/or admission to graduate or professional schools. **For more information, go to the web site at <http://success.missouri.edu/>.**

Academic Exploration and Advising

Students who have not yet declared a major and students who want to explore majors other than or in addition to their current majors are encouraged to meet one-on-one with academic advisors in this office.

Relationships between students and their advisors are focused on helping students assess their own values and their academic and career goals and then developing a plan for accomplishing those goals. Discussions during advising appointments are focused

on identifying MU majors that will match students' strengths and interests and will help them to achieve their goals. Topics covered include exploration of extracurricular opportunities, preparing for study abroad, gaining experience in a research laboratory, taking classes to sample different majors, and referrals to additional resources on campus. In addition, like all academic advisors on campus, those in the Student Success Center can help students understand how to navigate the University, avoiding obstacles and pitfalls and getting the most out of opportunities and resources. **To schedule an appointment, stop by M110 Student Success Center or call (573) 884-9700.**

Academic Retention Services

See Academic Resource Center information at the beginning of this section.

Career Center

The MU Career Center provides walk-in assistance to all MU students through a variety of career services. The Career Center staff can help students explore career and major possibilities through extensive printed resource information, Internet information, career assessments, and referrals to appropriate people including career counselors. Students can get assistance at the Career Center to gain experience in their chosen field through part-time jobs, work study jobs, internships and co-ops, volunteer and community services opportunities and informational interviewing. The Career Center staff can also aid students in preparing for the next steps after graduation through resumes and cover letters writing guidance, mock interviews, discussing job search strategies, information about applying to graduate school, and on-campus recruiting through Placement Services.

To schedule an appointment go to the MU Career Center, main floor of the Student Success Center or call (573) 882-6801.

Learning Center

Learning Center programs support MU's goal of maintaining a strong focus on student learning by providing instructional activities that reinforce and support many University general education courses required of freshmen and sophomores. More than 60 percent of all freshmen and 35-40 percent of all undergraduates participate in Learning Center activities during a typical academic year. Working with Learning Center tutors encourages students to become active, effective, independent and collaborative learners.

Regularly scheduled tutoring sessions are available for many introductory courses in mathematics, the sciences and foreign languages. The Writing Lab and the On-Line Writery serve as resources for students at any point in their writing process, from interpreting texts and information to composing, organizing, revising and editing.

The reading and study skills program provides workshops and classroom presentations on note-taking, note-handling and text-handling strategies, and strategies in preparing for and taking different kinds of quizzes and examinations. In addition, The Learning Center administers MU's Student Support Services (SSS or TRiO) grant, funded by the US Department of Education. The goal of the SSS/TRiO program is to offer services that increase the retention and graduation rates of low-income, first-generation college students and students with disabilities.

To schedule an appointment, go to 100 Student Success Center or call (573) 882-2493.

TESTING SERVICES

Testing Services, located in the MU Counseling Center, of-

fers graduate and professional admissions tests, placement tests, credit-by-examination, the Residual ACT (scores sent to MU only), licensure and credentialing exams, high school equivalency tests and other examinations, on both paper and computer. The Computer Based Testing facility at MU is the designated Columbia-area location for students wishing to take the computer-based GRE, TOEFL and other tests, which may be scheduled at convenient individual appointment times year-round, subject to availability and testing company policies. Testing Services also administers interest, personality and ability tests related to counseling. **Effective July 1, 2009, Testing Services will only accept checks or money orders as a form of payment. The Testing Services main office is located at 205A Parker Hall, (573) 882-4801. Computer Based Testing is at 207 Parker Hall, (573) 884-0911. For More information, go to the web site at <http://testing.missouri.edu>.**

WOMEN'S CENTER

The Women's Center offers services and programs on the changing roles of women and men. The Center provides programs, discussions, and special events for students. It has a collection of resources including books, periodicals and video tapes. Information about campus and community events is available. **The Women's Center is located in N214 Memorial Student Union, (573) 882-6621.**

Beyond the Classroom: Academic Enrichment

INTERNATIONAL CENTER

The Center provides coordination of study abroad, international student and scholar advising, international fellowships and special-event programming. The Study Abroad Office offers information and advising on programs throughout the world. Center staff members also coordinate applications for Fulbright, Fulbright-Hayes, DAAD, Marshall, Gate Cambridge and other fellowships for international graduate study.

The Center supports Pangaea House, a residential learning community of international and domestic students in Laws Hall. The Office of International Student and Scholar Services provides comprehensive non-academic advising to MU's international community of 2,000 students, faculty, staff and visiting scholars from 100 countries. The Center administers Curators Grant-in-Aid awards for undergraduate and graduate international students. The Center coordinates the campus-wide Council on International Initiatives, Global Scholars Program, Internationalizing the Curriculum awards and Study Abroad Advisory Committee. MU's Intensive English Program (IEP) and English Language Support Program (ELSP) provide English language instruction.

Additional information is available from the center at N52 Memorial Union, (573) 882-6007 or at <http://international.missouri.edu/>.

INTERNSHIPS/COOPERATIVE EDUCATION

Internships/Cooperative Education offers qualified students the opportunity to explore majors and careers through employment in business, industry, government and other organizations. Employment is directly related to the student's academic major and career objective. In addition to Internships/Cooperative

Education, students may also find academic and career-related experience through other Career Center programs like part-time jobs, volunteering, service learning, summer camps, work abroad, and work study.

The Career Center is located in the Student Success Center on Lowry Mall. **Stop by, call (573) 882-6801 or (573) 882-JOBS or visit the web site at <http://career.missouri.edu/>.**

OAK RIDGE ASSOCIATED UNIVERSITIES (ORAU) CONSORTIUM

Since 1981, students and faculty of University of Missouri have benefited from its membership in Oak Ridge Associated Universities (ORAU). ORAU is a consortium of 96 colleges and universities and a contractor for the U.S. Department of Energy (DOE) located in Oak Ridge, Tennessee. ORAU works with its member institutions to help their students and faculty gain access to federal research facilities throughout the country; to keep its members informed about opportunities for fellowship, scholarship, and research appointments; and to organize research alliances among its members.

Through the Oak Ridge Institute for Science and Education (ORISE), the DOE facility that ORAU operates, undergraduates, graduates, postgraduates, as well as faculty enjoy access to a multitude of opportunities for study and research. Students can participate in programs covering a wide variety of disciplines including business, earth sciences, epidemiology, engineering, physics, geological sciences, pharmacology, ocean sciences, biomedical sciences, nuclear chemistry, and mathematics. Appointment and program length range from one month to four years. Many of these programs are especially designed to increase the numbers of underrepresented minority students pursuing degrees in science- and engineering-related disciplines. A comprehensive listing of these programs and other opportunities, their disciplines, and details on locations and benefits can be found in the *ORISE Catalog of Education and Training Programs*, which is available at <http://www.orau.gov/orise/educ.htm>, or by calling either of the contacts below.

ORAU's Office of Partnership Development seeks opportunities for partnerships and alliances among ORAU's members, private industry, and major federal facilities. Activities include faculty development programs, such as the Ralph E. Powe Junior Faculty Enhancement Awards, the Visiting Industrial Scholars Program, consortium research funding initiatives, faculty research and support programs as well as services to chief research officers.

For more information about ORAU and its programs, contact:

Robert D. Hall
Interim Vice Chancellor for Research
ORAU Councilor for University of Missouri
Monnie E. Champion
ORAU Corporate Secretary (865-576-3306); or
Visit the ORAU Home Page (<http://www.orau.org>)

LIBRARIES

The collections of University libraries include more than 3 million volumes, 8.1 million microforms and more than 49,000 journal titles in both paper and electronic formats. Services include the current periodicals reading room, copy services, reserve desk and electronic reserves (ERes), recorded sound collection, reference assistance, instruction in the use of library resources, library services for persons with disabilities, and more than 224 public-use computers.

Included in the MU Libraries are Ellis Library (the main library), the University Archives, and the following seven branch libraries: Columbia Missourian Newspaper Library, engineering,

geological sciences, health sciences, journalism, mathematical sciences and veterinary medicine. There is also the MU Law Library in the School of Law.

MERLIN (Missouri Education and Research Libraries Information Network) is the online catalog of materials owned by the four campus libraries of the University of Missouri System. The MU Libraries' web site (<http://mulibraries.missouri.edu>) provides access to many databases and other electronic resources.

Special Collections of the MU Libraries

- Government Documents
- Microform Collection
- Newspaper Collection
- Rare Book Collection
- Comic Art Collection

MU Libraries does not oversee the following units. Information about their collections and services should be obtained directly from each unit.

- **The National Freedom of Information Coalition** serves as the organizational and program headquarters for state freedom on information groups nationwide. Founded in 1989, its mission is to foster the organization and growth of state Freedom of Information groups.
- **Freedom in Information Center** maintains files on the actions of the government, media and society that affect the movement and content of information. Founded in 1958, and dedicated to the people's right to know, the FOI center provides reference and referral services.

The NFOIC and the FOI are housed in the School of Journalism, 133 Neff Annex. **For more information, call (573) 882-4856.**

- **Library of the State Historical Society**, in Ellis Library, has an extensive collection of Missouriana and early West documents and memorabilia. **Call (573) 882-7083 for more information.**

STUDY ABROAD

The Study Abroad office supports international scholarship and research by developing and coordinating nearly 400 well-run and academically challenging education abroad programs that complement the curriculum. Currently, the University of Missouri offers programs in over 60 countries throughout the world. **The office is located in the International Center in N52 Memorial Union, (573) 882-6007.**

MUSEUMS AND EXHIBITS

The Museum of Art and Archaeology is the third largest visual arts museum in the state and is accredited by the American Association of Museums. The scope of the museum's collections spans seven millennia and six continents. As a teaching museum, its more than 14,000 objects provide an excellent opportunity for graduate and undergraduate study. The many artworks and the large amount of material from the University's excavations provide research opportunities for students. A non-circulating library in the museum office is open to the public. **The museum is located in Pickard Hall on Francis Quadrangle (Ninth Street and University Avenue). The museum is free and open to the public Tuesday through Friday from 9 a.m. until 4 p.m., and Saturday and Sunday from noon until 4 p.m. For further information, call (573) 882-3591.**

www.maa.missouri.edu

The Museum of Anthropology's permanent exhibit hall focuses on Native American cultures from across North America and Missouri history from 11,200 years ago to the present.

Objects from the Grayson archery collection are on display at the Museum Support Center on Rock Quarry Road. Collections are available for study by faculty, students and other qualified researchers. *The exhibit hall is located at 100 Swallow Hall, (573) 882-3573.*

Entomology Museum is the largest university insect collection in the world. The collection is primarily for research and teaching. Tours are by appointment. *Call (573) 882-2410 for more information.*

Fisheries and Wildlife Collections provide teaching and research collections of birds, mammals and fish of Missouri and surrounding states as well as notable collections of waterfowl, African large mammals, and freshwater and saltwater fish. *Call (573) 882-3436 for more information.*

HONORS COLLEGE

The Honors College is a community of motivated, high-ability students from all the undergraduate colleges at the University of Missouri. It is designed to offer an enriched academic experience and personal support. The Honors College gives students maximum flexibility in order to serve their individual interests. Honors courses, taught by many of the University's best professors, encourage interaction between students and faculty and allow students to experience a small-college atmosphere within a large university.

Opportunities in the Honors College are described below.

- **Honors Courses** (GN HON) are limited to honors-eligible students. (All courses are listed in *Laurels*, the Honors College newsletter.) Honors courses fall into three categories:
 - Honors sections of regularly offered courses
 - Departmental honors and research courses
 - Special Honors College courses
- **The four-semester Humanities Sequence**, an academic centerpiece of the college, provides an integrated approach to literature, philosophy, art history and music.
- **The four-semester Human Sciences Sequence** is designed to engage students in the seminal insights of the social and behavioral sciences as they are embedded in the development of identity.
- **The two-semester Science Sequence** is a hands-on laboratory science course for non-science majors designed to introduce students to the methods and range of scientific knowledge.
- **Honors Discussion Groups** are small, informal discussion groups.
- **Independent Study** opportunities allow students to study one-on-one with a faculty member.
- **Honors Preceptorships** provide special student-faculty research opportunities. The Honors College helps arrange special research relationships between talented students and professors.
- **Learning by Contract** allows honors students to take a non-honors course for honors credit. The student enters into a contract with the professor to complete work beyond the course requirements. Forms are available online.

HONORS COLLEGE ADMISSIONS

Fully-Admitted Incoming Freshmen

Incoming freshmen are eligible for automatic admission to the Honors College upon submission of an application, if they have 29 or higher on the ACT or 1280 on the SAT and are in the top 10 percent of their high school graduating class. Students from high schools that do not rank will be automatically eligible if

their core GPA is greater than 3.70. Incoming freshmen who do not meet both of the admissions criteria are required to submit an essay as part of their application. Essays are evaluated on an individual basis. Specific information on the requirements for the essay can be found on the application.

Provisionally-Admitted Incoming Freshmen

Incoming freshmen who apply to the Honors College but who do not meet the automatic eligibility requirements may be given the opportunity to take one honors course during their first semester. Provisionally-admitted students may request permission to enroll in one additional honors course during the Early Registration period for spring semester. Students wishing to exercise this option should schedule an appointment to meet with the director of the Honors College during Early Registration.

Provisionally-admitted students cannot live in the Honors Learning Community or participate in honors Freshmen Interest Groups in student housing and are not assigned to the Honors College for advising until they are given full admission. Provisionally-admitted students are automatically given full admission to the Honors College if they have a 3.5 MU GPA at the end of their first semester. Provisionally-admitted students who do not make a 3.5 the first semester may remain enrolled in the early registered course for the following semester. These students can apply for admission any time after they have completed 30 credits and have a 3.5 MU GPA.

Transfer Students

Transfer students are eligible to apply if they have at least 30 credits and a 3.5 cumulative GPA. The cumulative GPA, for the purpose of applying to the Honors College, is the calculated average of transfer work from all institutions the student has attended.

SPECIAL PROGRAMS

Service Learning

The Honors College Community Involvement Program is a service-learning outreach program designed to assist members of the community and offer students problem-solving and leadership experiences. Service projects include mentoring at-risk adolescents, working with low-income preschool children, and investigating and providing service for local public health agencies. Students perform community service, participate in a seminar and complete research projects.

Honors Housing

The Honors Learning Community brings together honors students of various academic orientations into one intellectually and socially stimulating setting. Honors Students are not required to live in Honors Housing.

Laurels

Available before registration each semester, the *Laurels* provides descriptions of classes offered and brief biographies of the professors.

STUDENT SERVICES

The Honors College offers one-on-one academic advising for all honors students on a drop-in basis. Students planning a career in medicine or other health professions (such as dentistry, optometry, podiatry or pharmacy) can discuss requirements and different options for graduate study with the pre-health professions advisor. This advisor will also arrange an interview session for aspiring health professions candidates and write a composite letter for each student. The Honors College Health Professions Advisory Committee interviews and prepares the composite evaluations required by most institutions.

PROGRAM REQUIREMENTS

Maintaining Honors Eligibility

GPA Requirement

Students must maintain a 3.0 MU GPA to remain in the Honors College. Students whose MU GPA is below 3.0 after fall semester receive a warning letter. Students whose MU GPA is below 3.0 after spring semester lose honors eligibility. Students wishing to reapply to the Honors College must meet the eligibility requirements for current students.

Initial Course Requirements

Students are required to complete two honors courses per year for the first two years. Students who are admitted for the second semester of their first year at MU must complete one course during the spring semester, and two courses the following year. All honors-designated courses will count toward this requirement

GENERAL HONORS COURSES

GN HON 1010H--Career Explorations (1). Colloquia in which experts from both the University and the Columbia communities discuss their specialties and answer students' questions on the nature and current status of their disciplines. Open primarily to freshmen. Graded on an S/U basis only. Honors eligibility required.

GN HON 1030H--Honors Discussion Groups (1-2). Informal discussion between students and faculty on various academic topics. Honors eligibility required. Graded S/U only.

GN HON 1050H--Honors Seminar (1-3). Freshman-sophomore seminar offering a small group opportunity to write about and discuss basic works chosen by instructor. Honors eligibility required.

GN HON 1070H--Honors Elective Colloquium (2-3). Honors eligibility required.

GN HON 1080H--Honors Internship (1-3). Independent study under the supervision of a regular faculty member. Prerequisite: written proposal with professor's approval submitted in advance to Director of the Honors College. Honors eligibility required.

GN HON 1090H--Independent Study-Service Learning (1-3). Students participate in community service activities, attend regular meetings, conduct research, submit four journals, a short bibliography and a research paper on their service in the community. Honors eligibility required.

including honors sequence courses, colloquia, honors sections of regularly offered courses (see departmental offerings), GN HON 1080H/2085H and 2950H/4950H, and Learning-by-Contract (up to 6 hours). The requirement is modified as follows for transfer students and MU students admitted after first semester.

Continuing Course Requirements

Students admitted after their first year must complete two courses the second year.

Students admitted after their second year must complete one course at any time before graduation.

Successful completion of this requirement is verified at the end of each spring semester. Students who have not taken the required number of courses lose honors eligibility.

Honors Certificate Requirements

Students who complete 20 credits in honors courses and have a 3.3 cumulative GPA are eligible for an Honors Certificate, which is also noted on their permanent transcript. All honors course work must be completed in the semester prior to graduation for a student to be eligible to participate in the Honors Commencement Ceremony.

University Honors Designation

Students who complete the Honors Certificate and a qualified departmental honors program will be eligible for this designation, which will be noted on their permanent transcript (see your department or the Honors College for information about departmental honors programs).

GN HON 2015--Theory and Practice of Tutoring Writing Seminar (3). (same as English 2015H). Addresses both the theory and practice of tutoring and the foundations of good writing. This course also qualifies studies for a part-time job working as Writing Lab/Online Writery tutors in future semester. Prerequisites: ENGLSH 1000; instructor's consent.

GN HON 2021--HCCIP Mentor Program (3). HCCIP Mentor Program offers students the opportunity for service with at risk youth. Participants serve as tutors, role models, and friends for 12 to 16 year old youth who are at risk of dropping out of school or not attending college.

GN HON 2021H--HCCIP Mentor Program - Honors (3). HCCIP Mentor Program offers students the opportunity for service with at risk youth. Participants serve as tutors, role models, and friends for 12 to 16 year old youth who are at risk of dropping out of school or not attending college. Honors eligibility required.

GN HON 2022--HCCIP Head Start (3). Students provide individualized attention to high-risk, low income pre-school children 3-5 hours per week directing enrichment activities.

GN HON 2022H--HCCIP Head Start - Honors (3). Students provide individualized attention to high-risk, low income pre-school children 3-5 hours per week directing enrichment activities. Honors eligibility required.

GN HON 2024--HCCIP Public Health (3). HCCIP Public Health course enhances and supports the service learning experience by exploring areas of public health and volunteerism for students considering health-related careers. Students work 3-5 hours per week on service projects.

GN HON 2024H--HCCIP Public Health - Honors (3). HCCIP Public Health course enhances and supports the service-learning experience by exploring areas of public health and volunteerism for students considering health-related careers. Students work 3-5 hours per week on service projects. Honors eligibility required.

GN HON 2027--Honors College Community Involvement Program (3). Course offers students the opportunity to become involved in the community, study service ethics, citizenship and leadership, and participate in the FIG program.

GN HON 2027H--Honors College Community Involvement Program - Honors (3). Course offers students the opportunity to become involved in the community, study service ethics, citizenship and leadership, and participate in the FIG program. Honors eligibility required.

GN HON 2029--HCCIP Literacy Project (3). A service-learning outreach program designed to assist members of the community and offer students problem solving and leadership.

Graded on A/F basis only.

GN HON 2029H--HCCIP Literacy Project - Honors (3).A service-learning outreach program designed to assist members of the community and offer students problem solving and leadership. Graded on A/F basis only. Honors eligibility required.

GN HON 2085H--Honors Problems (1-3).Independent study under the supervision of a regular faculty member. Prerequisite: written proposal with professor's approval submitted in advance to Director of the Honors College. Honors eligibility required.

GNHON2111H--The Ancient World (3).The reading list is comprised of the great writers of classical Greece and Rome such as Homer, Sophocles, Plato, Aristotle, Virgil and Apuleius, and of the biblical period, the authors of the Book of Job and the Gospel of Mark. Honors eligibility required.

GN HON 2112H--The Middle Ages and the Renaissance (3).The literature, art and philosophy which reflect the interaction of biblical thought with the classical past, and ultimately an emerging humanism, form the contents of the second semester. Readings include selections from such central figures as Aquinas, Chaucer, Dante, and Shakespeare. Special lectures are presented on the art, architecture and music of these eras. Honors eligibility required.

GNHON 2113H--The Early Modern World: The 17th-19th Centuries Enlightenment (3).The third segment of the Sequence treats the cultural developments in the West from the Baroque to the Enlightenment through Romanticism. The works of Cervantes, Descartes, Milton, Voltaire, Kant, Austen, Goethe, and Dickinson are among those studied. The music and visual arts of these periods are also included. Honors eligibility required.

GN HON 2114H--The Modern Era (3).The final semester of the Humanities Sequence deals with the intellectual and cultural developments from the mid-nineteenth to the late twentieth century. Lectures and discussions will be held on the philosophy of Marx, Nietzsche, Sartre and Hannah Arendt; on the literary works of Dickens, Dostoevsky, James Joyce, Virginia Woolf, T.S. Eliot, and Toni Morrison. Special lectures are presented on the music of the period. Honors eligibility required.

GN HON 2117H--The Emerging Canons of the Americas (3).Students will explore the issues of canonicity and the emerging works of Native American, Caribbean, Afro-Latin American, Asian American and Latino writers comparatively on the conceptions of colonialism, power and resistance, cultural and racial identity, hybridity, tradition and change. Honors eligibility required.

GN HON 2120H--Honors Humanities Colloquium (2-3).Honors eligibility required.

GN HON 2230H--Honors Social Science Colloquium (2-3).Honors eligibility required.

GNHON2243H--Human Sciences Sequence I: Personal Identity (3).Part of the Honors College sequence on human nature, this course focuses on behavioral scientific studies of personal identity. Will draw on classic and modern works that investigate the self, its development, and its relationships to others.

GNHON2244H--Human Sciences Sequence II: Personal Identity (3).Part of the Honors College sequence on human nature, this course focuses on behavioral scientific studies of identity in relation to groups. Will draw on classic and modern works that examine how people identify and are identified with groups, and the effects of those processes. Honors eligibility required.

GNHON2245H--Human Sciences Sequence III: Identity in Modern Nations (3).Part of the Honors College sequence on human nature, this course focuses on social scientific studies of modern society and the individual's role in it. Will draw on classic and modern works that investigate the rise of modern society and its influences on its members. Honors eligibility required.

GNHON2246H--Human Sciences Sequence IV: Globalization and Social Identity (3).Part of the Honors College sequence on human nature, this course focuses on social scientific studies of the forces of globalization and their influences on the individual. Will draw on classic and modern works that investigate the interdependencies of modern global society. Honors eligibility required.

GN HON 2310H--Honors Behavioral Science Colloquium (2-3).Honors eligibility required.

GN HON 2450H--Hnrs Biological, Physical, Math (Computer Sci) Science Colloquium (2-3).Honors eligibility required.

GN HON 2461H--The Honors College Science Sequence: The Warm Little Pond (3).Inquiry-based exploration of the physical and biological sciences as they relate to 1) life in a particular, assessible ecological system and 2) the existence of life on Earth and its prospects for existence elsewhere in the universe. Honors eligibility required.

GN HON 2462H--The Honors College Science Sequence: The Warm Little Planet (3).The Warm Little Planet is a companion course to Honors 2461H, "The Warm Little Pond." Beginning with observations of the physical universe on an astronomical scale, students will construct models for the interaction between the physical and biological worlds and assess the possibility for life on other planets. Honors eligibility required.

GN HON 2950H--Honors Preceptorship (2-3).Active participation in a professor's research for up to six hours a week. Prerequisite: written description of the work with professor's approval submitted in advance to Director of the Honors College. Honors eligibility required.

GN HON 3028--Civic Leaders Internship (3-6).Students in any major may enroll in 3-6 credit hour internships with state government offices and agencies. Prerequisite: consent and application required.

GN HON 3028H--Civic Leaders Internship - Honors (3-6).Students in any major may enroll in 3-6 credit hour internships with state government offices and agencies. Prerequisite: consent and application required. Honors eligibility required.

GN HON 3070H--Honors Electives Colloquium (2-3).Honors eligibility required.

GN HON 3120H--Honors Humanities Colloquium (2-3).Prerequisite: junior standing.

Honors eligibility required.

GN HON 3210H--Honors Behavioral Colloquium (2-3).Prerequisite: junior standing. Honors eligibility required.

GN HON 3230H--Honors Social Science Colloquium (2-3).Prerequisite: junior standing required. Honors eligibility required.

GN HON 3450H--Honors Biological, Physical, Math (Computer Sci.) Science Colloquium (2-3).Prerequisite: junior standing required. Honors eligibility required.

GN HON 4070--Advanced Honors Elective Colloquium (2-3).These courses may be cross-listed with courses in graduate or professional programs or one-of-a-kind courses which may have no other more appropriate academic home. Interdisciplinary or experimental courses are encouraged. Limited to juniors and seniors.

GN HON 4950H--Honors Preceptorship (2-3).Active participation in a professor's research for up to six hours a week. Prerequisite: written description of the work with professor's approval submitted in advance to Director of the Honors College. Prerequisite: junior standing required. Honors eligibility required.

**College of
Agriculture
Food and
Natural
Resources**

College of Agriculture, Food and Natural Resources

(INCLUDES THE SCHOOL OF NATURAL RESOURCES)

DEGREES OFFERED

Bachelor of Science (BS) with majors in:

Agribusiness Management
Agricultural Economics with optional emphasis areas in *Financial Planning and Public Policy*
Agricultural Education with emphasis areas in *Leadership, Teacher Certification*
Agricultural Journalism
Agricultural Systems Management
Animal Sciences
Biochemistry
Food Science and Nutrition
General Agriculture with an optional emphasis area in *Sustainable Agriculture*
Hotel and Restaurant Management
Parks, Recreation and Tourism with emphasis areas in *Leisure Service Management, Natural Resource Recreation Management, Tourism Development*
Plant Sciences with emphasis areas in *Crop Management; Landscape Horticulture; Ornamental Plant Production and Operations Management; Plant Biology; Plant Breeding, Genetics and Biotechnology; Plant Protection; Precision Agriculture; Turfgrass Management*
Soil, Environmental and Atmospheric Sciences with emphasis areas in *Atmospheric Science, Environmental Science, Environmental Soil Science, Soil Resource Management*

Bachelor of Science in Fisheries and Wildlife (BSFW) with a major in Fisheries and Wildlife Sciences

Bachelor of Science in Forestry (BSF) with a major in Forestry with emphasis areas in *Forest Resource Management, Industrial Forest Management, Individualized Studies, Urban Forestry*

Minors

Agricultural Economics
Agricultural Education
Agricultural Leadership
Agricultural Systems Management
Animal Sciences
Captive Wild Animal Management
Food Science
Forestry
Hotel and Restaurant Management
International Agriculture
Natural Resources

www.cafnr.missouri.edu

The mission of the College of Agriculture, Food and Natural Resources (CAFNR) includes exceptional teaching, cutting-edge research and the dissemination of that research to the people of Missouri.

From entering freshmen to postdoctoral scientists, students receive personal attention in preparing for a wide range of careers. Professional development through campus organizations and special interaction with business and industry prepares graduates to have an impact in the food system, business, government policy, environmental awareness, conservation, law, medicine and other areas.

The Missouri Agricultural Experiment Station develops life science technologies in animal, biochemical, plant, food and natural resource sciences to keep the state's agribusiness system competitive in world markets and to provide consumers with a safe, low-cost food supply. Science research faculty lead our state and nation in debate and development of science-based policies for agriculture and natural resources.

Finally, the college helps the global community more fully develop their economies through improved agriculture. This global mission provides a valuable exchange of knowledge and understanding among students, teachers and scientists from many cultures.

The College of Agriculture, Food and Natural Resources was established at the University of Missouri in 1870 as the state's land-grant university in response to the need for agricultural teaching and research in Missouri. The four major divisions in the college, the Agricultural Experiment Station, Academic Programs, Agricultural Extension and International Programs, continue to have a great influence on Missouri's economy.

ADMISSIONS

Students admitted to the University of Missouri are encouraged to enter the College of Agriculture, Food and Natural Resources, including The School of Natural Resources, as freshmen.

Special Programs

Preveterinary Track

Students wishing to prepare for application to the College of Veterinary Medicine may enroll in the College of Agriculture, Food and Natural Resources under the programs that emphasize science, such as animal sciences or fisheries and wildlife sciences. In satisfying the science program requirements, the requirements for entering veterinary medicine also may be satisfied.

A minimum of 60 credits is required for admission to the College of Veterinary Medicine. Before applying, a student should make certain that the requirements listed below have been satisfied. Questions concerning required admission credits should be directed to the College of Veterinary Medicine. (Note: Tracks are not listed on transcripts or diplomas.)

Composition or courses in communication skills	6 credit hours
College Algebra or more advanced mathematics.....	3 credit hours
Inorganic Chemistry	8 credit hours
Organic Chemistry (requires laboratory).....	5 credit hours
Biochemistry (requires organic chemistry prerequisite).....	3 credit hours
Physics (comprehensive introductory course or courses)**	5 credit hours
Biological Science	10 credit hours
Social Science and/or Humanistic Studies	10 credit hours
Electives	10 credit hours
	60

**5 hrs. in only the first of a companion series in introductory physics will not suffice.

Premedical Track

Students interested in a medical career may choose from a variety of science-based majors. The most common choice of students is biochemistry because it is a common program between CAFNR and the School of Medicine. Questions concerning required admission credits should be directed to the School of Medicine. (Note: Tracks are not listed on transcripts or diplomas.) The following course work is required for admission:

English composition (may include writing-intensive courses).....	2 semesters
College-level mathematics (or calculus eligibility)	1 semester
General biology, including laboratory.....	8 credits
Inorganic chemistry, including laboratory.....	8 credits
Organic chemistry, including laboratory	8 credits
General physics, including laboratory.....	8 credits

Degree Options

In many majors, students are allowed to tailor the program of study to their professional goals. Students may choose courses that provide them with strong technical expertise or select those

that provide business expertise. Others who are preparing for graduate or professional schools may be interested in a strong science education. All of these options are available within the majors.

Major Program Requirements

Students must complete 128 credits. In addition to University general education requirements and graduation requirements, the College of Agriculture, Food and Natural Resources requirements are listed below. (See The School of Natural Resources requirements later in this catalog.)

Major core requirements

Communications	9
ENGLSH 1000 a grade of C- or better is required.	
COMMUN 1200: Public Speaking or AG ED 2220: Verbal Comm in Ag, Food & Nat. Res.....	3
Comm Elective (selected from).....	3
ENGLSH 2010: Intermediate Composition	
ENGLSH 2030: Professional Writing	
AG ED 2220: Verbal Communication in Ag, Food & Natr. Resources	
AG JOURN 3210: Fundamentals of Communication	
AG JOURN 3240: Communicating on the Web	
COMMUN 1200: Public Speaking	
COMMUN 3441: Nonverbal Communication	
COMMUN 3572: Argument and Advocacy	
COMMUN 3575: Business and Professional Communication	
COMMUN 3576: Persuasive Speaking	
THEATR 1400: Acting for Non-Majors	
RU SOC 2225: Science, Technology, and Society	
C S&D 1110: Manual Communication I	
Foreign language	
Mathematics	3
MATH 1100 or higher level mathematics course. C- or better required.	
Math Reasoning Proficiency course. C- or better.	
Physical and biological sciences.....	11
CHEM 1100: Atoms and Molecules with Lab (3) OR	
CHEM 1310: General Chemistry 1 (2) OR	
CHEM 1320: General Chemistry 2 with Lab (3)	2-3
CHEM 1330: General Chemistry 3 with Lab OR

BIO SC 1200: General Botany with Lab (5) OR	
BIO SC 1500: Intro. Biological Systems with Lab (5).....	5
Social and behavioral sciences	9
AG EC 1041: Applied Microeconomics OR	
ECONOM 1014: Principles of Microeconomics.....	3
AG EC 1042: Applied Macroeconomics OR	
ECONOM 1015: Principles of Macroeconomics.....	3
Elective selected from:	3
One course that meets State Law Requirement HIST 1100, 1200, 2210, 2440, 4000, 4220 or 4230 OR POL SC 1100 or 2100.	
Humanities and/or fine arts.....	9
Select courses from the list approved by the Committee for	

Undergraduate Education located on the following website: <http://generaleducation.missouri.edu/requirements>.

Additional CAFNR Requirements

A minimum of 48 credits must be completed in courses numbered 2000 or above; a minimum of 24 of the 48 credits must be in courses numbered 3000 or above.

Students must complete a minimum of 32 credits in departments within the College of Agriculture, Food and Natural Resources. A minimum of 20 CAFNR credits must be completed in residence (on the MU campus).

Transfer students must complete 30 credits in residence. At least 20 of these credits must be taken in the College of Agriculture, Food and Natural Resources. A community college transfer student may transfer up to 18 CAFNR credits. However, a transfer student from either a community college or a four-year institution must complete a minimum of 20 credits in MU CAFNR courses.

Of the credits taken during the last year for a BS degree in the College of Agriculture, Food and Natural Resources, a maximum of 6 credits can be taken at another accredited institution. These 6 credits are to be electives only. Approval of adviser, adviser chair and associate dean must be obtained prior to enrolling in courses taken at another accredited institution.

Detailed information about each major may be found in this catalog.

Interdivisional

For additional details on division specific minors, see individual division's page.

Minor in International Agriculture

The college offers an interdisciplinary minor in International Agriculture. This unique offering is an excellent addition to any major. It provides insight into the ever-increasing interconnectedness of world communities.

The minor in International Agriculture consists of a minimum of 15 credits. Nine of the 15 credit hours must be in approved CAFNR courses at the 3000 level or above. No more than six credits will be accepted from courses taken in formal study abroad programs. Up to two courses (6 credit hours) approved by the student's advisor and the international ag advisor chair in a geographic area of interest may be used towards a minor.

Minor in Agricultural Leadership

Each student must take a total of four courses (12 credits) of formal courses and 3 credits of Leadership Practicum for a total of 15 credits. The Leadership Practicum is intended to provide students the opportunity to further develop and apply leadership principles and skills. The practicum experience can be in the student's major area but must be approved by the coordinator of the leadership minor and should include one or more of the leadership faculty as an adviser.

Minor in Sustainable Agriculture

The minor in Sustainable Agriculture requires a minimum of 18 credits. Fifteen credits must be completed in the approved course work, and 3 credits must be obtained in a capstone experience. This capstone experience must be an internship or international experience at the 3000-level or above.

Minor in Youth Services

Every person has gone or will go through a period when they are establishing their identity and moving from childhood towards being an adult. This minor includes courses from a variety of fields including Human Development, Social Work, Rural Sociology, and Parks, Recreation and Tourism. The goal of the minor is to help individuals prepare for a career related to youth service work such as with 4-H, Boy and Girl Scouts, Big Brothers, Big Sisters, etc. Interested students should contact Dr. Larry Ganong, Department Co-Chair, Human Development and Family Studies.

Honors Requirements

Students are eligible to enter the honors program when they have obtained a cumulative GPA of 3.3 or above based on 30 credits earned at the University of Missouri. Transfer students are eligible after completing 15 credits at MU with a cumulative GPA of 3.3 or higher.

Students must be admitted to the honors program prior to the first day of classes for the last semester they are enrolled in residence in the College of Agriculture, Food and Natural Resources. No student is admitted retroactively. The student is officially admitted to the program when the dean approves the application form, which must be accompanied by a program of study.

Eligible students should complete an application as early in their undergraduate degree program as possible. The honors program application should be signed by at least two faculty members and the undergraduate adviser chair before it can be approved. The faculty members co-signing the application will comprise the honor student's advisory committee.

An honors project (HP) is required and should be planned by the student and approved by the honor student's advisory committee. The honors project should involve a significant research effort by the honors student, culminating in a written and oral presentation of the results. Departmental HP requirements must be approved by the CAFNR Honors Program Oversight Committee.

In CAFNR, the BS with honors requires 128 credits. However, CAFNR Honors students may apply for dual enrollment with the Graduate School during the final semester and receive graduate credit for up to 6 credits. Students must fulfill University general education and major requirements.

Students are officially admitted to the CAFNR Honors Program when the application has been approved and signed by the CAFNR associate dean of academic programs. To remain in good standing in the CAFNR Honors Program, a student must maintain a cumulative GPA of 3.3 or more. A student whose GPA falls below 3.3 will be allowed a two-semester grace period to raise the GPA to the 3.3 level.

Changes in the program of study must be signed by the student, each advisory committee member, the undergraduate adviser chair and associate dean before they are officially approved.

Probation, Suspension and Dismissal

In addition to the policies of the University, the College of Agriculture, Food and Natural Resources follows the policies below. (See Academic Standing in the front section of this catalog.)

A student who has been suspended and, after readmission, again becomes subject to academic suspension, will be ineligible to re-enroll for at least one year (academic dismissal).

STUDENT SERVICES

Advising

When entering the college, each student is assigned a faculty advisor to assist in defining career goals and planning courses for a program of study that leads to graduation. The faculty advisor also serves as a resource person for the student in a variety of academic and individual situations.

One of a student's first priorities is to meet and become acquainted with the faculty advisor early in the semester. The student should consult with the faculty advisor when planning or changing the academic program. The advisor must approve and sign the program of study for graduation.

Questions dealing with advisement should be directed to Student Services, 2-64 Agriculture Building, (573) 882-8301.

Career Services and Professional Opportunities

Graduates find rewarding careers in private industry and with state and federal agencies. Many own their own businesses. Some graduates enter production agriculture while many others enter professions that develop, support or market various products and technologies.

The CAFNR Career Services Office provides students with current information on career areas that are expanding and offer outstanding potential. The staff helps students analyze their skills and encourages them to explore employment opportunities in a variety of career areas. Career development services include career days, one-on-one help sessions, workshops, resume writing, mock interviews, job-seeking tactics, and an online job and employer database (HireMizzouTigers.com)

Each year, the Career Services Office schedules on-campus interviews for graduating seniors and intern candidates to enable representatives from local and national businesses and state and national government agencies to meet prospective employees. The office also assists alumni involved in career changes and undergraduates looking for part-time and summer employment.

For more information, write or call the Career Services Office, 2-64 Agriculture Building, (573) 882-0088 or CAFNRcareerservices@missouri.edu.

Student Activities

The College of Agriculture, Food and Natural Resources offers a variety of extracurricular student activities that contribute to a student's education and professional development. Clubs and organizations sponsor activities related to professional interests as well as social events. Involvement in extracurricular activities fosters leadership development. Involvement in activities outside the classroom also may prove beneficial when applying for scholarships or jobs. Many organizations and companies look favorably on a student who has received good grades while being involved in clubs and other University organizations.

Each class and club elects a representative to the Agricultural Divisional Student Council. Honorary organizations such as Alpha Zeta and Gamma Sigma Delta promote the ideals of scholarship and leadership and recognize outstanding achievements by students in the college.

For more information go to: <http://www.cafnrcornerpost.com>

On-Campus Internships

On-campus internships provide students with professional growth experiences and close associations with faculty members as they work together on projects approved by an internship selection committee. Students can increase their communication skills, problem-solving abilities and technical expertise through an individualized internship experience that takes place on campus. Students complete regular course work in addition to participation in the internship. Students may receive a stipend.

Internships

To gain relevant career experience, most CAFNR students participate in internship programs. Students intern with government agencies, employers or organizations that furnish facilities and instruction to increase knowledge and strengthen leadership and communication skills.

Academic credit may be given for an internship. Students eligible for internship credit through a CAFNR department must be in good academic standing in a degree program with adequate prerequisite qualifications. For more information on internships, write or call the Career Services Office, 2-64 Agriculture Building, (573) 882-0088 or CAFNRcareerservices@missouri.edu.

Study Abroad

The College of Agriculture, Food and Natural Resources provides students with opportunities to study abroad on academic year, semester, summer, short term and winter break programs. Study Abroad compliments and enhances a student's academic program. On these programs, students gain maturity and self confidence, broaden their horizons to the larger world around them and earn academic credit. Increasingly, employers are looking for students who have increased their skill set through study abroad.

For more information about CAFNR study abroad, contact the International Studies Office, 2-64 Agriculture Building, at (573) 882-8301.

AGRICULTURE COURSES

AGRIC 1101--Special Topics in Agriculture (1-3). Selected topics not offered in other courses. Prerequisite: instructor's consent.

AGRIC 1111--Computing and Information Systems I (3). Provide students with a basic understanding of microcomputer usage, electronic communications, and use of the Internet. Topics include operating systems, word processing, database management systems, spreadsheets, electronic mail, online library searches, and the World Wide Web.

AGRIC 1115--Foundations for College Success (1). An investigation of principles and practices associated with academic success and the interpersonal challenges encountered in collegiate life. Learning preferences, time investment, study skills, degree requirements, and personal development opportunities available in the College and across campus are explored. Prerequisite: freshman standing. Graded on A/F basis only.

AGRIC 2112--Computing and Information Systems II (3). Designed for students who excelled in Agriculture 1111. The course is project oriented and includes further instruction on the subjects taught in AGRIC 1111.

AGRIC 2115--College to Career: Strategies for Success (1). Systematic approach to self-Assessment, career research and exploration, goal-setting and implementation of a career development plan. Students will learn specific skills, research knowledge and lifelong career management techniques.

AGRIC 2150--Agricultural Travel Course (cr.arr.). General travel course designed to broaden perspective of agricultural students. Prerequisites: one course in each of the following areas: agricultural economics, animal science, plant science, and instructor's consent. Cost of course is borne by the student.

AGRIC 2190--International Agriculture and Natural Resources (cr.arr.). This course is designed to provide students with an introduction into the agriculture/natural resources of the host country. Activities may include course work at an international institution, professional and personal development and special projects. Prerequisites: instructor's and student advisor's consent.

AGRIC 2191--International Agriculture and Natural Resources - Humanities (1-3). This course is designed to provide students with an introduction to valuing and appreciating the culture and philosophy entrenched in the host country's civilization through the examination of its arts, culture, language and history. Prerequisites: student's advisor or consent of instructor. May be repeated for credit.

AGRIC 2192--International Agriculture/ Natural Resources-Social Science (1-6). This course is designed to provide students with an examination of the social sciences of the host country; including the sociology, psychology, economics, government, and history of the country; including the dynamics of urban and rural communities. Prerequisite: advisor and instructor's consent. May be repeated for credit.

AGRIC 4001--Topics in Agriculture-General (cr.arr.). Topics in Agriculture-General

AGRIC 4972--Capstone Project in Agriculture, Food and Natural Resources (1-3). A culminating learning experience focused on student's area of concentration that requires the application of knowledge and skills taught in the undergraduate curriculum. The capstone project comprises independent, original work culminating in a scholarly project, written document, and/or presentation. Graded on S/U basis only. Prerequisite: junior standing; instructor's consent.

AGRIC 4993--Internship in Agriculture, Food and Natural Resources (1-6). Field-based learning experience combining the study, observation, and employment with a business, organization, or governmental agency. The internship provides opportunities to apply skills, concepts and theories about agriculture, food and natural resources in a practical context. The student intern, internship supervisor, and university coordinator will develop an individualized internship plan. May be repeated for credit. Prerequisite: junior standing; instructor's consent.

The Department of Agricultural Economics offers undergraduate degrees in agribusiness management and in agricultural economics as well as a minor in agricultural economics. The department is home to several programs and research centers:

- Agricultural Electronic Bulletin Board, a clearinghouse for information related to farming and production agriculture
- Agribusiness Research Institute, an agribusiness research program that focuses on interactive problem solving and learning
- Center for Applied Research and Environmental Systems, an intercollegiate research and education center.
- Community Policy Analysis Center, providing research, outreach and training that supports improved policy decisions in Missouri communities
- Contracting and Organizations Research Institute, dedicated to enabling and encouraging interdisciplinary empirical research on contracting and organizational structure
- Economics and Management of Agrobiotechnology Center, a research institute with a focus on applications of biotechnology on agriculture and food production and distribution
- Food and Agricultural Policy Research Institute, a Congressionally-enacted institute whose mission is to provide objective analysis of food, agricultural, nutritional and environmental

issues
 Rural Policy Research Institute, conducting policy-relevant research
 The department offers a BS degree with a major in Agribusiness Management and BS, MS and PhD degrees with a major in Agricultural Economics. A minor is also available.

Department Requirements

Core department requirements must be completed in addition to all major, degree, CAFNR and university graduation requirements, including the University general education requirements. The following courses are required for both agribusiness management and agricultural economics majors:

Department core requirements	18
AG EC 1041: Applied Microeconomics	3
AG EC 1042: Applied Macroeconomics	3
AG EC 2123: Introduction to the Mathematics of Agricultural Economics OR	
MATH 1320 Elements of Calculus	3
AG EC 2183: The Agricultural Marketing System	3
AG EC 3251: Agricultural Prices	3
AG EC 3282: Agribusiness Finance	3
Supporting courses	24
AGRIC 1111: Computing and Information Systems I OR	
CMP SC 1020: Introduction to Computing OR	
ACCTCY 2258: Computer Based Data Systems	3
MATH 1300: Finite Mathematics	3
ACCTCY 2036: Accounting I OR	
ACCTCY 2136H: Honors Accounting I.....	3
ACCTCY 2037: Accounting II OR	
ACCTCY 2137H: Honors Accounting II	3
STAT 2500: Introduction to Probability and Statistics I OR	
AG EC 2225: Statistical Analysis.....	3
ECONOM 3229: Money and Banking and Financial Markets.....	3
PLNTS: Any course in Plant Sciences OR	
BIO SC 1200: General Botany with Lab OR	
FOREST: Any approved course	3
AN SCI: Any course in animal sciences	3
Agricultural production	3
Courses in biological engineering; agricultural systems management; animal sciences; entomology and pest management; fisheries and wildlife; food science; forestry; hotel and restaurant management; natural resources; parks, recreation and tourism; plant pathology; plant science (includes agronomy and horticulture); and soil and atmospheric science	
Electives	26-30

Major Program Requirements – Agribusiness Management

The degree in agribusiness management offers the student a general business background while emphasizing applications to various types of food and agricultural businesses. This program prepares students to assume leadership roles in business. The broad background allows maximum flexibility when entering the job market.

Students transferring into agribusiness management from other departments at MU or from other colleges must have a 2.7 cumulative GPA for all work attempted.

Core department requirements must be completed in addition to all major, degree, CAFNR and university graduation requirements, including the university general education requirements.

Major core requirements	12
AG EC 3256: Agribusiness and Biotechnology Law	3

AG EC 3286: Economics of Managerial Decision Making	3
AG EC 4971: Agribusiness Management Strategy (capstone)	3
AG EC 4972: Agri-Food Business and Cooperative Management	3
Business core requirements	9
Accounting, finance, management, marketing, or agricultural economics courses approved by the department	

Major Program Requirements – Agricultural Economics

Programs in agricultural economics focus on understanding and solving problems in the production, distribution and use of agricultural goods, services and natural resources. The focus is on courses in management, marketing and production, as well as on courses covering economic principles and computer skills.

Students transferring into agricultural economics from other departments at MU or from other colleges or universities must have a 2.7 cumulative GPA for all work attempted.

Substantial career opportunities exist in food processing and manufacturing, international production, development and trade, biotechnology, agricultural and natural resource management, as well as aspects of agribusiness.

Core department requirements must be completed in addition to all major, degree, CAFNR and university graduation requirements, including the university general education requirements.

Options and Tracks

The Agricultural Economics degree offers 3 options.

Farm and Ranch Professional Option

In addition to the course requirements for the College of Agriculture, Food and Natural Resources, the following courses are required within this option.

Option core requirements	12
AG EC 3257: Rural and Agricultural Law	3
AG EC 3260: General Farm Management	3
AG EC 3294: Agricultural Marketing and Procurement	3
AG EC 4962: Planning the Farm Business (capstone)	3

Agricultural production 9

Courses in biological engineering; agricultural systems management; animal sciences; entomology and pest management; fisheries and wildlife; food science, forestry; hotel and restaurant management; natural resources; parks, recreation and tourism; plant pathology; plant science (includes agronomy and horticulture); and soil and atmospheric science.

Public Policy Option

In addition to the course requirements for the College of Agriculture, Food and Natural Resources and the Department of Agricultural Economics, the following courses are required within this option.

Option core requirements	24
AG EC 2070: Environmental Economics & Policy (3)	
AG EC 3230: Agricultural and Rural Economic Policy (3)	
AG EC 3271: International Agricultural Development (3) OR	
AG EC 3272: International Food Trade & Policy (3)	
RU SOC 1000: Rural Sociology (3) OR	
POL SC 1100 American Government (3)	

AG EC 4990 Agricultural Economics Capstone Seminar (3)	
Public Policy Electives (9)	

Financial Planning Option

The Financial Planning option prepares undergraduates with the tools necessary for placement in the agricultural finance sector with an emphasis on family financial planning. In addition to the course requirements for the College of Agriculture, Food and Natural Resources and the Department of Agricultural Economics, the following courses are required within this option:

Core requirements	28
AG EC 3256: Agribusiness & Biotechnology Law	3
ACCTCY 4353: Introduction to Taxation	3
FINPLN 2083: Financial Planning Careers	1
FINPLN 2183: Personal & Family Finance	3
FINPLN 3283: Financial Planning: Computer Applications	3
FINPLN 4382: Financial Planning: Risk Management	3
FINPLN 4383: Financial Planning: Investment Management	3
FINPLN 4386: Financial Planning: Employee Benefits & Retirement Planning	3
FINPLN 4393: Financial Planning: Estate & Gift Planning	3
FINPLN 4380: Assessing the American Dream	3

Departmental Honors

An honors program is available through the College of Agriculture, Food and Natural Resources.

Minor in Agricultural Economics

A minor in agricultural economics requires 18 credits in agricultural economics with at least 9 credits at the 3000 level or above. A student earning an agribusiness management major is not eligible for an agricultural economics minor.

Sample Eight-Semester Program

Bachelor of Science degree with a major in Agribusiness Management

AGRICULTURAL ECONOMICS COURSES

AG EC 1010--Introduction to Agribusiness Management (1). Management concepts and techniques. Coordination of business activity, motivation, and decision-making approaches used by industry leaders in global food chain. Unique aspects of managing enterprises in the agriculture-food sector.

AG EC 1011--Survey of Global Agribusiness (1). Economic, social and political forces and trends and the impact on U.S. and global agribusinesses. Global production, consumption trade, and investment patterns in agriculture-food sector. Developing management strategy in changing economic political environment.

AG EC 1041--Applied Microeconomics (3). Introduction to the microeconomic principles and their application to decision-making in agribusinesses. Consumer decision analysis, producer goals and optimization and the market environment where they meet and trade. Applications to current issues. Students who complete AG EC 1041 may not have credit for ECONOM 1014.

AG EC 1042--Applied Macroeconomics (3). Introduction to macroeconomic principles and their application to agriculture-food sector and natural resource issues. Using macroeconomic principles in decision making and in evaluating national and regional economic problems and issues. Students who complete AG EC 1042 may not have credit for ECONOM 1015.

AG EC 2070--Environmental Economics and Policy (3). (same as Environmental Studies 2070). Examines current environmental and natural resource issues using a systems perspective and key economic concepts. Ex-

plores connections between the environment and the economy based on problems at the local, national, and international levels. Prerequisite: ENGLSH 1000 and Sophomore standing.

AG EC 2123--Introduction to the Mathematics of Agricultural Economics (3). Familiarize students with the use of calculus and other quantitative tools in developing and analyzing fundamental economic concepts. Prerequisites: AG EC 1041, 1042 and MATH 1300.

AG EC 2156--Introduction to Environmental Law (3). Environmental issues from a legal perspective, using current controversies from both the USA and other countries. Major environmental laws dealing with water, air, noise, endangered species, waste disposal, and land use.

AG EC 2183--The Agricultural Marketing System (3). Analysis of marketing systems that transforms agricultural products into food products. Examines functions and institutions in marketing and distributing food from both micro and macro perspectives. Prerequisite: AG EC 1041, 1042 and ENGLSH 1000.

AG EC 2223--Agricultural Sales (3). Principles of salesmanship in agricultural input and output markets; buyer motivations; time and territory management; communication models and techniques; planning and executing sales calls; after-sale service. Prerequisites: AG EC 1041.

AG EC 2225--Statistical Analysis (3). Elementary statistical inference. Prerequisite: AG EC 1041 and MATH 1300. Math Reasoning Proficiency Course.

AG EC 2940--Practicum in Agricultural Economics (1-3). Off-campus integrated work-

ing and learning experience for departmental majors and minors. Application of economic concepts in business or government. Prerequisites: 6 credit hours Agricultural Economics, 3 credits communications, and 30 total University credits. Graded on S/U basis only.

AG EC 3150--International Agribusiness (3). This course covers the primary factors that shape the business environment for food and agricultural firms conducting business across borders. The course examines how culture, institutions and public policy affect business operations and business strategies. Prerequisites: AG_ECON2183 or instructor's consent.

AG EC 3224--New Products Marketing (3). Learning experience to develop skills in marketing new ag products. To include: market analysis, goals and objectives, action plan, financial evaluation and monitoring and measurement. In small groups, students will develop complete marketing plan for a new product. Prerequisites: ENGLSH 1000, AG EC 1041 or equivalent.

AG EC 3230--Agricultural and Rural Economic Policy (3). Study and analysis of past and present government policies affecting agriculture and rural economy. Prerequisite: AG EC 1041 and 1042 or equivalent.

AG EC 3241--Ethical Issues in Agriculture (3). The study of how economics, philosophy, and science inform on and impact important ethical problems in agriculture, such as the environment, biotechnology, animal welfare, farm structure, the role of agribusiness, development, sustainability, and agriculture-related public policy. Course may be repeated once for credit. Prerequisite: junior standing.

AG EC 3251--Agricultural Prices (3). Variations in prices of agricultural products; underlying factors. Prerequisites: AG EC 1041, 1042, 2123 or MATH 1320 and STAT 2500 or AG EC 2225.

AG EC 3256--Agribusiness and Biotechnology Law (3). Legal concepts applicable to agribusiness and biotech firms. To include contracts, torts, product liability, warranties, corporate farming laws, UCC, corporations/partnerships/limited liability companies, labor laws, patent copyrights/trademark laws, international and ethical perspectives. Prerequisites: 3 hours of Agricultural Economics or Economics.

AG EC 3257--Rural and Agricultural Law (3). Everyday practical legal problems facing rural residents, farmers, agribusiness, and local government. Laws include statutes, common law (cases), customs, and administrative regulations. Topics include corporate/contract farming, right-to-farm, leases, fence laws, estate planning and water rights. Prerequisites: 3 hours of Agricultural Economics or Economics.

AG EC 3260--General Farm Management (3). Economics and management principles applied to planning and operating farm businesses. Includes enterprise combination, resource acquisition, water management, profit maximizing techniques and annual adjustments to changing conditions. Prerequisite: AG EC 1041.

AG EC 3270--Conservation and Use of Protected Areas (3). Evaluation of socioeconomic, cultural and ecological values influencing the development and management of protected areas including parks, forests, wildlife refuges, wilderness and wild/scenic rivers. Prerequisites: AG EC 1041 or equivalent, or AG EC 2070 and introductory natural resources courses, or instructor's consent.

AG EC 3271--International Agricultural Development (3). Examines world food problem; analyzes its causes; economic and noneconomic policy alternatives for modernizing agriculture in less-developed countries. Prerequisites: AG EC 1041 and 1042 and junior standing.

AG EC 3272--International Food Trade and Policy (3). Examines food trade; develops economic analyses of trade impacts on domestic agricultural policies; examines international trade agreements; and interface of trade and environment. Prerequisites: AG EC 1041 and 1042.

AG EC 3282--Agribusiness Finance (3). Application of the concepts and methods of finance to the management of agribusiness firms, including cooperatives. Special attention is given to the working capital needs of agribusiness and to the specialized lending institutions in the agricultural economy. Prerequisite: AG EC 1041 and ACCTCY 2037.

AG EC 3283--Fundamentals of Entrepreneurship (3). Introduce students to entrepreneurial way of thinking. Entrepreneurship is a way of thinking about identifying/creating opportunities and transforming those opportunities into new businesses, new institutions, or solutions to problems. Students will participate in the process of formulating and evaluating solutions to problems and identifying and exploiting opportunities. Prerequisites: AG_EC 1041 and ACCTCY 2036 or equivalent.

AG EC 3285--Problems in Agricultural Economics (1-3). Supervised study in a specialized phase of agricultural economics. Prerequisite: AG EC 1041 and 1042; instructor's consent. Graded on S/U basis only.

AG EC 3286--Economics of Managerial Decision Making (3). Introduces tools and concepts from price theory, game theory, industrial organization and organizational economics, and applies them to managerial decision making activities for businesses in the agrifood system and for natural resource and environmental management. Prerequisite: AG EC 1041, 2123 and 2183.

AG EC 3294--Agricultural Marketing and Procurement (3). Content of course focuses on marketing issues in the agriculture supply chain. Topics covered include price discovery, basis, futures/options, contracting, logistics, and management decision making. Prerequisites: AG EC 2183 and 2225.

AG EC 3295--Commodity Futures/Options Trading (2). Familiarize students with the learning components of commodity future/options trading. Students learn through involvement by investing in a commodity pool and trading futures/options. Students apply both fundamental and technical analysis. Students taking this course are required to invest from \$100 to \$300 in \$100 increments. Prerequisites: AG EC 2183, 3294 or instructor's consent.

AG EC 3321--Economic History of Agriculture (3). Emphasizes Europe and U.S. historical interpretation; usefulness in evaluating present and probable future developments in agriculture. Prerequisite: AG EC 1041.

AG EC 4110--In-Service Course in Agricultural Economics (2-10). A. Profit Maximizing Principles B. Farm Planning C. Farm Records and Analysis D. Business Management E. Using Computers in Farm Management Decision Making. Basic principles of farm management. Applications of principles and subject matter in successful classroom presentation primarily for high school teachers. Course is offered in sections A-E as listed, for 2 hours each. Prerequisites: 10 hours credit in Agricultural Economics, including AG EC 3260, or instructor's consent.

AG EC 4230--Understanding the Agricultural Policy Process (3). The goal of this course is to prepare students for a career in agricultural policy and will build the skill set needed in the agricultural policy environment. Prerequisites: AG_EC 3230 or instructor's consent.

AG EC 4295--Agricultural Risk Management (3). This class will examine the range of risks business face and explore ways of characterizing and evaluating those risks. Prerequisites: AG_EC 2183 and 2225 or instructor's consent.

AG EC 4301--Topics in Agricultural Economics (1-6). Current and new topics not currently offered in applied and/or theoretical areas in Agricultural Economics.

AG EC 4310--Local Economic Analysis (1). Economic based theory, including multipliers and how local economies are affected by external events. Methods for local economic analysis: trends, location quotients, shift-share, and retail analyses. Prerequisite: junior standing.

AG EC 4340--Rural Real Estate Appraisal

(3). Principles, techniques, practices of rural real estate appraisal. Field trips. Prerequisites: AG EC 3260.

AG EC 4356--Environmental Law and Policy (3). Legislative, administrative, and common law dealing with the environment. Introduces the fundamental concepts and classic issues underlying the body of law and policy dealing with the environment. Includes air and water quality, endangered species preservation, land use, and waste disposal. Prerequisites: senior or graduate standing. For non-law students. Recommended AG EC 2156, 3256 or 3257.

AG EC 4940--Internship Experiences in Agricultural Economics (1-3). Combines study, observation, and employment in a public agency or private firm in marketing, farm management, or credit. Staff supervision and evaluation. Reports required. Prerequisites: 2.5 GPA; 75 hours of course work and instructor's consent. Graded on S/U basis only.

AG EC 4962--Planning the Farm Business (3). Economic analysis and planning of the farm business and its organization. Applications of computerized management techniques to farm business including resource acquisition, tax management, enterprise analysis, and business analysis through farm records and budgets. Prerequisites: AG EC 3260 or AGRIC 1111 or equivalent.

AG EC 4971--Agribusiness Management Strategy (3). Analysis of industry forces in agriculture and food sector. Assessing risks and firms' capabilities. Development of firm's competitive strategy, including vertical integration, diversification, international business option, and financial planning and performance measurement. Prerequisites: AG EC 2183, 3282, 3286, ENGLISH 1000 and AGRIC 1111.

AG EC 4972--Agri-Food Business and Cooperative Management (3). Risk management in the global agrifood chain, including managing the unique uncertainties of biological production processes, global market analysis, and government intervention, of risk management tools and institutions unique to strategic decision making in agribusiness and cooperative firms. Prerequisites: AG EC 2183, 3256, 3286 and 4971

AG EC 4990--Agricultural Economics Capstone Seminar (3). Apply key concepts of agricultural economics in traditional and non-traditional settings. Prerequisites are AG_EC 3230, AG_EC 3251, and senior standing.

AG EC 4995--Economics of Agricultural Production and Distribution (3). Applies economic principles to agricultural production including price theory, linear programming and uncertainty. Prerequisites: ECONOM 3251, STAT 1400 or equivalent.

The agricultural education degree program provides students with the opportunity to combine an interest in agriculture, food and natural resources with their enjoyment of working and communicating with people. A degree in agricultural education leads to careers in which students can influence the next generation's understanding of agriculture and its role in society and the global economy.

Students pursuing a degree in agricultural education choose between two emphasis areas. Leadership emphasis focuses on developing students' leadership, communication and human relation skills. Students learn how to plan, manage and disseminate information in non-formal educational settings. Teacher certification emphasis prepares students to meet state teacher licensure requirements and teach agriculture, food and natural resources to secondary and adult learners through the public schools. Students in both the teacher certification and leadership options have the opportunity to specialize in an area of interest by completing course work in one or more agriculture, food or natural resource disciplines.

Students transferring into agricultural education from academic degree programs within the University of Missouri must have at least a 2.3 GPA on all course work attempted.

The department offers the BS with a major in Agricultural Education. A minor is also available.

Major Program Requirements - Agricultural Education

Students must complete the University of Missouri's general education requirements and the course requirements established by the College of Agriculture, Food and Natural Resources (CAFNR) to earn the Bachelor of Science degree. Approximately one-third of the course work for the degree is completed in agricultural education or professionally related courses. In addition, the curriculum includes courses in agriculture, food and natural resource disciplines including agricultural economics, agricultural systems management, animal science, food science, horticulture, plant science and natural resources.

Major Core Requirements

See university general education and graduation requirements as well as the College of Agriculture, Food and Natural Resources listings. The requirements specific to agricultural education are also available at <http://www.aged.missouri.edu/>.

Emphasis Areas

Students within the agricultural education major will select the Teacher Certification emphasis or Leadership emphasis.

Leadership Emphasis

The leadership emphasis focuses on developing students' leadership, communication and human relation skills. Students are encouraged to develop a diverse background by completing course work in a variety of disciplines in the College of Agriculture, Food and Natural Resources. Students also have the opportunity to specialize and earn minors in disciplines of interest. The capstone experience involves a supervised internship with an agricultural business, public or private agency, or commodity organization in the area of education, training, communication and/or development.

Emphasis core requirements

Agricultural education.....	20

Teacher Certification Emphasis

The teacher certification emphasis prepares students to meet state teacher licensure requirements to teach agriculture in the public schools at the secondary and adult levels. In addition to courses in agricultural education, the curriculum includes a diverse selection of courses in agriculture, food and natural resources

and professional teacher certification courses offered through the Teacher Development Program in the College of Education. The capstone experience involves a semester-long teaching internship in a selected secondary agriculture program.

*-Denotes University General Education Requirements

[^]-Denotes Degree Program Requirements

Check the *Undergraduate Catalog* for course prerequisites.

AGRICULTURAL EDUCATION COURSES

AG ED 1000--Orientation to Agricultural Education (1). Overview of the discipline of agricultural education including: career opportunities, certification requirements, professional development, and current issues.

AG ED 2220--Verbal Communication in Agriculture, Food and Natural Resources (3). Application of verbal communication skills used in the dissemination of information related to agriculture, food, and natural resource topics. Acquisition of interpersonal communication skills and small group, impromptu and professional presentation skills. Prerequisite: sophomore standing.

AG ED 2250--Personal Leadership Development (3). Principles and practices associated with effective personal leadership including an examination of characteristics of effective leaders. The course focuses on self-awareness, clarification and articulations of values, goal setting and personal management. Students will experience a service leadership project.

AG ED 2260--Team and Organizational Leadership (3). Principles and practices in planning, developing, conducting, and evaluating leadership programs for agricultural groups. The course focuses on helping students better understand themselves and others, improving group communications; becoming effective leaders and members of groups; improving leadership and personal development skills; assessing leadership situations, determining and administering appropriate leadership strategies, and evaluating results.

AG ED 3085--Problems in Agricultural Education (cr.arr.). Supervised and independent study of problems and issues in Agricultural Education at the undergraduate level. Prerequisite: instructor's consent.

AG ED 3310--Teaching Financial Management and Economics (2). Application of methods and techniques used in teaching principles of financial management and economics. Topics include: Agricultural accounting principles, depreciation, tax management, credit management, budgeting, and economic principles.

AG ED 3320--Metal Fabrication and Laboratory Management (3). Application of metal fabrication skills, including cutting, bending, and welding, using a variety of processes. Operations of hand tools and power equipment used in project construction. Also includes laboratory management, instructional strategies, and assessment techniques related to secondary agriculture programs. Prerequisite: junior standing.

AG ED 4001--Topics in Agricultural Education (1-3). Courses on specialized topics offered on a trial basis until the course has been assigned a course number.

AG ED 4087--Internship Seminar in Agricultural Education (3). Seminar focused on the problems of practice and developing skills needed for a career in teaching agriculture at the secondary level. The core of the seminar is on coordinating experimental learning and leadership development activities, managing the complete program, and professional development. Prerequisite: concurrent enrollment in AGR ED 4995.

AG ED 4310--Rationale and Structure of Agricultural Education Programs (3). This course provides future agricultural educators with a comprehensive overview of a complete Agricultural Education program involving classroom instruction, supervised experience, and personal development. Prerequisite: junior standing.

AG ED 4311--Integrated Field Experience I (1). A field-based experience that provides students with comprehensive experience directed toward the planning, supervision, and evaluation of Supervised Agricultural Experience Programs in secondary agriculture programs. Prerequisite: concurrent enrollment in AGR ED 4310. Graded on S/U basis only.

AG ED 4320--Designing Curriculum and Instruction in Agriculture (3). Instructional methodology course focused on analyzing the principles of learning and teaching and designing curriculum and instruction for teaching agriculture subjects in formal and informal educational settings. Prerequisites: junior standing.

AG ED 4321--Integrated Field Experience II (1). A field-based experience that examines the integration of Supervised Agricultural Experience and Career Development Events into the secondary agriculture curriculum. Investigates the use of advisory committees and graduate follow-up data in curriculum planning. Prerequisite: concurrent enrollment in AGR ED 4320. Graded on S/U basis only.

AG ED 4330--Teaching Agriculture Subjects (3). Instructional methodology course focused on teaching approaches and methods, problem-solving teaching techniques, and managing learning environments for teaching agriculture subjects in formal and informal settings. Prerequisite: AGR ED 4320.

AG ED 4993--Internship in Agricultural Education (1-4). Field-based learning experience that combines study, observation, and employment with an agricultural business, industry or government agency in the area of education, training, and development. Individual internship plans are developed by a student, faculty supervisor, and an industry cooperator. Prerequisite: departmental consent.

AG ED 4995--Student Teaching Internship in Agriculture (1-12). A field-based learning experience that combines observation and practice in a secondary/adult agriculture program. The purpose of the internship is to provide an opportunity to apply teaching and learning concepts in a practical context. Prerequisite: departmental consent.

 agj@missouri.edu

FACULTY

ASSISTANT PROFESSOR
 W. Allen, S. Wood-Turley

The College of Agriculture, Food and Natural Resources, in cooperation with the School of Journalism, offers a degree program in agricultural journalism. The curriculum provides students with training to enter a variety of occupations in the magazine and newspaper fields, radio and television, photography, public relations, advertising and web-based communications.

Students must meet certain School of Journalism GPA requirements. Check with an advisor for details.

The department offers the Bachelor of Science with a major in Agricultural Journalism.

Journalism

The flexibility in the curriculum permits students to obtain a broad background in agriculture, life sciences, food, environment and natural resources as well as journalism, plus specialization in any of these fields. Students also may select one of the School of Journalism options: strategic communication, magazine, print and digital news, convergence, photojournalism or radio-television journalism. Internship experience is strongly encouraged.

Major core requirements.....	63
Journalism.....	39

**AGRICULTURAL
JOURNALISM COURSES**

AG JRN 1160--Introduction to Agricultural and Environmental Journalism (3). Introduction to journalistic writing for print, broadcast, Web. Introduction to writing for public relations. Also includes writing for live Web publication: cafncornerpost.com. Provides overview of career opportunities. Prerequisite: instructor's consent.

AG JRN 2150--Problems in Agricultural Journalism (1-6). For undergraduates majoring in agricultural journalism. May be repeated. Prerequisite: instructor's consent.

AG JRN 2940--Internships in Agricultural Journalism (1-3). Prerequisite: instructor's consent, may be repeated for credit.

AG JRN 3201--Topics in Agricultural Journalism (1-3). Instruction in select subject matter areas in the field of communications. Prerequisite: instructor's consent.

AG JRN 3210--Fundamentals of Communications (3). Instruction in writing about conflicts in agriculture and the environment and their cultural impacts. Emphasis on media literacy, critical thinking, communication and the interplay of science and human values.

Prerequisites: ENGLSH 1000, sophomore standing.

AG JRN 3240--Communicating on the Web (3). Learn to make a useful, content-driven web site using web authoring software (this is not a programming class). This course emphasizes informative content and functional design. Prerequisite: instructor's consent.

AG JRN 3385--Problems in Agricultural Journalism (1-4). Opportunity to apply journalism skills to agricultural subjects; opportunity to integrate communication processes within single medium or across media. Section 1: Corner Post Staff, Section 2: Problems in Agricultural Journalism. Prerequisite: junior standing and instructor's consent. May be repeated.

AG JRN 4940--Internships in Agricultural Journalism (1-3). Prerequisite: instructor's consent, 60 or more credit hours completed. May be repeated for credit.

AG JRN 4970--Agriculture and the Media Senior Seminar Capstone (3). (Agricultural Journalism capstone course). Provides background, knowledge of trends and experience with agricultural media. Prerequisites: instructor's consent, AG JRN seniors take last Winter semester before graduation.

Agricultural systems management integrates physical systems with agricultural science and management skills to provide graduates with abilities to function in sales, service and maintenance management positions in agribusiness industries. The uniqueness of agricultural systems management graduates lies in their knowledge of the principles of physical systems that are the backbone of modern agricultural and food industries.

The department offers the Bachelor of Science with a major in Agricultural Systems Management. A minor is also available.

Major Program Requirements - Agricultural Systems Management

In addition to university, college and degree requirements, students must complete the following:

Major core requirements	31
Required courses.....	9
AG S M 1020: Introduction to Agricultural Systems Management	
AG S M 1040: Physical Principles for Agricultural Applications	
AG S M 4970: Agricultural Systems Management-Capstone	
At least four courses from the following	12
AG S M 2220: Agricultural/Industrial Structures	
AG S M 2360: Mobile Hydraulics	
AG S M 4420: Surface Water Management	
AG S M 4440: Water Quality and Pollution Control	
AG S M 4140: Electricity: Wiring and Equipment	
AG S M 4320: Agricultural Equipment and Machinery	
Courses to reach a minimum of 31 credits in ASM courses	
AG S M 1002: Topics in Agricultural Systems Management	

- AG S M 1120: Agriculture/Industrial Materials and Processes
- AG S M 2320: Internal Combustion Power
- AG S M 2340: Pesticide Application Equipment
- AG S M 3350: Problems in Agriculture Systems Management (1-5)
- AG S M 4020: Agricultural Safety and Health
- AG S M 4120: Advanced Agricultural/Industrial Materials and Processes (2-3)
- AG S M 4220: Material Handling and Conditioning
- AG S M 4350: Problems in Agricultural Systems Management (1-5)
- AG S M 4460: Irrigation and Drainage
- AG S M 4940: ASM Internship

Supporting courses	6
SOIL 2100: Intro to Soils or AN SCI 1011: Animal Science or AN SCI 1065: Animal Science Laboratory Practicum or PLNT S 2110: Plant Growth and Culture	3
Computer course (application software preferred)	3

Business/economics (suggested courses)	21
AG EC 1041: Applied Microeconomics (Required)	
AG EC 1042: Applied Macroeconomics (Required)	
ACCTCY 2036: Accounting I (Required)	
ACCTCY 2037: Accounting II (Recommended)	
AG EC 2183: The Agricultural Marketing System (Recommended)	
MRKTNG 3000: Principles of Marketing (Recommended)	
MANGMT 3000: Fundamentals of Management (Recommended)	
AG EC 3260: General Farm Management (Recommended)	
FINANC 1000: Principles of Finance (Recommended)	
AG ED 3310: Teaching Financial Management & Economics (Recommended)	
MANGMT 3540: Introduction to Business Law (Recommended)	
AG EC 3257: Rural and Agricultural Law (Recommended)	

Electives	25-27
Elective courses to bring total credits to 128; typically chosen to provide focus in one of the following areas:	
Natural resource and environment	
Materials handling and crop processing	
Power and machinery systems	
Production agriculture	

Options

Agricultural Equipment Dealership Management Program

Students who participate in the Agriculture Equipment Dealership Management program take a comprehensive sequence of courses in agricultural systems management and agricultural business management. Each student plans and completes an internship with a sponsoring dealer. Up to 6 credits may be earned through an Internship.

Minor in Agricultural Systems Management

To earn a minor in agricultural systems management, the student must complete 15 credits in ASMLecture/Lab courses. Of the 15 credits, only 6 semester hours may be below the 3000-level.

Sample Eight-Semester Program

AGRICULTURAL SYSTEMS MANAGEMENT COURSES

AG S M 1002--Topics in Agricultural Systems Management-Biological/Physical/Math (3).Current and new technical developments in agricultural systems management. Prerequisites: 6 hours in AG S M or instructor's consent.

AG S M 1020--Introduction to Agricultural Systems Management (3).Introductory course that acquaints students with the general technical areas of Agricultural Systems Management (AG S M). A systematic problem-solving approach is applied to problems derived from each of the technical areas within AG S M.

AG S M 1040--Physical Principles for Agricultural Applications (3).Introductory survey course to help students to: formulate problems; understand units/accuracy; learn basic definitions; understand simple machines, power transmission, fluid statics, electricity, heat-flow, and temperature/moisture relationships. Prerequisite: MATH 1120.

AG S M 1120--Agricultural/Industrial Materials and Processes (3).Structure and properties of manufacturing materials; conditioning and machining materials; assembling processes; finishing processes; automation of manufacturing systems.

AG S M 2002--Topics in Agricultural Systems Management-Biological/Physical/Math (3).Current and new technical developments in agricultural systems management. Prerequisites: 6 hours in AG S M or instructor's consent.

AG S M 2020--Environmental Ethics in Agriculture (3).Influence of agricultural technology and production practices on environmental quality. Stewardship concepts. Long-term vs. short-term consequences. Development of a scientifically sound ethic toward agricultural

production. Prerequisites: ENGLSH 1000 and sophomore standing.

AG S M 2220--Agricultural/Industrial Structures (3).Structural component selection, materials of construction, heat and moisture control. In the main, a problem-solving course. Prerequisite: MATH 1120, AG S M 1040 and instructor's consent. Math reasoning proficiency course.

AG S M 2320--Internal Combustion Power (3).Basic internal combustion engine principles, mechanisms, combustion cycles, fuels, fuel injection, electrical systems, engine testing. Prerequisite: AG S M 1040.

AG S M 2340--Pesticide Application Equipment (3).Principles of pesticide application; sprayer hydraulics and spray atomization; calibration, mixing calculations and compatibility of tank mixes; personal and environmental protection; pesticide labels and regulations.

AG S M 2360--Mobile Hydraulics (3).Basic power hydraulic theory. Hydraulic systems, components and circuits. Prerequisite: MATH 1120; sophomore standing. Math reasoning proficiency course.

AG S M 3350--Problems in Agricultural Systems Management (1-5).Supervised independent study at the undergraduate level. Prerequisite: instructor's consent.

AG S M 4020--Agricultural Safety and Health (3).Analysis, organization and implementation of agriculture safety and health programs. Physical and economic impacts of accidents, standards and liabilities. Role of man in the man-machine system. Prerequisite: junior or senior standing or instructor's consent.

AG S M 4120--Advanced Agricultural/Industrial Materials and Processes (2-3).

Primarily for students majoring in agricultural education. Applies shop principles to the design and construction of projects. Prerequisite: instructor's consent.

AG S M 4140--Electricity: Wiring and Equipment (3).Home and agricultural electricity; emphasis on proper selection and use of electrical wiring materials and equipment. Basic electrical theory. Prerequisite: junior standing.

AG S M 4220--Material Handling and Conditioning (3).Principles required for processing and handling food and feed materials; selection of machines; analysis and development of systems for processing and handling grain. Prerequisite: MATH 1120, junior standing.

AG S M 4320--Agricultural Equipment and Machinery (3).Operation of agricultural machinery. Selection and management of equipment. Prerequisite: AG S M 1040 and junior standing.

AG S M 4350--Problems in Agricultural Systems Management (1-5).Supervised independent study at the undergraduate level. Prerequisite: instructor's consent.

AG S M 4360--Precision Agriculture Science and Technology (3).(same as Plant Science 4360 and Soil Science 4360). Precision agriculture is an information-based approach to farming whereby variability is managed to optimize crop production and reduce environmental pollution. This course provides an overview of precision agriculture technologies (like GIS, GPS, remote sensing), mapping methods, and case studies illustrating decisions and management. Prerequisites: SOILS 2100, PLNT S 2110 or instructor's consent.

AG S M 4370--In-Service Course AG S M.-Farm Power and Machinery (1-8).A. Farm Power and Machinery B. Farm Buildings and Conveniences C. Soil and Water Management D. Rural Electrification and Processing E. Agricultural Construction and Maintenance Basic principles relating to agricultural systems management. Applies principles and subject matter in successful classroom presentation at the high school level. Prerequisites: 10 credits from AG S M courses; a B.S. degree in Agriculture or instructor's consent.

AG S M 4420--Surface Water Management (3).Topics include hydrology; soil erosion precautions; elementary surveying; selection and layout of ponds, terraces and water control structures. Prerequisites: MATH 1120 and junior standing.

AG S M 4440--Water Quality and Pollution Control (3).Applies scientific principles to a variety of water quality problems arising from activities associated with nonpoint pollution, agricultural chemicals, land disposal of wastes, on-site sewage disposal and individual drinking water systems. Prerequisites: MATH 1120, and junior standing.

AG S M 4460--Irrigation and Drainage (3).Soil, water, plant relationships. Selection and layout of irrigation and drainage systems. Prerequisites: AG S M 4420 or instructor's consent.

AG S M 4940--Agricultural Systems Management Internship (2-5).Problem course following prior approved internship work experience. Problem selected by internship company representative, faculty problem advisor and student. Supervised by faculty problem advisor and presented in technical report form.

AG S M 4970--Agricultural Systems Management - Capstone (3).Capstone course required of Agricultural Systems Management majors. Team project involving extensive use of the students education and requiring comprehensive written and oral reports are required. The course includes selection, replacement and cost calculation of machine systems; an introduction to linear programming project scheduling; and an introduction to maintenance management techniques. Prerequisites: senior standing. optimize crop production and reduce environmental pollution. This course provides an overview of precision agriculture technologies (like GIS, GPS, remote sensing), mapping methods, and case studies illustrating decisions and management. Prerequisites: SOILS 2100, PLNT S 2110 or instructor's consent.

RESIDENT INSTRUCTION INSTRUCTOR D. Fen-

newald, M. Jennings, D. J. Kemp, T. Strauch

Animal sciences is a broad field centered on the study of agriculturally important animals and their products. Graduates in animal sciences have employment opportunities in many areas including agribusiness (feed, pharmaceutical and meat industries; dairy and poultry products; public relations and research), production and management (farming/ranching; managers of livestock and poultry operations; zookeepers; consultants and technical service representatives), governmental agencies (USDA and MDA) and educational institutions (extension, teaching and research).

Students seeking admission into graduate and professional schools usually take more courses in the sciences than students in production and management, who select more business-related courses. Students and their faculty advisers select those courses that fit the students' needs, interests and objectives. The most specialization occurs at the graduate level.

The department offers BS, MS and PhD degrees with majors in Animal Sciences. A minor is also available.

Major Program Requirements – Animal Sciences

In addition to University, college and degree requirements, students must complete the following: (For university General Education requirements, see page 33-34)

Major core requirements	42-45
Communications	9
COMMUN 1200	
Or AG ED 2220.....	3
ENGLISH 1000	3
Elective	3

Departmental Honors Program

In addition to the guidelines for the honors program in the College of Agriculture, Food and Natural Resources, students must meet the following requirements for the honors program in animal sciences. A student must be a junior or senior to participate in the honors program.

Successful completion of either an internship or undergraduate research or a combination of both for 6 credits in animal sciences honors

Program approval by a three-member departmental honors committee

Submission of a written report plus an oral or poster presentation

Minor in Animal Sciences

To earn a minor in animal sciences, a student must meet the following requirements.

A minimum of 15 credits in animal sciences

A minimum of 9 credits in animal sciences courses numbered 3000 or above.

A maximum of 6 hours of transfer credit will be accepted as less than 3000 level.

Students may select any combination of animal sciences courses excluding problems and internships to meet the above requirements. All students are expected to meet prerequisites of animal sciences courses.

Ag Scholars Program

This program provides early assurance of admission to the MU College of Veterinary Medicine for selected animal science majors on the University of Missouri campus.

High School seniors and MU freshman with an ACT composite score of 27 or more or an equivalent SAT score are eligible for the Ag Scholars Program.

Students must have demonstrated experience or interest in livestock production and health. Examples of appropriate experience may include participation in a livestock enterprise as either a family member or an employee; enrollment in at least two years of high school agricultural coursework; and participation in FFA, 4H or equivalent organizations with projects directly related to livestock production or health. Students who do not meet the standards of demonstrated experience or interest will be admitted if they agree to complete an internship in the summer between their freshman and sophomore years. This internship must entail at least 250 hours of supervised experience in livestock production or a livestock health enterprise.

For additional information, contact
Preveterinary Medical Scholars and Ag Scholars Programs
W-203 Veterinary Medicine Bldg.
College of Veterinary Medicine

Equine Minor

MU students majoring in Animal Sciences can take equestrian science courses at Stephens College to obtain an Equestrian Science Minor.

Captive Wild Animal Management Minor

Students majoring in Animal Science can obtain a minor in captive wild animal management by taking courses in Animal Science, Natural Resources, and Fisheries & Wildlife that focus on captive wild animals.

Agreement with the College of Veterinary Medicine

The Division of Animal Sciences and the College of Veterinary Medicine have an articulation agreement which enables MU Animal Science majors who are admitted to the College of Veterinary Medicine before completing their B.S. degree to earn a B.S. degree in Animal Sciences during their days as a professional veterinary medicine student. In order to earn a B.S. degree in Animal Sciences the following requirements must be met:

- The student will successfully meet all General Education requirements established by the University of Missouri campus.
- The student will meet any additional college or divisional requirements.
- The student will be required to complete all MU Animal Sciences requirements except for 12 hours of Animal Science Senior electives.
- The student will also be able to substitute up to 20 hours completed in the College of Veterinary Medicine in lieu of general electives in order to complete the total number of student credit hours necessary for a B.S. degree in Animal Sciences.

ANIMAL SCIENCE COURSES

AN SCI --1001Topics in Animal Science (1-4). Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged. Prerequisite: department consent.

AN SCI 1011--Animal Science (3). Principles of animal science including importance of animal agriculture, genetics, anatomy, physiology and nutrition.

AN SCI 1012--Introduction to Captive Wild Animal Management (3). (same as F_W 1012). General introduction to housing, husbandry, behavior, genetics, nutrition, reproduction, animal health, and disease control of native and exotic species in zoological parks and other animal conservation facilities; emphasizes the role of captive animals in wildlife conservation. Graded on A/F basis only.

AN SCI 1065--Animal Science Laboratory Practicum (2). An introductory course in skill related to the care and management of livestock and poultry plus a section dealing with meats and a section dealing with research methods. Students will be expected to participate in hands-on learning development of fundamental skills and animal husbandry. This class will include one 3 hour lab and 1 hour RSD per week.

AN SCI 2001--Topics in Animal Science (1-4). Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged. Prerequisite: departmental consent.

AN SCI 2085--Problems in Animal Science (1-5). Library and laboratory study of as-

signed problems in animal breeding, nutrition, physiology or production and management. Planning, conduction and reporting to be in consultation with instructor. Prerequisite: instructor's consent.

AN SCI 2095--Equine Behavior and Training (3). Students learn the psychology and ethology of equine behavior and how it relates to training. The use and proper fitting of equipment is taught and students learn to teach horses to perform the basic movements needed prior to advancing to specialized training. Prerequisite: AN SCI 1065 and instructor's consent

AN SCI 2110--Global Animal Agriculture (2). Animal Agriculture as influenced globally by political, religious cultural, economic and climatic factors. Prerequisite: sophomore standing.

AN SCI 2111--Sophomore Seminar: Societal Issues Facing Animal Agriculture (3). Course designed to introduce students to key issues facing animal agriculture. Assignments focus on reading current publications associated with issues affecting the animal agriculture industry. Prerequisites: ENGLSH 1000. Graded on A/F basis only.

AN SCI 2114--Live Animal and Meat Evaluation (3). (same as Food Science 2114). The composition and quality meat produced from food animals is the driving component of livestock economic value. This course will teach the principles and procedures involved in evaluation, grading, selection, and economic value of meat animals and poultry and the carcasses they produce. This course is an excellent introduction and (or) prerequisite for all livestock production courses and will provide a baseline of information for students interested

in livestock or meat judging.

AN SCI 2115--Livestock Judging (3). Comparative judging and evaluation; various classes of farm animals; particular reference to utility. Reference reading; illustrated lectures. Prerequisites: AN SCI 1065.

AN SCI 2135--Horse Selection and Evaluation (2). Techniques of selecting and evaluating horses based on conformation and performance characteristics. Effects of conformation on soundness. Includes learning to organize observations on the relative merits of a group of horses into an oral presentation. Prerequisite: AN SCI 1065.

AN SCI 2140--Companion Animals (3). (same as BIOMED 2140). Focus on companion dog, cat, and horse owners concerns re: health zoonoses, legal responsibilities, inbreeding, choice of breeds, behavioral problems and loss of companion animals. Prerequisite: sophomore standing.

AN SCI 2165--Introduction to Ruminant Livestock Production (3). This is an introductory theory course which provides fundamental understanding of ruminant livestock - beef cattle and dairy cattle, production, management and associate industries. Prerequisite: AN SCI 1065. Graded on A/F basis only.

AN SCI 2175--Introduction to Monogastric Production (3). Introductory course which provides fundamental understanding of hogs, horses and poultry. Prerequisite: AN SCI 1065. Graded on A/F basis only.

AN SCI 3001--Topics in Animal Science (1-4). Various courses offered on a preliminary basis to determine need for such offering prior

to submission as a numbered course. Various topics, credit arranged. Prerequisite: department consent.

AN SCI 3085--Problems in Animal Science (1-6).Current problems in animal breeding, nutrition, livestock production and management, meats. Assigned topics. In some cases student may undertake a project by outlining objectives, planning work, keeping records and summarizing results in written report. Prerequisite: instructor's consent. Some sections may be graded either on S/U or A/F basis only.

AN SCI 3212--Principles of Animal Nutrition (2).The purpose of this course is to teach students the essential nutrients for animal life and to understand the basic principles of nutrition. Prerequisites: 1 course in biochemistry or at least 4 hours of chemistry and Math 1100 or equivalent; Fall semester; A/F grading.

AN SCI 3213--Genetics of Agricultural Plants and Animals (2-3).(same as Plant Science 3213). Concepts of molecular, transmission, and population and quantitative genetics. Special emphasis given to breeding and biotechnological applications in plant and animal agriculture. Prerequisites: BIOSC 1010, 1020 or 1500, MATH 1100.

AN SCI 3214--Principles of Meat Science (3).(same as Food Science 3214). Study of the principles involved in the conversion of living animals to meat and by-products; efficient utilization of meat as a food. Laboratory stresses the application of scientific principles in the meat industry. Prerequisite: one course in Biology.

AN SCI 3231--Principles of Dairy Foods Science (3).(same as Food Science 3231). Technology, chemistry and microbiology related to milk and its transformation into fluid milk products, fermented dairy foods and spreads. (2 hours of lecture and two hours of laboratory per week.) Prerequisite: organic chemistry.

AN SCI 3232--Animal Feeds and Feeding (3).Description of feed ingredients, formulation of diets, and animal feeding management. Prerequisites: AN_SCI 3212; MATH 1100 or equivalent.

AN SCI 3254--Physiology of Domestic Animals (3).Basic concepts of physiology and anatomy as related to domestic animals. Prerequisites: BIO SC 1010 and 1020 or 1500; CHEM 1310 and 1320.

AN SCI 3255--Physiology of Domestic Animals Laboratory (2).This laboratory course covers the basic concepts of physiology as related to domestic animals. Prerequisites: BIO_SC 1010 and 1020 or 1500; CHEM 1310 and 1320; AN_SCI 3254 or equivalent.

AN SCI 3275--Meat Animal Evaluation (2).Meat animal evaluation highlights the relationships and limitations that exist when evaluating market and breeding animals and develops an appreciation for carcass excellence as it relates to production, merchandising and consumption. Some travel time and commitments will be necessary. Prerequisites: ANSCI 2114 and 2115.

AN SCI 4001--Topics in Animal Science (1-4).Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged. Prerequisite: instructor's consent.

AN SCI 4304--Processing Muscle Foods (3).(same as F_S 4304). Materials and technologies for the manufacture of muscle food products from red meats, poultry and seafood. Experience problem-solving through further processing of complex ingredients and develop skills by practicing operations in a pilot plant facility. Prerequisites: One Chemistry course.

AN SCI 4312--Monogastric Nutrition (3).(same as Nutrition 7020 and Nutrition Science 4020). Principles of nutrition, feed formulation and recent research in poultry feeding. Prerequisites: AN SCI 3212. Graded on A/F basis only.

AN SCI 4314--Physiology of Reproduction (3).Principles of animal reproduction with emphasis on endocrine control of reproductive processes. Prerequisites: AN SCI 3254 and BIO SC 1500 or equivalent; or AN SCI 3254 as a co-requisite and instructor's consent.

AN SCI 4323--Applied Livestock Genetics (2).Genetic principles applied to improvement of farm animals. Covers selection, prediction of genetic merit and mating systems. Prerequisite: BIO SC 1010, 1020 or 1500 and MATH 1100. Math Reasoning Proficiency Course.

AN SCI 4332--Ruminant Nutrition (3).Physiology, chemistry, microbiology and pathology of ruminants. Emphasizes the digestion, absorption, metabolism and utilization of nutrients. Prerequisites: AN SCI 3212.

AN SCI 4354--Physiology and Biochemistry of Muscle as Food (3).(same as Food Science 4354). Basic concepts in muscle growth and development of livestock evaluating the effects of environment, welfare, nutrition and genetics regarding muscle metabolism, physiology, and the ultimate condition of muscle as food. Prerequisite: BIO SC 1010 or equivalent or ANSCI 3214 or instructor's consent.

AN SCI 4384--Reproductive Management (3).Reproductive management of cattle, swine and sheep; estrous synchronization; artificial insemination; embryo development and transfer; assisted reproductive technologies. Prerequisites: senior standing and AN SCI 4314 and instructor's consent.

AN SCI 4387--Equine Breeding Management (3).Focuses on practical applications of reproductive management techniques and breeding in the horse. Topics include stallion collection and evaluation, artificial insemination, interpreting ultrasound images, teasing, parturition, and foal care. Students will gain hands-on experience in each of these areas. Prerequisite: AN_SCI 2175 and 4314; instructor's consent.

AN SCI 4437--Environmental Physiology (3).Principles of environmental physiology and animal adaptation with emphasis on mechanisms of temperature regulation and related nutritional and metabolic-hormonal functions. Prerequisite: AN SCI 3254 or equivalent.

AN SCI 4940--Internship in Animal Science & Technology (cr.arr.).Off-campus training to develop technical skills and understanding of an area of animal science. Written reports required. Prerequisites: instructor's consent. Graded on an S/U basis only.

ANSCI 4975--Beef Production and Management (3).Systems of beef production: breeding, feeding, management of commercial and purebred beef cattle. Prerequisites: AN SCI

1065, 2165 and 3212 or instructor's consent.

AN SCI 4976--Advanced Dairy Production (3).Applied dairy science; emphasis on nutrition and management; herd health, labor-saving equipment, buildings, quality products, organization of dairy enterprise, business and economic aspects. Prerequisites: ANSCI 1065, 2165 and 3212 or instructor's consent.

AN SCI 4977--Horse Production (3).Systems of horse production: breeding, feeding and management of horses. Prerequisites: AN SCI 1065, 2175 and 3212 or instructor's consent.

AN SCI 4978--Swine Production (3).Systems of pork production: breeding, feeding, management of commercial and purebred swine. Prerequisites: AN SCI 1065, 2175 and 3212 or instructor's consent.

AN SCI 4979--Poultry Production (3).Principles of housing systems, nutrition, management, business and production of commercial chickens and turkeys. Prerequisites: AN SCI 1065, 2175 and 3212 or instructor's consent.

A course of study in the Department of Biochemistry emphasizes the application of chemical principles to biological systems and leads to the Bachelor of Science in Biochemistry. The program requires rigorous course work in the basic sciences, culminating with the biochemistry lecture and laboratory sequence. Students are encouraged to gain research experience through independent projects in faculty labs. The biochemistry degree prepares students for further study in graduate or professional school or for a career in biochemistry, biotechnology or the biological, chemical or medical sciences.

Major Program Requirements - Biochemistry

In addition to university general education and graduation requirements, the department requires the following courses.

Major core requirements

Biochemistry	17
BIOCHM 1090: Introduction to Biochemistry	3
BIOCHM 4270: Biochemistry I.....	3
BIOCHM 4272: Biochemistry II	3
BIOCHM 4300: Physical Chemistry of Biological Systems..	3
BIOCHM 4974: Biochemistry Laboratory.....	4
BIOCHM 4970: Senior Seminar in Biochemistry	1
Biology	9

BIO SC 1500: Introduction to Biological Systems with Laboratory	5
BIO SC 2200: General Genetics	4
AN SCI 3213: Genetics of Agricultural Plants and Animals (3) OR PLNT S 3213: Genetics of Agricultural Plants and Animals (3)	20
Chemistry	20
CHEM 1310: General Chemistry I	2
CHEM 1320: General Chemistry II With Lab	3
CHEM 1330: General Chemistry III With Lab	3
CHEM 2100: Organic Chemistry I	3
CHEM 2110: Organic Chemistry II	3
CHEM 2130: Organic Lab I.....	2
CHEM 3200: Quantitative Methods Analysis With Lab.....	4
Mathematics	10
MATH 1500: Calculus I	5
MATH 1700: Calculus II	5
Physics	8
PHYSICS 1210: College Physics I AND	4
PHYSICS 1220: College Physics II	4
Advanced science (biochemistry, biology and chemistry).	9
Science courses numbered 2000 or above that are not used to fulfill other requirements; typically chosen from animal science, biochemistry, biology, chemical engineering, food science, chemistry, microbiology, nutrition, pharmacology, physiology or plant science (other courses may be accepted)

BIOCHEMISTRY COURSES

BIOCHM 1090--Introduction to Biochemistry (3).Fundamental concepts in biochemistry and molecular biology: structure function relationships, reactivity, thermodynamics, gene expression. Professional skills for biomedical careers. Primarily for freshman and sophomore biochemistry majors. Prerequisite: departmental consent.

BIOCHM 1094--Introductory Biochemistry Laboratory (2).Techniques course involving analytical experiments with carbohydrates, lipids, proteins, nucleic acids; use of instrumentation in biochemistry; purification and kinetics of enzymes, PCR and cloning. Prerequisites: concurrent enrollment in BIOCHM 1090 required. Graded on A/F basis only. Departmental Consent Required.

BIOCHM 2002--Topics in Biochemistry - Biological/Physical/Mathematics (1-4).Initial offering of a course in Biochemistry designed primarily for undergraduates.

BIOCHM 2110--The Living World: Molecular Scale (3).Survey of modern biochemistry and biotechnology. Structure and function of DNA, proteins, lipids and carbohydrates. The role of biopolymers in life processes and everyday living is emphasized.

BIOCHM 2112--Biotechnology in Society (3).Biotechnology in a social context covers three areas: introduction to terminology and concepts, specific biotechnological applications to modern problems, and ethical questions.

BIOCHM 3630--General Biochemistry (3).Survey of biochemistry; static/dynamic aspects of carbohydrates, lipids, proteins, nucleic acid. Discussion of metabolic pathways, energy production, and metabolic regulatory mechanism. Prerequisites: CHEM 2050.

BIOCHM 4001--Topics in Biochemistry (cr. arr.).Experimental courses; highly specialized topics taught infrequently or courses taught by visiting professors.

BIOCHM 4270--Biochemistry (3).First semester of comprehensive biochemistry course: metabolic pathways, amino acids/proteins, carbohydrates, lipids, nucleic acids, kinetics, energy requirements, metabolic regulation in living cells. Prerequisites: CHEM 2110.

BIOCHM 4272--Biochemistry (3).Second semester of a comprehensive biochemistry course, including metabolism of carbohydrates, fatty acids, steroids, amino acid synthesis and metabolism, molecular genetics, hormones, photosynthesis and integrated metabolism. Prerequisite: BIOCHM 4270.

BIOCHM 4300--Physical Chemistry of Biological Systems (3).To present fundamental principles of physical chemistry in the context of the structure and function of biological macromolecules. Prerequisite: Biochemistry 4270 or concurrent enrollment. Graded on A/F basis only.

BIOCHM 4374--Molecular Biology Laboratory (3).(same as Biological Sciences 4974). Emphasizes recently developed genetic and biochemical techniques; illustrates how they apply to contemporary problems in biological

research. Prerequisites: BIO SC 2200 and BIOCHM 4270 or concurrent enrollment in BIO SC 4976.

BIOCHM 4376--Computer Assisted Sequence Analysis and Molecular Modeling (3).Employs the use of computer-based interactive molecular graphics and sequence analysis software to analyze the three dimensional structures of macromolecules. Prerequisites: CHEM 2110.

BIOCHM 4385--Problems in Biochemistry (1-3).Problems in Biochemistry

BIOCHM 4460--CANCER BIOLOGY (3).(same as BIO_SC 4460). Cancer, cell biology, genetics, biochemistry. Prerequisites: BIOCHM 4272, Cell Biology 2300, Genetics 2200.

BIOCHM 4950--Undergraduate Research in Biochemistry (2-3).Individually directed laboratory research for upperclass students under faculty supervision.

BIOCHM 4970--Senior Seminar in Biochemistry (1).Discuss journal papers dealing with current topics of research, techniques, status of field, importance of results. Students report on completed undergraduate research projects.

BIOCHM 4974--Biochemistry Laboratory (4).Techniques course involving analytical experiments with carbohydrates, lipids, proteins, nucleic acids; use of instrumentation in biochemistry; purification and kinetics of enzymes. Prerequisites: BIOCHM 4270.

BIOCHM 4996--Honors Research in Biochemistry (2-3).Laboratory research for upper level honors students in consultation with Biochemistry faculty.

FOOD SCIENCE AND NUTRITION PROGRAM

Typical employment areas for graduates of food and hospitality systems include quality assurance, quality control, product development, sensory science and flavor chemistry. The food science curriculum meets the standards established by the Institute of Food Technologists.

The department offers the Bachelor of Science degree with a major in Food Science and Nutrition. A minor is available.

Major Program Requirements - Food Science and Nutrition

Major core requirements

Biological and physical sciences	22
General chemistry and laboratory	5-6
Physics	3-4
Math and statistics	9-12
Calculus	3-5

Social and behavioral sciences	9
Microeconomics	3
Macroeconomics	3
HIST 1100 or 1200 or POL SC 1100 or 2100	
Food science	39

HOTEL AND RESTAURANT MANAGEMENT PROGRAM

The curriculum leading to the BS with a major in Hotel and Restaurant Management educates students for management careers in the hospitality field. The mission of the HRM program is to develop students to be responsible citizens and successful, ethical hospitality leaders in today's global community. A minor is also available.

The HRM program has a food-service facility that houses demonstration, basic foods and state-of-the-art commercial kitchens. The facility also offers a multi-purpose room, a 20-seat conference room, a lobby area of 1,000 square feet, two classrooms and a library equipped with computers for student use.

Major Program Requirements - Hotel and Restaurant Management

To meet the needs of the industry and provide sound academic education at the undergraduate level, the curriculum emphasizes important areas of learning including general and professional education. All requirements listed below are in addition to University and college requirements, including University general education.

Major core requirements

Minimum of 50 credits 2000 or above, of which at least 24 credits must be numbered 3000 or above

Minimum of 32 credits in courses in the College of Agriculture, Food and Natural Resources, with 2.0 overall GPA and a C- or better in courses required for the major

Minor in Hotel and Restaurant Management

A minor in hotel and restaurant management may be earned by completing:

Minor Course Requirements:

- HRM 1043 - Introduction to the Hotel and Restaurant Industry
- HRM 3143 - Hotel Operations and Management(prerequisite: HRM 1043, 1995)
- HRM 3153 - Food Service Operations Management (prerequisite: HRM 1043, 1995, and ACCTCY 2036)
- HRM 4243 - Strategic Management for Hotels & Restaurants (prerequisites: HRM 3143, 3153, and ACCTCY 2036)
- HRM 3253 - Hotel & Restaurant Human Resources Management (prerequisites: HRM 1043, Introduction to Psychology, Sociology or Instructor's Consent)
- HRM 3273 - Hotel & Restaurant Sales & Marketing Management (prerequisites: MRKTNG 3000 and economics)

FOOD SCIENCE COURSES

F S 1010--Introduction to Viticulture and Enology (1).This course will give a general overview of growing grapes (viticulture) and winemaking (enology) with an emphasis on Missouri wines and wineries. This course is the first course in a sequence of courses in the viticulture and enology option of the food science degree program.

F S 1030--Food Science and Nutrition (3). Basic principles of science and technology as applied to the problem of providing safe, nutritious, and desirable food for man. f,w.

F S 2114--Meat Classification, Grading and Judging (3).(same as Animal Science 2114). The composition and quality meat produced from food animals is the driving component of livestock economic value. This course will teach the principles and procedures involved in evaluation, grading, selection, and economic value of meat animals and poultry and the carcasses they produce. This course is an excellent introduction and (or) prerequisite for all livestock production courses and will provide a baseline of information for students interested in livestock or meat judging.

F S 2131--Dairy Products Evaluation (2). (same as Animal Science 2131). Sensory Evaluation and judging of dairy products.

F S 2172--Elements of Food Microbiology (3). Basic course stressing principles of microbiology applied to foods.

F S 2195--Grapes and Wines of the World (1).(same as Plant Science 2195). Reviews historical development of the wine industry and associated development of the grape industry, the wine making process, the various types of wine product, wine-producing regions of the world, various classification schemes and quality components.

F S 2199--Seminar in Professional Development (1).Readings and discussion related to professional development for the industry. Prerequisites: sophomore standing.

F S 3214--Principles of Meat Science (3). (same as Animal Science 3214). Study of the principles involved in the conversion of living animals to meat and by-products; efficient utilization of meat as a food. Laboratory stresses the application of scientific principles in the meat industry. Prerequisite: one course in Biological Sciences.

F S 3231--Principles of Dairy Foods Science (3).(same as Animal Science 3231). Technology, chemistry and microbiology related to milk and its transformation into fluid milk products, fermented dairy foods and spreads. (2 hours of lecture and two hours of laboratory per week.) Prerequisite: One course in Chemistry or Biological Sciences.

F S 3250--Physical Principles for Food Processing (3).Introduction to basic engineering concepts used to process raw materials. Energy balance. Pipe flow. Viscosity, Heat exchange. Refrigeration. Prerequisites: one calculus course and one physics course.

F S 3385--Problems in Food Science (cr. arr.).Supervised study in a specialized phase of food science and nutrition.

F S 4199--Food Industry Senior Seminar (1).The course explores the structure and the various branches of the food industry. Emphasis is placed on industry trends and the manufacture of specific selected food products and their ingredients. Prerequisite: F_S 1030 or equivalent, F_S 2199 or equivalent; junior or senior standing. Graded on A/F basis only

F S 4301--Topics in Food Science (cr. arr.).Instruction in specific subject matter areas in the field of food science and nutrition.

F S 4310--Food Chemistry and Analysis (4). Structure, composition and chemical properties of food. Prerequisite: 5 hours Chemistry or Biochemistry.

F S 4315--Food Chemistry and Analysis Laboratory (3).The quantitative determination of the constituents of food. Prerequisites: F S 4310 or concurrent enrollment.

F S 4330--Principles of Food Processing (4).Basic principles of food processing, with emphasis on blanching, pasteurization, commercial sterilization, refrigeration, freezing, concentration, dehydration and packing. Impacts of processing on product quality are evaluated.

F S 4344--Processing Muscle Foods (3).(same as AN_SCI 4304). Materials and technologies for the manufacture of muscle food products from red meats, poultry and seafood. Experience problem-solving through further processing of complex ingredients and develop skills by practicing operations in a pilot plant facility. Prerequisites: One Chemistry course.

F S 4354--Physiology and Biochemistry of Muscle as Food (3).(same as Animal Science 4354). Basic concepts in muscle growth and development of livestock evaluating the effects of environment, welfare, nutrition and genetics regarding muscle metabolism, physiology, and the ultimate condition of muscle as food. Prerequisite: BIO SC 1010 or equivalent or F S 3214 or instructor's consent.

F S 4370--Food Microbiology (3).Study of bacteria, yeast and molds. Includes dominant flora, public health significance, characterization of organisms, examination of foods representative of major food groups, spoilage, preservation, food fermentations and physiological groups. Prerequisites: F S 2172 and one Biochemistry course or concurrent enrollment.

FS 4375--Food Microbiology Laboratory (2). Examination of foods for microorganisms and characterization of major species. Prerequisite: F S 4370 or concurrent enrollment.

F S 4380--Sensory Analysis of Food (4). Principles, theory, methodology of sensory analysis. Recommended: one statistics course.

F S 4385--Problems in Food Science (cr.

arr.).Advanced problems in a selected field of food science and nutrition.

FS4940--Field Training (cr.arr.).Prerequisites: junior or senior standing and instructor's consent.

F S 4941--Internship in Food Science (1-6). Combines study, observation and employment in an area of food science and nutrition. Written reports, faculty evaluation. Prerequisites: one Food Science course and instructor's consent.

F S 4970--Food Product Development (3). Capstone course integrating the various disciplines of food science to create new food products. Prerequisites: ENGLSH 1000 and instructor's consent.

F S 4980--Food Quality Assurance (3). Capstone course integrating various food science disciplines to comply with regulations concerned with protection of the nation's food supply. Applies practices to insure consumers of healthful foods. Prerequisites: ENGLSH 1000, senior standing and instructor's consent.

products. Prerequisites: ENGLSH 1000 and instructor's consent.

HOTEL AND RESTAURANT MANAGEMENT COURSES

H R M 1043--Introduction to the Hotel and Restaurant Industry (3).A basic course in hotel and restaurant management operations. Review development of the industry, current trends and an analysis of the various types of operations in the hospitality industry.

H R M 1133--Hospitality Law (3).Law as it relates to the hotel/restaurant trade; theories of recovery/liability; lawsuits and their prevention; familiarization with legal arguments, lawyers, litigation and threats of litigation.

H R M 1723--Private Club Management and Operation (3).Clubs as a legal entity. Organizational structure, creed, charter, and by-laws; athletic activities, master and club calendars; food and beverage departments, budgets, taxes, and the future of clubs are discussed. Field trips to local area clubs are planned. Prerequisite: H R M 1043.

H R M 1991--Food Service Sanitation Management (1).Basic principles of food service sanitation safety. Meets Standards for National Sanitation Certification.. Graded on S/U basis only.

HRM1995--Culinary Fundamentals (3).Basic principles of food purchasing and selection, scientific principals and culinary fundamentals of food products in commercial food service operations. Prerequisite: H_R_M 1991.

H R M 2123--Food Service Operational Fundamentals (2).A basic training and directed work experience in selected entry-level positions, allowing students to develop skills sets in service, point of sale systems, food production, inventory and storage, performance evaluation, professionalism, and positive work relations in both the "Front" and "Back of House". Prerequisites: H_R_M 1043, 1991, 1995; concurrent enrollment with H_R_M 2143.

H R M 2143--Introduction to Food Production and Service Fundamental (2).This course provides students with information on the basic principles of effective food production and service management. The primary focus is on

service management, menu planning, development and maintenance of quality standards throughout the food manufacturing cycle, and determination of recipe and total food costs. Prerequisites: H_R_M 1043, 199101995; concurrent enrollment with H_R_M 2123.

HRM2385--Problems in Hotel and Restaurant Management (cr.arr.).Supervised study in a specialized phase of hotel and restaurant management. Prerequisite: H R M major and departmental consent.

HRM2401--Topics in Hotel and Restaurant Management (cr.arr.).Instruction in specific subject matter areas in the field of hotel and restaurant management.

H R M 3153--Food Service Operations Management (3).In-depth study of management of systems/techniques utilized to control food, beverage and labor costs in hospitality industry with emphasis on computer applications/problems solving. Prerequisites: H R M 1043, 1995 and ACCTCY 2036.

H R M 3193--Hotel Organization and Structure (3).Analysis of the operating and functional departments in a modern hotel and the study of the interrelationships among the departments; five-day off-campus seminar. Prerequisites: H R M 1043 and 3143 and instructor's consent

H R M 3233--Professional Beverage Management (3).Given the hospitality industry's reliance on beverage revenues, there is a need for a course covering legal aspects/responsibility of serving alcoholic/non-alcoholic beverages; management control; pairing of food and beverages. Prerequisite: H R M 1043.

H R M 3253--Hotel and Restaurant Human Resources Management (3).Recruitment, training, management of personnel required for operations of hotels and restaurants at all employment levels. Prerequisite: H R M 1043, Introduction to Psychology, Sociology or instructor's consent.

H R M 3273--Hotel & Restaurant Sales & Marketing Management (3).Marketing of hospitality services: human factors, consumer demand, planning, professional considerations. Promotional methods: advertising, direct mail, outside/"in-house" selling, merchandising, pricing, public relations, sales promotion. Prerequisites: MRKTNG 3000 and ECONOM.

HRM3343--Hotel Operations and Management (3).An in-depth study of management processes in non-food functions of hotels. Prerequisites: H R M 1043 and 1995.

HRM3353--Hotel Finance Management (3). This is a finance management course designed for students who may pursue a management career in the hotel industry. Prerequisites: HRM 1043, 3343.

HRM3385--Problems in Hotel and Restaurant Management (cr.arr.).Advanced problems in a selected field of hotel and restaurant management. Prerequisite: HRM major, junior standing and departmental consent.

HRM3401--Topics in Hotel and Restaurant Management (cr.arr.).Instruction in specific subject matter areas in the field of hotel and restaurant management.

H R M 3410--Conference and Meeting Management (3).An overview of convention

and meeting planning to include group business market, the role of the event planner, the various techniques and services used to meet their needs, and technology used in the convention and meeting industry. Prerequisite: H_R_M 1043; instructor's consent.

H R M 3415--Current Issues in Meeting and Event Management (1).A 1-credit guest speaker lecture class which provides a variety of professional topics for students who focus on convention and event management area. Prerequisite H_R_M 3410; instructor's consent.

H R M 3420--Destination Management (3). An overview of the optimal planning, development, and marketing of destination image and position in the context of the overall management plan. Prerequisites: H_R_M 1043; instructor's consent.

H R M 3777--Management of Gaming Operations (3).Exams the history and development of gaming operations including legal, economic and psychological forces.

H R M 4191--Seminar in Professional Development (1).Readings and discussion related to professional development for the industry. Prerequisites: senior standing.

HRM4243--Strategic Management for Hotels and Restaurants (3).Applies functions and tools of business management to the specialized operation of hotels and restaurants. Prerequisite: H R M 3143, 3153 and ACCTCY 2036

H R M 4353--International Hotel Management (3).This is an international hotel management course, which covers cultural aspects of hotel management, and current trends in the hotel management worldwide. Prerequisites: HRM 1043, 3343, and 3253.

H R M 4940--Field Training in Hotel & Restaurant Management (cr. arr.).Prerequisites: junior or senior standing and instructor's consent.

H R M 4941--Internship in Hotel and Restaurant Management (1-6).Combines study, observation and employment in an area of food science and nutrition. Written reports, faculty evaluation. Prerequisites: 90 hours completed and instructor's consent.

H R M 4963--Recent Trends in Hotel and Restaurant Management (1-2).For upper-class and graduate students who wish additional knowledge and understanding in specific subject matter areas.

H R M 4980--Special Events Management (3).An overview of managing special events to include event design feasibility studies, legal compliance, promotion, safety and security, logistic, staffing, financial control and technology. Prerequisite: instructor's consent.

H R M 4985--Commercial Food Production Management (5).Identifies and applies the skills necessary to plan, produce, and serve meals to customers in a commercial setting. Prerequisites: H R M 3153.

H R M 4994--Case Studies & Research in Hotel & Restaurant Management (3). Capstone course for HRM majors focusing on lodging management. Applies previously learned hospitality theories and principles to solving problems found in the lodging industry. Prerequisites: H R M 4243 and 3253

General Agriculture Degree Program

Bryan Garton, Interim Associate Dean, Academic Programs
Shari Freyeremuth, Interim Assistant Dean, Academic Programs

2-64 Agriculture Building
(573) 882-8301
www.cafnr.missouri.edu

FACULTY

See Listing for Faculty in areas of concentration.

The general agriculture degree program is for students searching for a well-rounded education that builds on the diversity of the other degree programs in the College of Agriculture, Food and Natural Resources (CAFNR). The flexibility of general agriculture degree enables students to tailor a program to fit their individual interests and career goals. Students earn a Bachelor of Science in General Agriculture.

Students choose general agriculture for a variety of reasons. Some may enter the program with a specific career goal in mind. Others may choose general agriculture to obtain a broader education that will give them more flexibility.

Major Program Requirements – General Agriculture

To complete the requirements for the General Agriculture degree, students must complete the general requirements for the College of Agriculture, Food and Natural Resources, as well as all University graduation requirements, including University general education requirements. These requirements include courses in communications, natural science and math, social science and humanities and business and economics. (See the general requirements for all BS degrees in College of Agriculture, Food and Natural Resources.)

- Students in general agriculture also must complete three areas of concentration from CAFNR programs that offer a major or a minor. The primary concentration area requires completion of 18 or more credits. Two additional concentration areas of at least 12 credits each are also required. (See below.)
- These courses shall not be used to fulfill the requirements of a minor.
- Within each concentration area, at least 50 percent of the credits must be earned on the MU campus.
- Credits used to meet the university general education requirements can be used to meet requirements in concentration areas.
- No more than 6 credits in the primary area and 3 credits in the secondary areas may consist of problems, readings, internships, travel courses and other non-structured courses.
- The capstone experience for general agriculture majors can be a capstone course in a concentration area, an internship or an international experience.
- Overall, a minimum of 42 credits must be taken in the College of Agriculture, Food and Natural Resources out of the total of 128 credits needed to satisfy degree requirements. Also, a minimum of 48 credits must be in courses numbered 2000 and above; minimum of 24 of the 48 credits must be in courses numbered 3000 and above.

Areas of Concentration

In addition to the university's general education requirements and the graduation requirements of the College of Agriculture, Food and Natural Resources, students must complete at least 18 credits in one of the following areas, and at least 12 credits in two additional areas. These include:

Agricultural Economics
Agricultural Education
Agricultural Journalism
Agricultural Leadership
Agricultural Systems Management
Animal Sciences
Biochemistry
Fisheries and Wildlife
Food Science and Nutrition
Forestry
Hotel and Restaurant Management
Natural Resources
Parks, Recreation and Tourism
Plant Sciences
Rural Sociology
Soil, Environmental, and Atmospheric Sciences
Sustainable Agriculture

Sustainable Agriculture Emphasis Area within General Agriculture:

CAFNR offers an emphasis area in Sustainable Agriculture as part of its General Agriculture degree program. A minimum of 42 credits is required for the emphasis area (major) degree. The emphasis area degree offers students the choice of two primary tracks: (1) Animal and Plant Production Systems Track, and (2) Community and Food Systems Track. Each includes a grouping of required credits as 18+12+12. (Note: Description of track does not show on transcript.)

Animal and Plant Production Systems Track.

**Emphasis Area Core Course Requirements18
15 credits selected from the following, plus 3 credits from an approved internship or international experience.**

1. BIO SC 1060 (3) - Basic Environmental Studies OR
SOIL 2100 (3) - Introduction to Soils
2. *Choose 2 courses*
AN SCI 1011 (3) - Intro to Animal Sciences
PLNT S 2110 (3) - Plant Growth and Culture
NAT R 1060 (3) - Ecology and Conservation of Living Resources OR
NAT R 1070 (3) - Ecology and Renewable Resource Management
3. RU SOC 2203 (3) - Topics in Rural Sociology
4. AG EC 3241 (3) - Ethical Issues in Agriculture

For each track, 3 credits from an approved internship or international experience must be completed.

This will serve as the student's Capstone experience. A "final product" should result from this experience. The particular form of that product will be agreed upon by the student and Sustainable Agriculture advisor. Note: In the future, a capstone seminar or course (e.g., "Farming Systems" course cross-listed among Rural Sociology, Agricultural Economics and Plant Sciences) may be developed at the 3000+ level to also satisfy this requirement.

12 credits - Core Track Courses

Students are required to select 4 from the following:

1. AN SCI 1065 (3) - Animal Science Laboratory

Practicum

2. PLNT S 2110 (3) - Plant Growth and Culture OR
BIO SC 1200 - General Botany with Lab
3. SOIL 2100 (3) - Introduction to Soils OR
BIO SC 1060 (3) - Basic Environmental Studies
4. AG EC 2070 (3) - Environmental Economics and Policy

12 credits - Electives selected from the list below. A minimum of 9 credit hours in regular courses must be selected from one disciplinary area.

AG EC 2070 - Environmental Economics and Policy
AG EC 2183 - The Agricultural Marketing Systems
AG EC 3224 - New Products Marketing
AG EC 3260 - General Farm Management
AG EC 4962 - Planning the Farm Business
AG S M 4220 - Material Handling and Conditioning
AG S M 4440 - Water Quality and Pollution Control
AG S M 4420 - Surface Water Management
AN SCI 2110 - Global Animal Agriculture
AN SCI 2165 - Introduction to Ruminant Livestock Production
AN SCI 2175 - Introduction to Monogastric Production
AN SCI 3212 - Principles of Animal Nutrition
BIOCHM 2112 - Biotechnology in Society
BIOCHM 2110 - The Living World: Molecular Scale
BIOL EN 3050 - Environmental Control for Biological Systems
BIOL EN 4150 - Soil and Water Conservation Engineering
BIO SC 3650 - General Ecology
BIO SC 3710 (or PLNT S 3710) - Introductory Entomology
BIO SC 3715 (or PLNT S 3715) - Insect Diversity
PLNT S 4730 - Insect Pest Management for Plant Protection
PLNT S 4740 - Biological Control of Insects
F W 3200 - Aquaculture
F W 3400 - Water Quality and Natural Resource Management
F W 3600 - Introduction to Conservation Biology
FOREST 2151 - Dendrology
FOREST 3212 - Forest Health and Protection
FOREST 4385 - Agroforestry I
FOREST 4390 - Watershed Management and Water Quality
GEOL 1200 - Environmental Geology with Lab
GEOL 2450 - Global Water Cycles
NAT R 1060 - Ecology and Conservation of Living Resources
NAT R 1070 - Ecology and Renewable Resource Management
NAT R 4353 - Natural Resources Policy/Administration
PLNTS 4500 - Theory and Concepts of Plant Pathology
PLNT S 4510 - Introductory Plant Pathology Lab
PLNT S 2075 - Horticulture Ecology
PLNT S 2120 - Plant Science Laboratory
PLNT S 3210 - Principles of Weed Science
PLNT S 3230 - Plant Propagation
PLNT S 3235 - Plant Environments
PLNT S 3260 - Greenhouse Management
PLNT S 3270 - Forage Crops
PLNT S 3275 - Grain Crops
SOIL 2106 - Soil Science Laboratory
SOIL 2110 - Introduction to Soil Science with Lab
SOIL 3290 - Soils and the Environment
SOIL 4308 - Soil Conservation
SOIL 4312 - Environmental Soil Microbiology
SOIL 4313 - Soil Fertility and Plant Nutrition
SOIL 4320 - Genesis of Soil Landscapes

Community and Food Systems Track

Emphasis Area Core Course Requirements 18

15 credits selected from the following:

1. BIO SC 1060 (3) - Basic Environmental Studies
OR SOIL Science 2100 (3) - Introduction to Soils
2. *(choose 2 courses)*
AN SCI 1011 (3) - Intro to Animal Sciences
PLNT S 2110 (3) - Plant Growth and Culture
NAT R 1060 (3) - Ecology and Conservation of Living Resources OR
NAT R 1070 (3) - Ecology and Renewable Resource Management
3. RU SOC 2203 (3) - Topics in Rural Sociology
4. AG EC 3241 (3) - Ethical Issues in Agriculture

12 credits - Core Track Courses

1. AG ED 2220 (3) - Verbal Communication in Agriculture, Food and Natural Resources OR AG JRN 3210 (3) - Fundamentals of Communication
2. AG ED 2250 (3) - Personal Leadership Development OR RU SOC 2010 (3) - Leadership in Today's World
3. AG EC 2070 (3) - Environmental Economics and Policy
4. AG EC 3224 (3) - New Products Marketing

12 credits - Electives selected from the list below. A minimum of 9 credit hours in regular courses must be selected from one disciplinary area.

AG EC 2070 - Environmental Economics and Policy
AG EC 3224 - New Products Marketing
AG EC 3257 - Rural and Agricultural Law
AG EC 3271 - International Agricultural Development
AG ED 2220 - Verbal Communication in Agriculture, Food and Natural Resources
AG ED 2250 - Personal Leadership Development
AG ED 2260 - Team and Organizational Leadership
AG ED 4320 - Designing Curriculum and Instruction in Agriculture
AG ED 4330 - Teaching Agriculture Subjects
AG JRN 3210 - Fundamentals of Communication
BIOCHM 2112 - Biotechnology in Society
FINPLN 2185 - Consumer as Entrepreneur
ECONOM 1111 - Environmental Economics
ECONOM 4360/PEA ST 4360 - Economics Development
GEOG 2660 - Environmental Geography
NUTR S 2590 - Community Nutrition
RU SOC 2010 - Leadership in Today's World
RU SOC 2225 - Science, Technology and Society
RU SOC 3235 - Global Perspectives and Realities
RU SOC 4341 - Building Communities from the Grassroots
RU SOC 4342 - Empowering Communities for the Future
RU SOC 4343 - Creating Capacity for Dynamic Communities
WGST 4230 - Women Development and Globalization

Advising

The General Agriculture program is coordinated by the College's academic Programs office. A faculty member from the student's primary concentration area serves as the faculty adviser. In addition to helping students plan a program of study, faculty advisers provide support, encouragement and

 S. Flint-Garcia, R. K. Lawrence, H. J. Popham, K. S.
 Shelby, C. Taylor, O. Yu

The Plant Sciences undergraduate major is a joint contribution of the disciplines of Agronomy, Entomology, Horticulture and Plant Microbiology and Pathology. From the manipulation of genes to increasing crop productivity to improving the quality of life by enhancing the landscape, plant sciences students are engaged in the science and art of working with plants. Educational opportunities in plant sciences range from basic (genetics, biotechnology and physiology) to applied (crop production and protection, landscape design and turfgrass).

The division offers the BS degree with a major in Plant Sciences. Students in plant sciences initially receive a broad education in agriculture, the basic sciences and business. Later, they elect to enroll in a specific emphasis area designed to empower them to

be competitive in career opportunities in that area. The emphasis areas are a series of interwoven courses in:

- Crop management
- Landscape horticulture
- Ornamental plant production and operations management
- Plant biology
- Plant breeding, genetics and biotechnology
- Plant protection
- Turf grass management

Major Program Requirements – Plant Sciences

In addition to CAFNR requirements and the university's general education and graduation requirements, the Division of Plant Sciences requires the following courses. The student must also select one emphasis area. Two writing intensive courses are required under university guidelines.

Major core requirements

Communications	9
ENGLSH 1000: Exposition & Argumentation.....	3
COMMUN 1200: Public Speaking	3
One of the following courses	3
AGRIC 2190: International Agriculture and Natural Resources	
AG ED 2220: Verbal Comm. in Ag., Food and Natural Resources	
AG JRN 3210: Fundamentals of Communication	
AG JRN 3240: Communicating on the Web	
AG JRN 3270: Effective Print Communication Design and Photography Basics	
COMMUN 3441: Non-Verbal Communication	
COMMUN 3572: Argument and Advocacy	
COMMUN 3575: Business and Professional Communication	
COMMUN 3576: Persuasive Speaking	
CS&D 1110: Manual Communication I	
THEATR 1400: Acting for Non-Majors	
RU SOC 2225: Science Technology and Society Foreign Language	
ENGLSH 2030: Professional Writing	
ENGLSH 2010: Intermediate Composition	

Math and Science

MATH 1100 or 1120: College Algebra	3
Statistics (any course).....	3
CHEM 1320: General Chemistry II with Lab.....	3
Any Chemistry or Biochemistry (not CHEM 1100)	5
BIO SC 1200: General Botany with Lab.	5
Genetics (select one of the following)	
BIO SC 2200: General Genetics	4
PLNT S 3213: Genetics of Ag. Plants and Animals.....	3
Social and Behavioral Sciences.....	9
Maco & Micro Economics	4
AG EC 1041 or ECONOM 1014	3
AG EC 1042 or ECONOM 1015	3
State Law requirement (select one of the following)	
HIST 1100, 1200, 1400, 2200, 2440, 4000, 4220,4230 or	3
POL SC 1100, 1700, 2100.....	3

Humanistic Studies and/or Fine Arts6

Courses may include AG EC 3241, AG JRN 3210, AG ED 2220, RU SOC 1150

For additional course options see General Education List at

<http://generaleducation.missouri.edu/Courses> eligible must include an “H” in appropriate column.

Major field requirements..... 60-63

Core Courses: (24 credits)

PLNT S 2100: Introduction to Soils	3
PLNT 2125: Plant Structure and Function.....	3
SOIL 2106: Soil Science Laboratory	2
PLNT S 3130: Undergraduate Seminar in Plant Science	1
PLNT S 3225: Plant Breeding & Genetics	
OR PLNT S 3230: Plant Propagation.....	3

Pest Sequence

Select two of the following:

PLNT S 3510: Biology of Fungi	
OR PLNT S 4500: Theory & Concepts of Plant Pathology..	3
PLNT S 3210; Principles of Weed Science.....	4
PLNT S 3710: Introductory Entomology.....	3
AND PLNT S 3715: Insect Diversity.....	2

Emphasis Areas (select 1)18 credits minimum

Capstone Experience 3-4

Within their last 45 hours, students must complete a capstone experience. This requirement may be met by completing any one of the following:

PLNT S 4940: Internship in Plant Science	3
PLNT S 4950: Undergraduate Research in Plant Science	3
PLNT S 4975: Advanced Landscape Design.....	4

Business and Economics Courses12

AG EC 1041: Applied Microeconomics (3)	
AND AG EC 1042: Applied Macroeconomics (3).....	6
Business Electives.....	6
(Choose from Accountancy, Agricultural Economics, Personal Financial Planning, Economics, Finance, Management or Marketing.)	

Electives: (the hours necessary to total 128 credits)

Emphasis in Crop Management

Required emphasis courses:

Pest Sequence-Enroll in course not taken in core.....	3-4
PLNT S 4500: Theory & Concepts of Plant Pathology(core)	
PLNT S 3225: Plant Breeding & Genetics(core)	
PLNT S 3270: Forage Crops.....	3
PLNT S 3275: Grain Crops	3
PLNT S 4315: Crop Physiology	3
One of the following courses	3
PLNT S 4313: Soil Fertility & Plant Nutrition (3)	
SOIL 3290: Soils and the Environment (3)	
SOIL 4308: Soil Conservation (3)	
One of the following courses	3-4
AG S M 1040: Physical Principles for Agricultural Applications (3)	
AN SCI 1011: Animal Science (3)	
ATM SC 1050: Introductory Meteorology (3)	
FOREST 4385: Agro Forestry I (4)	
Total	18-20

Emphasis in Landscape Horticulture

Required emphasis courses:

PLNT S 3710: Introductory Entomology (core)	
PLNT S 3715: Insect Diversity (core)	
PLNT S 3510: Biology of Fungi (core)	
OR PLNT S 4500: Theory & Concepts of Plant Pathology (core)	
PLNT S 2210: Ornamental Woody Plants.....	3

PLNT S 2215: Ornamental Herbaceous Plants	3
PLNT S 2254: Landscape Design.....	3
PLNT S 4975: Advanced Landscape Design	4
PLNT S 3355: Turf	3
Total	16

Emphasis in Ornamental Plant Production and Operations Management

Required Emphasis courses:

Pest Sequence: Enroll in course not taken in core	3-4
AG ED 3310: Teaching Financial Management and Economics.....	2
PLNT S 2210: Ornamental Woody Plants	3
PLNT S 2215: Ornamental Herbaceous Plants.....	3
PLNT S 3260: Greenhouse Management	4
PLNT S 4313: Soil Fertility & Plant Nutrition.....	3
PLNT S 4350: Nursery Crop Production & Management	
OR PLNT S 4365: Greenhouse Crop Production.....	4
Total	22-23

Emphasis in Plant Biology

Required emphasis course:

BIOCHM 2112: Biotechnology in Society (core)	
BIOCHM 3630: General Biochemistry	3
BIO SC 2300: Introduction to Cell Biology	3
BIO SC 4400: Plant Anatomy.....	4
CHEM 1310: General Chemistry I (core)	
CHEM 1320: General Chemistry II With Lab (core)	
CHEM 1330: General Chemistry III With Lab.....	3
CHEM 2100: Organic Chemistry I.....	3
PLNT S 4313: Soil Fertility & Plant Nutrition.....	3
PLNT S 4315: Crop Physiology	3
STAT 1400: Elementary Statistics for Agriculture (core)	
Note: Chemistry and biochemistry courses can count toward major core requirements in math and science.	
Total	22

Emphasis in Plant Breeding, Genetics and Biotechnology

Required emphasis courses:

BIOCHM 3630: General Biochemistry	3
BIO SC 2300: Introduction to Cell Biology	3
CHEM 2100: Organic Chemistry I.....	3
PLNT S 4315: Crop Physiology	3
Two of the following courses.....	5-6
BIO SC 4976: Molecular Biology (3)	
BIO SC 4974: Molecular Biology Lab (3)	
PLNT S 4325: Field Crop Breeding (3)	
PLNT S 4330: Plant Breeding Theory (3)	
STAT 4530: Analysis of Variance (3)	
One of the following courses	3-4
PLNT S 3270: Forage Crops (3)	
PLNT S 3275: Grain Crops (3)	
PLNT S 4313: Soil Fertility & Plant Nutrition (3)	
PLNT S 3355: Turf (3)	
PLNT S 4350: Nursery Crop Production & Management (4)	
PLNT S 4365: Greenhouse Crop Production (4)	

Note: Chemistry and biochemistry courses can count toward major core requirements of math and science.

Total	20-22
-------------	-------

Emphasis in Plant Protection

Required emphasis courses:

Pest Sequence: Enroll in course not taken in core	3-4
PLNT S 4500: Theory and Concepts of Plant Pathology.....	4
AG S M 2340: Pesticide Application Equipment	3

PLNT S 4730: Insect Pest Management for Plant Protection	3
PLNT S 4313: Soil Fertility & Plant Nutrition	3
PLNT S 4314: Soil Fertility & Plant Nutrition Lab	2
Complete three of the following courses	9-12
FOREST 2151: Dendrology (4)	
FOREST 3212: Forest Health and Protection (4)	
PLNT S 2210: Ornamental Woody Plants (3)	
PLNT S 2215: Ornamental Herbaceous Plants (3)	
PLNT S 3260: Greenhouse Management (4)	
PLNT S 3270: Forage Crops (3)	
PLNT S 3275: Grain Crops (3)	
PLNT S 4315: Crop Physiology (3)	
PLNT S 3355: Turf (3)	
Total	25-29

Emphasis in Turfgrass Management

Pest Sequence: Enroll in course not taken in core	3-4
AG S M 2340: Pesticide Application Equipment	3
AG S M 4460: Irrigation and Drainage	3
PLNT S 2210: Ornamental Woody Plants OR	
PLNT S 2215: Ornamental Herbaceous Plants	3
PLNT S 3355: Turf	3
PLNT S 4355: Advanced Turfgrass Mgmt	3
Total	18-19

PLANT SCIENCE COURSES

PLNT S 1002--Topics In Plant Science - Biological/Physical/Mathematics (1-4).Initial offering of a course(s) in a specific subject matter area. Offered when proposed by a faculty member in that area of expertise.

PLNTS 1010--Plant Science Orientation (1). Introduction to perspectives, comprehensiveness, and current issues in the plant sciences. Involves independent learning, faculty interviews, and oral and written communication about agronomy, horticulture, entomology, and plant pathology.

PLNT S 1020--World Food and You (3). (same as Food Science 1020). Basic scientific principles involved in production agriculture, food processing, marketing and consumption. Evaluation and understanding of current agriculture issues that affect human foods and required nutrients.

PLNT S 1125--People, Plants and the Environment (3).Exploration of the science and niche relationships that exist between people, plants, animals, and the environment. Emphasis placed on urban vs rural culture, the impact on production agriculture and the world food supply. Prerequisite: restricted to freshmen and sophomores.

PLNT S 2002--Topics in Plant Science - Biological/Physical/Mathematics (1-4).Initial offering of a course(s) in a specific subject matter area. Offered when proposed by a faculty member in that area of expertise.

PLNT S 2075--Horticultural Ecology (3). Investigate interrelationships between plants and the environment. Special emphasis placed on improving homeowners' environmental stewardship and their knowledge of sustainable practices. Graded on A/F basis only.

PLNT S 2100--Introduction to Soils (3). (same as Soil Science 2100). Introduction to soil sciences with emphasis placed on physical biological, and chemical properties and applica-

tion to land use, plant growth and environmental problems. Prerequisites: 3 hrs of Chemistry.

PLNT S 2110--Plant Growth and Culture (3).Principles of plant growth with emphasis on anatomy, morphology, physiology, and environmental factors. Culture of major crop and horticultural species.

PLNTS 2125--Plant Structure and Function (3).Introduction to plant structures and how they function to promote plant growth and development, using botany, soils, chemistry and biochemistry to understand how plant make a living. The secret of life on earth is revealed in the study of photosynthesis early in the course. Prerequisites: BIO_SC 1200; SOILS 2100; CHEM 1320.

PLNT S 2150--Plants for Interior Design (2).Identification, culture and uses of plants adaptable to or capable of becoming acclimated to interior environments.

PLNT S 2195--Grapes and Wines of the

World (1).(Same as Food Science 2195). Reviews historical development of the wine industry and associated development of the grape industry, the wine making process, the various types of wine product, wine-producing regions of the world, various classification schemes and quality components.

PLNT S 2210--Ornamental Woody Plants (3).Identifies and evaluates trees and shrubs for landscape use. Prerequisite: BIO SC 1010 and 1200.

PLNT S 2215--Ornamental Herbaceous Plants (3).Annuals, biennials, perennials, ground covers, and bulbs; their identification, nomenclature classification, culture and use. Prerequisite: BIO SC 1010, 1500, or 1200.

PLNT S 2254--Landscape Design (3).Historical overview of the human and environmental relationships with respect to design on the land. Prerequisite: sophomore standing.

PLNT S 2710--Insects in the Environment (3).Ways in which insects are adapted for life in particular environments, basics of morphology, taxonomy; how important insect pests affect food and crop production, and principles of control. cor.

PLNT S 3002--Topics in Plant Science - Biological/Physical/Mathematics (1-4).Initial offering of a course(s) in a specific subject matter area. Offered when proposed by a faculty member in that area of expertise.

PLNT S 3130--Undergraduate Seminar in Plant Science (1).Discussion of assigned or selected topics in Plant Science. Prerequisite: junior or senior standing.

PLNT S 3210--Principles of Weed Science (4).Introduction to principles of weed growth, reproduction, and impact on human activities. Discussion of weed control techniques and technology, weed identification, and developing weed management strategies. Prerequisite: PLNT S 2110 or BIO SC 1200.

PLNT S 3213--Genetics of Agricultural Plants and Animals (3).(same as Animal Science 3213). Concepts of molecular, transmission, and population and quantitative genetics. Special emphasis given to breeding and biotechnological applications in plant and animal agriculture. Prerequisites: BIO SC 1010, 1020, 1500, MATH 1100.

PLNT S 3225--Plant Breeding and Genetics (3).Mendelian genetic principles and related genetic developments applicable in plant breeding. Discussion of established and new plant breeding procedures applicable to cultivar development. Prerequisite: PLNT S 2110 or equivalent.

PLNT S 3230--Plant Propagation (3).Principles and practices of propagation of horticultural plants. Prerequisites: BIO SC 1010 and 1200.

PLNT S 3235--Plant Environments (3).Effects of water, light, temperature, and gases upon growth and physiology of plants; their control in plant production. Prerequisites: BIO SC 1010 or 1200 and CHEM 1100 or 1310.

PLNT S 3260--Greenhouse Management (4).Greenhouse design, environmental control and equipment. Practices associated with plant

nutrition management, greenhouse pest control, postproduction handling and marketing of greenhouse crops, and greenhouse management are also covered. Prerequisites: PLNT S 3235.

PLNT S 3270--Forage Crops (3).Principle forage crops, pasture production, forage preservation and utilization. Prerequisite: PLNT S 2110.

PLNT S 3275--Grain Crops (3).Lecture and discussion covering production and utilization, plus growth and development of a wide range of grain crops, including Missouri crops. Problem solving tasks include agronomics, economics and environmental factors. Prerequisite: PLNT S 2110.

PLNT S 3355--Turf (3).Characteristics of turf materials, principles of establishment and maintenance. Prerequisites: PLNT S 2100 and 3235 or instructor's consent.

PLNT S 3385--Problems in Plant Science (1-4).Not accepted as a substitute for any regularly scheduled course. Problems arranged with individual faculty member in specific matter area. Prerequisite: consent required.

PLNT S 3500--Forest Pathology (3).Provides basic understanding of biotic and abiotic agents which cause forest diseases, and current approaches to disease control. Prerequisite: 5 hours Biological Sciences or equivalent.

PLNT S 3510--Biology of Fungi (3).(same as Biological Sciences 3510). The diverse roles of fungi in the biosphere will be explored by considering fungi we eat, fungi which destroy our food, fungi in folklore and fungi as global nutrient recyclers. Prerequisites: BIO SC 1500, 1100, or 1200 or equivalent.

PLNT S 3710--Introductory Entomology (3).(same as Biological Sciences 3710). Holistic biology of insects, including anatomy, physiology, behavior ecology, and management. Prerequisites: BIO SC 1010, 1020, 1500, or equivalent.

PLNT S 3715--Insect Diversity (2).(same as Biological Sciences 3715). Laboratory emphasizing external insect anatomy, classification, and identification to the family level. Insect collection is required. Prerequisite: Concurrent enrollment or previous satisfactory completion of PLNT S 3710/BIO SCI 3710.

PLNT S 4002--Topics in Plant Science - Biological/Physical/Mathematics (1-4).Initial offering of a course(s) in a specific subject matter area. Offered when proposed by a faculty member in that area of expertise.

PLNT S 4313--Soil Fertility and Plant Nutrition (3).(same as Soil Science 4313). Explanation of principles of delivery of plant nutrients to plants, discussion of the role of each essential nutrient in crop plants and introduction to the management of soil amendments. Prerequisites: SOIL 2100 or instructor's consent.

PLNT S 4314--Soil Fertility and Plant Nutrition Laboratory (2).(same as Soil Science 4314). The application of elementary analytical procedures to the evaluation of the nutrient status of soils and crop plants. Prerequisite: concurrent enrollment or previous completion of SOIL 4313.

PLNT S 4315--Crop Physiology (3).Basic course on crop growth and development. Emphasis is on physiological processes and morphology of crop plants, and their application

to crop breeding and management decisions. Prerequisites: PLNT S 2110 or equivalent.

PLNT S 4320--Plant Physiology (3-5).(Same as Biological Sciences 4320.) Modern physiology of higher plants using common cultivated plants as examples. May be taken with or without laboratory. Prerequisite: BIO SC 1500 or 1200 and five hours of chemistry.

PLNT S 4325--Field Crop Breeding (3).Plant Science 4325 will introduce students to the application of genetics and the plant sciences to the breeding and improvement of self-pollinated field crops. Classical, current and innovative plant breeding techniques will be addressed. Prerequisite: PLNT S 2110 and 3225.

PLNT S 4330--Plant Breeding Theory (3).Designed to provide a logical application of genetic concepts to mating and selection theory in general improvement of cross pollinated crops. Prerequisite: PLNT S 3225 or equivalent.

PLNT S 4350--Nursery Crop Production and Management (4).Operations, methods used by wholesale, retail, landscape nurseries. Field problems, observational trips. Prerequisites: PLNT S 3230 and 3235.

PLNT S 4355--Advanced Turfgrass Management (3).Provides turfgrass majors a more informative and applicable look at mathematics of turfgrass management, application techniques, cultural practices, and soil/water relationships applicable to careers in golf course and sports turf management, lawn care, and professional grounds maintenance. Prerequisites: PLNT S 3355 or instructor's consent.

PLNT S 4360--Precision Agriculture Science and Technology (3).(same as Agricultural Systems Management 4360 and Soil Science 4360). Precision agriculture is an information-based approach to farming whereby variability is managed to optimize crop production and reduce environmental pollution. This course provides an overview of precision agriculture technologies (like GIS, GPS, remote sensing), mapping methods, and case studies illustrating decisions and management. Prerequisites: SOIL 2100, PLNT S 2110 or instructor's consent.

PLNT S 4365--Greenhouse Crops Production (4).Production management decision and commercial culture of the major floriculture crops. Prerequisite: PLNT S 3260 or instructor's consent.

PLNT S 4385--Problems in Plant Science (3).Special problem in plant pathology designed for the minor program in Plant Pathology. Problems arranged on an individual student basis.

PLNT S 4400--Plant Anatomy (4).(same as Biological Sciences 4400). Comparative structure, growth of meristems; development, structure of important cell types, tissues systems; comparative anatomy of stem, root, leaf. Emphasizes anatomy of gymnosperms; angiosperms. Includes lab. Prerequisites: BIO_SC 1200 or 1500. Graded on A/F basis only

PLNT S 4500--Theory and Concepts of Plant Pathology (4).The lecture and lab will provide information on disease development in plant populations and possible control strategies combined with training in retrieving and critically reviewing research information. Prerequisites: 5 hours Biological Sciences, junior, senior or graduate standing.

PLNT S 4520--Environmental Microbiology (3). Fundamental knowledge of selected microbial processes that are important in agriculture, environmental detoxification, and microbial biotechnology. Emphasis is on molecular, genetic and physiological aspects of nitrogen metabolism, bioconversions, anti-biosis and biocontrol.

PLNT S 4710--Systematic Entomology (5). Taxonomy of insects; emphasizes biology and classification of orders and major families. Insect collection required. Prerequisites: PLNT S 3710 and 3715 or 10 hours biological sciences.

PLNT S 4720--Aquatic Entomology (3). Identification, life histories, ecology of aquatic arthropods; emphasizes fresh-water insects. For students of wildlife, fisheries management, aquatic biology, advanced entomology. Prerequisites: PLNT S 3710, 3715 and 4304 or equivalent.

PLNT S 4730--Insect Pest Management for Plant Protection (3). Identification and importance of insect pests of crops, detection techniques, economic injury levels, and recent development in control techniques of importance to insect management decisions. Prerequisites: PLNT S 3710 and 3715.

PLNT S 4940--Internship in Plant Science (1-3). Combines study, observation, and employment with an industry or government agency in area of agronomy or horticulture. Written and oral reports and faculty evaluation. Prerequisites: 60 hours including two courses in department and instructor's consent.

PLNT S 4950--Undergraduate Research in Plant Science (1-3). Capstone experience consisting of investigations in Plant Science in support of an undergraduate thesis or special project portfolio. Prerequisites: senior standing in Plant Science Degree Program.

PLNT S 4965--Special Readings in Plant Pathology (cr.arr.). Independent readings and discussions of topics in entomology selected in consultation with supervising faculty member. Paper required.

PLNT S 4975--Advanced Landscape Design (4). Development of project presentation techniques by analysis of the social, cultural, historical and ecological aspects of landscape design. Prerequisites: PLNT S 2254, instructor's consent.

Division of Applied Social Sciences

Department of Rural Sociology

M. Nolan, Chair

EXTENSION ASSISTANT PROFESSOR J. Adams, S. Jeanetta, M. S. Leuci
ASSOCIATE PROFESSOR EMERITUS: K.E.Pigg
PROFESSOR EMERITUS R. R. Campbell

The Department of Rural Sociology participates in the general agriculture major offered by the College of Agriculture, Food and Natural Resources and offers a minor in rural sociology. For information about the general agriculture major, see the Department of General Agriculture. The Department of Rural Sociology also offers graduate degrees.

Minor in Rural Sociology

The rural sociology undergraduate minor requires 15 credits in rural sociology courses. Nine credits must be above the 2000 level. The specific combination of courses must be approved by a department adviser.

RURAL SOCIOLOGY COURSES

RU SOC 1000--Rural Sociology (3). Introduction to basic concepts and principles of sociology with a focus on rural populations and places. The course explores interconnections between rural/urban and local global economies and cultures. Students are exposed to the rich diversity of rural society, social changes underway, and to current social issues. (Students may not earn credit for both Rural Sociology 1000 and Sociology 1000).

RU SOC 1103--Topics in Rural Sociology - Behavioral Science (1-3). Organized study of selected topics. Subjects and earnable credit vary from semester to semester. May be repeated. Prerequisites: RU SOC 1000 or SOCIOL 1000.

RU SOC 1104--Topics in Rural Sociology - Social Science (1-3). Organized study of selected topics. Subjects and earnable credit vary from semester to semester. May be repeated. Prerequisites: RU SOC 1000 or SOCIOL 1000.

RU SOC 1120--Population and the Environment (3). (same as Sociology 1120). Changes in the structure and characteristics of population groups and their relationship to both human and non-human aspects of the biophysical environment.

RU SOC 1150--The Amish Community (3). (same as Peace Studies 1150). Examines historical antecedents and contemporary culture and social structure of the Amish. Topics include cultural symbols, life ceremonies, the family, counter-cultural pressures, stresses, social change. Prerequisites: RU SOC 1000, SOCIOL 1000, or ANTHRO 1000.

RU SOC 1175--The Health of People in Local Communities (3). Health is a universal concern of all people. However, the place of residence has a major impact on many things closely related to health including the local cultural such as diets, exercise, occupations, local health services, etc. This is an introduc-

tion to these topics. Prerequisite: introduction to Sociology or Rural Sociology.

RU SOC 2010--Leadership in Today's World (3). Examination of dynamics of group leadership, especially in local voluntary organizations; study of how leader's behavior is related to success or failure of organization's program. Prerequisites: RU SOC 1000 or SOCIOL 1000.

RU SOC 2203--Topics in Rural Sociology - Behavioral Science (1-3). Organized study of selected topics. Subjects and earnable credit vary from semester to semester. May be repeated. Prerequisites: RU SOC 1000, SOCIOL 1000 or ANTHRO 1000.

RU SOC 2204--Topics in Rural Sociology - Social Science (1-3). Organized study of selected topics. Subjects and earnable credit vary from semester to semester. May be repeated. Prerequisites: RU SOC 1000, SOCIOL 1000 or ANTHRO 1000.

RU SOC 2225--Science, Technology and Society (3). Overview of the social influences that shape science including how scientific knowledge is contested and legitimated; how social forces (among them mass communication) influence the choice of innovations; and the role social systems and sectors play in the use and benefit of science. Communication intensive-discussion, presentation and essay based. Prerequisites: RU SOC 1000 or SOCIOL 1000.

RU SOC 2950--Social Research I (3). (same as Sociology 2950).

RU SOC 3085--Problems in Rural Sociology (cr.arr.). Prerequisite: instructor's consent.

RU SOC 3100--Recent Theories in Sociology (3). (same as Sociology 3100).

RU SOC 3235--Global Perspectives and Realities (3). Presents the sociological theories and concepts needed to understand globalization and to live overseas. Helps prepare students for life abroad. Open only to students with definite plans to study, work or live abroad.

RU SOC 3303--Topics in Rural Sociology - Behavioral Science (2-3). Organized study of selected topics. Subjects and earnable credit vary from semester to semester. May be repeated. Prerequisites: 6 hours Rural Sociology or Sociology, or junior standing.

RU SOC 3304--Topics in Rural Sociology - Social Science (2-3). Organized study of selected topics. Subjects and earnable credit vary from semester to semester. May be repeated. Prerequisites: 6 hours Rural Sociology or Sociology, or junior standing.

RU SOC 3325--Sociology of Food and Nutrition (3). This class explores individual food choices and larger social forces. Topics include: world hunger, food and the environment; food choices and culture, class and personal identity; the effects of social stigmas, advertising trends, and government regulations on body image; new social movements for sustainable food systems. Prerequisite: ENGLSH 1000 and junior or senior standing or instructor's permission.

RU SOC 3940--Practicum in Rural Sociology (3). Independent research or professional experience under faculty supervision. Projects must be arranged by student and faculty member prior to registration. Prerequisites: junior standing, departmental consent.

RU SOC 4120--Social Statistics (3). (same as Sociology 4120). Descriptive statistics and bivariate quantitative analysis techniques commonly used by social scientists. Includes coverage of parametric and non-parametric methods. Introduction to computer analysis. Prerequisite: SOCIOL 2950.

RU SOC 4301--Topics in Rural Sociology (3). Current and new topics not currently offered in applied and/or theoretical areas in Rural Sociology. Prerequisites: RU SOC 1000 or Sociol 1000 or equivalent. Graded on A-F basis only.

RU SOC 4310--Sociology of Agriculture and Natural Resources (3). Overview of current issues in the study of rural society. Emphasizes

the relationships among social organization, agriculture, natural resources and the global economy. Prerequisite: junior standing.

RU SOC 4325--American Community Studies (3).An introduction to the study of American communities. The course starts with community theories and then focuses on a wide variety of historic and contemporary community studies such as Plainville, Middletown, Sidewalk and others. Seminar format.

RU SOC 4335--Social Change and Trends (3).(same as Sociology 4335). Nature of social change. Emphasis on sociological theories and models of social change and their application in analysis and implementation of change in social structures. Prerequisites: RU SOC 1000 or SOCIOL 1000 and junior standing.

RU SOC 4341--Building Communities from the Grassroots (3).Introduction and application of basic community development concepts, methods and practical skills for involving and empowering local citizens and leaders effectively in community-based efforts regardless of the issue. Prerequisite: instructor's consent.

RU SOC 4342--Empowering Communities for the Future (3).Focuses on the professional practice and applications of community-based development including participatory action research, community economic development, organizational development, use of technology, citizen education and integration of practice. Graded on A/F basis only. Prerequisite: instructor's consent.

RU SOC 4343--Creating Capacity for Dynamic Communities (3).Addresses community and citizen power; large group intervention processes for change; facilitating small group process; community organizing; community sustainability, dealing with poverty and disenfranchisement; community conflict resolution; ethics; and integration into practice. Graded on A/F basis only. Prerequisite: instructor's consent.

RU SOC 4370--Environmental Sociology (3).(same as Sociology 4370). An interdisciplinary examination of domestic and international environmental issues focusing on social, cultural, and policy dimensions. Perspectives of the social sciences and humanities are included. Prerequisites: junior standing.

The School of Natural Resources

(WITHIN THE COLLEGE OF AGRICULTURE, FOOD AND NATURAL RESOURCES)

Mark R. Ryan, Director
The School of Natural Resources

DEGREES OFFERED

Bachelor of Science in Forestry (BSF) with emphasis areas in

Forest Resource Management
Individualized Studies
Industrial Forest Management
Urban Forestry

Bachelor of Science in Fisheries and Wildlife Sciences (BSFW)

Bachelor of Science with majors in
Parks, Recreation and Tourism with emphasis areas in

Leisure Service Management
Natural Resource Recreation Management
Tourism Development

Soil, Environmental and Atmospheric Sciences with emphasis areas in

Atmospheric Science
Environmental Science
Soil Resource Management

Dual Major Fisheries and Wildlife/Forestry

Minors

Forestry
Natural Resources
Soil, Environmental and Atmospheric Sciences
Captive Animal Management

The School of Natural Resources is Missouri's and the Midwest's only school with a comprehensive natural resources program. It is a division of the College of Agriculture, Food and Natural Resources. It encompasses atmospheric sciences, environmental science, fisheries, forestry, parks, recreation, soils, tourism and wildlife. The school is based on an integrated, scientific approach to natural resources management. It is housed in the Anheuser-Busch Natural Resources Building containing state-of-the-art teaching, research and outreach-extension facilities.

The Department of Forestry was established at MU in 1947 and was elevated to the status of School of Forestry in 1957. The fisheries and wildlife program, which was established in 1937 in the College of Arts and Science, became part of the school in 1973. The Department of Parks, Recreation and Tourism was added in 1988. The School of Natural Resources was formed through a name change in 1989. A Department of Soils was formed at MU in 1914 and a Department of Atmospheric Science was formed in 1966. Faculties in soil science and atmospheric science joined The School of Natural Resources in 1990 and

1991, respectively, and were merged into the Department of Soil and Atmospheric Sciences in 1992. This name was changed to the Department of Soil, Environmental and Atmospheric Sciences in 2004. With approximately 500 undergraduates and 50 faculty members, the school is noted for excellent education, strong professional orientation, active student organizations and outstanding advising.

ADMISSIONS

In addition to requirements listed below, students admitted to the University of Missouri may enter The School of Natural Resources as freshmen or as transfer students.

Transfer Students

Previous college work is carefully evaluated by The School of Natural Resources. Courses are readily accepted if they are satisfactory substitutes for required University of Missouri courses. Lists of acceptable substitute courses offered at many other institutions are maintained and are available to prospective transfer students on request.

MAJOR PROGRAM REQUIREMENTS

Students must meet all emphasis, major, degree, department, college and university graduation requirements, including the university general education requirements. See the appropriate sections of this catalog.

Academic Assessment

Field Assessment

This assessment is required by the Missouri Coordinating Board for Higher Education (CBHE). In The School of Natural Resources, it consists of an unstructured evaluation of each student's competencies based on performance in a capstone course. For students in fisheries and wildlife, forestry, soil research management, environmental soil science, environmental science, and natural resources recreation management in NATR 4970: Resource Practicum, interdisciplinary teams develop and defend a comprehensive resource management plan before a panel of The School of Natural Resources professors and several resource management agency professionals. All students in parks, recreation and tourism are assessed during their required internship experience (PR&TR 4940: Parks, Recreation and Tourism Internship). Students in atmospheric science are assessed in ATM SC 4990: Daily Analysis and Forecast Interpretation.

Capstone Options

Within the last 45 credits, but usually during the senior year, students must take a capstone course or be involved in a capstone project. This project is an academic activity that integrates general knowledge with the specialized knowledge each student has developed in the major area and, when appropriate, the related field (minor). In the atmospheric sciences curriculum, the capstone course is ATM SC 4990: Daily Analysis and Forecast Interpretation (3). Fisheries and wildlife, forestry, and soils curricula utilize NAT R 4970: Resource Practicum (3). This course is also taken by most parks, recreation and tourism students in the natural resource recreation management emphasis area, although it does not serve as their formal capstone experience. The parks, recreation and tourism curriculum utilizes P R&TR 4940: Parks, Recreation and Tourism Internship (12) as the capstone experience.

Credits by Examination

A total of 21 credits in CLEP (College Level Entrance Program) is accepted in the following areas: English, mathematics, social sciences and humanities. The school does not accept natural science CLEP credit.

Dual Degree - BS in Geological Sciences and Soil, Environmental and Atmospheric Sciences

The Department of Soil, Environmental and Atmospheric Sciences and the Department of Geological Sciences offer a dual BS degree program with majors in Geology and Soil and Atmospheric Science with an emphasis in Environmental Soil Science. The dual degree program requires 132 credits for graduation. For more information on the dual degree program, contact an adviser in the department.

Dual Major - Fisheries and Wildlife/Forestry

In addition to courses that satisfy university general education requirements, students who plan to complete a dual major in fisheries and wildlife/forestry must complete the required fisheries and wildlife sciences, forestry and elective options to reach 140 credits. The dual major does not allow for any general elective hours.

Minor Program Requirements

Four minors have been developed within The School of Natural Resources to provide students within other academic divisions the opportunity to diversify their educational experiences in natural resources. All minors meet the university criterion for a minor: a minimum of 15 credits of course work. Six credits may be taken in courses numbered below 2000 while the remaining 9 credits must be taken in courses numbered 2000 or above. (Note: While minors appear on transcripts, their related tracks do not appear on transcripts or diplomas.)

Minor in Soil, Environmental and Atmospheric Sciences

A minor in soil environmental, and atmospheric sciences is offered at the undergraduate level, with separate tracks in atmospheric science, environmental science, and soil science. The atmospheric science track is useful for careers in journalism broadcast meteorology as well as certification required by government agencies.

Atmospheric science track	15
ATM SC 1050: Introductory Meteorology	3
ATM SC 2720: Weather Briefing	1
ATM SC 3600: Climates of the World	3
ATM SC or closely related area (advisor recommendation)	8

Soil science track

15
Selection of courses should be made in consultation with an adviser in the Soil, Environmental and Atmospheric Science Department. Students with the following majors often choose a minor with the soil science track: forestry, fisheries and wildlife sciences, plant science and geological sciences. A minor with the soil science track also provides assistance in meeting certification as a wastewater specialist.

Minor in Forestry

The forestry minor requires FOREST2151: Dendrology (4). The student also must select four or five additional upper-division forestry courses from a prearranged list to attain 15 credits.

Minor in Natural Resources

The natural resources minor requires that students select no more than 6 credits from a prearranged list of lower-division courses. The student also must select three additional upper-division

courses, totaling at least 9 credits, from any curriculum within The School of Natural Resources.

Minor in Captive Animal Management

Captive wild animal management is an interdisciplinary program that blends course work from two existing major degrees - Animal Sciences and Fisheries and Wildlife - with specialized classes. The minor provides significant professional specialization and prepares you for careers ranging from animal rescue operations to captive breeding of endangered species. Minor requires 18 hours of course work.

STUDENT SERVICES

Advising

Personalized advisement and counseling is available from the school's faculty members. An open-door policy by advisors is emphasized and the school is noted for excellent student/faculty relations. Undergraduate advisement in The School of Natural Resources (SNR) is undertaken by those faculty and staff who advise with the attitude of fostering academic and professional development and success. The faculty members recognize the importance of establishing a trust relationship with students that will extend through their academic years at MU into their careers.

Career Placement

Students in The School of Natural Resources are provided various types of employment assistance through the College of Agriculture, Food and Natural Resources Placement Office (2-64 Agriculture Building). Resource materials on potential employers are available for student use. Instructions regarding federal, state and industrial employment procedures and assistance in the preparation of resumes and applications also are available. Notices of available positions are posted, and interviews are arranged with visiting organizations. Employment assistance also is given to alumni of the school on request.

Freshman Interest Groups

Freshman Interest Groups (FIGs) are sponsored by the school in two areas, atmospheric sciences ("Storm Chasers") and natural resources. A learning community is also sponsored, comprised of members of the two FIGs and other students who live on the same dormitory floor. The FIG experience promotes a sense of community among students that increases the quality of all aspects of university life for incoming students.

Transfer Student Interest Groups

TRIGs, or Transfer Interest Groups, involve activities that are specifically designed to help transfer students make a smooth transition to the MU campus. The School of Natural Resources TRIG is composed of transfer students with common interests and majors. In addition to other activities, members of each TRIG take a 1 credit hour proseminar together during their first semester at MU. You do not need to live on campus to participate in a TRIG program. TRIGs are only open to transfer students who have completed 24 or more hours at their previous institution. There is no additional cost for participating in a TRIG, and they are a great way to get to know campus and meet other students who are also making the same transition. TRIGs are available only for students planning to start at MU in the fall term.

NATURAL RESOURCE COURSES

NAT R 1040--Conservation Studies (1).A one-week field experience in natural resource management issues -- soil and water conservation, air pollution, fish and wildlife habitat requirements, importance of forest ecosystems. Limited to high school students who have completed their junior year and taken the PSAT or equivalent. Graded S/U only.

NAT R 1060--Ecology and Conservation of Living Resources (3).Introduction to the principles of resource and conservation describing the foundation of the variety of living resources and conservation practices used to protect and maintain these resources.

NAT R 1070--Ecology and Renewable Resource Management (3).Introduction to ecological principles and their relationship to resource use and management. Introduces fisheries and wildlife management as a profession. Required for Fisheries and Wildlife and Forestry majors.

NAT R 1090--Beginning GIS for Natural Resources (1).This course will provide a basic introduction to GIS software and how to use that software on natural resource data. The course is a combination of short lectures and computer lab time. Lectures include the software interface, data type, projections and datums, data base queries, presentation layout, and application to a specific problem. Prerequisite: NAT R 1080 or equivalent.

NAT R 2002--Topics in Natural Resources - Biological/Physical/Mathematical (cr. arr.).Organized study of selected topics. Subjects and credit may vary from semester to semester.

NAT R 2004--Topics in Natural Resources - Social Science (cr.arr.).Organized study of selected topics. Subjects and credit may vary from semester to semester.

NAT R 2160--Contemporary Issues in Natural Resources (3).Natural resources, their management, renewability, and sustainability.

Discussion of contemporary issues.

NAT R 3001--Topics in Natural Resources (cr.arr.).Organized study of selected topics. Subjects may vary from semester to semester.

NAT R 3110--Natural Resource Biometrics (3).Sampling methods and analysis as applied to a variety of natural resources, including fisheries, range, recreation, forests, water and wildlife. Prerequisites: a course in Statistics or instructor's consent.

NAT R 3220--Public Relations for Natural Resource Managers (3)."Introduction to the practical nature of public relations for those entering natural resources careers, emphasis on communication with target audiences through news media, publications and exhibits."

NAT R 4000--Problems in Natural Resources (cr.arr.).Problems in Natural Resources

NAT R 4001--Topics in Natural Resources (cr.arr.).Organized study of selected topics. Subjects may vary from semester to semester.

NAT R 4320--Hydrologic and Water Quality Modeling (3).(same as Environmental Science 4320). Introduction to models for simulating hydrologic and water quality processes. Emphasis is placed on Missouri watersheds to provide experience with the use of simulator models for natural resource decision making. Prerequisites: NAT R 1080 and SOIL 2100 or equivalent.

NAT R 4325--Introduction to Geographic Information Systems (3).The course will cover basic theoretical and technical issues in GIS, discuss processing geographic information for research and application, emphasis on the nature of spatial information, data models, input, manipulation and storage, and spatial analytic techniques. Prerequisites: NAT R 1070 or GEOG 2840; NAT R 1080 and 1090; instructor's consent.

NAT R 4353--Natural Resource Policy/Administration (3).Principles of policy formation and analysis; relationship of organizational goals to structure, planning and

budgeting. Historical background of present natural resource policies; examines current policy issues. Prerequisites: senior standing or instructor's consent.

NAT R 4365--GIS Applications (3).Introduces logical thinking and techniques in applying GIS to practical problems. Covers general GIS functionalities, Arc View Spatial Analyst including georeference, terrain analysis, hydrological analysis, grid, and remote sensing image processing. Prerequisite: GEOG 4840, NAT R 1080 and 1090, or instructor's consent.

NAT R 4385--Landscape Ecology and GIS Analysis I (3)."(same as Geography 4810). Examination of the landscape-scale approach to biodiversity, ecosystem dynamics, and habitat management. Particular emphasis on the use of Geographic Information Systems to analyze the spatial dimension of ecological patterns and processes. Prerequisite: GEOG 4840, or instructor's consent."

NAT R 4940--Natural Resources Internship (cr.arr.).Supervised professional experience with an approved public or private organization. Prerequisite: School of Natural Resources majors only, instructor's consent. Graded on S/U basis only. May be repeated for credit.

NAT R 4970--Resource Practicum in Natural Resources (3).Multidisciplinary planning of a natural resource management program. School of Natural Resources majors only. Prerequisite: senior standing or instructor's consent.

The fisheries and wildlife sciences degree is based on a common foundation of biological sciences, ecology, conservation, communication, analytical, social science, humanities and professional courses that provide students with a basic liberal education as well as prerequisites for additional professional courses.

Most students take courses that prepare them for entry-level, technical positions in fisheries, wildlife or water quality management with local, state or federal agencies. Such training usually involves taking courses that meet the standards set by The Wildlife Society or the American Fisheries Society to become certified, professional wildlife or fisheries biologists. Other students may complete a program that emphasizes more advanced study and prepares them for careers in resource management, research or administration.

The department offers BSFW, MS and PhD degrees with majors in Fisheries and Wildlife Sciences.

Major Program Requirements - Fisheries and Wildlife

Students must complete core requirements plus elective options. The degree requires 125 credits.

Major core requirements

Professional core 71-74

Biological and physical sciences

NAT R 1070: Ecology and Renewable Resource Management 3
 BIO SC 1500: Intro to Biological Systems w/Lab.....5
 BIO SC 1200: General Botany w/Lab.....5
 F&W 2100: Colloquium in Fisheries and Wildlife 1
 BIO SC 3650: General Ecology 5
 F&W 4500: Animal Population Dynamics and Management 3

Plant Taxonomy Course - choose one..... 4

BIO SC 3210: Plant Systematics
 FOREST 2151: Dendrology

Genetics – choose one..... 3-4

F&W 2500: Intro to Genetics and Evolution for Conservation (3)
 BIO SC 2200: General Genetics (4)
 AN SCI 3213: Genetics of Agricultural Plants & Animals (3)

Physiology - choose one5
 MPP 3202: Elements of Physiology
 AN SCI 3254: Physiology of Domestic Animals
Senior capstone course.....3
 NAT R 4970: Resource Practicum
Communications - choose one.....3
 AG ED 2220: Verbal Communication in Agric., Food, & Natr. Res.
 PRTR 3231: Principles Interpretive Outdoor Recreation
Economics – choose one.....3
 AG EC 2070: Environmental Economics and Policy
 AG EC 1041: Applied Microeconomics
Law/policy - choose one.....3
 AG EC 2156: Environmental Law
 AG EC 3257: Rural & Agricultural Law
 NAT R 4353: Natural Resources Policy/Administration
 CHEM 1310: General Chemistry I..... 2
 CHEM 1320: General Chemistry II w/Lab.....3
 MATH 1400: Calculus for Social and Natural Sciences I....3
 STAT 2530: Statistical Methods in Natural Resources3
 NAT R 3110: Natural Resource Biometrics.....3
Earth science - choose one..... 4-5
 GEOL 1100: Principles of Geology w/Lab (4) OR
 SOIL 2100: Introduction to Soils (3) AND
 SOIL 2106: Soil Science Lab (2)
Physics - choose one 3-4
 PHYSCS 1210: College Physics I (4)
 ATM SC 1050: Introductory Meteorology (3)

Professional course work..... minimum 24
 A minimum of seven courses must be taken from terrestrial and aquatic track offerings, with at least two courses from each track. (Note: Tracks do not appear on transcripts or diplomas.)

Terrestrial track

Science and natural history (choose at least two for terrestrial track, one must be an F&W course)

F&W 2600: Ornithology (4)
 F&W 3660: Mammalogy (4)
 PLNTS 3710: Introductory Entomology (3) AND
 PLNTS 3715: Insect Diversity (2)
 BIO SC 3360: Herpetology (4)
 BIO SC 3260: Invertebrate Zoology (4)

Management and techniques (at least two for terrestrial track)

F&W 3600: Introduction to Conservation Biology (3)
 F&W 4600: Ecosystem Management (4)
 F&W 4700: Wildlife Research and Management Techniques (4)

Specialty courses

F&W 2400: Human Dimensions of Fish and Wildlife Conservation (2)
 F&W 3500: Wildlife Conservation of British Cities (3-6)
 F&W 3800: Waterfowl Biology and Management (3)
 F&W 4200: Urban Wildlife Conservation (3)
 BIO SC 4670: Avian Ecology (3)
 F&W 4800: Environmental Toxicology (3)

Aquatic track

Science and natural history (at least two for aquatic track, one must be an F&W course)

F&W 2700: Ichthyology (4)
 F&W 4100: Limnology (4)
 PLNTS 3710: Introductory Entomology (3) AND
 PLNTS 3715: Insect Diversity (2)
 BIO SC 3260: Invertebrate Zoology (4)
 BIO SC 3360: Herpetology (4)

Management and techniques (at least two for aquatic track)

F&W 3400: Water Quality and Natural Resource Management (3)
 F&W 4300: Fisheries Management (3)
 F&W 4400: Techniques for Fisheries Management and Conservation (3)

Specialty courses

F&W 3200: Aquaculture (3)
 F&W 3600: Introduction to Conservation Biology (3)
 F&W 4800: Environmental Toxicology (3)

Electives 5-13

Use these credits to broaden general educational background and to add specialized courses important to career goals.

Dual Major - Fisheries and Wildlife/Forestry

In addition to courses that satisfy University general education requirements, students who plan to complete a dual major in fisheries and wildlife/forestry must complete the required fisheries and wildlife sciences, forestry and elective options to reach 140 credits. The dual major does not allow for any general elective hours.

Major core science

BIO SC 1200: General Botany w/Lab.....5
 BIO SC 1500: Intro to Biological Systems w/Lab.....5

Major core professional tracks (10 courses required)..... minimum 32*

Fisheries and wildlife track (minimum five courses) Science and natural history (minimum two courses, only one non-F&W)

F&W 2600: Ornithology (4)
 F&W 2700: Ichthyology (4)
 F&W 3660: Mammalogy (4)
 F&W 4100: Limnology (3-4)
 BIO SC 3360: Herpetology (4)
 ENTOM 3710: Introductory Entomology (3) AND
 ENTOM 3715: Insect Diversity (2)

Management (minimum two courses)

F&W 3600: Introduction to Conservation Biology (3)
 F&W 4300: Fisheries Management (3)
 F&W 4400: Techniques for Fisheries Management and Conservation (3)
 F&W 4600: Ecosystem Management (4)
 F&W 4700: Wildlife Research and Management Techniques (4)

Specialty courses

F&W 2400: Human Dimensions of Fish and Wildlife Conservation (2)
 F&W 3200: Aquaculture (3)
 F&W 3800: Waterfowl Biology and Management (3)
 F&W 4200: Urban Wildlife Conservation (3)

Forestry track (minimum five courses)

Management (minimum two courses)

FOREST 3207: Forest Fire Control and Use (2)
 FOREST 3212: Forest Health and Protection (4)
 FOREST 3290: Urban Forestry (2)
 FOREST 4370: Wildland Fire Management (3)
 FOREST 4380: Forest Resource Management (3)

Specialty courses (minimum three courses)

NAT R 4325: Intro to Geographic Information Systems (3)
 FOREST 3240: Wood Technology (3)
 FOREST 4340: Tree Physiology (3)
 FOREST 4350: Forest Economics (3)
 FOREST 4360: Forest Information Systems (3)
 FOREST 4365: Logging Systems: Operations and Analyses (3)

***Note:** If the minimum number of classes does not equal 32 credits, students must take more than the minimum number of classes required.

Certificate Requirements

Professional certification requirements for both Wildlife Society and Fisheries Society are available through this department. They are not issued by MU.

FISHERIES AND WILDLIFE SCIENCE COURSES

F W 1002--Topics in Fisheries and Wildlife (cr.arr.).Organized study of selected topics intended primarily for lower-level students in Fisheries and Wildlife Sciences.

F W 1012--Introduction to Captive Wild Animal Management (3).(same as AN_SCI 1012). General introduction to housing, husbandry, behavior, genetics, nutrition, reproduction, animal health, and disease control of native and exotic species in zoological parks and other animal conservation facilities; emphasizes the role of captive animals in wildlife conservation. Graded on A/F basis only.

F W 1100--Introductory Zoology with Laboratory (5).(same as Biological Sciences 1100). Introduces important principles and concepts of zoology. Emphasizes cell biology; evolution; genetics; ecology; structure, function, development of the organism.

F W 2002--Topics in Fisheries and Wildlife-Biological/Physical/Mathematics (cr. arr.).Organized study of selected topics. Intended for lower division Fisheries and Wildlife students. Subjects may vary from semester to semester.

F W 2100--Colloquium in Fisheries and Wildlife (1).Case studies in the biology and management of fish and wildlife and their environments. Prerequisite: Fisheries and Wildlife majors. S/U graded only.

F W 2400--Human Dimensions of Fish and Wildlife Conservation (2).Overview of human dimensions approaches and methods as they are applied to issues in fish and wildlife conservation. Prerequisite: NAT R 1060 or 1070.

F W 2500--Introduction to Genetics and

Evolution for Conservation (3).Basic principles and processes of genetics and evolution and their importance for management and conservation. Prerequisite: NAT R 1070, BIO SC 1500, CHEM 1310, MATH 1100. Graded on A/F basis only.

F W 2600--Ornithology (4).(same as Biological Sciences 2600). Structure, identification, habits, importance of regional birds. Field work, lectures, lab. Prerequisites: 5 hours Biological Sciences or instructor's consent.

F W 2700--Ichthyology (4).(same as Biological Sciences 2700). A broad introduction to the biology and ecology of fishes. Emphasis will be placed on understanding the adaptations fishes exhibit to aspects of their environment. Prerequisite: 8 hours Biological Sciences or equivalent.

F W 3002--Topics in Fisheries and Wildlife-Biological/Physical/Mathematics (cr. arr.).Organized study of selected topics. Intended for upper division students. Subjects and credit may vary from semester to semester.

F W 3085--Problems in Fisheries and Wildlife (cr.arr.).Individual problems studies to supplement regularly organized undergraduate courses in Fisheries and Wildlife. Proposal for problems study must be arranged by student and supervising faculty member prior to registration. Prerequisite: consent of supervising faculty member.

F W 3200--Aquaculture (3).This course aims to develop an understanding of key aspects of the practice of fish culture, an awareness of aquatic species being cultured worldwide, and an appreciation of why aquaculture is expanding so rapidly on a global basis and the emerging environmental concerns associated with aquaculture growth. Graded on A/F

basis only.

F W 3300--Wildlife Damage Management (3).To explore wildlife damage conflicts involving human health and safety, agricultural resources, economics and natural resources. The course studies damage caused by wildlife species and methods to alleviate damage. Covers wildlife diseases, human dimensions and wildlife policies. Graded on A/F basis only.

F W 3350--Wildlife Damage Management Lab (1).To explore wildlife damage management techniques in a field setting. To gain knowledge in assessing wildlife damage and the responsible species and determine the best approach to reduce that damage. Pre/Corequisite: FW 3300. Graded on A/F basis only.

F W 3400--Water Quality and Natural Resource Management (3).Introduction to broad aspects of water quality science, management and policy. Topics include aquatic ecology, eutrophication, lake and coastal management, water supply and treatment, watershed management with respect to agriculture and urban development, and toxicology. Prerequisite: CHEM 1310 and NAT R 1070 or instructor's consent.

F W 3500--Wildlife Conservation in British Cities (3-6).(same as Agriculture 2190). Five week study abroad course focusing on approaches to wildlife conservation in London, Birmingham, Manchester, Liverpool and Edinburgh. Students will learn how managers blend ecology, conservation, and participatory approaches to management to conserve species in a human dominated landscape. Hands on involvement with conservation projects included. Prerequisites: NAT R 1060 or 1070, Management course in SNR; instructor's consent.

F W 3600--Introduction to Conservation Biology (3). Introduction to principles of conservation biology. Application of ecological concepts and conservation biology principles to management of endangered species, biodiversity and threatened ecosystems. Prerequisite: BIO SC 3650.

F W 3660--Mammalogy (4). (same as Biological Sciences 3660). Taxonomy, distribution, structure, habits, importance of mammals; emphasizes those of central United States. Prerequisite: junior standing or instructor's consent.

F W 3800--Waterfowl Biology and Management (3). Taxonomy of waterfowl of the world. Emphasis on ecology, behavior, population dynamics, physiology and management of North American waterfowl. Prerequisites: F & W 2600 or instructor's consent.

F W 4002--Topics in Fisheries and Wildlife-Biological/Physical/Mathematics (cr.arr.). Organized study of selected topics intended primarily for senior-level students in Fisheries and Wildlife Sciences.

F W 4100--Limnology (3-4). (same as Biological Sciences 4100) (lecture/lab: 4 hrs.; lecture only: 3 hrs.) Ecology of inland waters with emphasis on productivity. Prerequisites: senior standing or BIO SC 3650.

F W 4200--Urban Wildlife Conservation (3). Reviewing the theory and practice of ap-

plying ecological concepts to the management of wildlife species in urban areas. Prerequisites: BIO SC 3650 or instructor's consent.

F W 4300--Fisheries Management (3). Introduction to the scientific principles and techniques of fishery management. Integrates ecological principles with social, economic and legal considerations. Prerequisites: BIO SC 3650 and STAT 2530.

F W 4400--Techniques for Fisheries Management and Conservation (3). Introduction to techniques (field and analytical/quantitative) used by fisheries and conservation biologists. Fosters understanding of techniques uses, advantages, limitations, biases, and data interpretation. Extended weekly field outings require chest waders and life jackets. Prerequisites: graduate standing and BIO SC 3650 and STAT 2530 or NAT R 3110 and F & W 2700 or 4300.

F W 4500--Animal Population Dynamics and Management (3). Quantitative modeling approach to examining principles and analysis techniques of fish and wildlife population dynamics. Emphasis on approaches useful in the management of exploited species. Prerequisites: MATH 1400, STAT and BIO SC 3650.

F W 4600--Ecosystem Management (4). Explores the development and implementation of large-scale approaches to restoring and maintaining ecosystems for sustainability. Incorporates ecological, socio-economic, and

institutional factors that influence natural management agencies. Prerequisites: BIO_SC 3650. Graded on A/F basis only.

F W 4700--Wildlife Research and Management Techniques (4). Research and Management methods for wildlife populations and habitats. Prerequisite: BIO SC 3650 and STAT 2530 or NAT R 3110. One week pre-semester field session required.

F W 4800--Environmental Toxicology (3). Introduction to classes of chemicals, tools, methods, and approaches used in environmental toxicology. Emphasizes fundamentals of toxicology, dose-response relationships, evaluation of contaminant issues, strategies, and exposure analysis/toxicity assessment strategies in a risk assessment. Prerequisites: CHEM 1320 and F&W 3400 or instructor's consent.

F W 4940--Fisheries and Wildlife Internship (cr.arr.). Supervised professional experience with an approval public or private organization. Prerequisite: Fisheries and Wildlife majors only, instructor's consent. Graded on S/U basis only. May be repeated for credit.

F W 4950--Undergraduate Research in Fisheries and Wildlife (cr.arr.). Individually directed field or laboratory research for students under faculty supervision. Project must be arranged by student and faculty member prior to registration. Prerequisite: consent of supervising faculty member.

F W 4960--Special Readings in Fisheries and Wildlife (cr.arr.). Critical review of current literature and research in fisheries and wildlife sciences. Project must be arranged by student and faculty supervisor prior to registration. Prerequisites: supervising faculty member's consent required.

RESEARCH PROFESSOR M.A. Gold, R. Guyette
RESEARCH ASSISTANT PROFESSOR C.H. Lin

The forestry undergraduate major is based on a foundation of communication, analytical science, humanities and professional courses that provide students with prerequisites for additional professional courses as well as with a basic liberal education. Four emphasis areas are offered: forest resource management, urban forestry, industrial forestry management and individualized studies.

The department offers BSF, MS and PhD degrees with majors in Forestry. A minor is also available.

Major Program Requirements - Forestry (BSF)

The forestry major requires the successful completion of 125 credits. In addition to the University graduation requirements, including general education, students must meet college and school as well as department and major requirements.

Major core requirements	12
(May also fill University general education requirements)	
MATH 1400: Calculus for Social and Natural Sciences I.....	3
CHEM 1100: Atoms and Molecules w/Lab	3
BIOCHM 2110: The Living World: Molecular Scale	3
AG EC 1041: Applied Microeconomics OR	
AG EC 1042: Applied Macroeconomics OR	
AG EC 2070: Environmental Economics and Policy	3
Major core science	16-18
BIO SC 1200: General Botany w/Lab (5) OR	
PLNT S 2110: Plant Growth and Culture (3) AND	
PLNT S 2120: Plant Sci Lab (1)	4-5
GEOL 1100: Principles of Geology w/Lab OR	
GEOL 1200: Environmental Geology w/Lab	4
SOIL 2100: Intro to Soils (3) AND	
SOIL 2106: Soil Science Lab (2)	5
PHYSICS 1210: College Physics I (4) OR	
ATM SC 1050: Intro. Meteorology (3)	3-4
Major core professional	35
NAT R 1070: Ecology and Renewable Resource Mgmt.	3
STAT 2530: Statistical Methods in Natural Resources	3
NAT R 3110: Natural Resource Biometrics	3
NAT R 4353: Natural Resource Policy & Administration ..	3
NAT R 4970: Resource Practicum	3
FOREST 2151: Dendrology	4
FOREST 4320: Forest Ecology	5

FOREST 4330: Practice of Silviculture	3
NAT R 4325: Introduction to Geographic Information Systems.....	3
FOREST 4390: Watershed Mgmt and Water Quality	3
PR TR 3231: Principles of Interpretive Outdoor Recreation	3
Major core summer field studies	6
FOREST 2540: Forest Hydrology Field Studies	1
FOREST 2541: Forest Utilization	1
FOREST 2542: Forest Measurement and Inventory	1
FOREST 2543: Forest Ecology Field Studies	1
FOREST 2544: Introduction to Silviculture and Management	1
FOREST 2545: Forest Management Planning	1

Forestry Field Studies

Students enrolled in forestry are required to attend a specialized, six-week, summer field session in southeast Missouri. This session includes courses for 6 credits and is recommended between the sophomore and junior years.

Honors

Students who graduate with the following cumulative GPA values are awarded BSF degrees with Latin honors:

- 3.50-3.69 *cum laude*
- 3.70-3.89 *magna cum laude*
- ≥3.90 *summa cum laude*

Emphasis Areas

Four emphasis areas are offered within the BSF degree program. Three of these areas (forest resource management, urban forestry and industrial forest management) represent areas of specialization within the forestry profession. The individualized studies emphasis area allows students to specialize in an allied area under the direction of a faculty committee.

Emphasis in Forest Resource Management

The goal of the forest resource management emphasis area is to prepare students to deal with the ever-changing complexities of multiple-use resource management. Emphasis is on the applications of forest management to provide commodities and amenities in a sustainable fashion.

Graduates are qualified to develop and execute management plans in an environmentally safe, cost-efficient and effective manner at both the stand and the forest level. Graduates are prepared to enter the workforce in either the public or the private sector. Courses listed are in addition to university, college, department and forestry major requirements.

Emphasis core requirements..... 25+

FOREST 3212: Forest Health and Protection	4
FOREST 3207: Forest Fire Control and Use	2
FOREST 3240: Wood Technology	3
FOREST 4340: Tree Physiology	3
FOREST 4360: Forest Information Systems	3
FOREST 4380: Forest Resource Management	3
FOREST 4350: Forest Economics	3
F&W 4600: Ecosystem Management.....	4

Undesignated electives to total 125 hours

Emphasis in Urban Forestry

Urban forestry seeks the maintenance of vigorous and aesthetic tree systems that enhance urban and suburban environments. The responsibility of the urban forester is to establish, develop and administer tree management systems for metropolitan areas and other population centers.

Students in urban forestry learn communications and public relations skills as well as mid-level management procedures that prepare them to organize, staff, finance, plan and supervise urban forestry programs. Courses in management, administrative strategies and scientific foundations are incorporated into the urban forestry curriculum. Courses listed are in addition to University, college, department and forestry major requirements.

Emphasis core requirements	25+
FOREST 3212: Forest Health and Protection	4
FOREST 3290: Urban Forestry	2
FOREST 4340: Tree Physiology	3
PLNT S 2210: Ornamental Woody Plants	3
PLNT S 3230: Plant Propagation	3
PLNT S 2254: Landscape Design	3
PLNT S 3255: Landscape Maintenance	3
PLNT S 4350: Nursery Crop Production and Management	4

Undesignated electives to total 125 hours

Emphasis in Industrial Forest Resource Management

This emphasis area is intended for students interested in working in the private sector either in large corporations or for forest products entrepreneurs. The curriculum includes courses in business, economics, management and production-oriented forestry.

Graduates receive a background in forest management and logging operations, business principles and communications. They are prepared to accept decision-making positions in private-sector forest management. Courses listed are in addition to University, college, department and forestry major requirements.

Emphasis core requirements	21+
FOREST 3240: Wood Technology	3
FOREST 4360: Forest Information Systems	3
FOREST 4380: Forest Resource Management	3
FOREST 4350: Forest Economics	3
FOREST 4365: Logging Systems: Operations and Analyses	3
AG EC 2156: Introduction to Environmental Law OR AG EC 3256: Agribusiness and Biotechnology Law OR AG EC 3257: Rural and Agricultural Law.....	3
FINANC 1000: Principles of Finance	3

Undesignated electives to total 125 hours

Emphasis in Individualized Studies in Forestry

This emphasis area allows students with interests in both forestry and an allied field to obtain a degree in forestry combined with a customized specialization in a field of interest. The allied field can be wildlife biology and management, ecology, environmental science, environmental studies, interpretation of natural resources, environmental law, soils or others.

The individualized study program requires completion of 27 credits to be determined by the student and a three-member faculty committee, two of whom must be forestry faculty. Courses listed are in addition to university, college, department and forestry major requirements.

Emphasis core requirements	27+
Individualized study program	27+

Undesignated electives to total 125 hours

Dual Major - Forestry/Fisheries and Wildlife

In addition to courses that satisfy university general education requirements, students who plan to complete a dual major in fisheries and wildlife/forestry must complete the required fisheries and wildlife sciences, forestry, and elective options

to reach 140 credits. The dual major does not allow for any general elective hours.

Major core science	44-46
BIO SC 1200: General Botany w/Lab.....	5
BIO SC 1500: Intro to Biological Systems w/Lab.....	5
MATH 1400: Calculus for Social & Natural Sciences I.....	3

FORESTRY COURSES--

FOREST 1102--Topics in Forestry - Biological/Physical/Mathematical (1-3).Organized study of selected topics in forestry. Intended for undergraduate students.

FOREST 1104--Topics in Forestry - Social Science (1-3).Organized study of selected topics in forestry. Intended for undergraduate students.

FOREST 2151--Dendrology (4).An introduction to the biology of trees, emphasizing identification in the field, taxonomy, ecology, geographic distribution and economic significance of forest species. Prerequisites: BIO SC 1200 or PLNT S 2120 and 3130 or instructor's consent.

FOREST 2540--Forest Hydrology Field Studies (1).Introduction to forest hydrology, watershed management, water quantity and quality, climate and biophysical relationships. Prerequisites: SOIL 2100, FOREST 2151 and FOREST 2541, 2542, 2543, 2544 and 2545 concurrently.

FOREST 2541--Forest Utilization (1).Field studies of logging and milling of timber. Prerequisites: SOIL 2100, FOREST 2151 and FOREST 2540, 2542, 2543, 2544 and 2545 concurrently.

FOREST 2542--Forest Measurement and Inventory (1).Field measurement of standing trees including diameter, height and age. Estimation of forest timber resources using a variety of sampling schemes and techniques. Introduction to Arcview and growth models. Prerequisites: SOIL 2100, FOREST 2151 and FOREST 2540, 2541, 2543, 2544 and 2545 concurrently.

FOREST 2543--Forest Ecology Field Studies (1).Field studies of vegetation, soils, habitats and ecological units. Application of ecological principles of natural resource management and understanding of natural and managed forested communities with an emphasis on southeastern Missouri. Prerequisites: SOIL 2100, FOREST 2151 and FOREST 2540, 2541, 2542, 2544 and 2545 concurrently.

FOREST 2544--Introduction to Silviculture and Management (1).Management objectives and stand prescriptions, regeneration and intermediate silvicultural treatments, management on private and federal forest lands, tree evaluation and timber marking. Prerequisites: SOIL 2100, FOREST 2151 and FOREST 2540, 2541, 2542, 2543 and 2545 concurrently.

FOREST 2545--Forest Management Planning (1).Preparation and presentation of a written forest management plan using material and data developed in prerequisite courses. Prerequisites: SOIL 2100, FOREST 2151 and FOREST 2540, 2541, 2542, 2543 and 2544 concurrently.

FOREST 3201--Topics in Forestry (cr. arr.).Organized study of selected topics. Intended primarily for undergraduate Forestry students. Subjects and credit may vary from semester to semester.

FOREST 3207--Forest Fire Control and Use (2).Fundamentals of all phases of fire protection. Objectives and techniques in use of fire.

FOREST 3212--Forest Health and Protection (4).Fundamental concepts of forest pathology and forest entomology including emphasis on ecological principles and management strategies. Prerequisite: FOREST 2151.

FOREST 3217--Fire and Society (2).A study of the relationship between society (humans) and fire. What kind of role does fire play in day-to-day life? How has fire influenced our behavior since Day 1? How do we view fire today?

FOREST 3240--Wood Technology (3).Structure and identification of commercial woods. Relation of growth to physical and chemical properties of wood.

FOREST 3290--Urban Forestry (2).The culture and management of trees in urban areas, including ownership patterns, species composition, growth environment, amenities provided and evaluation. One-day field trip required. Prerequisites: FOREST 2151 or PLNT S 2210, or instructor's consent.

FOREST 3300--Problems in Forestry (cr. arr.).Problems in Forestry

FOREST 3350--Special Readings in Forestry (cr.arr.).Critical review of current literature and research in forestry, fisheries and wildlife, and methods of presenting research results.

FOREST 4301--Topics in Forestry (3).Organized study of selected topics. Intended for upper-division students. Subjects and credit may vary from semester to semester.

FOREST 4320--Forest Ecology (5).Principles of community, ecosystem, and population ecology and examination of the influence of environmental factors and human activity on forest dynamics, composition, structure and function. Prerequisites: FOREST 2151, BIO SC 3210 or instructor's consent.

FOREST 4330--Practice of Silviculture (3).Applied ecological principles, cultural practices, tree improvement techniques and treatments to forest stands and other lands for systematic production of goods and services. Prerequisite: FOREST 4320.

FOREST 4340--Tree Physiology (3).Lectures on physical and chemical phenomena involved in the functions and activities of trees. Prerequisites: BIOCHM 2110, BIO SC 1200, CHEM 1100; or instructor's consent.

FOREST 4350--Forest Economics (3).Economic principles applied to production/marketing of goods and services from forest land: emphasizes capital and land factors and investment alternatives related to time. Prerequisites: Mathematics requirement completed; AG EC 1042, or 2070.

FOREST 4360--Forest Information Systems (3).Applied course in the area of aerial photogrammetry, forest inventory, and simple GIS applications for developing, maintaining, and utilizing these tools in forest management. Prerequisite: NAT R 1090 or instructor's consent.

FOREST 4365--Logging Systems: Operations and Analyses (3).A systems approach to timber harvesting from acquisition through engineering to log transport. Regional aspects and influences will be considered. Prerequisites: FOREST 2540, 2541.

FOREST 4370--Wildland Fire Management (3).Management, administration, and organization of wildland and prescribed fires and other natural and manmade disasters. Emphasis placed on organizational arrangements of incidents rather than on either strategy or tactics. Prerequisites: FOREST 3207 or equivalent.

FOREST 4375--Forest Stand Dynamics (3).Examine the development of forest structure, the role of disturbance on forest change and the use of this knowledge in applying silvicultural systems. Both forest stand dynamics theories, structure diagrams, forest growth models, and long term data sets are used to understand stand dynamics. Prerequisite: FOREST 4330 or instructor's consent.

FOREST 4380--Forest Resource Management (3).Teaches resource managers how to develop a plan for the management of forest resources using managerial, economic, silvical and wildlife techniques for its enhancement and to meet the landowner's objectives. Prerequisites: FOREST 4330 and 4350.

FOREST 4385--Agroforestry I: Theory, Practice and Adoption (4).Understand biophysical, ecological, social and economic features of temperate and tropical agroforestry. Covers the basics of design, planning and implementation of agroforestry practices. Prerequisite: junior standing.

FOREST 4390--Watershed Management and Water Quality (3).Hydrologic processes on wildland watersheds. Effects of forest land management on streamflow, erosion and water quality. Prerequisites: MATH 1400 or instructor's consent.

FOREST 4940--Forestry Internship (cr. arr.).Supervised professional experience with an approved public or private organization. Prerequisite: Forestry majors only, instructor's consent. Graded on S/U basis only. May be repeated for credit.

FOREST 4994--Senior Honors Research in Forestry (1-3).Prerequisites: 3.30 GPA and instructor's consent.

FOREST 4995--Senior Honors Research in Forestry (1-3).Prerequisites: 3.30 GPA and instructor's consent.

Department of Parks, Recreation and Tourism

D.R. Vaught, Chair
School of Natural Resources
105 Anheuser-Busch Natural Resources Building
(573) 882-7086 (573) 882-9517
Fax: (573) 882-9526
Vaughtdr@missouri.edu

FACULTY

ASSOCIATE PROFESSOR G. L. Hitzhusen, J.M. Morgan
ASSISTANT PROFESSOR C. Barbieri, D. R. Vaught,
S.A. Wilhelmstain

The Department of Parks, Recreation and Tourism is one of the most comprehensive accredited programs nationally, with approved options in three professional areas: leisure service management, natural resources recreation management and tourism development. The department integrates classroom learning with applied research and internship experiences and is a leader in technology infusion.

All students are required to complete an internship placement, normally taken during the last year of study. The semester-long internship is with an off-campus agency or organization chosen by the student and faculty. Regional, national and international internship placements are possible. Students may receive direct financial assistance from the agency or organization during the internship.

The department offers BS and MS degrees with majors in Parks, Recreation and Tourism.

ADMISSION

It is possible for students who have a broad, liberal education to transfer into the department without a significant time penalty toward graduation. CLEP credits are accepted and evaluated on an individual basis.

Major Program Requirements - Parks, Recreation and Tourism

Satisfactory completion of 132 credits is required: a minimum of 120 credits in course work and a 12-credit internship with a cumulative GPA of 2.0. Professional preparation includes course work in a professional core, professional option requirements and electives, and an internship. Students must also complete all degree, department, college and university graduation requirements, including university general education.

Major core requirements

Mathematics9

College Algebra.....	3
Accounting	3
Statistics	3
Social and behavioral science.....	18
Include approved courses in each of the following areas:	
Economics	3
Marketing	3
History/political science (must satisfy the state requirement for history)	3
Social science	3
Behavioral science.....	3
Human growth and development	3
General electives.....	10-13
Professional core (required for all options)	21
P R TR 1010: Introduction to Leisure Studies	3
P R TR 1011: Academic Planning & Career Orientation in Parks, Rec. & Tourism.....	1
P R TR 2111: Introduction to Planning and Evaluating Leisure Environments	3
P R TR 3210: Personnel Management and Leadership in Leisure Services	3
P R TR 3215: Program Development in Leisure Services	3
P R TR 3220: Intro to Recreation for Individuals with Disabilities.....	2
P R TR 4208: Administration of Leisure Services	3
P R TR 4333: Park Management.....	3
Professional options requirements.....	9-12+
Leisure service management emphasis	6
P R TR 4355: Private and Commercial Recreation Select two from nine available courses.....	6
Natural resources recreation management emphasis	9
P R TR 3230: Introduction to Parks and Outdoor Recreation Services	3
P R TR 3231: Principles of Interpretive Outdoor Recreation	3
NAT R 4970: Resource Practicum	3
Tourism development emphasis.....	9
P R TR 4355: Private and Commercial Recreation.....	3
P R TR 4356: Tourism Management.....	3
P R TR 4357: Tourism Planning and Development	3
Internship.....	13
P R TR 3189: Pre-internship Seminar	1
P R TR 4940: Parks, Recreation and Tourism Internship.....	12
Professional option electives.....	18-21
Advisor-approved courses specific to the student's selected academic option	

Honors

Students who graduate with the following cumulative GPA values are awarded the baccalaureate degree accordingly:

3.50-3.69	<i>cum laude</i>
3.70-3.89	<i>magna cum laude</i>
3.90 +	<i>summa cum laude</i>

Sample Eight-Semester Program

Bachelor of Science degree with a major in Parks, Recreation and Tourism

------------------	----

PARKS, RECREATION AND TOURISM COURSES

PRTR 1010--Introduction to Leisure Studies (3).History of recreation and leisure movement; theories and philosophies of play, recreation and leisure. Developmental stages of leisure services to contemporary status.

PRTR 1011--Academic Planning & Career Orientation in Parks, Recreation & Tourism (1).Orientation to the field and analysis of career opportunities in leisure services. Academic planning leading to B.S. in parks, recreation and tourism. Prerequisite: PR&TR major. Must be taken in first semester as a major. Graded on S/U basis only.

PR TR 1091--Research & Descriptive Statistics for Parks, Recreation and Tourism (3).An introduction to research methods and techniques and descriptive statistics and their application in the field of recreation and park administration. Math Reasoning Proficiency Course.

P R TR 2101--Topics in Park, Recreation and Tourism (1-3).Specialized topic content in parks, recreation and tourism programs, management and/or development. Subject content and credit may vary by semester based on faculty resources and student needs. Offered periodically.

P R TR 2103--Topics in Park, Recreation and Tourism - Behavioral Science (1-3).Specialized topic content in parks, recreation

and tourism programs, management and/or development. Subject content and credit may vary by semester based on faculty resources and student needs. Offered periodically.

PRTR 2104--Topics in Park, Recreation and Tourism - Social Science (1-3).Specialized topic content in parks, recreation and tourism programs, management and/or development. Subject content and credit may vary by semester based on faculty resources and student needs. Offered periodically.

P R TR 2107--Organization of Aquatic Programs (2).History; evaluation of leadership training methods, facilities, pool and beach control and management procedures. Prerequisite: sophomore standing.

PR TR 2111--Introduction to Planning and Evaluating Leisure Environments (3).Presentation of basic planning principles. Evaluation of existing areas and facilities based upon planning guidelines. Consideration of park plan, standards, terminology, map preparation and evaluation.

PRTR 2115--Consortium Field Experience (1-3).An organized undergraduate experiential learning opportunity. Prerequisite: instructor's consent.

P R TR 2140--Camp Leadership and Management (3).Organization and administration of camps; program planning; selection and training of staff; camp site selection and development; health and safety; camp history, standards, trends; practical application of camp

craft skills. Prerequisite: instructor's consent.

P R TR 2142--Leadership of Social Recreation (2).Study and practice in techniques of leading social activities suitable for various social settings. Offered periodically.

PR TR 2143--Organization and Conduct of Recreation Centers (2).Problems of operation, management of playgrounds, recreation centers.

PRTR 2206--Introduction to Leisure Service Management (3).An introduction to public recreation in local government. Prerequisites: P R&TR 1010, 1011, 2111 or instructor's consent.

P R TR 3189--Pre-Internship Seminar in Parks, Recreation and Tourism (1).The course is designed to prepare students for 4940 Parks, Recreation and Tourism Internship. Emphasis is placed on students' responsibilities prior to enrollment in Parks, Recreation and Tourism 4940, selecting internship sites and completing internship requirements.

P R TR 3210--Personnel Management and Leadership in Leisure Services (3).Considers theories and practices of leadership and management in leisure services employment. Topic presentation in relationships, attitudes, supervision, motivation and group functioning.

P R TR 3215--Program Development in Leisure Services (3).Fundamental principles and techniques of program development; seasonal, year round, specialty areas and total agency program planning. Prerequisites: P R&TR

1010, 1011, or instructor's consent.

P R TR 3220--Introduction to Recreation for Individuals with Disabilities (2). Principles, concepts and historical development of recreation for individuals with disabilities. Explanation of attitudes, issues, practice and barriers related to recreation participation.

P R TR 3227--Introduction to Therapeutic Recreation (3). An investigation of therapeutic recreation service delivery models of the Parks, Recreation and Tourism 2111 and disabled in both institutional and community settings. Particular emphasis will be placed on advanced leadership and therapeutic interactional skills and dynamics.

P R TR 3230--Introduction to Parks and Outdoor Recreation Services (3). An overview of parks and outdoor recreation, natural environment, supply-demand-need relationships, interpretative programming, management philosophies/practices will be studied.

PRTR3231--Principles of Interpretive Outdoor Recreation (3). Interpretive principles and techniques employed to communicate values, natural history and cultural features to the recreation user.

PRTR4208--Administration of Leisure Services (3). Theoretical foundations of the organization and administration of leisure services in both community and institutional settings. Emphasis on the roles of the administrator.

P R TR 4312--Planning Recreation and Leisure Environments (3). Practical application of basic planning principles and design. Layout and design of various leisure-oriented areas and facilities. Site planning and analysis.

P R TR 4315--Senior Seminar in Leisure Services (3). Presentation of professional principles and issues in leisure services. Seminar study resulting in presentations and discussions. Prerequisites: P R&TR majors, professional core or instructor's consent.

P R TR 4327--Operation of Therapeutic Recreation: Procedures and Principles (3). Theories and principles of leadership and programming as they apply to recreation services for the ill, handicapped, and aged.

P R TR 4328--Leisure and Aging (3). Basic understanding of problems/needs of later maturity in relation to recreation. Characteristics/capabilities of aged, program settings, financial support, planning guidelines emphasized. Objectives: provide fundamentals for recreation planning with aged individuals/groups. Offered periodically.

PR TR 4329--Therapeutic Recreation Education/Counseling Techniques (3). Techniques and models of leisure facilitation for use within a variety of clinical, residential and Institutional models. Theories of positive/negative leisure engagement reviewed.

P R TR 4330--Therapeutic Recreation Assessment/Evaluation Procedures (3). Reviews accepted clinical protocols for determining a client's physical, emotional, social and cognitive levels of functioning. Competencies in administering, scoring and interpreting multiple tools included.

P R TR 4331--Administration of Outdoor Recreation - Education Programs (3). Philosophies, essential principles, methods, techniques, resources, administrative and program practices for outdoor recreation and education. Offered periodically.

P R TR 4333--Park Management (3). Basic principles, practices and problems involved in managing public park systems. Consideration given to local, district, county, state, federal and foreign park systems.

P R TR 4340--Advanced Recreation Land Management (3). Advanced study of problems facing forest recreation managers. Topics include rivers recreation, wilderness management and citizen participation in decision making. Offered periodically.

PRTR4350--Problems in Parks, Recreation and Tourism (1-3). Prerequisite: departmental consent.

PR TR 4355--Private and Commercial Recreation Principles and Practice (3). Considers principles, practices, influences in public/private leisure services; influence of tourism/travel on public/private recreation services.

P R TR 4356--Tourism Management (3). Introduction to the scope and scale of the tourism industry. Focus on the industry components, concepts, structures, relationships, and issues with regard to accommodation, transportation, travel, regional development, political system, and the economic, social and environmental effects of tourism.

P R TR 4357--Tourism Planning and Development (3). Nature and scope of tourism planning at the local, regional, and national levels; economic social, environmental, and policy considerations. Comparative study of initiating, planning and implementing tourism and the organization of community resources for developing and controlling a tourism industry. Prerequisite: P R&TR 4356.

PRTR4940--Parks, Recreation and Tourism Internship (12). Supervised professional experience with an approved organization. Course entails weekly reports, case studies, agency evaluations and a special project related to the student's curricular emphasis. Prerequisite: P R&TR 3189, majors only, instructor's consent.

P R TR 4950--Independent Research in Parks, Recreation and Tourism (1-3). Independent research project in parks, recreation and tourism. Prerequisite: instructor's consent. Graded on A/F basis only.

Department of Soil, Environmental and Atmospheric Sciences

Anthony R. Lupo, Chair
 School of Natural Resources
 College of Agriculture, Food, and Natural Resources
 302 Anheuser-Busch Natural Resources Building

Atmospheric Science, Environmental Science, Soil Science
 (573) 882-6301

FACULTY

PROFESSOR S. H. Anderson, C. J. Gantzer
ASSOCIATE PROFESSOR, A. R. Lupo, P. S. Market,
 R. J. Miles, P. P. Motavalli, N.I. Fox
ASSISTANT PROFESSOR K. W. Goyne,
ADJUNCT PROFESSOR R. J. Kremer
INSTRUCTOR C. Frey, E. Aldrich
EXTENSION ASSISTANT PROFESSOR P. E. Guinan

The Department of Soil, Environmental and Atmospheric Sciences brings together students, staff and faculty working in the fields of environmental, atmospheric and soil science. Excellent opportunities exist for students wishing to explore these exciting areas of study.

Three emphasis areas are offered: Atmospheric Science, Environmental Science, and Soil Resource Management.

The department offers BS, MS and PhD degrees with a major in Soil, Environmental and Atmospheric Sciences. A minor with options in Environmental Science, Soil Science, or Atmospheric Science, is also available.

Major Program Requirements - Soil, Environmental and Atmospheric Sciences

In addition to university general education requirements, students must meet school and department major requirements.

Major core requirements	
Social and behavioral sciences	3
Economics/business elective	
Math reasoning skills	3-5
MATH 1400: Calculus for Social and Natural Sciences I (3)	
OR MATH 1500: Analytical Geometry and Calculus I (5)	
(for Atmospheric Science students, MATH 1500 is required.)	
Computer science	3
AGRIC 1111: Computing and Information Systems I	3
Major capstone experience	3
ATM SC 4990: Daily Analysis and Forecast Interpretation	
OR	
NAT R 4970: Natural Resources Practicum	

Soil, environmental, and atmospheric sciences (select from)	11
ATM SC 1050: Introductory Meteorology (3)	
SOIL 2100: Introduction to Soil Science (3) OR	
SOIL 3290: Soils and the Environment (3)	
ATM SC electives (5) OR SOIL electives (5) OR	
ENV SC electives (5)	
Major core quantitative skills	3
STAT 1400: Elementary Statistics for Agriculture (3) OR	
STAT 2530: Statistical Methods in Natural Resources (3)	
Major core science requirements	14
CHEM 1310: General Chemistry I.....	2
CHEM 1320: General Chemistry II with/Lab.....	3
Science electives	9

Dual Degree - Geological Sciences and Soil, Environmental and Atmospheric Sciences

The Department of Soil, Environmental and Atmospheric Sciences and the Department of Geological Sciences offer a dual BS in Geology and in Soil, Environmental and Atmospheric Sciences with an emphasis in Soil Resource Management. The dual degree program requires 132 credits for graduation. For more information on the dual degree program, contact an advisor in the Department of Soil, Environmental and Atmospheric Sciences or the Department of Geological Sciences.

Emphasis in Atmospheric Science

Study of atmospheric science prepares the student for employment as a professional meteorologist in the National Weather Service, the military and other government agencies as well as meteorological consulting firms, broadcast outlets and industry. The emphasis in atmospheric science adheres to federal requirements for employment as a meteorologist, yet emphasizes interdisciplinary studies in natural resources leading to specialization in operational meteorology or environmental science. The course of study also serves as a preparatory curriculum for advanced study in atmospheric science. A major in soil, environmental and atmospheric sciences with an emphasis in atmospheric science requires 128 credits for graduation.

Emphasis core requirements

Emphasis general requirements

Math reasoning skills	5
MATH 1500: Analytical Geometry and Calculus I	
Communications	6
COMMUN 1200: Public Speaking	3
Choose one from the following or contact adviser for other selections	3
AG JRN 3210: Fundamentals of Communications (3)	
ENGLISH 2030: Professional Writing (3)	
COMMUN 3575: Business and Professional Speech Comm. (3)	
COMMUN 3576: Persuasive Speaking (3)	
Those desiring a career in broadcast meteorology should consider the following courses or contact an adviser for other selections:	
COMMUN 2100: Media Communication in Society (3)	
COMMUN 2315: Basic Audio Production and Performance (3)	
COMMUN 3390: Television Studio Production (3)	
COMMUN 3395: Television Field Production (3)	
THEATR 1400: Acting for Non-majors (3)	

Senior capstone experience	3
ATM SC 4990: Daily Analysis and Forecast Interpretation	
Emphasis core quantitative skills	
Statistics	3
STAT 1400: Elementary Statistics for Agriculture	
Quantitative electives.....	19
ATM SC 4800: Numerical Methods in Atmospheric Science and Natural Resources	3
MATH 1160: Precalculus Mathematics	5
MATH 1700: Calculus II.....	5
MATH 2300: Calculus III	3
MATH 4100: Differential Equations.....	3

Emphasis core science requirements.....	10
PHYSCS 2750: University Physics I.....	5
PHYSCS 2760: University Physics II.....	5

Other emphasis core requirements.....	25
ATM SC 4310: Atmospheric Thermodynamics	4
ATM SC 4320: Atmospheric Dynamics.....	4
ATM SC 4350: Mesoscale Meteorology & Dynamics.....	3
ATM SC 4510: Remote Sensing for Meteorology & Natural Resources	3
ATM SC 4550: Atmospheric Physics.....	3
ATM SC 4650: Long Range Forecasting	3
ATM SC 4710: Synoptic Meteorology I.....	1
ATM SC 4720: Synoptic Meteorology II.....	4

Credits from general, quantitative, science, and atmospheric science to complete 128 credits

Emphasis in Environmental Science

Addressing environmental problems such as water and air quality, waste management and land use issues often requires an interdisciplinary science education as well as an understanding of the social and economic context of the problem. The environmental science emphasis is designed to prepare students for careers as environmental professionals.

Within the environmental science emphasis, students can choose one of three tracks:

- water quality
- land management
- air quality

Students in all tracks take a mixture of natural and applied science courses such as ecology, soil science, forestry, atmospheric science, or fisheries and wildlife.

Other required classes provide students with technical and outreach skills such as geographical information systems (GIS) and additional communications courses, to prepare for work in environmental careers. Students also gain hands-on experience in their field of interest through off-campus internships and practical courses. Each of the tracks requires a 3-credit practical internship in natural resources. Students must complete 128 credits to graduate, including 21-23 credits in the water quality, land management or air quality track.

Among the skills and abilities students develop as graduates with an environmental science emphasis are:

- Understanding of ecosystems and the factors affecting environmental processes and problems
- Facility with environmental monitoring techniques and instrumentation
- Knowledge of technologies and methods for remediation of degraded environments
- Capacity to effectively communicate and educate others about the environment

- GEOG 4940: Geographic Information Systems II (3)
- NAT R 4325: Intro to GIS (3)
- Electives 12-15

Emphasis in Soil Resource Management

This course of study prepares the student for employment as a professional soil scientist in government, industry or consulting. Courses offered in soil science emphasize the application of basic physical and biological sciences to understanding the function and use of soils. A major in soil, environmental and atmospheric sciences with an emphasis in soil resource management requires 128 credits for graduation.

Soil science professionals have a wide range of career opportunities, including working in land-use planning and assessment, agricultural and horticultural production, consulting and sales, landscaping and recreational management. Among the state and federal agencies that employ soil scientists are the USDA-Natural Resources Conservation Service, the US Forest Service, the US Environmental Protection Agency, the Missouri Department of Natural Resources, the Missouri Department of Conservation and the Missouri Department of Health and Senior Services. Opportunities in private industry include working in environmental consulting firms and the horticultural and agricultural production and service industries.

Emphasis core general requirements

- Math reasoning skills.....3**
- MATH 1400: Calculus for Social and Natural Sciences

Senior capstone experience3
 NAT R 4970: Natural Resources Practicum

Emphasis core quantitative skills3
 Additional course in math, computer science, and statistics or one of the following
 NAT R 4320: Hydrologic & Water Quality Modeling
 NAT R 4325: Introduction to GIS
 NAT R 4365: GIS Applications
 NAT R 4385: Landscape Ecology and GIS Analysis I
 NAT R 4395: Landscape Ecology and GIS Analysis II

Emphasis core science requirements (including one course in organic or biochemistry)

General chemistry3
 CV ENG 4200: Remote Sensing of the Environment.....3

Organic chemistry
 CHEM 2050: Intro. Organic Chemistry w/lab (5) OR
 CHEM 2100: Organic Chemistry I (3)
 CHEM 2120: Organic Chemistry II3
 CHEM 2140: Organic Lab II.....2

Biochemistry3
 BIOCHM 2110: The Living World: Molecular Scale OR
 BIOCHM 2112: Biotechnology in Society

Biological science.....6
 ENV SC 1100: Introduction to Environmental Science(3) OR
 NAT R 1070: Ecology and Renewable Resource Management (3)
 PLNT S 2110: Plant Growth & Culture (3) OR
 BIO SC 1010: General Principles & Concepts of Biology (3) AND
 BIO SC 1020: General Biology Laboratory (2) OR
 BIO SC 1200: General Botany w/lab (5)

Geology (any course).....4

Recommended science electives9
 Courses in biochemistry, biology, chemistry, entomology, geology, physics, and plant pathology as well as the following:
 CV ENG 3702: Hydrology (3)
 FOREST 4320: Forest Ecology (3)
 PLNT S 3210: Principles of Weed Sciences (4)
 PLNT S 3225: Plant Breeding and Genetics (3)
 PLNT S 4315: Crop Physiology (3)

Other emphasis core requirements
 ATM SC 1050: Introductory Meteorology.....3
 SOIL 2100: Introduction to Soils3
 SOIL 2106: Soil Science Lab2
 SOIL 3290: Soils and the Environment3

Additional soils course from the following (12 credits)
 SOIL 4305: Environmental Soil Physics (3)
 SOIL 4306: Environmental Soil Physics Laboratory (2)
 SOIL 4308: Soil Conservation (3)
 SOIL 4312: Environmental Soil Microbiology (3)
 SOIL 4313: Soil Fertility & Plant Nutrition (3)
 SOIL 4314: Soil Fertility & Plant Nutrition Laboratory (2)
 SOIL 4318: Environmental Soil Chemistry (3)
 SOIL 4320: Genesis of Soil Landscapes (4)
 SOIL 4360: Precision Agriculture Science & Technology (3)

Recommended electives, other soils courses or the following courses (7 credits)

BIOL EN 4150: Soil and Water Conservation Engineering (3)
 BIOL EN 4250: Irrigation and Drainage Engineering (3)
 CV ENG 3400: Fundamentals of Geotechnical Engineering (4)

F&W 3400: Water Quality and Natural Resource Mgmt.(3)
 FOREST 4390: Watershed Management and Water Quality (3)

NAT R 4320: Hydrologic and Water Quality Modeling (3)

Credits from general, quantitative, science and soil science to complete 128 total.

Minor in Soil, Environmental and Atmospheric Sciences

A minor in soil, environmental and atmospheric sciences is offered at the undergraduate level with three options: atmospheric science, environmental science, and soil science.

The minor in soil, environmental, and atmospheric sciences with an option in atmospheric science prepares the student for jobs in journalism and broadcast meteorology as well as for certification required by government agencies. A minor with an option in atmospheric science requires a minimum of 15 credits including:

ATM SC 1050: Introductory Meteorology.....3
 ATM SC 2720: Weather Briefing1
 ATM SC 3600: Climates of the World3
 Additional credits in atmospheric science or in a closely related area as recommended by the minor advisor.....8

The minor in soil, environmental and atmospheric sciences with an option in environmental science requires a minimum of 15 credit hours in environmental science courses with at least 9 credit hours at the 3000 level or above. Selection of courses should be made in consultation with an advisor in environmental science. The following courses are required:

ENV SC 1100: Introduction to Environmental Science.....3
 ENV SC 3290: Soils and the Environment.....3
 ENV SC 3330: Environment Land Use Management.....3
 F & W 3400: Water Quality and Natural Resource Mgmt...3
 Additional credits in environmental science as recommended by the advisor.....3

The minor in soil, environmental and atmospheric sciences with an option in soil science requires a minimum of 15 credits in soil science. Selection of courses should be made in consultation with an advisor in soil science. Students with the following majors often choose minors with an option in soil science: forestry, fisheries and wildlife, plant science, and geological sciences. This minor also provides assistance with meeting certification as a waste water specialist. The following course are required:
 SOIL 2100: Introduction to Soils.....3
 SOIL 2106: Soil Science Laboratory.....2
 SOIL 4320: Genesis of Soil Landscape.....4
 Additional credits at the 3000 level or higher is soil science as recommended by the minor advisor.....6

ATMOSPHERIC SCIENCE COURSES

ATM SC 1050--Introductory Meteorology (3).(same as Geography 1050). Physical processes of atmosphere in relation to day-to-day changes in weather.

ATM SC 1110--Introduction to Atmospheric Science (3).Physical process of the atmospheric and climate system will be related to day-to-day weather changes. Students will be introduced to the laws of motion and thermodynamics that govern motions in geophysical fluid. Graded on A/F basis only. Prerequisite: MATH 1160 or enrolled in MATH 1500 or instructor's consent.

ATM SC 2720--Weather Briefing (1).Student participation in daily discussions of current weather patterns and forecasts and their applications to weather sensitive activities including aviation, agriculture and industry. Prerequisites: ATM SCI 1050.

ATM SC 3000--Independent Study in Atmospheric Science (1-3).Independent study of a topic dealing with meteorological theory or application of meteorological science to the solution of relevant problem. Prerequisites: upper-level standing, ATM SC 1050 or equivalent, and instructor's consent.

ATM SC 3600--Climates of the World (3).(same as Geography 3600). A study of the world distribution of climates based on "cause and effect" relationships. Special attention is given to the impacts of climate on humanity. Prerequisites: ATM SC 1050 or equivalent or graduate standing.

ATM SC 4001--Topics in Atmospheric Science (cr.arr.).Development of theory and applications for selected topics in atmospheric science. Prerequisites: junior standing and instructor's consent.

ATM SC 4110--Broadcast Meteorology I (2).An introduction to broadcast meteorology including the business of media, use of meteorological data to produce a forecast, and television and radio presentation skills. Prerequisites: ATM SC 1110, 2720, or equivalents, and Co-requisite: ATM SC 4710. Restricted to Atmospheric Science majors or instructor's consent. Graded on A/F basis only.

ATM SC 4310--Atmospheric Thermodynamics (4).Thermodynamics of dry and moist air, atmospheric hydrostatics, convection, and development of the fundamental equations of geophysical fluid dynamics. Prerequisites: ATM SC 1050, MATH 1700 (C or better), and one physics course.

ATM SC 4320--Atmospheric Dynamics (4).Dynamics and kinematics of atmospheric flow. Manipulation of fundamental equations, numerical modeling of atmosphere. Prerequisite: ATM SC 4310/7310. odd years.

ATM SC 4350--Mesoscale Meteorology and Dynamics (3).Survey of mesoscale phenomena, observing systems, analysis techniques, and modeling. Topics include fronts, jet streaks, gravity waves, organized convection, tornadoes, and severe local storm forecasting and structure. Prerequisite: ATM SC 4720/7720 and MATH 2300.

ATM SC 4400--Micrometeorology (3).Study of transport processes in the surface boundary layer. Important applications in pollution will

be discussed. Prerequisite: ATMS 4310 or PHYSICS 2760, MATH 2300.

ATM SC 4500--Advanced Meteorological Observation and Instrumentation (3).Automated weather observation and instrumentation used in networks of remote automated weather stations. Emphasis on electronic instrumentation, datalogger programming, data collection and data management, generating dynamic reports on the World Wide Web. Prerequisite: ATM SC 1050. May be repeated for credit. f.

ATM SC 4510--Remote Sensing for Meteorology and Natural Resources (3).Principles of remote sensing with emphasis on the properties of atmosphere and the earth's surface from airborne and satellite sensors. The techniques for using geosynchronous and orbiting satellite platforms for assessing weather and natural resource features. Prerequisites: ATMS 1110, MATH 1500, junior standing or instructor's consent.

ATM SC 4520--Meteorology of the Biosphere (3).(same as Geography 4520). Energy balance and mass microenvironment of plants and animals. Effects of weather events on plants and animal production discussed. Prerequisites: MATH 1400 or equivalent; one year of college physics; or instructor's consent.

ATM SC 4550--Atmospheric Physics (3).Physics of atmospheric nucleation-condensation, cloud droplet and precipitation formation, associated electrical phenomena, radiation transfer and remote sensing. Prerequisites: 1 year of college Physics and MATH 1700.

ATM SC 4590--Radar Meteorology (3).Course concerns the theory and application of radar in meteorology. Prerequisites: ATM SC 1110, MATH 1700, PHYSICS 2750. May be repeated for credit.

ATM SC 4650--Long-Range Forecasting (3).Physical-dynamical principles of long-range forecasting from a month to a year. Empirical and numerical approaches in forecast practice. Prerequisite: ATM SC 4050/7050 or 3600.

ATM SC 4710--Synoptic Meteorology I (4).Meteorological Data. Basic techniques for surface and upper air analysis, using selected examples of weather patterns. Prerequisites: ATM SC 1050, MATH 1700 (C or better), one physics course (pre or corequisite).

ATM SC 4720--Synoptic Meteorology II (4).Graphical analysis and interpretation of physical, kinematical and dynamical properties of the atmosphere. Analysis techniques applicable to atmospheric research. Prerequisite: ATM SC 4710/7710.

ATM SC 4730--Advanced Forecasting Laboratory (3).Advanced principles of weather forecasting will be addressed via online electronic modules and weekly laboratory exercises. Prerequisites: Atm Sc 4710/7710, Atm Sc 4720/7720, Math 2300. Graded on A/F basis only.

ATM SC 4800--Numerical Methods in Atmospheric Science and Natural Resources (3).Examines numerical methods used in solving differential equations, filtering data sets, and Fourier decomposition of discrete data sets. Prerequisite: Math through Calculus III or senior standing.

ATM SC 4949--Internship in Meteorology

(1-6).Practical professional work experience with professional or scientific meteorologists in off-campus work environment. Prerequisites: junior standing, 12 hours Atmospheric Science.

ATM SC 4990--Daily Analysis and Forecast Interpretation (3).A Capstone experience. In depth daily analysis and interpretation by students of the current and forecast states of the atmosphere. Discussions of implications to specific weather sensitive activities. Writing intensive. Prerequisite: senior or graduate Atmospheric Science major.

ENVIRONMENTAL SCIENCE COURSES

ENV_SC 1001--Topics in Environmental Science - General (cr.arr.).Organized study of selected topics in environmental science.

ENV_SC 1100--Introduction to Environmental Science (3).This class provides an opportunity to develop an understanding of environment, physical and social causes of environmental

problems, their impacts, and strategies to manage these

issues. Restricted to freshman and sophomores.

ENV_SC 2001--Topics in Environmental Science - General (cr.arr.).Organized study of selected topics in environmental science.

ENV_SC 2002--Topics in Environmental Science- Biological/Physical/Mathematical (cr.arr.).Organized study of selected topics. Subjects and credit may vary from semester to semester.

ENV_SC 3001--Topics in Environmental Science - General (cr.arr.).Organized study of selected topics in environmental science.

ENV_SC 3085--Problems in Environmental Science (cr.arr.).Special individualized projects or readings in environmental science.

ENV_SC 3290--Soils and the Environment (3).(same as Soils 3290). Addresses the role of soils and soil properties on environmental pollution and management. Emphasis will be placed on carbon, nitrogen, phosphorus, and sulfur transformations and transport in natural and disturbed ecosystems and soil management practices and technology to prevent or remediate environmental pollution. Prerequisites: SOIL 2100, 3 hrs of chemistry, ENGLSH 1000 or instructor's consent.

ENV_SC 3330--Environmental Land Use Management (3).An introduction to environmentally sustainable use and management of land.

ENV_SC 4001--Topics in Environmental Science - General (cr.arr.).Organized study of selected topics in environmental science.

ENV_SC 4085--Problems in Environmental Science (cr.arr.).Special individualized research projects or readings in environmental science.

ENV_SC 4305--Environmental Soil Physics (3).(same as Soils 4305). Study of soil physical properties and processes important in solving environmental problems. Topics include soil solids, water content and energy, and transport

of water, solutes, gas and heat. Prerequisites: SOIL 2100, PHYSCS 1210 or equivalent.

ENV_SC 4306--Environmental Soil Physics Laboratory (2).(same as Soils 4306). Introduction to the methodology and equipment for measurement of soil physical properties and processes. Prerequisites: concurrent or previous enrollment in SOIL 4305.

ENV_SC 4312--Environmental Soil Microbiology (3).(same as Soils 4312). Microbiology/ecology of life in the soil ecosystem. Emphasis is placed on the role of microbes in nutrient cycling, microbial pesticide/xenobiotic transformation bioremediation, etc. Prerequisite: general microbiology, SOIL 2100, or instructor's consent.

ENV_SC 4318--Environmental Soil Chemistry (3).(same as Soils and Geology 4318). Study of chemical constituents and processes occurring in soils. Topics include soil minerals, and weathering processes, organic matter, solution chemistry, oxidation-reduction reactions and adsorption processes. Prerequisites: SOIL 2100 or GEOL 2400, CHEM 1320 and CHEM 1330. Junior level standing or consent of instructor.

ENV_SC 4320--Hydrologic and Water Quality Modeling (3).(same as Natural Resources 4320). Introduction to models for simulating hydrologic and water quality processes. Emphasis is placed on Missouri watersheds to provide experience with the use of simulation models for natural resource decision making. Prerequisites: NAT R 1080 and SOIL 2100 or equivalent.

ENV_SC 4940--Environmental Science Internship (cr.arr.).Supervised professional experience with an approved public or private organization. Graded on S/U basis only.

SOIL SCIENCE COURSES

SOIL 2100--Introduction to Soils (3).(same as Plant Science 2100). Introduction to soil sciences with emphasis placed on physical, biological, and chemical properties and application to land use, plant growth and environmental problems. Prerequisites: 3 hrs of Chemistry.

SOIL 2106--Soil Science Laboratory (2).Laboratory application of fundamental soil science concepts. Prerequisites: concurrent enrollment in SOIL 2100.

SOIL 3085--Problems in Soil Science (cr.arr.).Special individualized research projects or readings in soil science.

SOIL 3201--Topics in Soil Science (cr.arr.).Organized study of selected topics in soil science. Intended for undergraduates.

SOIL 3290--Soils and the Environment (3).(same as Environmental Science 3290). Addresses the role of soils and soil properties on environmental pollution and management. Emphasis will be placed on carbon, nitrogen, phosphorus, and sulfur transformations and transport in natural and disturbed ecosystems and soil management practices and technology to prevent or remediate environmental pollution. Prerequisites: SOIL 2100, 3 hrs of chemistry, ENGLSH 1000 or instructor's consent.

SOIL 4085--Problems in Soil Science (cr.arr.).Special individualized non-thesis research projects or readings in soil science.

SOIL 4301--Topics in Soil Science (cr.arr.).Organized study of selected topics in soil science. Intended for upper division undergraduate and graduate students.

SOIL 4305--Environmental Soil Physics (3).(same as Environmental Science 4305). Study of soil physical properties and processes important in solving environmental problems. Topics include soil solids, water content and energy, and transport of water, solutes, gas and heat. Prerequisites: SOIL 2100, PHYSCS 1210 or equivalent.

SOIL 4306--Environmental Soil Physics Laboratory (2).(same as Environmental Science 4306). Introduction to the methodology and equipment for measurement of soil physical properties and processes. Prerequisites: concurrent or previous enrollment in SOIL 4305.

SOIL 4308--Soil Conservation (3).Conservation of soil with respect to topsoil, soil productivity, and fertility. Prerequisite: SOIL 2100. Recommended: AG S M 4420.

SOIL 4312--Environmental Soil Microbiology (3).(same as Environmental Science 4312). Microbiology/ecology of life in the soil ecosystem. Emphasis is placed on the role of microbes in nutrient cycling, microbial pesticide/xenobiotic transformation bioremediation, etc. Prerequisite: general microbiology, SOIL 2100, or instructor's consent.

SOIL 4313--Soil Fertility and Plant Nutrition (3).(same as Plant Science 4313). Explanation of principles of delivery of plant nutrients to plants, discussion of the role of each essential nutrient in crop plants and introduction to the management of soil amendments. Prerequisites: SOIL 2100 or instructor's consent.

SOIL 4314--Soil Fertility and Plant Nutrition Laboratory (2).(same as Plant Science 4314). The application of elementary analytical proce-

dures to the evaluation of the nutrient status of soils and crop plants. Prerequisite: concurrent or previous enrollment in SOIL 4313.

SOIL 4318--Environmental Soil Chemistry (3).(same as Environmental Science 4318). Study of chemical constituents and processes occurring in soils. Topics include soil minerals, and weathering processes, organic matter, solution chemistry, oxidation-reduction reactions and adsorption processes. Prerequisites: SOIL 2100 or GEOL 2400, CHEM 1320 and CHEM 1330. Junior level standing or consent of instructor.

SOIL 4320--Genesis of Soil Landscapes (4).The co-evolution of soil landscapes. The role of water in the accumulation of parent materials and development of soil horizons. Factors and processes of soil genesis. Distribution of soil in their natural settings. Prerequisites: introductory soil science or introductory geology or permission of instructor.

SOIL 4360--Precision Agriculture Science and Technology (3).(same as Agricultural Systems Management 4360 and Plant Science 4360). Precision agriculture is an information-based approach to farming whereby variability is managed to optimize crop production and reduce environmental pollution. This course provides an overview of precision agriculture technologies (like GIS, GPS, remote sensing), mapping methods, and case studies illustrating decisions and management. Prerequisites: SOIL 2100, PLNT S 2110 or instructor's consent.

SOIL 4940--Soil Science Internship (cr.arr.).Supervised professional experience with an approved public or private organization. Prerequisite: Soil and Atmospheric Sciences majors only, instructor's consent. Course may be repeated for credit. Graded on S/U basis only.

DEGREES OFFERED

Emphasis areas are in italics.

Bachelor of Arts (BA) with majors in:

Anthropology
Art
Art History and Archaeology
Biological Sciences
Chemistry
Classics with emphasis areas in
Classical Languages, Classical Humanities, Greek, Latin
Communication
Computer Science
Economics
English
Environmental Geology
French
Geography with emphasis areas in
General Geography, Geographic Information Systems, Regional/Cultural, Physical/Environmental, Urban/Population
German
History
Interdisciplinary Studies with emphasis areas in
Black Studies, Environmental Studies, Peace Studies, Women's and Gender Studies
International Studies with emphasis areas in
East Asian Studies, Environmental Studies, European Studies, International Business, Latin American Studies, Peace Studies, South Asian Studies
Linguistics
Mathematics
Microbiology
Music
Philosophy
Physics
Political Science
Psychology
Religious Studies
Russian
Sociology
Spanish
Statistics
Theatre with emphasis areas in
Design/Technical, Performance, Writing for Performance

Bachelor of Fine Arts (BFA) with a major in Art

Bachelor of General Studies (BGS) with a major in General Studies

Bachelor of Music (BM)

Bachelor of Science (BS) with majors in:

Biological Sciences
Chemistry
Economics
Geological Sciences
Mathematics with an optional emphasis area in
Actuarial Science and Mathematical Finance
Physics
Statistics

Minors

Aerospace Studies
Afro-Romance Literatures in Translation
Anthropology
Art
Art History and Archeology

The College of Arts and Science, established in 1841, is the oldest and largest academic division in the university. The majority of MU undergraduates are enrolled in the college, which provides undergraduate and graduate programs in humanities, fine and performing arts, and social, behavioral and natural sciences. It also offers a solid foundation in basic studies for students in professional and specialized programs in other colleges. Consisting of the School of Music and the departments of Art and Theatre, is in the College of Arts and Science.

A liberal education is the foundation of study in many disciplines. It enables students to serve roles in society or to continue their education with advanced academic study. To these ends, the college encourages excellence in teaching and scholarship among its faculty and provides both traditional and innovative undergraduate curricula. Degree programs allow flexibility in individual courses of study.

Many students who enroll in the college during their first two years at the University have not yet decided upon a major field of study. The structure of the college is such that students generally need not commit themselves to a major until the beginning of the junior year. This allows students time to explore possibilities and to consider their likes and dislikes and their personal and professional objectives. Students are encouraged to work closely with academic advisors while deciding on a program of study.

Students planning to enter the schools of Journalism, Law, Medicine or Veterinary Medicine often spend their first two or four years in the College of Arts and Science in preparation for professional training. Most students, realizing the increased necessity for a broad background in the liberal arts for all professions, earn an undergraduate degree in the college before enrolling in the schools of Law or Medicine. Preprofessional study for veterinary medicine may be completed either in the College of Agriculture, Food and Natural Resources or in the College of Arts and Science.

College of Arts and Science Requirements

To earn any degree from the College of Arts and Science, in addition to the university requirements a candidate must fulfill each of the following:

- Complete all course work required for the Arts and Science Foundation Requirements.
 - Basic Skills, Breadth of Study and Depth of Study requirements
 - Sufficient elective credits to bring the total earned credits to 120
- Earn a GPA of 2.0 in the following categories.
 - A minimum 2.0 cumulative MU GPA
 - A minimum 2.0 MU GPA in all courses taken in the major

- A minimum 2.0 MU GPA in all courses taken in the final 60 credits
- A minimum 2.0 MU GPA in all courses taken in the final 30 credits
- A minimum 2.0 MU GPA in all courses taken in the minor, if student is completing one
- Attain grades of C- or higher in the major and optional minor. Some departments of the college have higher minimum grade requirements in specified courses.
- Earn a minimum of 30 credits in courses numbered 3000 or above, which may include courses in the major. These courses must be regularly accepted for credit in the College of Arts and Science. A few specifically identified math and science courses numbered at the 2000-level may be used to meet this requirement. Additional information is available in appropriate advising offices.
- Complete no fewer than four semesters at full-time status (12-credit minimum).

Credit Restrictions

Time Limit on Credits Earned

Credit that is applied toward a degree is considered valid for eight years. After that time, the validity of credit already on the transcript will be reevaluated. Departments of the college have the right to accept or to reject credit earned after eight years have passed.

Credit Toward Degree

Some courses are not accepted toward a degree in the College of Arts and Science. They are:

- MIL SC 1110, 1130, 2210 and 2230
- Vocational courses, such as radio repair or keyboarding
- Developmental courses, such as MATH 0110, English Language Support Program courses, spelling and grammar

Sequence

Credit for a more advanced course within a sequence will not apply toward graduation if a student subsequently completes a less advanced course. (For example: completion of FRENCH 1200 after FRENCH 2100 or completion of MATH 1100 after MATH 1300.)

Maximum Credit Policies

- With the exception of MATH 1100 or 1120 (or equivalent), ENGLISH 1000 (or equivalent), and the elementary sequence in a foreign language, the maximum number of credits from a single department that may apply toward graduation is 40 for the BA and the BGS, 70 for the BFA, and 90 for the BM.
- A maximum of 12 credits for internship, special problems or directed readings may apply toward any one degree. Of the 12 hours, only 6 may be earned as internship credit. Some departments may further restrict this type of credit for both majors and non-majors in arts and science.
- A maximum of 10 credits for introductory biology, which includes BIO SC 1010, 1020, 1100, 1200 and 1500, may apply toward graduation.
- A maximum of 5 credits for BIO SC 3100 and 3650 may apply toward graduation.
- A maximum of 5 credits for MATH 1100, 1120, 1140, 1160 and 1180 may apply toward graduation.
- A maximum of 5 credits for MATH 1320, 1400 and 1500 may apply toward graduation.
- A maximum of 10 credits for introductory chemistry, which includes CHEM 1310 (or 1100), 1320, 1330 and 1500, may apply toward graduation.
- A maximum of 1 credit for one of the following courses may

apply toward graduation: SSC 1150 or AGC 1115.

- A maximum of 1 credit for AG EC 3285 may apply toward graduation.
- A maximum of 3 credits for any combination of the following may apply toward graduation: C & I 1210; 4550; AGRIC1111; CS 1020.
- For non-music majors, a maximum of 6 credits for music ensemble courses, which include MUSIC 1841, 1842, 1846, 1865 and 2843, may apply toward graduation.
- For non-music majors, a maximum of 12 credits for applied music courses, which include MUSIC 1435, 1445, 2445, 2455, 3455, 3970, 4445 and 4455, may apply toward graduation.
- For non-art majors, a maximum of 12 credits for studio art courses, which includes all art courses except ART 1020, may apply toward graduation. For interdisciplinary studies majors, the maximum is 18 credits, and for general studies majors, the maximum is 21 credits.
- A maximum of 2 credits for physical education activity courses may apply toward graduation.
- A maximum of 5 credits for orientation courses may apply towards graduation. Of these 5 credits, no more than 3 credits may come from courses that cover life skills or orientation to college life, and no more than 3 credits may come from discipline-focused courses. Life skills/college life courses include courses such as Learning Strategies and Orientation to College; discipline-focused orientation courses include courses such as Introduction to Management and Introduction to Physical Therapy. Additional information is available in the appropriate advising offices.

Departmental Examinations

A student who wishes to take a departmental examination must take it before enrolling in a college class in the same subject. Applications normally are made to the departments indicated; however, during the summer preregistration period, some examinations can be taken at the MU Testing Service Office without formal application to the respective departments. In addition, the examinations administered by Testing Services may be taken any time during the academic year.

Students may not earn credit for introductory foreign language courses in their native language.

- **Chemistry:** Apply to the Department of Chemistry, 125 Chemistry Building, for an examination to earn credits in chemistry.
- **French:** Apply to the Department of Romance Languages, 143 Arts and Science Building, for an examination for 3 credits equivalent to the completion of FRENCH 2100. Upon successful completion of this test, a student will be awarded 10 credits of advanced standing for FRENCH 1100 and 1200 in addition to the 3 credits indicated.
- **German:** Apply to the Department of German and Russian Studies, 448 General Classroom Building, for an examination to earn 3 credits in each of the following courses: GERMAN 2100; GERMAN 2160: German Conversation and Composition; GERMAN 3130: Advanced German Reading. Upon successful completion of one of these tests, a student will be awarded 10 credits of advanced standing for GERMAN 1100 and 1200 in addition to the 3 credits indicated.
- **Italian:** Apply to the Department of Romance Languages, 143 Arts and Science Building.
- **Latin:** Apply to the Department of Classical Studies, 405 General Classroom Building.
- **Mathematics:** Apply to the Department of Mathematics, 202 Math Sciences Building, for an examination to earn 3 credits in College Algebra.
- **Political Science:** Contact the group testing program in the

Testing Services Office for information on the 3-credit group test.

- **Russian:** Apply to the Department of German and Russian Studies, 448 General Classroom Building, for an examination to earn 3 credits in Elementary Russian and Russian Composition and Conversation. Upon successful completion of one of these two tests, a student will be awarded 10 credits of advanced standing for RUSS 1100 and 1200 in addition to the 3 credits indicated.
- **Spanish:** Apply to the Department of Romance Languages, 143 Arts and Science Building, for an examination to earn 3 credits equivalent to the completion of SPAN 2100. Upon successful completion of this test, a student will be awarded 10 credits of advanced standing for SPAN 1100 and 1200 in addition to the 3 credits indicated.
- **Statistics:** Apply to the Department of Statistics, 146 Middlebush Hall, for an examination to earn 3 credits for STAT 1300: Elementary Statistics.

Maximum Credits Enrolled

With the consent of the dean, students with superior scholastic records may be allowed to register for more than 18 credits during a fall or spring semester. During the summer sessions, a student may not ordinarily be enrolled for more than 9 credits during the two four-week sessions combined and/or the eight-week session.

Enrolling at Other Institutions

Students within the College of Arts & science are allowed to enroll in another institution, while being simultaneously enrolled at MU. Students are strongly encouraged to speak with an advisor to verify course transfer credit, degree applicability and other academic ramifications. Students, however, bear the ultimate responsibility for checking course equivalencies and requesting official transcripts be sent to the MU Office of Admissions (230 Jesse Hall). Similarly, A&S students who are likely to qualify for Latin honors are advised not to risk their eligibility for this distinction because of simultaneous enrollment at another institution (see information on Latin honors). Students who receive financial aid are advised to check with a financial aid officer to learn the implications, if any, of simultaneous enrollment in a non-MU course.

Graduation with Latin Honors

Regulations of the college regarding the awarding of Latin honors require that the final 60 credits are completed in MU course work for a letter grade (A-F). Awarding of Latin Honors is based on the cumulative GPA. The local chapter of Phi Beta Kappa requires completion of a minimum of 60 credits of course work on the MU campus, usually during the last two years of study. Exceptions to this latter expectation may be made for students who study abroad in an approved program during their final semesters of study.

Probation and Dismissal

Academic (Scholastic) Standing

In addition to University requirements defined earlier in this catalog and in the *Faculty Handbook*, academic status of Arts and Science students is determined in accordance with the following faculty guidelines. The word “term” in these regulations applies to semester, summer session or intersession. Course work completed by correspondence or through extension also has a bearing on academic status. (See Academic Standing in the front section of this catalog.)

- Students on scholastic probation have two terms, (as long as each term GPA is no lower than 1.0), in which to attain good academic standing (2.0 minimum term and cumulative GPA) or be subject to dismissal. A student will not be eligible for

removal from probation if he or she does not complete in residence during these two terms at least 12 graded credits acceptable by the student's adviser and in accordance with college policy for credit in the College of Arts and Science. To complete a course, the student must earn a grade in the A, B, C or D range.

- In the application of these rules, the dean will determine how an incomplete grade in a course will be considered in determining a student's academic standing.
- The dean may, in extenuating circumstances, waive any of the foregoing regulations governing eligibility to re-enroll for an individual student.

Degree Requirements

Arts and Science Foundation Requirements

The purpose of the Arts and Science Foundation Requirements is to assure that students fulfill the common educational objectives of the College of Arts and Science. Courses satisfying these requirements impart specialized knowledge and help students fulfill the broader objectives of a liberal education. Thus, these courses help students develop the following abilities:

- To communicate clearly and effectively in both writing and speech
- To generate and test hypotheses
- To locate and develop information needed to solve problems
- To think critically and use analytic skills effectively
- To examine their lives critically and objectively
- To enrich their lives through appreciation of present and past cultural achievements

Foundation requirements include three categories:

- Basic Skills requirements ensure competency in composition and communication, mathematics and analytic reasoning, awareness of American history and government, and where applicable, foreign language.
- Breadth of Study requirements are met by completing course work from a wide array of disciplines to ensure that graduates are broadly educated.
- Depth of Study requirements are met by completing advanced course work that allows for fuller understanding of a discipline than can be gained in introductory course work alone.

All students must complete all Arts and Science Foundation Requirements in order to earn a degree, regardless of prior baccalaureate degrees earned. Course work will be evaluated on a course-by-course basis. For students who earn an Associates of Arts degree from a Regionally accredited Missouri institution all Breadth of Education requirements will be considered to be met. Students will be required to complete at least one Depth of Education class with MU course work. In all cases, completion of the basic English and Mathematics requirements will be evaluated on a course-by-course basis.

Basic Skills

MATH 1100 or 1120 or transferable equivalent with grade of C- or higher

- Required for BA, BFA, BGS, BM and BS degrees.
- ENGLISH 1000 or transferable equivalent with grade of C- or higher

- Required for BA, BFA, BGS, BM and BS degrees.

One Math Reasoning Proficiency course with grade of C- or higher

- Required for BA, BFA, BGS, BM and BS degrees.
- May also apply toward other degree program requirements.
- Must be chosen from the list of MRP courses designated

each semester in the online Schedule of Courses.

One course in American government or history

- Required for BA, BFA, BGS, BM and BS degrees.
- May also apply as a social science toward the behavioral and social science requirement.
- Should be chosen from the list of MU courses approved to meet Arts and Science Foundation Requirements.

Foreign language

- For the BA and BS degree: 12-13 credits or comparable proficiency required.
- Alternative for selected BS degrees: 12 credits numbered 2000 or above in an area approved by the major department substituted with the concurrence of the dean's office. Courses used for a minor cannot be used to meet this requirement.
- For the BM degree: see the Music Department information in the catalog for details on the foreign language requirement.

Breadth of Study

Breadth of Study requirements include course work distributed among the following categories: biological, physical and mathematical sciences; behavioral and social sciences; humanities and fine arts.

1. Biological, physical and mathematical sciences

9 credits required for BA, BFA, BGS, BM and BS degrees.

- Must include course work from at least two of three areas.
- Must include at least one biological or physical science laboratory course.

2. Behavioral and social sciences

9 credits required for BFA, BGS, BM and BS degrees (except the biological sciences).

- Must include course work from both the behavioral and social sciences.

14-15 credits required for all BA degrees and the BS degree with a major in Biological Sciences.

- Must include 5-6 credits of behavioral science.
- Must include 9 credits of social science, including course work from at least two different areas.

3. Humanities and fine arts

9 credits required for the BFA, BGS, BM and BS degrees (except for the BS degree with a major in Biological Sciences).

- Must include course work from at least two different areas.

12 credits required for the BA degree, and the BS degree with a major in Biological Sciences.

- Must include course work from at least three different areas.

4. Additional breadth requirement for the BGS degree

3 credits from course work chosen from any of the following four categories: biological, physical and mathematical sciences; behavioral sciences; social sciences; humanities and fine arts.

Parameters for meeting Breadth of Study requirements:

- Courses from the major department may not be used for breadth requirements in the BA, BFA and BS.
- Courses from the major department may be used for breadth requirements in the BM.
- Students earning degrees in special degree programs (where the courses in the major represent multiple departments) may use courses from their major departments to meet breadth requirements, but not the specific courses used in the major.
- Courses from outside the major department but required for the major may not be used to meet breadth requirements in the BFA or BA with a major in Art.
- Only one non-Arts and Science course may be used in each

of the four categories: biological, physical and mathematical sciences; behavioral sciences; social sciences; humanities and fine arts.

- Courses must be chosen from the list of MU courses approved to meet Arts and Science Foundation Requirements, available in 107 Lowry Hall and on the web site of the College of Arts and Science (<http://coas.missouri.edu>).
- Courses used to meet breadth requirements may also be used to meet depth requirements (see below).
- Problems, research readings, and internship courses may not be used for breadth requirements.

Depth of Study

Depth of Study requirements include at least 6 hours of course work numbered 2000 or above, distributed as follows:

BGS in General Studies, BFA in Art, BS with a major in Biological Science and all BA degrees

- 9 credits required.
- Must include course work from at least two of the following four breadth categories: biological, physical and mathematical sciences; behavioral sciences; social sciences; humanities and fine arts.

BS with majors in Chemistry, Geological Science, Mathematics, Physics and Statistics

- 6 credits required.
- Must include course work from at least two of the following three breadth categories: behavioral sciences; social sciences; humanities and fine arts.

BS with a major in Economics

- 6 credits required.
- Must include course work from at least one of the following two breadth categories: biological, physical and mathematical sciences; humanities and fine arts.

BM with a major in Music

- 6 credits required.
- Must include course work from at least one of the following three breadth categories: biological, physical and mathematical sciences; behavioral sciences; social sciences.
- 3 credit hours in Music (see below).

Parameters for meeting Depth of Study requirements:

- All courses must be numbered 2000 or above.
- At least 3 credits must be completed with MU course work.
- A student who elects 1-credit topics courses must complete a minimum of three courses in that breadth category as partial fulfillment of the depth of study requirement.
- Courses from the major department may not be used.
- Students earning degrees in special degree programs (where the courses in the major represent multiple departments) may use courses from their major departments to meet depth requirements, but not the specific courses used in the major.
- Courses from outside the major department, but required for the major, may not be used to meet depth requirements in the BFA or BA with a major in Art, the BA or BS with a major in Biology, or the BA with a major in Chemistry, Geological Science, Mathematics, Physics, or Statistics.
- Non-Arts and Science courses may not be used.
- Courses must be chosen from the list of MU courses approved to meet Arts and Science Foundation Requirements, available in 107 Lowry Hall and on the web site of the College of Arts and Science (<http://coas.missouri.edu>).
- Courses used to meet depth requirements may also be used to meet breadth requirements.

- Problems, research, readings, and internship courses may not be used.

Major Program Requirements

A major consists of at least 21 credits, including at least 15 credits in courses numbered 2000 or above, 12 of which must be taken in MU course work. See detailed departmental information for additional requirements for specific majors.

All Arts and Science majors require an MU Writing Intensive course numbered 3000 or above and an MU capstone course with grades of C- or higher. In addition, some majors require course work outside the major department.

Each student must declare and receive official approval for a major by submitting a graduation plan no later than the semester after completion of 60 credits. The purpose of the graduation plan is to acquaint students with all requirements that must be met prior to graduation and to plan for the timely completion of these requirements. Departments and programs approve the graduation plan only when the student has met the following criteria:

- 2.0 cumulative GPA
- Completion of ENGLSH 1000 and MATH 1100 or 1120 (or their equivalents) with grades of C- or higher
- Completion of any additional departmental requirements

Requirements for an Optional Minor

A minor consists of at least 15 credits, including at least 6 credits numbered 2000 or above, within a department or program that offers a minor; 9 of the required credits must be taken in MU course work. See detailed departmental information for additional requirements for specific minors. Courses outside the major department but required for the major may be used towards a minor. In addition, courses required in the minor may be used to meet Foundation requirements.

The College of Arts and Science awards minors only to undergraduate students who are simultaneous recipients of bachelor's degrees. Students may not earn a major and a minor in the same field.

Dual Degrees

In order to receive two bachelor's degrees, a student must complete a minimum of 132 credits and complete all of the specific requirements for both degrees. Normally, a minimum of one additional semester is required to earn both degrees. Each candidate for a dual degree is assigned advisers as appropriate.

The College of Arts and Science maintains dual-degree programs with the schools of Law, Medicine and Veterinary Medicine. To enroll in these programs, the student must have completed all of the specific course requirements for the bachelor's degree prior to admission to the professional school and also must have completed the junior year in residence in the College of Arts and Science. Under certain circumstances, Arts and Science undergraduates may be assured admission to MU's schools of Law or Medicine.

Second Degrees

The faculty of the college has approved the following guidelines for students wishing to obtain a second undergraduate degree after completion of a bachelor's degree, in addition to any university requirements that may apply:

- Unless both degrees are earned at MU in successive semesters, a student pursuing a second undergraduate degree will ordinarily be required to complete a minimum of 30 credits in

residence in the College of Arts and Science after completion of the first undergraduate degree.

- A student must complete any college, general education or department requirements that are unique to the new degree program. Requirements that are in effect at the time a student begins work toward the second degree are applicable.
- Students applying for second-degree status will be considered only if they have completed (with grades C- or higher) ENGLSH 1000 and MATH 1100 or 1120 (or equivalents) and have final term and cumulative GPAs no less than 2.0.
- The student must submit a graduation plan in consultation with an advisor in an appropriate department or program before the dean's office will approve a request from the student to enroll as a candidate for a second degree.
- The college rarely approves applications for a second undergraduate degree in General Studies or Interdisciplinary Studies.
- Once enrolled for a second degree, a student is committed to enrolling in course work required for completion of that degree. A student will not be allowed to continue as a candidate for a second undergraduate degree if not enrolled in courses required for the second bachelor's degree.

Double Majors

A number of arts and science students choose to complete multiple majors while earning one degree. The requirements of each major, along with requirements for the degree, must be completed. Often, this does not result in the addition of hours to the degree program.

Graduate School Dual Enrollment

A final-semester senior may dually enroll in the College of Arts and Science and the Graduate School with permission of the deans of both divisions. This enables the student to complete some graduate course work prior to receiving the bachelor's degree.

The student must be within 15 credits of completion of the bachelor's degree and must rank in the upper half of the class.

Application forms for dual enrollment in these two schools may be obtained from the Graduate School dean in 210 Jesse Hall.

STUDENT SERVICES

Advising

Students who have declared a major are assigned an advisor in that department. Students who have not yet decided on a major are assigned to a professional advisor in the Student Success Center.

Career Placement

Employment opportunities in the various disciplines of the liberal arts vary greatly. Most departments in the college have printed information available describing employment opportunities. The MU Career Center in the Student Success Center offers students a variety of career planning services.

Department of Aerospace Studies

Department of Aerospace Studies
College of Arts and Science
Air Force Reserve Officer Training Corps (AFROTC)
217 Crowder Hall
(573) 882-7621
airforce.missouri.edu
www.afrotc.com

Overview

The Air Force Reserve Officer Training Corps (AFROTC) provides the opportunity to become a United States Air Force officer while completing a college degree. The program combines traditional undergraduate education with military instruction in preparation for Air Force leadership challenges. Each semester academic AFROTC classes will build a foundation for application in a two-hour Leadership Lab.

Scholarships

High School Seniors: Air Force ROTC offers an excellent scholarship program for highly qualified students. Many of these scholarships pay full tuition. All of the scholarships include an annual textbook allowance and a tax-free monthly stipend during the academic year. The high school scholarship application period runs from May of the junior year until December 1 of the senior year. Competition is based on the whole-person concept. Please visit www.afrotc.com for the most current scholarship information.

In-College Students: Freshmen or sophomores can join and compete for one of many scholarship offers. In-College scholarship tuition dollar amounts vary. However, all scholarship recipients receive an annual textbook allowance and a tax-free monthly stipend during the academic school year. Visit www.afrotc.com for the most current In-College scholarship information.

Qualifications

Requirement to enroll in freshman/sophomore year AFROTC are:

- Full time student at a college that offers Air Force ROTC as a host school or cross-town school
- At least 14 years old (17 for scholarship recipients)
- In good physical condition
- Of good moral character

Air Force Benefits

- Starting salary of approximately \$45K, increasing to over \$64K in four years (salary varies depending on location and dependent status)
- 30 days vacation with pay each year
- Free medical and dental care
- Up to 100% of postgraduate tuition paid
- World wide travel opportunities

Obligation

After graduating from college and successfully completing all Air Force ROTC requirements, cadets receive a commission as a second lieutenant with an obligation of four years of service in the active duty Air Force. Pilots incur a ten-year commitment from the date of graduation from pilot training. A few additional career fields require a six or eight year commitment.

Minor in Aerospace Studies

A minor in Aerospace Studies is available upon the completion of 15 semester hours, of which 12 hours are taught by Aerospace Studies. The additional 3 hours must be approved by the Department of Aerospace Studies and be in the academic area of history, political science, sociology, military science disciplines, or peace studies.

AEROSPACE COURSES

AERO 1100--The Foundations of the United States Air Force (2). Introduces the Air Force and Air Force ROTC. Topics include professional appearance, military customs and courtesies, core values, equal opportunity and treatment, officer opportunities, group leadership problems. Applies communicative skills. Leadership lab.

AERO 1200--The Foundations of the United States Air Force (2). Continues the introduction to the Air Force and Air Force ROTC. Topics include Air Force origins, organizations, major commands, installations, sister services (Army and Navy), group leadership problems. Applies communicative skills. Leadership lab.

AERO 2100--The Evolution of USAF Air and Space Power (2). A survey course designed to facilitate the transition from Air Force ROTC cadet to Air Force ROTC officer candidate. Explores Air Force heritage, Air Force leaders and Air Power doctrine. Applies communicative skills. Leadership lab.

AERO 2200--The Evolution of USAF Air and Space Power (2). Continues the examination of air and space power from the Vietnam era through the present. Topics include the Vietnam War, the Persian Gulf War, and the Global War on Terrorism. Applies communicative skills. Leadership lab.

AERO 3100--Air Force Leadership Studies (3). An integrated leadership and management survey course emphasizing development of the individual as an Air Force leader. Special topics include situational leadership, principle centered leadership, corrective supervision and counseling. Leadership lab.

AERO 3200--Air Force Leadership Studies (3). Air Force leadership principles are examined from the foundation developed in AERO 3100. Ethical decision making, personal core values, and character development are discussed. Military evaluation systems are outlined. Leadership lab.

AERO 4100--National Security Affairs/Preparation for Active Duty (3). Examines the national security process, regional studies, Air Force and joint doctrine. Special topics include the military as a profession and civilian control of the military. Continued emphasis on communicative skills. Leadership lab.

AERO 4200--National Security Affairs/Preparation for Active Duty (3). Examines civilian control of the military, officership, the military justice system, and current issues affecting military professionalism. Continued refinement of communicative skills. Leadership laboratory.

FACULTY

PROFESSOR R. L. Lyman, M. J. O'Brien, D. M. Pearsall,
L. Sattenspiel

ASSOCIATE PROFESSOR M. V. Flinn, C.T. Palmer

ASSISTANT PROFESSOR G.E. Blomquist
M.K. Shenk, C.S. VanPool, T.L. VanPool,
D. J. Wescott

Note: All permanent faculty members in the department serve as undergraduate advisors for anthropology majors.

Anthropology is the study of humans and their cultures at different levels of social complexity, in different environments and at different times and places. Anthropologists view and compare human populations across cultures and consider the interplay between biology and culture in forming human behavior. Anthropological study has four foci:

Biological anthropology; the study of the evolution and biology of humans and other primates

Cultural anthropology; the study of the various ways of life of recent and present-day peoples

Archaeological anthropology; the study of past cultures through analysis of their material remains

Linguistic anthropology; the study of language in its cultural context

Each of these contributes to a discipline that attempts to understand how and why humans look and behave the way they do.

An undergraduate major in anthropology results in a broad educational base that can be the core of a liberal arts education or the background for specific vocational or professional goals of a student. Anthropology is of particular value to students planning professional careers in a world of cultural and ethnic diversity. Anthropology majors are required to take core courses in all four areas of the discipline, but may emphasize one or more of them in their remaining courses. Students may also develop an interdisciplinary program in cooperation with other departments or schools. In addition, the department offers an anthropology minor to students who are majoring in other departments and who will profit by more formal training in the discipline.

The Department of Anthropology provides many opportunities for students to become involved in research and encourages all students to do so. Such experiences help a student develop creativity, critical thinking skills, and skills in problem solving and writing. Students who are interested in doing anthropologi-

cal research have several options, including both working in close conjunction with a faculty member and working on an independent project, which may lead to an honors degree for eligible students.

Undergraduate training in anthropology prepares students for work in government agencies (both in the United States and overseas), museum positions and field positions in, for example, archaeology, ethnography, human paleontology, death investigation or linguistic studies. It also prepares students for graduate study leading toward college or university teaching of anthropology. An anthropology degree also provides good background for careers in business, journalism, health care, law and many other fields.

The Department of Anthropology has a number of special facilities that are available for use in classes, for individual research opportunities, and in some cases, for the general public to visit. The list is included below. Students interested in additional information are encouraged to consult the following web site: <http://anthropology.missouri.edu/facilities.html>.

These special facilities include:

- The Museum of Anthropology and Museum Support Center
- The Human Skeletal Remains Identification Laboratory
- The Palaeoethnobotany Laboratory
- The Zooarchaeology Laboratory
- The Fossil Cast Collection

Major Program Requirements

Students completing an anthropology degree are awarded a BA degree with a major in Anthropology or a BA degree with Honors in Anthropology. The undergraduate program is designed to help students develop an appreciation of other cultures and other world views and to gain an understanding of how and why the diversity in human culture and biology came about. Several goals help faculty teach undergraduates about the nature of the discipline and how to think critically about what it is, what it means and how it is useful in today's society. These goals include:

To recognize the broad, cross-cultural generalizations that characterize anthropology

To recognize the value of a cross-cultural, comparative perspective

To acquire an understanding of the basic concepts in each of the four subfields of anthropology

To acquire advanced knowledge in one or more of the four subfields

To acquire an awareness of the interrelationship of the four subfields

To think critically about the nature and content of anthropological questions

To assess the structure of an argument and evaluate it and its supporting information

To communicate effectively in writing or through oral presentation

To strive for innovative and creative thinking

To think independently both within and outside anthropology

Students are also encouraged to acquire experience in research design and methods (e.g., using the library and Internet effectively to gather information on a problem, or understanding and using the methods of one or more subfield). To this end, the department provides abundant opportunities for students to work with faculty members on independent research projects.

Major Core Requirements

In addition to college foundation requirements and University graduation requirements, such as general education, all anthropology students are required to complete the following core courses (18 credits):

ANTHRO 2020: (or ANTHRO 2021 and 2022) Fundamentals of Archaeology with lab	4
ANTHRO 2030: Cultural Anthropology	3
ANTHRO 2040: Anthropological Linguistics	3
ANTHRO 2050: (or ANTHRO 2051 and 2052) Introduction to Biological Anthropology with lab	5
ANTHRO 4990: Capstone Seminar in Anthropology	3

ANTHRO 4990: Capstone Seminar in Anthropology must be completed even if a student completes an additional major in another department. Some departments waive this requirement for students completing a double major. Students with second majors should check with the other department to see if they are required to complete both capstone courses.

Electives

A minimum of four additional Anthropology courses (at least 12 credits) are required for the major. These courses must be distributed as follows:

Topical/theoretical	2 courses
Area	1 course
Methods	1 course

Explanation about the distribution of departmental courses among these three categories is available at <http://anthropology.missouri.edu/programs/undergrad/undergrad.html>

The choice of area, topical-theoretical and methods courses is guided by the student's individual interests and goals, and is selected in consultation with the advisor. With the consent of the student's advisor and the director of undergraduate studies, the methods/techniques or area requirements may be fulfilled by suitable courses outside anthropology. If this requirement is satisfied by a course outside anthropology, an additional anthropology course is selected to complete the 30 credits required in anthropology.

Students may also complete the methods requirement by gaining hands-on experience doing anthropological research. This experience will normally begin with ANTHRO 2950: Research Skills, an introduction to the methods used by one or more faculty members. This course will satisfy the methods requirement if a student enrolls in it for at least 3 credits. A student may independently choose a faculty mentor and arrange for course credit or can work with the department's undergraduate research coordinator, who will match the student's interests with those of one or more faculty members.

Students wishing to continue doing research of an independent nature may register for ANTHRO 4950: Undergraduate Research or for ANTHRO 4950H: Honors Research. Prior approval by the director of undergraduate studies is required to use these courses to satisfy the departmental methods requirement. Honors Research may be used to satisfy the requirements for an Honors BA with a major in Anthropology, but the course is not required for that degree. Specific requirements for the Honors BA are described below.

Related Courses

Because of the interdisciplinary nature of anthropology, the Department of Anthropology strongly recommends that all students complete a cluster of at least two or three courses that complement chosen courses within the major.

These courses may be offered by a single department or may be a related set of courses from several departments (e.g., courses in ancient history from both the Art History and Archaeology and the History departments). The courses should be chosen with the advisor and are intended to provide background in the content of other disciplines related to the student's anthropological focus. Fulfillment of a formal minor (15 credits in another department as approved by that department) or a second major (at least 30 credits in another department as approved by that department) can also be an effective way to gain expertise in related areas.

GPA Requirements

The College of Arts and Science requires that students attain a minimum GPA of 2.0 in all courses in their major department. In addition, all core courses in anthropology (ANTHRO 2051/2052 or 2050, 2021/2022 or 2020, 2030, 2040 and 4990) must be completed with a grade of C- or higher. Students may receive a grade below C- in no more than one other course used to satisfy the major.

Departmental Honors

The departmental program leading to the BA with Honors in Anthropology is designed for students who desire a more intensive experience in anthropology and who wish to work closely with a particular faculty member in the Anthropology Department on an independent research or scholarly project. To be accepted into and remain eligible for the honors program in the Department of Anthropology, the student must achieve and maintain a minimum cumulative GPA of 3.3 in all University course work and must maintain a GPA of 3.5 in all anthropology courses.

A student wishing to graduate with departmental honors must fulfill the basic course requirements for the BA with a major in Anthropology. In addition, the student, with the assistance of the honors advisor, is expected to develop, plan and conduct research on an independent project. It is recommended that students in the honors program enroll in ANTHRO 4950H: Honors Research, although projects initiated in other courses or through independent, noncredit research experiences may also be honors eligible.

To complete the honors degree, a student must submit the results of the research project as a formal honors thesis that the student defends during an oral examination conducted by an examining committee. The committee consists of three faculty members: the advisor, another faculty member and the departmental honors director. The examination is scheduled no later than the thirteenth week of the term during which the student expects to graduate. Each member of the committee is furnished with a copy of the student's thesis or evidence of scholarly activity at least ten days before the examination. After the oral defense, the student furnishes the department with one final copy of the thesis or evidence of scholarly achievement (e.g., photographs) suitable for preservation in the departmental archive. Upon completion of the program, the examining committee recommends to the Dean of the College of Arts and Science that the student be awarded a BA with Honors in Anthropology.

Minor in Anthropology

A student wishing to minor in anthropology should contact the director of undergraduate studies. The requirements for a minor in anthropology are:

- A total of 15 credits in anthropology approved by the director of undergraduate studies.
- No more than 6 of the 15 credits required for the minor may be drawn from courses numbered below 2000. In addition, a minimum of 3 credits must be in courses numbered 3000 or above.

Sample Eight-Semester Program

Bachelor of Arts with a major in Anthropology

Fall I

^ANTHRO 2030 3
 *ENGLSH 1000 3
 *HIST 1100 OR
 POL SC 1100 3
 *Foreign language 1 5

Total 14

Fall II

^ANTHRO 2040 3
 *Foreign language 3 3
 *Science course 3
 *Social science course ... 3
 *Humanities course 3

Total 15

Spring I

^ANTHRO 2020 4
 *MATH 1100 OR 1120 ... 3
 *Behavioral science course . 3
 *Foreign language 2 5

Total 15

Spring II

^ANTHRO 2050 5
 *Laboratory science 2
 *Behavioral science (upper level) 3
 *Humanities course 3
 Elective 3

Total 16

Fall III

^Anthropology topics course 3
 ^Anthropology area course 3
 *Science course (if needed) 3
 *Social science (upper level) 3
 *Humanities course 3
Total 15

Fall IV

^Anthropology topical course 3
 ^Related field course (recommended) 3
 Electives 9
Total 15

*Course meets University general education and/or campus graduation requirements

^Course meets degree program requirements

Spring III

^Anthropology methods course 3-5
 *WI course 3
 *Humanities (upper level) ... 3
 ^Related field course (recommended) 3
 Elective 3
Total 15-17

Spring IV

^*Capstone Seminar in Anthropology (WI) 3
 ^Related field course (recommended) 3
 Electives 9-11
Total 15-17

ANTHROPOLOGY COURSES

ANTHRO 1000--General Anthropology (3). General survey course in fields of anthropological concern: archaeology, cultural anthropology, physical anthropology, linguistics; emphasizes underlying concepts, principles. Examples from peoples of the world.

ANTHRO 1000H--General Anthropology - Honors (3). General survey course in fields of anthropological concern: archaeology, cultural anthropology, physical anthropology, linguistics; emphasizes underlying concepts, principles. Examples from peoples of the world. Honors eligibility required.

ANTHRO 1001--Topics in Anthropology - General (3). Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

ANTHRO 1002--Topics in Anthropology - Biological/Physical/Mathematics (3). Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

ANTHRO 1003--Topics in Anthropology - Behavioral (3). Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

ANTHRO 1004--Topics in Anthropology - Social Science (3). Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

ANTHRO 1005--Topics in Anthropology -

Humanities (3). Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

ANTHRO 1060--Human Language (3) (same as LINGST 1060, C S&D 1060 and ENGLSH 1060). General introduction to various aspects of linguistic study. Elementary analysis of language data with some attention to application of linguistic study to other disciplines.

ANTHRO 1150--Introduction to Folklore Genres (3) (same as ENGLSH 1700). Course focus is on genres of folklore in both historic and contemporary contexts, as well as in people's daily lives. Genres include narrative, proverbs, oral poetry and rhyme, riddles, jokes, legends, epics, material culture and intangible expressive culture. Graded on A/F basis only.

ANTHRO 1200--Significant Discoveries of Archaeology (3). Detailed consideration of approximately 20 archaeological discoveries and conclusions, from the field and the laboratory, which have been of surpassing importance for an understanding of human origins, behavior, culture and past experiences on earth.

ANTHRO 1300--Multiculturalism: An Introduction (3). Examines contemporary multiculturalism (and its origins) globally; introduces key concepts; uses diverse, extended cross-cultural and American examples; and emphasizes complexity of cultures, practicality of issues, and change.

ANTHRO 1350--Deviance: A Cross-Cultural Perspective (3). Cross-cultural studies of problem behavior with emphasis on violence, suicide, sexual misconduct, drug use and mental disorder.

ANTHRO 1500--Monkeys, Apes and Humans (3). For those with little or no background in anthropology. Surveys the ecology and behavior of major nonhuman primate groups,

and how these relate to the evolution of human behavior.

ANTHRO 2001--Topics in Anthropology-General (3). Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

ANTHRO 2002--Topics in Anthropology-Biological/Physical/Mathematics (3). Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

ANTHRO 2003--Topics in Anthropology - Behavioral (3). Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

ANTHRO 2004--Topics in Anthropology - Social Science (3). Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

ANTHRO 2005--Topics in Anthropology - Humanities (3). Problems, topics, issues or review of research in any area of anthropology (including its relationships with other

areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

ANTHRO 2020--Fundamentals of Archaeology with Laboratory (4). Introduces the methodological and theoretical underpinnings of archaeology. The goals of archaeological research, and the techniques used to extract data from the archaeological record are discussed. The lab involves hands-on experience with archaeological materials. Prerequisites: sophomore standing recommended. No credit for both 2020 and 2021.

ANTHRO 2021--Fundamentals of Archaeology (3). Introduces the methodological and theoretical underpinnings of archaeology. The goals of archaeological research, and the techniques used to extract data from the archaeological record are discussed. Prerequisites: sophomore standing recommended. No credit for both 2020 and 2021.

ANTHRO 2022--Fundamentals of Archaeology Lab (1). Involves hands-on experience with archaeological materials. Prerequisite: must have completed ANTHRO 2021. No credit given to students who have taken Anthropology 2020.

ANTHRO 2030--Cultural Anthropology (3). Analysis of human cultures with emphasis on both constant and variable factors at different levels of social complexity; contact between cultures, and cultural influences on individual behavior. Prerequisites: sophomore standing recommended.

ANTHRO 2040--Anthropological Linguistics (3). (same as LINGST 2040). Language in relation to other aspects of human behavior. Introduction to description and analysis of the basic units of language. Emphasis on non-Indo-European and preliterate languages. Prerequisites: sophomore standing recommended.

ANTHRO 2050--Introduction to Biological Anthropology with Laboratory (5). A survey of biological anthropology. Primary emphasis on the biological evidence for human evolution. Major topics include human paleontology, primate behavior and human variation. Three hours lecture and two hours lab. Prerequisite: MATH 1100/1120; sophomore standing recommended. No credit for both ANTHRO 2050 and 2051. Satisfies A&S foundation requirement in Biological Sciences. Math Reasoning Proficiency Course.

ANTHRO 2051--Introduction to Biological Anthropology (3). A survey of biological anthropology. Primary emphasis on the biological evidence for human evolution. Major topics include human paleontology, primate behavior and human variation. Prerequisite: sophomore standing recommended. No credit for both ANTHRO 2050 and 2051. Satisfies A&S foundation requirement in Biological Sciences.

ANTHRO 2052--Biological Anthropology Laboratory (2). Laboratory exercises dealing with human genetics, non-human primates, the human fossil record, and human variation. Prerequisites: ANTHRO 2051 or equivalent and MATH 1100/1120. Credit not given for students who have taken ANTHRO 2050. Satisfies A&S foundation requirement in Biological Sciences. Math Reasoning Proficiency Course.

ANTHRO 2100--Indigenous Religions (3). (same as REL ST 2100). Explores the central aspects of religious life in indigenous communities. Focusing on specific native communities, it considers individual and group identity and the meaning of the sacred.

ANTHRO 2100H--Indigenous Religions - Honors (3). (same as REL ST 2100H). Explores the central aspects of religious life in indigenous communities. Focusing on specific native communities, it considers individual and group identity and the meaning of the sacred. Honors eligibility required.

ANTHRO 2150--Introduction to Folklore Field Research (3). (same as ENGLSH 2700). Course will focus on the specifics of how to identify, collect, preserve and document folklore within communities. Prerequisite: ENGLSH 1000.

ANTHRO 2200--World Archaeology (3). Major events in cultural evolution such as control of fire, invention of ceramic and metallurgical technologies, colonization of Australia and the Americas, development of agriculture, and emergence of complex sociopolitical organization are described in all regions of the world. Prerequisite: sophomore standing recommended.

ANTHRO 2300--Anthropology of War (3). (same as PEA ST 2300). Anthropological approaches to tribal and modern war; theories of war's origins; relation to ecology, economy, gender, belief systems, politics; transformation of tribal warfare by state expansion; peace. Prerequisite: sophomore standing recommended.

ANTHRO 2340--Hunters and Gatherers (3). Exploration of how different hunter-gatherer groups interact with their physical and social environment. Topics include food acquisition, allocation of labor, reproduction and family life, and deciding where to live and when to move. Prerequisite: sophomore standing recommended.

ANTHRO 2500--Primate Anatomy and Evolution (3). This course will explore why primates (and humans) are built the way they are, how they evolved, and what their anatomy tells us about their biology. We will cover basic primate anatomy and ecology, and then survey the fossil record of primate evolution. Prerequisite: sophomore standing recommended. Satisfies A&S foundation requirement in Biological Sciences.

ANTHRO 2520--Forensic Anthropology (3). This course will introduce students to how biological anthropologists apply expertise in human osteology, skeletal variation and plasticity, skeletal pathology, body decomposition, and archaeological recovery of evidence to medicolegal investigations. Prerequisite: sophomore standing recommended.

ANTHRO 2570--Parents and Offspring (3). A comparative investigation of the evolution of parental behaviors and family interactions in humans and other primates. Prerequisite: sophomore standing recommended.

ANTHRO 2580--Evolution of Human Sexuality (3). Biological and cultural aspects of human reproduction are examined from the perspective of evolutionary and ecological theory. Prerequisites: sophomore standing recommended.

ANTHRO 2800--Introduction to Field Methods in Archaeology (1-6). Techniques of field research and laboratory analysis through field experience. Prerequisite: ANTHRO 2020/2021 or instructor's consent.

ANTHRO 2950--Research Skills in Anthropology (1-3). Participation in faculty research activities. Course coordinator matches students with participating faculty. Three hours of research activities per week per credit hour. May be repeated to a maximum of nine hours. Prerequisite: instructor's consent.

ANTHRO 3001--Topics in Anthropology - General (3). Problems, topics, issues, or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.

ANTHRO 3002--Topics in Anthropology - Biological/Physical/Mathematics (3). Problems, topics, issues or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.

ANTHRO 3003--Topics in Anthropology - Behavioral Science (3). Problems, topics, issues or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.

ANTHRO 3004--Topics in Anthropology - Social Science (3). Problems, topics, issues or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.

ANTHRO 3005--Topics in Anthropology - Humanities (3). Problems, topics, issues or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.

ANTHRO 3150--American Folklore (3). (same as ENGLSH 3700). Regional and ethnic American folklore, with emphasis on analysis of folklore in context. Book reports and two analytical papers based on student field research required.

ANTHRO 3380--Native American Religions (3). (same as REL ST 3380). Investigation of religious lives of the native peoples of the Americas through cultural contact with modernity. Perspectives based on historical, anthropological and native texts. Prerequisite: ANTHRO 2100/REL ST 2100.

ANTHRO 3380H--Native American Religions - Honors (3). (same as REL ST 3380H). Investigation of religious lives of the native peoples of the Americas through cultural contact with modernity. Perspectives based on historical, anthropological and native texts. Prerequisite: ANTHRO 2100/REL ST 2100. Honors eligibility required.

ANTHRO 3470--Culture as Communication (3). (same as COMMUN 3470, LINGST 3470). Study of the influence of culture on communication processes. Examines topics such as the impact of values, languages, and nonverbal behavior on intercultural interaction. Prerequisites: sophomore standing.

ANTHRO 3540--Human Biology and Life History (3). A general survey of human biology, focusing on the development of the individual

from infancy to adult and the biology of human populations. Prerequisites: one course in ANTHRO or BIO SCI. Satisfies A&S foundation requirement in Biological Sciences.

ANTHRO 3560--Plagues and Peoples (3). Overview of the ecology of human host-pathogen interactions and the influence of human culture on the transmission and spread of infectious diseases through time and in different environments. Prerequisite: sophomore standing or instructor's consent.

ANTHRO 3600--North American Indian Culture (3). Comparative study of American Indians north of Mexico, emphasizes eastern United States.

ANTHRO 3610--Peoples of Canada (3). This course provides an anthropological approach to the culture and peoples of Canada. The course will include in depth studies of several First Nations People, Quebec, various recent immigrant populations, and the modern popular culture of Canada.

ANTHRO 3650--Aztec, Maya, and Inca Civilization (3). Origin of native Americans and development of American civilizations emphasizing Aztecs, Mayas, and Incas; rise of these civilizations known from archaeology, early European and early native American accounts, and the condition of the descendants today. Prerequisite: sophomore standing.

ANTHRO 3660--Peoples of the Andes (3). Archaeological and linguistic prehistory set the stage for the clash of Iberian and indigenous peoples whose descendants make up the Andean countries. Ethnographic studies provides a basis for their understanding. Prerequisite: sophomore standing.

ANTHRO 3680--Plants and People in Native America (3). Explores the present and past interactions between people and the plant world, covering use of plants as foods, medicines, and in rituals, and reviewing the origin of major food plants. Prerequisites: sophomore standing.

ANTHRO 3700--Cultures of Europe (3). Examines ethnic, linguistic, and folk cultural backgrounds of contemporary Europe and the articulation of local sociocultural units with national society and culture. Prerequisites: sophomore standing or instructor's consent.

ANTHRO 3780--Cultures of Southeast Asia (3). Survey of peoples and cultures of Southeast Asia; topics include regional geography and prehistory, European colonialism, economic and social organization, religious practices, changing status of women, urban and rural poverty, and environmental transformations.

ANTHRO 4001--Topics in Anthropology-General (3). Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.

ANTHRO 4002--Topics in Anthropology - Biological/Physical/Mathematics (3). Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.

ANTHRO 4003--Topics in Anthropology

- Behavioral Science (3). Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.

ANTHRO 4004--Topics in Anthropology - Social Science (3). Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.

ANTHRO 4005--Topics in Anthropology - Humanities (3). Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.

ANTHRO 4150--Special Themes in Folklore (3). (same as ENGLSH 4700). Intensive study in a selected area of folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature, or the folklore of a particular group. May be repeated for a maximum of six hours with department's consent.

ANTHRO 4160--Themes in African Diaspora Folklore (3). (same as ENGLSH 4710 and BL STU 4710). Intensive study in a selected area of African Diaspora Folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature, or the folklore of a particular group. ANTHRO 4150 and 4160 may be repeated for a maximum of six hours with instructor's consent. Prerequisite: junior standing.

ANTHRO 4200--Environment and Archaeology (3). Study of Quaternary environments and cultural systems. Focuses on North American records emphasizing climate and biologic components of regional ecosystems; regional environmental reconstruction. Prerequisite: ANTHRO 2020/2021 or instructor's consent.

ANTHRO 4240--History of Archaeology (3). Growth of archaeology worldwide since AD 1700. Emphases include intellectual and theoretical developments, field and laboratory techniques, and major figures in the history of the discipline. Prerequisites: ANTHRO 2020/2021 or instructor's consent.

ANTHRO 4280--Archaeology of Religion (3). (same as REL_ST 4280). Examines how anthropologists conceptualize religious behavior, and how archaeologists use material remains to examine past religious behavior, rituals, religious practitioners, cosmogonical constructs, worldview and ideology in the Americas. Prerequisites: ANTHRO 2020 and/or REL ST 2100.

ANTHRO 4300--Comparative Social Organization (3). Cross-cultural comparison, analysis of social structures. Role of kinship, age, sex, locality, economics, religion and other factors in determining relationships between individuals and groups cross-culturally. Prerequisites: ANTHRO 2030 or instructor's consent.

ANTHRO 4320--Ecological and Environmental Anthropology (3). Cultural anthropological approaches to human-environment interaction; cultural adaptations to diverse environments; theoretical developments and current issues; cultural, social, and historical

contexts of natural resource use. Prerequisites: junior or senior standing or instructor's consent.

ANTHRO 4340--Cultural Evolution and Change (3). Alternative hypotheses about the relationship between culture and evolution are evaluated in light of ethnographic evidence. Prerequisites: ANTHRO 2030 or instructor's consent.

ANTHRO 4350--Psychological Anthropology (3). Examines cross-cultural approaches to the study of perception, cognition, and personality; methods for gathering and validating data; examples from non-Western societies.

ANTHRO 4360--Medical Anthropology (3). Cross-cultural study of belief systems concerning health and illness, practices of diagnosis and treatment, and roles of patients and practitioners. Several non-Western health care systems are studied in detail. Prerequisite: junior/senior standing or instructor's consent.

ANTHRO 4370--Anthropology of Gender (3). (same as WGST 4370). The Anthropology of Gender introduces the student to the variation in the relationships between male and females; and between men, women, and other genders from around the world. The different approaches to understanding and modeling gender are discussed, as are specific case-studies from many different cultures.

ANTHRO 4380--Anthropological Theories of Religion (3). (same as RELST 4380). Course provides a critical evaluation of anthropological explanations of various forms of traditional religious behavior such as magic, shamanism, divination, ritual, mythology, and witchcraft. The anthropological explanations examined range from nineteenth century classics to the current approaches of today. Prerequisites: ANTHRO 2030, ANTHRO/REL ST 2100, or instructor's consent.

ANTHRO 4400--Language and Culture (3). (same as LINGST 4400). Interrelations between language, thought, culture, and society; role of language in cognition; methods and concepts of linguistics in cultural analysis. Prerequisite: ANTHRO 2040/LINGST 2040 or instructor's consent.

ANTHRO 4412--Gender, Language, and Communication (3). (same as COMMUN 4412 and LINGST 4412). Relationship among gender, language, nonverbal communication, and culture. Prerequisite: junior standing or departmental consent.

ANTHRO 4420--Historical Linguistics (3). (same as LINGST 4420). Methods of tracing the history of languages by glottochronology, and by comparative and internal reconstructions; cultural and linguistic implications of such reconstructions and of areal linguistics. Prerequisites: junior/senior standing or instructor's consent.

ANTHRO 4500--Human Origins (5). History and theory in the study of human paleontology. Prerequisites: ANTHRO 2050/2052 or instructor's consent. Satisfies A&S foundation requirement in Biological Sciences.

ANTHRO 4540--Human Biological Variation (3). Human biological variation both among and within living populations. Evolutionary, genetic, ecological, demographic and especially cultural factors which contribute to biological variation. Prerequisites: ANTHRO

2050/2051 or BIO SCI 1010 and MATH 1100/1120. Satisfies A&S foundation requirement in Biological Sciences.

ANTHRO 4580--Evolutionary Medicine (3). Principles of modern evolutionary theory are applied to medical problems. Topics include: function of symptoms (fever, nausea, etc.); strategies of pathogens; senescence; cancer; phylogenetic constraints; mental disorders. Ideas will be actively discussed in class. Prerequisites: lower level course in Biology or Biological Anthropology, junior/senior standing or instructor's consent.

ANTHRO 4600--Ethnographic Studies of Selected Cultures (3). Specific content varies with student interest, faculty availability. Will concentrate on peoples and cultures of one area such as East Asia, South Asia, Africa, North America, Mesoamerica, Oceania, Europe. Amplifies ethnographic knowledge gained in lower-level survey courses. Prerequisites: junior standing or instructor's consent.

ANTHRO 4620--North American Archaeology (3). Ancient peoples and development of American Indian culture. Prerequisites: ANTHRO 2020/2021 or instructor's consent.

ANTHRO 4640--Prehistory of the Greater Southwest (3). The course will introduce students to the archaeology of aboriginal peoples of the American Southwest and northwestern Mexico. The emphasis will be on prehistoric culture development from the Paleoindians to the arrival of the Spanish. Ethnographic and modern peoples will be discussed as well. Prerequisites: ANTHRO 2020/2021.

ANTHRO 4650--Prehistory of Mesoamerica (3). Archaeology and prehistory of Mesoamerica (Mexico and Northern Central America). Emphasis on archaeological evidence for development of human societies from late Pleistocene hunting bands to complex agricultural civilizations encountered by Europeans in 1500s.

ANTHRO 4670--Archaeology of South America (3). Development of culture in South America from the Pleistocene to European contact. Prerequisites: ANTHRO 2020/2021, or junior/senior standing.

ANTHRO 4700--Old World Prehistory (3). Beginnings of culture in the Old World through the early Iron Age. Prerequisites: ANTHRO 2020/2021, or instructor's consent.

ANTHRO 4720--Mesolithic, Neolithic, and Bronze Age Archaeology (3). Analysis of both hunter-gatherer and food-producing prehistoric sociocultural systems in western Eurasia and adjacent areas from the end of the Pleistocene until the development of iron metallurgy. Includes the symbolic material of these periods. Prerequisites: junior/senior standing or instructor's consent.

ANTHRO 4740--Celtic and Iron Age Archaeology (3). Analysis of the pre-and protohistoric sociocultural systems of the Celts and other iron-using tribal cultures of western Eurasia from the inception of an iron based technology until the full historic period. Includes the symbolic material of these cultures. Prerequisites: junior/senior standing or instructor's consent.

ANTHRO 4770--Asiatic Prehistory (3). Prehistory and early cultures of Asia exclud-

ing the Near East. Emphasis on Northern Asia, China, Japan, South and Southeast Asia and Oceania. Prerequisites: junior/senior standing or instructor's consent.

ANTHRO 4800--Field Methods in Archaeology (1-8). Techniques of archaeological excavation; field surveying, recording, care and interpretation of materials. Prerequisites: ANTHRO 2800 or equivalent, and instructor's consent.

ANTHRO 4810--Paleoethnobotany (3). Application of ethnobotanical approaches in archaeology; techniques to recover and interpret floral remains (macroremains, phytoliths, pollen); research questions in ethnobotany; integration of ethnobiological and archaeological data. Critique of original works in the field emphasized. Prerequisites: junior/senior standing or instructor's consent.

ANTHRO 4820--Zooarchaeology (3). Survey of specialized techniques for archaeological faunal analysis, including zooarchaeological sampling, taphonomy, study of paleoecology, and recognition of domestication. Prerequisites: ANTHRO 2020/2022 or instructor's consent.

ANTHRO 4826--Stone Artifact Analysis (3). Theory, methods, and techniques of studying lithic artifacts and deriving culturally meaningful interpretations. Emphasizes flaked artifacts. Includes physical examination, manufacture and experimentation with stone tools. Prerequisite: ANTHRO 2020/2022 or instructor's consent.

ANTHRO 4828--Archaeological Analysis of Ceramics (3). To introduce students to the basic methods and concepts used in the archaeological analysis of pottery. By the end of the semester students will understand the various ways that pottery is created and how archaeologists can use ceramics to gain insights into everything from the organization of craft production to trade to symbolism. Prerequisite: ANTHRO 2020 and/or 2022.

ANTHRO 4830--Ethnographic Methods (3). Relation of problems to techniques; surveys techniques of gathering data; discusses their limitations and potentials. Prerequisites: ANTHRO 2030 or instructor's consent.

ANTHRO 4850--Practical Phonetics for Fieldwork (3). (same as LINGST 4850). Self-paced course using computer and tape recorded lessons from world's languages. Teaches practical articulatory and transcription phonetics. Weekly meeting with instructor to monitor progress, resolve questions. Prerequisites: junior standing or instructor's consent.

ANTHRO 4860--Techniques in Linguistic Analysis (3). (same as LINGST 4860). Problems in analyzing data from various languages. Prerequisites: introductory course in LINGST or instructor's consent.

ANTHRO 4870--Field Methods in Linguistics (4). (same as LINGST 4870). Intensive training in collection and analysis of data taken from a native speaker of non-Indo-European language. Prerequisites: 9 hours LINGST or instructor's consent.

ANTHRO 4880--Demographic Anthropology (3). The major topics considered in this course are basic demographic analysis, including life tables, models for population growth and stable population theory; fertil-

ity analysis; disease and fertility; disease in human populations; and paleodemography. Prerequisites: MATH 1100/1120 and junior/senior standing or instructor's consent. Math Reasoning Proficiency Course.

ANTHRO 4890--Human Skeletal Identification and Analysis (5). Students interested in archaeology, physical anthropology, and law enforcement will learn human osteological methods of analysis applied to bioarchaeological problems and modern forensic techniques for personal identification. Prerequisite: ANTHRO 2050/2052 or instructor's consent.

ANTHRO 4894--Skeletal Biology (3). This course is designed to provide students advanced and in-depth training in skeletal biology. Basic bone biology will be studied and advanced methods of skeletal analysis applicable to forensic anthropology and bioarchaeology will be explored. Prerequisites: ANTHRO 4890 or equivalent background in osteology and/ or anatomy. Satisfies A&S foundations requirement in Biological Sciences.

ANTHRO 4940--Internship in Anthropology (3-6). Students will work for a semester in a community-based organization (NGO, nonprofit, for profit, or governmental). They will conduct a research study in coordination with that agency. Upon completion of the research study, students will prepare a final report to be given to the agency and turned in for course credit. The course coordinator will help students identify and make contact with interested organization and oversee their progress during the internship. Prerequisites: junior standing, Anthropology major, coordinator's consent, 2.5 GPA. Graded on S/U basis only.

ANTHRO 4950--Undergraduate Research in Anthropology (2-8). Advanced research approved by and under the direction of a departmental faculty member. Prerequisites: junior/senior standing and instructor's consent.

ANTHRO 4950H--Honors Research in Anthropology (3). Individual study and research leading to Honors in Anthropology. In consultation with instructor, student works on Honors Thesis. Anthropology majors only. Prerequisites: junior or senior standing; Honors level GPA, instructor's consent. May be repeated for up to 6 credit hours.

ANTHRO 4960--Undergraduate Readings in Anthropology (cr.arr.). Directed readings in ethnology, linguistics, archaeology, or physical anthropology not leading to thesis. Prerequisites: two courses in Anthropology and instructor's consent.

ANTHRO 4990--Capstone Seminar in Anthropology (3). Readings, discussions, and problems in the integration of the subfields of anthropology through theory and examples. Prerequisites: ANTHRO major and senior standing, or instructor's consent.

The Department of Art in the College of Arts & Science offers BA, BFA, and MFA degrees with a major in Art. A minor in Art is also available. Students have the option to take studio courses in drawing, painting, printmaking, ceramics, sculpture, fibers, photography, digital/experimental media, and graphic design.

The BA degree is intended for the student desiring a liberal education with a concentration in art, while the BFA provides more professional training in the studio area. The BFA is the required undergraduate degree for admission to most Master of Fine Arts programs.

Students who wish to teach at the elementary and/or secondary school level normally pursue the BS in Education degree. BA and BFA candidates may acquire elementary or secondary art teaching certification by completing the additional art education requirements not already completed in their BA or BFA programs.

Major Program Requirements: Bachelor of Art

Art majors earning a BA degree complete art foundations courses, art core requirements, and art studio electives. No more than 40 credits in studio art may be included in the BA curriculum. Students enrolled in the BA degree program may not include art or art history courses with a grade of D.

All art majors must complete a minimum of 12 credit hours of MU art coursework numbered 2000 or above. In addition, 9 hours of Art History and Archaeology courses, including two 3-hour classes numbered 2000 or above, are required.

In addition, students must complete all College of Arts and Science and University graduation requirements, including University general education.

Major core requirements

Art foundations

ART 1030: Basic 2D Design	3
ART 1040: Basic 3D Design	3
ART 1050: Beginning Drawing	3

Art core requirements

ART 2500: Beginning Painting or ART 2510: Beginning Watercolor	3
ART 2800: Beginning Sculpture	3
ART 2100: Beginning Ceramics or ART 2300: Beginning Fibers	3
ART 4975: Senior Seminar in Art (WI Capstone)	3
ART studio electives	up to 18 (may include 15 credits in one media area)
AR H A (Art History)	9

Major Program Requirements: Bachelor of Fine Arts

Art majors earning a BFA degree complete art foundations courses, art core requirements, and art studio electives with 15 credits in one specific media area. Students enrolled in the BFA degree program may not include art or art history courses with a grade of D.

All art students are assigned a departmental faculty advisor. Students are encouraged to meet with the advisor to plan a program of study with a focus in one particular media area.

BFA students complete 60 to 70 credits in studio art, including a minimum of 15 credits in one specific media area, and 12 credits of art history, including at least two 3-hour Art History & Archaeology courses numbered 2000 or above. A minimum of 35 credit hours of studio art coursework must be taken at MU.

In addition, students must complete all College of Arts and Science and University graduation requirements, including University general education.

Major core requirements:

Art foundations

ART 1030: Basic 2D Design	3
ART 1040: Basic 3D Design	3
ART 1050: Beginning Drawing	3

Art core requirements

Drawing	6
ART 2500: Beginning Painting or ART 2510: Beginning Watercolor	3
ART 2800: Beginning Sculpture	3
ART 2100: Ceramics and/or ART 2300: Fibers	6
ART 2600: Photography and/or ART 2700 Printmaking	6
ART 4975: Senior Seminar in Art (WI Capstone)	3
ART media area electives	15 minimum
ART studio electives	up to 19
AR H A (Art History)	12

Minor in Art

The minor in art requires a total of 18 credits, including 15 credits in studio art and 3 credits from the Department of Art History & Archaeology. Six credits must be studio art courses numbered 2000 or above. At least 9 of these hours must be taken while in residence at the University of Missouri.

DEPARTMENT OF ART COURSES

ART-CERAMICS

ART CERM 2100--Beginning Ceramics (3). Exploration of ceramic art as an expressive, communicative medium. Study of ceramic design, technique and historic and contemporary models within the context of the creative process. Group critiques, slides, demonstrations. Expendable materials fee. Prerequisite: instructor's consent.

ART CERM 3100--Intermediate Ceramics (3). Continuation of Art-Ceramics 2100 with emphasis on wheel throwing and the vessel format. Further exploration of glazing and firing techniques. Group and individual critiques, demonstrations, slide lectures and visiting artists. Expendable materials fee. Prerequisite: instructor's consent.

ART CERM 4100--Advanced Ceramics (3). Continuation of Art-Ceramics 3100. Includes advanced problems in firing, clay and glaze technology, forming and ornamentation. Payment of expendable materials fee required.

Prerequisite: instructor's consent. May be repeated to 15 hours maximum.

ART CERM 4110--Ceramics Sculpture (3). Sculptural forms constructed of slabs, coils and wheel-thrown elements. Payment of expendable materials expense is required. Prerequisite: ART 4100. May be repeated to 15 hours maximum.

ART CERM 4185--Problems in Ceramics (cr.arr.). Graduate level work in ceramics. Prerequisites: departmental consent.

ART-DRAWING

ART DRAW 1050--Drawing I (3). An introduction to visual hierarchy, composition, and pictorial space in drawing. Emphasis on linear perspective and the language of light and shadow using black and white media (graphite, charcoal and/or conte crayon). Development of skills and concepts in drawing based on historical models, lectures, demonstrations and critiques. Expendable materials fee required.

ART DRAW 2200--Drawing II (3). Continuation of Art-Drawing 1050. Emphasizes drawing

the human figure in a variety of black and white media. Prerequisite: ART 1050. Expendable materials fee required.

ART DRAW 2210--Beginning Color Drawing (3). Theory and practice in the use of pastel working from still life, landscape, and portrait. Expendable materials fee required. Prerequisites: ART 1010 and 1050.

ART DRAW 3200--Drawing III (3). Continuation of Art-Drawing 2200. Emphasis in basic anatomical knowledge in drawing the human figure. Expendable materials fee required. Prerequisite: ART 2200.

ART DRAW 3210--Intermediate Color Drawing (3). Continuation of Art-Drawing 2210 with emphasis on design and organization. Prerequisite: ART 2210. Expendable materials fee required.

ART DRAW 3220--Anatomical Drawing (3). Anatomical structure of human figure as it relates to art. Drawing from live model; emphasis on gross anatomy as defined by skeletal and muscular structure. Expendable materials fee

required. Prerequisites: sophomore standing and two semesters of drawing.

ART DRAW 3230--Beginning Illustration (3).An introduction to visual problem solving from initial concept through final execution. Emphasis in drawing and painting skills and exploration of mixed media techniques including drawing from the model. Expendable materials fee. Graded on A/F basis only. Prerequisites: ART 1030, 1040, 1050, 2200.

ART DRAW 4200--Drawing IV (3).Continuation of Art-Drawing 3200, with increased emphasis on expressive drawing and composition. Repeatable to 15 hours. Expendable materials fee required. Prerequisite: ART 3200.

ART DRAW 4210Advanced Color Drawing (3).Continuation of Art-Drawing 3210 with emphasis on the expressive properties of color in figural compositions. Prerequisites: ART 3210 or instructor's consent. Repeatable to 15 hours. Expendable materials fee required.

ART DRAW 4220Advanced Anatomical Drawing (3).Continuation of Art-Drawing 3220, Anatomical Drawing, with an emphasis on formal analysis of the figure in drawing based on superficial and deep anatomical structure. May be repeated to 15 hour maximum. Prerequisites: ART 3200 and 3220.

ART DRAW 4230Advanced Illustration (3).Further development of conceptual problem solving skills and technical proficiency through self-generated assignments. Emphasis is placed on portfolio development by exploring sequential and narrative themes. Topics include contract, copyrights, and the art of freelancing. Students are advised to take the course to take the course a minimum of two times. May be repeated to 15 hours maximum. Payment of expendable materials fee required. Prerequisites: ART 3230.

ART DRAW 4285 Problems in Drawing (cr.arr.).Prerequisites: departmental consent.

(1). Prerequisites: departmental consent.

ART-FIBERS

ART FIBR 2300Beginning Fibers (3).Exploration of various fiber and media including papermaking, weaving, surface design and sculptural techniques. Expendable materials fee required. Prerequisite: ART 1030.

ART FIBR 3300Intermediate Fibers (3).Continuation of Art-Fibers 2300 with emphasis on utilizing acquired technical processes in loom and off weaving, paper making and surface design and a means of developing visual statements. Expendable materials fee required. Prerequisite: ART 2300.

ART FIBR 4300Advanced Fibers (3).Exploration of aesthetic concepts, development of personal style and instruction in advanced fiber techniques within medium selected by student. Expendable materials fee required. Prerequisites: ART 3300 or approved equivalents. May repeat to 15 hours maximum.

ART FIBR 4385Problems in Fibers (1).Prerequisites: departmental consent.

ART-GENERAL

ART GNRL 1010--Introduction to Art (3).Basic practice in drawing, painting, design. Exploratory course for beginners. Non-majors only.

ART GNRL 1020--Appreciation of Art (3).Illustrated discussion with examples from varied historic and contemporary art fields on nature of art, functions, methods of creative expression. One section is writing intensive each semester and the other is NON writing intensive each semester.

ART GNRL 1030--Basic 2-D Design (3).Basic study of line, shape and texture; their use and control according to the basic variables and the principles of design. Two dimensional exercises employing a variety of tools and materials.

ART GNRL 1040--Basic 3-D Design (3).A foundational course designed to familiarize students with the elements and principles of three-dimensional design as well as some of the materials, tools, processes and techniques used in the creation of sculptural art. Study and development of formal aesthetic ideas, conceptual vocabulary and technical skills is emphasized. Expendable materials fee required.

ART GNRL 2000--Color Theory (3).An investigation of various color systems and their application to art. Prerequisites: ART 1030 or its equivalent, and sophomore standing.

ART GNRL 2010--Topics in Art (1-3).Special studies in studio art; covers subjects not included in regularly offered courses. Prerequisite: instructor's consent.

ART GNRL 2010H--Topics in Art - Honors (1-3).Special studies in studio art; covers subjects not included in regularly offered courses. Prerequisite: instructor's consent. Honors eligibility required.

ART GNRL 2020--International Summer Study Abroad (3).4 week summer session. Students will produce original art work, keep a written journal, and participate in a variety of activities. Prerequisites: ART 1050 and instructor's consent, Studio Art Class Abroad.

ART GNRL 2030--Context and Culture (3).The purpose of this course is to give journalism students a framework for engaging with the visual arts, with a focus on the 20th century and today. Our goal is to conduct a foundation for thinking, talking and writing about the visual arts, especially works and movements that might be challenging for the novice to understand. Prerequisite: instructor's consent.

ART GNRL 2030H--Context and Culture - Honors (3).The purpose of this course is to give journalism students a framework for engaging with the visual arts, with a focus on the 20th century and today. Our goal is to conduct a foundation for thinking, talking and writing about the visual arts, especially works and movements that might be challenging for the novice to understand. Prerequisite: instructor's consent. Honors eligibility required.

ART GNRL 3010--Topics in Art (4).Special studies in studio art; covers subjects not included in regularly offered courses. Prerequisites: junior standing and instructor's consent.

ART GNRL 3020--International Summer Study Abroad (3).Four-week summer session. Advanced study in chosen medium. Emphasis on individual creative expression. Prerequisites: graduate standing or instructor's consent of the Studio Art Class Abroad.

ART GNRL 3030--Undergraduate Internship in Art (1-3).Special learning situations not ART GNRL 3010H--Topics in Art - Honors (4).Special studies in studio art; covers subjects not included in regularly offered courses. Prerequisites: junior standing and instructor's consent. Honors eligibility required.

covered by coursework. Credit standards pre-arranged with dept. Prerequisites: junior standing and departmental consent. Open only to Art and Art Education majors. Limit on total hours of problems courses applies.

ART GNRL 4975--Senior Seminar in Art (3).A capstone course for the undergraduate art degree with emphasis on the production of a written statement relating to the students' visual research. Prerequisite: senior standing.

ART GNRL 4976--Design - Senior Seminar (3).Capstone for undergraduate art students who are interested in graphic design. Emphasis placed on research and writing about the theory and practice of design. All students will participate in a final, formal portfolio review with outside evaluators. Prerequisite: senior standing.

ART-GRAPHIC DESIGN

ART GRDN 1400--Beginning Digital Imaging (1).Class will cover the basic tools used in digital imaging software. A variety of different software may be offered. Course may be repeated for up to 3 hours with the consent of instructor. Graded on S/U basis only. Prerequisite: basic understanding of the Macintosh computer.

ART GRDN 2400--Advanced Digital Imaging (1).Class will cover the basic tools used in digital imaging software. A variety of different software may be offered. Course may be repeated for up to 3 hours with the consent of instructor. Graded on S/U basis only. Prerequisite: ART 1400, and a basic understanding of the Macintosh computer.

ART GRDN 2410--Graphic Design I (3).Emphasis on developing a design language and vocabulary. Projects explore visual images in two-dimensional space, each one focusing on a specific set of relationships. Introduction to methodological and research practices for designers. Payment of expendable materials fee is required. Prerequisite: ART 1030, 1040 and 1050.

ART GRDN 2420--Graphic Design II (3).Introduction to the discipline, function and tradition of typography. Topics include evolution and anatomy of typography, communication, legibility/readability, language sequence and information hierarchy. Course concludes with portfolio review for admission into Graphic Design III. Payment of expendable materials fee is required. Prerequisite: ART 2410.

ART GRDN 2430--Introduction to Calligraphy (3).Technical and historical instruction on five calligraphic alphabets. Application of hand lettering to both two and three-dimensional design projects. Emphasis placed on both technical mastery of letters and creative expression

in projects. Prerequisite: ART 1030 and 1050 or instructor's consent.

ART GRDN 3410--Graphic Design III (3). Digital media and motion graphics are explored through the development of interactive presentations and web site design. Students experiment with the computer as a medium for delivery of communication. New, practical and conceptual skills will be discussed in order to develop meaningful, interactive user experiences. Payment of expendable materials fees is required. Prerequisite: ART 2420 and successful completion of the graphic design portfolio review.

ART GRDN 3420--Graphic Design IV (3). Goal directed graphic design problem solving stressing the integration of theory and practical applications while sharpening conceptual, computer, and research skills. Topics include current design theory, advanced typographic study, production methods and design/client interaction. Payment of expendable materials fee is required. Prerequisite: ART 3410.

ART GRDN 3430--Advanced Calligraphy (3). Technical and historical instruction to calligraphic alphabets including Uncial, Fraktur, Copperplate and Neuland. Application of hand lettering in two and three-dimensional design projects. Emphasis placed on both mastery of letters and creative exploration in projects. Prerequisite: ART 2430.

to take the course a minimum of two times. May be repeated to 15 hours maximum. Payment of expendable materials fee is required. Prerequisite: ART 3420.

ART GRDN 4485--Problems in Graphic Design (cr.arr.). Prerequisite: ART 4410, and departmental consent.

ART GRDN 4996--Imprint - Design Practicum (3). Class operates as professional design studio doing work for university, local and regional clients. Focus on client/designer relationships, contracts and teamwork. Students passing with grade in A range will graduate with departmental honors. Prerequisite: Admission based on GPA (3.3 in art courses) and portfolio review; junior standing. May be repeated for credit.

ART-PAINTING

ART PNT 2500--Beginning Painting (3). Introduces primary techniques of painting. Emphasis on conceptualization of visual perception (understanding how we see) and the creative processes (understanding how we create). Sections either in oil or acrylic; contact instructor. Expendable material fee required.

ART PNT 2510--Beginning Watercolor Painting (3). Theory, practice of painting in water color from still life, landscape, figure. Prerequisites: ART 1050. Expendable materials fee required.

ART PNT 3500--Intermediate Painting (3). Continuation of Art-Painting 2500 with the addition of portrait painting. Prerequisite: ART 2500. Expendable materials fee required.

ART PNT 3510--Intermediate Watercolor Painting (3). Continuation of Art-Watercolor 2510, Beginning Watercolor, theory and practice of painting in watercolor. Expendable materials fee required. Prerequisite: ART 2510.

ART PNT 4500--Advanced Painting (3). Advanced problems in oil and acrylic painting. Prerequisite: ART 3500. May be repeated to 15 hours maximum. Expendable materials fee required. f,w,s.

ART PNT 4510--Advanced Watercolor Painting (3). Advanced problems in watercolor. Prerequisite: ART 3510. May repeat to 15 hours maximum. Expendable materials fee required.

ART PNT 4585--Problems in Painting (cr. arr.). Prerequisites: ART 4500 and departmental consent.

ART-PHOTOGRAPHY

ART PHOT 2600--Beginning Photography (3). Basic photography as an art form; camera and darkroom techniques; surveys photographic history and aesthetics. Camera with adjustable aperture and shutter required. Payment of expendable materials expense is required. Prerequisite: ART 1030, 1040, 1050 and instructor's consent required.

ART PHOT 3600--Intermediate Photography (3). Continuation of Art-Photography 2600 with emphasis utilizing acquired technical process to facilitate use of the camera as a means of developing awareness of immediate environment and the capabilities of Photography as a communicative, documentary, and expressive medium. Payment of expendable material fee is required. Prerequisite: ART 2600 or approved equivalent and consent required.

ART PHOT 4600--Advanced Photography (3). Exploration of aesthetic concepts, development of personal vision, and instruction in advanced technical process including fine B&W printing, negative and positive color, large format, zone system, and portfolios and book design to facilitate critical observation and personal expression through the medium of Photography. Payment of expendable materials fee is required. Prerequisites: ART 2600 and 3600 or approved equivalents, and consent required. May repeat to 15 hours maximum.

ART PHOT 4685--Problems in Photography (cr.arr.). Supervised research in creative photography. Prerequisite: ART 4410 and departmental consent.

ART-PRINTMAKING

ART PRNT 2700--Relief Printmaking (3). Relief printing techniques in color and black and white; includes woodcut, mixed media. Prerequisites: ART 1030 and 2 semesters of drawing. May be repeated to six hours maximum. Expendable materials fee required.

ART PRNT 2710--Intaglio Printmaking (3). Intaglio printing techniques, including etching, engraving and aquatint. Prerequisites: ART 1030 and 2 semesters of drawing. May repeat to six hours maximum. Expendable materials fee required.

ART PRNT 2720--Lithography (3). Lithographic printing techniques from stone and metal plates. Prerequisite: ART 1030 and two semesters of drawing. May be repeated to 6 hours maximum. Expendable materials fee required.

ART PRNT 2730--Serigraphy (3). Introduces methods, materials, and techniques of printmaking with the silk screen. Payment of expendable materials expense is required. Prerequisites: ART 1030 and one semester of Drawing. May repeat to 6 hours maximum.

ART PRNT 3700--Intermediate Printmaking (3). Continuing work in litho, intaglio or relief printmaking or serigraphy. Students must complete beginning level course first. Prerequisites: ART 2700, 2710, 2720, or 2730 and instructor's consent.

ART PRNT 4700--Advanced Printmaking (3). Advanced study in relief, intaglio or lithographic printmaking with emphasis on individual creative expression. Prerequisites: ART 2700, 2710 and 2720 and consent required. May repeat to 15 hours maximum. Expendable materials fee required.

ART PRNT 4785--Problems in Printmaking (cr.arr.). Prerequisites: departmental consent.

ART-PROBLEMS

ART PROB 4997--Honors Studio Research

(3).Honors Studio Research is a designated honors project designed to prepare B.F.A students for application into M.F.A. graduate programs, professional studio careers and other options within the arts community. To this end students will work on professional portfolio development, the completion of a one or two personal exhibition of their artwork and a written thesis in support of this exhibition. Students will be asked to develop outside research projects to develop professional practices and post-undergraduate opportunities. Prerequisite: B.F.A. senior, instructor's consent; GPA 3.5 or greater in major, successful portfolio review, appointed faculty mentor and committee. Graded on A/F basis only.

ART-SCULPTURE

ART SCUL 2800--Beginning Sculpture (3).

Principles of sculptural organization, figure studies, modeling techniques, simple plaster casting. Payment of expendable materials expense is required. Prerequisites: ART 1030 or 2200.

ART SCUL 2810--Experimental Media I

(3).Ordering and structuring materials into compositional forms, using various media, traditional as well as new. Subject matter will vary each semester. Prerequisites: ART 2200 or instructor's consent.

ART SCUL 3800--Intermediate Sculpture

(3).Continuation of Art-Sculpture 2800. Introduction to carving techniques. Payment of expendable materials expense is required. Prerequisite: ART 2800.

ART SCUL 3810--Experimental Media II

(3).Continuation of Art 2810. Prerequisite: ART 2810.

ART SCUL 4800--Advanced Sculpture

(3).This course will build skills acquired in Art-Sculpture 3800, Intermediate Sculpture including welding, casting, carving and assemblage with emphasis on the development of a personal visual language. Prerequisite: ART 3800, may repeat to 15 hours maximum.

ART SCUL 4810--Experimental Media III

(3).Continuation of Art 3810. Prerequisite: ART 3810. May repeat to 15 hours maximum.

ART SCUL 4885Problems in Sculpture (2).

Prerequisites: departmental consent.

The development of European and American art in its historic and cultural context is the subject of study in the Department of Art History and Archaeology.

The department offers BA, MA and PhD degrees with a major in Art History and Archaeology.

Major Program Requirements - Art and Archaeology

Students may elect a broad program in art history or a more narrowly focused one in classical archaeology. Those who are planning to major in either program should begin foreign language study as early as possible.

In addition to University general education requirements and other college and University graduation requirements, students must meet the following requirements:

Major core requirements

AR H A 1110 (3) and 1120 (3): History of Western Art I and II OR
the General Honors Humanities sequence (12)..... 6-12
AR H A 4970: Capstone in Art History and Archaeology ... 1
At least two 4000-level courses (after appropriate prerequisites), each in a different field 6
One course numbered 4005 through 4960 must be taken in conjunction with AR H A 4970 within the last 45 credits.

Options

Note: Options do not appear on diplomas or transcripts.

Art history option..... 28-34
AR H A 1110 (3) and 1120 (3): History of Western Art I and II OR
the General Honors Humanities sequence (12)..... 6-12
At least one 3000-level course in each of five fields..... 15
Ancient
Byzantine-Medieval
Renaissance-Baroque
18th century to the present
Arts of the Americas
At least two 4000-level courses (after appropriate

prerequisites), each in a different field 6
AR H A 4970: Capstone in Art History and Archaeology ... 1

One course numbered 4005 through 4960 must be taken in conjunction with AR H A 4970 within the last 45 credits.

Language Requirement

Study is required through the reading level (i.e., 12 or 13 credits) in one language, such as German, French, Spanish or Italian. Students who plan to attend graduate school are strongly urged to study two languages.

Courses recommended for a well-rounded degree:

Humanities courses, such as history, literature, philosophy, aesthetics, film, classical studies or religious studies; anthropology, sociology or environmental design.

Art courses

Maximum 12 credits; 15, if declared as a minor.

Students are strongly urged to take at least one course in studio art.

Classical archaeology option 28-34

AR H A 1110 (3) and AR H A 1120 (3): History of Western Art I and II, OR the General Honors Humanities sequence 2111-2114 12

At least five courses at the 3000 level, including:

AR H A 3210: Near Eastern and Egyptian Art and Archaeology 3

AR H A 3310: Greek Art and Archaeology 3

AR H A 3410: Roman Art and Archaeology 3

AR H A 3510: Byzantine and Islamic Art and Archaeology OR

AR H A 3520: Early Medieval Art and Archaeology 3

Any 3000-level post-ancient lecture course: AR H A 3520-3850 3

At least two courses at the 4000-level, after meeting appropriate prerequisites 6

AR H A 4970: Capstone in Art History and Archaeology 1

One course numbered 4005 through 4840 must be taken in conjunction with ARHA 4970: Capstone within the last 45 credits of study for a total of 4 credits.

A third 4000-level course may be taken instead of a post-ancient course at the 3000 level.

Language requirement

Study is required through the reading level (i.e., 13 credits) in Greek or Latin. Students who plan to attend graduate school are very strongly encouraged to study French or German as well.

Courses recommended for a well-rounded degree

Any course in classics, classical humanities, and ancient history; courses in history, anthropology, philosophy, or religious studies; geology; literature.

Double Majors and Dual Degrees

Students may combine a major in art history and archaeology with a major in another department in the College of Arts and Science such as art or classical studies (a double major), or with a major in another college such as education (a dual major). Students who graduate with dual majors will be awarded two degrees; their program of study will include an additional 12 credits. Students who plan to pursue double or dual majors should complete graduation plans in both departments.

Departmental Honors

Requirements for departmental honors in art history and archaeology include:

Cumulative GPA of at least 3.3

Minimum cumulative GPA of 3.25 in 30 credits of AR H A and related field/minor course work at the 3000-level or above

Completion of the Honors Seminar (AR H A 4996)

Completion and defense of a senior honors thesis (AR H A 4999)

These courses normally should begin no later than the last fall semester (for seniors graduating in May or August) or the previous fall semester (for December graduates).

In certain cases the faculty may recommend that a student receive departmental honors for excellence in the performance and completion of a substantial, extended and guided research project. Such a project must be proposed in advance and approved by the faculty member with whom the student will work.

Minor in Art History and Archaeology

A minor in art history and archaeology requires 15 credits within the department. Nine of the 15 credits must be at the 3000-level or above.

Sample Eight-Semester Programs

Bachelor of Arts degree with a major in Art History and Archaeology

With Art History Option

**ART HISTORY AND
ARCHAEOLOGY COURSES**

AR HA 1005--Undergraduate Topics in Art History and Archaeology- Humanities (1). Special studies in Art History and Archaeology.

AR HA 1105--Undergraduate Topics in Art History and Archaeology (3). Special studies in Art History and Archeology.

AR H A 1110--Ancient and Medieval Art (3). Introductory survey of the architecture, sculpture and painting of the ancient Near East, Greece, Rome, Byzantium and Medieval Europe.

AR H A 1110--HAncient & Medieval Art - Honors (3). Introductory survey of the architecture, sculpture and painting of the ancient Near East, Greece, Rome, Byzantium and Medieval Europe. Honors eligibility required.

ARHA1120--Renaissance through Modern Art (3). Introductory survey of architecture, sculpture and painting of Europe and America from the Renaissance to Modern times.

AR H A 1120H--History of Western Art II - Honors (3). Introductory survey of architecture, sculpture and painting of Europe and America from the Renaissance to Modern times. Honors eligibility required.

AR H A 1230--Introduction to Asian Arts (3). (same as HIST 1820, REL STU 1230, S A ST 1152). This course is an introduction to the literature and visual arts of Asia through selected master works. It focuses principally on India and China and investigates the distinctive features of their cultures.

AR H A 2005--Topics Art History and Archaeology - Humanities (1-3). Study of special topics in Art History and Archaeology.

AR H A 2150--The Art of the Book (3). Introduction to the illustrated book as a locus of artistic style, cultural currency, and visual literacy.

AR H A 2230--Introduction to the Arts of Islam (3). Architecture, decorative arts and painting of the Muslim world from the seventh to the 19th century. The formation of Islamic art and its relationships with religion, philosophy and symbolism.

ARHA 2410--Ancient Technology (3). Engineering, architecture, and military technology in the ancient world.

AR H A 2830--American Art and Architecture (3). Architecture, sculpture, painting of America from 17th century to present day.

ARHA2850--Introduction to Visual Culture (3). Introduction to the problems of understanding, analyzing, and writing about visual culture.

AR H A 2940--Archaeological Methods (2-6). Methods of excavating various types of sites; recording, preserving their materials. Prerequisite: instructor's consent.

AR H A 3005--Topics in Art History and Archaeology- Humanities (1-3). Selected studies in various facets of art history and archaeology. Prerequisite: AR HA 1110, 1120, 2830 as appropriate.

AR HA 3120--Art and Gender in Antiquity (3). Comparative survey of art and archaeology in Egypt, Greece, and Rome to understand how societies constructed gender through material resources and how cultural perceptions of

gender affected individual lives and behaviors. Emphasis on research methods and evaluation of sources.

AR H A 3210--Near Eastern and Egyptian Art and Archaeology (3). General survey of material culture of the Near East and Egypt from the earliest times to the early Iron Age. Prerequisite: AR H A 1110 or equivalent.

AR H A 3310--Greek Art and Archaeology (3). General survey of material culture in Greece from earliest times to the Hellenistic period. Prerequisite: AR H A 1110 or equivalent.

AR H A 3410--Roman Art and Archaeology (3). General survey of material culture in the Roman world from earliest times through the 3rd century. Prerequisite: AR H A 1110 or equivalent.

ARHA3510--Byzantine and Islamic Art and Archaeology (3). General survey of the visual arts of Byzantium and her neighbors from the founding of Constantinople in A.D. 330 to the Ottoman conquest of 1453. Prerequisite: AR H A 1110 or equivalent.

AR H A 3520--Early Medieval Art and Archaeology (3). General survey of the architecture, painting and sculpture of Europe from the 4th century to the beginning of the Romanesque period. Prerequisite: AR H A 1110 or equivalent.

ARHA3530--Late Medieval Art (3). General survey of the art and architecture of Europe from Charlemagne through the 14th century. Prerequisite: AR H A 1110 or equivalent.

AR H A 3620--Italian Renaissance Art (3). General survey of the architecture, painting and sculpture of Italy from the 14th through the 16th century. Prerequisite: AR HA 1110 or 1120 or equivalent.

AR H A 3630--Northern Renaissance Art (3). General survey of the art and architecture of Northern Europe from the 14th through the 16th century. Prerequisite: AR H A 1120 or equivalent.

ARHA3640--Baroque Art (3). General survey of 17th century European architecture, painting and sculpture. Prerequisite: AR H A 1120 or equivalent.

AR H A 3720--Cities in the Western Imagination (3). Interdisciplinary introduction to the forms, functions, and meanings of cities in Europe and the Americas from ancient to modern times; plans and predictions for the future also considered. Emphasis is placed on cities as fields for imaginative activity on the part of those who have designed, built, used, and interpreted them.

AR H A 3730--Eighteenth Century European Art (3). General survey of 18th-century European painting, sculpture and architecture. Prerequisite: AR H A 1120 or equivalent.

AR H A 3740--Nineteenth Century European Art (3). General survey of 19th-century European painting, sculpture and architecture. Prerequisite: AR HA 1120 or equivalent.

AR H A 3750--Modern Art in Europe and America (3). General survey of international directions in painting, sculpture, and architecture from 1885 to ca. 1940. Prerequisite: AR H A 1120 or equivalent.

ARHA3760--Contemporary Art (3). General survey of painting, sculpture, and architecture

from the Second World War to the present. Prerequisite: AR H A 1120 or equivalent.

AR H A 3780--Architecture in Film (3). (Same as FILM_S 3780) Filmmakers use architecture to convey meaning on symbolic, psychological, and ideological levels. Using architectural history and theory, in conjunction with weekly film screenings from a variety of genres, this course explores how architecture operates within film.

AR H A 3830--American Art and Culture, 1500-1820 (3). General survey of American visual culture - painting, sculpture, architecture - between 1500 and 1820. Prerequisite: AR HA 1120 or 2830 or equivalent.

AR H A 3840--American Art and Culture, 1820-1913 (3). General survey of American visual culture - painting, sculpture, architecture, photography - between 1820-1913. Prerequisite: AR H A 1120 or 2830 or equivalent.

AR H A 3850--American Art and Culture, 1913-Present (3). General survey of American visual culture - painting, sculpture, architecture, photography, advertising, film, new media - between 1913 and the present. Prerequisite: AR H A 1120 or 2830 or equivalent.

AR H A 4005--Topics in Art History and Archaeology-Humanities (cr.arr.). Special studies in art history/archaeology; covers subjects not included in regularly offered courses. Prerequisite: instructor's consent.

ARHA4120--Women, Art and Society 1700-1920 (3). (same as Women and Gender Studies 4120). This course surveys and analyzes the careers and works of selected European and American women artists, and images of women (by female and male artists) in the 18th, 19th and the first half of the 20th centuries. Prerequisite: instructor's consent.

AR H A 4320--Archaeology of the Aegean Bronze Age (3). Analysis of the material culture of Greek prehistoric civilizations from 3000 to 1000 B.C. Prerequisite: instructor's consent.

ARHA4340--Greek Architecture (3). Survey of the art of building in the Aegean and Classical world from earliest times to the Hellenistic period. Prerequisite: instructor's consent.

ARHA4350--Greek Pottery (3). Examination of pottery and vase painting with an emphasis on production, iconography, and social context. Prerequisite: instructor's consent.

AR H A 4360--Greek Sculpture (3). Survey of sculptor's art in Aegean and Classical world from earliest times to Hellenistic period. Prerequisite: instructor's consent.

AR H A 4420--Minor Arts of Antiquity (3). Discussion of selected minor arts and crafts of the Greco-Roman world. Prerequisite: instructor's consent.

AR H A 4440--Roman Architecture (3). The history of Roman architecture, origin and development of forms and techniques, major monuments in Rome and its provinces through the 3rd century after Christ. Prerequisite: instructor's consent.

AR H A 4460--Roman Sculpture (3). The origins and development of sculpture in the Roman Republic and the Roman Empire. Prerequisite: instructor's consent.

ARHA4490--Late Antique Art and Archaeology (3). Exploration of the material culture of

the Mediterranean world from the 3rd century to Iconoclasm. Prerequisite: instructor's consent.

AR H A 4510--Byzantine Art and Archaeology (3).Historical investigation of Byzantine material culture in the eastern Mediterranean and Russia, from the outbreak of Iconoclasm to the Ottoman conquest. Prerequisite: instructor's consent.

AR H A 4520--Art of the Dark Ages (3).Survey of the visual arts of western Europe during the period of migrations, from the fall of Rome to the Carolingian renovation of the 9th century. Prerequisite: instructor's consent.

AR H A 4530--Romanesque Art and Architecture (3).Discussion of selected topics in architecture, sculpture and painting and their artistic and cultural relationship from ca. 800 to ca. 1150. Prerequisite: instructor's consent.

AR H A 4540--Gothic Art and Architecture (3).Discussion of selected topics in architecture, sculpture and painting and their artistic and cultural relationship from ca. 1150 to ca. 1400. Prerequisite: instructor's consent.

AR H A 4620--Michelangelo and the High Renaissance (3).Sculpture, architecture, paintings, and drawing of Michelangelo in the context of his times. Prerequisite: instructor's consent.

AR H A 4630--The Renaissance Artist (3).Lectures, readings, discussions and a research paper related to the Renaissance artist. Focus will be on representations of the artist in art and literature from ca. 1300 to ca. 1650. Prerequisite: instructor's consent.

AR H A 4640--Renaissance and Baroque Architecture (3).Problems in European architectural history from the 15th through the 18th century. Prerequisite: instructor's consent.

AR H A 4650--Venetian Painting (3).Survey of Venetian Painting from the 14th through the 18th century. Prerequisite: instructor's consent.

AR H A 4660--Renaissance Figural Arts of Northern Europe (3).Discussion of selected topics in painting and sculpture and their artistic and cultural relationships from the fourteenth through the sixteenth century in northern Europe. Prerequisite: instructor's consent.

AR H A 4670--Baroque Figural Arts (3).Painting and sculpture of Italy in the 17th century. Prerequisite: instructor's consent.

AR H A 4710--The Arts of the Rococo (3).This course explores European Art from approximately 1710 to 1770, focusing on art associated with two different social sectors: The early modern aristocratic court culture whose artistic predilections had formed the European norm, and the increasingly powerful merchant classes whose newfound wealth enabled new artistic genres and styles to proliferate. Our inquiry begins with an exploration of the rococo as an ornamental style; we examine its origins in Italian garden architecture and subsequent transformation into a decoration for both French palatial interiors and German Churches. We then launch a succession of case studies of important artists, media, and objects in order to assess the varied ways that diverse social identities were deflected through the periods' art and architecture. Students will pursue a research topic on rococo art for their semester project. Prerequisite: AR_H_A3730; consent of instructor

AR H A 4730--Realism Through Post-Impressionism (3).Styles and issues in nineteenth-century art. Prerequisite: instructor's consent.

AR H A 4740--Modern Architecture (3).Problems in the history of architecture from the late 18th century to the present. Prerequisite: instructor's consent.

AR H A 4760--Modern Sculpture (3).Sculpture in Europe and the U.S. ca. 1880 to the present, with special emphasis on changing definitions of the medium. Prerequisite: instructor's consent.

AR H A 4780--Advanced Course in Contemporary Art (3).Topics in European and American painting and sculpture after 1950. Prerequisite: instructor's consent.

AR H A 4820--American Material Culture (3).An exploration of American material culture from a multidisciplinary perspective. Prerequisite: instructor's consent.

AR H A 4840--American Architecture (3).An exploration of architecture and urbanism from the colonial period to the present. Prerequisite: instructor's consent.

AR H A 4960--Special Readings in Art History and Archaeology (1-3).Independent readings and research selected in consultation with supervisory faculty. Prerequisite: instructor's consent.

AR H A 4970--Capstone: Art History and Archeology (1).Students will write an expanded, guided research paper. The Capstone student will consult on a regular basis with the professor responsible for the course and will make an oral presentation of the paper in the course. Must be taken in conjunction with a 4000-level Art History and Archaeology course. Instructor's consent.

AR H A 4980--Internship (3).A one-semester or full summer intensive internship for departmental majors with specific projects and responsibilities to be arranged by the student in cooperation with a faculty member and an appropriate agent of the museum involved. May be taken as an elective only. May be repeated for a maximum of 6 hours credit. Instructor's consent.

AR H A 4996--Honors Proseminar I (3).Research methods, bibliography, use and criticism of source material. Prerequisite: instructor's consent.

AR H A 4999--Honors Reading and Research I (3).Individual research projects in preparation of senior thesis. Prerequisite: AR H A 4996 and instructor's consent.

PROFESSOR EMERITUS B. G. Cumbie, A. Eisenstark, D. Mertz, C. D. Miles

The Division of Biological Sciences offers both a Bachelor of Arts and a Bachelor of Science with a major in Biological Sciences, in addition to a minor in biological sciences for students majoring in other departments. The department also offers MA and PhD degrees in Biological Sciences.

The department strongly encourages participation in departmental honors. The heart of the honors program is a year-long experience in laboratory, field, or theoretical work in any area of biology. Students work directly with outstanding faculty mentors from the Division of Biological Sciences or other life science units on campus.

Major Program Requirements - Biological Sciences

Requirements for the BA and BS degrees with a major in Biological Sciences include course work in biology and ancillary science departments (chemistry, physics and math). The BS degree program requires more extensive course work, with additional studies in biology and the ancillary sciences. The BA degree program is more flexible and has fewer required courses to accommodate students with dual degrees or minors in related departments. Both degree programs can be used to

prepare for graduate study or professional school. Students must also complete college and university graduation requirements, including university general education requirements.

Major core requirements

Biology

BIO SC 1500: Introduction to Biological Systems	5
BIO SC 2200: General Genetics	4
BIO SC 2300: Introduction to Cell Biology.....	4
Population biology (select from*).....	3-5
BIO SC 3100: Community Biology (3)	
BIO SC 3650: General Ecology (5)	
BIO SC 4600: Evolution (3)	
BIO SC 4640: Behavioral Biology (3)	
BIO SC 4660: Plant Population Biology (4)	
Biological diversity (select from*).....	3-5
BIO SC 2600: Ornithology (4)	
BIO SC 2700: Ichthyology (4)	
MICROB 3200: Introduction to Medical Microbiology and Immunology (4)	
BIO SC 3210: Plant Systematics (4)	
BIO SC 3260: Invertebrate Zoology (4)	
BIO SC 3360: Herpetology (4)	
BIO SC 3510: Biology of Fungi (3)	
BIO SC 3660: Mammalogy (4)	
BIO SC 3710: Introductory Entomology (3) and	
BIO SC 3715: Insect Diversity (2)	

*The following courses will satisfy both the population biology and the biological diversity course requirements: BIO SC 2600, 2700, 3260, 3360, 3660 and 4660.

Capstone course (select one) (Complete in last 45 hours)

BIO SC 4950 and 4952: Undergraduate Research in Biology (3)
BIO SC 4950H and 4952H: Honors Research in Biology (3)
BIO SC 4972: Developmental Biology (3)
BIO SC 4974: Molecular Biology Laboratory (3)
BIO SC 4976: Molecular Biology (3)
BIO SC 4978: Cancer Biology (3)
BIO SC 4980: Cellular Interactions in Health and Disease (3)
BIO SC 4982: Human Inherited Diseases (3)
BIO SC 4984: Mammalian Reproductive Biology (3)
BIO SC 4986: Neurology of Motor Systems (3)
BIO SC 4988: Nerve Cells and Behavior (3)
BIO SC 4990: Vertebrate Histology and Microscopic Anatomy (5)
BIO SC 4994: Senior Seminar (3)

All graduating seniors must pass the Major Field Test in Biology, or comparable exam, given in their final semester.

Electives

All biology majors must take additional biology courses to total at least 29 credits for the BA degree or 33 credits for the BS degree.

Elective credits must be in formal courses numbered above 2000 and must include at least one 3000- or 4000-level laboratory course, and one 4000-level course. BIO SC 2100 may not be used to satisfy this requirement. MICROB 3200 may not be used to satisfy the laboratory course requirement.

Independent reading, service learning, internships, problems and seminar courses do not apply.

Students completing research courses BIO SC 4950, 4950H, 4952, or 4952H for 6 credits may apply 3 credits toward fulfillment of biology elective hours for the BA or BS degree.

Students may repeat research courses for a total of 12 hours. Any credit remaining after 3 hours are used as a capstone or an elective in biology will be applied toward total hours to

graduate. A maximum of 12 credit hours from the following courses (BIO SC 2940, 2960, 2965H, 4085, 4950, 4950H, 4952 and 4952H) can be counted toward graduation.

BIOCHM 4270 and 4272 may apply toward fulfillment of biology elective hours for the BA or BS degree.

Other required courses

BA program	21-24
General chemistry and laboratory (CHEM 1310, 1320, 1330)	8
Organic Chemistry (CHEM 2100, 2110)	6
One course in physics, geology or astronomy	4-5
One course selected from	3-5
Calculus (MATH 1400 or 1500)	
STAT 1400	
CS 1040	

BS program	29-32
General chemistry and laboratory (CHEM 1310, 1320, 1330)	8
Organic chemistry with laboratory (CHEM 2100, 2110, 2130)	8
One year of general physics with laboratory.....	8-10
One or two courses in calculus (either MATH 1500 or MATH 1400 and 2100) OR	
STAT 1400 and CS 1040	5-6

All courses in the major (including ancillary sciences) must be completed with a grade of C- or higher with a cumulative GPA of 2.0 or higher. At least 12 hours of biology coursework must be taken in residence at MU.

Departmental Honors

Students may earn degrees with honors by completing BIO SC 4950H and 4952H (6 credits) and preparing a manuscript suitable for publication in a journal or the abstract of an oral or poster presentation at an on-campus symposium or at a regional or national meeting of a professional society. Students should meet with the honors program director to arrange their research experience. The honors program requires sophomore standing or higher and a GPA of 3.3. Students with a GPA between 3.0 and 3.29 may petition the director of the honors program for admission. The honors program director is Professor David Setzer, 410 Tucker, 882-6821, setzerd@missouri.edu.

Minor in Biological Sciences

Minor core requirements	15
Introductory biology	5
BIO SC 1200: General Botany OR	
BIO SC 1500: Introduction to Biological Systems	

Additional biological sciences (from at least two areas)..10

- Genetics
 - BIO SC 2200: General Genetics (4)
- Cell biology
 - BIO SC 2300: Introduction to Cell Biology (4)
- Population biology
 - BIO SC 3100: Community Biology (3)
 - BIO SC 3650: General Ecology (5)
 - BIO SC 4600: Evolution (3)
 - BIO SC 4640: Behavioral Biology (3)
 - BIO SC 4660: Plant Population Biology (4)
- Biological diversity
 - BIO SC 2600: Ornithology (4)
 - BIO SC 2700: Ichthyology (4)
 - BIO SC 3210: Plant Systematics (4)
 - BIO SC 3260: Invertebrate Zoology (4)
 - BIO SC 3360: Herpetology (4)
 - BIO SC 3510: Biology of Fungi (3)
 - BIO SC 3660: Mammalogy (4)
 - BIO SC 3710: Introductory Entomology (3) AND
 - BIO SC 3715: Insect Diversity (2)
 - MICROB 3200: Introduction to Medical Microbiology

and Immunology (4)

At least one of these additional courses must include a laboratory. Problems, service learning, internships, readings and research (i.e., 2100, 2940, 2960, 2965H, 4085, 4950, 4952 and 4960) may not be used to fulfill requirements for the minor. MICROB 3200 may not be used to satisfy the laboratory course requirement.

All courses in the minor must have a grade of C- or higher with a cumulative GPA of 2.0 or higher in the minor. At least nine of the 15 credit hours in the minor must be taken in residence at MU.

Sample Plans for Years 1-2

BA or BS in Biological Sciences

NOTE: These plans are intended only as *general guides*. Courses outside Biology, Chemistry, Math 1100, and English 1000 are provided only for *illustrative purposes*. Advanced credit or exemption from the Foreign Language requirement and/or advanced credit in non-science courses, along with the interests of each individual student will determine a final combination of courses in each semester that is unique for each student. Note also that the sample schedules in Semester 5 and beyond are left incomplete on purpose because each schedule should be *highly* individualized at that point. Students who are pursuing the BA will not need to complete CHEM 2130.

Sample Plan 1 -- A student that is exempt from Math 1100 and has a strong background in high school Chemistry:

Semester I	
CHEM 1320	3
ENGLSH 1000	3
Behavioral Science.....	3
Social Science	
(MO State Law)	3
CHEM 1310	
(Advanced Standing)	2
Total.....	14

Semester III	
CHEM 2100	3
BIO SC 2200	4
Foreign Language I	5
MATH 1400	3
Total.....	15

Semester V	
BIO SC 2300	4
Foreign Language 3	3

Semester II	
CHEM 1330	3
BIO SC 1500	5
Humanities	3
Social Science	3
IS< 1111	1
Total.....	15

Semester IV	
CHEM 2110	3
CHEM 2130	5
Foreign Language 2	2
MATH 2100	3
Behavioral Science	
(2000+&/or WI)	3
Total.....	16

Sample Plan 2 -- A student that is exempt from Math 1100 but does not have a strong background in high school Chemistry:

Semester I	
CHEM 1310	2
BIO SC 1500	5
Humanities	3
Social Science	
(MO State Law)	3
IS<1111	1
Total.....	14

Semester III	
CHEM 1330	3
BIO SC 2200	4
Foreign Language I	5
Behavioral Science.....	3
Total.....	15

Semester V	
CHEM 2110	3
CHEM 2130	2
Foreign Language 3	3
BIO SC 2300	4

Semester II	
CHEM 1320	3
ENGLSH 1000	3
Behavioral Science.....	3
Humanities	3
Social Science	3
Total.....	15

Semester IV	
CHEM 2100	3
Social Science	3
Foreign Language 2	5
MATH 1400	3
Total.....	14

Sample Plan 3 -- A student that needs Math 1100 and does not have a strong background in high school Chemistry:

Semester I	
MATH 1100	3
CHEM 1310	2
Behavioral Science.....	3
Social Science	3
SSC 1150	2
Total.....	13

Semester III	
CHEM 1330	3
Social Science	
(MO State Law)	3
Humanities	3
Foreign Language 1	5
Total.....	14

Semester V	
Foreign Language 3	3
CHEM 2110	3
CHEM 2130	2
BIO SC 2300	4
Total.....	12

Semester II	
CHEM 1320	3
BIO SC 1500	5
ENGLSH 1000	3
Humanities	3
IS & LT 1111	1
Total.....	15

Semester IV	
CHEM 2100	3
BIO SC 2200	4
Foreign Language 2	5
Behavioral Science	
(2000+).....	3
Total.....	15

Semester VI	
MATH 1400	3
Total.....	3

BIOLOGICAL SCIENCES COURSES

BIO SC 1002--Topics in Biological Sciences-Biological/Physical/Mathematics (cr. arr.). Selected topics not in regularly offered courses.

BIO SC 1010--General Principles and Concepts of Biology (3). Emphasizes connections and applications to society and the human condition, science literacy, and critical thinking skills. A discussion of general principles and fundamental concepts of living things. Prerequisite: MATH 1100/1120 or concurrent enrollment. This course is intended for non-science majors.

BIO SC 1020--General Biology Laboratory (2). Laboratory exercises dealing with representative organisms and methods of modern biological sciences. Prerequisite: BIO SC 1010 or 1010 concurrently. This course is intended for non-science majors.

BIO SC 1030--General Principles and Concepts of Biology with Laboratory (5). Survey of general principles and basic concepts of life science, emphasizing applications to society and the human condition. Lectures address science literacy and critical thinking and laboratory exercises use representative organisms to complement lecture topics. Prerequisite: MATH 1100/1120 or concurrent enrollment. This course is intended for non-science majors.

BIO SC 1060--Basic Environmental Studies (3). Considers the ecosystem, energy and biogeochemical cycles and population dynamics; relation of the environment to agriculture and technology, pollution, power and food production; politico-economic considerations; moral and ethical issues. For non-science majors.

BIO SC 1100--Introductory Zoology with Laboratory (5). Introduces important principles and concepts of zoology. Emphasizes cell biology; evolution; genetics; ecology; structure, function, development of the organism.

BIO SC 1200--General Botany with Laboratory (5). Introduction to study of plants. Emphasis on structure, growth, physiology, genetics and reproduction of plants.

BIO SC 1500--Introduction to Biological Systems with Laboratory (5). Basic concepts and principles of the structure and function of living systems, from cells to populations. Foundation course for science students intending to complete a 3-semester sequence that also includes genetics and cell biology. Prerequisites: MATH 1100/1120 and high school chemistry.

BIO SC 1500H--Introduction to Biological Systems with Laboratory Honors (5). Basic concepts and principles of the structure and function of living systems, from cells to populations. Foundation course for science students intending to complete a 3-semester sequence that also includes genetics and cell biology. Prerequisites: MATH 1100/1120 and high school chemistry. Honors eligibility required.

BIO SC 2002--Topics in Biological Sciences-Biological/Physical/Mathematics (cr. arr.). Selected topics not covered in regularly offered courses. Prerequisite: a course in general biology.

BIO SC 2100--Infectious Diseases (3). An introduction to the basic science of bacterial,

viral, protozoan, fungal and helminth infections, including discussions of how illness has influenced or been affected by public policy and culture. Prerequisite: BIO SC 1010. Not open to Biology Majors.

BIO SC 2200--General Genetics (4). Principles of inheritance in plants and animals; structure and use of genetic material, transmission of genetic information, linkage, modification of genetic information, regulation of genetic activity, population genetics. Prerequisites: BIO SC 1500 and CHEM 1320 (or concurrent enrollment).

BIO SC 2300--Introduction to Cell Biology (4). Analysis of cellular organization and function at the molecular level. The mechanisms underlying cellular trafficking, cell motility, and signaling within cells and between cells and their environment will be emphasized. Prerequisites: BIO SC 2200 and CHEM 2100 (or concurrent enrollment in CHEM 2100).

BIO SC 2600--Ornithology (4). (same as Fisheries and Wildlife 2600). Structure, identification, habits, importance of regional birds. Field work, lectures, lab. Prerequisites: 5 hours biology or instructor's consent.

BIO SC 2700--Ichthyology (4). (same as Fisheries and Wildlife 2700). A broad introduction to the biology and ecology of fishes. Emphasis will be placed on understanding the adaptations fishes exhibit to aspects of their environment. Includes lab. Prerequisites: 8 hours biology or equivalent.

BIO SC 2940--Internship in Biological Science (1-3). Work experience in a non-profit, for profit, or governmental organization relevant to the biological sciences. Intended for students doing internships in which independent research is less than 50% of the experience. Prerequisites: junior standing, instructor's consent, 12 hours of biological science. Graded on S/U basis only.

BIO SC 2960--Readings in Biological Science (1-3). Supervised reading in biological literature. May be repeated up to six hours total credit. Prerequisites: instructor's consent. May not be used in partial fulfillment of Arts and Science foundation requirement.

BIO SC 2965H--Honors Readings in Biological Literature (1-3). Selected readings in biological literature for Honors, in consultation with instructor. Prerequisite: overall 3.3 GPA; Biological Sciences honors program major; instructor's consent. May not be used in partial fulfillment of Arts and Science foundation requirement. Honors eligibility required.

BIO SC 3002--Topics in Biological Sciences-Biological/Physical/Mathematics (cr. arr.). Selected topics not in regularly offered courses. Prerequisite: instructor's consent.

BIO SC 3050--Genetics and Society (3). Introduction to genetics, emphasizing the impact of genetics on human society. Human evolution, molecular genetics, genetic engineering in medicine and agriculture. An intensive writing course. Prerequisite: a college science course or equivalent (advanced high school biology).

BIO SC 3100--Community Biology (3). Integrated set of lectures on evolution/population genetics, population dynamics/social systems and ecosystem structure/process, biomass in worldwide context, man in the environment.

Prerequisites: BIO SCI 1100, 1200 or 1500 or equivalent. No credit if taken after BIO SC 3650.

BIO SC 3210--Plant Systematics (4). Principles of classification of plants; survey of diversity in flowering plant families; identification of local flora; use of keys. Includes lab. Prerequisite: 8 hours of BIO SC.

BIO SC 3250--Parasitology (4). (same as BIOMED 3250). Parasitism is considered as a fundamental type of interspecies interaction. Principles of parasitism as they apply to animals are presented with emphasis on parasite morphology, biology and host parasite relationships. Includes lab. Prerequisite: 8 hours of biology.

BIO SC 3260--Invertebrate Zoology (4). Structure, ecology and phylogeny of the invertebrate phyla. Includes lab. Prerequisites: BIO SC 1100 or 1500.

BIO SC 3360--Herpetology (4). The biology, ecology, taxonomy, and distribution of amphibians and reptiles. Some Saturday field trips. Prerequisite: 8 hours BIO SC or equivalent.

BIO SC 3510--Biology of Fungi (3). (same as Plant Science 3510). The diverse roles of fungi in the biosphere will be explored by considering fungi we eat, fungi which destroy our food, fungi in folklore and fungi as global nutrient recyclers. Includes lab. Prerequisite: BIO SC 1100, 1200, or 1500.

BIO SC 3650--General Ecology (5). Principles of populations, coevolution, density factors, competition; physical environment; concept of community, trophic structure, biotic succession; characterization of biomes, man in ecosystem. Biology majors having completed BIO SC 3100: 2 hours credit. Prerequisites: 10 hours in biology and junior standing.

BIO SC 3655--Tropical Ecology: Methods and Applications (3). Field study of tropical community; additional fee for transportation and accommodations required. Prerequisite: BIO SC 3100, 3650, 4600 or 4660.

BIO SC 3660--Mammalogy (4). (same as Fisheries and Wildlife 3660). Taxonomy, distribution, structure, habits, importance of mammals; emphasizes those of central United States. Includes lab. Prerequisites: junior standing or instructor's consent.

BIO SC 3700--Animal Physiology (5). Introduces concepts of vertebrate organ function and homeostatic control emphasizing mammalian physiology. Some comparisons to function in other vertebrates and strategies for coping with environmental stresses introduced. Includes lab. Prerequisite: BIO SC 2300.

BIO SC 3710--Introductory Entomology (3). (same as Plant Science 3710). Holistic biology of insects, including anatomy, physiology, behavior, ecology, and management. Prerequisites: BIO SC 1100, 1200, or 1500 or equivalent.

BIO SC 3715--Insect Diversity (2). (same as Plant Science 3715). Laboratory emphasizing external insect anatomy, classification, and identification to the family level. Insect collection is required. Prerequisite: concurrent enrollment or previous satisfactory completion of PLNT S 3710/BIO SC 3710.

BIO SC 3750--General Microbiology (4).

Principles of microbiology. Includes lab. Prerequisite: BIO SC 2200 and 2300 completed with C range grades.

BIO SC 3780--Genetics Laboratory (2). Experimental genetic studies of *Drosophila*, corn and microorganisms. Prerequisite: C range grade or better in BIO SC 2200 or instructor's consent.

BIO SC 3790--Developmental Biology Laboratory (2). Laboratory studies of development in sea urchin, chicken and roundworm. Prerequisites: BIO SC 4972 or co-enrollment in 4972.

BIO SC 4002--Topics in Biological Science - Biological/Physical/Mathematics (1-3). Selected topics not in regularly offered courses. Prerequisite: instructor's consent and senior standing. May be repeated up to 2 times for credit.

BIO SC 4085--Problems in Biological Sciences (cr.arr.). Individual supervised work to supplement regularly organized courses in biology; introduction to research. Prerequisites: junior standing and instructor's consent.

BIO SC 4100--Limnology (3-4). (same as Fisheries and Wildlife 4100). (lecture/lab: 4 hrs.; lecture only: 3 hrs.) Ecology of inland waters with emphasis on productivity. Prerequisites: senior standing or BIO SC 3650.

BIO SC 4300--Analysis of Biological Macromolecules (3). Theory/application of techniques used for characterization of proteins, nucleic acids; topics: sedimentation velocity; equilibrium; sucrose density gradients; electrophoresis; spectrophotometry. Prerequisites: BIO SC 2300 or BIOCHM 4270; MATH 1500 and one year PHYSCS.

BIO SC 4310--Physics in Cell and Developmental Biology (3). (same as Physics 4310 and Medical Pharmacology and Physiology 4310). Discusses the role of physical mechanisms in specific cellular and developmental processes and phenomena, in particular those characterizing the embryonic stage of multicellular organisms. Each process and phenomenon is first described in biological terms and then within a physical model, with special emphasis on the interplay between the two descriptions. Prerequisite: instructor's consent or PHYSCS 1220 or 2760 and BIO SC 2300.

BIO SC 4320--Plant Physiology (3-5). (same as PL SCI 4320). Modern physiology of higher plants using common cultivated plants as examples. May be taken with or without laboratory. Prerequisites: BIO SC 1200 or 1500 and 5 hours CHEM.

BIO SC 4328--Introductory Radiation Biology (3). (same as Nuclear Engineering 4328, Radiology 4328). Concepts of ionizing radiations, their actions on matter through effects on simple chemical systems, biological molecules, cell, organisms, man. Prerequisite: junior standing, Sciences/Engineering; one course in BIO SC and PHYSCS/CHEM; or instructor's consent.

BIO SC 4400--Plant Anatomy (4). (same as Plant Science 4400). Comparative structure, growth of meristems; development, structure of important cell types, tissues, tissue systems; comparative anatomy of stem, root, leaf. Emphasizes anatomy of gymnosperms, angiosperms. Includes lab. Prerequisites: BIO SC 1200 or 1500.

BIO SC 4500--Neurobiology (3). Vertebrate and invertebrate neurobiology, including cell and molecular biology of the neuron, neurophysiology, neuroanatomy, neuroethology and developmental neurobiology. Prerequisites: BIO SC 2300 or 3700 or instructor's consent.

BIO SC 4560--Sensory Physiology and Behavior (3). Basic principles of coding and integration of sensory stimuli; neural correlates of animal behavior; environmental influences on postnatal sensory development. Prerequisite: BIO SC 4500. Graded on A/F basis only.

BIO SC 4580--Computational Neuroscience (3). (same as Electrical and Computer Engineering 4580). An interdisciplinary course with a strong foundation in quantitative sciences for students in biological and behavioral science and an introduction to experimental methods for students from quantitative sciences. Prerequisites: BIO SC 1010 or 1500; MATH 1500.

BIO SC 4600--Evolution (3). Surveys various processes in organic evolution and underlying genetic mechanisms. Prerequisite: BIO SC 2200.

BIO SC 4640--Behavioral Biology (3). Comparative study of animal ethology. Principles of animal ethology illustrated in different animal phyla. Prerequisites: BIO SC 1500 and one additional upper-level course in BIO SC or PSYCH.

BIO SC 4642--Animal Communication (3). Physical properties of sensory stimuli, receptor mechanisms, functional significance of communication behavior, and multidisciplinary and experimental approaches to current research in animal communication. Prerequisites: BIO SC 2300 and PHYSCS 1220 or equivalent.

BIO SC 4660--Plant Population Biology (4). Covers the ecological and evolutionary processes that influence the distribution and abundance of plant species. Topics include evolution of life history schedules, gender evolution, population growth and demography, competition, herbivory, plant-pollinator interactions, clonal growth, and plant community structure. Includes lab. Prerequisites: 2 courses in BIO SC.

BIO SC 4670--Avian Ecology (3). Advanced examination of ecological patterns in birds. Explores the environmental factors affecting the evolution of avian behavior, morphology, community structure and distribution. Prerequisites: BIO SC 3100 or 3650; 2600.

BIO SC 4950--Undergraduate Research in Biology (1-3). Individually directed field or laboratory research for upperclass students under faculty supervision. Project must be arranged by student and faculty member prior to registration. Prerequisites: Overall GPA 2.75; 20 hours of BIO SC and/or CHEM; instructor's consent. May be repeated to a maximum of 6 hours.

BIO SC 4950H--Honors Research in Biology (1-3). Individually directed field or laboratory research for upper-level Honors students, in consultation with a faculty member. Project must be arranged by student and faculty member prior to registration. May be repeated for credit. Prerequisite: overall GPA 3.3; instructor's consent; biology or microbiology major. Honors eligibility required. Graded on A/F basis only.

BIO SC 4952--Undergraduate Research in

Biology (1-3). Individually directed field or laboratory research for upperclass students under faculty supervision. Project must be arranged by student and faculty member prior to registration. Prerequisites: BIO SC 4950; overall GPA 2.75. May be repeated to a maximum of 6 hours.

BIO SC 4952H--Honors Research in Biology (1-3). Continuation of research program. Successful completion requires public presentation and leads to degree with Honors in biological sciences or microbiology. May be repeated for credit. Prerequisites: BIO SC 4950; overall GPA 3.3; instructor's consent; biology or microbiology major. Honors eligibility required. Graded on A/F basis only.

BIO SC 4960--Special Readings in Biological Sciences (cr.arr.). Independent readings and discussions of topics in biology selected in consultation with supervising faculty member. Paper required. Prerequisites: senior standing in BIO SC and instructor's consent.

BIO SC 4970--Neurobiology Laboratory (3). Laboratory experience with experimental neurobiology, with emphasis on neural networks, motor systems, and developmental neurobiology. Prerequisites: BIO SC 3700 or 4500 or instructor's consent.

BIO SC 4972--Developmental Biology (3). Analysis of the molecular, genetic, cellular, and morphological processes responsible for phenotypic changes in developing organisms. A variety of experimental systems are discussed to identify common mechanisms used by developing organisms. Prerequisites: BIO SCI 2200, 2300, CHEM 2100.

BIO SC 4974--Molecular Biology Laboratory (3). (same as BIOCHM 4374). Emphasizes recently developed genetic and biochemical techniques; illustrates how they apply to contemporary problems in biological research. Prerequisites: BIO SC 2200, BIOCHM 4272 or concurrent registration in BIO SC 4976.

BIO SC 4976--Molecular Biology (3). Molecular mechanisms of DNA replication, mutation, recombination and gene expression in prokaryotes, eukaryotes, and their viruses; gene fine structure; genetic engineering. Prerequisites: BIO SC 2200 and 2300.

BIO SC 4978--Cancer Biology (3). (same as BIOCHM 4978). The cellular and molecular basis of cancer, with emphasis on the application of genomics, proteomics, and genetic manipulations in model organisms to the study of cancer biology. Prerequisites: BIO SC 2200, 2300.

BIO SC 4980--Cellular Interactions in Health and Disease (3). The cell as a functional unit. Prerequisites: 10 hours BIO SC and 5 hours PHYSCS and 5 hours Organic Chemistry; some background in BIOCHM and/or Molecular Biology is strongly recommended.

BIO SC 4982--Human Inherited Diseases (3). Analysis of the molecular and cellular mechanisms underlying inherited diseases in humans. Topics include genetics of sex determination, metabolic disorders, cancer, blood groups, transplantation, AIDS. Prerequisites: BIO SC 2200 and 2300.

BIO SC 4984--Mammalian Reproductive Biology (3). Adult reproductive anatomy, physiology and behavior; gametogenesis and fertilization; placentation; sexual differentia-

tion; parturition; maternal behavior and lactation; puberty; reproductive aging; reproductive ecology. Prerequisites: junior standing and 15 hours of BIO SC.

BIO SC 4986--Neurology of Motor Systems (3). Examination of the function of neural networks at all levels, from properties of single neurons to large collections of neural elements. Prerequisites: BIO SC 3700 or instructor's consent.

BIO SC 4988--Nerve Cells and Behavior (3). The cellular basis of behavior. Molecular and cellular properties of nerve cells, as related to behavior, will be represented and discussed. Prerequisite: BIO SC 3700 or instructor's consent.

BIO SC 4990--Vertebrate Histology and Microscopic Anatomy (5). Microscopic anatomy of vertebrate tissues and organs. Includes lab. Prerequisites: junior standing; BIO SC 2300 and 3700, or equivalent are recommended.

BIO SC 4994--Senior Seminar (1-3). Readings and critical evaluation of selected problems and theories in biology. Offered in one or more sections, with specialized subdisciplinary emphasis. Prerequisites: BIO SC major, senior standing.

Department of Chemistry

J. Atwood, Chair
College of Arts and Science
125 Chemistry Building
(573) 882-8374
chemistry@missouri.edu

FACULTY

CURATORS PROFESSOR J. L. Atwood
RABJOHN PROFESSOR M. Harmata
SCHLUNDT PROFESSOR K. S. Gates
PROFESSOR J. E. Adams, R. E. Glaser, S. S. Jurisson, J. D. Robertson, P. R. Sharp, J.J. Tanner, D. L. Thompson, S.A. Tucker
ASSOCIATE PROFESSOR C. A. Deakyne, T.E. Glass, C. M. Greenlief, S. W. Keller, S. Z. Lever, T.D. Sewell
ASSISTANT PROFESSOR, R. JiJi, J.W. Cooley
ASSISTANT TEACHING PROFESSOR B. C. Ganley,
INSTRUCTOR L. Phillip Silverman

The Department of Chemistry offers three undergraduate degree tracks, two leading to a Bachelor of Science and one leading to a Bachelor of Arts. A minor in chemistry and a Bachelor of Science degree with departmental honors also are offered.

At the graduate level, the department offers MS and PhD degrees in Chemistry.

Major Program Requirements – Chemistry

Students should consult with a chemistry advisor to schedule science and mathematics requirements in the appropriate order. Note that for a number of chemistry courses there is a prerequisite of a grade of C or better in a previous course.

Students also must complete all applicable College of Arts and Sciences and University graduation requirements, including University general education. Note that students pursuing a BS degree with a major in Chemistry may opt to satisfy the foreign language requirement through alternative course work consisting of no fewer than 12 credits numbered 2000 or above.

Major core requirements

CHEM 1320: General Chemistry II	3
CHEM 1330: General Chemistry III.....	3
(May substitute CHEM 1500H for CHEM 1320, 1330)	
CHEM 2400: Fundamentals of Inorganic Chemistry.....	3
CHEM 2100: Organic Chemistry I	3
CHEM 2110: Organic Chemistry II	3
CHEM 2130: Organic Laboratory I	2
CHEM 2140: Organic Laboratory II.....	2
(May substitute CHEM 2160H, 2170H and 2190H for 2100, 2110, 2130 and 2140)	
CHEM 3200: Quantitative Methods of Analysis	4
CHEM 3700: Undergraduate Seminar in Chemistry	3
MATH 1500: Analytic Geometry and Calculus I.....	5
MATH 1700: Calculus II.....	5

Degree Tracks

Beyond the major core requirements, each student must select a degree track. There is one track for students pursuing a BA degree and three for those pursuing a BS. The BA degree is designed to meet the needs of students who wish to gain a strong chemistry background but who may have goals other than employment as

a chemist or graduate work in chemistry. The American Chemical Society certification track is recommended for BS students who desire professional employment as chemists or who plan to pursue graduate education in chemistry. A medicinal chemistry track is available to BS students who plan careers in the health professions or in pharmaceutical, clinical or medicinal chemistry. The third BS track, leading to simultaneous completion of a BS in Chemistry and a BS in Education, is appropriate for those students who wish to teach chemistry in secondary schools. More information about this third degree track is available from the Department of Chemistry.

Note: Tracks do not appear on diplomas.

Chemistry major with BA degree

CHEM 3300: Fundamentals of Physical Chemistry	3
PHYSICS 1210: College Physics (4) OR	
PHYSICS 2750: University Physics (5).....	4-5
PHYSICS 1220: College Physics (4) OR	
PHYSICS 2760: University Physics(5)	4-5
Collateral courses	12
Course work at the 2000-level or higher outside of chemistry. For example: (biological sciences, mathematics, biochemistry or business)	

Chemistry major with BS degree

American Chemical Society certification track

CHEM 3310: Physical Chemistry I	3
CHEM 3330: Physical Chemistry II	3
CHEM 3340: Physical Chemistry Laboratory	3
CHEM 4200: Instrumental Methods of Analysis.....	3
CHEM 4400: Inorganic Chemistry	3
CHEM 4950: Senior Research	3
BIOCHM 4270: Biochemistry	3
PHYSICS 2750: University Physics	5
PHYSICS 2760: University Physics	5
MATH 2300: Calculus III	3

Medicinal chemistry track

CHEM 3300: Fundamentals of Physical Chemistry	3
CHEM 4170: Medicinal Chemistry	3
CHEM 4600: Introduction to Radiochemistry with Lab OR	
BIO SC 4328: Introduction to Radiation Biology OR	
approved substitution	3
BIO SC 1500: Introduction to Biological Systems.....	5
BIO SC 2200: General Genetics	4
BIO SC 2300: Intro to Cell Biology	4
BIOCHM 4270: Biochemistry	3
BIOCHM 4272: Biochemistry	3
PHYSICS 1210: College Physics (4) OR	
PHYSICS 2750: University Physics (5).....	4-5
PHYSICS 1220: College Physics (4) OR	
PHYSICS 2760: University Physics (5).....	4-5

Double Majors

No specific programs are offered, although it is possible to combine a chemistry major (BS or BA) with a variety of other majors, including biological sciences, mathematics and physics.

Departmental Honors

A BS with Honors in Chemistry is available to honors-eligible BS students who complete CHEM 4990H and 4991H. (These courses replace CHEM 4950 in the ACS certification track.)

Minor in Chemistry

A minor in chemistry is awarded for the completion of CHEM

1320 and 1330 (or 1500H), 2100, 2110, 2130 and 3200. If a student's major already requires all of these courses, then an additional elective course must be included in the minor. At least 9 hours of this course work must be taken at MU.

Sample Eight-Semester Programs

Bachelor of Arts with a major in Chemistry

Fall I	Spring I
CHEM 1320§* 3	CHEM 1330* 3
MATH 1500* 5	MATH 1700 5

§ Students with no previous college chemistry credit may apply for 2 credits for CHEM 1310 upon successful completion (C- or better) of CHEM 1320.

* Courses satisfy certain University general education requirements.

CHEMISTRY COURSES

CHEM 205--Introduction to Organic Chemistry (5).A survey of organic chemistry, including an introduction to structure and bonding, functional group chemistry, principles of reactivity, reaction mechanisms, the molecules of life. Laboratory illustrates and augments the lecture material. 4 lectures, 1 lab per week. Prerequisite: grade of C or better in 32 or equivalent.

CHEM 1100--Atoms and Molecules with Lab (3).One-semester introduction for non-science majors to the basic concepts and important applications of chemistry. Satisfies A&S requirement for a laboratory science. No credit if taken after CHEM 1310.

CHEM 1310--General Chemistry I (2).Introductory course for students with little or no high school background in chemistry. Covers fundamental principles, stoichiometry, solutions, basic atomic structure, gases. No credit if taken after CHEM 1100. Prerequisites: MATH 1100/1120 concurrently.

CHEM 1320--General Chemistry II with Lab (3).Covers thermochemistry, periodic properties, bonding, liquids, solids. Satisfies laboratory science requirement. Students with good high school backgrounds in chemistry should start with this course. Prerequisites: advanced placement or grade of C- or better in CHEM 1310; MATH 1100/1120 or equivalent. Math Reasoning Proficiency Course.

CHEM 1320H--General Chemistry II with Lab - Honors (3).Covers thermochemistry, periodic properties, bonding, liquids, solids. Satisfies laboratory science requirement. Students with good high school backgrounds in chemistry should start with this course. Prerequisites: advanced placement or grade of

C- or better in CHEM 1310; MATH 1100/1200 or equivalent. Honors eligibility required. Math Reasoning Proficiency Course.

CHEM 1330--General Chemistry III with Lab (3).Continuation of 1320. Covers equilibria, kinetics, electrochemistry, nuclear chemistry. Satisfies requirement for a laboratory science. May be taken concurrently with CHEM 2100. Prerequisite: grade of C- or better in CHEM 1320.

CHEM 1330H--General Chemistry III with Lab - Honors (3).Continuation of 1320. Covers equilibria, kinetics, electrochemistry, nuclear chemistry. Satisfies requirement for a laboratory science. May be taken concurrently with CHEM 2100. Prerequisite: grade of C- or better in CHEM 1320. Honors eligibility required.

CHEM 1500H--Honors Intensive General Chemistry with Lab - Honors (5).A one-semester, intensive introduction to chemistry for honors-eligible students that takes the place of CHEM 1320, 1330. Four lectures and one 3-hour lab period per week. Prerequisites: honors eligibility, college algebra and one year of high school chemistry or instructor's consent. Math Reasoning Proficiency Course.

CHEM 2050--Introduction to Organic Chemistry with Lab (5).A survey of organic chemistry, including an introduction to structure and bonding, functional group chemistry, principles of reactivity, reaction mechanisms, the molecules of life. Laboratory illustrates and augments the lecture material. 4 lectures, 1 lab per week. Prerequisite: grade of C or better in CHEM 1320 or 1500H or equivalent.

CHEM 2100--Organic Chemistry I (3).First course of a two-semester sequence. Structure and bonding; chemistry of hydrocarbons, alkyl halides, alcohols and ethers; reaction mechanisms; principles of reactivity and

synthesis; IR and NMR spectroscopy. Only 1 hour credit if taken after 2050 or equivalent. Prerequisite: grade of C or better in CHEM 1320 or equivalent.

CHEM 2110--Organic Chemistry II (3).Continuation of CHEM 2100. Aromatic hydrocarbons, carbonyls, amines; chemistry of carbanions; reactions of polar double bonds; nucleic acids, proteins, carbohydrates and fats. Prerequisite: grade of C or better in CHEM 2100 or equivalent, or departmental consent.

CHEM 2130--Organic Laboratory I (2).Basic lab techniques, functional group manipulations, and short syntheses. Pre-lab and post-lab writing assignments. 1 hour recitation, 3 hours lab per week. Concurrent enrollment in CHEM 2110 highly recommended. No credit for students who have taken CHEM 2120 or equivalent.

CHEM 2140--Organic Laboratory II (2).Continuation of CHEM 2130. Preparation and identification of organic compounds; application of instrumental techniques. 2 lab sessions, 1 recitation session per week. Prerequisite: grade of C or better in CHEM 2110 and 2130 or equivalent.

CHEM 2160H--Honors Organic Chemistry I - Honors (4).First course of a two-semester sequence. Similar to Chemistry 2100 but with increased depth and breadth; emphasis on preparing science students for research and professional careers. 3 lectures, 1 discussion session per week. Prerequisite: honors eligibility, grade of B or better in CHEM 1320 or equivalent.

CHEM 2170H--Honors Organic Chemistry II with Lab - Honors (5).Continuation of CHEM 2160H; includes laboratory. Content and structure similar to CHEM 2120, but with increased depth and breadth. Prerequisites: honors eligibility, grade of B or better in CHEM

2160H or instructor's permission.

CHEM 2190H--Honors Organic Chemistry Laboratory - Honors (2).Preparation and identification of organic compounds; multistep syntheses; application of instrumental techniques, including NMR, FTIR, MS and HPLC. 2 lab sessions, 1 discussion session per week. Prerequisites: honors eligibility, grade of C or better in 2170H or equivalent.

CHEM 2400--Fundamentals of Inorganic Chemistry with Lab (3).A systematic introduction with laboratory to inorganic and organometallic compounds, reactions, and periodic properties. Prerequisite: grade of C or better in CHEM 1330.

CHEM 2950--Undergraduate Research in Chemistry (1-3).A laboratory research project and/or preparation of compounds with a written final report. Cannot be substituted for other chemistry courses required for a B.S. or B.A. degree. No more than 6 hrs. total credit. Prerequisites: sophomore standing, 2.75 GPA and/or instructor's consent.

CHEM 3200--Quantitative Methods of Analysis with Lab (4).Principles and practice of quantitative analysis, including the basic principles of modern instrumental methods. Prerequisite: CHEM 1330 or 1500H.

CHEM 3300--Fundamentals of Physical Chemistry (3).Survey of physical chemistry. Satisfies physical chemistry prerequisite for BIOCHEM 8430. Prerequisite: MATH 1700, a course in organic chemistry; PHYSICS 1210 and 1220 or PHYSICS 2175, or 2176 concurrently.

CHEM 3310--Physical Chemistry I (3).Lecture only. Topics include the kinetic theory of gases, chemical kinetics, thermodynamics and chemical equilibrium. Prerequisites: one semester organic chemistry and PHYSICS 2175, 2176 and MATH 2300, or MATH 2300 concurrently.

CHEM 3330--Physical Chemistry II (3).Continuation of CHEM 3310. Lecture only. Covers wave mechanics, bonding, molecular spectroscopy and statistical mechanics.

CHEM 3340--Physical Chemistry Laboratory (3).Prerequisites: Grade of C or better in CHEM 3200; 3330 or 3330 concurrently.

CHEM 3700--Undergraduate Seminar in Chemistry (3).Methods for locating and presenting chemical information, data analysis techniques, professional issues. Prerequisites: CHEM 1330 or 1500H; CHEM 2100 or 2160H.

CHEM 3800--Internship in Chemistry (1-6).Cannot be substituted for other chemistry courses required for B.S. or B.A. degree. Prerequisites: departmental consent.

CHEM 3940--Service-Learning in Chemistry (2).A service-learning community outreach program affording chemistry students with an opportunity to enhance their problem-solving skills. May be repeated once for credit. Satisfies no specific chemistry degree requirements, nor A&S general education requirements. Graded on a S/U basis only. Prerequisites: departmental consent.

CHEM 4001--Topics in Chemistry- General (cr.arr.).Organized study designed to broaden the knowledge base of students. Subjects on analytical, inorganic, organic and physical chemistry covered. Prerequisite: departmental

consent.

CHEM 4003--Topics in Chemistry- Natural Science (cr.arr.).Organized study designed to broaden the knowledge base of students. Subjects on analytical, inorganic, organic and physical chemistry covered. Prerequisite: departmental consent.

CHEM 4010--Advanced Chemistry Laboratory (3).Advanced methods for the synthesis and characterization of organic, inorganic, and organometallic compounds. Prerequisite: CHEM 2400, 2140, or Chem 2190H, 3200, 3330 (or 3330 corequisite).

CHEM 4050--Problems in Chemistry (cr. arr.).Individual study under the direction of a faculty member that supplements regular course work. Prerequisite: instructor's consent.

CHEM 4160--Intermediate Organic Chemistry (3).Stresses synthetic organic chemistry at an intermediate level. Prerequisite: at least one year organic chemistry.

CHEM 4170--Medicinal Chemistry (3).Chemical mechanisms of drug action. Topics include drug metabolism and action, chemical toxicology and medicines, enzyme activity, and specific drug case studies. Prerequisite: CHEM 2110, or 2170H, 3300 or 3310 or instructor's consent.

CHEM 4200--Instrumental Methods of Analysis with Lab (3).Chemical instrumentation methods including electrochemistry, spectroscopy, and advanced separations techniques. Prerequisites: CHEM 3200, a semester of physical chemistry.

CHEM 4280--Environmental Chemistry (3).Surveys the chemistry of air and water environments; discusses the chemistry of waste treatment. Prerequisite: 8 hours chemistry including organic & analytical.

CHEM 4290--Environmental-Toxicological Chemistry (3).In-depth study of the chemical aspects of current issues dealing with environmental pollutants and toxic chemical substances. Prerequisite: CHEM 4280 or equivalent.

CHEM 4400--Inorganic Chemistry (3).Atomic and molecular structure, bonding, kinetics and mechanism, ligand field theory, coordination compounds, acids and bases. Prerequisite: one semester Physical Chemistry, second semester concurrently.

CHEM 4490--Physics and Chemistry of Materials (3).(same as Nuclear Science & Engineering Institute 4319 and Physics 4190). Undergraduate/graduate level course offered every winter semester for students from Physics, Chemistry, Engineering and Medical Departments and consists of lectures, laboratory demonstrations, two mid term and one final exam. Graduate students will submit a term paper. Prerequisite: PHYSICS 2760 and CHEM 1320 or equivalent and instructor's consent.

CHEM 4600--Introduction to Radiochemistry with Lab (3).Introduces application of radio-tracer techniques to chemical research. Prerequisite: CHEM 1330 or 1500H; and one semester of physical chemistry, or instructor's consent.

CHEM 4950--Senior Research (3).A laboratory research project with approved written goals and a final written report. It may be taken

twice. Prerequisites: a 2.75 GPA, departmental consent.

CHEM 4990H--Senior Honors Research I (3).A laboratory research experience with a student-instructor prepared outline approved by the Honors Director, a final written report and a final oral presentation and examination. Prerequisites: a 3.33 GPA, departmental consent, and approval of project outline. Honors eligibility required.

CHEM 4991H--Senior Honors Research II (3).A laboratory research experience with a student-instructor prepared outline approved by the Honors Director, a final written report and a final oral presentation and examination. Prerequisites: a 3.33 GPA, departmental consent, approval of project outline. Honors eligibility required.

For courses in Chinese language, see the Department of German and Russian Studies.

Department of Classical Studies

D. Trout, Chair
College of Arts and Science
405 Strickland Hall
(573) 882-0679
strodmand@missouri.edu

FACULTY

PROFESSOR J. M. Foley, D.M. Hooley, C. F. Saylor,
T. A. Tarkow
ASSOCIATE PROFESSOR R. D. Marks, J. F. McGlew,
A. Mori, D. J. Schenker, D. Trout, B. P. Wallach
ASSISTANT PROFESSOR R.F. Foley
ASSISTANT TEACHING PROFESSOR M. H. Barnes

The Classical Studies Department offers courses in the life, languages, cultures, and thought of the ancient Greeks and Romans.

The department offers a BA degree with a major in Classics and emphasis areas in Classical Humanities, Greek, Latin, and Classical Languages; MA degrees in Latin, Greek, and Classical Languages and PhD degrees in Classical Languages. Minors are also available.

Major Program Requirements - Classics

BA major requirements are specified in the four major emphasis areas: Latin, Greek, Classical Languages, and Classical Humanities. These must be met in addition to college and university requirements, including University general education.

Major with Honors

The undergraduate program can also include 3-6 credits in an honors thesis course (CLHUM4970H or CLASS4970H). These credits, in addition to major requirements and a 3.5 GPA in all classical studies courses (as well as a 3.3 overall GPA), lead to a BA degree with a major in Classics with Honors.

Emphasis Areas

Emphasis in Classical Humanities

CL HUM Courses at the 1000- through 2000-levels 6-9
CL HUM Courses at the 3000-level or above 15-18
(Latin or Greek language courses numbered 4300 or above can be used to replace up to two required Classical Humanities courses.)

Emphasis in Latin

LATIN 1100, 1200 and 2000 OR 1100H, 1200H, and 2000H OR 4110H, 4120H, and 4200H (may be used to help satisfy the foreign language requirement in the College of Arts and Science)..... 13
LATIN 4300 3
LATIN 4350 level or above..... 9
CL HUM courses at the 2000-level or above..... 9

Emphasis in Greek

GREEK 1100, 1200, and 2000 OR 4110H, 4120H and 4200H (may be used to help satisfy the foreign language requirement in the College of Arts and Science) 8,13
GREEK 4300..... 3
GREEK 4350-level or above..... 9
CL HUM courses at the 2000-level or above..... 9

Emphasis in Classical Languages

GREEK or LATIN 1100, 1200, and 2000 OR 1100H, 1200H and 2000H (may be used to help satisfy the foreign language requirement in the College of Arts and Science)..... 13
Courses at 4300 or above in Latin or Greek..... 6
Courses through 4300 in the other language
CL HUM courses at the 2000-level or higher 9

Double Majors

A double major is a good way of integrating two related areas of interest, such as Classics and Archaeology or English and Philosophy. Students looking forward to a career in medicine or the sciences may use a double major (Classics and Biology or Chemistry, for instance) to ensure a thorough background in the humanities to balance their scientific studies. Usually minor or related field requirements for each major are satisfied by major courses in the other department. Consult with departmental advisors about specifics.

Minor in Classics

The department offers minors with an emphasis in one of three areas, each requiring 15 credits.

Minor in Classics with an emphasis in

Classical Humanities 15
1000 through 2000-level 3-6
3000 through 4000-level 9-12
(3 credits in Greek or Latin language at the 4300 level or above may substitute for equivalent credits)

Minor in Classics with an emphasis in Latin..... 15

LATIN 4300 3
One 4500 level or higher Latin course 3
CL HUM courses at the 2000-level or higher 9

Minor in Classics with an emphasis in Greek 15

GREEK 4300..... 3
One 4500-level or higher Greek course 3
CL HUM courses at the 2000-level or higher 9

Sample Eight-Semester Programs

Bachelor of Arts degree with a major in Classics

Concentration in Classical Humanities

Please note that this is only one of many possible routes to a major and that one may concentrate in Latin, Greek, Classical Languages, or Classical Humanities. For guidance on how to approach other major concentrations, please see the Director of Undergraduate Studies in the Classics Department.

CLASSICAL HUMANITIES COURSES

CL HUM 1050--Greek and Latin in English Usage (3).Influence of Latin and Greek on English vocabulary.

CL HUM 1060--Classical Mythology (3).Myths of Greece and Rome in literature and art.

CL HUM 1060H--Classical Mythology - Honors (3).Myths of Greece and Rome in literature and art. Honors eligibility required.

CL HUM 2005--Topics in Classical Humanities (cr.arr.).Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

CL HUM 2100--Greek Culture (3).Survey of Greek life and thought. Principal developments in literature, the arts, politics, religion and philosophy, and their influence on Western civilization.

CL HUM 2100H--Greek Culture - Honors (3).Survey of Greek life and thought. Principal developments in literature, the arts, politics, religion and philosophy, and their influence on Western civilization. Honors eligibility required.

CL HUM 2200--Roman Culture (3).Survey of Roman life and thought. Principal developments in literature, the arts, politics, religion, philosophy, and private life, and their influence on Western Civilization.

CL HUM 2300--Greek Classics in Translation (3).Reading in translation and critical study of the most important literary works of the ancient Greek World.

CL HUM 2400--Roman Classics in Translation (3).Reading in translation and critical study of the most important literary works of the ancient Roman world.

CL HUM 2940--Service Learning in Classical Studies (1).Students provide enrichment programming on the Ancient World at various Columbia Public School sites. Participants must be Classical Studies majors or minors. Graded on A/F basis only. Does not meet A&S general education requirements. Prerequisites: instructor's consent required.

CL HUM 3000--Foreigners and Dangerous Women in Greek and Latin Literature (3).(same as Peace Studies 3130). The study of how Greek and Roman writers depicted and reacted to other races and cultures, compared them with their own, and thereby revealed their own values and prejudices.

CL HUM 3000H--Foreigners & Dangerous Women in Greek & Latin Literature - Honors (3).(same as Peace Studies 3130). The study of how Greek and Roman writers depicted and reacted to other races and cultures, compared them with their own, and thereby revealed their own values and prejudices. Honors eligibility required.

CL HUM 3005--Topics in Classical Humanities (cr.arr.).Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisite: CL HUM 1060 , any CL HUM 2000 course, or instructor's consent.

CL HUM 3005H--Topics in Classical Humanities - Honors (cr.arr.).Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Prerequisite: CL HUM 1060, any CL HUM 2000 course, or instructor's consent. Honors eligibility required.

CL HUM 3100--The Age of Pericles (3).A study of the literature and culture of the 5th and early 4th centuries B.C. in Athens. Authors will include Thucydides, Herodotus, Xenophon, Plato, Aristotle, the tragedians and Aristophanes. Prerequisites: CL HUM 1060 or any CL HUM 2000 level course, or instructor's consent.

CLHUM3100H--The Age of Pericles - Honors (3).A study of the literature and culture of the 5th and early 4th centuries B.C. in Athens. Authors will include Thucydides, Herodotus, Xenophon, Plato, Aristotle, the tragedians and Aristophanes. Prerequisites: CLHUM 1060 or any CLHUM 2000 level course, or instructor's consent. Honors eligibility required.

CL HUM 3150--The Age of Augustus (3). Study of the literature of the Age of Augustus; Vergil, Ovid, Horace, Livy, and Propertius. Prerequisites: CLHUM 1060 or any CLHUM 2000 level course, or instructor's consent.

CL HUM 3150H--The Age of Augustus - Honors (3).Study of the literature of the Age of Augustus; Vergil, Ovid, Horace, Livy, and Propertius. Prerequisites: CL HUM 1060 or any CLHUM 2000 level course, or instructor's consent. Honors eligibility required.

CL HUM 3200--Power and Oratory in Ancient Greece (3).(same as History 3500). Concentrates on the rise of oratory in Greece and how oratory was exploited for political ends. Special attention will be paid to the Athenian Democracy in the fifth and fourth centuries BC. Prerequisite: CL HUM 1060 or any CL HUM 2000 level course.

CL HUM 3200H--Power and Oratory in Ancient Greece - Honors (3).(same as History 3500). Concentrates on the rise of oratory in Greece and how oratory was exploited for political ends. Special attention will be paid to the Athenian Democracy in the fifth and fourth centuries BC. Prerequisite: CL HUM 1060 or any CL HUM 2000 level course. Honors eligibility required.

CL HUM 3250--Greek and Roman Epic (3).A study of the major representatives of the ancient epic genre. Readings will include Homer's "Iliad" and "Odyssey". Apollonius' "Argonautica", Vergil's "Aeneid". Prerequisite: CL HUM 1060 or any CL HUM 2000 level course, or instructor's consent.

CL HUM 3250H--Greek and Roman Epic - Honors (3).A study of the major representatives of the ancient epic genre. Readings will include Homer's "Iliad" and "Odyssey". Apollonius' "Argonautica", Vergil's "Aeneid". Prerequisite: CL HUM 1060 or any CL HUM 2000 level course, or instructor's consent. Honors eligibility required.

CL HUM 3300--Greek Drama (3).Reading and interpretation of Greek tragedies and comedies in translation. Prerequisite: CLHUM 1060 or any CL HUM 2000 level course, or instructor's consent.

CLHUM3300H--Greek Drama - Honors (3). Reading and interpretation of Greek tragedies and comedies in translation. Prerequisite: CL HUM 1060 or any CL HUM 2000 level course, or instructor's consent. Honors eligi-

bility required.

CL HUM 3350--Advanced Mythology (3). Interpretation of selected classical myths and their influence on later literature and art. Prerequisite: CLHUM 1060 or any CLHUM 2000 level course, or instructor's consent.

CL HUM 3350H--Advanced Mythology - Honors (3). Interpretation of selected classical myths and their influence on later literature and art. Prerequisite: CL HUM 1060 or any CL HUM 2000 level course, or instructor's consent. Honors eligibility required.

CL HUM 3400--Murder and Mayhem: Images of Justice in Classical Antiquity (3). Ideas of justice from Homer through the early Roman Empire; personal vengeance, law courts and trials, philosophical attitudes, women and courts, techniques of persuasion. Prerequisites: CL HUM 1060 or any CL HUM 2000 level course, or instructor's consent.

CL HUM 3400H--Murder & Mayhem: Images of Justice in Classical Antiquity - Honors (3).Ideas of justice from Homer through the early Roman Empire; personal vengeance, law courts and trials, philosophical attitudes, women and courts, techniques of persuasion. Prerequisites: CLHUM 1060 or any CLHUM 2000 level course, or instructor's consent. Honors eligibility required.

CL HUM 3450--Greek and Roman Characters and Ideals (3).Study of selected types of characters admired and imitated or hated and rejected in classical antiquity; heroes, philosophers, women. Prerequisite: CL HUM 1060 or any CL HUM 2000 level course, or instructor's consent.

CL HUM 3450H--Greek and Roman Characters and Ideals - Honors (3).Study of selected types of characters admired and imitated or hated and rejected in classical antiquity; heroes, philosophers, women. Prerequisite: CLHUM 1060 or any CLHUM 2000 level course, or instructor's consent. Honors eligibility required.

CL HUM 3500--Greek and Roman Religion (3).(same as Religious Studies 4500). Survey of religious development among the Greeks and Romans. Prerequisite: CL HUM 1060 or AR HA 1110 or HIST 1520; sophomore standing.

CL HUM 3500H--Greek and Roman Religion - Honors (3).(same as Religious Studies 4500). Survey of religious development among the Greeks and Romans. Prerequisite: CLHUM 1060 or AR HA 1110 or HIST 1520; sophomore standing. Honors eligibility required.

CLHUM 3550--War and Democracy in Late 5th c. BCE Athens (3).(same as Peace Studies 3550). War and Democracy in Late 5th c. B.C.E. Athens explores the discourse on war and peace in Athenian texts and art that survives from the last quarter of the 5th century B.C.E. This was a period of relentless warfare: the Athenians were fighting the Spartans, Sparta's allies, unaligned cities and several of their own subject states. Prerequisite: any 2000 level CL_HUM course.

CL HUM 3600--The Ancient Novel (3). Reading and analysis of Greek and Latin prose fiction: ideal and comic romance, fantasy, romantic biography; Hellenistic background. Prerequisite: CL HUM 1060 or any CL HUM 2000 level course, or instructor's consent.

CL HUM 3600H--The Ancient Novel - Honors (3).Reading and analysis of Greek and Latin prose fiction: ideal and comic romance, fantasy, romantic biography; Hellenistic background. Prerequisite: CL HUM 1060 or any CL HUM 2000 level course, or instructor's consent. Honors eligibility required.

CL HUM 3650--Paganism and Christianity (3).A study of the transition from Paganism to Christianity in the Roman Empire, as seen by observers contemporary with the events. Prerequisites: CL HUM 1060 or any CL HUM 2000 level course, or instructor's consent.

CL HUM 3650H--Paganism and Christianity - Honors (3).A study of the transition from Paganism to Christianity in the Roman Empire, as seen by observers contemporary with the events. Prerequisites: CL HUM 1060 or any CL HUM 2000 level course, or instructor's consent. Honors eligibility required.

CLHUM3700--Women in the Ancient World (3).Using classical literary texts as our central focus we will examine the role of women: the conflict inherent in their obligations and their identity in the context of these obligations. Prerequisites: CLHUM 1060 or any CLHUM 2000 level course, or instructor's consent.

CL HUM 3700H--Women in the Ancient World - Honors (3).Using classical literary texts as our central focus we will examine the role of women: the conflict inherent in their obligations and their identity in the context of these obligations. Prerequisites: CL HUM 1060 or any CL HUM 2000 level course, or instructor's consent. Honors eligibility required.

CLHUM3750--Classics in a Cross-Cultural Context (3).The goal of this course is to place classical literature in a multicultural context by studying Greek and Latin literary texts alongside verbal art from non-European as well as European cultures. Prerequisites: CL HUM 1060 or any CL HUM 2000 level course, or instructor's consent.

CL HUM 3750H--Classics in a Cross-Cultural Context - Honors (3).The goal of this course is to place classical literature in a multicultural context by studying Greek and Latin literary texts alongside verbal art from non-European as well as European cultures. Prerequisites: CL HUM 1060 or any CL HUM 2000 level course, or instructor's consent. Honors eligibility required.

CLHUM 4005--Topics in Classical Humanities (cr.arr.).Subjects and earnable credit may vary from semester to semester. Prerequisites: Any CL_HUM 2000 level course or instructor's consent.

CL HUM 4550--Literature and Culture of the Hellenistic Age (3).A survey of the literature and culture of the Hellenistic Age. Prerequisites: any CL_HUM 2000 level course, or instructor's consent.

CL HUM 4550H--Literature and Culture of the Hellenistic Age - Honors (3).A survey of the literature and culture of the Hellenistic Age. Prerequisites: any CL_HUM 2000 level course, or instructor's consent. Honors eligibility required.

CL HUM 4600--The Classical Tradition (3). Selected studies in continuity and influence of Greek and Roman culture on Middle Ages, Renaissance, and modern times. Prerequisite:

any CL_HUM 2000 level course or instructor's consent.

CL HUM 4600H--The Classical Tradition - Honors (3). Selected studies in continuity and influence of Greek and Roman culture on Middle Ages, Renaissance, and modern times. Prerequisite: any CL_HUM 2000 level course or instructor's consent. Honors eligibility required.

CL HUM 4650--The World of Late Antiquity (3). A survey of the literature, culture, and history of the late Roman and early Byzantine periods. Attention to Christianity's development and the transformation of the classical heritage. Prerequisites: any CL_HUM 2000 level or instructor's consent.

CL HUM 4650H--The World of Late Antiquity - Honors (3). A survey of the literature, culture, and history of the late Roman and early Byzantine periods. Attention to Christianity's development and the transformation of the classical heritage. Prerequisites: any CL_HUM 2000 level or instructor's consent. Honors eligibility required.

CL HUM 4770--Oral Tradition (3). (same as English 4770). Study of verbal art from living oral traditions (e.g. Native American and African American) and important literary works with roots in oral tradition (e.g. the Bible, the Iliad and Odyssey, and Beowulf). Prerequisite: junior standing and instructor's consent.

CL HUM 4770H--Oral Tradition - Honors (3). (same as English 4770). Study of verbal art from living oral traditions (e.g. Native American and African American) and important literary works with roots in oral tradition (e.g. the Bible, the Iliad and Odyssey, and Beowulf). Prerequisite: junior standing and instructor's consent. Honors eligibility required.

CL HUM 4970--Capstone in Classical Humanities (3). Culminating course in the study of Greek and Roman literature and Classical Culture. Required for Classical Humanities majors in first term of senior year. Recommended for Classical Humanities double-majors. Prerequisite: instructor's consent.

CL HUM 4970--HCapstone in Classical Humanities- Honors (3). Culminating course in the study of Greek and Roman literature and Classical Culture. Required for Classical Humanities majors in first term of senior year. Recommended for Classical Humanities double-majors. Prerequisite: instructor's consent; Honors eligibility required.

CLASSICS COURSES

CLASS 4100--History of the Greek and Latin Languages (3). (same as Linguistics 4130). Evolution of classical languages and their relationship to each other.

CLASS 4205--Topics in Classical Studies (cr.arr). Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisite: departmental consent for repetition.

CLASS 4300--Introduction to Text Criticism and Paleography (3). Latin and/or Greek textual criticism and paleography, using manuscript facsimiles at the University library. Prerequisite: 2 years of Greek or Latin or equivalent.

CLASS 4400--Ancient Pastoral (3). Reading

and interpretation of pastoral poetry and prose in Greek and Latin; emphasis on Theocritus, Virgil, and Longus. Prerequisite: 2 years each of Greek and Latin.

CLASS 4700--Advanced Study in the Teaching of the Classics (3). Prerequisites: classroom teaching experience or chairman's consent.

CLASS 4960--Special Readings in Classical Studies (1-3). Readings in authors and texts not covered in other courses. Prerequisite: departmental consent.

CLASS 4970--Capstone in Classical Languages (3). Culminating course in the study of Greek and Roman literature and Classical culture. Required for Greek, Latin, and Classical Languages majors in first term of senior year. Recommended for double-majors. Prerequisites: 2 years classical Greek, or Latin, or equivalent; junior standing: departmental consent.

CLASS 4970H--Capstone in Classical Languages (3). Culminating course in the study of Greek and Roman literature and Classical culture. Required for Greek, Latin, and Classical Languages majors in first term of senior year. Recommended for double-majors. Prerequisites: 2 years classical Greek, or Latin, or equivalent; junior standing: departmental consent. Honors eligibility required.

CLASS 4995H--Honors Proseminar in Classical Studies (3-6). Limited to Honors undergraduates. To be taken in senior year. Integrated exploration of classical civilization. May repeat to 6 hours maximum. Prerequisite: limited to Honors undergraduates, to be taken in senior year. Honors eligibility required.

senior year. Honors eligibility required.

GREEK COURSES

GREEK 1100--Elementary Ancient Greek I (5). Study of forms, grammar, syntax. Early attention to reading in simple Attic prose.

GREEK 1100H--Elementary Ancient Greek I - Honors (5). Study of forms, grammar, syntax. Early attention to reading in simple Attic prose. Honors eligibility required.

GREEK 1200--Elementary Ancient Greek II (5). Continuation of GREEK 1100. Readings in Attic prose. Prerequisite: grade of C or higher in GREEK 1100 or equivalent.

GREEK 1200H--Elementary Ancient Greek II - Honors (5). Continuation of GREEK 1100H. Readings in Attic prose. Prerequisite: grade of C or higher in GREEK 1100 or equivalent. Honors eligibility required.

GREEK 2000--Greek Reading (3). Selected works of Greek literature. Prerequisite: grade of C or higher in GREEK 1200.

GREEK 2000H--Greek Reading - Honors (3). Selected works of Greek literature. Prerequisite: grade of C or higher in GREEK 1200. Honors eligibility required.

GREEK 4110H--Intensive Beginning Greek I - Honors (3). Intensive study of forms, grammar, syntax; early attention to readings in simple prose. Course meets five hours weekly for 3 hours credit. Prerequisite: graduate standing or Honors eligibility required.

GREEK 4120H--Intensive Beginning Greek II - Honors (3). Continuation of Greek 4110H. Attention to ability to read rapidly and accurately. Course meets five hours weekly for three hours credit. Prerequisite: graduate standing or Honors eligibility required.

GREEK 4200H--Intensive Greek Reading - Honors (2). Prerequisite: graduate standing or Honors eligibility required.

GREEK 4300--Intermediate Readings (3). Selected advanced readings in prose and poetry. Introduction to Homer. Prerequisite: GREEK 2000 or equivalent.

GREEK 4350--The Greek New Testament (3). (same as Religious Studies 4650). Readings in the Greek New Testament and similar literature, e.g., the Septuagint. Prerequisite: GREEK 4300 or instructor's consent. Graded on A-F basis only.

GREEK 4400--Homer (3). Reading, discussion, and literary analysis of "Iliad" and "Odyssey". Prerequisite: two years Classical Greek or equivalent.

GREEK 4500--Greek Stylistics (3). Study and practice of Greek prose, with special consideration to basic problems: abstract expression, word order, sentence structure and use of common rhetorical devices.

GREEK 4505--Topics in Greek (3). Topics course involving Greek texts. Prerequisites: GREEK 4300 or equivalent. May be repeated for credit.

GREEK 4510--Greek Tragedy (3). Selected works of Aeschylus, Sophocles, Euripides, with special attention to language, style, ideas, and dramatic techniques. Prerequisite: two years Classical Greek or equivalent.

GREEK 4520--Greek Comedy (3). Selected plays of Aristophanes and Menander, with special attention to cultural contexts. Prereq-

quisite: two years Classical Greek or equivalent.

GREEK 4530--Greek Lyric Poetry (3). Selected readings from lyric poets, with attention to verse forms, and dialects. Prerequisite: two years Classical Greek or equivalent.

GREEK 4540--Greek Oratory (3). Selections from Greek orators, with emphasis on Lysias and Demosthenes. Prerequisite: two years Classical Greek or equivalent.

GREEK 4550--Greek Philosophers (3). Emphasis on readings and analysis of selected texts of major Greek philosophers. Prerequisite: two years Classical Greek or equivalent.

GREEK 4560--Greek Historians (3). Reading and analysis of selected texts of major Greek historians. Prerequisite: two years Classical Greek or equivalent.

GREEK 4570--Greek Epigraphy (3). Introduction to study of Greek inscriptions and their contribution to the understanding of other aspects of ancient culture. Prerequisite: GREEK 2000.

GREEK 4700--Survey of Greek Literature (3). Greek literature from origins to end of Roman period; emphasis on authors not covered in other courses, to provide general view of styles and genres. Prerequisite: two years Classical Greek or equivalent.

GREEK 4960--Special Readings in Greek (3). Readings in authors and texts not covered in other courses. Prerequisites: departmental consent, two years Classical Greek or equivalent.

LATIN COURSES

LATIN 1100--Elementary Latin I (5). Forms, grammar, syntax.

LATIN 1100H--Honors Elementary Latin (5). Beginning Latin for Honors Eligible students. Honors eligibility required.

LATIN 1200--Elementary Latin II (5). Continuation of Latin 1100. Prerequisite: a grade of C or higher in LATIN 1100.

LATIN 1200H--Honors Elementary Latin II (5). Continuation of Latin 1100H. Prerequisite: a grade of C or higher in LATIN 1100. Honors eligibility required.

LATIN 2000--Latin Reading (3). Readings in Latin prose and poetry. Prerequisite: grade of C or higher in LATIN 1200.

LATIN 2000H--Latin Reading - Honors (3). Readings in Latin prose and poetry. Prerequisite: grade of C or higher in LATIN 1200. Honors eligibility required.

LATIN 4110H--Intensive Beginning Latin I - Honors (3). Intensive study of morphology, grammar, syntax; early attention to readings in simple prose. Course meets five hours weekly for 3 hours credit. Prerequisite: graduate standing or Honors eligibility required.

LATIN 4120H--Intensive Beginning Latin II - Honors (3). Continuation of Latin 4110H. Readings in Latin prose. Prerequisite: LATIN 4110H, graduate standing or Honors eligibility required.

LATIN 4200H--Intensive Latin Reading - Honors (2). Prerequisites: LATIN 4120H, graduate standing, or honors eligibility required.

LATIN 4300--Latin Poetry (3). Readings in selections from the Latin poets. Prerequisite:

LATIN 2000 or equivalent.

LATIN 4350--Latin Prose (3). Selections from various Latin prose writers; some composition at instructor's discretion. Prerequisite: LATIN 2000.

LATIN 4500--Latin Stylistics (1-3). Study and writing of connected prose compositions. Prerequisite: two years classical Latin or equivalent.

LATIN 4505--Topics in Latin (3). Topics course involving Latin texts. Prerequisite: LATIN 4300 or equivalent. May be repeated for credit.

LATIN 4510--Age of the Scipios (3-6). Critical readings in and integrated analyses of the culture of the second century B.C. Prerequisite: two years Classical Latin or equivalent.

LATIN 4520--Age of Cicero (3). Critical readings in and integrated analyses of the culture of the last decades of the Roman Republic. Prerequisite: two years Classical Latin or equivalent.

LATIN 4530--Vergil (3). Readings, discussion, and literary analysis of Vergil's "Aeneid". Prerequisite: two years of Classical Latin or equivalent.

LATIN 4540--Augustan Literature (3). Critical readings in and integrated analyses of the culture of Augustan Rome. Prerequisite: two years Classical Latin or equivalent.

LATIN 4550--Latin Epigraphy (3). Introduction to the study of Latin inscriptions and their contributions to ancient culture. Prerequisite: two years Classical Latin or equivalent.

LATIN 4560--Neronian Literature (3-6). Critical readings in and integrated analysis of culture of the age of Nero. Prerequisite: two years Classical Latin or equivalent.

LATIN 4570--Age of Pliny and Tacitus (3-6). Critical readings in and integrated analyses of the ages of Domitian and Trajan. Prerequisite: two years Classical Latin or equivalent.

LATIN 4580--The Theodosian Age (3). A survey of major literary works of the late fourth and early fifth centuries. Readings from Augustine, Ambrose, Prudentius, Paulinus of Nola, Ammianus Marcellinus, Claudian. Prerequisite: two years of Classical Latin or equivalent.

LATIN 4590--Medieval Latin (3). Selected texts of Middle Ages and Renaissance. For students with primary interest in history, literature, philosophy, religion, Romance philology, or the classical tradition, experience with Latin sources in their field. Prerequisite: two years of Classical Latin or equivalent.

LATIN 4600--Survey of Latin Literature (3). Latin literature from origins to end of Roman Empire; emphasis on authors not covered in other courses, to provide general view of styles and genres. Prerequisite: two years Classical Latin or equivalent.

LATIN 4960--Special Readings in Latin (1-3). Readings in authors and texts not covered in other courses. Prerequisites: two years Classical Latin or equivalent.

Department of Communication

M. Kramer, Chair
College of Arts and Science
115 Switzler Hall
(573) 882-4431
<http://communication.missouri.edu>

FACULTY

PROFESSOR P. Benoit, W. Benoit, M. Kramer
ASSOCIATE PROFESSOR D. S. Dougherty,
M. S. McKinney, M. J. Porter,
ASSISTANT PROFESSOR J. S. Aubrey,
L. Behm-Morawitz M. Click, R. Meisenbach,
L. N. Olson, J. Roberts
ASSOCIATE PROFESSOR EMERITUS M.J.Smythe

The Department of Communication offers courses in creating and critically evaluating messages. These messages persuade, inform and entertain in contexts such as one-to-one interactions, communication in organizations, and media. Students prepare for careers in broadcasting, sales, public relations, law and management.

The department offers BA, MA and PhD degrees with majors in Communication.

Admission

Because of increased student interest in communication programs, admission is restricted. Students must apply for admission no earlier than the first semester of their sophomore year, or during the semester in which they will complete 45 credits. A copy of the admission procedures and policies is available in the department office.

The student's grade point average from the MU system as adjusted by the MU grade repeat policy and the grade point averages in completed communication courses at MU are the primary criteria used to determine admission to the program.

Transfer Student Admission

Transfer students are not eligible for admission until they have completed at least one semester in residence (12 credits) and a communication course in residence. Students who are not admitted may reapply for consideration in subsequent terms.

Major Program Requirements - Communication

The major in communication includes a minimum of 30 hours and a maximum of 40 hours in communication courses. Each course is 3 credits unless otherwise noted. Students must also complete College of Arts and Sciences and University requirements, including University general education requirements.

Major core requirements.....9

COMMUN 1200: Public Speaking
COMMUN 3050: Survey of Communication

COMMUN 4974: Senior Project OR
COMMUN 4975: Visual Literacy

Areas of Focus:

In addition to required courses, a student must select one of three areas of focus. Students must complete 12-15 hours in one area of focus including one of the core courses in that area (*). The student must take one course in each of the other areas of focus. A course may only count once toward meeting these requirements.

Interpersonal Focus:

COMMUN 3422: Communication Research Methods
*COMMUN 3441: Nonverbal Communication
COMMUN 3470: Culture as Communication
COMMUN 3525 Conflict and Communication
*COMMUN 3561: Relational Communication
COMMUN 3571: Group Decision Making Processes
COMMUN 4412: Gender, Language, and Communication
COMMUN 4415: Language and Discourse
COMMUN 4440: Ethical Issues in Communication
COMMUN 4520: Family Communication

Organizational Communication Focus:

COMMUN 3422: Communication Research Methods
*COMMUN 3460 Organization Advocacy
COMMUN 3470: Culture as Communication
COMMUN 3525 Conflict and Communication
COMMUN 3571: Group Decision Making Processes
COMMUN 3575: Business and Professional Communication
COMMUN 3580: Crisis Communication
COMMUN 4440: Ethical Issues in Communication
*COMMUN 4476: Organizational Communication

Political and Mass Communication Focus:

*COMMUN 2100: Media Communication in Society
COMMUN 3310: Message Design and Writing for the Media
COMMUN 3390: Television Studio Production
COMMUN 3395: Television Field Production
COMMUN 3422: Communication Research Methods
COMMUN 3490: Mass Media Theory
COMMUN 3572: Argument and Advocacy
COMMUN 3580 Crisis Communication
COMMUN 3636: Contemporary Issues in Mass Communications
*COMMUN 4473: Political Communication
COMMUN 4474: Theory and Research in Persuasion
COMMUN 4481: Principles of Rhetoric
COMMUN 4614: Radio-TV Programming and Management
COMMUN 4618: Television Program Analysis and Criticism
COMMUN 4638: New Technologies and Communication

Electives (beyond 30 hours)

COMMUN 2315: Basic Audio Production and Performance
COMMUN 3315: Advanced Audio Production
COMMUN 3570: Performance of Literature
COMMUN 4395: Professional Seminar in TV Production
COMMUN 4940: Internship (1-4 hours)

Potential options for each area of focus depending on specific topic:

- COMMUN 2701/2703/2705: Topics in Communication (1-3 hours)
- COMMUN 3701/3703/3705: Topics in Communication (1-3 hours)
- COMMUN 4701/4703/4705: Topics in Communication (1-3 hours)
- COMMUN 4996H/4997H: Honors in Communication (2 hours)
- COMMUN 4960: Directed Readings (1-3 hours)

Departmental Honors

To receive departmental honors, a student must earn a minimum overall MU GPA of 3.3 and a minimum GPA of 3.5 in courses in communication completed at the University of Missouri. Students must also earn a grade of A+, A, or A- in COMMUN 4974 or 4975, a research project completed for a minimum of 3 credits with a regular faculty member, or a creative project completed for a minimum of 3 credits with a regular faculty member.

Total overall hours required for degree = 120

*from A&S list available from A&S Advising or academic Exploration Web Page

**one Communication course must be COMMUN 3050, writing intensive

***may not exceed 40 hours in the major

COMMUNICATION COURSES

COMMUN 1200--Public Speaking (3). Principles, process of speech communication in small group and public speaking situations. Three lab/lecture meetings per week.

COMMUN 1200H--Public Speaking - Honors (3). Principles, process of speech communication in small group and public speaking situations. Three lab/lecture meetings per week. Honors eligibility required.

COMMUN 2100--Media Communication in Society (3). An introduction to the development and impact of media communications and its technologies on American society. Emphasis on contemporary industry developments, their historical antecedents, as well as contemporary issues related to the influence and impact of media communication on society.

COMMUN 2100H--Media Communication in Society - Honors (3). An introduction to the development and impact of media communications and its technologies on American society. Emphasis on contemporary industry developments, their historical antecedents, as well as contemporary issues related to the influence and impact of media communication on society. Honors eligibility required.

COMMUN 2315--Basic Audio Production and Performance (3). Radio speaking in varied types of programs; console operations, tape editing, microphone techniques.

COMMUN 2500--Introduction to Communication (3). Introduction to four main areas of the field of communication, interpersonal, organizational, political, and mass communication.

COMMUN 2701--Topics in Communication - General (3). Topics in Communication - General

COMMUN 2703--Topics in Communication - Behavioral Science (3). Topics in Communication - Behavioral Science

COMMUN 2705--Topics in Communication - Humanities/Fine Arts (3). Topics in Communication - Humanities/Fine Arts

COMMUN 3050--Survey of Communication Studies (3). A survey of four main areas of the field of communication, interpersonal, organizational, political, and mass communication.

COMMUN 3100--Controversies in Communication (3). Analysis of controversial issues in communication like ethics, culture, and new technologies as they apply to different communication contexts (e.g., small groups, public forums, media). Prerequisite: ENGLISH 1000.

COMMUN 3310--Message Design and Writing for the Media (3). Styles and functions of various script formats for radio, television productions. Prerequisites: COMMUN 2100.

COMMUN 3315--Advanced Audio Production (3). The study and application of techniques applicable to radio, television, and multimedia production with an emphasis on digital audio workstation systems. Prerequisite: COMMUN 2315.

COMMUN 3390--Television Studio Production (3). Operation of television studio production equipment; processes and procedures of producing and directing. Prerequisites: sophomore standing and COMMUN 2100.

COMMUN 3395--Television Field Pro-

duction (3). Theory and practice of TV field production, including preproduction, production with portable equipment and electronic editing. Prerequisite: sophomore standing and COMMUN 2100.

COMMUN 3422--Communication Research Methods (3). Focuses on writing and administering surveys, conducting field research, and designing experimental studies. Prerequisites: sophomore standing and COMMUN 1200.

COMMUN 3441--Nonverbal Communication (3). Analysis of form and content of nonverbal communication. Emphasis on role of nonverbal cues in interpersonal communication. Prerequisite: sophomore standing and COMMUN 1200.

COMMUN 3460--Organizational Advocacy (3). Theory and analysis of communication to promote organizational culture and image. Prerequisite: sophomore standing.

COMMUN 3470--Culture as Communication (3). (same as ANTHRO 3470, LINGST 3470). Study of the influence of culture on communication processes. Examines topics such as the impact of values, languages, and nonverbal behavior on intercultural interaction. Prerequisites: sophomore standing.

COMMUN 3490--Mass Media Theory (3). Survey of the theories of mass communication. Prerequisites: COMMUN 2100 or senior status.

COMMUN 3525--Conflict and Communication (3). Theory and analysis of communication in conflict situations across a variety of contexts. Prerequisite: sophomore standing required.

COMMUN 3561--Relational Communication (3). Analysis of communication influences on relational identities and development. Prerequisite: sophomore standing and COMMUN 1200.

COMMUN 3570--Performance of Literature (3). (same as ENGLISH 3570 and THEATR 3200). Analysis and oral interpretation of literary works. Graded on A/F basis only. Prerequisite: sophomore standing.

COMMUN 3571--Group Decision Making Processes (3). (same as PEA ST 3521). Procedures and techniques for interpersonal communication and decision making in small groups. Prerequisite: sophomore standing.

COMMUN 3572--Argument and Advocacy (3). Critical analysis and production of argument emphasizing evidence, reasoning, and refutation. Prerequisite: COMMUN 1200.

COMMUN 3575--Business and Professional Communication (3). Principles and practice of speech communication in business and professional settings. Emphasis on interviews, group conferences and personal presentations. Prerequisite: sophomore standing and COMMUN 1200.

COMMUN 3580--Crisis Communication (3). The theory and practice of corporate and political communication responses to crisis situations. Prerequisite: sophomore standing.

COMMUN 3636--Contemporary Issues in Mass Communication (3). Introduction to current issues and trends and relationship among the new technologies, policies, and potential impact on society. Prerequisites: sophomore standing and COMMUN 2100.

COMMUN 3701--Topics in Communication-

General (3). Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisites: COMMUN 1200, 2100, departmental consent for repetition.

COMMUN 3703--Topics in Communication-Behavioral Sciences (cr.arr.). Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisites: junior standing and instructor's consent, departmental consent for repetition.

COMMUN 3705--Topics in Communication-Humanities (cr.arr.). Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisites: junior standing and instructor's consent, departmental consent for repetition.

COMMUN 4395--Professional Seminar in Television Production (3). Application of principles to advanced television production, direction. Prerequisites: COMMUN 3390 and instructor's consent.

COMMUN 4412--Gender, Language, and Communication (3). (same as LINGST 4412 and ANTHRO 4412). Relationship among gender, language, nonverbal communication, and culture. Prerequisite: junior standing or departmental consent.

COMMUN 4415--Language and Discourse (3). (same as LINGST 4415). Analysis of the rules of social interaction and the functions of language in discourse. Prerequisites: junior standing and departmental consent.

COMMUN 4440--Ethical Issues in Communication (3). (same as PEA ST 4400). Exploration and analysis of ethical dimensions intrinsic to human communication. Prerequisite: junior standing or departmental consent.

COMMUN 4473--Political Communication (3). Study of role and impact of communication in political campaigns; historical and contemporary study of influence by communication; case studies and practicum. Prerequisite: junior standing or departmental consent.

COMMUN 4474--Theory and Research in Persuasion (3). Studies the persuasive process, attitude formation, modification. Prerequisites: junior standing and COMMUN 1200.

COMMUN 4476--Organizational Communication (3). Theories of communication systems and processes in organizational structures; study of communication behavior in formal and informal organizational settings. Prerequisites: junior standing and COMMUN 1200.

COMMUN 4481--Principles of Rhetoric (3). Development of rhetoric from time of Corax with emphasis on Aristotle; derivation, application of standards for judging effectiveness in communication. Prerequisites: COMMUN 1200, junior standing and departmental consent.

COMMUN 4520--Family Communication (3). (same as H D FS 4680). Analysis of the functions and processes of communication within families. Prerequisite: junior standing or departmental consent.

COMMUN 4614--Radio-TV Programming and Management (3). Analysis and evaluation of program scheduling, audience research methodologies, and issues related to management of media facilities. Prerequisite: junior standing or instructor's consent.

COMMUN 4618--Television Program

Analysis and Criticism (3).Development of critical viewing skills including analysis of program conventions, genres, and television aesthetics. Prerequisites: junior standing.

COMMUN 4638--New Technologies and Communication (3).Explores the social implications of new technologies designed for communication. Assumes basic computer knowledge. Prerequisite: junior standing or instructor's consent.

COMMUN 4701--Topics in Communication-General (cr.arr.).Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisites: junior standing and instructor's consent, departmental consent for repetition.

COMMUN 4703--Topics in Communication-Behavioral Science (cr.arr.).Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisites: junior standing and instructor's consent, departmental consent for repetition.

COMMUN 4705--Topics in Communication-Humanities (cr.arr.).Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisites: junior standing and instructor's consent, departmental consent for repetition.

COMMUN 4940--Internship (1-3).Directed professional experience within and outside the University in communication-related fields or organizations. S/U graded only. Prerequisites: Admission to department, junior standing, instructor's consent, 2.5 GPA.

COMMUN 4960--Directed Reading (1-3).Independent reading, reports. Prerequisites: junior standing or instructor's consent.

COMMUN 4974--Senior Project (3).Integration and adaptation of communication theories to an applied communication problem. Required for all majors. Prerequisite: admission to department, senior standing, and departmental consent.

COMMUN 4975--Visual Literacy (3).Integration of theory and practice. The theoretical component of the class is grounded in the study of visual literacy and the practice component will focus on documentary filmmaking. Prerequisite: COMMUN 3390, senior standing. May not be taken by graduate students. It is a capstone course for undergraduate students only.

COMMUN 4996H--Honors in Communication (1).Special work for Honors candidates in communication.

COMMUN 4997--Honors in Communication (2).Special work for Honors candidates in communication.

COMMUN 4997H--Honors in Communication (2).Special work for Honors candidates in communication.

Computer Science

Cooperative program between the College of Arts and Science and the College of Engineering

The Bachelor of Arts with a major in Computer Science emphasizes the applications of computer science. Students are encouraged to select courses in areas that complement their computer science major. These can include courses in computer animation, business, art, music, geography and many other areas. Courses in digital logic, database management, computer languages, business-oriented calculus and basic statistics prepare the student for a variety of professional settings.

Graduates of the BA program have stronger backgrounds in computer science than graduates of typical data processing or management information systems programs. With the proper choice of electives, BA graduates are prepared to enter advanced degree programs in such areas as business, medicine, law and the arts.

While working toward their degrees, many computer science students participate in cooperative education or internship programs. In doing so, they gain valuable professional experience and often are exposed to equipment and software that may not be available on the campus. Many students return to the co-op or internship company upon graduation.

Major Program Requirements - Computer Science

The BA requires the completion of 120 credits. To graduate, a student must earn a 2.0 GPA or better in all courses required in the major. A 2.0 GPA is required in CS courses, counting toward the grade point average every time a course is taken with the exception of courses for which the course repeat policy has been used. One excused D is allowed in the courses required in the major.

Major core requirements

Computer science courses	36-39
CS 1000: Intro to Computer Science.....	1
CS 1050: Algorithm Design and Programming I.....	3
CS 2050: Algorithm Design and Programming II.....	3
CS 2110: Programming in C	3
CS 3270: Introduction to Digital Logic.....	3
CS 3380: Database Applications and Information Systems	3
CS 4320: Software Engineering I.....	3
CS 3530: UNIX Operating System	3
CS 4970: Senior Capstone Design I.....	3
CS 4980: Senior Capstone Design II.....	2

Note: Students without previous programming experience should begin by taking CS 1040: Introduction to Problem Solving and Programming.

Three CS courses numbered 2000 or above for which the student has the prerequisite (most students choose from the following).....9

- CS 2111: Production Languages (3)
- CS 2830: Introduction to the Internet, WWW and Multimedia Systems (3)
- CS 3280: Assembly Language and Computer Organization (3)
- CS 3330: Object Oriented Programming (3)
- CS 3940: Internship in Computer Science (3)

- CS 4001: Topics (1-3)
- CS 4330: Object Oriented Design I (3)
- CS 4380: Database Management Systems I (3)
- CS 4450: Principles of Programming Languages (3)
- CS 4610: Computer Graphics I (3)
- CS 4830: Science and Engineering of the World Wide Web (3)

Additional requirements.....9

- MATH 1300: Finite Math (3)
- MATH 1320: Elements of Calculus (3)
- STAT 2500: Intro to Probability and Statistics (3)

Arts and Science Foundation Requirements

- ENGLSH 1000: Exposition and Argumentation (C-range grade is required).....3
- Foreign language sequence

Breadth of Study

- Biological or physical science
- Behavioral sciences (anthropology, psychology or sociology).....
- Social sciences (from at least two of the following fields) .9
 - History, economics, political science or geography (state law requires one of these courses in American history or American government: HIST 1100, 1200, 1400, 2440, 2210, 4000, 4220, 4230 or POL SC 1100, 2100)
- Humanities/fine arts (from at least three different departments)

Depth of Study

Among the courses taken to meet the social science, behavioral science, humanities/fine arts, and biological and physical sciences requirements, at least three courses from at least two of the four areas must be numbered 2000 or above. One 3-credit course must be completed under the auspices of MU. At least 30 hours must be at the 3000 or above.

Two courses must be designated Writing Intensive. A C-range grade in ENGLSH 1000 is prerequisite for all WI courses. A C-range grade is required in the WI courses.

For other graduation requirements see University general education requirements and College of Arts and Science foundation requirements.

Sample Eight-Semester Program

Bachelor of Arts Degree with a major in Computer Science

Minor in Computer Science

A minor in computer science is offered. To obtain a minor, a student must complete courses approved by the Department of Computer Science. The student must earn a grade of C- or better in each course counting toward the minor and have a 2.0 GPA in all courses counting toward the minor. The following courses are required:

CS 1050: Algorithm Design & Programming I.....	3
CS 2050: Algorithm Design & Programming II.....	3
CS 3270: Introduction to Digital Logic.....	3
Three additional department-approved CS courses with at least one numbered above 3000.....	9

Note: For course descriptions, see College of Engineering, Department of Computer Science.

Minor in Information Technology

A minor in Information Technology is offered through the College of Engineering. To obtain a minor, a student must complete courses in a sequence approved by the Department of Computer Science. The student must earn a grade of C- or better in each course counting toward the minor and have a 2.0 GPA in all courses counting toward the minor. At least 9 hours must be taken in residence at MU. A total of 15 credit hours are required.

The following courses are required for sequence one. At least 9 hours must be at the 2000 level or above. For possible sequences, contact the department.

ASSOCIATE PROFESSOR EMERITUS C. Geiss,
D. Schilling

The Department of Economics takes a global view of economics, with an emphasis on applied problems. An economics major prepares students for careers in business and government and for graduate work in areas such as economics, business and law. A basic understanding of economics develops insight into the many issues facing contemporary society, such as corporate downsizing, environmental pollution, urban decay, poverty, international trade, health care, educational reform, politics and sports deals.

In addition to the BA and the BS degree in the College of Arts and Science, the Economics Department offers the Bachelor of Science in Business Administration (BS BA) degree in the College of Business. The department also offers MA and PhD degrees in Economics. A minor is also available.

Before a graduation plan in economics will be approved, students in the College of Arts and Science must have an overall GPA of 2.5 after 30 credits or a GPA in economics of 2.67 after at least 8 credits of courses in economics.

Major Program Requirements – Economics

In addition to the major core requirements, students must complete college and University graduation requirements including University general education requirements.

Options

Students majoring in economics may earn either a BS or a BA degree. The last 21 credit hours in Economics must be completed in residence. Depending upon which degree is sought; students must choose one of the options below:

BA with a major in Economics:

The BA degree is designed for students who plan to continue their education in non-economics fields and for students who plan to seek employment after graduation. Post-graduate educational alternatives include law school or programs in the business school, political science and journalism. Post-graduate employment opportunities include positions in state government, banking, insurance or other financial sectors, and private sector businesses. Frequently, students in humanities or fine arts complete a BA in Economics as a second major in order to increase their employment potential.

Major Core Requirements for BA Economics (with a grade of C or above)

General Principles

(ECONOM 1014: Principles of Microeconomics AND
ECONOM 1015: Principles of Macroeconomics) OR
(ECONOM 1024: Fundamentals of Microeconomics AND
ECONOM 1015: Principles of Macroeconomics) OR
ECONOM 1051: General Economics 5-6
ECONOM 3229: Money, Banking, and Financial Markets....3
ECONOM 4351: Intermediate Microeconomics3
ECONOM 4353: Intermediate Macroeconomics3
ECONOM 4371: Applied Econometrics3
ECONOM 4970: Senior Seminar in Economics
(Capstone course).....3

Mathematics and Statistics

(MATH 1300: Finite Mathematics AND
MATH 1320: Elements of Calculus) OR
MATH 1500: Analytic Geometry and Calculus I..... 5-6
STAT 2500: Introduction to Probability and Statistics I.....3

BS with a major in economics:

The BS degree is for students who plan to attend graduate school in economics or finance. The student fulfills all university general education requirements, including one laboratory course.

Major Core Requirements for BS Economics (with a grade of C or above)

General Principles

(ECONOM 1014: Principles of Microeconomics AND
ECONOM 1015: Principles of Macroeconomics) OR
(ECONOM 1024: Fundamentals of Microeconomics AND
ECONOM 1015: Principles of Macroeconomics) OR
ECONOM 1051: General Economics 5-6
ECONOM 3229: Money, Banking, and Financial Markets....3
ECONOM 4351: Intermediate Microeconomics3
ECONOM 4353: Intermediate Macroeconomics3
ECONOM 4370: Quantitative Economics.....3
ECONOM 4371: Applied Econometrics3
ECONOM 4970: Senior Seminar in Economics
(Capstone course).....3

Mathematics and Statistics

MATH 1500: Analytic Geometry and Calculus I5
MATH 1700: Calculus II5
MATH 2300: Calculus III3
MATH 4140: Matrix Theory.....3
(STAT 4750: Introduction to Probability Theory and

STAT 4760: Statistical Inference I) OR (STAT 4710: Introduction to Mathematical Statistics AND STAT 4510: Regression & Correlation Analysis)	6
MATH 4700: Advanced Calculus I, OR STAT 4210: Nonparametric Statistical Methods, OR STAT 4530: Analysis of Variance.....	3

Foreign Language Alternative (for BS degree)

The student may elect to fulfill a special option area instead of taking a foreign language. This area consists of at least 12 credits numbered 2000 or above that are not from the parent department, are not normally required of all departmental majors and do not appear elsewhere in the area of concentration. This program is planned by the student's advisor and must be approved by the Director of Undergraduate Studies.

Electives

At least two of the following, with not more than one at the 3000 level, selected with the advisor and completed with a grade of C or above:

- ECONOM 3004: Topics in Economics
- ECONOM 3224: Introduction to International Economics
- ECONOM 3256: Economics of Public Policy: Antitrust Economics
- ECONOM 4004: Topics in Economics (1-5)
- ECONOM 4311: Labor Economics
- ECONOM 4312: Labor Market Analysis
- ECONOM 4315: Public Economics
- ECONOM 4316: State and Local Finance
- ECONOM 4322: Economics of Regulation and Antitrust
- ECONOM 4325: The International Monetary System
- ECONOM 4326: Economics of International Trade
- ECONOM 4329: The Banking System and the Money Market
- ECONOM 4335: Economics for Decision Making
- ECONOM 4340: Game Theory
- ECONOM 4345: Economics of Education
- ECONOM 4355: Industrial Organization
- ECONOM 4357: Health Economics
- ECONOM 4360: Economic Development
- ECONOM 4361: Comparative Economic Systems
- ECONOM 4367: Law and Economics
- ECONOM 4370: Quantitative Economics
- ECONOM 4385: Problems in Economics
- ECONOM 4965: Independent Study in Economics

Major Program Requirements – Business Administration

See the College of Business for requirements for the Bachelor of Science with a major in Business Administration (BS BA).

Double Majors, Dual Degrees and Five-Year Program

For double majors and dual degrees, students must satisfy all requirements of both degree programs. Some courses may be allowed to count towards both degrees. Carefully chosen elective courses in addition to required courses can facilitate double majors and dual degrees.

Common double majors in the College of Arts and Sciences are:

- BA with majors in Economics and Political Science, Psychology, History, English or Communication
- BS with majors in Economics and Statistics or Mathematics

Common dual degrees with other schools and colleges are:

- BA with majors in Economics and Journalism, Accountancy, Finance, Marketing or Education

- BS with majors in Economics and Engineering

By planning their courses carefully, Economics majors can earn a bachelor's and a master's degree in economics in five years. Students who are in the BA or BS programs are good candidates for this program. Students must be accepted to this program by the beginning of their senior year.

Students interested in pursuing any of these options should contact the Director of Undergraduate Studies in economics for further advising.

Departmental Honors

Candidates for honors must be economics majors with a GPA of 3.30 overall and a GPA of 3.50 or higher in economics courses. Students must complete ECONOM 4995: The Honors Pro Seminar class (capstone course) in order to be awarded departmental honors.

Minor in Economics

Students wishing to minor in economics must take a minimum of 18 credits in economics and the last 12 credit hours in residence. Courses must include ECONOM 1014 (or 1024) and 1015 (or 1051 instead of the previous two courses), 3229, and 3251 or 4351 plus two economics electives including at least one at the 4000 level. Students who take both ECONOM 3251 and 4351 will receive credit for only one of these courses.

Check the *Undergraduate Catalog* for course prerequisites.

ECONOMICS COURSES

ECONOM 1014--Principles of Microeconomics (3).A basic examination of the economy at the individual consumer, firm and market level. Simple economic models used to analyze the workings of the economy. Topics include opportunity costs, gains from trade, efficiency and markets, non-competitive markets, game theory, the importance of free trade, the markets response to economic shocks and the effect of government intervention. Not open to students who have completed ECONOM 1024, 1051H, or 4332 or AG EC 1041.

ECONOM 1015--Principles of Macroeconomics (3).Macroeconomics generally refers to a collection of questions about how scarcity affects a collection of people interacting with one another. In this course, our focus is on understanding how scarcity affects welfare of a nation. Topics include Gross Domestic Product, government spending and taxation, economic growth, monetary and fiscal policy, unemployment and inflation, and exchange rates. Not open to students who have completed ECONOM 1051H or AG EC 1042. Prerequisites: ECONOM 1014 or 1024.

ECONOM 1024--Fundamentals of Microeconomics (3).This course uses mathematical reasoning to provide an elementary quantitative introduction to fundamental concepts in microeconomics. It uses college algebra and simple geometric concepts to describe the behavior of economic units, such as consumers, firms and resource owners, and to depict their interaction through production and exchange in perfect and imperfect markets. Not open to students who have completed ECONOM 1014, 1051H, or 4332. Prerequisite: prior completion of MATH 1100/1120 or equivalent with grade of C or better. Math Reasoning Proficiency Course.

ECONOM 1051--General Economics (5).One semester course covering same material as covered in ECONOM 1014 and 1015. Topics include opportunity costs, gains from trade, efficiency and markets, non-competitive markets, game theory, government spending and taxation, economic growth, monetary and fiscal policy, unemployment and inflation, exchange rates. Includes applications for Journalism students. Not open to students who have completed ECONOM 1014, 1024, 1015 or 4332 or AG ECON 1041. Open only to pre-Journalism and Journalism Majors. Prerequisite: departmental consent required. Graded on A/F basis only.

ECONOM 1051H--General Economics - Honors (5).One semester course covering same material as covered in ECONOM 1014 and 1015. Topics include opportunity costs, gains from trade, efficiency and markets, non-competitive markets, game theory, government spending and taxation, economic growth, monetary and fiscal policy, unemployment and inflation, exchange rates. Not open to students who have completed ECONOM 1014, 1024, or 4332 and 1015. Honors eligibility required. Math Reasoning Proficiency Course.

ECONOM 2004--Undergraduate Topics in Economics - Social Science (1-3).Organized study of selected topics in Economics; applied or theoretical economics; covers subjects not included in regularly offered courses. Prerequisite: instructor's consent.

ECONOM 3004--Topics in Economics - Social Science (1-3).Study in applied or theoretical economics; covers subjects not included in regularly offered courses. Prerequisite: instructor's consent.

ECONOM 3224--Introduction to International Economics (3).A topical course which emphasizes the application of basic economic analysis to real and current international economic issues. Topics include free trade, protectionism, free trade areas, multilateral trade negotiations, trade and development, exchange rates, the International Monetary System, and economic integration. Prerequisite: ECONOM 1014, or 1024 or 1051H.

ECONOM 3229--Money, Banking and Financial Markets (3).Operation of the U.S. financial and economic system. Covers interest rates, banking regulation, the money supply process and the conduct of the Federal Reserve, inflation and the macroeconomy, exchange rates and the international financial system, rational expectations, and efficient markets. Prerequisites: ECONOM 1014 or 1024 and 1015 or 1051H.

ECONOM 3229H--Money, Banking and Financial Markets - Honors (3).Operation of the U.S. financial and economic system. Covers interest rates, banking regulation, the money supply process and the conduct of the Federal Reserve, inflation and the macroeconomy, exchange rates and the international financial system, rational expectations, and efficient markets. Prerequisites: ECONOM 1014 or 1024 and 1015 or 1051H. Honors eligibility required.

ECONOM 3251--Theory of the Firm (3).Theory of rational behavior in consumption, production, and pricing decisions of households and firms. Topics include the economics of the firm in the context of partial equilibria in product and factor markets under competition, monopoly, oligopoly and monopolistic competition as well as game theory. No credit for students who have completed ECONOM 4351. Prerequisites: ECONOM 1014, 1024 or 1051H and MATH 1320 or equivalent. Not open to majors.

ECONOM 3261--Economic Transformation in Eastern Europe & Former Soviet Union (3).An analysis of economic stabilization, liberalization and structural transformation in the transition from centralized planning toward a market economy. Prerequisites: ECONOM 1014 or 1024 or 1051H or instructor's consent.

ECONOM 4004--Topics in Economics- Social Science (1-5).Study in applied or theoretical economics; covers subjects not included in regularly offered courses; May be repeated for credit to a maximum of 5 hours. Prerequisite: instructor's consent.

ECONOM 4311--Labor Economics (3).Surveys theoretical explanations of wage and employment determination in contemporary labor markets. Prerequisite: ECONOM 3251 or 4351.

ECONOM 4315--Public Economics (3).Analyzes economic effects of government expenditures, taxes and debt. Expenditure and taxation principles, tax reform, cost-benefit analysis, fiscal policy. Prerequisite: ECONOM 3251 or 4351.

ECONOM 4316--State and Local Finance

(3).State and local tax and expenditure problems, intergovernmental fiscal relations, problems of metropolitan areas. Prerequisites: ECONOM 3251 or 4351 or instructor's consent.

ECONOM 4320--Introduction to Economic Doctrines (3).Origins of modern economic thought in the context of social and intellectual environment of the time in which they originated, their contribution to their period and to modern thought. Prerequisites: ECONOM 1014 or 1024 and 1015 or 1051H.

ECONOM 4322--Economics of Regulation and Antitrust (3).Economic issues concerning the role of government regulation. The course examines the rationale for and effects of regulatory policies in public utilities, transportation, and communications industries. Prerequisite: ECONOM 3251 or 4351.

ECONOM 4325--The International Monetary System (3).Study of macroeconomic and monetary relationships between the US and the world. Topics include balance of payments, foreign exchange rates, history of the international monetary system. Prerequisite: ECONOM 3229.

ECONOM 4326--Economics of International Trade (3).The microeconomic theory of international trade. Topics include comparative advantage, the theory of commercial policy, economic integration, trade with LDC's and the trade effects of economic growth. Prerequisite: ECONOM 3251 or 4351 or instructor's consent.

ECONOM 4329--The Banking System and the Money Market (3).Organization of the money market; credit control procedures and aims, effect of bank expansion and contraction on money market and national income deregulation. Prerequisite: ECONOM 3229.

ECONOM 4332--Microeconomics for Managers (3).Microeconomic concepts presented at the intermediate level, graphic treatment with limited calculus, managerial issues presented at the MBA level. Prerequisites: ECONOM 1014 or 1024, MATH 1300. +/- grading systems. (Not open to economics majors) must have a consent card for MBA program.

ECONOM 4335--Economics for Decision Making (3).Process of economic reasoning and application of economic concepts, theory, and methods to a wide range of management problems at both private firms and public agencies. Prerequisites: ECONOM 3229 and 3251 or 4351.

ECONOM 4337--Economics of Speculative Markets (3).Considers the economic purpose of speculative markets and derives their price formation mechanisms. A historical approach is used to develop the problems involved in predicting prices and to evaluate the tools that have been used in attempting prediction. Prerequisite: ECONOM 1014 or 1024 and 1015, or 1051H and MATH 1320 or instructor's consent.

ECONOM 4340--Game Theory (3).An introduction to the theory of games, viewed as a set of tools used widely in economics to study situations in which decision-makers (consumers, firms, governments, etc.) interact. The course introduces the basic theory, emphasizing the concepts and their economic applications. Prerequisite: ECONOM 3251 or 4351 or instructor's consent.

ECONOM 4345--Economics of Education

(3).Economic theory is used to analyze the market for educational services and education policy. Topics include: human capital theory, cost and performance measures for public and private schools, market based approaches to school reform, school finance, higher education cost and access. Prerequisite: ECONOM 1014 or 1024, or 1051H and STAT 2500, or equivalent.

ECONOM 4351--Intermediate Microeconomics (3).Theory of rational behavior in consumption, production, and pricing decisions of households and firms. Partial equilibria in product and factor markets under competition, monopoly, oligopoly and monopolistic competition. A brief introduction to general equilibrium and welfare economics is provided. Calculus is employed. No credit for students who have completed ECONOM 3251. Prerequisites: ECONOM 1014 or 1024 or 1051H and MATH 1320 or equivalent.

ECONOM 4351H--Intermediate Microeconomics - Honors (3).Theory of rational behavior in consumption, production, and pricing decisions of households and firms. Partial equilibria in product and factor markets under competition, monopoly, oligopoly and monopolistic competition. A brief introduction to general equilibrium and welfare economics is provided. Calculus is employed. No credit for students who have completed ECONOM 3251. Prerequisites: ECONOM 1014 or 1024 or 1051H and MATH 1320 or equivalent. Honors eligibility required.

ECONOM 4353--Intermediate Macroeconomics (3).The study of the structure and performance of national economies. Topics include: long-term economics growth, aggregate economic fluctuations, unemployment, and inflation; consequences for national economies of being part of the global economic system; government policies and macroeconomic performance. Prerequisites: ECONOM 3229 and MATH 1320 or equivalent.

ECONOM 4355--Industrial Organization and Competitive Strategy (3).Analyzes the structure of industry, its impact on the operations of the firm and significance for public policy. The focus is on strategic interaction among firms with market power. Topics include oligopoly, competition, collusion, price discrimination, product differentiation, advertising, entry and exit. Prerequisites: ECONOM 3251 or 4351.

ECONOM 4357--Health Economics (3).Analyzes the economics of health care in the United States with particular attention paid to the role of government. It examines the demand for health care and the structure and consequences of public and private health insurance; the supply

of health care, including professional training, licensure, specialization and compensation, hospital competition and finance, and the determinants and consequences of technical change in medicine and health care reform. Prerequisite: ECONOM 3251 and 4351 and STAT 2500, or equivalent.

ECONOM 4360--Economic Development (3).(same as Peace Studies 4360). The study of less-developed countries including problems of measuring economic growth, analysis of sources of economic growth, causes of changes

in economic and structure, development and trade policies. The consequences of goals and assumptions for development policy are analyzed. Prerequisite: ECONOM 3229 and 3251 or 4351.

ECONOM 4361--Comparative Economic Systems (3).Study of capitalism, market socialism, and central planning. Prerequisites: ECONOM 3229 and 3251 or 4351.

ECONOM 4367--Law and Economics (3).This course is a survey of economic analyses of American legal institutions. Students will apply basic microeconomic, game theoretic and statistical concepts to the study of property, contracts, torts, the legal process, crime, and the judiciary. Prerequisite: ECON 3251 or 4351, and STAT 2500, or equivalent.

ECONOM 4370--Quantitative Economics (3).The aim of this course is to provide an introduction to the mathematical language of economic theory. Topics include linear models, matrix algebra, rules of differentiation and comparative static analysis, optimization. Prerequisite: MATH 1500 or equivalent.

ECONOM 4371--Introductory Econometrics (3).Study methods for quantitative analysis of economic data. Estimating techniques, tests of significance, prediction and forecasting reviewed with respect to problems presented by economic data and information demands of economic decision models. Prerequisites: ECONOM 3251 or 4351 and STAT 2500, or equivalent.

ECONOM 4384--Structural Change in Economic History (3).Explores changes in the structure of the American economy from its earliest colonial beginnings. Structural change, an integral part of growth, is related to technical change, population growth and to the content and form of economic theory. Prerequisite: ECONOM 1014 or 1024 and 1015, or 1051H or instructor's consent.

ECONOM 4385--Problems in Economics (cr. arr.).Credit arranged by instructor.

ECONOM 4965--Independent Study in Economics (cr.arr.).Individual work, with conferences adjusted to needs of student. Prerequisite: instructor's consent.

ECONOM 4970--Senior Seminar in Economics (3).(capstone course). Seminar for graduating seniors who are majoring in economics. Multiple writing assignments will emphasize synthesis of theoretical, empirical, and institutional economics. Not open to non-majors.

ECONOM 4995--Honors Proseminar (2-3).(Capstone course required for Economics honors students). Seminar for graduating seniors. This capstone course integrates previous economics courses by applying economic theories to problems. Students acquire an understanding of what research in economics can produce and how to produce those results. Course requirements are to produce a list of distinctive activities that count as research and produce a research paper. Multiple writing assignments will emphasize synthesis of theoretical, empirical and institutional economics. No credit for students who have completed ECONOM 4970. Not open to non-majors.

Department of English

Pat Okker, Chair

FACULTY

CURATORS PROFESSOR J. M. Foley, E. Lawless
PROFESSOR A. Barnstone, S. Cairns, A. Devlin, C. Hudson-Weems, T. L. Lewis, T. J. Materer, R. S. Morgan, P. Okker, K.L. Piper, A. Prahlad, T. V. Quirk, E. Ragland, D. T. Read, R. B. Schwartz, M. A. Swick
ASSOCIATE PROFESSOR V. M. Carstens, J. O. Evelev, E.F. Glick, M. J. Gordon, N. I. Heringman, A. P. Hoberek, G. L. Justice, W. J. Kerwin, M. A. Konkle, A. C. E. Langley, E. E. Lipton, D. K. Looser, C. Okonkwo, C. Strathausen, M. Townsend, N. M. West
ASSISTANT PROFESSOR E. Chang, S. Cohen, F. Dickey, R. Dingo, S. M. Harrison, J. Hearne, J. Kramer, E. J. Levy, A. Myers, M. D. Patton, J. Edbauer Rice, J. Rice, A. Socarides, M. Stanton, D. Strickland

The English Department provides a major with emphasis areas in literature, African Diaspora Studies, language, creative writing and folklore/oral tradition. A major in English develops skills in reading, critical thinking and writing. A degree in English is not intended to provide specific vocational training but rather to give a broad, open-ended education that can lead to many different careers, especially those requiring excellent communication skills.

Recent graduates have gone on to careers in teaching, publishing, television, film, advertising, public relations, insurance and government. In addition, English is excellent preparation for graduate or professional schools such as law and business.

The department offers BA, MA and PhD degrees with majors in English. Two minors are also available.

Major Program Requirements - English

English majors must complete 30 credits in English. A minor is recommended. At least 24 hours in the major must be in courses numbered above 2999. Remaining hours may be either lower division or junior/senior level courses.

No more than 40 credits in English may be counted toward graduation. The required English composition credits are excluded from this maximum and must be taken before the student enrolls in any English courses numbered above 2009.

Major core requirements.....	30
UNIT I.....	3
ENGLISH 2100: Writing About Literature	
UNIT II: Literature	18
At least 3 credits in each area:	
A. Beginning to 1603	
B. 1603 to 1789	
C. 1789 to 1890	
D. 1890 to the Present	
UNIT III: Folklore/Oral Literature, Language, Rhetoric, Composition, Theory and Criticism	6
UNIT IV: Capstone	3
ENGLISH 4970 Capstone Experience	

ENGLSH 4996: Honors Seminar in English

Departmental Honors

To graduate with honors in English, students must have a 3.3 GPA and take ENGLSH 4996 and 4995. More information is available from the Director of Undergraduate Studies.

Emphasis Areas

Students may choose an optional emphasis area in African Diaspora studies, creative writing, folklore or language. Choosing one of these emphasis areas increases the major requirements to 33 credits. The requirements in Units II and III (described above) are reduced by 3 credits each and a student takes 9 credits in one of the four emphasis areas described below. (Note: Emphasis areas do not appear on transcripts or diplomas.)

African Diaspora emphasis area.....9
Three of the following courses in African Diaspora studies
ENGLSH 2400, 3400, 3410, 3420, 4410, 4420, 4480, 4400 and 4710.

English language emphasis area9
Three of the following courses in the English language
ENGLSH 1060, 4600, 4610, 4620, 4630, 4640, 4650.

Creative writing emphasis area.....9
Three courses in creative writing in fiction, creative nonfiction, playwriting, or poetry
Fiction
ENGLSH 1510, 2510 and 4510
Nonfiction
ENGLSH 1520, 2520 and 4520
Playwriting
ENGLSH 2560, 3560 and 4560
Poetry
ENGLSH 1530, 2530 and 4530

Folklore emphasis area9
Three of the following courses in folklore and oral tradition
ENGLSH 2700 or 2770, 3700, 4700, 4770, 4780.

The folklore student also takes a minimum of three courses in associated fields outside the English Department (such as anthropology, linguistics, art history or classics). These courses can be used to fulfill general requirements in the College of Arts and Science.

Minor Program Requirements

Minor in English

The English minor consists of 15 credits beyond the required composition course. It must include at least 6 credits in courses numbered 3000 or above and may include no more than 6 credits in special problems, methods or readings courses such as ENGLSH 4955 and 4960. The minor is a flexible and varied program that can be tailored to individual students' needs. Students wishing to minor in English should consult the English Department's undergraduate advisor.

Minor in English Writing

The writing minor is a 15-credit course of study designed to help students in all majors and colleges improve their writing and critical thinking skills. It requires writing courses specified by the department, including 6 credits in courses numbered 3000 or above. Consult the English Department undergraduate advisor for specific requirements.

*Course concurrently meets university General Education, Arts and Science Foundation and/or campus graduation requirements.

^Course meets degree requirements or major requirements.

†Recommended courses in related fields.

Check the *Undergraduate Catalog* for course prerequisites.

Depth Areas are courses that are 2000 level or above chosen from four areas, the sciences, social sciences, behavioral sciences or humanities and fine arts. Arts and Science students are required to complete 9 hours in at least 2 of the four areas.

ENGLISH COURSES

ENGLISH 1000--Exposition and Argumentation (3).Stresses writing as a process, with due attention given to critical reading and thinking skills applicable to all college classes, as well as to invention, drafting, revising, and rewriting. English 1000 is a prerequisite for any Writing Intensive course.

ENGLISH 1000H--Honors Exposition English (3).Stresses writing as a process, with due attention given to critical reading and thinking skills applicable to all college classes, as well as to invention, drafting, revising, and rewriting. English 1000 is a prerequisite for any Writing Intensive course. Honors eligibility required.

ENGLISH 1060--Human Language (3).(same as Anthropology 1060, Communication Science Disorders 1060 and Linguistics 1060). General introduction of various aspects of linguistic study. Elementary analysis of language data, with some attention to application of linguistic study to other disciplines.

ENGLISH 1100--Reading Literature (3).Introduces the student to the values, rigors, and pleasures of reading literature. Intended for first-year, non-English majors. No more than six hours may be taken in the Reading Literature Series.

ENGLISH 1106--Reading Literature, Beginnings to 1603 (3).See English 1100 course for description.

ENGLISH 1107--Reading Literature, 1603 to 1789 (3).See English 1100 course for description.

ENGLISH 1108--Reading Literature, 1789-1890 (3).See English 1100 course for description.

ENGLISH 1160--Themes in Literature (3).Topics (e.g., The Idea of Progress, Images of Women) announced at time of registration. No more than six hours may be taken in the Themes in Literature series.

ENGLISH 1166--Themes in Literature, Beginnings to 1603 (3).See English 1160 for course description.

ENGLISH 1167--Themes in Literature, 1603 to 1789 (3).See English 1160 for course description.

ENGLISH 1168--Themes in Literature, 1789 to 1890 (3).See English 1160 for course description.

ENGLISH 1200--Readings in British Literature (3).Focuses on reading and interpreting selected texts in British literature. No more than six hours may be taken in Readings in British Literature Series.

ENGLISH 1206--Readings in British Literature, Beginning to 1603 (3).See English 1200 for course description.

ENGLISH 1207--Readings in British Literature, 1603 to 1789 (3).See English 1200 for course description.

ENGLISH 1208--Readings in British Literature, 1789 to 1890 (3).See English 1200 for course description.

ENGLISH 1210--Introduction to British Literature (3).A basic introduction to the concepts, terms, and practices commonly encountered in literary study, presented by way of texts from the history of British literature that ap-

propriately demonstrate such concepts, terms, and practices. This course is recommended for prospective majors. Graded on A/F basis only.

ENGLISH 1300--Readings in American Literature (3).Focuses on reading and interpreting selected texts in American literature. No more than six hours may be taken in the Readings in American Literature series.

ENGLISH 1307--Readings in American Literature, 1603 to 1789 (3).See English 1300 for course description.

ENGLISH 1308--Readings in American Literature, 1789 to 1890 (3).See English 1300 for course description.

ENGLISH 1310--Introduction to American Literature (3).A basic introduction to the concepts, terms, and practices commonly encountered in literary study, presented by way of texts from the history of American literature that appropriately demonstrate such concepts, terms, and practices. This course is recommended for prospective English Majors. Graded on A/F basis only.

ENGLISH 1510--Creative Writing: Introduction to Fiction (3).Introduces basic narrative techniques, including writing original stories.

ENGLISH 1520--Creative Writing: Introduction to Nonfiction Prose (3).Introduces the range and basic techniques of creative nonfiction, including composing original work in the genre.

ENGLISH 1530--Creative Writing: Introduction to Poetry (3).Introduces basic poetic techniques, including writing original poems.

ENGLISH 1700--Introduction to Folklore Genres (3).(same as ANTHRO 1150). Course focus is on genres of folklore in both historic and contemporary contexts, as well as in people's daily lives. Genres include narrative, proverbs, oral poetry and rhyme, riddles, jokes, legends, epics, material culture and intangible expressive culture. Graded on A/F basis only.

ENGLISH 1810--Introduction to Film: The Beginnings to 1945 (3).(same as Film Studies 1810). Surveys the basic techniques of filmmaking, some important film genres and classic films of the period. Students who have already completed English 2830 cannot receive credit for English 1810.

ENGLISH 1820--Introduction to Film: 1945-Present (3).Surveys the basic techniques of filmmaking, some important film genres and classic American and European films of the period. English 1810 is not a prerequisite. Students who have already completed English 2840 cannot receive credit for English 1820.

ENGLISH 2000--Studies in English (3).Underclass topics. Subjects vary from semester to semester. No more than six hours may be taken in the Topics in English Studies series.

ENGLISH 2000H--Studies in English - Honors (3).Underclass topics. Subjects vary from semester to semester. No more than six hours may be taken in the Topics in English Studies series. Honors eligibility required.

ENGLISH 2005--Topics in English - Humanities (3).Underclass topics. Subjects vary from semester to semester. May be repeated to 6 hours maximum.

ENGLISH 2006--Studies in English, Beginning to 1603 (3).See English 2000 for course description.

ENGLISH 2007--Studies in English, 1603 to 1789 (3).See English 2000 for course description.

ENGLISH 2008--Studies in English, 1789 to 1890 (3).See English 2000 for course description.

ENGLISH 2009--Studies in English, 1890 to Present (3).See English 2000 for course description.

ENGLISH 2010--Intermediate Composition (3).Provides intensive guided practice in expository and persuasive writing. Prerequisite: ENGLISH 1000 or equivalent.

ENGLISH 2015H--Theory and Practice of Tutoring Writing Seminar - Honors (3).(same as General Honors 2015). Addresses both the theory and practice of tutoring and the foundations of good writing. This course also qualifies studies for a part-time job working as Writing Lab/Online Writery tutors in future semester. Honors eligibility required. Prerequisites: ENGLISH 1000; instructor's consent.

ENGLISH 2030--Professional Writing (3).Introduction to the communication required in any professional field, including basic letters and resumes, reviews, reports, and electronic networking, culminating in an extensive report and a related oral presentation. Prerequisite: ENGLISH 1000.

ENGLISH 2100--Writing About Literature (3).Introduces the student to reading in three or four genres (fiction, poetry, drama, and non-fiction) and to literary concepts and terms and their application in literary analysis. Prerequisite: ENGLISH 1000.

ENGLISH 2100H--Writing About Literature - Honors (3).Introduces the student to reading in three or four genres (fiction, poetry, drama, and non-fiction) and to literary concepts and terms and their application in literary analysis. Prerequisite: ENGLISH 1000. Honors eligibility required.

ENGLISH 2140--Twentieth-Century Literature (3).A multi-genre survey emphasizing American and British works within the intellectual and cultural context of our time. Prerequisite: ENGLISH 1000.

ENGLISH 2150--Popular Literature (3).Study of literary genres, such as science fiction and the detective novel, that may be overlooked in traditional literature classes. Prerequisite: ENGLISH 1000.

ENGLISH 2155--Introduction to World Literatures (3).Presents and puts into context works by writers from different nations or ethnic backgrounds; includes works in two or more literary genres. No more than six hours may be taken in the Introduction to World Literature series.

ENGLISH 2156--Introduction to World Literatures, Beginnings to 1603 (3).See English 1150 for course description.

ENGLISH 2157--Introduction to World Literatures, 1603 to 1789 (3).See English 1150 for course description.

ENGLISH 2158--Introduction to World

Literatures, 1789 to 1890 (3).See English 1150 for course description.

ENGLISH 2159--Introduction to World Literatures, 1890 to Present (3).See English 1150 for course description.

ENGLISH 2160--Major Authors (3).Focuses on the works of a single writer (e.g., Shakespeare) or set of writers (e.g., William Faulkner and Flannery O'Connor). Topic announced at time of registration. Prerequisite: ENGLISH 1000. No more than six hours may be taken in the Major Authors series.

ENGLISH 2166--Major Authors, Beginning to 1603 (3).See English 2160 for course description.

ENGLISH 2167--Major Authors, 1603 TO 1789 (3).See English 2160 for course description.

ENGLISH 2168--Major Authors, 1789 to 1890 (3).See English 2160 for course description.

ENGLISH 2169--Major Authors, 1890 to Present (3).See English 2160 for course description.

ENGLISH 2180--Introduction to Women's Literature (3).(same as Women's and Gender Studies 2180). A study of traditional and non-traditional literature written by women from the perspective of feminist themes-love, power, work, family and other relations. Prerequisite: ENGLISH 1000. No more than six hours may be taken in the Introduction to Women's Literature series.

ENGLISH 2186--Introduction to Women's Literature, Beginning to 1603 (3).(same as Women's and Gender Studies 2186). See English 2180 for course description.

ENGLISH 2187--Introduction to Women's Literature, 1603 to 1789 (3).(same as Women's and Gender Studies 2187). See English 2180 for course description.

ENGLISH 2188--Introduction to Women's Literature, 1789 to 1890 (3).(same as Women's and Gender Studies 2188). See English 2180 for course description.

ENGLISH 2189--Introduction to Women's Literature, 1890 to Present (3).(same as Women's and Gender Studies 2189). See English 2180 for course description.

ENGLISH 2200--Studies in British Literature (3).Topic (e.g., Gothic Literature, The Domestic Novel) announced at time of registration. Prerequisite: ENGLISH 1000. No more than six hours may be taken in the Topics in British Literature series.

ENGLISH 2200H--Studies in British Literature - Honors (3).Topic (e.g., Gothic Literature, The Domestic Novel) announced at time of registration. Prerequisite: ENGLISH 1000. No more than six hours may be taken in the Topics in British Literature series. Honors eligibility required.

ENGLISH 2206--Studies in British Literature, Beginning to 1603 (3).See English 2200 for course description.

ENGLISH 2207--Studies in British Literature, 1603 to 1789 (3).See English 2200 for course description.

ENGLISH 2208--Studies in British Literature, 1789 to 1890 (3).See English 2200 for

course description.

ENGLISH 2209--Studies in British Literature, 1890 to Present (3).See English 2200 for course description.

ENGLISH 2300--Studies in American Literature (3).Topic (e.g., American Culture, The Frontier) announced at time of registration. Prerequisite: ENGLISH 1000. No more than six hours may be taken in the Topics in American Literature series.

ENGLISH 2306--Studies in American Literature, Beginning to 1603 (3).See English 2300 for course description.

ENGLISH 2307--Studies in American Literature, 1603 to 1789 (3).See English 2300 for course description.

ENGLISH 2308--Studies in American Literature, 1789-1890 (3).See English 2300 for course description.

ENGLISH 2309--Studies in American Literature, 1890 to Present (3).See English 2300 for course description.

ENGLISH 2400--Introduction to African Diaspora Literature (3).(same as Black Studies 2400). Introduces students to African Diaspora literature with an emphasis on literature written originally in English. Prerequisite: ENGLISH 1000. No more than six hours may be taken in the Introduction to African Diaspora Literature series.

ENGLISH 2407--Introduction to African Diaspora Literature, 1603 to 1789 (3).(same as Black Studies 2407). See English 2400 for course description.

ENGLISH 2408--Introduction to African Diaspora Literature, 1789 to 1890 (3).(same as Black Studies 2408). See English 2400 for course description.

ENGLISH 2409--Introduction to African Diaspora Literature, 1890 to Present (3).(same as Black Studies 2409). See English 2400 for course description.

ENGLISH 2490--Introduction to Native Studies (3).Introduction to the field of Native Studies. Topics include indigenous knowledge, culture change and continuity, History and misrepresentation, politics and political history, and global indigenous relationships.

ENGLISH 2510--Creative Writing: Intermediate Fiction (3).Provides intensive guided practice in the writing of short fiction. Prerequisite: ENGLISH 1510 or equivalent.

ENGLISH 2520--Creative Writing: Intermediate Nonfiction Prose (3).Provides guided practice in the writing of creative nonfiction. Prerequisite: ENGLISH 1520 or equivalent.

ENGLISH 2530--Creative Writing: Intermediate Poetry (3).Provides intensive guided practice in the writing of poetry. Prerequisite: ENGLISH 1530 or equivalent.

ENGLISH 2560--Beginning Playwriting (3).(same as Theatre 2920). Study and practice of playwriting fundamentals; emphasizes the one-act play.

ENGLISH 2700--Introduction to Folklore Field Research (3).(same as Anthropology 2150). Course will focus on the specifics of how to identify, collect, preserve and document folklore within communities. Prerequisite: ENGLISH 1000.

ENGLISH 2830--American Film in an International Context, 1895-1950 (3).(same as Film Studies 2830). Examines the development of American cinema in relation to other national cinemas. No credit for students who have completed English 1810. Prerequisite: ENGLISH 1000.

ENGLISH 2840--American Film in an International Context, 1950-Present (3).(same as Film Studies 2840). Examines the relationship of American cinema to world cinema, 1950-present. No credit for students who have completed English 1820. Prerequisite: ENGLISH 1000.

ENGLISH 2860--Film Themes and Genres (3).(Same as FILM_S 2860) Topics (e.g. Film noir, African-American filmmakers, Food and Film, The Western) announced at time of registration. No more than six hours may be taken in Film Themes and Genres. Prerequisite: ENGLISH 1000

ENGLISH 3010--Advanced Composition (3).An intensive writing workshop in which student essays and related texts receive close reading and analysis. Focus (e.g. The Essay, The Research Paper) announced at time of registration. Prerequisite: instructor's consent.

ENGLISH 3080--Sexuality and Gender Theory (3-6).(same as Women's and Gender Studies 3080). Examination of major theoretical approaches and debates in the study of gender and sexuality, with particular attention to the intersection of culture, representation, and identity. May be repeated to 6 hours with department consent. Prerequisite: sophomore standing.

ENGLISH 3100--Introduction to Literary Theory (3).Introduction to the range of theoretical approaches to the study of literature; intended as a broad survey of literary theory, whether from the Classical era onward or 20th century literary theory and beyond. Prerequisite: ENGLISH 1000 and sophomore standing.

ENGLISH 3110--Special Themes in Literature (3-6).Topics (e.g., Postmodernism, Representations of Nature) announced at time of registration. Prerequisites: ENGLISH 1000 or equivalent and sophomore standing. No more than six hours may be taken in the Special Themes in Literature series.

ENGLISH 3116--Special Themes in Literature, Beginning to 1603 (3).See English 3110 for course descriptions.

ENGLISH 3117--Special Themes in Literature, 1603 to 1789 (3).See English 3110 for course descriptions.

ENGLISH 3118--Special Themes in Literature, 1789 to 1890 (3).See English 3110 for course descriptions.

ENGLISH 3119--Special Themes in Literature, 1890 to Present (3).See English 3110 for course descriptions.

ENGLISH 3170--World Dramatic Literature (3).(same as Theatre 3700). Survey of world drama from Greeks to present, focusing on structure, theory, and performance. Graded on A/F basis only. Prerequisite: sophomore standing.

ENGLISH 3180--Survey of Women Writers (3).(same as Women's and Gender Studies 3180). A study of writing by women from the Middle Ages to the present. Prerequisite:

sophomore standing.

ENGLISH 3200--Survey of British Literature: Beginnings to 1784 (3). Historical survey from beginnings of British literature through the age of Johnson, with readings representing significant writers, works and currents of thought. Prerequisite: ENGLISH 1000 or equivalent.

ENGLISH 3210--Survey of British Literature: Romanticism to the Present (3). Historical survey of British literature from the Romantic period to the present, emphasizing important writers and significant intellectual and cultural movements. Prerequisite: ENGLISH 1000.

ENGLISH 3300--Survey of American Literature: Beginnings to 1865 (3). A survey of major writers and movements in American literature from Colonialism to Romanticism. Prerequisite: ENGLISH 1000 or equivalent.

ENGLISH 3310--Survey of American Literature: 1865-Present (3). A survey of major writers and movements in American literature from realism to postmodernism. Prerequisite: ENGLISH 1000 or equivalent.

ENGLISH 3400--Survey of African American Literature, Beginnings to 1900 (3). (same as Black Studies 3400). A survey of major authors and movements in African American literature from its beginnings to 1900. Prerequisite: ENGLISH 1000.

ENGLISH 3410--Survey of African American Literature, 1900-Present (3). (same as Black Studies 3410). A survey of major authors and movements in African American literature from 1900 to the present. Prerequisite: ENGLISH 1000.

ENGLISH 3420--Periods and Genres in African Diaspora Literature (3). (same as Black Studies 3420). Topic (e.g. Harlem Renaissance African Diaspora Poetry) Announced at time of registration. Prerequisite: ENGLISH 1000. No more than six hours may be taken in the Periods and Genres in African Diaspora Literature series.

ENGLISH 3427--Periods and Genres in African Diaspora Literature, 1603 to 1789 (3). (same as Black Studies 3427). See English 3420 for course description.

ENGLISH 3428--Periods and Genres in African Diaspora Literature, 1789 to 1890 (3). (same as Black Studies 3428). See English 3420 for course description.

ENGLISH 3429--Periods and Genres in African Diaspora Literature, 1890 to Present (3). (same as Black Studies 3429). See English 3420 for course description.

ENGLISH 3490--Survey of Native Writing and Representation (3). Survey of native writing and representation from the late eighteenth century to the present, encompassing a diverse range of tribes and forms. Material will be drawn from tribes inhabiting the North American continent, but global indigenous relationships will also be addressed.

ENGLISH 3560--Intermediate Playwriting (3). (same as Theatre 3920). Intermediate study of the writing process as applied to theatre, leading to the creation of a full-length play to be considered for production. Prerequisite: ENGLISH 2560.

ENGLISH 3570--Performance of Literature (3). (same as Communication 3570 and Theatre 3200). Analysis and oral interpretation of literary works. Graded on A/F basis only. Prerequisite: sophomore standing.

ENGLISH 3700--American Folklore (3). (same as Anthropology 3150). Focus on regional and ethnic folklore; emphasis on analysis of folklore in context. Requirements include book reports and two analytical papers based on student field research.

ENGLISH 4004--Topics in English-Social Science (cr.arr.). Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May repeat to six hours.

ENGLISH 4040--Studies in Writing (3). An advanced writing workshop in nonfiction prose. Topics (The Personal Narrative, Nature Writing) announced at time of registration. May repeat to six hours with departmental consent. Prerequisite: ENGLISH 2010 or instructor's consent.

ENGLISH 4045--Rhetorical Studies (3). Examines questions related to rhetoric, the study of symbols used for persuasion, justification, or communication. Specific topics are announced at time of registration and may involve the rhetorical study of fiction or nonfiction, oral or written texts, verbal or visual modes. Prerequisites: ENGLISH 1000, junior standing.

ENGLISH 4050--Historical Survey of Rhetoric (3). A survey of major works of rhetoric from Plato to the present day, with special attention to those works influencing English language rhetorics and theories of rhetoric. Prerequisites: ENGLISH 1000 and sophomore standing.

ENGLISH 4060--Studies in Critical Theory (3). Focuses on questions raised by various critical theories, includes practice writing criticism that applies the theories to particular works. May repeat to six hours with department's consent. Prerequisite: junior standing.

ENGLISH 4070--History of Criticism (3). Surveys modern and contemporary theories of literary criticism: historical, archetypal, generic, formalist, phenomenological and interdisciplinary. Emphasizes key writers in each field. Prerequisite: junior standing.

ENGLISH 4100--Genres (3). Advanced survey of major movements and writers. Topics (e.g., American Poetry, The Development of the British Novel) announced at time of registration. Prerequisite: junior standing. No more than six hours may be taken in the Genres series.

ENGLISH 4106--Genres, Beginning to 1603 (3). See English 4100 for course description.

ENGLISH 4107--Genres, 1603 to 1789 (3). See English 4100 for course description.

ENGLISH 4108--Genres, 1789 to 1890 (3). See English 4100 for course description.

ENGLISH 4109 Genres, 1890 to Present (3). See English 4100 for course description.

ENGLISH 4120--Ethnic Literature (3). Explores in depth the literary traditions of one of America's minority ethnic cultures: Native American, African-American, Hispanic American, Asian American. Prerequisite: junior standing. No more than six hours may be taken in the Ethnic Literature series.

ENGLISH 4127--Ethnic Literature, 1603

to 1789 (3). See English 4120 for course description.

ENGLISH 4128--Ethnic Literature, 1789 to 1890 (3). See English 4120 for course description.

ENGLISH 4129--Ethnic Literature, 1890 to Present (3). See English 4120 for course description.

ENGLISH 4140--Modern Literature (3). A study of selected twentieth-century literature within the intellectual and cultural contexts of the modern era.

ENGLISH 4150--World Literatures (3). Study of important works and writers from Asia, Africa, Europe, Latin America or the mid-East. Topics (e.g., Survey of World Literature, The Bible) announced at time of registration. Prerequisite: junior standing. No more than six hours may be taken in the World Literature series.

ENGLISH 4156--World Literatures, Beginning to 1603 (3). See English 4150 for course description.

ENGLISH 4157--World Literatures, 1603 to 1789 (3). See English 4150 for course description.

ENGLISH 4158--World Literatures, 1789 to 1890 (3). See English 4150 for course description.

ENGLISH 4159--World Literatures, 1890 to Present (3). See English 4150 for course description.

ENGLISH 4160--Major Authors (3). Intensive study of the work of a single writer (e.g., Milton) or set of writers (e.g., Whitman and Dickinson). Topic announced at time of registration. No more than six hours may be taken in the Major Author series. Prerequisite: junior standing.

ENGLISH 4166--Major Authors, Beginning to 1603 (3). See English 4160 for course description.

ENGLISH 4167--Major Authors, 1603-1789 (3). See English 4160 for course description.

ENGLISH 4168--Major Authors, 1789-1890 (3). See English 4160 for course description.

ENGLISH 4169--Major Authors, 1890-Present (3). See English 4160 for course description.

ENGLISH 4170--Comparative Approaches to Literature (3). Study of works separated by the places or eras of their composition, but united by themes or traditions. Topics (e.g., Poets of African Diaspora, Literatures of Exile) announced at time of registration. No more than six hours may be taken in the Comparative Approaches to Literature. Prerequisite: junior standing.

ENGLISH 4176--Comparative Approaches to Literature, Beginning to 1603 (3). See English 4170 for course description.

ENGLISH 4177--Comparative Approaches to Literature, 1609-1789 (3). See English 4170 for course description.

ENGLISH 4178--Comparative Approaches to Literature, 1789-1890 (3). See English 4170 for course description.

ENGLISH 4179--Comparative Approaches to Literature, 1890-Present (3). See English 4170 for course description.

ENGLISH 4180--Major Women Writers (3). (same as Women's and Gender Studies 4180).

Study of a limited number (1-3) of significant writers to be read intensively using contemporary feminist critical theory. No more than six hours may be taken in the Major Women Writers series.

ENGLISH 4181--Themes in Literature by Women (3).(same as Women's and Gender Studies 4181). Examines works by a number of women writers with particular attention to their socio-political context. May repeat to six hours with department's consent. Prerequisite: junior standing.

ENGLISH 4186--Major Women Writers, Beginning to 1603 (3).(same as Women's and Gender Studies 4186). See English 4180 for course description.

ENGLISH 4187--Major Women Writers, 1603-1789 (3).(same as Women's and Gender Studies 4187). See English 4180 for course description.

ENGLISH 4188--Major Women Writers, 1789-1890 (3).(same as Women's and Gender Studies 4188). See English 4180 for course description.

ENGLISH 4189--Major Women Writers, 1890-Present (3).(same as Women's and Gender Studies 4189). See English 4180 for course description.

ENGLISH 4200--Introduction to Old English (3).(same as Linguistics 4200). A beginning study of the Old English or Anglo-Saxon language in its cultural context, with emphasis on gaining a reading knowledge. Prerequisite: junior standing.

ENGLISH 4210--Medieval Literature (3). Representative works from the Anglo-Saxon and Middle-English periods. May repeat to six hours with department's consent. Prerequisite: junior standing.

ENGLISH 4220--Renaissance and Seventeenth Century Literature (3).Topics (e.g., The Metaphysical Poets, Themes in Shakespeare) announced at time of registration. No more than six hours may be taken in the Renaissance and Seventeenth Century Literature. Prerequisite: junior standing.

ENGLISH 4226--Renaissance and Seventeenth Century Literature, Beginning to 1603 (3).See English 4220 for course description.

ENGLISH 4227--Renaissance and Seventeenth Century Literature, 1603 to 1789 (3).See English 4220 for course description.

ENGLISH 4240--Restoration and 18th-Century English Literature (3).Topics (e.g., Restoration Drama, Johnson and his Circle) announced at time of registration. May repeat to six hours with department's consent. Prerequisite: junior standing.

ENGLISH 4250--19th-Century English Literature (3).Topics (e.g., Victorian Poetry, Non-Fiction Prose) announced at time of registration. May repeat to six hours with department's consent. Prerequisite: junior standing.

ENGLISH 4260--20th-Century British Literature (3).Topics (e.g. Contemporary British Poets, The Post-War Novel) announced at time of registration. May repeat to six hours with department's consent. Prerequisite: junior standing.

ENGLISH 4300--Early American Literature (3).Topics (e.g., Narratives of Discovery and

Exploration, The Puritan Heritage) announced at time of registration. May repeat to six hours with department's consent. Prerequisite: junior standing.

ENGLISH 4310--19th-Century American Literature (3).Topics (e.g., American Romanticism, Regionalism) announced at time of registration. May repeat to six hours with department's consent. Prerequisite: junior standing.

ENGLISH 4320--20th-Century American Literature (3).Topics (e.g., American Poetry since T. S. Eliot, The Short Story) announced at time of registration. May repeat to six hours with department's consent. Prerequisite: junior standing.

ENGLISH 4400--Studies in African Diaspora Literature (3).(same as Black Studies 4400). Topics (e.g., African American Poetry, Africana Diaspora Drama) announced at time of registration. No more than six hours may be taken in the Studies in Africana Literature series. Prerequisite: junior standing.

ENGLISH 4407--Studies in African Diaspora Literature, 1603 to 1789 (3).(same as Black Studies 4407). See English 4400 for course description.

ENGLISH 4408--Studies in African Diaspora Literature, 1789 to 1890 (3).(same as Black Studies 4408). See English 4400 for course description.

ENGLISH 4409--Studies in African Diaspora Literature, 1890 to Present (3).(same as Black Studies 4407). See English 4400 for course description.

ENGLISH 4410--Major African Diaspora Writers (3).(same as Black Studies 4410). An intensive study of selected writers of African Diaspora literature focusing on texts originally in English. No more than six hours may be taken in the Major African Diaspora Writers series. Prerequisite: junior standing or instructor's consent.

ENGLISH 4417--Major African Diaspora Writers, 1603 to 1789 (3).(same as Black Studies 4417). See English 4410 for course description.

ENGLISH 4418--Major African Diaspora Writers, 1789-1890 (3).(same as Black Studies 4418). See English 4410 for course description.

ENGLISH 4419--Major African Diaspora Writers, 1890 to Present (3).(same as Black Studies 4419). See English 4410 for course description.

ENGLISH 4420--Africana Womanism (3).(same as Black Studies 4420). An intensive study of Africana Womanism, focusing on selected Africana women writers. Prerequisites: junior standing or instructor's consent. May be repeated to six hours with departmental consent.

ENGLISH 4480--Major African Diaspora Women Writers (3).(same as Women's and Gender Studies 4480 and Black Studies 4480). Study of selected Africana Diaspora women writers, focusing on texts originally in English. Repeatable with department's consent. Maximum of 6 hours for 4180 and 4480.

ENGLISH 4487--Major African Diaspora Women Writers, 1603 to 1789 (3).(same as Women's and Gender Studies 4487 and Black Studies 4487). See English 4480 for course

description.

ENGLISH 4488--Major African Diaspora Women Writers, 1789 to 1890 (3).(same as Women's and Gender Studies 4488 and Black Studies 4488). See English 4480 for course description.

ENGLISH 4489--Major African Diaspora Women Writers, 1890 to Present (3).(same as Women's and Gender Studies 4489 and Black Studies 4489). See English 4480 for course description.

ENGLISH 4490--Native Studies (3).In-depth study of topics in Native writing and representation, such as tribal intellectual histories, defined historical periods, or specific genres or media. Examples of course titles include Ojibwe Writing, Native Film and Video, and Contemporary Native Literature.

ENGLISH 4510--Creative Writing: Advanced Fiction (3).An intensive writing workshop in which student stories and related literary texts receive close reading and analysis. Prerequisite: ENGLISH 2510 or equivalent.

ENGLISH 4520--Creative Writing: Advanced Nonfiction Prose (3).An intensive writing workshop in which a student's creative nonfiction receives close reading and analysis. Prerequisite: ENGLISH 2520 or equivalent.

ENGLISH 4530--Creative Writing: Advanced Poetry (3).Poetry regarded as a mode of understanding. Poetic values related to other values. Practical consideration of verse techniques. Prerequisite: ENGLISH 2530 or equivalent.

ENGLISH 4560--Advanced Playwriting: Problems (3).(same as Theatre 4920). Advanced study of the writing process as applied to theatre, including theory and practice. Special playwriting problems and techniques. Prerequisite: ENGLISH 3560.

ENGLISH 4570--Adaptation of Literature for the Stage (3).(same as Theatre 4200). Explores adaptation principles and practices with literature not originally written for the stage. Identical to Theatre 4200. Graded on A/F basis only.

ENGLISH 4580--Adaptation of Literature for Film (3).(same as Film Studies 4935 and Theatre 4935). This upperdivision course will explore adaptation principles and practices with a variety of forms of literature that were not originally written for film.

ENGLISH 4600--Structure of American English (3).(same as Linguistics 4600). Introduction to English linguistics. Study of the grammar and pronunciation of contemporary English, with the major focus on syntax. Prerequisite: junior standing.

ENGLISH 4610--History of the English Language (3).(same as Linguistics 4610). Historical changes in the grammar and pronunciation of the English language from Old English to the present. Introduction to Indo-European origins of English. Prerequisite: junior standing.

ENGLISH 4620--Regional and Social Dialects of American English (3).(same as Linguistics 4620). The study of regional and social variation in pronunciation, vocabulary, and grammar of American English. Prerequisite: ENGLISH 4600 and ENGLISH 4610 or equivalent.

ENGLISH 4630--Phonology (3).(same as

Linguistics 4630). Survey of the sound patterns of English, with some comparison to other languages. Prerequisite: ENGLSH 4600 or another introductory course in linguistics or phonetics.

ENGLSH 4640--Syntax (3).(same as Linguistics 4640). Study of the properties of phrase-and sentence-level grammar, emphasizing English, with some comparison to other languages. Prerequisite: ENGLSH 4600 or another comparable linguistics course.

ENGLSH 4650--Principles of Teaching English as a Second Language (3).(same as Linguistics 4650). Linguistic and pedagogical principles of teaching English to speakers of other languages. Prerequisite: ENGLSH 4600 and ENGLSH 4610 or equivalent.

ENGLSH 4700--Special Themes in Folklore (3).(same as Anthropology 4150). Intensive study in a selected area of folklore: folk narrative, folk song, myth, proverb, etc., folklore of a particular group. May be repeated for a maximum of six hours with department's consent.

ENGLSH 4710--Themes in African Diaspora Folklore (3).(same as Anthropology 4160 and Black Studies 4710). Intensive study in a selected area of African Diaspora folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature; or the folklore of a particular group. ENGLSH 4700 and 4710 may be repeated for a maximum of six hours with instructor's consent. Prerequisite: junior standing.

ENGLSH 4770--Oral Tradition (3).(same as Classical Humanities 4770). Study of verbal art from living oral traditions (e.g., Native American and African American) and important literary works with roots in oral tradition (e.g., the Bible, the Iliad, the Odyssey, and Beowulf). Prerequisite: junior standing and instructor's consent.

ENGLSH 4780--Women's Folklore and Feminist Theory (3).(same as Women's and Gender Studies 4780). Examines folklore and artistic expression of women in relation to feminist theory and in multicultural contexts. Includes verbal genres (narrative/song) as well as material genres (quilting/arts). Prerequisite: junior standing or instructor's consent.

ENGLSH 4935--Adaptation of Literature for Film (3).(same as FILM S 4935). This upper-division course will explore adaptation principles and practices with a variety of forms of literature that were not originally written for film.

ENGLSH 4940--Internship in English (1-3). Students work in an agency or institution using their English-related skills for one to three credit hours. Prerequisite: junior standing, department's consent. Graded on an S/U basis only.

ENGLSH 4950--Internship in Publishing (3).Offers practical experience working with a literary or scholarly publication edited or sponsored by faculty members. Graduate students in English must take the course two semesters in order to count three hours toward the completion of their program. Prerequisite: instructor's consent.

ENGLSH 4955--Independent Research in English (1-3).Development of a carefully considered research project under close the supervision of a faculty member. Open to undergraduate students only. Prerequisites: junior

standing and departmental consent.

ENGLSH 4960--Special Readings in English (cr.arr.).Individual work with conferences adjusted to needs of student. Prerequisites: 4000-level course in area of proposed work and written consent of instructor. Restricted to senior English majors in their final semester.

ENGLSH 4970--Capstone Experience (3).For students in their last semester, this course focuses on a major project and the processes of selection, research, and writing leading to its completion. Includes a professional component (resume, cover letter). Prerequisite: English major with senior standing.

ENGLSH 4995--Senior Honors Thesis (3).Independent research under direction of faculty. Second course of two part Honors Sequence. Prerequisite: English 4996.

ENGLSH 4996--Honors Seminar in English (3).First of two major semester Honors sequence. Studies literary topic, critical approaches and advanced literary research methodology in preparation for Honors Senior Thesis. Prerequisite: 3.3 overall GPA and in major.

General Studies Program

Office of Special Degree Programs
College of Arts and Science
210 Switzler Hall
(573) 882-6060

The Bachelor of General Studies (BGS) is designed for students who cannot meet their educational objectives by pursuing a traditional degree from an existing program on campus. General Studies appeals to students looking for a flexible program that provides the opportunity to combine their multiple interests into a coherent degree. Students who pursue a General Studies degree typically have a high degree of motivation and independence.

The BGS requires 120 credit hours and the balance of requirements differs from traditional Arts and Science degree programs, particularly in regard to the major requirements. General Studies students are required to complete 45 credit hours in the major. General Studies students are not required to take 12-13 hours of foreign language courses for general education. Students divide their work among three areas of study, called components, and may select courses offered by any academic division or department at MU. At least one component must come from a department in the College of Arts and Science. In addition to the major program requirements, students must complete college and University graduation requirements including university general education. Students are required to meet their academic advisor and file a graduation plan once they have completed 55 credit hours of coursework.

Major Program Requirements

General Studies majors must maintain a minimum 2.0 GPA in all courses taken in each component, a 2.0 minimum cumulative GPA and a 2.0 minimum GPA in all courses taken in the final 30 credit hours.

Grades of D are not acceptable in program components.

A minimum of 30 credits in courses numbered 3000 or above is required.

A course with a science lab is required.

Students must complete 30 credit hours of course work while enrolled as General Studies students to graduate with a degree.

Within each component, the student must complete 15 credits, of which 6 are at the 3000-level or higher.

One component must come from a department in the College of Arts and Sciences.

18 hours from the 3 components must come from course work in the College of Arts and Science departments.

No more than 6 credits of independent study or internship may be included in any one component; total credits for such work is limited to 12.

Transfer students must include at least 6 credits at the 3000+ level taken at MU in each component.

If a transfer student has 9 credits of 3000+ level course work in two components, one component may be comprised solely

of courses taken at another institution.

Capstone requirement (to be completed during final 45 hours of course work)

There are several ways to complete the capstone experience in General Studies:

1. **Special Readings project.** With this option, the student completes an independent research project under the supervision of a faculty member. Most projects result in a 15-20 page research paper. The project allows the student to explore a specific area of interest and is designed to be an academic challenge. The department is open to creative, innovative approaches to learning. The supervising faculty member is responsible for grading the project. The student is responsible for locating a supervising faculty member.
2. **Service Learning project.** Students will engage in service activities, directly relevant to their areas of academic emphasis, in community not-for-profit agencies. At the same time as participants work in the community, they will research their agency and organization, undergo mock employment interviews, create a cover letter and resume based on the professional skills they have gained through their service, and reflect on careers and leadership in public service. The course will be submitted for Writing Intensive credit each semester. Restricted to Interdisciplinary, General and International Studies students.
3. **Internship.** Students work approximately 50 clock hours per credit at an agency, company or corporation of their choice. Grades are assigned on a pass-fail basis. For an internship to be approved as a capstone experience, it must help the student solidify and explore the areas of concentration. Internships must have prior approval from their advisor.
4. **Capstone course:** Students may have a specific course designated as a capstone course for the individual degree program. This can be a course designated by a department or a course that serves the student as a capstone course. The course must be upper level, and the course must be taken in the last 45 hours of course work as a major. A course taken previously cannot retroactively be counted as a capstone course. Approval for the course must be provided in advance of registration by the student's advisor.

**GENERAL STUDIES
COURSES**

G STUDY 3301--Topics in General Studies (cr.arr). Experimental and/or interdisciplinary. Subjects and earnable credit may vary from semester to semester.

GSTDY 4940--Internship in General Studies (1-6). Internship limited to students pursuing the Bachelor of General Studies degree. S/U graded only.

G STUDY 4950--Special Project in General Studies (1-6). With adviser's approval, student works with a faculty member on a major reading, research, or creative project, usually of interdisciplinary nature.

GSTDY 4960--Readings in General Studies (1-6). Independent readings with supervisory faculty member. Open only to General Studies majors. May be repeated to a maximum of six hours.

G STUDY 4970--Directed Readings in General Studies (1-6). Independent readings with supervisory faculty member; this course serves as the student's capstone experience. Open only to General Studies majors only.

G STUDY 4971--Internship in General Studies (1-6). Internship experience which serves as the student's capstone experience. Program advisor must approve internship. Graded on S/U basis only. Section 2 of this course will be designated for Service Learning Capstone experience.

Department of Geography

Joseph J. Hobbs, Chair

A. Schroeder
ADJUNCT PROFESSOR C. H. Davis, W.R. Elliot, R.B.
Jacobson

The Department of Geography has established the following goals for the Bachelor of Arts with a major in Geography:

- Teach students to think spatially and develop problem solving skills
- Provide an intellectual focus for students seeking a broadly based liberal arts education
- Acquaint students with past and present patterns of landscape development and instill concern for intelligent management of earth's biophysical resources
- Expose students to contemporary issues of geopolitical and international significance and their role in such problems
- Provide the skills and expertise necessary to master the application of geographic information technologies and analysis of spatial data
- Prepare motivated students for career development and graduate study

Five different emphasis areas allow students to further focus the undergraduate degree program on their own personal interests in geography.

1. Regional-cultural geography helps students develop a fuller sense of geographic analysis and better understanding of the human and physical characteristics of major regions of the world.
2. Physical-environmental systems emphasize the complex interactions between biophysical systems and human behavior in the areas of geomorphology and biogeography, as well as our role in managing applied environmental problems.
3. Urban-population geography includes the study of urban systems, the role of cities in regional development, and migration behavior.

4. Geographic information systems addresses the variety of technologies revolutionizing geographic analysis such as GIS, GPS, remote sensing, computer assisted cartography and spatial statistics.
5. General geography is designed for the student with broad interests in geography that overlap with other emphasis areas.

For students planning to end their formal education with the bachelor's degree, a geography major provides marketable skills and the broad perspectives on environment, society and international affairs that enable graduates to move beyond entry-level positions. Geography also provides a sound foundation for students who plan to enter graduate work in a variety of fields, from geography to business, land use planning, law and medicine. Although positions are not often designated with the title of geographer, geography graduates' employment has grown substantially in private enterprise and in all levels of government in recent years.

The Department offers BA and MA degrees with majors in geography as well as undergraduate and graduate certificates in Geographic Information Science. Two minors are also available.

Major Program Requirements - Geography

Students majoring in geography are required to take a total of 33 credits in geography. The geography courses consist of 21 core credits and at least 12 credits in one of the five geography emphasis areas. In addition, students must complete all degree, College of Arts and Sciences and University requirements including University general education.

Major core requirements	24
GEOG 1100: Regions and Nations of the World I.....	3
GEOG 1200: Regions and Nations of the World II.....	3
GEOG 2550: Cultural Geography.....	3
GEOG 2610: Intro to Physical Geography.....	3
GEOG 2840: Introduction to Mapping Science.....	3
GEOG 3840: Computer-Assisted Cartography.....	3
GEOG 4990: Senior Seminar in Geography.....	3
STAT 1200, 1300 or higher.....	3

Emphasis Areas

Students are required to complete one of the emphasis areas listed below for at least 12 credits.

Emphasis in Regional/Cultural Geography

This area focuses on both the spatial attributes of culture and the interaction between culture and environment. It is intended for prospective secondary school teachers, journalists and business and government workers. Students must take four of the following courses:

- GEOG 2120: United States and Canada
- GEOG 2130: Geography of Missouri
- GEOG 2210: Geography of Europe
- GEOG 2260: Geography of East Asia
- GEOG 2340: South America
- GEOG 2660: Environmental Geography
- GEOG 2780: World Political Geography
- GEOG 3140: Mexico, Central America and the Caribbean
- GEOG 3270: Geography of the Middle East
- GEOG 3290: Geography of Russia and Independent States of EURASIA

GEOG 3510: Historical Geography of North America

Emphasis in Physical/Environmental Geography

This area emphasizes the study of biophysical environmental processes, environmental change, environmental management, and human modification of the environment. It is intended for students interested in understanding the biophysical environment and the ways in which humans interact with it. Students must take four of the following courses:

- GEOG 1050: Introductory Meteorology
GEOG 2660: Environmental Geography
GEOG 3600: Climates of the World
GEOG 3610: Physical Geography of North America
GEOG 3630: Process Geomorphology
GEOG 4620: Biogeography
GEOG 4630: Fluvial Geomorphology
GEOG 4810: Landscape Ecology & GIS Analysis

Emphasis in Urban/Population Systems

This area focuses on topics such as competitive vs. generative growth within urban systems, urban travel behavior, the role of cities in regional development, international commodity trade flow, the fiscal dilemmas of cities and migration behavior. It prepares students for career opportunities in fields such as transportation planning, regional development, urban environmental issues and management. Students must take four of the following courses:

- GEOG 2710: Economic Geography
GEOG 2720: Urban Geography
GEOG 2780: World Political Geography
GEOG 3740: Geography and Planning
GEOG 4710: Spatial Analysis in Geography
GEOG 4840: Geographic Information Systems I

Emphasis in Geographic Information Systems

This area allows students to develop technical skills central to the discipline of geography and spatial analysis, acquiring skills in the graphical display of geographical data and the ability to produce or analyse such data. Students must take four of the following courses:

- GEOG 4710: Spatial Analysis in Geography
GEOG 4810: Landscape Ecology & GIS Analysis I
GEOG 4830: Remote Sensing
GEOG 4840: Geographical Information Systems I
GEOG 4940: Geographical Information Systems II

Emphasis in General Geography

This area is designed for students with a broad interest in geographical studies. Due to the general nature of this emphasis area, students must develop in consultation with their advisor a personal plan of study outlining specific goals and course requirements. Four geography courses are required.

Departmental Honors

The geography honors program requires independent research during the senior year, usually under GEOG 4996H or 4997H. Consult the geography honors director for further information.

Minor Program Requirements

Students may earn both the minor in geography and minor in geographic information systems if the course work is unique

for each minor. Students earning a major in geography may not earn the minor in geographic information systems.

Minor in Geography

Fifteen credits are required for a minor in geography, 9 of them numbered 2000 and above.

Minor in Geographic Information Science

Fifteen credits are required for the minor in geographic information science, and must include GEOG 2840 and 4840. Nine hours of elective courses must be selected from the following list: Geog 4710: Spatial Analysis in Geography, Geog 4810: Landscape Ecology & GIS Analysis I, Geog 3840: Computer-Assisted Cartography, Geog 4830: Remote Sensing, Geog 4860: Advanced Remote Sensing, and Geog 4940: GIS II. Students may earn both the minor in geography and minor in geographic information science provided that the course work is unique for each minor. GEOG 4860 and 4940 can be taken as part of the GIS minor with the consent of the advisor.

Sample Eight-Semester Program

Bachelor of Arts with a major in Geography, emphasis area in GIS (one of the five choices)

GEOGRAPHY COURSES

GEOG 1050--Introductory Meteorology (3). (same as Atmospheric Science 1050). Physical processes of atmosphere in relation to day-to-day changes in weather.

GEOG 1100--Regions and Nations of the World I (3). Introductory analysis for general education. Regional character, spatial relationships, major problems of Europe, North America (United States and Canada) and Latin America. Organized around basic concepts in field of geography.

GEOG 1100H--Regions and Nations of the World I - Honors (3). Introductory analysis for general education. Regional character, spatial relationships, major problems of Europe, North America (United States and Canada) and Latin America. Organized around basic concepts in field of geography. Honors eligibility required.

GEOG 1200--Regions and Nations of the World II (3). Introductory analysis for general education. Regional character, spatial relationships, problems of environment and development of the former Soviet Union, Pacific World, South and East Asia, Africa and Middle East. Organized around basic concepts in the field of geography. May be taken independently of Geography 1100.

GEOG 1205H--Regions and Nations General Honors (3). Honors eligibility required.

GEOG 1840--Mapping the Environment (3). Introduction to methods of map interpretation and geographic communication through maps. Primary emphasis is on the development of skills in map analysis, with laboratory work and possible field analysis.

GEOG 2120--United States and Canada (3). Intensive examination of selected areas and distributions. Regional systems, problems and planning. Prerequisite: sophomore standing.

GEOG 2130--Geography of Missouri (3). Physical, human, economic, and political geography of Missouri; regions of the state; geography applied to current state issues. Prerequisite: GEOG 1100.

GEOG 2210--Geography of Europe (3). Survey of Europe's lands and peoples; emphasis on historical areal relationships as reflected in Europe's changing economic and political organization. Prerequisite: sophomore standing.

GEOG 2260--Geography of East Asia (3). Cultural, physical and economic geography of China, Japan, and Korea, with emphasis on China. Landscape analysis, determination of regional identities, and study of political forces evident in the development of the contemporary scene are stressed. Prerequisite: GEOG 1200.

GEOG 2270--Geography of Asia (3) (same as South Asian Studies 2270). An introductory survey of the geography of Asia from India through Southeast Asia to China and Japan, emphasizing factors contributing to cultural similarities and variations, conflicts of interest, and current development.

GEOG 2340--South America (3). Physical environment and culture in the regional development of South America. Prerequisite: one course in Geography or instructor's consent.

GEOG 2450--Themes in the Geography of Africa South of the Sahara (3). Major concepts of African geography in current and

historical perspective. Case studies of major African countries.

GEOG 2550--Introduction to the Humanized Earth (3). Examines human culture as a geographical element; the power of culture and human institutions in human-environmental interaction and the creation of agriculture, folk culture, popular culture, cities, and a broad range of cultural landscapes. Prerequisite: GEOG 1100 or 1200.

GEOG 2610--Introduction to Physical Geography (3). Examination of the interacting natural systems that comprise the Earth's physical environment, including the atmosphere, biosphere, and landforms. Focus on relating fundamental physical, chemical and ecological processes to the global geographics patterns they produce.

GEOG 2660--Environmental Geography (3). Historical perspectives on the human agency in transforming the earth, with emphasis on international environmental problems. Topics include basic biogeography; environmental impacts of population growth, underdevelopment and overdevelopment; and new approaches to management of global resources.

GEOG 2710--Economic Geography (3). Geographical location and organization of world's major economic activities. Emphasizes agricultural and industrial patterns, commodity flows, transport networks, geographical principles of market and industrial location, internal spatial organization of cities, land-use models, geographic aspects of economics growth. Prerequisites: GEOG 1100 or 1200 or sophomore standing.

GEOG 2720--Urban Geography (3). Study of cities: origin, development, distribution; social, economic, and demographic significance. Consideration of theories of structure, urban hierarchies, and land use planning. Prerequisites: GEOG 1100, 1200 and two other Geography courses, or instructor's consent.

GEOG 2780--World Political Geography: Patterns and Processes (3) (same as Peace Studies 2780). Geographic factors in the development of political boundaries traditions, and societal perspectives. Spatial patterns and geopolitical processes are explored in selected regions of the world. Prerequisites: GEOG 1100 or 1200 or sophomore standing.

GEOG 2840--Introduction to Mapping Science (3). Introduction to basic map concepts, reinforced through lab exercises, lecture material and field work.

GEOG 2904--Topics in Geography-Social Science (1-3). Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisites: sophomore standing, departmental consent for repetition.

GEOG 3140--Mexico, Central America, and the Caribbean (3). Physical environment and culture in the regional development of Mexico, Central America, and the Caribbean. Prerequisite: one course in Geography or instructor's consent.

GEOG 3260--Southeast Asia (3) (same as South Asia Studies 3260). Physical, cultural, historical and regional geography of Southeast Asia, with an introduction to East Asian geography. Emphasizes the problems of tradition and development.

GEOG 3270--Geography of the Middle East (3). Cultural, physical and historical geography of Middle East, with emphasis on cultural adaptations to environments and conflicts over the resources.

GEOG 3280--Geography of South Asia (3). (same as South Asia Studies 3280). Topical and regional analysis of India, Pakistan, Sri Lanka. Historical development of distinctive cultural regions. Relations with neighboring areas. Impact of Westernization on economic activities, settlements, population.

GEOG 3290--Geography of Russia and the Newly Independent State of Eurasia (3). Geographic analysis of social, economic and political issues confronting Russia and the NIS, including environmental problems, economic interdependence and prospects for regional economic development, population change and migration, inter-ethnic relations and ethno-territorial conflict.

GEOG 3385--Special Problems in Geography (1-3). Independent investigation leading to a paper or project. May be repeated to a maximum of 6 hours. Prerequisite: instructor's consent.

GEOG 3450--Geography of Africa (3). Major concepts of African geography in current and historical perspective.

GEOG 3510--Historical Geography of North America (3). Analysis of selected geographical patterns and themes in the continent's past. Focus is explicitly geographical, stressing extensive use of maps and recent scholarly work by historical geographers. Prerequisites: junior standing, or instructor's consent.

GEOG 3530--Global Politics of HIV/AIDS (3) (same as Women's and Gender Studies 3530).

Examines AIDS science, sociopolitical causes of the epidemic, global AIDS policy and transnational AIDS activism.

GEOG 3540--Geographies of Sexualities (3). (Same as WGST 3540) This class will explore the relationship of sexuality and space. The class will focus on the ways that sexuality creates particular spaces, and the ways that sexuality and space shape one another in the midst of nation, gender, religion, race, class, and generation. Sophomore standing required.

GEOG 3560--Native American Geographies (3). A survey of the Native American geographies in the United States. Historical and contemporary topics are covered employing cross-cultural perspectives including some philosophical views of the Earth and society, sense of place, memory, sacred land, colonialism and GIS representations, and natural resources.

GEOG 3600--Climates of the World (3) (same as Atmospheric Science 3600). A study of the world distribution of climates based on "cause and effect" relationships. Special attention is given to the impacts of climate on humanity. Prerequisites: GEOG 1050 or equivalent or graduate standing.

GEOG 3610--Physical Geography of the United States (3). Study of natural regions of the United States by integrating topics from landforms, geology, climate, soils, vegetation, resources, and land use. Prerequisites: GEOG 2610.

GEOG 3630--Process Geomorphology (3). Systematic study of landforms and the processes which govern them. Provides a foundation for the theoretical, technical, and practical understanding of environmental systems. Prerequisites: GEOG 2610 and junior standing or instructor's consent.

GEOG 3740--Geography and Planning (1-3). Emphasis on geographic techniques for gathering and generating environmental information for planners. Principles of land use planning will be applied to selected regions. Prerequisites: GEOG 2840 and instructor's consent.

GEOG 3760--Geography of the World's Religions (3).(same as Religious Studies 3760). Explores the significance of place in the origin, diffusion, distribution and practice of religions, emphasizing imprints of religion on the cultural landscape and connections between culture, politics, economics, and religion. Prerequisite: 1000/2000 level Geography course; junior standing or instructor's consent.

GEOG 3840--Computer-Assisted Cartography (3).Principles of computer-assisted cartography. Automated cartographic display. "Hands on" experience with computer-mapping software and hardware systems. Role of computers in map design. Digital encoding of geographic data. Prerequisite: GEOG 2840.

GEOG 3904--Topics in Geography - Social Science (cr.arr.).Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated up to 6 hours credit. Prerequisites: sophomore standing; departmental consent for repetition.

GEOG 4390--Special Readings in Geography (1-3).Independent readings selected in consultation with supervisory faculty member. May be repeated to a maximum of 6 hours. Prerequisite: instructor's consent and independent study contract.

GEOG 4520--Meteorology of the Biosphere (3).(same as Atmospheric Science 4520). Energy balance and mass transfer in the Microenvironment of plants and animals. Effects of weather events on plants and animal production discussed. Prerequisites: MATH 1400 or equivalent; one year of college physics; or instructor's consent.

GEOG 4550--Selected Themes in Cultural Geography (3).Case studies in the patterns and processes of human-environmental interactions. Study of the cultural forces responsible for the continual transformation of the earth's cultural landscapes.

GEOG 4620--Biogeography (3).Analysis of the patterns and processes of plant distribution in the contemporary landscape, stressing environmental influences and vegetation dynamics, particularly as they relate to North American vegetation. Prerequisite: GEOG 2610 and junior standing, or instructor's consent.

GEOG 4630--Fluvial Geomorphology (3).Systematic study of river mechanics, stream-channel form, river management and restoration. Provides a theoretical and practical understanding of stream systems. Prerequisite: GEOG 2610 and 3630, or instructor's consent.

GEOG 4710--Spatial Analysis in Geography (3).Application of statistical methods to geographic research. Prepares students to utilize advanced methodologies and models in spatial

analysis. Includes computer analysis of geographical data. Prerequisite: MATH 1100/1120. Math Reasoning Proficiency Course.

GEOG 4720--Seminar in Geography Education (3).Study and research on fundamental themes in geography. Integration of these themes into regional and systematic approaches to the teaching of geography. Enrollment is restricted to students pursuing or considering careers in teaching. Prerequisites: junior standing and instructor's consent.

GEOG 4770--Migration and Immigration (3).Explores demographic, economic, and social issues surrounding immigration and migration. The course focuses on the global labor migration system, immigration to the United States, and internal migration within the US, as well as the linkages between these systems.

GEOG 4780--Selected Themes in Political Geography (3).Study of basic writing, dominant geographers, case studies, bibliographies and development of research methods.

GEOG 4810--Landscape Ecology and GIS Analysis I (3).(same as Natural Resources 4385). Examination of the landscape-scale approach to biodiversity, ecosystem dynamics, and habitat management. Particular emphasis on the use of Geographic Information Systems to analyze the spatial dimension of ecological patterns and processes. Prerequisite: GEOG 4840, or instructor's consent.

GEOG 4830--Remote Sensing (3).Introduction to the principles of remote sensing of the environment. Digital imagery from spacecraft, conventional and high-altitude aerial photography, thermal imaging, and microwave remote sensing. Prerequisite: GEOG 2840 and instructor's consent.

GEOG 4840--Geographic Information Systems I (3).Introduces concepts of computer analysis of geographic data and emphasizes the techniques for handling geographic data. Application of computer-based GIS systems in coursework. Prerequisite: GEOG 2840.

GEOG 4850--Transportation Geography (3).(Same as CH_ENG 4850) Introduction to fundamental concepts and modes of analysis in transportation geography. Focus on descriptive, explanatory, as well as normative approaches. Topics reviewed include spatial organization, transportation economics, spatial interaction, network analysis, location/allocation, and urban transportation planning.

GEOG 4860--Advanced Remote Sensing (3).Advanced remote sensing to provide digital image processing techniques for satellite and airborne imagery; emphasis on spatial/spectral analysis, image classification and land use/land cover change detection. Class project heavily involved. Prerequisite: GEOG 4830.

GEOG 4904--Topics in Geography-Social Science (cr.arr.).Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisites: junior standing and instructor's consent; departmental consent for repetition.

GEOG 4940--Geographic Information Systems II (3).Advanced study and application of Geographic Information Systems technology to natural resources planning. Focus on individual research projects. Prerequisite: GEOG 4840 or instructor's consent.

GEOG 4945--Internship in Applied Geography and Cartography (3).Regularized individual work experience with local, regional, state or national agencies, with guidance and readings supplied by faculty coordinator. May repeat to maximum of 6 hours. Prerequisites: upper-level standing in Geography, cartographic training, and departmental consent.

GEOG 4990--Senior Seminar in Geography (3).A seminar in selected themes in Geography. Class will focus on research, writing, presenting, and discussing themes in contemporary geography. Required of all majors prior to graduation. Prerequisite: 5 courses in geography or instructor's consent.

GEOG 4996H--Honors in Geography (3).Special work for Honors candidates in geography. Honors eligibility required

GEOG 4997H--Honors in Geography (3).Special work for Honors candidates in geography. Honors eligibility required.

Department of Geological Sciences

K. L. Shelton, Chair
 College of Arts and Science
 101 Geological Sciences Building
 (573) 882-1004
 bennettka@missouri.edu

FACULTY

PROFESSOR M. Liu, P. I. Nabelek, K. L. Shelton,
 M. B. Underwood, C. M. Wicks,
ASSOCIATE PROFESSOR R. L. Bauer, C. A. Kelley,
 K. G. MacLeod, E. A. Sandvol, A. G. Whittington
ASSISTANT PROFESSOR M. Appold, M. H. Cormier,
 F. G. Gomez, K. Rogers, M. D. Schulte,

The Department of Geological Sciences offers two undergraduate degree programs, a Bachelor of Arts with a major in Environmental Geology and a Bachelor of Science with major in Geological Sciences. The BA is geared to those students interested in environmental concerns, while the BS is geared toward the traditional fields of geology. Both degrees provide a rigorous background in earth sciences. In addition, students majoring in other departments can minor in geological sciences.

Major Program Requirements— Environmental Geology (BA)

Students majoring in environmental geology and earning a Bachelor of Arts degree will be prepared to seek positions in surficial or environmental geology as registered geologists. In addition to the major core requirements, students must complete all university graduation requirements including university general education, as well as all degree and college or school requirements.

Major core requirements.....35

GEOL 1200: Environmental Geology or	
GEOL 1100: Principles of Geology	4
GEOL 2350: Historical Geology	3
GEOL 2360: Historical Geology Laboratory	1
GEOL 2400: Surficial Earth Processes and Products	4
GEOL 3110: Geology of Missouri	3
GEOL 3250: Mineralogy.....	5
GEOL 3800: Sedimentology	3
GEOL 4100: Hydrogeology	3
GEOL 4991: Capstone in Environmental Geology.....	3
A 3 hour capstone must be completed unless a student also completes a senior thesis. In that case the capstone and senior thesis hours must equal 3.	
Additional geological sciences course at or above 2000 level	3
Additional geological sciences course chosen from the 4000 level (including senior thesis)	3

Related courses..... 19-21

CHEM 1320: General Chemistry II	3
CHEM 1330: General Chemistry III.....	3
PHYSICS 1210: College Physics	4

MATH 1400: Calculus for Social and Natural Sciences I ...	3
MATH 2100: Calculus for Social and Natural Sciences II OR	
STAT 2530: Statistical Methods in Natural Resources	3
BIO SC 1010 and 1020: General Principles and Concepts of Biology and lab (5) OR BIO SCI 1060: Basic Environmental Studies (3) OR	
BIO SC 1100: Introductory Zoology with Laboratory (5) OR	
BIO SC 1200: General Botany (5).....	3-5

Major Program Requirements - Geological Sciences (BS)

Majoring in geological sciences and earning a Bachelor of Science degree prepares the student for graduate work and a career as a professional geologist in industry, research or academia. The curriculum provides flexibility for students who seek to focus on a specific subdiscipline in the geosciences. Students interested in geophysics, for example, should use their electives to expand their background in math and to develop a broad knowledge of geology and geophysics. In addition, students must meet all degree, college, and university graduation requirements including university general education.

Major core requirements..... 52-53

GEOL 1100: Principles of Geology or	
GEOL 1200: Environmental Geology	4
GEOL 2350: Historical Geology	3
GEOL 2360: Historical Geology Laboratory.....	1
GEOL 2400: Surficial Earth Processes and Products or	
GEOL 2110: Introduction to Soil Science with Lab	4-5
GEOL 3250: Mineralogy	5
GEOL 3300: Introduction to Geochemistry.....	3
GEOL 3800: Sedimentology	3
GEOL 3900: Igneous and Metamorphic Petrology.....	4
GEOL 4150: Structural Geology.....	4
GEOL 4650: Plate Tectonics	3
GEOL 4992: Field Course.....	6
Additional geological sciences course at or above 2000 level (not GEOL 3200).....	3
Three additional geological sciences courses at 4000 level, cannot be fulfilled by problems.....	9

Related courses..... 24-29

Professional Track	
CHEM 1320: General Chemistry II	3
CHEM 1330: General Chemistry III	3
PHYSICS 2750: University Physics I	5

PHYSICS 1210: College Physics I.....	4
PHYSICS 1220: College Physics II	4
MATH 1500: Analytical Geometry and Calculus I.....	5
MATH 1700: Calculus II.....	5

Departmental Honors

Departmental honors can be achieved by students who maintain a cumulative GPA of 3.0, departmental GPA of 3.2, and who complete a senior thesis.

Dual Degrees

The Department of Geological Sciences offers dual degree programs with the Department of Soil, Environmental and Atmospheric Science in their emphasis area of Environmental Soil Science and with the Department of Civil and Environmental Engineering. For more information, contact an advisor in the department.

Minor in Geological Sciences

A minor in geological sciences consists of 15 credits in the geological sciences with 6 or more at the 2000-level or above. All courses must be taken for a letter grade, and a grade of C- or better must be earned in each course. The courses must be selected in consultation with an advisor in the department.

Sample Eight-Semester Program

Bachelor of Science with a Major in Geological Science

Fall I

GEOL 1100 OR 1200.....	4

GEOLGY COURSES

GEOL 1050--Planet Earth (3).An introduction to Earth Science. Topics include: evidence for continental drift and plate tectonics, causes and prediction of natural hazards, the scale of geological time.

GEOL 1100--Principles of Geology with Laboratory (4).Three lectures, 2-hours lab. Earth processes and products and their impact on human needs and the environment. One field trip.

GEOL 1100H--Principles of Geology with Laboratory - Honors (4).Three lectures, 2-hours lab. Earth processes and products and their impact on human needs and the environment. One field trip. Honors eligibility required.

GEOL 1200--Environmental Geology with Laboratory (4).The interaction between geologic processes and human society. Topics include mineral, water, and energy resources, volcanic hazards, earthquakes, landslides, floods, coastal erosion, pollution problems and environmental management.

GEOL 1250--The World's Oceans (3).An interdisciplinary introduction to oceanography. Topics include: geologic evolution of ocean basins, properties of seawater, ocean circulation (waves, tides, and currents), marine ecosystems, instability of beaches and coastlines, coastal development and engineering.

GEOL 1400--Themes in Geology (1).5-week course organized around a central theme or topic, up to 3 different sections can be taken for credit.

GEOL 2100--Independent Study in Geology (1-3).Directed Library research in geological topics, under the supervision of faculty sponsor. May be repeated for a maximum of 3 hours credit. Prerequisite: instructor's consent.

GEOL 2110--Introduction to Soil Science with Laboratory (5).(same as Soil Science 2107). Introduction to Soil Science with emphasis placed on physical, biological, and chemical properties and applications to land use, plant growth, and environmental problems with laboratory application of these concepts. Prerequisite: CHEM 1320.

GEOL 2120H--Faults and Earthquakes: Past, Present, and Future (3).Seminar in science and societal ramifications of earthquakes. Geologic background includes causes, behavior, and distribution of faults. Student-led discussions cover historical disasters, economic, political, psychological, and cultural perspectives. Prerequisite: ENGLISH 1000. Honors eligibility required.

GEOL 2150--The Age of the Dinosaurs (3).Study of the evolution of dinosaurs during the Mesozoic Era. New information on dinosaur life habits, food resources, dispersal by plate tectonics, and theories of extinction will be covered. Prerequisite: 1000-level science course.

GEOL 2160H--Volcanoes and the Human Environment - Honors (3).(same as Honors 2450H). This course gives students an understanding of how volcanoes work, how they are studied, and how they have impacted human cultures. Students will gain appreciation of volcanology as a broad scientific discipline within geology and the role that science plays in public policy. Honors eligibility required. Graded on A/F basis only.

GEOL 2200--Oceanography (3).Topics include: history and methods of marine research, properties of seawater, ocean circulation, biological productivity and zonation, origin and classification of marine sediments, character of major coastal and open-ocean environments, economic resources and environmental hazards. Prerequisite: MATH 1100/1120. Math Reasoning Proficiency Course.

GEOL 2220H--Honors Seminar: Headline Topics in the Geological Science (3).Seminar organized around a central theme that is the focus of intense ongoing research and public debate. Prerequisite: ENGLISH 1000. Honors eligibility required.

GEOL 2300--Earth Systems and Global Change (3).Study of the earth as a whole, taking into account the many interwoven components of the geosphere, hydrosphere, atmosphere and biosphere. Prerequisite: 1000-level Science course.

GEOL 2350--Historical Geology (3).Summary of principles and techniques used in reconstructing Earth's history. Survey of major events that have affected Earth and its inhabitants. Review of geologic history of North America. Prerequisites: GEOL 1100 or 1200 and ENGLISH 1000.

GEOL 2360--Historical Geology Laboratory (1).A laboratory course designed to improve understanding of Earth History by examination of maps and mineral, rock, sediment and fossil samples. Prerequisites: GEOL 1100 or 1200, Co-enrollment in 2350.

GEOL 2400--Surficial Earth Processes and Products with Laboratory (4).Semiquantitative analysis of geologic processes that shape the earth's surface. Includes topics in sedimentation and geomorphology. Prerequisites: GEOL 1100 OR 1200 and MATH 1100/1120.

GEOL 2450--Global Water Cycle (3).Study of environmental geochemical factors controlling the composition of natural waters, and sources of water's constituents (natural or human-produced). Prerequisites: GEOL 1100 or 1200 and MATH 1100/1120. Math Reasoning Proficiency Course.

GEOL 2500--Regional Geology Field Trip (3).Field based study of a particular geologic region, including classroom preparation prior to the field trip. The trip will last 7-10 days, either during Spring Break or immediately after finals week. Prerequisite: GEOL 1100 or 1200. May be repeated for credit.

GEOL 2600--Mineral and Energy Resources of the Earth (3).This course examines the geology of Earth's major mineral and energy resources--their origin, distribution, and characteristics--and societal implications of their use and abundance. Major topics: fossil fuels, nuclear energy, base & precious metals, non-metallic minerals, water. Prerequisite: GEOL 1100 or 1200.

GEOL 3085--Problems in Geological Sciences (1-5).Prerequisite: instructor's consent.

GEOL 3110--Geology of Missouri (3).The physical, historical, and environmental geology of Missouri are described, discussed and interpreted. Prerequisites: ENGLISH 1000 and either GEOL 1100 or GEOL 1200. Spring Semester.

GEOL 3115--Geology of Missouri Laboratory (1).A field based and laboratory based

course that uses standard geological techniques to interpret the rock record of Boone County and Missouri. Corequisite: GEOL 3110.

GEOL 3200--Rocks & Rock-Forming Mineral: Identification, Occurrence & Origin (3).Introduction to the classification, occurrence, and origin of rocks and rock-forming minerals. Prerequisites: GEOL 1100 or 1200 and CHEM 1310.

GEOL 3210--Rocks and Rock-Forming Minerals Laboratory (1).Identification of rock-forming minerals and rocks in hand specimen by their physical properties. Corequisite: GEOL 3200.

GEOL 3250--Mineralogy (5).Introduction to crystallography, crystal chemistry and crystal structures. Systematic study of mineral groups. Includes identification of minerals by physical, chemical and optical properties. Prerequisite: CHEM 1310.

GEOL 3300--Introduction to Geochemistry (3).Fundamentals of chemistry as applied to geology. Includes phase diagrams, thermodynamics, redox chemistry, aqueous chemistry, stable and radiogenic isotopes. Computer-based homework problems (satisfies computing requirement for Geology majors). Prerequisites: CHEM 1330 (may be co-enrolled), MATH 1400 or 1500, and GEOL 1100 or 1200, or instructor's consent.

GEOL 3800--Sedimentology with Lab (4).Mechanics of sediment transport by fluid flow and gravity flow, origins of stratification and sedimentary structures, facies characteristics depositional environments. Prerequisite: GEOL 2350 and 2400 and either GEOL 3250 or 3200 and 3210.

GEOL 4002--Topics in Geological Sciences-Biological/Physical/Mathematics (cr. arr.).Organized study of selected topics. Subjects and earnable credit may vary. May be repeated with departmental consent. Prerequisite: instructor's consent.

GEOL 4100--Groundwater Hydrology (3).Analysis of groundwater occurrence, flow, recovery, and solute transport within shallow levels of the Earth's crust. Prerequisites: GEOL 1100 or 1200, PHYSICS 1210, MATH 1400 or 1500.

GEOL 4110--Karst Hydrology (3).The hydrology of karst terrains is taught from the perspective of integrated drainage basins. Discussion addresses the origin and hydrogeology of karst aquifers and the biology of the animals that live in karstic aquifers. Prerequisite: instructor's consent.

GEOL 4130--Groundwater Modeling (3).Use of leading groundwater flow and contamination modeling software. Theory of groundwater flow, solute transport, and selected numerical solution techniques. Applications to water resource, environmental, and geological problems. Prerequisite: GEOL 4100 or equivalent.

GEOL 4150--Structural Geology (4).The mechanical behavior of earth materials. Analysis of the geometry and mechanics of faults, fractures, and folds. Laboratory includes problems on stresses and strains associated with deformation, geometric analysis of deformation structures, and interpretation of geologic maps. Prerequisites: GEOL 1100 or 1200 and

MATH 1500 or 1400.

GEOL 4180--Solar System Science (3).(same as Physics and Astronomy 4180). Investigates physical states, interior structures and comparative geology of solar systems bodies: planets, moons, asteroids, comets, sun. Solar system formation and evolution. Prerequisites: MATH 1700 and PHYSICS 1220 or 2760 or instructor's consent.

GEOL 4200--Economic Geology with Laboratory (4).Geochemistry of ore deposits. Introduction to types of mineral deposits, genesis of ore, and current areas of research. Laboratory emphasizes hand-specimen and polished-section studies of a wide variety of ore deposit types. Prerequisites: GEOL 3900.

GEOL 4210--Marine Geology (3).Comprehensive examination of the geology of the oceans. Topics includes techniques of data collection and interpretation, physical oceanography, origin of marine sediments, marine tectonics, and ocean history. Prerequisites: GEOL 3800 CHEM 1330 and PHYSICS 1220.

GEOL 4300--Introduction to Low-Temperature Geochemistry (3).Introduction to the chemical alteration of rock-forming minerals in weathering environments and to factors controlling the chemical composition of subsurface water. Prerequisite: GEOL 3300 or instructor's consent.

GEOL 4318--ENVIRONMENTAL SOIL CHEMISTRY (3).(same as Soils and Environmental Science 4318). Study of chemical constituents and processes occurring in soils. Topics include soil minerals and weathering processes, organic matter, solution chemistry, oxidation-reduction reactions and adsorption processes. Prerequisites: SOIL 2100 or GEOL 2400, CHEM 1320 and 1330. Junior standing or instructor's consent.

GEOL 4400--Geomicrobiology and Microbial Biogeochemistry (3).Roles of microbes in a variety of geological settings through time. Microbial roles in degradation of organic pollutants and transformation of toxic metals and radionuclides in contaminated environments. Prerequisite: GEOL 3300 or instructor's consent.

GEOL 4500--Organic Geochemistry (3).Topics include chemistry of petroleum-forming reactions and their kinetic parameters; use of organic-chemical criteria in source-rock evaluation; carbon isotope fractionation in organic precursors of biological molecules; early history of earth's atmosphere. Prerequisite: instructor's consent.

GEOL 4550--Introduction to Paleontology with Laboratory (4).Study of the morphology, paleontology, patterns of evolution, and causes of extinction in geologically important groups of invertebrate and vertebrate fossils. Lab concentrates on identification of biostratigraphically important fossils (mostly invertebrates). Several half-day field trips. Prerequisites: GEOL 1100 or 1200.

GEOL 4650--Plate Tectonics (3).Formation, evolution, and structure of the earth. Rules, causes, and implications of plate tectonics with emphasis on present-day features. Prerequisites: GEOL 3250, 4150 or instructor's consent.

GEOL 4680--Neotectonics and Earthquake Geology (3).Introduction to techniques and

concepts of active crustal deformation from the geological and geodetic perspectives. Topics include tectonic geomorphology, paleoseismology, Quaternary dating, tectonic geodesy, numerical models of faults, and earthquake hazard assessment. Prerequisites: GEOL 4650 or 4150 and instructor's consent.

GEOL 4700--Theoretical Geochemistry (3).Introduction to theoretical concepts in low and high temperature geochemistry. Topics include thermodynamics of fluids, gases and solids in geological materials, phase diagrams, equilibrium constants, electrolyte theory, oxidation-reduction reactions. Prerequisites: GEOL 3250, CHEM 1330 and MATH 1700.

GEOL 4800--Introduction to Geophysics (3).Introduction to the fundamentals of geophysical methods and their applications in geology, environmental studies, and exploration. Topics include seismic, gravity, magnetic, and electric methods. Prerequisite: PHYSICS 1210 or 2750 and MATH 1700.

GEOL 4900--Igneous and Metamorphic Petrology with Laboratory (4).Introduction to igneous and metamorphic rock associations and rock-forming processes. Emphasis on understanding the evolution of the Earth in view of igneous and metamorphic rock petrogenesis. Prerequisites: GEOL 3250 and GEOL 3300.

GEOL 4950--Senior Thesis (1-3).Research conducted in an area of the Geological Sciences under the auspices of a member of the faculty. Under normal circumstances, this research should be completed over two semesters. May be repeated for a maximum of 3 hours credit.

GEOL 4990--Communicating in the Earth Sciences (3).Synthesis of Geology curriculum through study of classic Earth Science papers. Emphasis will be given to critical analysis of scientific papers, data interpretation, science writing and oral presentations. Prerequisites: GEOL 3800 and senior standing or permission or instructor are required.

GEOL 4991--Capstone in Environmental Geology (1-3).Readings and discussions in selected areas of environmental geology. Subject depends on instructor. Restricted to Environmental Geology students. 3 credit hour Capstone must be completed unless student completes a Senior Thesis. In that case, Capstone + Senior Thesis credit hours must equal 3.

GEOL 4992--Field Course (6).Field study of sedimentary, igneous and metamorphic rocks. Facies analysis of sedimentary rocks, mapping of folded and faulted sedimentary strata and fabric analysis of an igneous-metamorphic terrane. Excursion to Yellowstone and Grand Teton National Parks. Prerequisite: GEOL 2350, 4150, and 3800.

Department of German and Russian Studies

Carsten Strathausen, Chair
 College of Arts and Science
 451 Strickland Hall
 (573) 882-4328
 grs@missouri.edu

FACULTY

PROFESSOR G. Barabtarlo, R. F. Cook
ASSOCIATE PROFESSOR S. Engelstein, S. Ireton T. Langen, B. Prager, C. Strathausen,
ASSISTANT PROFESSOR K. Kopp, S. Franzel
ASSISTANT TEACHING PROFESSOR M. Fischer, N. Monnier
LECTURER M. McKinstry, O. Schmidt, M. Volz
ASSISTANT TEACHING PROFESSOR M. Holman

The Department of German and Russian Studies offers courses in German and Russian language, literature, film and civilization. It also offers instruction in Arabic, Chinese, Japanese, Hebrew and Korean. Some courses, such as civilization, culture, literature in translation and film courses, do not require knowledge of a foreign language.

The department offers the Bachelor of Arts with majors in German and in Russian, and the Master of Arts in German and in Russian and Slavonic Studies. The department also offers minors in German and in Russian.

Major Program Requirements - German

The major in German consists of 27 credits in German beyond GERM 2100. The German faculty strongly encourages all majors to spend at least one semester studying abroad at a German university. Equivalents to all the required courses for the major are available through study abroad. In addition, students must meet all degree, college and university graduation requirements including university general education.

Major core requirements (beyond the A&S language requirement)27

The following courses or their equivalents must be included:

GERMAN 2260: Intermediate German II: Language & Culture.....	3
GERMAN 3160: German Conversation and Composition OR	
GERMAN 3190.....	3
GERMAN 3230: Intro to German Literature.....	3
GERMAN 4230: Enlightenment Revolution OR	
GERMAN 4240: Modernism & Modernity.....	3
GERMAN 4980: German Capstone Seminar.....	3
One 4000-level literature course.....	3
GERMAN 2310 or 2320 (Writing-Intensive German civilization courses).....	3

Electives6
 Elective courses and equivalents to replace the required courses above should be selected in consultation with the advisor.

Departmental Honors

Departmental honors are available for students majoring in German with a minimum 3.3 GPA. At least two literature courses must be taken at the 4000-level, with no grades below B. The equivalent of one of the courses may be completed in study abroad. Alternately, at the discretion of the department, a paper written within the capstone course may be substituted.

Major Program Requirements - Russian

The major in Russian consists of 27 credits in Russian beyond RUSS 1200. The Russian faculty strongly encourages all majors to spend at least one semester studying abroad at a Russian university, preferably in their third year of the language. In addition, students must meet all degree, college and university graduation requirements including university general education.

Major core requirements (beyond the A&S language requirement)27

The following courses or their equivalents must be included:

RUSS 2130: Second-Year Russian I.....	4
RUSS 2160: Second-Year Russian II.....	4
RUSS 3130: Intermediate Russian	
OR 3160 Intern. Conversation & Composition.....	3
RUSS 3630: Russian Classics I OR	
RUSS 3640: Russian Classics II.....	3
Two of the following four courses:.....	6
RUSS 3310: Heroes of Their Times	
RUSS 3320: Matters of Life and Death: Tolstoy & Dostoevsky	
RUSS 3330: Decline, Fall and Resurrection in Modern Russian Literature	
RUSS 3350: The Split Tree of Russian Literature: Contemporary Russian Prose	
One 4000-level literature course.....	3
RUSS 2310 or 2320 (Writing Intensive Russian civilization course).....	3

Electives

Elective courses and equivalents to replace the required courses above should be selected in consultation with the advisor.

Departmental Honors

Departmental honors are available for students majoring in Russian with a minimum 3.3 GPA. A three-course literature sequence must be completed with no grades below B or, at the discretion of the department, a paper may be written within the capstone course.

Dual Degrees and Double Majors

As a double major or a dual degree has become an ever more popular choice, an increasing number of students choose German or Russian as one of their majors. Students looking forward to a career in medicine or in the sciences use a double major to ensure a thorough background in the humanities to balance their scientific studies. Double majors within the College of Arts and Science can be arranged and, if the second degree program is identified early, dual degree programs outside the college are

also possible. Combined programs with journalism, international studies, education and business are frequent choices. Within the college, combinations with political science, history, philosophy, art history, and the sciences are popular double major programs.

Minor in German or Russian

The department offers minors in German and Russian, consisting of 15 credits beyond GERMAN 2100 or RUSS 1200 respectively. A minimum of 6 of these 15 credits must be in German or Russian courses numbered 3000 or above. In addition, a minimum of 9 of the 15 credits must be completed in residence. For the German minor, 12 of the 15 credits must be in courses where the language of instruction is German.

ARABIC COURSES

Arabic 1100--Elementary Arabic I (6).An elementary level course designed to facilitate student's acquisition of basic proficiency in communication within culturally significant contexts. Students learn Modern Standard Arabic language skills in an environment integrating interactive video and classroom instruction.

Arabic 1200--Elementary Arabic II (6).This course builds upon the foundation established in 1100. Greater emphasis is placed on oral and written expression. Cultural issues are explored in an environment integrating interactive video and classroom instruction.

Arabic 2005--Undergraduate Topics in Arabic - Humanities (1-3).Organized study of selected topics. Subjects and credits may vary from semester to semester. May be repeated with departmental consent. No language credit. Prerequisite: sophomore standing or instructor's consent. Graded on A/F basis only.

CHINESE COURSES

CHINSE 1100--Elementary Chinese I (6).Five hours of classroom instruction, with one hour lab work weekly.

CHINSE 1200--Elementary Chinese II (6).Five hours of classroom instruction, with one hour lab work weekly. Prerequisite: C- or better in CHINSE 1100 or equivalent.

CHINSE 2001--Undergraduate Topics in Chinese-General (1-3).Organized study of selected topics. Subjects and credits may vary from semester to semester.

CHINSE 2005--Undergraduate Topics in Chinese - Humanities (1-3).Organized study of selected topics. Subjects and credits may vary from semester to semester. No knowledge of Chinese required. No language credit.

CHINSE 2100--Everyday Spoken Chinese Level I (3).reinforces and extends ability to use Chinese language for spoken communication. Studies situation-specific Chinese in real-life situations. Intended to supplement, not replace, Chinese language courses taught on UMC campus. Prerequisite: CHINSE 1200. Restricted to students enrolled in MU China Study Abroad.

CHINSE 2160--Chinese Conversation and Composition (3).Prerequisite: C- or better in CHINSE 1200 or equivalent.

CHINSE 2310--Chinese Civilization I (3).Survey of Chinese culture and arts. No knowledge of Chinese is required. No foreign language credit.

CHINSE 2330--Chinese Language and Culture (3).Presents information about the development of Chinese language over time, the variety of dialects spoken in China, and around the world. Explores relationship between Chinese language and culture. Considers different genres of Chinese literature. Visits to sites significant to development of Chinese language and literature. Introduction to calligraphy and basic daily Chinese. Must be enrolled in MU China Study Abroad. Sophomore standing required.

CHINSE 3005--Topics in Chinese - Humanities (1-3).Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated

to a maximum of 6 hours with departmental consent. Prerequisites: Sophomore standing and instructor's consent.

CHINSE 3085--Problems in Chinese (1-3).Supervised study in Chinese language and/or culture. May be taken for a maximum of 6 credits. Prerequisite: instructor's consent.

CHINSE 3160--Chinese Conversation and Composition II (3).Continuation of Chinese 2160. Introduces more complex grammatical constructions and extends ability to use those constructions for written and oral communication. Successful completion of course will enable students to communicate in Mandarin Chinese regarding everyday topics, with a vocabulary of just over 1900 words, and about 380 sentence patterns. Prerequisites: CHINSE 2160, or instructor's consent.

CHINSE 3170--Everyday Spoken Chinese Level II (3).For students who have completed 18 credits college-level Chinese. Reinforces and extends ability to use Chinese language for Spoken communication. Class-time spent studying situation-specific Chinese in real-life situations. Intended to supplement, not replace, Chinese language courses taught on UMC campus. Prerequisite: CHINSE 3160

GERMAN COURSES

GERMAN 1100--Elementary German I (5).For beginners with no prior knowledge of German. This course helps learners develop the skills they need to use German as a means of communication in their personal and professional life. It covers a wide variety of vocabulary pertaining to everyday life; emphasis is on all types of communication--oral and listening skills, reading and writing

GERMAN 1200--Elementary German II (5).A continuation of German 1100. This course helps learners develop the skills they need to use German as a means of communication in their personal and professional life. It covers a wide variety of vocabulary pertaining to everyday life; emphasis is on all types of communication - oral and listening skills, reading and writing. Prerequisite: C- or better in GERMAN 1100, or equivalent.

GERMAN 2001--Undergraduate Topics in German-General (1-3).Organized study of selected topics. Subjects and credits may vary from semester to semester. May be repeated with departmental consent.

GERMAN 2005--Undergraduate Topics in German-Humanities (1-3).Organized study of selected topics. Subjects and credits may vary from semester to semester. May be repeated with departmental consent. No language credit.

GERMAN 2100--Intermediate German I (3).A continuation of German 1200. This course helps learners develop the skills they need to use German as a means of communication in their personal and professional life. It covers a wide variety of vocabulary pertaining to everyday life; emphasis is on all types of communication - oral and listening skills, reading and writing. Prerequisite: C- or better in GERMAN 1200, or equivalent.

GERMAN 2260--Intermediate German II: Language and Culture (3).This course continues to help learners develop the necessary communicative skills in German. The particular emphasis is on oral and writing skills, and

texts that provide insight into contemporary German culture and social life. Prerequisite: C- in GERMAN 2100 or equivalent.

GERMAN 2310--German Civilization: Beginning to 1850 (3).Major historical, social, artistic, literary themes from beginnings to end of Revolution of 1848. Films and recordings. May be taken independently of GERMAN 2320. No foreign language credit.

GERMAN 2320--German Civilization: 1850 to Present (3).Second Empire, Weimar Republic, Nazi era, two Germanies after 1949. Historical, social, artistic, literary themes. Films and recordings. May be taken independently of GERMAN 2310. No foreign language credit.

GERMAN 2480--Monstrous Births: Tales of Creation in 19th Century Literature (3).Examines literary and other cultural works which explore the creation of human beings by traditional, technological, or magical means. Course and readings in English translation. Prerequisites: ENGLSH 1000 or equivalent.

GERMAN 2810--Introduction to Film Analysis (3).(same as Film Studies 2810 and Romance Languages 2810). This course familiarizes students with the basic analytical tools for describing and interpreting films, and helps them develop a critical vocabulary for discussing and writing about film. It also introduces some theoretical approaches to film analysis. Prerequisite: freshman and sophomores only or consent of program director.

GERMAN 2820--Trends in World Cinema (3).(same as Film Studies 2820 and Romance Languages 2820). This course is a historical overview of the major trends in international cinema. It focuses on the intersection of aesthetics, industry, and ideological and social concerns in cinematic production. Prerequisite: sophomore standing, FILMS 2810 or instructor's consent.

GERMAN 3001--Topics in German-General (1-3).Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent. Prerequisites: sophomore standing and instructor's consent.

GERMAN 3005--Topics in German-Humanities (1-3).Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent. Prerequisites: sophomore standing and instructor's consent.

GERMAN 3160--German Conversation and Composition (3).A continuation of German 2260. This course help learners develop further the necessary communicative skills in German. The particular emphasis is on oral and writing skills, and texts that provide insight into contemporary German culture and social life. Prerequisite: C- or better in GERMAN 2260, or equivalent.

GERMAN 3180--Business German (3).Conversation, composition, and reading based on terminology used in business situations. Prerequisite: GERMAN 2260 and 3230 or equivalent.

GERMAN 3190--Contemporary German Culture (3).This content-driven course provides insights into essential subjects of 20th

century German history and contemporary society, using a variety of literature, journalistic sources and film. The course will improve German conversation and literacy skills, and will strengthen critical reading and writing, as well as interpretative abilities. Significant grammatical concepts will be throughout the semester. Conducted in German. Prerequisites: GERMAN 2260 or instructor's consent.

GERMAN 3230--Introduction to German Literature (3).This course further expands communicative skills in German and introduces students to German literature through readings of German short stories, longer prose texts, or drama. Prerequisite: C- or better in GERMAN 3160, or 3190.

GERMAN 3320--Readings in German Literature (3).Readings in English of selected works of German literature from Goethe to the present, with a particular emphasis on writers and texts that have had a strong influence on European thought and culture. Prerequisite: sophomore standing, ENGLISH 1000.

GERMAN 3440--After the Fact: Holocaust in Contemporary History, Art & Literature (3).(same as Peace Studies 3440). Explores responses to the Holocaust from numerous perspectives. Considers how the Holocaust is remembered, memorialized, and debated in a variety of national contexts. Touches on historical, philosophical, and aesthetic points of view. Prerequisites: sophomore standing or instructor's consent.

GERMAN 3460--Marx & Nietzsche: Labor, Power, & the German Mind of 19th Century (3).Examines writings of Germany's two most radical nineteenth-century thinkers. Explores key terms of political economy and philosophy developed by Marx and Nietzsche. Journal and three papers. Prerequisite: sophomore standing, ENGLISH 1000.

GERMAN 3830--History of the German Film (3).(same as Film Studies 3830). Introduction to the development of the German film. Old and recent films are viewed and discussed in terms of techniques, artistry, psychology and social impact. English dubbing or subtitles. No foreign language credit. Prerequisites: sophomore standing or instructor's consent.

GERMAN 3840--German Film After 1945 (3).(same as Film Studies 3840). Examines a selection of post-War films by German directors, as well as historical, literary, and theoretical texts. Prerequisite: sophomore standing, or instructor's consent.

GERMAN 3895--Service Learning in German Studies (2).Service learning offers students a chance to put into practice what they have learned in theory. Students work as teacher-aids or tutors in foreign language/culture classes at area schools. Graded on S/U basis only. Does not meet A&S foundation requirements. Prerequisites: GERMAN 2260, or instructor's consent.

GERMAN 4001--Topics in German-General (1-3).Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent. Prerequisites: junior standing and instructor's consent.

GERMAN 4005--Topics in German-Hu-

manities (1-3).Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent. Prerequisites: junior standing and instructor's consent.

GERMAN 4070--Intensive Beginning German (3).Designed to lead to a reading knowledge of German. Cannot be taken to fulfill undergraduate language requirement. Prerequisites: graduate standing or instructor's consent.

GERMAN 4160--Advanced Language Proficiency (3).A course for intermediate to advanced students of German. This course helps learners develop further the necessary communicative skills in German. The particular emphasis is on oral and writing skills, and texts that provide insight into contemporary German culture and social life. Prerequisite: GERMAN 3230, or equivalent.

GERMAN 4180--Advanced German: Conversation and Stylistics (3).This course continues to emphasize all communicative skills in German: oral and listening skills, reading and writing. There is also an emphasis on advanced grammar. The content focuses on contemporary German culture and social life. Prerequisite: senior or graduate standing, or instructor's consent.

GERMAN 4220--Eerie Tales: Classic German Narratives (3).In this class, we will read classic uncanny tales in German by major authors, and will explore the traits of this category across a variety of literary movements. Prerequisites: GERMAN 3230 or equivalent language capacity.

GERMAN 4230--Enlightenment and Revolution (3).Reading and discussion of selected works by major German writers from 1740 to 1870. Prerequisite: GERMAN 3230 or equivalent.

GERMAN 4240--Modernism and Modernity (3).Reading and discussion of selected works by major German writers from 1870 to the present. Prerequisite: GERMAN 3230 or equivalent.

GERMAN 4260--Recent German Literature (3).Prerequisite: GERMAN 3230 or equivalent.

GERMAN 4440--Enlightenment and Sturm und Drang (3).Survey of literature and thought of 18th-century Germany, with emphasis on the works of Lessing, Wieland, Herder and the younger Goethe. Prerequisite: GERMAN 4230 or equivalent.

GERMAN 4450--German Romanticism (3).Prerequisite: GERMAN 4230 or equivalent.

GERMAN 4530--The German Novelle (3).Prerequisite: GERMAN 4230 or equivalent.

GERMAN 4650--Faust (3).Prerequisite: GERMAN 4230 or equivalent.

GERMAN 4670--Medieval German Literature 1170-1210 (3).Analysis of major narrative and lyric poetry of the Age of Chivalry. Prerequisite: GERMAN 4230 or equivalent.

GERMAN 4730--German Internship and Methods (3).Supervised introduction to the methodology of the teaching of elementary German; conducted in a classroom environment. Prerequisites: junior standing, GERMAN 4230, or instructor's consent.

GERMAN 4960--Special Readings in German (1-3).Independent study through readings, conferences, and reports. Prerequisites: junior standing and instructor's consent.

GERMAN 4980--German Capstone Seminar (3).Required of all senior German majors. Focuses on contemporary Germany and brings together aspects of German literature and culture studies during the degree program. Prerequisites: senior standing, one 3000-level literature course or equivalent or departmental consent.

GERMAN 4996--Honors in German (1-3).Special problems in Germanic literature or linguistics. Prerequisite: consent of departmental Honors director. Special problems in Germanic literature or linguistics. Prerequisite: consent of departmental Honors director.

HEBREW COURSES

HEBREW 1100--Elementary Hebrew I (6).Five hours of classroom instruction, with one hour lab work weekly.

HEBREW 1200--Elementary Hebrew II (6).Five hours of classroom instruction, with one hour lab work weekly. Prerequisite: C- or better in HEBREW 1100, or equivalent.

HEBREW 2001--Topics in Hebrew-General (1-3).Organized study of selected topics. Subjects and topics may vary semester to semester. May be repeated with consent of department.

HEBREW 2005--Topics in Hebrew - Humanities (1-3).Organized study of selected topics. Subjects and topics may vary semester to semester. May be repeated with consent of department. No knowledge of Hebrew required. No language credit.

HEBREW 2310--Introduction to Israeli Culture (3).Examines unique qualities that shape modern Israeli culture; looks at major social and political events that have shaped ethnicity, ideology, religion, identity, and diversity of the State of Israel. Discusses literature, the fine arts, language, and the mass media. No Foreign Language credit. Prerequisite: sophomore standing or instructor's consent. Graded on A/F basis only.

HEBREW 3085--Problems in Hebrew (1-3).Supervised study of Hebrew language and/or culture. May be taken for a maximum of 6 credits. Prerequisite: instructor's consent.

JAPANESE COURSES

JAPANESE 1100--Elementary Japanese I (6).Five hours of classroom instruction, with one hour lab work weekly.

JAPANESE 1200--Elementary Japanese II (6).Five hours of classroom instruction, with one hour lab work weekly. Prerequisite: C- or better in JAPANESE 1100, or equivalent.

JAPANESE 2001--Topics in Japanese-General (1-3).Organized study of selected topics. Subjects and credits may vary from semester to semester.

JAPANESE 2005--Topics in Japanese - Humanities (1-3).Organized study of selected topics. Subjects and credits may vary from semester to semester. No knowledge of Japanese required. No language credit.

JAPNSE 2160--Japanese Conversation and Composition (3). Prerequisite: C- or better in JAPNSE 1200, or equivalent.

JAPNSE 2310--Japanese Civilization I (3). Survey of Japanese culture and arts before 1945. May be taken independently of Japanese 2320. No knowledge of Japanese required. No foreign language credit.

JAPNSE 2320--Japanese Civilization II (3). Survey of Japanese culture and arts from 1945. May be taken independently of 2310. No knowledge of Japanese required. No foreign language credit.

JAPNSE 2330--The World of Japanese Business (3). Designed to assist the student to achieve successful business contacts with Japanese counterparts by understanding the characteristics of Japanese business in cultural, economical, and practical contexts and by learning useful Japanese terms and expressions in business. Prerequisite: sophomore standing.

JAPNSE 3085--Problems in Japanese (3). Supervised study in Japanese language and/or culture. May be taken for a maximum of 6 credits. Prerequisite: instructor's consent.

JAPNSE 3160--Intermediate Japanese Composition and Conversation (3). Further develops oral command of Japanese as well as listening comprehension and further essay writing skills. Prerequisite: C- or better in JAPNSE 2160.

JAPNSE 3320--Classical Japanese Literature (in translation) (3). This course studies Classical Japanese Literature preceded by a brief historical survey of Japanese literature. Analyzes such works as "Essays in Idleness" (Tsurezuregusa) by Yoshida Kenko in the 14th century and "Hojoki" by Kamon Chomei in the 13th century. Readings and lectures in English. Prerequisite: sophomore standing.

JAPNSE 3360--Modern Japanese Literature (in Translation) (3). Surveys Japanese literature from 1868 to present. Analyzes works by such authors as Soseki, Tanizaki, Kawabata, Mishima, Oe, Murakami, and others. Readings and lectures in English. Prerequisite: sophomore standing.

JAPNSE 3370--Intermediate Readings in Japanese (3). Develops reading skills and acquisition of more Kanji. Prerequisite: C- or better in JAPNSE 3160, or equivalent, or instructor's consent.

JAPNSE 3880--Japan and its Cinema (3). Survey and analysis of selected Japanese films from the 1940s to present. Films will be viewed and discussed in terms of techniques, artistry, psychology, and social impact. English dubbing or subtitles. No foreign language credit. Prerequisite: sophomore standing or instructor's consent.

JAPNSE 4005--Topics in Japanese - Humanities (1-3). Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent. Suitable for students who have taken up to JAPAN 3370 or equivalent. Prerequisites: instructor's consent; sophomore standing.

KOREAN COURSES

KOREAN 1100--Elementary Korean I (6). Introductory course on Korean language. Five hours classroom instruction with one hour lab weekly.

KOREAN 1200--Elementary Korean II (6). Five hours classroom instruction with one hour lab work weekly. Prerequisite: C- or better in KOREAN 1100.

KOREAN 2310--Korean Civilization I (3). Focuses on understanding traditional Korean people and culture through examining social, political, economic, and belief systems. Considers literature, art, folklore, and history up to the late 19th century. May be taken independently of Korean 2320.

KOREAN 2320--Korean Civilization II (3). Considers the situation and culture of Korea at the end of the Chosun Kingdom, and the period of modernization beginning about 1876. Investigates how modernization has changed Korea by looking at attitudes, behaviors, values, philosophies, and trends of Korea in the 20th and 21st centuries. May be taken independently of Korean 2310.

KOREAN 2330--Study Tour of Korea (3). Study tour allows students to experience firsthand important cultural, historical, and education aspects of Korea. Visit key landmarks, museums, and other sites. Provides information and insight needed to cultivate greater understanding of Korea. Graded on A/F basis only.

KOREAN 3001--Topics in Korean-General (1). Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisite: sophomore standing and instructor's consent; departmental consent for repetition.

KOREAN 3005--Topics in Korean - Humanities (3). Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisite: sophomore standing and instructor's consent; departmental consent for repetition.

KOREAN 3890--Korean Society Through Cinema (3). Examines the way in which Korean film reveals the cultural, political, and ideological orientation of the society in which it is created and circulated. Compares films from North and South Korea, considering modernity, gender, nation-hood, and class. Prerequisite: sophomore standing. Graded on A/F basis only.

KOREAN 4001--Topics in Korean-General (1). Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisite: sophomore standing and instructor's consent; departmental consent for repetition.

KOREAN 4005--Topics in Korean - Humanities (1). Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisite: sophomore standing and instructor's consent; departmental consent for repetition.

RUSSIAN COURSES

RUSS 1100--Elementary Russian I (6). Five hours of classroom instruction, with one hour lab work weekly.

RUSS 1200--Elementary Russian II (6). Five hours of classroom instruction, with one hour lab work weekly. Prerequisite: C- or better in RUSS 1100 or equivalent.

RUSS 2001--Undergraduate Topics in Russian-General (1-3). Organized study of selected topics. Subjects and credits may vary from semester to semester. May be repeated with consent of department.

RUSS 2005--Undergraduate Topics in Russian-Humanities (1-3). Organized study of selected topics. Subjects and credits may vary from semester to semester. May be repeated with consent of department. No language credit.

RUSS 2120--Russia: Enigma Wrapped in Mystery (3). Broad introduction to the study of Russia as a discipline; designed to acquaint the student with a wide range of topics connected to the study of Russia. Prerequisite: sophomore standing or instructor's consent.

RUSS 2130--Second-Year Russian I (4). Students will solidify their command of Russian grammar and begin developing their reading skills. Prerequisite: RUSS 1200, equivalent, or instructor's consent.

RUSS 2160--Second-Year Russian II (4). Continuation of Russian 2130. Prerequisites: RUSS 2130 or equivalent.

RUSS 2310--Between Heaven and Earth: Russian Civilization (3). Survey of Russian culture from the Christianization of the Slavic peoples to 1917. No foreign language credit. Humanities credit.

RUSS 2320--The Arts of Survival: Civilization in Soviet Times (3). Historical, social, and artistic topics. No foreign language credit. Humanities credit.

RUSS 2330--Russia and America as Comparative Civilizations (3). Analyzes similar developments in the arts, architecture, literature, and film of Russia and America.

RUSS 2570--The Supreme Measure: Capital Punishment in Russian History and Literature (3). Highlights historical, ethical, and religious aspects of capital punishment across the span of Russian history. Provides an opportunity to explore a difficult topic using material unknown to most students; a serious course in literary history. Develops critical thinking skills.

RUSS 3001--Topics in Russian-General (1-3). Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisite: sophomore standing, departmental consent for repetition.

RUSS 3005--Topics in Russian-Humanities (1-3). Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisite: sophomore standing, departmental consent for repetition.

RUSS 3130--Intermediate Russian (3). Normally taken as 5th semester of Russian language sequence. Prerequisites: RUSS 2160 or equivalent or instructor's consent.

RUSS 3160--Intermediate Conversation and Composition (3). Further develops oral command of Russian as well as listening

comprehension and some letter writing skills. Prerequisite: RUSS 2160 or 3130 or instructor's consent.

RUSS 3310--Heroes of Their Times: Individualism in Russian Literature (3).Examines selected works by the major Russian writers of the first half of the nineteenth century. Reading and lectures in English. Prerequisite: sophomore standing or instructor's consent.

RUSS 3320--Matters of Life and Death: The Fiction of Tolstoy and Dostoevsky (3).Analyzes the major works of Tolstoy and Dostoevsky. Readings and lectures in English. Prerequisite: sophomore standing or instructor's consent.

RUSS 3330--Decline, Fall, and Resurrection in Modern Russian Literature (3).Analysis of the major trends in Russian literature and related cultural developments from 1890 to 1930. Readings and lectures in English. Prerequisite: sophomore standing or instructor's consent.

RUSS 3350--The Split Tree of Russian Literature: Contemporary Russian Prose (3).Analyzes the divided tradition of Russian literature since 1930 in the works of such authors as Nabokov, Pasternak, Bulgakov, and Solzhenitsyn. Readings and lectures in English. Prerequisite: sophomore standing or instructor's consent.

RUSS 3630--Russian Classics I (3).Reading and discussion of selected works by major Russian writers of the nineteenth century. Course conducted in Russian. May be taken before or after RUSS 3640. Prerequisite: RUSS 3130 or instructor's consent.

RUSS 3640--Russian Classics II (3).Reading and discussion of selected works by major Russian writers of the twentieth century. Course conducted in Russian. May be taken before or after RUSS 3630. Prerequisite: RUSS 3130, or instructor's consent.

RUSS 3870--Russian Women and Film (3).(same as FILM_S 3870/WGST 3870). Traces image(s) of the Russian woman in 20th-century Russia as constructed in Russian, Soviet and late-Soviet film. Discusses heroines of pre-revolutionary melodrama and "new Soviet man and woman" of the 20s. Considers wartime re-alignment of gender roles in defense of motherland and their subtle revamping in post-war and post-Stalinist period, and the shifting relations between women and men, women and women, and women and the State. Emphasizes cultural-historical and ideological status of women as reflected in onscreen image(s) in Russian film. Designed to serve as an introduction to film studies and to 20th-century Russian culture more generally. Conducted in English (all films have English subtitles). Prerequisite: ENGLSH 1000 and sophomore standing.

RUSS 3890--Russian and Soviet Cinema (3).(same as Film Studies 3890). Survey and analysis of selected Soviet films. Emphasis on film-making as a form of art. English or subtitled. Second screenings by arr. Some films may run over 2 hrs. No foreign language credit. Prerequisite: junior standing or instructor's consent.

RUSS 3895--Service Learning in Russian Studies (2).Service learning offers students a chance to put into practice what they have

learned in theory. Students work as teacher-aids or tutors in foreign language/culture classes at area schools. Graded on S/U basis only. Does not meet A&S foundation requirements. Prerequisites: instructor's consent.

RUSS 3896--Honors in Russian (1-3).Special problems in Slavic literature or linguistics. Prerequisite: consent of departmental Honors director.

RUSS 4001--Topics in Russian-General (cr.arr.).Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisites: junior standing and instructor's consent, departmental consent for repetition.

RUSS 4005--Topics in Russian-Humanities (3).Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisites: junior standing and instructor's consent, departmental consent for repetition.

RUSS 4070--Intensive Beginning Russian (3).Designed to lead quickly to a reading knowledge of Russian. Cannot be taken to fulfill undergraduate language requirement. Intended for graduate students in other departments who plan to conduct research in Russian. Prerequisite: junior standing or instructor's consent.

RUSS 4160--Advanced Russian Conversation (3).Advanced syntax, idiomatic constructions, and vocabulary building. Prerequisite: RUSS 3160 or equivalent.

RUSS 4350--Special Readings in Russian (1-3).Prerequisites: junior standing and chairman's consent.

RUSS 4730--Internship in Russian (3).Supervised introduction to the methodology of the teaching of elementary Russian; conducted in a classroom environment. Prerequisite: Russian major or graduate standing or instructor's consent.

RUSS 4965--Distorted Picture: Post-War Cinema in a Police State (3).(Same as RUSS 4965) Considers strategies and stylistic devices employed by East European & Soviet directors to produce artistically worthy films under censorship. Discusses how artists adapted methods, boldness of expression, thematic content, and technical sophistication. Attention paid to production techniques. Prerequisite: Junior Status or instructor's consent.

RUSS 4970--Russian Poetry (3).Survey of readings in Russian poetry from its beginnings to present. Prerequisite: RUSS 3130 or equivalent.

RUSS 4971--Russian Drama (3).Selected readings in and discussions of major Russian plays of the nineteenth and twentieth century. Prerequisite: RUSS 3630 or equivalent.

RUSS 4972--The Russian Novel (3).Selected readings and seminar discussion of major novelists of the 19th and 20th centuries. Prerequisites: RUSS 3630 or equivalent.

RUSS 4980--Russian Capstone Seminar (3).Topics vary from year to year. The capstone course brings together aspects of Russian literature and culture studied during the degree program.

RUSS 4981--The Art and Life of Pushkin (3).Gives a conceptual thematic overview of Alexander Puskin's lyrical poetry, as well as

some dramatic work and prose. Special attention paid to the parallel development of his artistic and religious beliefs. Poetry read in Russian; prose and dramatic poems in Russian and English. Prerequisite: Russian major or graduate standing or instructor's consent.

RUSS 4982--Nikolai Gogol (3).Study of the life and art of Nikolai Gogol. Includes biographical overview, Ukrainian stories, dynamics of folklore, local dialect, and the process of literary creation. Considers St. Petersburg stories, novels, and plays. Prerequisite: Russian major or graduate standing or instructor's consent.

RUSS 4984--Tolstoy's Fiction and Truth (3).Provides a conceptual overview and analysis of two masterpieces of Tolstoy's art. Acquaints students with the complex and hidden connections between Tolstoy's artistic methods and religious beliefs. Prerequisites: Russian majors or instructor's consent.

RUSS 4985--Nabokov's Russian Fiction (3).Systematic analysis of Vladimir Nabokov's fiction, both novels and short stories. Emphasis on the artistic properties of prose. Lectures and class discussion in English. Readings in Russian (English translations for undergraduate students). Prerequisite: Russian major, graduate standing or instructor's consent.

The Department of History offers undergraduate work in the history of ancient, medieval and modern Europe, the United States, Latin America, Asia and Africa. In addition, the department participates in interdepartmental programs in Ancient Studies, Black Studies, Medieval and Renaissance Studies, Peace Studies, Women and Gender Studies and Latin American, Russian and South Asia Area Studies.

The department offers BA, MA and PhD degrees with majors in History. A minor is also available.

Major Program Requirements - History

A student majoring in history must complete a total of 33 history credits. With the consent of the departmental director of undergraduate studies, certain history requirements can be waived for

students pursuing dual degrees or double majors. In addition, students must complete all university graduation requirements and Arts and Science Foundation Requirements.

Major core requirements	33
Introductory courses (below 2000) from three of the following areas	9
United States to ca. 1865	
United States since ca. 1865	
Europe	
Third World (Africa, Asia, Latin America)	
One additional course (1000 level or above, not including HIST 1100, 1200, 1500, 1510) from each of the following areas	9
Europe	
United States	
Third World	
Electives at the 3000 level or above, from any field of history	9
Seminar/thesis block	6
One undergraduate seminar and one additional history course at the 4000-level OR	
Undergraduate Thesis OR	
Honors Thesis OR	

Minor in History

A minimum of 15 credits is required for a minor in history. At least 9 of the 15 must be in courses numbered 2000 or above. A minimum of 9 credits must be taken in residence, 6 of which must be in courses numbered 2000 or above. A grade of C- or better is required for all history courses taken for a minor. The selection and mix of courses is left to the discretion of the student.

HISTORY COURSES

HIST 1004--Undergraduate Topics in History-Social Science (1-3). Organized study of selected topics. Subjects and credits may vary from semester to semester. Prerequisite: departmental consent for repetition.

HIST 1100--Survey of American History to 1865 (3). Introduction to U.S. history through the Civil War, surveying political, economic, social and cultural development of the American people.

HIST 1100H--Survey of American History to 1865 - Honors (3). Introduction to U.S. history through the Civil War, surveying political, economic, social and cultural development of the American people. Honors eligibility required.

HIST 1200--Survey of American History Since 1865 (3). Introduction to U.S. history since 1865, surveying political, economic, social, and cultural development of the American people.

HIST 1200H--Survey of American History Since 1865 - Honors (3). Introduction to U.S. history since 1865, surveying political, economic, social, and cultural development of the American people. Honors eligibility required.

HIST 1400--American History (5). Broad survey of political, economic, social, intellectual, diplomatic and constitutional development of American people from first English settlements to present day; emphasizes evolution of American culture and institutions. Students may not receive additional credit for history 1100 and/or 1200.

HIST 1410--African American History (3). (same as Black Studies 1410). Survey of social, political and economic development to the African American people in American life from 1619 to the present.

HIST 1500--Foundations of Western Civilization (3-4). Development of characteristic ideas and institutions of Western cultural tradition, from origin of civilization in ancient Near East to beginning of rapid social, political, intellectual transformation of Europe in 18th century.

HIST 1500H--Foundations of Western Civilization - Honors (3-4). Development of characteristic ideas and institutions of Western cultural tradition, from origin of civilization in ancient Near East to beginning of rapid social, political, intellectual transformation of Europe in 18th century. Honors eligibility required.

HIST 1510--History of Modern Europe (3). Selected major themes in European history from French Revolution to recent times. Breakdown of traditional institutions, ideas; political, social

revolution; industrialization, nationalism, imperialism, world wars; democratic, totalitarian ideologies, movements; quest for international order, European unity.

HIST 1510H--History of Modern Europe - Honors (3). Selected major themes in European history from French Revolution to recent times. Breakdown of traditional institutions, ideas; political, social revolution; industrialization, nationalism, imperialism, world wars; democratic, totalitarian ideologies, movements; quest for international order, European unity. Honors eligibility required.

HIST 1520--The Ancient World (3). Survey of institutional and cultural development of ancient Near East, Greece, Rome, and Asia.

HIST 1540--England Before the Glorious Revolution (3). Survey of English institutions, culture and politics from the Roman invasion to the Revolution of 1688.

HIST 1560--The World of the Middle Ages (3). Survey of European development from the fall of Rome to the 16th century.

HIST 1570--Europe in the Ages of Renaissance and Reformation (3). A study of the changes in European economy, society, religion, the arts, and the sciences from 1300-1650, with an emphasis on social, intellectual, and religious history. Particular emphasis on Renaissance developments in Italy and the birth of Protestantism in Germany.

HIST 1580--History of Christianity (3). Origin, diffusion and development of Christianity, with special attention to its influence on Western civilization. Major emphasis on period up to French Revolution.

HIST 1590--Women and the Family in the Pre-Modern West (3). Examines the changing roles of women and familial structures from the Ancient Mediterranean World to the Protestant Reformation and the effects of religious, political and economic change on the family.

HIST 1600--Foundations of Russian History (3). A survey of the Kievan and Muscovite period to the end of the 17th century.

HIST 1610--Russia in Modern Times (3). (same as Peace Studies 1610). Survey of Russian history from 1801 to present.

HIST 1800--History of Modern Africa (3). (same as Black Studies 1800). Provides a general survey of Sub-Saharan Africa from 1800 to the present. Topics include: state formation, the slave trade, colonialism, nationalism, national liberation and the problems of independent Africa.

HIST 1810--History of South Africa (3). (same as Black Studies 1810). Surveys the

social, cultural and economic dynamics of South African society from the 16th century to the present with an emphasis on the last two centuries and the consolidation of the apartheid state.

HIST 1820--Asian Humanities (3). (same as Religious Studies 1820, Art History and Archeology 1230 and South Asian Studies 1152). This course is an introduction to the literature and visual arts of Asia through selected master works. It focuses principally on India and China and investigates the distinctive features of their cultures.

HIST 1830--Survey of East Asian History (3). Introductory survey of the history of East Asian countries (China, Korea, Vietnam, and Japan) in the past two thousand years, focusing on their cultural, economic, and political traditions as well as their transformations in the modern era.

HIST 1840--Colonial Latin America (3). Survey of Latin America, 1492-1825; Exploration and conquest; European settlement; colonial government and institutions; economy and society; cultural and intellectual life, independence movements.

HIST 1850--Latin America Since Independence (3). Political, social and economic developments; nationalism; revolutionary movements; U.S. influence.

HIST 1860--History of India to 1600 (3). (same as S_A_ST 1860). The course surveys the history of South Asia from the Indus Valley Civilization (2000 B.C.) to the consolidation of the Mughal Empire (A.D. 1600). Themes include cultural and social history, religion, art, literature, and the sources used for the study of premodern civilization.

HIST 1861--History of India from 1500 (3). (same as South Asian Studies 1861). This course surveys the history of South Asia from the Mughals (A.D. 1526) to the Partition of 1947. Themes include cultural and social history, art and literature, socio-religious reforms, imperialism, nationalism and the approaches used in the study of modern history.

HIST 2004--Topics in History-Social Science (cr.arr.). Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisite: departmental consent for repetition.

HIST 2210--Twentieth Century America (3). Survey of American development from 1900 to present. For students who have not taken advanced courses in American history, especially HIST 4210, 4220, or 4230.

HIST 2220--America in the 1960's (3). (same as Peace Studies 2220). Examines the

political and cultural main currents of the 1960s. Emphasizes the challenges mounted by protest groups and the responses of America's political leadership to the ferment of the period. Prerequisite: sophomore standing.

HIST 2230--Walt Disney and American Culture (3).Examines Walt Disney's influence on shaping of modern American culture.

HIST 2400--Social History of U.S. Women (3).(same as Women's and Gender Studies 2400). This course, the social History of US Women, offers a general overview of US Women, beginning with the colonial period up to the present day.

HIST 2410--African American Women in History (3).(same as Black Studies and Women's and Gender Studies 2410). African American Women in history is a topics course covering major issues affecting black women since their introduction into english-speaking North America to the present.

HIST 2420--Conspiracy Theories & Conspiracies in American History & Culture (3). From the Salem witch trials to the present-day obsessions with the JFK assassination, UFOs, and the like, Americans have often embraced conspiracy theories to explain mysterious events and wrenching social changes. The primary objective of the course is to help students deal more intelligently with the conspiratorial fears and political paranoia that pervade modern American culture, by placing them in a broad historical context. Prerequisite: sophomore standing or instructor's consent.

HIST 2440--History of Missouri (3).Survey of Missouri's development from the beginning of settlement to present.

HIST 2520--Europe in the Nineteenth Century (3).Political, social, economic, and cultural development of Europe from French Revolution to outbreak of World War I.

HIST 2530--Ukrainian History from Medieval to Modern Times (3).A successor state of the former Soviet Union, Ukraine occupies a strategic position in Eastern Europe. The course will trace the long, turbulent history of this East Slavic nation, culminating the independence in 1991.

HIST 2531--Women in Russian History (3).This is a survey course which is designed for students who have not previously taken in course in Russian history, and who are interested in how women experienced the period from the formation of the Kievan state in the ninth century to the fall of the Soviet Union in 1991.

HIST 2600--Early Christianity (3).(same as Religious Studies 2600). History of Christian origins and of the patristic period of the church; study of the beliefs and practices of Christianity, as reflected in its literature, art, music, architecture. Prerequisite: sophomore standing.

HIST 2610--Medieval Christianity (3).(same as Religious Studies 2610). Study of the doctrinal developments, major theologians and schools, institutional formation and dissolution, mysticism, and liturgical expression within the context of cultural and political history. Beginning with Augustine and concluding with the 15th century. Prerequisite: REL ST 2600

HIST 2620--History of Christianity, 1500-Present (3).(same as Religious Studies 2620). Protestant and Catholic Christianity in

age of European expansion; enlightenment; 19th and 20th-century challenges and responses. Prerequisites: REL ST 2600 AND 2610.

HIST 2800--Women in Indian History (3).(same as South Asian Studies 2800). This course examines the role of women in Indian (South Asian) history, focusing on women in British Indian from the eighteenth century up to the Partition of 1947. While previous knowledge of South Asian history may be beneficial, it is not required for this course.

HIST 2950--Sophomore Seminar (3).This course is designed to introduce history majors to the experience of doing original research early in their undergraduate career. Topic will vary. Prerequisites: sophomore standing required.; departmental consent required.

HIST 3000--History of Religion in America to the Civil War (3).(Same as Religious Studies 3000). Studies major American religious traditions from the Age of Discovery to the Civil War, especially the evolution of religious practices and institutions and their influence upon American social, intellectual and political developments. Prerequisite: sophomore standing.

HIST 3200--Black Freedom Movement, 1955-1973 (3).(same as Black Studies 3200). Examines the dismantling of American apartheid and its transformation into a new racial control system. It also explores how and why the Civil Rights Movement was converted into a struggle for Black Power.

HIST 3210--History of Religion in Post-Civil War America (3).(same as Religious Studies 3210). Surveys major American religious traditions from 1865 to the present. Focuses on the evaluation of religious practices and institutions and their interaction with and influence upon American social, intellectual and political developments. Prerequisite: sophomore standing.

HIST 3220--U.S. Women's Political History, 1880-Present (3).(same as Women's and Gender Studies 3220). This course explores American women's engagement with American politics (broadly defined) over the course of the twentieth century. It addresses issues of political identity, organization, ideology, and division. Prerequisite: sophomore standing.

HIST 3230--Individualism and Success in Modern America, 1830-Present (3).This course explores changing notions of individualism and success in American culture during the 19th and 20th centuries. Standards defining achievement, gain, and happiness for the individual citizen have evolved over time, and we will examine a wide variety of sources - advice literature, essays, novels, historical texts, plays and movies, political and religious texts, social criticism - to analyze this broad evolution. The resulting insights into a variety deeper understanding of what it has meant to be a successful individual in the United States over the last two hundred years.

HIST 3400--Religious Biography: Black Religion (3).(same as Black Studies 3590). Studies black American religion through the biographies of representative and influential figures of the 19th and 20th centuries, including Nat Turner, W.E.B. Du Bois, and Marcus Garvey, M.L. King, Malcolm X.

HIST 3420--America's Environmental

Experience (3).(same as Peace Studies 3420). Team-taught analysis of American thought and action on physical environment during 19th-20th centuries. Relation between politics, economics, technological change, environmental quality; roles of science, law, regulatory agencies, grassroots action.

HIST 3430--Sex Radicals in U.S History (3).(same as Women and Gender Studies 3430). Survey of the history of sexuality in the United States. Prerequisite: sophomore standing.

HIST 3510--The Ancient Greek World (3). Political and social institutions, intellectual life of Greek city-states to time of Alexander.

HIST 3520--The Roman World (3).Rise and development of Roman institutions, Rome's imperialism and culture through reign of Marcus Aurelius.

HIST 3530--Alexander the Great and the Hellenistic World (3).Alexander's conquest of the East to 323 B.C.; political, social, economic development of Hellenistic kingdoms from his death to 31 B.C.

HIST 3540--Contemporary Europe (3). Political, social, and economic development of Europe from 1900 to the present, with emphasis on the period between the two world wars.

HIST 3550--The Origins of Scientific Thought (3).This course will trace the evolution of Western science from its Egyptian-Babylonian roots to the "Copernican Revolution" of the mid-sixteenth century. Prerequisites: sophomore standing.

HIST 3560--The Scientific Revolution: 1550-1800 (3).This course covers the history of science, or natural philosophy, from late Renaissance to the beginnings of the "Darwinian Revolution." Prerequisite: sophomore standing.

HIST 3570--European Women in the 19th Century (3).(same as Women's and Gender Studies 3570). Examines the history of European women from 1750 to 1900. The course focuses on how industrialization, the French Revolution and nation-formation changed women's roles in the family, workplace and the state. Grading: exams, papers and discussions. Prerequisite: sophomore standing.

HIST 3580--Modern Italy, 1815 to the Present (3).Political, cultural and social history of Italy since 1815. Looks at how Unification, World War, Fascism, the Cold War, Student protests, the women's movement and the end of the USSR shaped contemporary Italy.

HIST 3590--The Early Middle Ages (3). This course will focus on the social, political, economic, and cultural development of Europe from roughly 300 to 1050. Prerequisite: sophomore standing.

HIST 3600--The Later Middle Ages (3). This course will focus on the social, political, economic, and cultural development of Europe from roughly 1050 to 1500. Prerequisite: sophomore standing.

HIST 3610--Ireland, 1100s to 1850 (3). Ireland, from Conquest to Famine: Ireland's history as the first British Colony, from the conquests of the 1100s and 1500s-1600s to the Irish rebellion of 1798 and the Great Famine and mass emigration of 1845-50. Prerequisite: sophomore standing.

HIST 3611--Ireland, 1850-1923 (3).Ireland,

from Famine to Partition: Irish history from the Great Famine of 1845-50 to the revolutions of 1916-23 that brought partial independence from Britain but partitioned Ireland into two hostile and trouble states.

HIST 3612--Ireland, 1920 to Present (3). Ireland, from Partition to the Present: After surveying the conflicts that led to Irish revolution and partition in 1916-23, the course focuses on the development of postpartition Ireland and Northern Ireland, and on the violence that has scarred Northern Ireland since the 1960s. Prerequisites: HIST 3610 and/or 3611 recommended.

HIST 3810--Imperial China (3).(same as Peace Studies 3810). A survey of China under the Manchu Ch'ing dynasty. Within framework of the dynastic cycle, examines imperial rule, Chinese society, culture, art, internal rebellion, Western intrusion and modernization.

HIST 3820--Twentieth Century China (3). History of China from Nationalist Revolution of 1911 to present. A problem-oriented course: special emphasis on Mao and Maoist ideology, social, literary and cultural history also receive attention. Prerequisites: sophomore standing.

HIST 3830--Chinese Women's History (3). Historical analysis of Chinese women in family, community, ideology, and national politics from the Late Imperial period to the present. Prerequisites: sophomore standing or instructor's consent.

HIST 3850--Islam and the West (3).This course provides a historical intellectual context for the raging debate on Islam and the West. It will discuss how Muslims conceived and reacted variously to the political and cultural challenge the West posed in the nineteenth and twentieth century. It will focus on the discourse on the reception of modernization in Islam. It will highlight the political and cultural energies invested by various Muslim elite communities to distinguish between modernization and Westernization. Islamic fundamentalism, the dominant Islamic expression of our time, will be usefully discussed in the context of this debate and praxis about modernization, authenticity, and Westernization. Prerequisite: junior/senior standing.

HIST 3860--History of Mexico (3).Survey of Mexican history from Cortes to present day.

HIST 3870--Social Revolution in Latin America (3).Twentieth century social revolutions in selected Latin American countries.

HIST 3880--History of Caribbean America (3).Comparative regional study of insular and mainland Caribbean nations. Emphasis on modern period. Independence; abolition of slavery; U.S. hegemony; economic, social, and political upheaval.

HIST 4000--Age of Jefferson (3).Political, constitutional, cultural, and economic developments in United States during formative period of Republic, 1787-1828. Special attention to Constitutional Convention, formation of national political institutions.

HIST 4001--Topics in History-General (cr.arr.).Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisite: departmental consent for repetition.

HIST 4004--Topics in History-Social Science

(cr.arr.).Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisite: departmental consent for repetition.

HIST 4030--History of the Old South (3). Study of the South to 1860.

HIST 4040--Houses Divided: Society and Politics in the Civil War Era (3).(Same as BL_STU 4040) Houses Divided: Society and Politics in the Civil War Era examines the sectional crisis, the Civil War and Reconstruction through the lens of divided households. Considers the experience of soldiers and civilians, women and men, slaves and freedpeople.

HIST 4050--American Colonial History to 1760 (3).Study of colonial America; special emphasis on creation of a native American culture prior to 1760.

HIST 4060--The Period of the American Revolution, 1760-1789 (3).Analysis of the Revolution, its causes and consequences, through establishment of the new government in 1789.

HIST 4070--Indians and Europeans in Early America (3).A study of the cultural, political and often military struggle that took place for control of North America from contact through mid 19th century emphasizing native efforts to resist European domination and expansion in areas that became the U.S. and Canada. Prerequisite: HIST 1100 or equivalent.

HIST 4085--Special Problems in History (cr.arr.).Independent investigation leading to a paper or project.

HIST 4100--American Cultural and Intellectual History to 1865 (3).Origins and growth of American values and ideas considered in their social context. Topics include: the work ethic, republican politics, revivalism, reform movements, sexual attitudes, literature in the marketplace, Afro-American and slave-holding subcultures.

HIST 4200--American Cultural and Intellectual History Since 1865 (3).Tensions and transformations in American culture to the present. Topics include: spiritual crisis in Christianity; rise of welfare state liberalism; socialist and feminist alternatives; literature and the arts.

HIST 4210--Origins of Modern America, 1877-1919 (3).Political, social, economic, and intellectual evolution of America into a modern society, 1877-1918.

HIST 4220--U.S. Society Between the Wars 1918-1945 (3).Detailed examination of American history from end of World War I to end of World War II.

HIST 4230--Our Times: United States Since 1945 (3).Detailed examination of American history from end of World War II to the present.

HIST 4240--History of the New South (3). Study of the South since 1860.

HIST 4260--The Age of Ascendancy: U.S. Foreign Relations, 1944-5- Present (3).(same as Peace Studies 4260). Surveys the Cold War in Europe and Asia, the Korean and Vietnam Wars, and Middle East policy. Prerequisite: sophomore standing.

HIST 4270--African-Americans in the Twentieth Century (3).(same as Black Studies 4270). Surveys the African-American

experience from 1900 to the present. Attention is given to economic, political, social, and cultural trends.

HIST 4280--America in the Reagan Years (3).Examines the major political, economic, social, and cultural currents and developments of the "Long Eighties," from Jimmy Carter's "malaise speech" of July 1979 to Bill Clinton's mid-1990s embrace of welfare reform and pronouncement that the era of big government was over.

HIST 4310--Adoption, Child Welfare and the Family, 1850-Present (3).(same as WGST 4310). This interdisciplinary U.S. history course will address topics such as: changing legal and social meaning of adoption since 1850; historical connections between adoption and poverty, family, gender race, sexuality, class, fertility, identity; and more recent issues such as transnational adoption.

HIST 4410--Introduction to U.S. Social History (3).Study of daily life and the ways ordinary Americans experienced historical change. Considers such topics as work, leisure, family and community. Compares how people's experiences varied by region, class, gender, ethnicity, and race.

HIST 4415--African Americans and American Justice (3).(Same as BL_STU 4415) This course provides opportunities to review and discuss selected court cases and legislation in which black men, women, or children were plaintiffs and defendants or affected by the laws.

HIST 4420--American Urban History (3). Growth, development and implications of the city in American history; historical analysis of urban problems.

HIST 4430--The Great West in American History (3).Historical development of major regions, with emphasis on response to environment, public land policy, role of government in economic and resource development, citizen action, and cultural pluralism.

HIST 4440--History of the American Environment (3).A reading and discussion course exploring diverse responses to the changing American environment from early man to the present, including ecological, institutional, and philosophical aspects.

HIST 4470--Quantitative Methods in Historical Study (3).Introduces quantitative approaches to the study of history. Emphasizes opportunities, limitations, and dangers involved in several common forms of quantitative study. Math Reasoning Proficiency Course.

HIST 4480--War Crimes and Genocide (3).(same as Peace Studies 4480). This course will explore the development of international law, international consciousness, and U.S. Foreign policy on the two distinct but often related issues of war crimes and genocide during the late 19th and throughout the 20th centuries.

HIST 4500--Philip II and Alexander the Great of Macedonia (3).Concentrates on the history and politics of Greece during reigns of these two kings along with Alexander's military conquests and various controversies from the period. Prerequisite: junior standing or instructor's consent.

HIST 4510--Crime and Punishment: Law in Classical Athens (3).Examines the main principles of Athenian law and judicial proce-

dures including history of law code and study of actual speeches from a variety of law suits and procedures. Prerequisites: junior standing.

HIST 4515--Power and Oratory in Ancient Greece (3). Concentrates on the rise of oratory in Greece and how oratory was exploited for political ends. Special attention will be paid to the Athenian Democracy in the fifth and fourth centuries BC.

HIST 4530--The Roman Empire (3). Roman imperialism; management of, and rebellion in, the Empire; cultural exchange between Rome and its provinces.

HIST 4540--The Later Roman Empire (3). Political, religious and cultural life in Late Antiquity, from the "soldier emperors," to the barbarian kingdoms and early Byzantium.

HIST 4550--Age of the Vikings (3). Scandinavia and Scandinavian expansion in the Central Middle Ages. Covers political, economic, religious, and cultural effects of the Viking movement. Prerequisites: HIST 1500, 1540, 1600 or 2560 recommended; junior standing required or instructor's consent.

HIST 4560--The Crusades (3). Survey of the European crusading movement from its inception in the late eleventh century to its decline during the later Middle Ages. Prerequisites: junior standing or instructor's consent.

HIST 4570--Intellectual History of Europe, 17th and 18th Centuries (3). The Enlightenment's attack on traditional Christian thought and values. Prerequisite: junior standing or departmental consent.

HIST 4580--Intellectual History of Europe, 19th and 20th Centuries (3). Topics include: Romanticism, Darwin, Marx and Freud. Prerequisite: junior standing or departmental consent.

HIST 4610--Early Modern Britain, 1450-1688 (3). Study of English politics, society, economy, culture, and religion during primarily the Tudor and Stuart eras, from the establishment of the Tudor dynasty (1485) through the Glorious Revolution. Emphasis on social and religious history. Prerequisite: sophomore standing.

HIST 4620--Modern England (3). Surveys British history in the 18th and 19th centuries. Emphasizes social and economic change.

HIST 4630--The Age of the Renaissance (3). Major changes in European economic, social, political, religious, and intellectual life between 1250-1500. Humanism and Renaissance. The "Renaissance problem."

HIST 4640--The Age of the Reformation (3). State of Europe about 1500. Political, diplomatic, social, and intellectual changes to 1648. Humanistic reform movements. Protestant-Catholic Reformation. Development of the modern state and international relations.

HIST 4650--Revolutionary France, 1789-1815 (3). Revolutionary upheavals of the revolutionary-Napoleonic era, which destroyed traditional French society and laid the basis for modern France. Prerequisite: junior standing or departmental consent.

HIST 4660--European Women in the 20th Century (3). (same as Women's and Gender Studies 4660). Examines the history of European women from World War I to the present. The course focuses on wars, migration, and

the changing nature of family, work and community. Prerequisite: junior standing.

HIST 4670--Germany in the Nineteenth Century (3). Cultural, social and political history of Central Europe from 1800 to 1914. A case study in incomplete modernization, focused on industrialization, unification, cultural crisis and imperialism.

HIST 4680--Germany in the Twentieth Century (3). Cultural, social and political history from 1914 to present day. Focus on world wars, national socialism, the holocaust, the cold war and the emergence of East and West Germany.

HIST 4700--Imperial Russia, 1682-1825 (3). Russia in the 18th and early 19th centuries, with special emphasis on the reigns of Peter I, Catherine II, and Alexander I.

HIST 4710--The Russian Revolution (3). Analyzes the transformation of Russian society that produced the collapse of autocracy, efforts to create a parliamentary government, the Bolshevik seizure of power in 1917, and the civil war that followed.

HIST 4800--Modern Japan and China--A Comparative Survey (3). A structured, comparative examination of the histories and cultures of Japan and China, from the mid-19th century to the present. Orientation towards broad social, intellectual and political developments.

HIST 4840--History of the Mongols (3). In the 13th century, the Mongols went from warring tribes to the largest Eurasian empire in history. This course examines the Mongol tribes, Chinggis Khan's unification of the tribes, the Mongols rapid military victories across Eurasian and their equally rapid decline.

HIST 4850--Traversing the Muslim World (3). (same as South Asian Studies 4850). The traveler's tale formed an important part of the medieval world's system of knowledge. This writing intensive seminar-style course examines a wide array of the most influential travelers in Muslim lands such as Ibn Fadlan, Ibn Battuta, Benjamin of Tudela and Marco Polo. Prerequisites: restricted to juniors and seniors only.

HIST 4860--Indian Army as Colonial Army (3). (same as South Asian Studies 4860). This writing intensive seminar-style course examines how the Indian Army acted as a colonial army in the British Empire, including Africa, the Boxer Rebellion, and the World Wars. Focus is on the role of the Indian Army, impact of the Sepoy Mutiny, and martial race ideology. Prerequisites: restricted to juniors and seniors only

HIST 4940--Internship in History (3). Professional training in history and archive-related fields. Prerequisites: History Department Area of Concentration; junior or senior standing; departmental consent. Graded on S/U basis only.

HIST 4960--Special Readings in History (cr.arr). Individual work, with conferences adjusted to needs of student.

HIST 4970--Undergraduate Seminar in Third World History (3). Readings in selected problems in the history of Africa, Asia or Latin America with reports and discussion. Prerequisite: junior standing, departmental consent.

HIST 4971--Undergraduate Seminar in European History (3). Readings in problems

in European history with reports and discussion. Prerequisite: junior standing, departmental consent.

HIST 4972--Undergraduate Seminar in American History (3). Readings in selected problems in American history with reports and discussion on selected topics. Prerequisite: junior standing, departmental consent.

HIST 4980--Undergraduate Thesis in History (3). Individually directed research leading to a senior thesis. Prerequisite: senior standing and departmental consent.

HIST 4981--Undergraduate Thesis in History (3). Continuation of 4980. Prerequisite: senior standing and departmental consent.

HIST 4995--Honors Thesis in History (3). Research and completion of the thesis required for graduation with Honors in History. Prerequisite: departmental consent.

HIST 4996--Honors Thesis in History (3). Continuation of 4995. Prerequisite: departmental consent.

Linguistics

Vicki Carstens, Chair

Interdepartmental Program in the College of Arts and Science
316 G Tate Hall
(573) 882-8814
carstensv@missouri.edu

Linguistics is the scientific study of human language. It seeks to understand and explain the structural, social and psychological properties of language in a clear and formal manner. Although specialists in the field commonly know one or more foreign languages, such knowledge is complementary rather than essential.

A major in linguistics offers students a liberal education and prepares them for graduate study in linguistics or related fields. It also develops the verbal and analytical skills that are valuable in a variety of professional careers. A Bachelor of Arts with a major in Linguistics is available. A minor is also available.

Major Program Requirements - Linguistics

Major core requirements (minimum)21

Introduction to linguistics: one or more courses such as the following3

LINGST 1060: Human Language

LINGST 2040: Anthropological Linguistics

Language Structure: one or more courses such as the following3

LINGST 4600: Structure of American English

LINGST 4720: Structure of Modern French

LINGST 4721: Structure of Modern Spanish

Phonetics and phonology: one or more courses such as the following3

LINGST 3010: American Phonetics

LINGST 3720: French Phonetics

LINGST 3721: Spanish Phonetics

LINGST 4630: Phonology

LINGST 4850: Practical Phonetics for Fieldwork

Syntax: one or more courses such as the following3

LINGST 4640: Syntax

Semantics: one or more courses such as the following3

LINGST 2700: Elementary Logic

LINGST 4100: Philosophy of Language

LINGST 4110: Intermediate Logic

Language variation: one or more courses such as the following3

LINGST 3470: Culture as Communication

LINGST 3710: Survey of Minority and Creole Languages

LINGUISTICS COURSES

LINGST 1060--Human Language (3).(same as ANTHRO 1060, C S&D 1060, ENGLISH 1060) General introduction to various aspects of linguistic study. Elementary analysis of language data, with some attention to application of linguistic study to other disciplines.

LINGST 2001--Topics in Linguistics-General (cr.arr).Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisites: consent of chair.

LINGST 2040--Anthropological Linguistics (3).(same as Anthropology 2040). Language in relation to other aspects of human behavior. Introduction to description and analysis of the basic units of language. Emphasis on non-Indo-European and preliterate languages. Prerequisites: sophomore standing recommended.

LINGST 2700--Elementary Logic (3).(same as Philosophy 2700). Introduces a symbolic language for representing the structure of arguments. Presents precise rules for demonstrating the validity of arguments. Covers natural

LINGST 4400: Language and Culture

LINGST 4412: Gender, Language and Communication

LINGST 4415: Language and Discourse

LINGST 4420: Historical Linguistics

LINGST 4610: History of the English Language

LINGST 4620: Regional and Social Dialects of

American English

Capstone course: one or more courses such as the following3

LINGST 4810: Psycholinguistics

LINGST 4870: Field Methods in Linguistics

LINGST 4960: Special Readings

LINGST 4970: Studies in Linguistics: Capstone

Students can also choose to have additional linguistics courses as electives. Electives may also be chosen from allied fields such as anthropology, classical studies, communication, English, foreign languages, philosophy, psychology and sociology.

Options

Topics courses such as LINGST 2001, 3001 and 4001 may also satisfy core requirements. Substitutions may be approved for courses in one of the required areas if no courses are available in that area during a student's senior year.

Departmental Honors

A student wishing to graduate with honors in linguistics must earn a 3.3 GPA in all courses and complete all the requirements for the BA in linguistics. In addition, with the assistance of his/her honors thesis advisor, the student must develop, plan and conduct research on an independent project, normally while enrolled in LINGST 4991. A committee consisting of the thesis advisor and a second reader, to be selected by the advisor and the program chair, will examine the student on the resulting thesis of 25-40 pages in an oral exam held no later than the thirteenth week of the term during which the student expects to graduate. The second reader will be provided with a copy of the thesis at least two weeks before the examination. After completing any revisions that the exam committee recommends, the student will submit a final version of the thesis for linguistics program records and will then be recommended to the college of Arts and Science for a BA with Honors in linguistics.

Minor in Linguistics

Consistent with general guidelines for a minor, the minor in linguistics consist of at least 15 credits, including one introductory linguistics course such as one of the following:

LINGST 1060: Human Language

LINGST 2040: Introduction to Anthropological Linguistics and additional courses in language structure: phonetics and phonology; syntax; semantics; or language variation.

deduction for sentence and predicate logic. Develops skill in constructing derivations. Prerequisite: grade of C or higher in MATH 1100/1120 or equivalent.

LINGST 2820--Introduction to Cognitive Science (3).(same as PSYCH 2820 and PHIL 2820). Cognitive science is the interdisciplinary study of the mind. After an overview of the foundations of cognitive science as a whole, we will see what particular sectors of it have to say about mental capacities such as vision, language, categorization, and social cogni-

tion. Prerequisites: PSYCH 1000: sophomore standing required.

LINGST 3001--Topics in Linguistics-General (cr.arr). Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisite: consent of chair.

LINGST 3010--American Phonetics (3). (same as C S&D 3010). Analysis of production and acoustics of the sounds of speech with an emphasis on American English; practice in broad and narrow transcription using the International Phonetic Alphabet.

LINGST 3210--Anatomy and Physiology of the Speech Mechanism (3). (same as C S&D 3210). Introduction to anatomical and functional aspects of the speech mechanism.

LINGST 3470--Culture as Communication (3). (same as ANTHRO 3470, COMMUN 3470). Study of the influence of culture on communication processes. Examines topics such as the impact of values, languages, and nonverbal behavior on intercultural interaction. Prerequisites: sophomore standing.

LINGST 3710--Survey of Minority & Creole Languages of the U.S. & the Caribbean (3). (same as Spanish 3710 and French 3710). Analysis of the state of the minority languages of the U.S. and the Creole languages of the Caribbean with particular attention to the social status of these languages and speakers' attitudes toward them in context of ethnic, cultural, and national identity (taught in English). Prerequisite: sophomore standing.

LINGST 3721--Spanish Phonetics (3). (same as Spanish 3721). Introductory course to the study of Spanish phonological, phonetic and spelling systems, practice of pronunciation, phonetic transcriptions, and introduction to the variation of Spanish pronunciation in the Hispanic world. The course is conducted in Spanish. Prerequisite: SPAN 2160 or equivalent.

LINGST 4001--Topics in Linguistics-General (cr.arr). Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisite: consent of chair.

LINGST 4100--Philosophy of Language (3). (same as Philosophy 4100). Examination of contemporary views of the relationship between language, minds, and the world. Prerequisite: PHIL 2700 or instructor's consent. Some work in PHIL 1000, 3000 or 3200 recommended.

LINGST 4110--Formal Logic (3). (same as Philosophy 4110). Presents the method of truth trees for sentence and predicate logic. Examines proofs concerning the decidability, soundness, and completeness of formal systems. Emphasizes the theory of formal systems. Prerequisite: PHIL 2700.

LINGST 4200--Introduction to Old English (3). (same as English 4200). A beginning study of the Old English or Anglo-Saxon language in its cultural context, with emphasis on gaining a reading knowledge. Prerequisite: junior standing.

LINGST 4400--Language and Culture (3). (same as Anthropology 4400). Interrelations between language, thought, culture, and society; role of language in cognition; methods and concepts of linguistics in cultural analysis. Prerequisite: ANTHRO/LINGST 2040 or

instructor's consent.

LINGST 4412--Gender, Language and Communication (3). (same as Communications 4412 and Anthropology 4412). Relationships among gender, language, nonverbal communication, and culture. Prerequisite: junior standing or departmental consent.

LINGST 4415--Language and Discourse (3). (same as Communication 4415). Analysis of the rules of social interaction and the functions of language in discourse.

LINGST 4420--Historical Linguistics (3). (same as Anthropology 4420). Methods of tracing the history of languages by glottochronology, and by comparative and internal reconstructions; cultural and linguistic implications of such reconstructions and of areal linguistics. Prerequisites: junior/senior standing or instructor's consent.

LINGST 4600--Structure of American English (3). (same as English 4600). Introduction to English linguistics. Study of the grammar and pronunciation of contemporary English, with the major focus on syntax. Prerequisite: junior standing.

LINGST 4610--History of the English Language (3). (same as English 4610). Historical changes in the grammar and pronunciation of the English language from Old English to the present. Introduction to Indo-European origins of English.

LINGST 4620--Regional and Social Dialects of American English (3). (same as English 4620). The study of regional and social variation in pronunciation, vocabulary, and syntax of American English. Prerequisite: LINGST 4600 and 4610 or equivalent.

LINGST 4630--Phonology (3). (same as English 4630). Survey of the sound patterns of English, with some comparison to other languages. Prerequisite: LINGST 4600 or another introductory course in linguistics or phonetics.

LINGST 4640--Syntax (3). (same as English 4640). Study of the properties of phrase and sentence-level grammar, emphasizing English, with some comparison to other languages. Prerequisite: LINGST 4600 or another comparable linguistics course.

LINGST 4650--Principles of Teaching English as a Second Language (3). (same as English 4650). Linguistic and pedagogical principles of teaching English to speakers of other languages. Prerequisite: LINGST 4600 and 4610 or equivalent.

LINGST 4710--History of the French Language (3). (same as FRENCH 4710). Study of the French language from its Latin origin to the present. The course includes a survey of the external, social, political, and historical factors that have affected the development of French, followed by diachronic study of the internal structural features of the language. Prerequisites: FRENCH 3420 and 3430.

LINGST 4711--History of the Spanish Language (3). (same as Spanish 4711). Diachronic analysis of phonological morphological, and syntactical systems of Spanish, from Vulgar Latin to contemporary dialects. Prerequisite: reading knowledge of Spanish. Recommended: SPAN 3420 and 3430.

LINGST 4720--Structure of Modern French (3). (same as French 4720). An introductory

presentation of the phonological and syntactic systems of contemporary standard French. Prerequisites: FRENCH 3160 or equivalent or instructor's consent.

LINGST 4721--Structure of Modern Spanish (3). (same as Spanish 4721). Synchronic analysis of phonology morphology and syntax of spoken Spanish dialects. Prerequisites: four 3000-level courses in Spanish.

LINGST 4730--Linguistic Theory and Language Acquisition (3). The goal of this class is to study the implications of current linguistic theory for contemporary research on second language acquisition. In particular, the hypothesis that second language acquisition follows some of the same principles as first language acquisition is explored. Course is taught in English. Prerequisites: LINGST 4720, 4721, 4600, or 4860.

LINGST 4810--Psycholinguistics (3). (same as C S&D 4810). Examination of the knowledge and processes that underlie the human ability to produce and understand language. Prerequisite: instructor's consent.

LINGST 4820--Speech Perception (3). (same as Communicative Science and Disorders 4820). Selected topics in the perceptual processing of spoken language. Prerequisite: senior standing.

LINGST 4850--Practical Phonetics for Fieldwork (3). (same as Anthropology 4850). Self-paced course using computer and tape recorded lessons from world's languages. Teaches practical articulatory and transcription phonetics. Weekly meeting with instructor to monitor progress, resolve questions. Prerequisites: junior standing or instructor's consent.

LINGST 4860--Techniques in Linguistic Analysis (3). (same as Anthropology 4860). Problems in analyzing data from various languages. Prerequisites: introductory course in Linguistics or instructor's consent.

LINGST 4870--Field Methods in Linguistics (4). (same as ANTHRO 4870). Intensive training in collection and analysis of data taken from a native speaker of non-Indo-European language. Prerequisites: 9 hours in LINGST or instructor's consent.

LINGST 4960--Special Readings in Linguistics (1-3). Independent study through readings, conferences, reports. Prerequisites: 9 hours in Linguistics and instructor's consent.

LINGST 4970--Studies in Linguistics (3). Topic varies according to instructor. Prerequisite: 9 hours in Linguistics.

LINGST 4991--Honors Thesis in Linguistics (3). Based on an original research project in theoretical or applied linguistics. Topic, director, and second reader approved by Linguistics Committee, College of Arts & Science. Prerequisite: qualification for Honors degree.

Department of Mathematics

FACULTY

PROFESSOR I. M. Aberbach, M. S. Ashbaugh, N. Asmar, W. D. Banks, P. Casazza, C. C. Chicone, T. Christiansen, S. D. Cutkosky, D. S. Edidin, F. Gesztesy, L. Grafakos, A. D. Helfer, S. Hofmann, A. Iosevich, N. J. Kalton, A. Koldobsky, Y. Latushkin, Y. Li, K. A. Makarov, D. I. Mitrea, M. Mitrea, S. Montgomery-Smith, D. H. Pettey, Z. Qin, M. Rudelson, E. Saab, P. Saab, H. Srinivasan, M. I. Taksar, A. Tsoi, I. Verbitsky Q. Zhang

ASSOCIATE PROFESSOR S. Dostoglou, A. Harcharras, C. Morpurgo, M. M. H. Pang, J. Segert, S. Wang, D. T. Weston

BUSINESS MATHEMATICS COORDINATOR J. Aubrey

CALCULUS COORDINATOR Staff

COLLEGE ALGEBRA COORDINATOR T.E. Christiansen

PROFESSOR EMERITUS J. Beem, R. Crownover, J. Huckaba, J. Lange, I.J. Papick, C. Petty, J. Reeder, K. Schrader, D. Sentilles, Z. Zhao

The Department of Mathematics offers a major with either a Bachelor of Arts or Bachelor of Science degree. The BA degree program is intended for students seeking a traditional liberal arts education with a math concentration. The BS degree program prepares students for professional opportunities or graduate work in mathematics. It has more course requirements in the mathematical and physical sciences than the BA program. The BS degree offers an optional emphasis in Actuarial Science and Mathematical Finance.

Students in either degree program must take assessment tests. Exceptions to these requirements must be approved by the director of undergraduate studies and must be an equivalent variation of these requirements.

The department offers BA, BS and MA degrees with majors in Math, as well as MST and MS degrees in Applied Mathematics and PhD degrees in Mathematics. A minor is available.

Major Program Requirements - Mathematics

The Department of Mathematics approves majors in mathematics only for students who have met the following criteria:

- Completion of MATH 2300 (or equivalent)
- Cumulative GPA of at least 2.50 overall
- GPA for math courses numbered 1500 or above (with the exception of MATH 2100) of at least 2.50

In addition, students must meet all degree, college and University requirements including university general education.

Math requirements for a BA degree

Core requirements22

MATH 1500: Analytic Geometry and Calculus I	5
MATH 1700: Calculus II	5
MATH 2300: Calculus III	3
CS 1050: Algorithm Design and Programming I	3
CS 2050: Algorithm Design Programming II	3
MATH 4970: Senior Seminar or	
MATH 4980: Mathematics Problem Solving	3

Additional requirements for BA degree

Students must select a minimum of seven additional courses in math, statistics or computer science at the 4000-level, with at least five taught in the Department of Mathematics.

At least one of the following three courses:

- MATH 4310: Numerical Linear Algebra
- MATH 4140: Matrix Theory
- MATH 4920: Introduction to Abstract Linear Algebra

One of the following two courses:

- MATH 4110: Advanced Calculus with Applications
- MATH 4700: Advanced Calculus I

At least two of the following nine pairs of courses:

- Sequence 1:
- MATH 4100: Differential Equations
 - MATH 4940: Introduction to Complex Variables

- Sequence 2:
- MATH 4100: Differential Equations
 - MATH 4500: Applied Analysis

- Sequence 3:
- MATH 4300: Numerical Analysis
 - MATH 4310: Numerical Linear Algebra

- Sequence 4:
- MATH 4700: Advanced Calculus I
 - MATH 4900: Advanced Calculus II

- Sequence 5:
- MATH 4320: Introduction to Probability Theory (same as STAT 4750)
 - MATH 4520: Statistical Inference (same as STAT 4760)

- Sequence 6:
- MATH 4720: Introduction to Abstract Algebra I
 - MATH 4920: Introduction to Abstract Linear Algebra

- Sequence 7:
- MATH 4340: Projective Geometry
 - MATH 4400: Introduction to Topology

- Sequence 8:
- MATH 4345: Foundations of Geometry
 - MATH 4400: Introduction to Topology

- Sequence 9:
- MATH 4350: Non-Euclidean Geometry
 - MATH 4400: Introduction to Topology

Courses in Related Fields approved by the Math Department.

Mathematics major with a BS degree

Students majoring in mathematics and earning a BS degree will be prepared for professional opportunities or graduate work in mathematics.

A student who is considering graduate studies in mathematics should take as many of the following courses as possible:

For graduate studies in pure mathematics: MATH 4940, 4500, 4900, 4400, 4920

For graduate studies in applied mathematics: MATH 4300, 4310, 4500, 4540, 4315, 4320

Core requirements25

MATH 1500: Analytic Geometry and Calculus I	5
MATH 1700: Calculus II	5

MATH 2300: Calculus III	3
MATH 4100: Differential Equations	3
MATH 4700: Advanced Calculus	3
MATH 4140: Matrix Theory	3
MATH 4720: Introduction to Abstract Algebra I	3

Students are also required to choose one course from each of the following three pairs:

- MATH 4970: Senior Seminar OR
- MATH 4980: Mathematics Problem Solving
- CS 1040: Intro to Prob Solv and Progr OR
- CS 1050: Algorithm Design and Programming I
- MATH 2320: Discrete Mathematical Structures OR
- CS 2050: Algorithm Design Programming II

In addition to the courses listed above, a student must take at least three more math courses at the 4000-level and will be required to take the assessment tests.

The student must also complete a minimum of 13 credits from the following two groups. Both groups must be represented.

Group I

- PHYSCS 2750: University Physics I (5)
- PHYSCS 2760: University Physics II (5)
- CHEM 1310: General Chemistry I (3)
- CHEM 1320: General Chemistry II (3)
- CHEM 1330: General Chemistry III (2)
- BIO SC 1500: General Biology (5)

Group II

- Any 4000-level course in statistics or CECS

Foreign language alternative (for BS degree)

Students may elect to fulfill a different option instead of taking a foreign language. This area consists of at least 12 credits in courses numbered 2000 or above, not from the Mathematics Department, not normally required of all math majors and not appearing elsewhere in the area of concentration. This program is planned by the student’s advisor and must be approved by the director of undergraduate studies.

Double Majors and Dual Degrees

For double majors and dual degrees, students must satisfy all requirements of both degree programs. Some courses may be allowed to count towards both degrees.

Examples of double majors (within Arts and Science):

- BS with majors in Math and Economics
- BS with majors in Math and Statistics
- BS with majors in Math and Chemistry
- BS with majors in Math and Physics

Examples of dual degrees (with other schools and colleges):

- BS with majors in Math and Math Education
- BS with majors in Math and Electrical Engineering
- BS with majors in Math and Computer Science

Departmental Honors

Eligibility

To become a candidate for the BA or BS degree with a major in Mathematics with departmental honors, a student must have a cumulative grade point average that meets the Honors College standards. At present, students with a GPA of 3.30 or higher are automatically eligible to enter the departmental honors

programs.

Requirements

To graduate with departmental honors in mathematics, a student must satisfy the regular BA or BS degree requirements and must have a GPA of 3.5 or higher in all Mathematics Department courses. In addition, the student must have at least 26 credits in mathematics courses numbered 4000 or above. Furthermore, the student must complete one of the two options listed below.

Option 1: Honors Thesis

The student must write an honors thesis in conjunction with a mentorship or in conjunction with MATH 4996. This option requires that the student enroll in MATH 4996.

Option 2: The student’s program of study must include MATH 4700, 4900, 4720 and 4920.

Emphasis in Actuarial Science and Mathematical Finance

The department is experiencing a growing demand from students for courses related to quantitative methods in finance and insurance. This is a result of an increasing demand from financial and insurance institutions for specialists in quantitative methods. The emphasis in actuarial science and mathematical finance will serve those who want to pursue a career in the financial and insurance industries and will also help BS students to prepare for their first actuarial exams.

Emphasis core requirements

MATH 1500: Analytic Geometry & Calculus I	5
MATH 1700: Calculus II	5
MATH 2300: Calculus III	3
MATH 4100: Differential Equations	3
MATH 4700: Advanced Calculus I	3
MATH 4140: Matrix Theory	3
MATH 4355: Investment Science I	3
MATH 4370: Actuarial Modeling I	3
MATH 4371: Actuarial Modeling II	3
MATH 4315 (same as STAT 4710): Introduction to Mathematical Statistics	3
MATH 4320 (same as STAT 4750): Introduction to Probability Theory	3
MATH 4520 (same as STAT 4760): Statistical Inference I ..	3

Select one of the following two math capstone courses:

- MATH 4970: Senior Seminar in Math OR
- MATH 4980: Mathematics Problem Solving.....3

Select one of the following two courses:

- CS 1040: Introduction to Problem Solving and
Programming OR
- CS 1050: Algorithm Design/Programming I.....3

Select one of the following two courses:

- MATH 2320: Discrete Math Structures OR
- CS 2050: Algorithm Design/Programming II

Additional requirements

- STAT 4870: Time Series Analysis (3)
- STAT 4510: Regression and Correlation Analysis (3)
- ECONOM 1014: Principles of Microeconomics (3)
- ECONOM 1015: Principles of Macroeconomics (3)

A minimum of 5 credits from the following courses:

- PHYSCS 2750: University Physics I (5)
- PHYSCS 2760: University Physics II (5)
- CHEM 1310: General Chemistry I w/lab (2)
- CHEM 1320: General Chemistry II w/lab (3)
- CHEM 1330: General Chemistry III w/lab (3)
- BIO SC 1500: Intro. Biological Systems w/lab (5)

Basic skills requirement

Basic skills and general education requirements must be met in accordance with University and College of Arts and Science rules governing degree programs.

Composition

Foundation and graduation requirements of the College of Arts and Science

It is also recommended that the following courses are chosen as electives:

FINANC 3000: Corporate Finance (3)
FINANC 4010: Financial Management (3)
MATH 4590: Investment Science II (3)

Minor in Mathematics

To minor in mathematics, a student must satisfactorily complete the following requirements.

- The equivalents of MATH 1500, MATH 1700 and MATH 2300
- 9 additional credits in math (students not taking MATH 2320 must take all 9 credits at the 4000 level; students taking MATH 23 2320 need only an additional 6 credits at the 4000 level)
- All courses completed with grades in C range or higher
- At least 9 credits used to satisfy the minor requirements taken in residence (College of Arts and Science requirement)

MATHEMATICS COURSES

MATH 0110--Intermediate Algebra (3).

MATH 0110 is a preparatory course for college algebra that carries no credit towards any baccalaureate degree. However, the grade received in MATH 0110 does count towards a student's overall GPA. The course covers operations with real numbers, graphs of functions, domain and range of functions, linear equations and inequalities, quadratic equations; operations with polynomials, rational expressions, exponents and radicals; equations of lines. Emphasis is also put on problem-solving. Prerequisites: Elementary College Algebra or equivalent. Placement in MATH 0110 based on the student's ACT math score or equivalent, in addition to other criteria.

MATH 1100--College Algebra for Calculus Bound Students (3).

MATH 1100 offers a solid mathematical background for students who intend to take business calculus or calculus for the social sciences. Emphasis is placed on developing math skills essential for the study of calculus and on problem-solving. MATH 1100 is a college algebra course, consisting of basic review of the laws of exponents, operations with radical expressions and rational exponents, polynomial identities, factoring, and operations with rational expressions. Students will solve linear, absolute value, quadratic, polynomial, and rational equations and inequalities; equations involving radicals, exponential and logarithmic equations, and systems of equations along with applications. The course covers equations and graphs of lines and circles; the concepts of functions, domain, range, operations with functions, rigid and non-rigid transformations with functions and average rates of change along with the characteristic properties of linear, quadratic, polynomial, exponential and logarithmic functions, applications and modeling. Prerequisite: a score of 22-23 or above on the math component of the ACT or equivalent, or successful completion of Intermediate Algebra with a grade in the C range or above. A student may receive credit for either MATH 1100 or MATH 1120 but not for both.

MATH 1120--College Algebra for Non-Calculus Bound Students (3).MATH 1120 is a college algebra course designed for students who will not be taking calculus. It is an application-driven course, leading the student

from applications to theory. MATH 1120 starts with a unit on making sense of data and functions. Families of functions are used to model real-world behavior and emphasis is placed on linear, exponential, logarithmic, and quadratic functions along with their characteristic properties. Real data sets are used extensively throughout, motivating abstract concepts, and forming the basis of many exercises and examples. Mathematical modeling and curves of best fit are an integral part of the course. The course includes: a review of sets and operations with sets; the laws of exponents and radicals; the solution of linear equations and inequalities; quadratic, polynomial, radical, exponential, and logarithmic equations; and systems of linear and non-linear equations. Also covered in the course: multiple conversion factors from one unit system to another, scientific notation, logarithmic scales, and an extensive study of average rate of change with applications. Prerequisites: A score of 22-23 or above on the math component of the ACT or equivalent, or successful completion of Intermediate Algebra with a grade in the C range or above. A student may receive credit for either MATH 1100 or MATH 1120 but not for both.

MATH 1121--College Algebra Bridge Course for Calculus (1).

MATH 1121 is intended for students who have successfully completed MATH 1120 and have decided to take MATH 1320 or 1400. The topics covered in MATH 1121 are a selection of topics from a traditional College Algebra course, which have not been covered or emphasized in MATH 1120, but are prerequisites for the study of calculus. In this course, emphasis will be put on algebraic manipulative skills as well. Prerequisites: a grade in the C range or above in MATH 1120.

MATH 1140--Trigonometry (2).Prerequisite: MATH 1100 or 1120 or an ACT math score of 23 or higher. A student may receive at most 5 units of credit from among the mathematics courses MATH 1100/1120, 1160. A student may receive credit for either MATH 1100 or MATH 1120 but not for both.

MATH 1160--Precalculus Mathematics (5).Review of elementary algebra. Background material for Mathematics 1500, including algebraic, trigonometric, logarithmic, exponential functions. Prerequisites: MATH 1100 or 1120 or an ACT math score of 23 or higher. A student may receive at most 5 units of credit from

among the mathematics courses 1100/1120, 1140. A student may receive credit for either MATH 1100 or MATH 1120 but not for both.

MATH 1300--Finite Mathematics (3).Introduces matrices and linear programming and probability. Prerequisite: grade of C- or better in MATH 1100 or 1120 or 1160 or an ACT math score of 26 or higher.

Math Reasoning Proficiency Course.

MATH 1320--Elements of Calculus (3).

Introductory analytic geometry, derivatives, definite integrals. Primarily for Computer Science BA candidates, Economics majors, and students preparing to enter the College of BUS. No credit for students who have completed a calculus course. Prerequisite: grade of C- or better in MATH 1100 or 1160 or an ACT math score of 26 or higher. Math Reasoning Proficiency Course.

MATH 1360--Geometric Concepts (3).

This course is primarily for education majors. This course covers topics of Euclidean geometry such as the study of points, lines, angles, polygons, circles, congruence, similarity, transformations, symmetry, area, surface area, arc length, and volume. Polyhedra, spheres, cones, and other solids are discussed. The course includes constructions and proofs, and uses inductive and deductive reasoning throughout. Prerequisite: MATH 1100 or 1120 or equivalent. Math Reasoning Proficiency Course.

MATH 1400--Calculus for Social and Natural Sciences I (3).

The real number system, functions, analytic geometry, derivatives, integrals, maximum-minimum problems. No credit for students who have completed a calculus course. Prerequisite: grade of C- or better in MATH 1100 or 1160 or an ACT math score of 26 or higher. Math Reasoning Proficiency Course.

MATH 1500--Analytic Geometry and Calculus I (5).

Elementary analytic geometry, functions, limits, continuity, derivatives, antiderivatives, definite integrals. Prerequisite: grade of C- or better in MATH 1160 or both 1100 and 1140 or an ACT math score of 26 or higher. Math Reasoning Proficiency Course.

MATH 1500H--Analytic Geometry and Calculus I - Honors (5).

Elementary analytic geometry, functions, limits, continuity, derivatives, antiderivatives, definite integrals. Prerequisite: grade of C- or better in MATH 1160 or both 1100 and 1140 or an ACT math score of 26 or higher. Math Reasoning Proficiency Course.

quisite: grade of C- or better in MATH 1160 or both 1100 and 1140 or an ACT math score of 26 or higher. Honors eligibility required. Math Reasoning Proficiency course.

MATH 1601--Selected Topics in Mathematics-General (1-3).The special topics covered may vary from term to term. This course will be repeated. Prerequisite: instructor's consent.

MATH 1602--Selected Topics in Mathematics-Biological/Physical/Math (1-3).The special topics covered may vary from term to term. This course may be repeated. Prerequisite: instructor's consent.

MATH 1700--Calculus II (5).Definite integrals, applications and techniques of integration, elementary transcendental functions, infinite series. Prerequisite: a grade of C- or better in MATH 1500.

MATH 1700H--Calculus II - Honors (5).Definite integrals, applications and techniques of integration, elementary transcendental functions, infinite series. Prerequisite: a grade of C or better in MATH 1500. Honors eligibility required.

MATH 1800--Introduction to Analysis I (5).This course will cover the material taught in a traditional first semester calculus course at a more rigorous level. The focus of this course will be on proofs of basic theorems of differential and integral calculus. The topics to be covered include axioms of arithmetic, mathematical induction, functions, graphs, limits, continuous functions, derivatives and their applications, integrals, the fundamental theorem of calculus and trigonometric functions. Students in this class will be expected to learn to write clear proofs of mathematical assertions. Some previous exposure to calculus is helpful but not required. No credit for MATH 1800 and 1320, 1400 or 1500. Prerequisites: ACT mathematics score of at least 31 and ACT composite of at least 30 or instructor's consent. Graded on A/F basis only.

MATH 1900--Introduction to Analysis II (5).This course is a continuation of MATH 1800. In this course we shall cover uniform convergence and uniform continuity, integration, and sequences and series. The topics will be covered in a mathematically rigorous manner. No credit for MATH 1900 and 1700 or 2100. Prerequisite: MATH 1800 or instructor's consent. Graded on A/F basis only.

MATH 2100--Calculus for Social and Natural Sciences II (3).Riemann integral, transcendental functions, techniques of integration, improper integrals and functions of several variables. No credit for students who have completed two calculus courses. Prerequisites: MATH 1320 or 1400 or 1500.

MATH 2140--Geometric Axioms and Structures (3).Euclidean Geometry, Axiom systems, spherical geometry, finite geometries, and explorations with technology. Prerequisite: MATH 1340 or 1360.

MATH 2300--Calculus III (3).Vectors, solid analytic geometry, calculus of several variables. Prerequisite: grade of C- or better in MATH 1700.

MATH 2300H--Calculus III - Honors (3).Vectors, solid analytic geometry, calculus of several variables. Prerequisite: grade of C or better in MATH 1700. Honors eligibility

required.

MATH 2320--Discrete Mathematical Structures (3).Sets, functions, logic, relations, induction, recursion, counting techniques, graphs, trees, algorithms. Prerequisites: one of MATH 1700, 2340, or 2140.

MATH 2340--Algebraic Structures (3).Introduction to axiomatic mathematics with emphasis on rings and groups. Applications to elementary number theory. Prerequisite: MATH 1300 and MATH 1320 or instructor's consent.

MATH 3000--Introduction to Advanced Mathematics (3).Gateway to theoretical math courses. Focus on reading and writing math proofs/rigorously developing background needed in Adv Calc/Abstract Alg. Topics include logic, set theory, properties of functions and integers, the real number system, completeness of the real numbers, sequences of real numbers. Prerequisite: MATH 1700 or permission of the instructor/department.

MATH 4001--Topics in Mathematics-General (cr.arr.).Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisites: MATH 2300 and instructor's consent. Departmental consent for repetition.

MATH 4002--Topics in Mathematics-Biological/Physical/Math (cr.arr.).Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisites: MATH 2300 and instructor's consent. Departmental consent for repetition.

MATH 4060--Connecting Geometry to Middle and Secondary Schools (3).Euclidean foundations, logic, Euler Characteristic, congruence, area, Pick's Theorem, volume, Cavalieri's Principle, surface area, similarity, symmetry, transformations, matrices, introduction to spherical geometry. Prerequisites: MATH 1360 or 1500.

MATH 4070--Connecting Algebra to Middle and Secondary Schools (3).A detailed study of integer and rational arithmetic and algebra. Topics include: Binomial Theorem, induction, division algorithm, Euclid's Algorithm, Fundamental Theorem of Arithmetic, Pythagorean triples, modular arithmetic and generalizations to polynomials, matrices and other axiomatic structures. Prerequisite: MATH 1320, enrollment is restricted to Math Education majors.

MATH 4080--Calculus Connections (3).Course topics include: sequences, series, functions, limits, continuity, differentiation, optimization, curve sketching, antidifferentiation, areas of plane regions, lengths of plane curves, areas of surfaces of revolution, and volumes of solids. Prerequisites: MATH 1160, enrollment is restricted to Math Education majors.

MATH 4100--Differential Equations (3).Traditional introductory course in ordinary differential equations. Includes 1st and 2nd order linear differential equations with numerous applications; Laplace transforms; power series solutions; numerical methods, linear systems. Prerequisite: MATH 2300.

MATH 4110--Advanced Calculus With Applications (3).Linear mappings, Jacobi matrices and determinants, change of variables, vector fields, line and surface integrals, theorems of Green, Gauss and Stokes, sequences and series of functions, uniform convergence,

special functions. Prerequisite: MATH 2300.

MATH 4120--Combinatorics (3).Study of a variety of topics from combinatorial mathematics, especially graph theory and enumerative combinatorics. Topics include graph coloring, matchings and coverings, generating functions, recurrence relations, Polya's Enumeration Theorem, introduction to Ramsey theory. Prerequisites: MATH 2320, or instructor's consent.

MATH 4140--Matrix Theory (3).Basic properties of matrices, determinants, vector spaces, linear transformations, eigenvalues, eigenvectors, and Jordan normal forms. Introduction to writing proofs. Prerequisite: one of MATH 2300, 2320, 2120 or 2340.

MATH 4150--History of Mathematics (3).This is a history course with mathematics as its subject. Includes topics in the history of mathematics from early civilizations onwards. The growth of mathematics, both as an abstract discipline and as a subject which interacts with others and with practical concerns, is explored. Pre- or Co-requisite: MATH 2300 or 2340.

MATH 4300--Numerical Analysis (3).Machine arithmetic, approximation and interpolation, numerical differentiation and integration, nonlinear equations, linear systems, differential equations, error analysis. Selected algorithms will be programmed for solution on computers. Prerequisites: MATH 2300 and familiarity with softwares such as Mathematica MatLab or Maple, etc.

MATH 4310--Numerical Linear Algebra (3).Solution of linear systems of equations by direct and iterative methods. Calculation of eigenvalues and eigenvectors of matrices. Selected algorithms programmed for solution on computers. Prerequisites: MATH 2300 and prior experience writing programs in Mathematica and/or in a computer language such as Fortran, Pascal, or C. Recommended: MATH 4140.

MATH 4315--Introduction to Mathematical Statistics (3).(same as Statistics 4710). Introduction to theory of probability and statistics using concepts and methods of calculus. Prerequisites: MATH 2300 or instructor's consent.

MATH 4320--Introduction to Probability Theory (3).(same as Statistics 4750). Probability spaces; random variables and their distributions; repeated trials; probability limit theorems. Prerequisites: MATH 2300 or instructor's consent.

MATH 4325--Linear Programming (3).Linear dependence and rank in vector spaces in R^n , Farkas' Lemma, Polyhedral Decomposition. Strong duality and complementary theorems. The simplex method, revised simplex, and sensitivity analysis. Primal Dual simplex method and network simplex methods. Computational Complexity and Karmarkar's Algorithm. Prerequisites: MATH 4140 or instructor's consent.

MATH 4330--Theory of Numbers (3).Divisibility, factorization, arithmetic functions, means value theorems, distribution of prime numbers, congruences, primitive roots, character theory, Riemann zeta function, and Dirichlet L-functions. Prerequisites: MATH 2300; recommended 2320 or 2340, and 4940/7940.

MATH 4335--College Geometry (3).Euclidean geometry from an advanced viewpoint.

Synthetic and coordinate methods will be used. The Euclidean group of transformations will be studied. Prerequisite: MATH 2300.

MATH 4340--Projective Geometry (3). Basic ideas and methods of projective geometry built around the concept of geometry as the study of invariants of a group. Extensive treatment of collineations. Prerequisite: MATH 2300.

MATH 4345--Foundations of Geometry (3). Coordination of affine, projective planes by means of various kinds of algebraic structures: planar ternary rings, Veblen-Wedderburn systems, division rings, skew fields, and fields. Prerequisite: MATH 2300.

MATH 4350--Introduction to Non-Euclidean Geometry (3). Account of rise, development of non-Euclidean geometries. Intensive study of plane hyperbolic geometry. Prerequisite: MATH 2300.

MATH 4355--Investment Science I (3). Deterministic cash flow streams. The present value. Bonds, bonds' yield, duration. The term structure of interest rates. Single-period random yield analysis. Random returns. Portfolio mean-variance analysis. Markovitz model. Prerequisites: MATH 2300 and STAT 2500 or instructor's consent.

MATH 4360--Actuarial Mathematics (3). Basic actuarial methods, mathematical population studies and models of population growth. Compound interest and annuities certain. Values of endowment and annuities, calculation of premiums, surrender values. Stochastic models of populations growth. Prerequisite: MATH 2300 and STAT 2500, or instructor's consent. No variable credit.

MATH 4370--Actuarial Modeling I (3). This course covers the main probability tools applied to financial risks modeling, and the financial mathematics concepts used in calculating present and accumulated values for various cash flows. It is a helpful tool in preparing for the Society of Actuaries exams P (Probability) and FM (Financial Mathematics), and it is oriented towards problem solving techniques illustrated with previous exam problems. Prerequisites: MATH 2300, and 4320 or STAT 4750. Students are encouraged to take MATH 4355 prior to this course.

MATH 4371--Actuarial Modeling II (3). This course covers the actuarial models and their applications to insurance and other business decisions. It is a helpful tool in preparing for the Society of Actuaries exam M (Actuarial Models), and it is oriented towards problem solving techniques illustrated with previous exam problems. Prerequisites: MATH 2300 and 4320 or STAT 4750. Students are encouraged to take MATH 4355 prior to this course.

MATH 4400--Introduction to Topology (3). Topics from topology of Euclidean spaces, generalizations to metric spaces and topological spaces. Fundamentals of point set topology. Prerequisite: MATH 2300.

MATH 4500--Applied Analysis (3). Solution of the standard partial differential equations (wave, heat, Laplace's eq.) by separation of variables and transform methods; including eigenfunction expansions, Fourier and Laplace transform. Boundary value problems, Sturm-Liouville theory, orthogonality, Fourier, Bessel, and Legendre series, spherical harmonics.

Prerequisite: MATH 4100.

MATH 4510--Higher Algebra (3). Introduction to rings, integral domains, fields, groups. Prerequisites: MATH 2300 OR 2320.

MATH 4520--Statistical Inference I (3). (same as Statistics 4760). Sampling: point estimation; sampling distribution; tests of hypotheses; regression and linear hypotheses. Prerequisite: MATH 4320.

MATH 4540--Mathematical Modeling I (3). Solution of problems from industry, physical, social and life sciences, economics, and engineering using mathematical models. Prerequisites: 3 semesters of calculus and some exposure to ordinary differential equations or instructor's consent.

MATH 4560--Nonlinear Dynamics, Fractals and Chaos (3). Conceptual introduction to nonlinear dynamics, bifurcation and stability of steady states, chaos in nonlinear differential equations and maps, fractal dimension, strange attractors, and applications to physical science. Prerequisite: MATH 4100/7100, 4140/7140, and familiarity with software such as MATH-EMATICA, MATLAB, or MAPLE.

MATH 4570--Fluid Dynamics and Geophysical Applications (3). Mathematical theory of fluid dynamics and applications to meteorology and oceanography. Prerequisites: MATH 2300 and instructor's consent.

MATH 4580--Mathematical Modeling II (3). Solution of problems from industry, physical, social and life sciences, economics, and engineering using mathematical models. More general classes of problems than in Mathematics 4540 will be considered. Prerequisites: 3 semesters of calculus and some exposure to ordinary differential equations or instructor's consent. MATH 4540 is not a prerequisite.

MATH 4590--Investment Science II (3). Derivative securities, forward and future contracts, forward prices, hedging. Mean-variance hedging. Stochastic models of asset dynamics, random walks and binomial models. Capital budgeting, optimal portfolios. Basic option theory, put-call parity. Prerequisite: MATH 2300 and STAT 2500 or instructor's consent. Recommended: MATH 4355. No variable credit.

MATH 4700--Advanced Calculus of One Real Variable I (3). Basic topology of the real line, numerical sequences and series, continuity, differentiability, Riemann integration, uniform convergence, power series. Prerequisite: MATH 2300. Recommended 4140 and one other mathematics course number above 2300.

MATH 4720--Introduction to Abstract Algebra I (3). Basic properties of integers, fundamental theorem of arithmetic, introduction to groups, rings and fields. Prerequisite: MATH 2300. Recommended: MATH 4140 and one other Mathematics course numbered above 2300.

MATH 4800--Advanced Calculus for One Real Variable II (4). Continuation of Advanced Calculus for functions of a single real variable. Topics include sequences and series of functions, power series and real analytic functions, Fourier series. Prerequisites: MATH 4700/7700 or permission of the instructor.

MATH 4900--Advanced Multivariable Calculus (3). This is a course in calculus

in several variables. The following is core material: Basic topology of n-dimensional Euclidean space; limits and continuity of functions; the derivative as a linear transformation; Taylor's formula with remainder; the Inverse and Implicit Function Theorems, change of coordinates; integration (including transformation of integrals under changes of coordinates); Green's Theorem. Additional material from the calculus of several variables may be included, such as Lagrange multipliers, differential forms, etc. Prerequisite: MATH 4700.

MATH 4920--Introduction to Abstract Linear Algebra (3). Study of vector spaces over arbitrary fields: topics include linear maps on finite dimensional vector spaces, bilinear and multi-linear forms, invariant subspaces and canonical forms. Prerequisite: MATH 4720.

MATH 4940--Introduction to Complex Variables (3). Complex functions, contour integration, power series, residues and poles, conformal mapping. Prerequisites: MATH 4110 OR 4700.

MATH 4960--Special Readings in Mathematics (1-3). Prerequisites: MATH 2300 and instructor's consent.

MATH 4970--Senior Seminar in Mathematics (3). Seminar with student presentations, written projects, and problem solving. May be used for the capstone requirement. Prerequisite: 12 hours of mathematics courses numbered 4000 or above.

MATH 4980--Mathematics Problem Solving (3). Creative advanced problem solving bringing together methods such as integration, probability and Euclidean geometry. Prerequisite: MATH 4140 and another 4000 level Mathematics course, or instructor's consent.

MATH 4996--Honors in Mathematics (2). Special work for senior B.A. Honors and B.S. Honors candidates.

Department of Military Science and Leadership

LTC Erik R. Overby, Chair
College of Arts and Science
Army Reserve Officers' Training Corps
202 Crowder Hall
(573) 882-7721

FACULTY

VISITING PROFESSOR E.R. Overby

Army ROTC is a college elective program that teaches the skills needed to succeed in the Army or the corporate world. Students combine classroom time with hands-on experience and learn leadership and management skills. The experience of Army ROTC provides the confidence needed to excel in college and beyond.

The Army ROTC program can be completed through a two- to four-year program designed to develop young men and women into junior commissioned officers in the Active Army, Army Reserve or Army National Guard. In addition to traditional combat roles, Army officers serve in such professional fields as aviation, medical service, finance, personnel management, communications and engineering.

In addition to their academic and military training, Army ROTC students may participate in a variety of extracurricular activities including sports, adventure training, social events and community service.

ROTC students belonging to Army Reserve or Army National Guard units are eligible for additional benefits and can generally opt to stay with their units after graduation or request an active Army assignment. Reserve and National Guard officers

attend one weekend drill per month and an annual two-week training period. In addition to the pay and benefits awarded, Reserve and National Guard officers are free to pursue full-time civilian careers.

All students who desire to enter the Army Reserve Officers' Training Corps must be United States citizens, be in good physical condition and have high moral character. Students must be at least 17 years old to enroll and not more than 30 when commissioned. To be admitted into the advanced course, students must maintain an academic average of 2.0 and pass an Army medical examination.

Program Requirements

The curriculum consists of classroom instruction and a weekly laboratory in which students receive leadership experience. The courses in military science and leadership are both academic and hands-on. Most count toward the student's degree requirements.

The UM Army Reserve Officers' Training Corps academic program consists of:

- A degree in the student's chosen academic subject
- 12 to 22 credits in the military science and leadership curriculum
- An approved course in American military history

Minor in Military Science

With departmental approval, students may earn a minor in military science and leadership by successfully completing the following courses:

- MIL SC 3230: Leadership and Problem Solving
- MIL SC 3240: Leadership and Ethics
- MIL SC 3250: Leadership and Management
- MIL SC 3260: Officership

Additionally, students must complete an approved course in American military history.

MILITARY SCIENCE AND LEADERSHIP COURSES

MILSC 106W--MILPHYSED-INFANTRY (cr.arr.)

MIL SC 108W--MIL PHYS ED-ADV INFANTRY (cr.arr.)

MIL SC 1100--Foundations of Officership (1).Introduces students to issues and competencies that are central to a commissioned officer's responsibilities. Establish framework for understanding officership, leadership, and Army values followed and "life skills" such as physical fitness and time management.

MILSC 1110--Introductory Military Science Laboratory I (1).Field application of skills taught in Military Science 1100, to include leadership, land navigation, tactical skills and basic soldier skills. Prerequisite: MILSC 1100.

MIL SC 1120--Basic Leadership (1).Establishes foundation of basic leadership fundamentals such as problem solving, communication,

briefings and effective writing, goal setting, techniques for improving listening and speaking skills and an introduction to counseling.

MILSC 1130--Introductory Military Science Laboratory II (1).Field application of skills taught in Military Science 1120, to include leadership, land navigation, tactical skills and basic soldier skills. Prerequisite: MILSC 1120.

MILSC 2160--Topics in Military Science (3).Organized study of selected military science topics. Subjects and credit vary semester to semester. Repeatable once with departmental consent. Prerequisites: departmental consent.

MILSC 2200--Individual Leadership Studies (2).Students identify successful leadership characteristics through observation of others and self through experimental learning exercises. Students record observed traits (good and bad)

in a dimensional leadership journal and discuss observations in small group settings.

MIL SC 2210--Intermediate Military Science Laboratory I (1).Progressively more challenging leadership scenarios presented in a field and classroom environment. Students practice basic military skills such as squad-level offensive and defensive operations. First aid topics and drill and ceremony are also taught. Prerequisite: MIL SC 2200.

MIL SC 2220--Leadership and Teamwork (2).Study examines how to build successful teams, various methods for influencing action, effective communication in selling and achieving goals, the importance of timing the decision, creativity in the problem solving

process, and obtaining team buy-in through immediate feedback.

MIL SC 2230--Intermediate Military Science Laboratory II (1).Progressively more challenging leadership scenarios presented in a field and classroom environment. Students practice basic military skills such as platoon-level offensive and defensive operations. Practical application of night land navigation. Prerequisite: MIL SC 2220.

MIL SC 3160--The Military and Wars in American Society (3).Study of how wars and service in the military by citizen volunteers or conscripts affected the subsequent course of United States history.

MIL SC 3230--Leadership and Problem Solving (3).Students conduct self-assessment of leadership style, develop personal fitness regimen, and learn to plan and conduct individual/small unit tactical training while testing reasoning and problem-solving techniques. Students receive direct feedback on leadership abilities. Prerequisite: departmental consent.

MIL SC 3240--Leadership and Ethics (3).Examines the role communications, values, and ethics play in effective leadership. Topics include ethical decision-making, considerations of others, spirituality in the military, and survey Army leadership doctrine. Emphasis on improving oral and written communication ability. Prerequisite: MIL SC 3230.

MILSC 3250--Leadership and Management (3).Develops student proficiency in planning

and executing complex operations, functioning as a member of a staff, and mentoring subordinates. Students explore training management, methods of effective staff collaboration, and developmental counseling techniques. Prerequisite: MIL SC 3240.

MILSC 3260--Officership (3).Study includes case study analysis of military law and practical exercises on establishing an ethical command climate. service as an officer; capstone exercise. Leadership lab Students must complete a semester long Senior Leadership Project that requires them to plan, organize, collaborate, analyze, and demonstrate their leadership skills. Prerequisite: MIL SC 3250.

MILSC 3270--Advanced Transition to Lieutenant I (3).Independent research, analysis and monthly discussion on related military topics. Personal, academic and professional goals and objectives, development and maintenance of an officer evaluation report support form. Prerequisites: MIL_SC 1100, MIL_SC 2200, MIL_SC 3230, MIL_SC 3250 or department head permission.

MILSC 3280--Advanced Transition to Lieutenant II (3).Independent research, analysis and monthly discussion on related military topics. Personal academic and professional goals and objectives, development and maintenance of an officer evaluation report support form. Prerequisites: MIL_SC 1100, MIL_SC 2200, MIL_SC 3230, MIL_SC 3250 or department head permission.

School of Music (IN THE COLLEGE OF ARTS AND SCIENCE)

Robert Shay, Director
140 Fine Arts Bldg.
(573) 882-2604

FACULTY

PROFESSOR M. Budds, L. Perna, W. T. McKenney,
M. Platt, R. Shay, W. Sims, M. Spence, E. Szekely, J.E.
Todd, J. Wenger
ASSOCIATE PROFESSOR P. Crabb, E. Dolbashian, D.
Dolezal, P. Garritson, S. Geibel, A. Harrell, N. Minturn, T.
O'Neal, D. Willett
ASSISTANT PROFESSOR R. Ackmann, I. Akhmadullin,
S. Freund, J. Gaines, S. Jensen, J. Knerr, D. Leibinger, J.
Mabary, A. Manzo, P. Miyamoto, L. Saguiguit
ASSOCIATE TEACHING PROFESSOR M. Knight,
ASSISTANT TEACHING PROFESSOR D. Elshoff, C.
Seitz
VISITING ASSISTANT PROFESSOR W. Mann, A. Rich-
ter, E. Wehr,
ADJUNCT ASSISTANT PROFESSOR N. Bolshakova,
E. Manzo, S. Stubbs, D. Urton,

The School of Music is a department in the College of Arts and Sciences that offers instruction to those who want professional training in music as well as those who wish to pursue music as a vocation. Applied music instruction in piano, voice, string, woodwind, brass and percussion instruments is offered for beginning and advanced students. Elementary and advanced courses are given in music theory and composition. The appreciation, literature and history of music are covered by survey and specialized courses. The school has been an accredited member of the National Association of Schools of Music since 1933.

The School of Music also offers opportunities for all students of the university to participate in various performing groups. Regular programs are presented on campus and throughout the state by groups such as The University Philharmonic Orchestra, Symphonic Wind Ensemble, Marching Mizzou, Symphonic Band, University Band, Jazz Ensembles, Choral Union, University Singers, Chamber Singers, Concert Chorale, Hitt Street Harmony, For All We Call Mizzou, Opera Workshop and many vocal, string, percussion and wind chamber ensembles. Membership in these groups is open to interested students by audition, except University Choral Union and University Band, which do not require an audition.

The department offers BA, BM, MA and MM degrees majors in Music. BS, BM, MEd, MAEd, EdD and PhD degrees with majors in Music Education are offered through the Department of Curriculum and Instruction. A minor is also available.

Departmental Honors

Departmental Honors for the School of Music are designed to reward truly superlative achievement by an undergraduate music student, focusing on the student's area of performance, theory and composition, or history and literature. A minimum GPA

of 3.3 at the onset of the senior year is required, not including grades for large ensembles. The student must initiate the process by submitting a formal application to the director of the school of music at the beginning of the semester prior to the semester of graduation, and must receive approval from his or her area coordinator and faculty adviser. Further information and an application form may be obtained by contacting the director of undergraduate studies in music.

Major Program Requirements - Music

Bachelor of Music

The Bachelor of Music (BM) is a professional degree that offers the maximum concentration in music. The student may focus on instrumental, keyboard or vocal performance; music theory; composition; or music history. In addition, students must complete degree, college and university requirements, including Arts & Science Foundation Requirements.

Major core requirements

Studio instruction courses including recitals.....	16-35
Music theory	23-28
Music history	12-20
Foreign language.....	12-22

Candidates must pass an examination administered by the applied faculty in the area of performance at the completion of their sophomore year before entrance is approved to studio instruction at the 4455-level (for performance concentrations) or 3455-level (for all other concentrations). All BM candidates are required to fulfill the school's recital attendance requirement. In addition, each performance major is required to present a junior and senior recital, which must be approved two weeks in advance by a faculty hearing committee.

Courses completed in the D range may not fulfill music course requirements without the approval of the advisor and the dean, and the student must achieve an overall average of at least C (2.0) in all of the courses attempted in the School of Music at MU.

All BM students must select one of the options below.

Note: Tracks do not appear on transcripts or diplomas.

Composition Track:

MUSIC 1210: Intro to Comp. Tech. & Music.....	2
MUSIC 1230: Aural Training & Sight Singing I	2
MUSIC 1231: Aural Training & Sight Singing II	2
MUSIC 2230: Aural Training & Sight Singing III.....	2
MUSIC 2231: Aural Training & Sight Singing IV	2
MUSIC 1220: Syntax, Structure & Style I.....	2
MUSIC 1221: Syntax, Structure & Style II	2
MUSIC 2220: Syntax, Structure & Style III.....	2
MUSIC 2221: Syntax, Structure & Style IV.....	2
MUSIC 4220: 20th Century Composition Techniques	2
MUSIC 4233: Eighteenth-Century Counterpoint	3
MUSIC 4225: Sixteenth-Century Counterpoint.....	3
MUSIC 4227: Orchestration	2
MUSIC 2215: Composition I.....	2
MUSIC 2216: Composition II.....	2

Bachelor of Arts with a major in Music

Students majoring in music who elect to earn a Bachelor of Arts with a major in Music will complete a general, liberal arts degree with a strong music emphasis. BA degrees include a breadth of study. Students must also complete all degree, college and university graduation requirements, including Arts & Science Foundation Requirements.

Courses completed in the D range may not fulfill music course requirements without the approval of the advisor and the dean, and the student must achieve an overall average of at least C (2.0) in all of the courses attempted in the School of Music.

Major core requirements

MUSIC 1230: Aural Training & Sight Singing I	2
MUSIC 1231: Aural Training & Sight Singing II	2

Minor in Music

Students who have chosen a major in another field but who wish to continue their musical growth may wish to pursue a music minor. Approval for declaration of the Minor in Music must be received from the Director of Undergraduate studies in Music. A minimum of 18 credits is required:

Music Theory	4
MUSIC 1220: Syntax, Structure and Style of Music I	2
MUSIC 1221: Syntax, Structure and Style of Music II	2
Music History	6
MUSIC 1322: Intro to Music in the United States	2
MUSIC 2307: History of Western Music I	2
MUSIC 2308: History of Western Music II	2
Ensembles/Applied Music	4
Any combination of MUSIC 1841, 1842, 2445	
Additional Credits in Theory, History, or Performance	4

Minor In Jazz Studies

Student who have chosen a major in a non-music field may complete a minor in jazz, America’s original art form. The Minor is not intended for beginners, but for students with basic musical knowledge. Hence the prerequisites (Music 1211 or 1220) for three of the required courses (1620, 4645, and 4210) and auditions required for Jazz Ensembles. Approval for declaration of the Jazz Minor must be received from the Director of Jazz Studies.

A minimum of 15 credits is required, including the following:

MUSIC 4210: Jazz Harmony & Arranging I.....	2
MUSIC 4211: Jazz Harmony & Arranging II.....	2
MUSIC 1620: Jazz Piano Class.....	1
MUSIC 4645: Jazz Improvisation.....	2
MUSIC 1311: Jazz, Pop, & Rock.....	3
MUSIC 1311: Jazz Ensemble.....	2

Plus 3 credits of any combination of Studio Instruction (Music 1445/2445) and/or Jazz Ensembles (Music 1841/1846).

Total	15
--------------------	-----------

Certificate in Jazz Studies

Music Majors (BM, BA Music) and music education majors (BSEd) may earn a Certificate in Jazz Studies by completing this core of courses in jazz, America’s original art form.

Approval for admission into the Certificate program must be received from the Director of Jazz Studies.

A minimum of 12 credits is required, including the following:

MUSIC 4210: Jazz Harmony & Arranging I.....	2
MUSIC 4211: Jazz Harmony & Arranging II.....	2
MUSIC 1620: Jazz Piano Class.....	1
MUSIC 4645: Jazz Improvisation.....	2
MUSIC 4317: Hist. St. in Jazz and Popular Music.....	3
MUSIC 1841/1846: Jazz Ensemble.....	2

MUSIC FOR NON-MAJORS

MUSIC NM 1005--Topics in Music-Humanities (1-3). Organized study of selected topics. Subjects vary from semester to semester. May be repeated once for additional credit with departmental consent.

MUSIC NM 1029--Music Travel Course (1-4). Study tour designed to broaden perspective of persons interested in music. Stresses relationship of music to art and ideas in a variety of social and cultural contexts. Participant bears cost of course. Prerequisite: instructor's consent.

MUSIC NM 1085--Problems in Music (cr. arr.) Independent investigation leading to a paper project. May be repeated for credit. Prerequisite: instructor's consent. Sections are: Music Theory, Music Composition, Music History, Music Performance/Pedagogy.

MUSIC NM 1211--Fundamentals of Music I (2). Introduction to rhythmic, melodic, harmonic, and structural elements of music. Designed for non-music majors. No credit for music majors or minors.

MUSIC NM 1212--Fundamentals of Music II (2). Continuation of Music Theory 1211. No credit for music majors or minors. Prerequisites: Grade of C- or better in MUSIC 1211 or instructor's consent.

MUSIC NM 1300--Experiencing Music Through Concert Attendance (1). Development of music listening skills through concert attendance, reading and class attendance.

MUSIC NM 1310--Masterpieces of Western Music (3). Introduction to the Western fine-art tradition through the study of representative masterworks, emphasis on developing listening skills; directed to non-majors.

MUSIC NM 1311--Jazz, Pop, and Rock (3). Historical introduction to jazz (to approximately 1970) and the American popular song, including rock and roll (to approximately 1980); directed to non-majors.

MUSIC NM 1312--History of Jazz (2). Historical survey of American jazz from its origin to the present. No credit for students who have taken MUSIC 1311.

MUSIC NM 1313--Introduction to World Music (3). Introduction to the musical traditions of selected non-Western societies; emphasis on developing listening skills; directed to non-majors, but music majors may enroll.

MUSIC NM 1315--Musical Profile-Bach (1). Systematic study of the music of J.S. Bach directed to the general student. Graded on A/F basis only.

MUSIC NM 1316--Music Profile--Wolfgang A. Mozart (1). A systematic introduction to the music of Wolfgang Amadeus Mozart. Graded on A/F basis only.

MUSIC NM 1317--Musical Profile-Beethoven (1). Systematic study of the music of Ludwig van Beethoven directed to the general student. Graded on A/F basis only.

MUSIC NM 1318--Music Profile--Claude Debussy (1). A systematic introduction to the music of Claude Debussy. Graded on A/F basis only.

MUSIC NM 1319--Music Profile--Igor Stravinsky (1). A systematic introduction to the music of Igor Stravinsky. Graded on A/F

basis only.

MUSIC NM 1320--Musical Profile-Copland (1). Systematic study of the music of Aaron Copland directed to the general student. Graded on A/F basis only.

MUSIC NM 1445--Studio Instruction (1). Acceptable for non-majors and majors requiring a half-hour lesson with instructor's consent. May be repeated for credit.

MUSIC NM 1608--Beginning Piano Class (1). For non-music majors only.

MUSIC NM 1609--Intermediate Piano Class (1). For non-music majors only. Continuation of Music-Instrumental and Vocal Techniques 1608.

MUSIC NM 1612--Elementary Folk Guitar Class (1). Teaching correct hand position, strum patterns, and chords needed for accompaniment of popular and folk songs.

MUSIC NM 1615--Beginning Classical Guitar Class (1). Beginning Classical Guitar Class

MUSIC NM 1617--Beginning Drumset (1). Fundamentals of the drumset, including an historical survey and biographical sketch of several performers. Also can be used as a pedagogical outline for future music teachers.

MUSIC NM 1618--Basic Music Skills (2). Development of music reading and performance skills, including study of pitch, rhythm, notation, structure and interpretation of music. Emphasis on performance. No credit for music majors or minors or students who have completed MUSIC 1211 or 1212.

MUSIC NM 1651--Voice Class I (1). Fundamentals of singing: posture, breath support, control, vocalization, concepts of tone quality, placement and resonance. Literature selected for students with no previous vocal training. Adapted to needs of drama and other interdisciplinary students.

MUSIC NM 1652--Voice Class II (1). Continuation of Music-Instrumental and Vocal Techniques 1651. Prerequisite: MUSIC 1651.

MUSIC NM 2306--Perceiving Musical Traditions and Styles (3). An introduction to music from the late Baroque to the present day, including fine art, folk, and popular music. Designed to serve as a foundation for developing knowledge and skills of musical perception that will eventually lead to thoughtful written commentary on musical performances. Prerequisites: open only to Journalism majors with sophomore standing or higher. Graded on A/F basis only.

MUSIC NM 2306H--Perceiving Musical Traditions and Styles - Honors (3). An introduction to music from the late Baroque to the present day, including fine art, folk, and popular music. Designed to serve as a foundation for developing knowledge and skills of musical perception that will eventually lead to thoughtful written commentary on musical performances. Prerequisites: open only to Journalism majors with sophomore standing or higher. Graded on A/F basis only. Honors eligibility required.

MUSIC NM 2445--Studio Instruction for Non-Majors (1-2). Acceptable for non-majors only. Prerequisites: audition by examining committee and instructor's consent. May be repeated for credit.

MUSIC NM 4445--Studio Instruction for

Non-Majors (1-2). Acceptable for non-majors only. Prerequisites: audition by examining committee and instructor's consent. May be repeated for credit.

MUSIC-MUSIC THEORY

MUS THRY 1210--Introduction to Computer Technology and Music (2). Introduces Finale, music engraving and playback software, and introduces sequencing and other software applications that may impact students while they are in school and as professional musicians.

MUS THRY 1220--Syntax, Structure and Style of Music I (2). Review of fundamentals. Study of rhythm, melody, harmonic, structure and stylistic characteristics of various periods. Application through original composition projects. Prerequisites: none for Music majors; others: instructor's consent.

MUS THRY 1221--Syntax, Structure and Style of Music II (2). Continuation of Music Theory 1200. Study of smaller forms and introduction to chromatic harmony. Prerequisites: Grade of C- or better in MUSIC 1220 or instructor's consent.

MUS THRY 1230--Aural Training and Sight Singing I (2). Development of aural and sight singing skills. Prerequisite or concurrent registration: MUSIC 1220.

MUS THRY 1231--Aural Training and Sight Singing II (2). Continuation of Music Theory 1230. Prerequisite: Grade of C- or better in MUSIC 1230 and 1221 or MUSIC 1221 concurrently.

MUS THRY 2215--Composition I (2). Fundamentals of composition and writing in small forms. Prerequisites: MUSIC 1221 or instructor's consent.

MUS THRY 2216--Composition II (2). Continuation of Music Theory 2215. Prerequisite: Grade of C- or better in MUSIC 2215.

MUS THRY 2220--Syntax, Structure and Style of Music III (2). Chromatic harmony, variation techniques and contrapuntal genres. Study of traditional forms in instrumental, vocal and choral compositions. Applications through original composition projects. Prerequisite: Grade of C- or better in MUSIC 1221.

MUS THRY 2221--Syntax, Structure and Style of Music IV (2). Continued study of chromatic harmony and compositions in larger forms. Application through original composition projects. Prerequisite: Grade of C- or better in MUSIC 2220.

MUS THRY 2230--Aural Training and Sight Singing III (2). Continuation of Music Theory 1231. Further development of aural and sight singing skills with an emphasis on chromatic harmony and decorative pitches. Introduction of structural perception. Prerequisites: Grade of C- or better in MUSIC 1231 and 2220 or MUSIC 2220 concurrently.

MUS THRY 2231--Aural Training and Sight Singing IV (2). Continuation of Music Theory 2230. Prerequisites: Grade of C- or better in MUSIC 2230 and 22210 or MUSIC 2221 concurrently.

MUS THRY 3215--Composition III (2). Further development of creative writing in traditional forms. Prerequisite: Grade of C- or better in MUSIC 2216.

MUSTHRY 3216--Composition IV (2).Continuation of Music Theory 3215. Prerequisite: Grade of C- or better in MUSIC 3215.

MUS THRY 4210--Jazz Harmony and Arranging I (2).Study of basic melodic and harmonic materials commonly used in jazz. Application through arranging projects for small jazz groups. Prerequisites: Music 1211 or 1220; instructor's consent required.

MUS THRY 4211--Jazz Harmony and Arranging II (2).Continuation of 4210. Study of advanced melodic and harmonic materials commonly used in jazz. Application through arranging projects for small and large jazz groups. Prerequisites: Music 4210; instructor's consent.

MUS THRY 4215--Composition V (2).Writing of works in larger forms for a solo instrument or chamber ensemble. Prerequisite: Grade of C- or better in MUSIC 3216.

MUS THRY 4216--Composition VI (2).Continuation of Music Theory 4215. May be repeated for additional credit. Prerequisite: Grade of C- or better in MUSIC 4215.

MUS THRY 4220--20th Century Composition Techniques (2).The study and application of analytical procedures to 20th century music literature. Special readings; individual projects. Prerequisite: Grade of C- or better in MUSIC 2221 or instructor's consent.

MUSTHRY 4221--Analysis of Music (2).An analytical study of rhythmic, melodic, harmonic and structural aspects of 18th-, 19th- and 20th-century music. Prerequisite: Grade of C- or better in MUSIC 2221 or equivalent.

MUS THRY 4222--Computer Technology and Music (2).The introduction of music software for educational and professional use. Music notation software will be learned. Sequencing software will be studied in depth. Hands-on experience with Macintosh computers, multi-timbral synthesizers and various CD-ROMS. Prerequisite: Grade of C- or better in MUSIC 4220 or instructor's consent.

MUS THRY 4223--Eighteenth-Century Counterpoint (3).Study of contrapuntal procedures and representative works of the eighteenth century. Emphasis on compositions and style of Johann Sebastian Bach. Original composition projects: canon, invention, and fugue. Prerequisite: Grade of C- or better in MUSIC 2221 or instructor's consent

MUS THRY 4225--Sixteenth-Century Counterpoint (3).Analysis of contrapuntal procedures and representative compositions of 16th century. Emphasis on styles of Palestrina, Lassus and Victoria. Stylistic writing in two, three or more voices. Prerequisite: Grade of C- or better in MUSIC 2221.

MUS THRY 4227--Orchestration (2).Study of orchestral instruments and the process of scoring for various orchestral combinations. Prerequisite: Grade of C- or better in MUSIC 2221.

MUS THRY 4229--Band Arranging (2).Transcription, scoring of solo and ensemble literature for band instrument combinations of varying sizes up to and including concert band. Prerequisite: Grade of C- or better in MUSIC 2221.

MUS THRY 4230--Choral Arranging (2).

Transcription and arrangement of music suitable for performance by various vocal ensembles. Prerequisite: Grade of C- or better in MUSIC 2221.

MUS THRY 4231--Schenkerian Analysis (3).Techniques of musical analysis developed by Heinrich Schenker. Prerequisite: Grade of C- or better in MUSIC 2221.

MUS THRY 4232--Rhythmic Analysis of Tonal Music (3).Introduction to rhythmic analysis, including context of current thinking, basic concepts, various approaches, selected topics, performance issues, and particular problems. Prerequisite: Grade of C- or better in MUSIC 2221.

MUS THRY 4233--Acoustics of Music (2).The study of tuning systems and the properties, production and reception of musical sound. Prerequisites: instructor's consent.

MUSTHRY 4245--Introduction to Electronic Music (2).Techniques used in the creation of music with tape recorders, voltage-controlled synthesizers and electronics. Prerequisites: Grade of C- or better in MUSIC 4220 or instructor's consent.

MUS THRY 4247--Introduction to Digital Synthesis (2).Introduction to the techniques of digital synthesis, including the study of programming, and Musical Instrument Digital Interfacing. Prerequisite: instructor's consent.

MUSTHRY 4250--Analysis of Musical Styles (2).Analytical study of specific rhythmic, melodic, harmonic, and structural factors which constitute the stylistic practices of a specific period or composer. Prerequisite: Grade of C- or better in MUSIC 4221 or equivalent. Departmental consent for repetition.

MUSTHRY 4267--Advanced Orchestration I (2).Transcription for full orchestra of large works from different style periods. Scoring of original works for orchestra. Seminar, private lessons. Prerequisite: Grade of C- or better in MUSIC 4227.

MUSTHRY 4268--Advanced Orchestration II (2).Survey of original works for orchestra.

MUS THRY 4271--Pedagogy of Music Theory I (2).Techniques and materials for teaching basic music theory courses for high schools and colleges. Prerequisite: Grade of C- or better in MUSIC 2221.

MUS THRY 4272--Pedagogy of Music Theory II (2).Techniques and materials for advanced college courses in music theory. Prerequisite: Grade of C- or better in MUSIC 4271.

MUS THRY 4284--Contemporary Analytical Techniques (2).Study and application of various analytical systems for 20th century compositions. Analysis of music employing contemporary theories. Prerequisite: Grade of C- or better in MUSIC 2221.

MUSIC-MUSIC HISTORY AND LITERATURE

MUS H&LI 1322--Introduction to Music in the United States (2).Historical overview of American folk, popular, and fine-art music; emphasis on listening skills.

MUSH&LI 2307--History of Western Music I (2).Historical survey of selected European practices up to 1700 following a consideration of the major fine-art traditions of the world. Prerequisite: Grade of C- or better in MUSIC 1322.

MUS H&LI 2308--History of Western Music II (2).Historical survey of Western fine-art music from approximately 1700 to the present. Prerequisite: Grade of C- or better in MUSIC 2307.

MUS H&LI 4311--Historical Studies in Art Song (3).Historical survey of works for solo voice and instruments. Prerequisite: Grade of C- or better in MUSIC 2308 and instructor's consent.

MUS H&LI 4312--Historical Studies in Choral Music (3).Historical survey of works featuring choral ensembles. Prerequisite: Grade of C- or better in MUSIC 2308 and instructor's consent.

MUS H&LI 4313--Historical Studies in Opera (3).Historical survey of opera. Prerequisite: Grade of C- or better in MUSIC 2308 and instructor's consent.

MUS H&LI 4314--Historical Studies in Large Ensemble Music (3).Historical survey of works for large instrumental ensembles. Prerequisite: Grade of C- or better in MUSIC 2308 and instructor's consent.

MUS H&LI 4315--Historical Studies in Chamber Music (3).Historical survey of works for small ensembles, instrumental and vocal. Prerequisite: Grade of C- or better in MUSIC 2308 and instructor's consent.

MUSH&LI 4316--Historical Studies in Keyboard Music (3).Historical survey of works for solo keyboard instruments. Prerequisite: Grade of C- or better in MUSIC 2308 and instructor's consent.

MUSH&LI 4317--Historical Studies in Jazz and Popular Music (3).Historical survey of works from the realm of American jazz and popular music. Prerequisite: Grade of C- or better in MUSIC 2308 and instructor's consent.

MUS H&LI 4318--Studies in World Music (3).Advanced systematic study of musical activities in selected world cultures, with the emphasis on developing listening skills and understanding the role of music in a culture. Prerequisite: Grade of C- or better in MUSIC 2307 and 2308.

MUSH&LI 4335--Music of the Middle Ages and the Renaissance (3).Systematic study of European musical practice before 1600. Prerequisite: Grade of C- or better in MUSIC 2308 and instructor's consent.

MUS H&LI 4336--Music in the Baroque Era (3).Systematic study of European musical practice from approximately 1600 to 1750. Prerequisite: Grade of C- or better in MUSIC 2308 and instructor's consent.

MUS H&LI 4337--Music of the Classic Era (3).Systematic study of European musical practice from approximately 1750 to 1800. Prerequisite: Grade of C- or better in MUSIC

2308 and instructor's consent.

MUS H&LI 4338--Music of the Romantic Era (3). Systematic study of European musical practice from approximately 1800 to 1900. Prerequisite: Grade of C- or better in MUSIC 2308 and instructor's consent.

MUS H&LI 4339--Music of the Modern Era (3). Systematic study of fine-art musical practice from approximately 1900 to the present. Prerequisite: Grade of C- or better in MUSIC 2308 and or instructor's consent.

MUS H&LI 4340--Focal Composers (3). Systematic study of the works of landmark composers: J.S. Bach, Mozart, Beethoven, Verdi/Wagner, Debussy, or Stravinsky, studied in rotation. Prerequisite: Grade of C- or better in MUSIC 2308 and instructor's consent. Repeatable for up to 6 hours or credit.

MUS H&LI 4341--Advanced Studies in American Music (3). Systematic study of the diverse streams of musical practice in the United States from the colonial time to the present. Prerequisite: Grade of C- or better in MUSIC 2308 and instructor's consent.

MUS H&LI 4342--Contemporary Issues in Musicology (3). Systematic study of single musicological problem of contemporary relevance. Prerequisite: Grade of C- or better in MUSIC 2308 and instructor's consent.

MUS H&LI 4376--American Musicals (3). (same as Theatre 4720). Historical survey of the development of the 20th-Century American Musical in Theatre and Film.

MUS H&LI 4397--Honors in Music History I (3). Special readings, directed research for graduation with Honors in music history. Prerequisites: Grade of C- or better in MUSIC 2307 and 2308.

MUS H&LI 4398--Honors in Music History II (3). Continuation of Music History and Literature 4397 leading to Honors thesis in music history. Prerequisite: Grade of C- or better in MUSIC 4397.

MUSIC-APPLIED MUSIC

MUS APMS 1435--Studio Instruction for Majors (1). Acceptable as a secondary applied subject on B.S. in music education and B.M. degrees. Materials varies according to educational purpose. May be repeated for credit. Prerequisite: instructor's consent.

MUS APMS 2455--Studio Instruction (1-5). Credit accepted toward all undergraduate music and music education degrees. May be repeated for credit. Prerequisite: instructor's consent.

MUS APMS 3455--Studio Instruction (1-3). Accepted as upperclass credit only in Music Education, music theory, history, or composition. May be repeated for credit. Prerequisites: 8 hours and 4 semesters of MUSIC 2455 or equivalent; audition by committee, and instructor's consent.

MUS APMS 3970--Junior Recital (1). Preparation and presentation of Junior Recital. Appropriate applied music course to be taken concurrently. May be repeated for credit. Each recital must be approved by a committee at least two weeks before the recital.

MUS APMS 4455--Studio Instruction (1-5). For B.M. degrees in performance. Study of pedagogy in studio class. May be repeated for

credit. Prerequisite: 8 hours and 4 semesters of MUSIC 2455; audition; instructor's consent.

MUS APMS 4970--Senior Recital (1). Preparation and presentation of Senior Recital. Appropriate applied music course to be taken concurrently. May be repeated for credit. Each recital must be approved by a committee at least two weeks before the recital.

MUSIC-INSTRUMENTAL AND VOCAL TECHNIQUES

MUS I&VT 1610--Group Piano for Music Majors I (1). Beginning piano for music majors and concentrations only. Prerequisite: instructor's consent.

MUS I&VT 1611--Group Piano for Music Majors II (1). Continuation of 1610. Prerequisite: MUSIC 1610 with a minimum grade of C- or instructor's consent.

MUS I&VT 1620--Jazz Piano Class (1). Beginning piano technique and study of common jazz piano voicings for accompaniment and solo performance. Prerequisites: Music 1211 or 1220; instructor's consent required.

MUS I&VT 2610--Group Piano for Music Majors III (1). Continuation of 1611. Prerequisite: MUSIC 1611 with a minimum grade of C- or instructor's consent.

MUS I&VT 2611--Group Piano for Music Majors IV (1). Continuation of 2610. Prerequisite: MUSIC 2610 with a minimum grade of C- or instructor's consent.

MUS I&VT 2631--Basic Conducting and Score Reading (2). To develop the basic psychomotor and score reading skills prerequisite to the art of conducting.

MUS I&VT 2632--Rehearsal Clinic: String Orchestra Conducting (2). To develop musical and interpersonal skills requisite for successful rehearsal leadership, emphasizing strategies effective for rehearsal of string ensembles. Prerequisites: Grade of C- or better in MUSIC 2631 and either MUSIC 2640 or 2641; or instructor's consent.

MUS I&VT 2633--Rehearsal Clinic: Choral Conducting (2). To develop musical and interpersonal skills requisite for successful leadership of a choral ensemble, emphasizing rehearsal strategies and repertoire. Prerequisite: Grade of C- or better in MUSIC 2631 or instructor's consent. May be repeated once for credit.

MUS I&VT 2634--Rehearsal Clinic: Band Conducting (1). To develop musical and interpersonal skills requisite for successful rehearsal leadership, emphasizing strategies effective for rehearsal of wind and percussion ensembles. Prerequisites: Grade of C- or better in MUSIC 2631 or instructor's consent. May be repeated for credit.

MUS I&VT 2637--Woodwinds I (1). Class instruction in clarinet and saxophone; playing and methods/materials for teaching. Taught on a laboratory basis. Meets twice weekly. Prerequisite: major in Music or Music Education.

MUS I&VT 2638--Woodwinds II (1). Class instruction in flute and double reeds; playing and methods/materials for teaching. Taught on a laboratory basis. Meets twice weekly. Prerequisite: major in Music or Music Education.

MUS I&VT 2640--Strings I (1). Class instruction in violin and viola; playing and methods and

materials for teaching. Taught on a laboratory basis. Meets twice weekly. Prerequisite: major in Music or Music Education.

MUS I&VT 2641--Strings II (1). Class instruction in violoncello and string bass; playing and methods and materials for teaching. Taught on a laboratory basis. Meets twice weekly. Prerequisite: major in Music or Music Education.

MUS I&VT 2645--Brass I (1). Class instruction in trumpet and horn; playing and methods/materials for teaching. Taught on a laboratory basis. Meets twice weekly. Prerequisite: major in Music or Music Education.

MUS I&VT 2646--Brass II (1). Class instruction in trombone, euphonium, and tuba; playing and methods/materials for teaching. Taught on a laboratory basis. Meets twice weekly. Prerequisite: major in Music or Music Education.

MUS I&VT 2648--Percussion (1). Class instruction in percussion instruments; playing and methods and materials for teaching. Taught on a laboratory basis. Meets twice weekly. Prerequisite: major in Music Education.

MUS I&VT 2649--Percussion II (1). Extension of Music 2648. Topics include marching percussion, drumset, Latin accessory instruments, and percussion ensemble literature. Prerequisite: MUSIC 2648 or instructor's consent.

MUS I&VT 3640--Undergraduate Seminar in Vocal Techniques (1). Discusses accepted techniques of singing, practical application to posture, breath support, tone placement, musicianship, diction, interpretation, stage deportment. Recognizing and solving specific vocal problems. May be repeated once for credit. Prerequisite: instructor's consent.

MUS I&VT 3642--Seminar in String Techniques (1). In-depth study of publications, philosophies, repertory, grading, specific problems for the string player. May be repeated once for credit. Prerequisites: MUSIC 2640 and 2641, or instructor's consent.

MUS I&VT 3643--Symposium in Instrumental Music (1). Study of procedures, techniques and literature for variable combinations of wind, string, and percussion classes and the administration of instrumental music programs. Prerequisite: junior standing in Music or Music Education or instructor's consent.

MUS I&VT 3644--Jazz Methods and Materials (1). Training and supervised practice in conducting Jazz Ensembles; study of administration, methods, and materials pertinent to teaching Jazz, Rock, and Commercial Music in high school and college. Prerequisites: junior standing or instructor's consent.

MUS I&VT 3646--Marching Band Techniques (2). Study of techniques and procedures used in the development of field and street marching. Prerequisite: junior standing in Music or Music Education.

MUS I&VT 3661--Accompanying Skills I (2). Sight reading, harmonization, transposition, score reading, score reduction and figured bass realization. Prerequisites: MUSIC 1231, 1231.

MUS I&VT 3662--Accompanying Skills II (2). Continuation of Music-Instrumental and Vocal Techniques 3661 including basic accompanying principles for voice, string, wind and percussion. Prerequisite: MUSIC 3661.

MUSI&VT 3670--Diction in Singing: Italian (1). Study of the correct principles and application of Italian diction in singing the solo vocal, operatic and choral literature; the International Phonetic Alphabet; spoken language drill, study and recitation of representative literature. Prerequisite: sophomore standing.

MUS I&VT 3671--Diction in Singing: German (1). Study of the correct principles and application of German diction in singing the solo vocal, operatic and choral literature; the International Phonetic Alphabet spoken language drill, study and recitation of representative literature. Prerequisite: sophomore standing.

MUSI&VT 3672--Diction in Singing: French (1). Study of the correct principles and application of French diction in singing the solo vocal, operatic, and choral literature; the International Phonetic Alphabet spoken language drill, study and recitation of representative literature. Prerequisite: sophomore standing

MUS I&VT 4645--Jazz Improvisation (2). Creation of a melodic vocabulary for jazz improvisation through study and application of jazz chord-scale theory, solo transcription, and careful listening to the vanguard of jazz. Prerequisites: MUSIC 1211 or 1220, instructor's consent.

MUS I&VT 4661--Piano Pedagogy Survey I (2). Study of approaches for teaching young beginning and intermediate student; survey of materials and resources. Prerequisite: instructor's consent.

MUS I&VT 4662--Piano Pedagogy Survey II (2). Study of approaches for teaching older, more advanced and class piano students; survey of materials and resources. Prerequisite: instructor's consent.

MUSI&VT 4663--Piano Pedagogy Laboratory (1). Supervised instruction in private and class piano. May be repeated once for additional credit. Prerequisites: MUSIC 4661 and 4662.

MUSIC-ENSEMBLE

MUS ENS 1841--Instrumental Ensemble (1). Provides experience in instrumental performance and repertory. Open to all UMC students by audition. May be repeated for credit. Enrollment in Marching Band is limited to a maximum of five semesters. Prerequisite: Audition. Sections are: Philharmonic Orchestra, Chamber Orchestra, Symphonic Band, Wind Ensemble, Concert Band, Varsity Band, Studio Jazz Ensemble, Jazz Lab Band, Marching Band.

MUS ENS 1842--Choral Ensemble (1). Provides experience in choral performance and repertory. Open to all UMC students. May be repeated for credit. Prerequisite: audition required for all but Choral Union; sections are: University Singers, Chamber Singers, Choral Union, Vocal Jazz Ensemble, Concert Chorale, Men's Chorus, Women's Chorus.

MUS ENS 1846--Chamber Music (1). Preparation and performance of chamber music. May be repeated for credit. Prerequisites: audition and instructor's consent. Sections are: String Ensemble, Woodwind Ensemble, Brass Ensemble, Percussion Ensemble. Jazz Combo.

MUS ENS 1865--Opera Workshop (1-2). Study, preparation and performance of selected operatic or musical theatre work in staged or concert versions. Open to all UMC students by audition. Credit arranged; may be repeated

for credit. Prerequisite: audition and instructor's consent.

MUS ENS 2843--Piano Ensemble (1). Study, preparation, and performance of ensemble literature for piano. May be repeated for credit. Prerequisite: instructor's consent.

MUS ENS 4866--Musical Theatre Performance (3). (same as Theatre 4460). A practical study for the actor of theatrical songs through character analysis, lyric interpretation, and movement. A performance course. Prerequisite: instructor's consent.

MUSIC-GENERAL

MUS GENL 1091--Recital Attendance for Undergraduate Music Majors (0). Required attendance of fourteen music events from the Music Department listing. 0 credit, graded on S/U basis, and may be repeated until the total degree requirement is satisfactorily met. Undergraduate music majors only. No tuition charged.

MUS GENL 3005--Topics in Music-Humanities (cr.arr.). Organized study of selected topics in music. Subjects and credit variable. May be repeated for additional credit with departmental consent. Prerequisites: junior standing in Music and instructor's consent.

MUS GENL 3005H--Topics in Music-Humanities - Honors (cr.arr.). Organized study of selected topics in music. Subjects and credit variable. May be repeated for additional credit with departmental consent. Prerequisites: junior standing in Music and instructor's consent. Honors eligibility required.

MUS GENL 3085--Problems in Music (cr.arr.). Independent investigation leading to a paper or project. May be repeated for credit. Prerequisite: instructor's consent. Sections are: Music Theory, Music Composition, Music History, Music Performance/Pedagogy.

MUS GENL 4005--Topics in Musics-Humanities (3). Organized study of selected topics in music. Subjects and credit variable. May be repeated for additional credit with departmental consent. Prerequisites: junior standing in Music and instructor's consent.

Department of Philosophy

A. Melnyk, Chair

FACULTY

PROFESSOR J. J. Bien, W. B. Bondeson, B. Gupta,
P. J. Markie, A. Melnyk, D. E. Sievert, P. L. Vallentyne,
P. Weirich

ASSOCIATE PROFESSOR A. Ariew, Z. Ernst, R. N. Johnson,
M. S. McGrath, P. Robbins, A. von Schönborn,

ASSISTANT PROFESSOR S. Chant, C. S. Horisk,
PROFESSOR EMERITUS J. H. Kultgen

The Department of Philosophy offers a wide variety of undergraduate and graduate courses, including courses on applied ethics, ethical theory, epistemology, logic, metaphysics, philosophy of mind, philosophy of language, philosophy of religion, philosophy of science, philosophy of biology, decision theory, political philosophy, non-Western philosophy, and the history of philosophy. The study of philosophy is not only fascinating in its own right but practical too, since it encourages the development of marketable intellectual abilities. These include the abilities to read, think, and write about conceptually complex and abstract material, and to construct and analyze elaborate chains of reasoning. Philosophy majors go on to pursue careers in such fields as law, medicine, business, the non-profit sector, the church, and academia.

The department offers BA, MA, and PhD degrees in philosophy, as well as an undergraduate minor.

Major Program Requirements - Philosophy

Undergraduates pursuing a major in philosophy must meet all the non-philosophy requirements for a BA degree in the College of Arts and Science, including university general education requirements. In addition, however, they must complete a non-philosophical minor that consists of at least 15 credits in a single department, including at least 6 credits at the 2000 level or above. Finally, they must earn 30 credits in philosophy, with a grade of C- or above in every course, in accordance with the following rules:

Major core requirements.....	30
History of Philosophy: two courses required	
PHIL 3000: Ancient Western Philosophy.....	3
PHIL 3200: Modern Philosophy	3
Logic.....	3
PHIL 2700: Mathematical Logic	
Ethics.....	3
At least one of the following is required:	
PHIL 1100: Introduction to Ethics	
PHIL 4500: Theories of Ethics	
PHIL 4600: Political and Social Philosophy	
Metaphysics and Epistemology	3
At least one of the following is required:	
PHIL 4200: Metaphysics	
PHIL 4300: Epistemology	
PHIL 4210: Philosophy of Mind	
PHIL 4100: Philosophy of Language	
PHIL 4400: Philosophy of Science	
At least two additional 4000-level courses	6
Capstone experience.....	3
PHIL 4950: Senior Seminar	
Philosophy electives.....	6
(1) No course can be used to fulfill more than one of the above requirements, and	
(2) No more than two philosophy courses below the 2000-level can count toward the major.	

Double and Dual Majors

A philosophy major can be paired with a major in another department. Students must meet the requirements of both departments. The program for each department must be approved by the advisor for that department.

Departmental Honors

To earn a BA with honors in philosophy, a student must earn a 3.3 GPA in all courses, and a 3.7 GPA in all philosophy courses; meet all the standard requirements for the regular philosophy major; in addition take PHIL 4998: Honors I in Philosophy, and PHIL 4999: Honors II in Philosophy, writing a satisfactory senior thesis normally of 8,000 to 10,000 words under the guidance of a faculty member who has consented to work with the student; and pass an oral examination on the thesis before a committee of three members of the philosophy faculty.

Minor in Philosophy

To earn a minor in philosophy, students must first gain the permission of their academic unit. Students must earn 15 credits in philosophy, including at least 6 credits at the 2000 level or above that are approved by both the advisor in the student's major and the department's director of undergraduate advising. PHIL 4999 does not contribute to the minor.

PHILOSOPHY COURSES

PHIL 327--Ethical Theory (3).Critical study of some of the main types of ethical theory.

PHIL 1000--General Introduction to Philosophy (3).Introduction to traditional philosophical problems and methods of philosophical enquiry. Consideration given to different philosophical theories on the nature of reality, man, nature and God; knowledge and how it is acquired; values and social issues.

PHIL 1000H--General Introduction to Philosophy - Honors (3).Introduction to traditional philosophical problems and methods of philosophical enquiry. Consideration given to different philosophical theories on the nature of reality, man, nature and God; knowledge and how it is acquired; values and social issues. Honors eligibility required.

PHIL 1100--Introduction to Ethics (3).Introduction to different philosophical theories regarding when acts are morally right rather than wrong; when things are good rather than bad; nature of the "good life", nature of ethical reasoning and justification.

PHIL 1100H--Introduction to Ethics - Honors (3).Introduction to different philosophical theories regarding when acts are morally right rather than wrong; when things are good rather than bad; nature of the "good life", nature of ethical reasoning and justification. Honors eligibility required.

PHIL 1150--Introductory Bioethics (3).This course approaches moral problems in biomedical and scientific research from a philosophical perspective. First, we'll familiarize ourselves with ethics and political philosophy. Then we'll study the ethical issues that arise in connection with a series of issues, including research involving human and animal subjects, eugenics, the human genome project, cloning and stem cell research. By thinking about these issues, we learn how to think critically about particular moral quandaries, as well as to uncover and examine some of our deepest moral commitments.

PHIL 1200--Logic and Reasoning (3).Methods of analyzing and evaluating arguments of all types. Uses both informal and formal techniques. Identifies informal fallacies and introduces elementary symbolic logic.

PHIL 1200H--Logic and Reasoning-Honors (3).Methods of analyzing and evaluating arguments of all types. Uses both informal and formal techniques. Identifies informal fallacies and introduces elementary symbolic logic. Honors eligibility required.

PHIL 2000--Philosophical Ideas in Literature (3).Philosophical ideas and issues revolving around human freedom as these ideas and issues are embodied in great literary works from Plato through Dostoyevski to Burgess. Prerequisite: sophomore standing.

PHIL 2005--Topics in Philosophy-Humanities (1-3).Organized study of philosophical issues to which no regular course is devoted. Subjects and earnable credit may vary from semester to semester. Prerequisite: sophomore standing or instructor's consent.

PHIL 2100--Philosophy: East and West (3).(same as South Asia Studies 2100). Compares the interpretation and role of philosophical concepts such as experience, reason, permanence,

change, immortality, soul, God, etc., in Indian, Chinese and European traditions. Prerequisite: sophomore standing.

PHIL 2200--Philosophy and Intellectual Revolution (3).Examines such revolutions as the Copernican, Darwinian, Marxian and Freudian. What are the new views? How is man's place in the universe affected? What puzzles arise in replacing old by new views? Prerequisite: sophomore standing.

PHIL 2300--Philosophy and Human Nature (3).Human existence, its nature, condition, foundations and significance, according to philosophies such as existentialism, pragmatism, Marxism, positivism, theism, etc. Students are asked to formulate their own self-conceptions. Prerequisite: sophomore standing.

PHIL 2400--Ethics and the Professions (3).Examination of ethical issues confronted by members of different professions such as medicine, law, business, journalism and engineering. Prerequisite: sophomore standing.

PHIL 2410--Philosophies of War and Peace (3).(same as Peace Studies 2410). Moral issues about the recourse to war by the nation and the individual's obligations to participate. The nature of peace, social and personal. Special attention to the Vietnam War and the nuclear age. Prerequisite: sophomore standing.

PHIL 2420--Ethical Issues in Business (3).Major theories of moral obligation and justice and their application to business practices. Corporate responsibility, government regulation, investment and production, advertisement, the environment, preferential hiring, etc. through case studies, legal opinions and philosophical analysis. Prerequisite: sophomore standing.

PHIL 2430--Contemporary Moral Issues (3).Review of the major contemporary ethical theories and their contribution to the resolution of major social issues such as euthanasia, suicide, abortion, capital punishment, violence and war. Emphasis on nature, interests, and rights of persons. Graded on A/F basis only. Prerequisite: sophomore standing.

PHIL 2500--Philosophy and Gender (3).(Same as WGST 2500). A critical examination of central ideas and themes in feminist philosophical thought. Topics may include: sex, marriage, parenthood, reproduction, body image, pornography, prostitution. Prerequisite: sophomore standing.

PHIL 2600--Rational Decisions (3).Principles for making decisions in a rational way. Special attention to principles that use probabilities and utilities. Some discussion of decisions made in conjunction with other people, and decisions made for other people. Prerequisites: sophomore standing and grade of C or better in MATH 1100/1120. Math Reasoning Proficiency Course.

PHIL 2700--Elementary Logic (3).(same as Linguistics 2700). Introduces a symbolic language for representing the structure of arguments. Presents precise rules for demonstrating the validity of arguments. Covers natural deduction for sentence and predicate logic. Develops skill in constructing derivations. Prerequisites: sophomore standing and grade of C or better in MATH 1100/1120. Math Reasoning Proficiency Course.

PHIL 2820--Introduction to Cognitive Science (3).(same as PSYCH 2820 and LINGST 2820). Cognitive science is the interdisciplinary study of the mind. After an overview of the foundations of cognitive science as a whole, we will see what particular sectors of it have to say about mental capacities such as vision, language, categorization, and social cognition. Prerequisites: PSYCH 1000; sophomore standing.

PHIL 3000--Ancient Western Philosophy (3).Philosophical thought on nature, knowledge, the gods, human life and society, from Thales to Augustine. Emphasis on Plato and Aristotle. The relevance of the ancients to contemporary life. Prerequisite: sophomore standing.

PHIL 3100--Medieval Philosophy (3).Major thinkers from St. Augustine through 14th century Ockhamists. Prerequisite: sophomore standing.

PHIL 3200--Modern Philosophy (3).Surveys critical and speculative thinking of modern period from Descartes to Kant in relation to scientific, religious and social movements. Prerequisite: sophomore standing.

PHIL 3300--Between Kant and Hegel (3).Focus on the philosophical accomplishments of this very brief and yet extremely fertile period of the Enlightenment's transformation through Romanticism. Prerequisite: sophomore standing.

PHIL 3400--19th Century Philosophy (3).A careful and sympathetic study of some of the major thinkers of this period, notably Kierkegaard and Nietzsche. Prerequisite: sophomore standing.

PHIL 3500--Existentialism (3).The nature of human existence, the meaning of life, the relation of the individual to nature, society, and any gods that may be, according to Kierkegaard, Nietzsche, Heidegger, Sartre, de Beauvoir, Camus and others. Students are encouraged to come to grips with the issues in relation to their own lives. Prerequisite: sophomore standing.

PHIL 3600--20th Century Philosophy (3).The course will be a survey of some of the notable philosophers/thinkers whose contributions have been made in the twentieth century. Prerequisite: sophomore standing.

PHIL 3700--Selected Modern Philosophers (3).Advanced study of a particular philosopher or a number of philosophers from the same school in the modern period. May be taken twice for credit with permission of the department. Prerequisite: sophomore standing.

PHIL 3800--Selected Contemporary Philosophers (3).Advanced study of a particular contemporary philosopher or philosophers. May be taken twice for credit with permission of the department. Prerequisite: sophomore standing.

PHIL 4001--Topics in Philosophy-General (cr.arr.).Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisites: junior standing and instructor's consent, departmental consent for repetition.

PHIL 4005--Topics in Philosophy-Humanities (cr.arr.).Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisites: junior standing and instructor's consent, departmental

consent for repetition.

PHIL 4100--Philosophy of Language (3). (same as Linguistics 4100). Examination of contemporary views of the relationship between language, minds, and the world. Prerequisites: junior standing; PHIL 2700 or instructor's consent.

PHIL 4110--Intermediate Logic (3).(same as Linguistics 4110). Presents the method of truth trees for sentence and predicate logic. Examines proofs concerning the decidability, soundness, and completeness of formal systems. Emphasizes the theory of formal systems. Prerequisites: junior standing and PHIL 2700. Math Reasoning Proficiency Course.

PHIL 4120--Advanced Logic (3).Elementary set theory. Modal logic, the logic of possibility and necessity. Prerequisites: junior standing and PHIL 2700 or 4110.

PHIL 4130--Probability and Induction (3). This course studies probability, its various interpretations, and its basic principles. It identifies forms of reasoning that establish the probability of a conclusion. The methods of reasoning it treats are at the heart of science and practical affairs. Prerequisite: PHIL 2700.

PHIL 4200--Metaphysics (3).Metaphysics studies what there is and how things are, most generally speaking. Topics may include realism versus nominalism, substance and attribute, facts, modality, identity and causality. Previous work in Philosophy 1000, 3000 or 3200 recommended. Prerequisite: junior standing.

PHIL 4210--Philosophy of Mind (3).Considers theories and arguments in contemporary philosophy of mind, focusing on the nature of mental states, their relation to brain states and the plausibility of various materialist theories of the mind. Prerequisite: junior standing.

PHIL 4220--Philosophy of Religion (3).Considers basis for and nature of religious beliefs. Prerequisite: junior standing.

PHIL 4300--Epistemology (3).An examination of contemporary philosophical theories concerning the nature, sources and limits of knowledge and justified belief. Previous work in PHIL 1000, 3000, 3200 is recommended. Prerequisite: junior standing.

PHIL 4400--Philosophy of Science (3).Why believe the scientific world-view? What, if anything, is the scientific method? Are today's theories really superior to past theories? Examines contemporary philosophical answers to such questions. Prerequisite: junior standing.

PHIL 4410--Philosophy of History (3).Readings from classic and contemporary philosophers of history. Problems about nature and limits of historical knowledge; relation between history and other disciplines; the existence, nature, and kinds of historical laws. Prerequisite: junior standing.

PHIL 4420--Philosophy of Biology (3).A survey of philosophical problems arising from consideration of evolutionary theory and the biological sciences. Topics may include reductionism, sociobiology, biological laws, and epistemic problems relating to evolutionary theory. Prerequisite: junior standing.

PHIL 4500--Theories of Ethics (3).Normative and meta-ethical theories. Topics may include

the rationality and objectivity of morality, the meaning of moral language, the differences between deontological, utilitarian and virtue theories. Prerequisite: junior standing.

PHIL 4510--Medical Ethics (3).Considers moral issues posed by developments in biological sciences and medical technology. Topics may include: genetic engineering, abortion and euthanasia, distribution of health care. Prerequisite: junior standing.

PHIL 4600--Political and Social Philosophy (3).(same as Peace Studies 4600). Contemporary and/or historical theories of justice and the state. Utilitarianism, Liberalism, Libertarianism, Marxism, Communitarianism and Feminism may be among the views covered. Prerequisite: junior standing.

PHIL 4610--Philosophy of Law (3).What is law? Are there pre- or trans-legal rights? Is punishment justifiable? How can judicial decisions be justified? What are the relations between law and morality? Prerequisite: junior standing.

PHIL 4620--Marxism (3).A philosophical examination of (a) the notion of critique as seen in Marx's early and middle writings, and (b) specific topics by such authors as Lenin, Lukacs and Plekhanov. Prerequisite: junior standing.

PHIL 4700--Aesthetics (3).Typical components of art; theories of art as representation, form, expression; relation of art to value. Prerequisite: junior standing.

PHIL 4800--Asian Philosophy (3).(same as South Asia Studies 4800). This course traces the origins of Indian and Chinese philosophical world views. Included are the major ideas in Hindu, Jaina, and Buddhist thought in India, and Taoism and Confucianism in China. Emphasis is placed on the diverse, assimilative, and pragmatic nature of Indian thought and its impact on contemporary Asian philosophy. Prerequisite: junior standing.

PHIL 4810--Philosophy of India (3).(same as South Asia Studies 4810). General development of Indian philosophy. Prerequisite: junior standing.

PHIL 4850--Special Readings in Philosophy (1-3).Prerequisite: junior standing.

PHIL 4950-Senior Seminar in Philosophy (3).A capstone course required of and only open to senior Philosophy majors. Course content will vary, depending on the professor teaching the course. Prerequisite: senior Philosophy major.

PHIL 4998--Honors I in Philosophy (3).Special work for Honors candidates. Prerequisite: junior standing.

PHIL 4998H--HNR:1 PHILOSOPHY (3).HNR:1 PHILOSOPHY

PHIL 4999--Honors II in Philosophy (3).Special work for Honors candidates. Prerequisite: junior standing.

Department of Physics and Astronomy

FACULTY

PROFESSOR H. R. Chandrasekhar, M. Chandrasekhar,
S. J. Chen, G. Forgacs, S. Gangopadhyay,
M. F. Hawthorne, K. Katti, B. Mashhoon, P. Miceli,
P. Pfeifer, S. Satpathy, H. Taub, G. Vignale,
ASSOCIATE PROFESSOR S. Guha, S. M. Kopeikin,
I. Kosztin, W. T. Montfrooij, A. K. Speck, C. Ullrich, C.
Wexler
ASSISTANT PROFESSOR D. Hanuscin, A. Li,
O. Vajk, P. Yu
ASSOCIATE TEACHING PROFESSOR D.C. Kosztin
ASSISTANT TEACHING PROFESSOR Y. Zhang

Physics is the science that studies the structure and properties of matter and transformations of energy. With math as the language and experimental verification as a guide, physical study has established the fundamental laws of nature that are the foundation of all natural science and technology. The study of physics includes learning the general principles and the phenomena that have been discovered and developing the skills that enable such knowledge to be advanced through research.

The Department of Physics and Astronomy offers a major in physics with either a Bachelor of Arts or a Bachelor of Science Degree. The BA degree provides a broad coverage of classical and modern physics while permitting a broader liberal arts education. It is normally selected by students who do not envision a professional career in physics, but plan to enter a professional school later in their academic career, e.g. medicine, dentistry or law, or who desire to pursue a teaching certificate. The BS degree in Physics is designed to prepare students for scientific careers immediately upon graduation, for further training in graduate school, or for teaching high school physics. A minor in physics or astronomy is also available.

Physics education plays a pivotal role in such areas of burgeoning and societal importance as biomedical optical imaging/biomedicine, materials science, and homeland security. Therefore, the Department of Physics has introduced several new courses and electives to train undergraduate students in optical sciences, biological physics, materials sciences and nanotechnology.

Major Program Requirements - Physics

Candidates for both degrees must complete 120 credits with an average grade of C or better. For the BA in physics degree, students must complete 30 credits in physics and 19 credits in math and chemistry. For the BS in physics degree, students

must complete 48 credits in physics and 25 credits in math and chemistry. Students pursuing a Bachelor of Science in Education, emphasis in Physics Education, have the option of receiving a BS in physics degree by completing 33 credits in physics and 19 hours in math and chemistry. In addition, students must meet all degree, college, and university requirements including University general education. All students who complete the BS degree in Physics automatically also complete a minor in Math.

Major core requirements for the BS program

PHYSICS 2800: Undergraduate Seminar in Physics	2
PHYSICS 2750, 2760: University Physics I & II	10
PHYSICS 3150: Introduction to Modern Physics.....	3
PHYSICS 4060: Advanced Physics Lab	3
PHYSICS 4100: Electricity and Magnetism	3
PHYSICS 4120: Introduction to Thermodynamics.....	3
PHYSICS 4140: Mechanics	3
PHYSICS 4700: Introduction to Methods for Mathematical Physics.....	3
PHYSICS 4800: Introduction to Quantum Mechanics I.....	3
PHYSICS 4800: Introduction to Quantum Mechanics II.....	3
PHYSICS 4985: Issues in Modern Physics and Technology	3
MATH 1500, 1700, 2300: Calculus I, II, III	13
MATH 4100: Differential Equations.....	3
MATH 4500: Applied Analysis	3
CHEM 1320: General Chemistry II	3

Electives:

Additional physics/astronomy	9
Additional math	3

Major core requirements for the BS program for Science Education Majors

(this degree is available only to students who are also pursuing a Bachelor of Science in Education, emphasis in Physics education)

PHYSICS 2800: Undergraduate Seminar in Physics	2
PHYSICS 2750, 2760: University Physics I & II	10
PHYSICS 3150: Introduction to Modern Physics.....	3
PHYSICS 4080: Major Themes in Classical Physics	3
PHYSICS 4110: Light and Modern Optics.....	3
MATH 1500,1700,2300: Calculus I, II, III	13
MATH 4100: Differential Equations.....	3
CHEM 1320: General Chemistry II	3

Electives:

Additional physics/astronomy (a student must select 3 courses from the list below)	3
PHYSICS 3010: Introduction to Astronomy.....	3
PHYSICS 4190: Physics and Chemistry of Materials	3
PHYSICS 4310: Physics in Cell and Developmental Biology	3
PHYSICS 4500: Computational Biological Physics.....	3

Major core requirements for the BA program

PHYSICS 2800: Undergraduate Physics Seminar	2
PHYSICS 2750, 2760: University Physics I, II.....	10
PHYSICS 3150: Introduction to Modern Physics.....	3
PHYSICS 4050: Major Themes in Classical Physics.....	3
MATH 1500, 1700, 2300: Calculus I, II, III	13
MATH 4100: Differential Equations.....	3
CHEM 1320: General Chemistry	3

Electives

Additional physics/astronomy	12
------------------------------------	----

Elective Tracks

Students have available a variety of courses from which they may select the required 12 credits of physics electives for the BS or BA degree. The Physics Department offers tracks that allow students to specialize in biological physics, astronomy, condensed matter, or optics. Students may want to pursue one of these tracks, or follow a general track in which they can choose any of the courses that are listed and are not required courses.

Note: Tracks are not indicated on the diploma.

Foreign Language Alternative (BS)

Students who elect an undergraduate program leading to the BS degree with a major in Physics have an option regarding the College of Arts and Science foreign language requirement. This requirement of 12 or 13 credits (depending on the language studied) may be satisfied alternatively by the substitution of an approved specialization. This consists of a minimum of 12 credits at the 2000/3000 level or above and may not include courses normally required of all physics majors. It is to be selected from an area with special relevance to physics and to the student's own interests and future plans.

Students have selected options in aerospace engineering, atmospheric science/geophysical fluid dynamics, radiation biology, chemistry, computer science, electrical engineering (circuits or computer hardware option), geology, nuclear engineering, material science, math and other areas. The choice and planning of an option must be done under the direction of the departmental undergraduate advisor.

Dual Degrees and Double Majors

Students may wish to pursue two baccalaureate dual degrees simultaneously. For example, this might include a BS in Physics and a BS in Engineering, which is the most common choice. In order to receive two baccalaureate degrees, a student must complete a minimum of 132 credits and complete all the specified requirements for both degrees.

Another degree option is a single baccalaureate degree with two majors (double majors), which may be developed with the concurrence of appropriate advisors in the two departments. A notation of the successful completion of the two areas appears on the student's transcript. Both departments must be in the College of Arts and Sciences. Double major options often chosen by a physics major are chemistry, mathematics or geology. Mathematics is a particularly viable double major because the extensive mathematics component normally required in the BS degree with a major in physics, if coupled with a specialization area chosen from mathematics, nearly completes the BS degree with a major in mathematics.

Careful planning, started early in the academic career, is required to meet the conditions of dual majors or dual degrees. Students who complete such programs obtain the maximum from their undergraduate experience.

Departmental Honors

The departmental honors program in physics provides exceptional students with an opportunity to develop skills beyond the normal course work. It also acknowledges those students who have attained a level of achievement beyond what is normally

expected of an undergraduate physics major.

To receive an honors degree with a major in physics, a student must meet the following criteria:

Complete BA or BS degree requirements

Earn a cumulative GPA of at least 3.30

Earn a minimum GPA of 3.50 in Physics Department courses

Complete the equivalent of four units of PHYSICS 4950: Undergraduate Research

Present a paper based on own research prior to graduation at a regional or national meeting, at a regular physics seminar in the Department of Physics and Astronomy or to a faculty panel that consists of no fewer than three Physics Department faculty members

In order to receive departmental honors recognition, the student must be recommended by the director of undergraduate studies. Upon recommendation, the Office of the University Registrar will be notified that the candidate has earned departmental honors recognition. This acknowledgement will appear on the student's diploma as well as on the transcript.

Minor in Physics

A student whose area of concentration is in another department may receive a minor in physics with the completion of the following courses with grades of C or better: PHYSICS 2750, 2760: University Physics (10 credits) plus three additional courses at the 2000/3000 level or above (to include at least one course dealing with topics in modern physics). In order to complete these requirements, the student must complete mathematics through MATH 4100: Differential Equations.

Conversely, a student whose area of concentration is physics may pursue a minor in another department in the College of Arts and Sciences. The *Undergraduate Catalog* lists those departments that offer the minor and specifies their respective requirements.

Minor in Astronomy

A student whose area of concentration is in another department may receive a minor in astronomy with the completion of the following courses with grades of C or better: one year of calculus based physics (the equivalent of PHYSICS 2750: University Physics I and PHYSICS 2760: University Physics II), PHYSICS 3150: Introduction to Modern Physics, PHYSICS 3010: Introduction to Modern Astrophysics, plus two additional courses that can be chosen from any of the astronomy courses offered.

ASTRONOMY COURSES

ASTRON 1010--Introduction to Astronomy (4).Survey of methods of astronomy; description of the solar system, stellar astronomy, structure of the galaxy and the universe. Three hours of lecture and one hour of lab per week (scheduled by the instructor). Satisfies physical science laboratory requirement. Laboratory section: Survey of astronomical methods, instruments, observations and measurement techniques. Prerequisite: high school algebra and plane geometry, or MATH 1100/1120, or equivalent.

ASTRON 1020--Introduction to Laboratory Astronomy (2).Laboratory supplement to Astronomy 1010. Satisfies physical science laboratory requirement. Survey of astronomical methods, instruments, observations and measurement techniques. Prerequisite: high school algebra and geometry, ASTRON 1010

ASTRON 3010--Introduction to Modern Astrophysics (3).(same as Physics 3010). Elements of stellar, and galactic astrophysics. Interpretation of observations and physical conditions of various astronomical objects including stars, gaseous nebulae and, galaxies. Prerequisite: PHYSICS 2760.

ASTRON 3020--Astrophysical Techniques (2).(same as Physics 3020). Elements of modern astronomical instruments, observations and analysis. Prerequisite: PHYSICS 3010 or concurrently.

ASTRON 4180--Solar System Science (3).(same as Physics and Geology 4180). Investigates physical states, interior structures and comparative geology of solar systems bodies: planets, moons, asteroids, comets, sun. Solar system formation and evolution. Prerequisites: MATH 1700, PHYSICS 1220 or 2760 or instructor's consent.

ASTRON 4250--Stellar Astrophysics (3).(same as Physics 4250). Basic astrophysics of stable and unusual stars, stellar systems. Investigates stellar dimensions, radiation, spectra, energy, evolution, populations; interstellar medium, stellar motions and aggregation. Prerequisite: PHYSICS 3150 or concurrently or instructor's consent.

ASTRON 4350--Galactic Astronomy (3).(same as Physics 4350). Observational properties of normal galaxies and clusters of galaxies, Seyfert and emission-line structure and dynamics of galaxies; interacting galaxies, quasi-stellar objects. Introduction to cosmology. Prerequisites: PHYSICS 3010, 4140 or instructor's consent.

ASTRON 4550--Cosmochemistry (3).(same as PHYSICS 4550/7550). Cosmic dust, stardust, spectra, energy, interstellar medium, meteorites, astrominerology. Prerequisites: ASTRON 2760 or 1220; instructor's consent.

ASTRON 4950--Undergraduate Research in Astronomy (cr.arr.).Special studies in astronomy; covers subjects not included in courses regularly offered. Prerequisite: instructor's consent.

PHYSICS COURSES

PHYSICS 1050--Concepts in Cosmology (3).Introduction to fundamental concepts of modern cosmology. Topics include Olbers' paradox, Hubble expansion, Big Bang, and the Cosmic Microwave Background Radiation.

PHYSICS 1100--Science and Inventions (1).This course covers the history of some of the most important inventions in science and their impact on past civilizations, current advances in science and inventions, funding and policies, and critical advances in technology required for future generations.

PHYSICS 1150--Concepts of Physics--Physics for Poets (3).Introduction to fundamental concepts of physics for liberal arts majors. Topics include Conservation of Energy-Momentum, Special theory of relativity, entropy, quantum mechanics and structure from quarks to cosmology.

PHYSICS 1210--College Physics I (4).First course in algebra-based physics. Covers kinematics, dynamics, fluids oscillatory motion, waves and thermodynamics. Three lectures, one lab weekly. Prerequisite: MATH 1100/1120. Math Reasoning Proficiency Course.

PHYSICS 1220--College Physics II (4).Continuation of 1210. Covers electricity and magnetism, optics and modern physics. Three lectures, one lab weekly. Prerequisite: grade of C- or better in PHYSICS 1210.

PHYSICS 1440--Physics of Sound and Music (2).The course will be an introduction to acoustics, and the role that fundamentals physics plays in determining what we hear. No formal physics or music background is required, though the ability to read music is preferable. Topics covered will include standing waves, the harmonic series, synthesis, the response of the human ear, different tuning systems, and characteristics of different families of instruments. Prerequisite: MATH 1100/1120.

PHYSICS 2330--Exploring the Principles of Physics (4).A hands-on course covering topics in Matter, Mechanics, Energy, Light, Sound, Electricity and Magnetism. Pedagogy reflects styles used in K-12 classrooms; emphasis on inquiry, concept development, quantitative applications and technology. Prerequisite: MATH 1100/1120 and sophomore standing required.

PHYSICS 2750--University Physics (5).First course in calculus-based physics for science and engineering students. Covers kinematics, dynamics, oscillations, waves, fluids and thermodynamics. Includes a laboratory. Prerequisite: MATH 1500 or equivalent. Corequisite: MATH 1700.

PHYSICS 2760--University Physics (5).Continuation of Physics 2750. Covers electrostatics, elementary circuits, magnetism, electromagnetic phenomena, optics, matter waves and particles and modern physics. Includes a laboratory. Prerequisites: MATH 1700 and grade of - or better in PHYSICS 2750. Corequisite: MATH 2300.

PHYSICS 2800--Undergraduate Seminar in Physics (2).Introduction to the Physics Department and presentation of topics of current interest in physics by faculty and students. Intended for physics majors at the freshman or sophomore level only.

PHYSICS 3010--Introduction to Modern

Astrophysics (3).(same as Astronomy 3010). Elements of stellar, and galactic astrophysics. Interpretation of observations and physical conditions of various astronomical objects including stars, gaseous nebulae and, galaxies. Prerequisite: PHYSICS 2760.

PHYSICS 3020--Astrophysical Techniques (2).(same as Astronomy 3020). Elements of modern astronomical instruments, observations and analysis. Prerequisite: PHYSICS 3010 or concurrently.

PHYSICS 3150--Introduction to Modern Physics (3).Relativistic kinematics and Lorentz transformations; historical basis for quantum mechanics; atomic structure; physics of solids; nuclear structure and decay. Prerequisite: PHYSICS 2760.

PHYSICS 4050--Electronic Laboratory (4).Acquaints students with techniques for the electronic acquisition and processing of physics data. Digital logic, integrated circuits, microprocessors and interfacing. Two lectures, 2 labs weekly. Prerequisite: PHYSICS 2760.

PHYSICS 4060--Advanced Physics Laboratory I (3).Experiments in atomic, nuclear and solid state physics including X-ray and neutron diffraction, NMR and Mossbauer effect measurements. Experiments familiarize students with modern equipment found in most physics laboratories. Two 3-hour labs weekly. Prerequisites: PHYSICS 3150.

PHYSICS 4080--Major Themes in Classical Physics (3).Introduction to classical physics: mechanics, electromagnetism and thermodynamics, emphasizing the unity and the connections between different parts of it. Prerequisite: PHYSICS 2760.

PHYSICS 4100--Electricity and Magnetism I (3).Mathematical preliminaries, properties of charge distributions at rest and in motion, the field concept, introduces electromagnetic radiation. Prerequisites: PHYSICS 2760.

PHYSICS 4102--Topics on Physics and Astronomy-Biological/Physical/Mathematics (1-3).Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisites: PHYSICS 2760 or instructor's consent, departmental consent for repetition.

PHYSICS 4110--Light and Modern Optics (4).Interaction of light with matter, spectroscopic techniques, wave optics, interferometry, multilayer films, polarization, non-linear optics, design of optical instruments, matrix methods, waveguides, fiber optics, acousto-optic and photo-elastic modulation. Includes both lectures and laboratory. Prerequisite: PHYSICS 2760.

PHYSICS 4120--Introduction to Thermodynamics (3).Development of the concepts of temperature, heat, work, entropy, enthalpy and free energy. Applications to gases, liquids and solids. Statistical methods. Prerequisite: PHYSICS 2760.

PHYSICS 4130--Electricity and Magnetism II (3).Application of Maxwell's equations. Prerequisite: PHYSICS 4100.

PHYSICS 4140--Mechanics (3).Development of fundamental concepts, principles of mechanics using mathematical methods. Many problems used. Prerequisite: PHYSICS 2760.

PHYSICS 4180--Solar System Science (3). (same as Geology and Astronomy 4180). Investigates physical states, interior structures and comparative geology of solar systems bodies: planets, moons, asteroids, comets, sun. Solar system formation and evolution. Prerequisites: PHYSICS 1220 or 2760 or instructor's consent.

PHYSICS 4190--Physics and Chemistry of Materials (3). (same as Nuclear Science and Engineering 4319 and Chemistry 4490). This course will cover fundamental and applied aspects relating to the Physics, Chemistry and Biology of materials with special emphasis on Nanoscience and Nanomedicine. Consists of lectures and experiments in Nanoscience. Prerequisite: PHYSICS 2760 and CHEM 1320 or equivalent and instructor's consent.

PHYSICS 4230--Scanning Electron Microscopy and X-ray Microanalysis (3). This course is designed for senior undergraduate/graduate students. This course covers the basic principles and practical considerations using the scanning electron microscope (SEM) and energy-dispersive spectrometry (EDS) in the characterization of materials. Prerequisite: PHYSICS 3150 and instructor's consent. Graded on A/F basis only.

PHYSICS 4250--Stellar Astrophysics (3). (same as Astronomy 4250). Basic astrophysics of stable and unusual stars, stellar systems. Investigates stellar dimensions, radiation, spectra, energy, evolution, populations; interstellar medium, stellar motions and aggregation. Prerequisite: PHYSICS 3150 or concurrently or instructor's consent.

PHYSICS 4310--Physics in Cell and Developmental Biology (3). (same as Biological Science 4330). Discusses the role of physical mechanisms in specific cellular and developmental processes and phenomena, in particular those characterizing the embryonic stage of multicellular organisms. Each process and phenomenon is first described in biological terms and then within a physical model, with special emphasis on the interplay between the two descriptions. Prerequisite: PHYSICS 1220 or 2760 and BIO SC 2300 or instructor's consent.

PHYSICS 4350--Galactic Astronomy (3). (same as Astronomy 4350). Observational properties of normal galaxies and clusters of galaxies, Seyfert and emission-line structure and dynamics of galaxies; interacting galaxies, quasi-stellar objects. Introduction to cosmology. Prerequisites: PHYSICS 3010, 4140 or instructor's consent.

PHYSICS 4390--Problems in Physics (cr. arr.). Problems in Physics

PHYSICS 4400--The Physics of Electronic Devices (3). This course is designed for graduate and undergraduate students of Physics and Electrical Engineering who have an interest in learning the basic physical idea underlying the operation of electronic devices. The course consists of lectures, handout lecture notes, problem sets, two mid-term and one final exam. Prerequisites: A basic knowledge of modern physics (electromagnetism and quantum mechanics at the level of Physics 3150 or equivalent, or instructor's consent. Graded on A/F basis only.

PHYSICS 4450--Introduction to Cosmology (3). Develops the physical concepts necessary

for understanding the major recent discoveries in cosmology, such as the acceleration of the universe and dark energy. No prior knowledge of general relativity is assumed. Prerequisite: PHYSICS 3150 or equivalent or instructor's consent. Graded on A/F basis only.

PHYSICS 4500--Computational Biological Physics (3). Provides a practical introduction (hands-on approach) to the study of the structure and function of biomolecular systems by employing computational methods and theoretical concepts familiar from the physical sciences. Prerequisite: PHYSICS 1220 or 2760 or instructor's consent.

PHYSICS 4550--Cosmochemistry (3). (same as ASTRON 4550/7550). Cosmic dust, stardust, spectra, energy, interstellar medium, meteorites, astromineralogy. Prerequisites: PHYSICS 2760 or 1220. Instructor's consent required.

PHYSICS 4600--Semiconductor Optics (3). It is an introductory-level course in the field of optical processes in semiconductors (both inorganic and organic) and solid-state optoelectronics, designed both for graduate and undergraduate students of Physics, Chemistry and Electrical Engineering. Prerequisites: PHYSICS 3150 or instructor's consent. Graded on A/F basis only.

PHYSICS 4650--Modern Condensed Matter Physics (3). Introduces the basic concepts and gives an overview of the latest developments of modern condensed-matter physics as the forefront of (nano) science and technology. Combines lectures and computational laboratory, where students use and develop interactive computer simulations. Prerequisites: PHYSICS 3150 or instructor's consent. Graded on A/F basis only.

PHYSICS 4700--Introduction to Methods in Mathematical Physics (3). Introduces mathematical methods and theories of physics. Topics usually covered are complex analysis, partial differential equations, integral equations and tensor analysis. Prerequisite: MATH 4100.

PHYSICS 4800--Introduction to Quantum Mechanics I (3). Foundations of wave mechanics; wave packets; Schrodinger equation and I-D problems; operators and eigenfunctions, spherically symmetric systems. Prerequisite: MATH 4100.

PHYSICS 4810--Introduction to Quantum Mechanics II (3). Review of quantum mechanics and units, forms of radiation, radiation detectors, spacetime symmetries, internal symmetries, nuclear structure and form factors, low-energy nuclear models, recent developments. Prerequisite: PHYSICS 4800 or equivalent.

PHYSICS 4850--Computational Methods in Physics (3). Use of modern computational techniques in solving a wide variety of problems in solid state, nuclear, quantum and statistical physics. Prerequisite: PHYSICS 4800 or instructor's consent.

PHYSICS 4950--Undergraduate Research in Physics (1-3). Special studies for advanced undergraduate students in physics covering subjects not included in courses regularly offered. Prerequisites: instructor's consent, departmental consent for repetition.

PHYSICS 4985--Issues in Modern Physics

and Engineering (3). Students are expected to write a major paper on a selected topic from modern physics or engineering. The paper will review the current state of the experimental and theoretical research on the topic at a level appropriate to their peers. Prerequisite: PHYSICS 3150 or instructor's consent.

RESIDENT INSTRUCTION ASSISTANT PROFESSOR
W. T. Horner

Political science is concerned with government, politics and public policies. In political science courses, students learn how government operates and how to analyze and evaluate public policies and political ideas. This training can help students be more effective as active citizens, as political leaders and as government administrators.

Many political science graduates attend law school or graduate school in political science, public administration, business administration, the social sciences and other subjects. Others are employed in governmental or political jobs as legislative assistants, military officers or lobbyists, and more go into business or private employment. Many public officials and government administrators have political science degrees.

Courses in political science help students learn to think critically, analyze complex material and communicate effectively. Political science classes require extensive writing assignments, and majors are given many opportunities to hone their writing skills.

The department offers BA, MA and PhD degrees with majors in Political Science.

Major Program Requirements - Political Science

Students complete a graduation plan, usually at the end of the sophomore year or beginning of the junior year. They should prepare for political science courses by completing university and College of Arts and Science foundation requirements, including university general education..

Students must complete the following classes with letter grades in the C range or better to file a graduation plan:

POL SC 1100 or an equivalent course
ENGLISH 1000 or an equivalent course
MATH 1100/1120 followed by a mathematics or statistics course (STAT 1200 will not count)
An analytical course e.g. SOCIOL 1000, PSYCH 1000, ECONOM 1014, PHIL 1000 or 1200
POL SC 3000

Students are required to complete 30 credits in political science. Fifteen of the 30 must be numbered 4000 or above.

Major core requirements

All majors must take:

POL SC 3000: Introduction to Political Research
The class should be taken as a sophomore; it introduces majors to the systematic study of political phenomenon and prepares students for upper-class courses. A grade of C- or higher is required.

Comparative government (at least one course required)

POL SC 2600: Canadian Politics & Government
POL SC 2700: Comparative Political Systems
POL SC 2720: European Democracies
POL SC 4600: Latin American Governments
POL SC 4610: Western European Political Systems
POL SC 4640: African Politics
POL SC 4720: Third World Politics
POL SC 4730: Women and Politics
POL SC 4740: Comparative Political Culture
POL SC 4750: Power and Money

International affairs (at least one course required)

POL SC 1400: International Relations
POL SC 4400: Theories of International Relations
POL SC 4410: Politics and War
POL SC 4411: Genocide, Terrorism and Civil War
POL SC 4415: Peacekeeping and Intervention
POL SC 4420: Politics of International Economics
Relations
POL SC 4440: International Organization
POL SC 4500: The European Union in the Global System
POL SC 4540: American Foreign Policies

Political theory/methodology (one course highly recommended, but not required)

POL SC 2800: Introduction to Political Theory
POL SC 2860: American Political Thought
POL SC 4000: Introductory Statistics for Political Science
POL SC 4410: Computing Methods
POL SC 4020: Survey Research Methods
POL SC 4030: Formal Political Analysis
POL SC 4800: Classical Political Theory
POL SC 4810: Modern Political Theory
POL SC 4820: Contemporary Political Theory

American politics/public policy (at least two courses required):

POL SC 2100: State Government
POL SC 2200: The Judicial Process
POL SC 4100: Political Parties and Election Campaigns
POL SC 4110: Political Behavior
POL SC 4120: Media & Politics
POL SC 4130: African American Politics
POL SC 4140: Congress and Legislative Policy
POL SC 4150: The American Presidency
POL SC 4160: Interest Groups
POL SC 4170: Politics of the American South
POL SC 4180: Readings In Public Choice
POL SC 4200: The American Constitution
POL SC 4210: The Constitution and Civil Rights
POL SC 4220: The United States Supreme Court
POL SC 4230: Constitution and Civil Liberties
POL SC 4310: Comparative State Politics
POL SC 4320: Public Policy
POL SC 4370: Issues in Public Bureaucracy

Options

For students who want to concentrate on a specific area, suggestions for a course of study are available from the academic advisor. These include:

Government service for students who want to become government administrators

Public information and reporting for students who plan to be governmental press secretaries, public information specialists, interest group lobbyists or government reporters

International relations for students who want to work for multinational corporations or international agencies

Graduate school preparation

Law school preparation

Departmental Honors

Students who have honors eligibility and a 3.5 GPA may enter the departmental honors program. Students who successfully complete a senior honors paper with a letter grade in the B range or better will have the phrase “with Honors in Political Science” added to their diplomas. Each year many political science honors students are selected for Phi Beta Kappa, Mortar Board, Golden Key and other scholastic honoraries.

Students who plan to enter graduate school are encouraged to enter the departmental honors program and to speak with a faculty member early in their academic career. Some areas of graduate study require significant preparation in language, statistics and methodology.

Minor in Political Science

To earn a minor in political science, students must complete 15 credits, including the following:

POL SC 1100, American Government (3) or an equivalent course

Additional political science courses totaling 12 credits with at least 6 at the 4000 level

- No more than 3 internship credits may be included and will not count as a 4000 level
- Nine credits must be in residence including 6 at the 4000 level
- A grade of C- or better is required of all political science classes in either a minor or a major with an overall GPA of 2.0 or greater.

Internships

The Political Science Department offers an active internship program in a variety of governmental settings including work with state legislators, administrative agencies, political candidates, lobbyists, members of Congress, statewide elected officials and state political parties. Seniors in good standing with a GPA of 2.67 and juniors in good standing with a GPA of 3.0 who have completed appropriate course work are eligible to apply. No more than 3 internship credit hours may be included in the 30 hours required for a major.

POLITICAL SCIENCES COURSES

POL SC 1004—Topics in Political Science - Social Science (1). Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

POL SC 1100—American Government (3). Topics covered include Constitution, federalism, civil liberties, political attitudes, interest groups, political parties, nominations, elections, and campaigns, voting behavior, Congress, Presidency, bureaucracy, and judiciary. Meets state law requirement.

POL SC 1100H—American Government - Honors (3). Topics covered include Constitution, federalism, civil liberties, political attitudes, interest groups, political parties, nominations, elections, and campaigns, voting behavior, Congress, Presidency, bureaucracy, and judiciary. Meets state law requirement. Honors eligibility required.

POL SC 1400—International Relations (3). Contemporary international affairs including family of nations, control of national foreign policies, competition and cooperation in legal, political, economic, social fields.

POL SC 1400H—International Relations - Honors (3). Contemporary international affairs including family of nations, control of national foreign policies, competition and cooperation in legal, political, economic, social fields. Honors eligibility required.

POL SC 2004—Topics in Political Science - Social Science (1). Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisite: departmental consent for repetition.

POL SC 2100—State Government (3). Government and politics at the state level, with emphasis on Missouri. Meets state law constitutional requirement.

POL SC 2200—The Judicial Process (3). Analysis of roles played by American judges and courts in democratic policy formation.

POL SC 2600—Canadian Politics and Government (3). Introductory survey of Canada, including constitutional development, governmental institutions, political participation, and Canadians' political attitudes and behaviors. Prerequisite: sophomore standing.

POL SC 2700—Comparative Political Systems (3). Analysis of major political systems selected from Europe, Asia, Africa, and Latin America, emphasizing basic concepts of comparative political study. Prerequisites: POL SC 1100.

POL SC 2700H—Comparative Political Systems - Honors (3). Analysis of major political systems selected from Europe, Asia, Africa, and Latin America, emphasizing basic concepts of comparative political study. Prerequisites: POL SC 1100. Honors eligibility required.

POL SC 2710—Politics and the Military (3). (same as Peace Studies 2710). Comparative study of post-cold war civil-military relations; military as an interest group, change agent, policy instrument and competitor of civilian politicians.

POL SC 2720—European Democracies (3). This course provides an introduction to the institutions and issues in contemporary

European political systems. It covers domestic institutions and policies as well as the developments of the European Union. Prerequisites: sophomore standing.

POL SC 2800—Introduction to Political Theory (3). Selected great political theorists and their contemporary relevance. How to think critically about political ideas and ideologies. Prerequisite: sophomore standing.

POL SC 2860—American Political Thought (3). Examines major themes that shaped three centuries of American political thought, including slavery, religion, and the tension between unity and difference. Readings are drawn from primary sources (Jefferson, Adams, Mason, Tocqueville, Calhoun, Lincoln, Stowe, Baldwin) as well as contemporary analytic commentary on those sources (Bercovitch, Hartz, Wolin, Guinier, Morrison). Prerequisite: sophomore standing.

POL SC 3000—Introduction to Political Research (3). This course is an introduction to the systematic analysis of political phenomenon. It examines the meaning of "explanation" and "causal reasoning," and research strategies designed to make valid causal inferences. The course overview experimental design, measurement, hypothesis formulation and testing, and the display of information, using substantive examples from two or more fields of political science for illustrative purposes. Prerequisite: sophomore standing.

POL SC 4000—Introductory Statistics for Political Science (3). Basic course in applied statistics and inference using extensive examples from voting behavior, congressional behavior, international relations and public policy. Topics included nonparametric measures, probability, and rudimentary hypothesis testing; computer applications with political data using SAS. Prerequisites: MATH 1100/1120 or equivalent, concurrent enrollment in POL SC 4010. Math Reasoning Proficiency Course.

POL SC 4004—Topics in Political Science - Social Science (1). Organized study of selected topics. Subjects and earnable credit vary from semester to semester. Prerequisite: instructor's consent.

POL SC 4010—Computing Methods (1). Develops computer-based skills with political science data. SAS, and other packages used in mainframe and PC environments. Graded on S/U basis only. Prerequisite: concurrent enrollment in POL SC 4000.

POL SC 4020—Survey Research Methods (3). Selection of survey research topics, questionnaire development, sampling, interviewing, coding and preparation of data for computer analysis. Emphasis on practical participation. Prerequisite: POL SC 1100 and junior standing.

POL SC 4030—Formal Political Analysis (3). Introductory course in formal mathematical models of political behavior and political institutions. Topics includes electoral rules, agenda control, measures of power, collective action, constitutions. Prerequisites: MATH 1100/1120 or equivalent.

POL SC 4100—Political Parties and Election Campaigns (3). Development, organization, functions, activities of major and minor political parties; principles and procedures of manag-

ing campaigns; campaign finance; election administration. Prerequisites: POL SC 1100 junior standing.

POL SC 4110—Political Behavior (3). Economic, psychological, and social dimensions of political behavior; participation, leadership and elites; political attitudes; voting behavior and decision-making processes. Prerequisite: POL SC 1100 and junior standing.

POL SC 4120—Politics and the Media (3). The role and importance of mass media in the political process, primarily the U. S. Constitutional protections of the press, politics of media control, political news and advertising, effects of information on election campaigns, political institutions, and policymaking. Prerequisite: POL SC 1100 and junior standing.

POL SC 4130—African-American Politics (3). (same as Black Studies 4130). Surveys political participation of African-Americans in American politics. Analyzes their public lives in the context of elections, behavior of political organizations, social movements, parties, and level of government. Prerequisites: POL SC 1100 and junior standing.

POL SC 4140—Congress and Legislative Policy (3). Study of national and state legislative systems and legislative policy making, with emphasis on Congress. Prerequisite: POL SC 1100 and junior standing.

POL SC 4150—The American Presidency (3). Evolution of the presidency; particular emphasis on constitutional and political roles played by chief executive in shaping public policy. Prerequisites: POL SC 1100 and junior standing.

POL SC 4160—Interest Groups (3). Development, organization, functions, activities, internal politics of special interest groups such as business, labor, agricultural and public interest groups; lobbying and techniques for influencing public policy in the American political system. Prerequisite: POL SC 1100 and junior standing.

POL SC 4170—Politics of the American South (3). This course focuses on the politics of the American South in the latter part of the 20th century and the early years of the current millennium. For undergraduate credit only. Prerequisite: POL SC 1100, junior standing or instructor's consent.

POL SC 4200—The American Constitution (3). Leading American constitutional principles as they have evolved through important decisions of the United States Supreme Court. Prerequisites: POL SC 1100; junior standing.

POL SC 4210—The Constitution and Civil Rights (3). Civil rights in the American constitutional context emphasizing citizenship, voting rights, purposeful and structural discrimination (age, race, sex, physical), and legal remedies (equal opportunity, affirmative action). Prerequisite: POL SC 1100 and junior standing.

POL SC 4220—The United States Supreme Court (3). Role of Supreme Court in American system of government; particular attention given to reading biographies and writings of the Justices. Prerequisite: POL SC 1100 and junior standing.

POL SC 4230—Constitution and Civil Liberties (3). Civil liberties in the American

constitutional context emphasizing freedom of expression (religion, speech, press, assembly), rights of accused and right to privacy. Prerequisite: POL SC 1100 and junior standing.

POL SC 4310—Comparative State Politics (3). Analyzes similarities and differences of state politics and the ways in which such politics are shaped by political and socioeconomic environments of the states. Prerequisite: POL SC 1100 and junior standing.

POL SC 4320—Public Policy (3). Introduction to the study of public policy in the United States. Analyzes public policy choices at the national, state and local level and the variety of forces which serve to shape policy decisions. Prerequisite: POL SC 1100, and junior standing.

POL SC 4330—Policy Analysis (3). Approaches to designing public policies including cost-benefit accounting, decision theory, and programming. Investigation of formulation of policy objectives with special emphasis on problems of collective choice and rationales for market intervention. Prerequisite: POL SC 1100 and junior standing.

POL SC 4350—Issues in Public Policy (3). Investigates selected public policies on an intensive basis. Policy issues vary. Prerequisite: POL SC 1100 and junior standing.

POL SC 4370—Issues in Public Bureaucracy (3). Investigates selected political and administrative problems affecting public bureaucratic units. Context varies. Prerequisite: POL SC 1100 and junior standing.

POL SC 4380—Politics of Criminal Justice (3). Course explores the political motivations for and the substantive consequences of state and federal criminal justice policy in the United States. Prerequisite: junior or senior standing.

POL SC 4400—Theories of International Relations (3). Surveys Theories of International Relations. Analyzes conceptions of decision-making, foreign policy behavior and international society. Prerequisite: junior standing

POL SC 4410—Politics and War (3). (same as Peace Studies 4410). Why do wars occur? The functions of force and uses of a threat of force. Problems of national security strategy and arms control. Prerequisite: junior standing.

POL SC 4415—Peacekeeping and Intervention (3). This course will survey the causes and consequences of peacekeeping and intervention as well as assess the conditions that lead to successful and failed missions. Prerequisite: junior standing.

POL SC 4420—Politics of International Economic Relations (3). Study of reciprocal interaction between global politics and economics. Includes politics of north/south relations, multinational non-state actors, arms transfers and dependency. Prerequisites: junior standing.

POL SC 4440—International Organization (3). Forms and functions of governmental (United Nations, European Union, NATO) and nongovernmental international organizations. POL SC 1100 and junior standing.

POL SC 4500—The European Union in the Global System (3). Provides an understanding

of the European Union from the perspective of international relations and comparative politics. Topics covered pertain to the institutions, politics and policies of the European Union and its member states. Prerequisites: POL SC 1100, 1400 and junior standing.

POL SC 4540—American Foreign Policies (3). Bases, formulation, evaluation of current American foreign policies. Prerequisite: junior standing.

POL SC 4600—Latin American Politics (3). Development, present status of political institutions in South America; emphasizes current political problems. POL SC 1100 and junior standing.

POL SC 4610—European Political Systems (3). Comparison of political cultures, institutions, and processes of Britain, France, West Germany, and selected smaller countries in Western Europe. Prerequisite: junior standing.

POL SC 4640—African Politics (3). (same as Black Studies 4640). A general comparative course focusing on post-independent Africa. Theories and concepts related to decolonization, nationalism, democratization, and ethnicity; also institutional forms and organizations: political parties, parliaments, and executives. POL SC 1100 and junior standing.

POL SC 4660—Canada in North America (3). This course focuses on the role of Canada in North America. The main topic areas include the evolution of Canada as a political system; political structures and processes; regionalism and social movements; political, economic and social connections with North America; and the future of Canada in North America. Prerequisite: POL SC 2600.

POL SC 4710—Terrorism: Religious, Ethnic and Ideological Politics (3). Terrorism as political violence extending beyond the acts themselves. Examines major modern movements, e.g. Northern Ireland, Basques (Spain), Germany, Algeria, Arab-Israeli, Iran, India, Sri Lanka, Peru, Argentina, Uruguay. Prerequisite: junior standing.

POL SC 4720—Third World Politics (3). (same as Black Studies 4720). Comparative, interdisciplinary analysis of the politics of selected states in Southeast Asia, Africa, and Latin America. Special attention given to the problems of political and socioeconomic development. Prerequisites: junior standing or instructor's consent.

POL SC 4730—Women and Politics (3). (same as Women's and Gender Studies 4730). This course examines women's political participation and public policies towards women in countries around the world. Prerequisites: POL SC 1100; junior standing.

POL SC 4740—Comparative Political Culture (3). Review of the many divergent conceptions of political culture and examination of the dynamics and consequences for the performance of political systems and the behavior of their citizenry. Comparison of particular cultures of selected regions including East Asia, Europe and the Middle East, Latin America, and North America. Prerequisite: junior standing.

POL SC 4750—Power and Money (3). This course provides an introduction to comparative

political economy by focusing on the following questions. How and why do governments promote economic prosperity? Does democracy make people richer or poorer? Is it true that "money is power"? Can poor countries enjoy a stable democracy? Prerequisite: junior standing.

POL SC 4800—Classical Political Theory (3). Great Greek, Roman, and Medieval political theorists on the relation of psychology, ethics, politics, and the best form of government. Prerequisite: junior standing or instructor's consent.

POL SC 4810—Modern Political Theory (3). Great political theorists from Machiavelli through Marx on the nation state, capitalism, liberalism, conservatism, and Marxism. Prerequisite: junior standing or instructor's consent.

POL SC 4820—Contemporary Political Theory (3). Great contemporary thinkers on Western vs. Eastern Marxism, existentialism, critical theory, political theologies, postmodernism, feminism, environmentalist ideologies, biological approaches to politics. Prerequisite: junior standing or instructor's consent.

POL SC 4860—Liberal Thought and the Ownership of the Self (3). (same as Women's and Gender Studies 4910). Introduces students to foundational premises of liberal political thought through examination of the dispute between Locke and Filmer. Analyzes subsequent rethinking of that debate in works by Rousseau, Wollstonecraft, nineteenth-century American slaves, contemporary feminists, and communitarians. Prerequisite: junior standing.

POL SC 4890—Contemporary Political Analysis (3). This course introduces public choice writings. Public choice applies economic methods to the study of politics. Topics covered include the appropriate size of the state, how individuals organize to achieve shared goals and how voters chose in elections. Prerequisite: junior standing or instructor's consent.

POL SC 4940—Political Science Internship (3). Work experience in a public or private organization that is relevant to the political science major coordinated by a faculty member. Prerequisites: junior standing with a 3.0 GPA; or senior standing with 2.67 GPA. Must be in good standing.

POL SC 4985—Problems in Political Science (1). Independent investigation to meet needs of the individual student. Prerequisite: instructor's consent.

POL SC 4986—Special Readings in Political Science (1). Independent readings selected in consultation with supervisory faculty member. Prerequisite: instructor's consent.

POL SC 4995—Political Science Capstone (3). Readings and discussions in selected areas of political science (comparative, American, international affairs, public administration/policy or theory). Subject depends on instructor. Prerequisites: political science major, senior standing.

POL SC 4996—Political Science Capstone, Honors (1). Special readings, reports in the several fields of political science. For political science Honors students. Prerequisite: senior standing. Honors eligibility required.

PROFESSOR EMERITUS W. Anderson, B. Biddle,
R. G. Geen, M. Thelen, D. Wright

The faculty and staff of the Department of Psychological Sciences are committed to providing students with a high quality, broadly-based undergraduate education. Understanding that undergraduate students use the psychology major as preparation for a variety of postbaccalaureate experiences, the department is dedicated to offering a wide range of courses and services to students. While some students are interested in pursuing psychology-related interests in graduate school, most are interested in pursuing careers after graduating with a Bachelor of Arts (BA).

Regardless of a student's ultimate goals, faculty members believe that students will be best served by completing a rigorous research-oriented program of study. Therefore, students should expect instructors to take a scientific approach to the psychological content of each course.

The department offers BA, MA, and PhD degrees with a major in Psychology. A minor is also available.

Major Program Requirements - Psychology

To graduate with a Bachelor of Arts with a major in Psychology in the College of Arts and Science, a student must complete all degree, college and university graduation requirements, including university general education as well as all degree and college or school requirements. Students are reminded to check the *Undergraduate Catalog* for course descriptions and prerequisite information..

Major Core Requirements

- The psychology major requires 30 credits.
- All courses that count toward the psychology major requirements must be completed with a grade of C or better. Grades of C- or below will not be accepted. This includes STAT 1300 or its equivalent (a required course for all psychology majors).
- Students must complete at least two psychology courses numbered 4000 or above.
- Students must complete at least one psychology course numbered 3000 or above that is designated Writing Intensive. No more than 40 credits in psychology can count toward the credits needed for graduation. Students may use no more than 9 hours of Special Problems Courses (PSYCH 2950, 4950 & 4960) toward graduation.

Required courses

PSYCH 1000: General Psychology	3
Research methods sequence	
STAT 1300 or its equivalent	3
PSYCH 3010: Research Methods in Psychology	3
PSYCH 3020: Research Methods in Psychology II	3
Capstone course (psychology lab course).....	3-6

Distribution Areas

Psychology majors are required to take one course from each of five distribution areas. This ensures that students will have exposure to a wide range of psychological theory and research. In addition, students choose one additional Psychology course to receive additional education according to their interest. The psychology faculty believes that students with a degree in psychology should understand specific ideas related to each of the five distribution areas. Although the distribution areas are presented below as distinct areas of study, a great deal of overlap exists among them. Students should understand the ways in which the various areas complement one another and gain the ability to integrate information learned in the different areas.

Learning and Cognition distribution area.....3
This distribution area studies the mechanisms of the mind and how they are altered by experience. Courses in this distribution area include:

- PSYCH 2820: Introduction to Cognitive Science
- PSYCH 3110: Theories of Learning
- PSYCH 3130: Decisions, Values & Choice
- PSYCH 3140: Cognitive Psychology
- PSYCH 3150: Human Memory
- PSYCH 3160: Perception & Thought
- PSYCH 4110: Perception

Biological and Comparative distribution area.....3
This distribution area studies the biological basis of the behavior of humans and other animals. Courses in this distribution area include:

- PSYCH 2210: Mind, Brain, & Behavior
- PSYCH 2220: Drugs and Behavior
- PSYCH 3830: Health Psychology
- PSYCH 4210: Physiological Psychology
- PSYCH 4230: Clinical Psychophysiology
- PSYCH 4240: Cognitive Neuroscience

Social/personality distribution area.....3
This distribution area employs scientific methods to understand the nature and causes of individuals' thoughts, feelings and behavior in social situations. Courses in this distribution area include:

- PSYCH 2310: Social Psychology
- PSYCH 2320: Introduction to Personality
- PSYCH 4310: Theories of Personality
- PSYCH 4340: Attitude Change

PSYCH 4350: Stereotypes & Prejudice

Developmental distribution area3

This distribution area studies the cultural and biological influences on age-related changes in cognition, emotion and social behavior that take place throughout an individual's lifespan. Courses in this distribution area include:

- PSYCH 2410: Developmental Psychology
- PSYCH 3410: Infancy
- PSYCH 3420: Cognitive Development in Childhood
- PSYCH 3430: Social Development in Childhood
- PSYCH 3810: Normal Language Development

Note: Due to the overlap in course content, a student may receive credit for only one of the following three courses: PSYCH 2410, HDFS 3420/2420 or E&CP 2500.

Clinical/abnormal distribution area.....3

This distribution area focuses on scientific study of the causes of mental disorders as well as methods for assessing and alleviating mental health problems and related types of maladjustment. It also is concerned with the study of positive mental health and wellness, including strategies for preventing the development of mental disorders. Courses in this area include:

- PSYCH 2510: Survey of Abnormal Psychology
- PSYCH 2830: Human Companion Animal Interaction
- PSYCH 3510: Introduction to Clinical Psychology
- PSYCH 4520: Behavior Genetics
- PSYCH 4530: Research in Psychopathology
- PSYCH 4540: Emotional Disorders in Childhood and Adolescence

Note: A student may take either PSYCH 2510 or 4530, but cannot receive credit for both courses. PSYCH 2510 provides a general overview of abnormal psychology, while PSYCH 4530 provides a more in-depth overview of the field.

Psychology elective (2000-level)3

Students must complete one psychology elective course that is numbered 2000 or above.

Minor in Psychology

The psychology minor requires 15 credits, distributed as shown below.

- PSYCH 1000: General Psychology (3 credits)
- Three regularly-scheduled psychology courses (9 credits). At least two of these courses must be numbered 3000 or above. "Regularly-scheduled" includes all courses except special problems courses, which are PSYCH 4950 and 4960: Readings and PSYCH 4976 and 4977: Honors Psychology Lab.
- An additional psychology course (3 credits)

Students must receive a grade of C or better in all courses required for the minor. Grades of C- will not be accepted.

Only 6 credits in transfer courses will be accepted toward the minor.

* Course meets University general education and/or campus graduation requirements.

PSYCHOLOGICAL SCIENCES COURSES

PSYCH 1000--General Psychology (3). Survey of theories, principles, and methods in the study of human behavior.

PSYCH 1000H--General Psychology - Honors (3). Survey of theories, principles, and methods in the study of human behavior. Honors eligibility required.

PSYCH 1001--Topics in Psychology - General (cr.arr.). Organized study of selected topics in psychology. Particular topics and earnable credit may vary by semester. This course may not be used toward behavioral science distribution credit. Repeatable upon consent of department. Prerequisites: PSYCH 1000.

PSYCH 1003--Topics in Psychology - Behavioral Science (cr.arr.). Organized study of selected topics in psychology. Particular topic and earnable credit may vary by semester. This course carries behavioral science distribution credit for non-psychology majors. Repeatable upon consent of department. Prerequisites: PSYCH 1000 and instructor's consent.

PSYCH 1020--Applied Psychology (3). Surveys wide range of applications of psychology. Topics include social issues (prejudice and violence), applications to fields such as business and law, applications for personal improvement (improving memory), and others (sports, health, environment). Prerequisite: PSYCH 1000.

PSYCH 1030--Orientation to the Psychology Major (1). This course is intended to help students choose the best major for themselves and to provide information on careers available to psychology majors.

PSYCH 2001--Topics in Psychology-General (cr.arr.). Organized study of selected topics in psychology. Particular topic and earnable credit may vary by semester. This course may not be used toward behavioral science distribution credit. Repeatable upon consent of department. Prerequisites: PSYCH 1000.

PSYCH 2003--Topics in Psychology-Behavioral Science (cr.arr.). Organized study of selected topics in psychology. Particular topic and earnable credit may vary by semester. This course carries behavioral science distribution credit for non-psychology majors. Repeatable upon consent of department. Prerequisites: PSYCH 1000.

PSYCH 2210--Mind, Brain, and Behavior (3). Introduction to the structures and processes of the mind and the nervous system, including the psychobiology of eating, sleeping, emotion, stress and learning. Prerequisite: PSYCH 1000. No credit if taken after PSYCH 4210.

PSYCH 2220--Drugs and Behavior (3). Basic principles of drug action on the nervous system; the effects of important psychoactive drugs; drug use and society. Prerequisites: PSYCH 1000.

PSYCH 2310--Social Psychology (3). An introduction to how people's thoughts, feelings and behaviors are influenced by the actual or imagined thoughts, feelings and behaviors of others. Prerequisite: PSYCH 1000.

PSYCH 2320--Introduction to Personality (3). Personality is the scientific study of individual differences (e.g., traits, motives, abilities). This course reviews historical theo-

retical perspectives as well as current research. Students will have an opportunity to learn about on their own motives and traits. Prerequisite: PSYCH 1000.

PSYCH 2410--Developmental Psychology (3). Origins and development of child behavior, emphasizing basic physical, cognitive, affective and social processes, and theory and research rather than application or guidance. Prerequisite: PSYCH 1000. Cannot receive credit for more than one of the following: PSYCH 2410, HDFS 3420 or ESC PS 2500.

PSYCH 2510--Survey of Abnormal Psychology (3). Basic survey of maladaptive human behavior and experience, including personality disorders, alcohol and drug abuse, anxiety and mood disorders, sexual dysfunctions, and thought disorders. Prerequisite: PSYCH 1000. Students may not receive credit for both PSYCH 2510 and 4530.

PSYCH 2810--Human Sexuality (3). Survey of research on sexual behavior including sex norms, gender identity, sexual dysfunctions, sexual deviation, homosexuality, and legal aspects of sexual behavior. Attendance at small group discussions may be required at the option of the instructor. Prerequisite: PSYCH 1000.

PSYCH 2820--Introduction to Cognitive Science (3). (same as LINGST 2820 and PHIL 2820). Cognitive science is the interdisciplinary study of the mind. After an overview of the foundations of cognitive science as a whole, we will see what particular sectors of it have to say about mental capacities such as vision, language, categorization, and social cognition. Prerequisites: PSYCH 1000; sophomore standing required.

PSYCH 2830--Human-Companion Animal Interaction (3). Exploration of historical and theoretical bases of human-companion animal interaction (HAI), the nature issues, and clinical applications of HAI. Prerequisite: PSYCH 1000. Graded on A/F basis only.

PSYCH 2940--Internship in Psychology (3-6). Work experience in an organization that is relevant to the psychology major. Prerequisites: must be in good standing and have completed 9 credit hours in psychology; instructor's consent. Intended for students with freshman or sophomore standing.

PSYCH 2950--Special Problems in Psychology (cr.arr.). Research apprenticeship with a faculty member, assisting a faculty member in the development and execution of research. May be repeated to 6 hours maximum. Prerequisite: instructor's consent.

PSYCH 3001--Topics in Psychology-General (cr.arr.). Organized study of selected topics in psychology. Particular topic and earnable credit may vary by semester. This course may not be used toward behavioral science distribution credit. Repeatable upon consent of department. Prerequisites: PSYCH 1000.

PSYCH 3003--Topics in Psychology-Behavioral Science (cr.arr.). Organized study of selected topics in psychology. Particular topic and earnable credit may vary by semester. This course carries behavioral science distribution credit for non-psychology majors. Repeatable upon consent of department. Prerequisites: PSYCH 1000.

PSYCH 3010--Research Methods in Psychol-

ogy (3). Introduction to scientific reasoning, assessing validity and reliability in research, and basic research methods. Prerequisites: PSYCH 1000 and STAT 1300 (STAT 1300 may be taken concurrently).

PSYCH 3010H--Research Methods in Psychology - Honors (3). Introduction to scientific reasoning, assessing validity and reliability in research, and basic research methods. Prerequisites: PSYCH 1000 and STAT 1300 (STAT 1300 may be taken concurrently). Honors eligibility required.

PSYCH 3020--Research Methods in Psychology II (3). Continuation of Psychology 3010 and required for all further labs in psychology. Prerequisite: grade of C or better in PSYCH 3010 and STAT 1300 (or its equivalent).

PSYCH 3020H--Research Methods in Psychology II - Honors (3). Continuation of Psychology 3010 and required for all further labs in psychology. Prerequisite: grade of C or better in PSYCH 3010 and STAT 1300. Honors eligibility required.

PSYCH 3110--Theories of Learning (3). Discusses classical issues and theories in learning and conditioning, and considers them in contemporary form. Prerequisite: PSYCH 1000.

PSYCH 3130--Decisions, Values and Choice (3). Survey of factors influencing choices and decisions. Topics include cause and effect decisions, values and ethical considerations, outcome likelihood, biases and heuristics, concept formation, self-control and impulsiveness, and social factors. Prerequisite: PSYCH 1000.

PSYCH 3140--Cognitive Psychology (3). A survey of psychological theory and research on human cognition. Prerequisite: PSYCH 1000.

PSYCH 3150--Human Memory (3). Surveys research on human memory, including basic laboratory studies with normal subjects as well as research on amnesia and other memory impairments, life-span memory development, and the cognitive neuroscience of memory. Prerequisite: PSYCH 1000.

PSYCH 3160--Perception and Thought (3). Covers research on various aspects of mental life: language, problem-solving, decision-making, sensory perception. Prerequisite: PSYCH 1000.

PSYCH 3310--Intergroup Relations (3). Provides an overview of the social psychological literature on stereotyping, prejudice, discrimination, and intergroup relations. Students learn theoretical frameworks and research findings regarding the development and maintenance of intergroup conflict. Prerequisites: PSYCH 1000.

PSYCH 3410--Infancy (3). Overview of theory and research on the development of infants and toddlers, with an emphasis on major research methods that are currently in use. Topics include infant perception, sociality, motor development, early communication, language development and attachment. Prerequisite: PSYCH 1000.

PSYCH 3420--Cognitive Development in Childhood (3). Theories and research on cognitive development in childhood. Prerequisite: PSYCH 1000.

PSYCH 3430--Social Development in Childhood (3). Overview of children's social and

emotional development (infancy-adolescence), includes changes in social domains, impact of social functioning on subsequent development, and influence of interpersonal contexts (e.g., family, peers, community) on children's development. Prerequisite: PSYCH 1000.

PSYCH 3510--Introduction to Clinical Psychology (3).Comprehensive survey of the field's historical roots, research methods, concepts of abnormality, assessment and intervention methods; also specialties that constitute clinical psychology. Prerequisites: PSYCH 1000.

PSYCH 3810--Normal Language Development (3).(same as C&D 3020). Language development in children and changes in language processing during normal aging. Cognition and language; language learning processes, language sample analysis; relationship between spoken and written language. Prerequisite: LINGST 4600 or Child Psych.

PSYCH 3830--Health Psychology (3).A hands-on approach to the study of health psychology including research on a topic of current relevance to the field. Prerequisite: PSYCH 1000.

PSYCH 3860--Law and Psychological Science (3).This survey course examines the interactions of law and psychology across the justice system. Emphasis is placed on how psychological research does (and does not) inform important legal issues. Requirements may include an in-class team debate of relevant controversy in law. Prerequisite: PSYCH 1000.

PSYCH 4001--Topics in Psychology-General (cr.arr.).Organized study of selected topics in psychology. Particular topic and earnable credit may vary by semester. This course may not be used toward behavioral science distribution credit. Repeatable upon consent of department. Prerequisites: PSYCH 1000 and instructor's consent.

PSYCH 4003--Topics in Psychology-Behavioral Science (cr.arr.).Organized study of selected topics in psychology. Particular topic and earnable credit may vary by semester. This course carries behavioral science distribution credit for non-psychology majors. Repeatable upon consent of department. Prerequisites: PSYCH 1000.

PSYCH 4110--Perception (3).Data and contemporary theories of perception in all of the senses, with emphasis on visual and auditory perception. Prerequisite: PSYCH 1000.

PSYCH 4210--Physiological Psychology (3).An introduction to neuroscience with an overview of the relation between the brain and behavior. Topics include intercellular communication, drugs and reward, emotions and stress psychoimmunology, psychopathology, nervous system development and repair, perception, cognition, learning and memory. Prerequisite: PSYCH 1000.

PSYCH 4220--Animal Learning and Behavior (3).Survey of animal behavior and learning abilities, including topics such as learning, habitat selection, foraging, problem solving, mating, communication, conditioning and memory. Prerequisite: PSYCH 1000 plus 8 hours of Psychology (exclusive of PSYCH 2950) or Biology.

PSYCH 4240--Cognitive Neuroscience

(3).The neural basis of human information processing in memory, attention, perception, imagery, movement, and language. Prerequisites: PSYCH 2210 or 4210 recommended.

PSYCH 4340--Attitude Change (3).Theories, methods, and experimental findings in attitude change research. Prerequisite: PSYCH 1000.

PSYCH 4350--Stereotypes and Prejudice (3).This course provides an overview of theory and research on stereotypes, prejudice, and discrimination from a social-psychological perspective. Course material comes primarily from textbook and supplementary readings, in addition to videos related to these topics. Prerequisite: PSYCH 1000.

PSYCH 4420--Personality Development (3).This course covers the topic of temperament and personality development through the lifespan with particular focus on infancy, childhood, and adolescence. Coverage includes classic and contemporary theories and classic and contemporary research. Prerequisite: PSYCH 1000.

PSYCH 4430--Literature and Human Lifespan (3).In this course we will examine the processes of human development as they are reflected in the specific literary and cinematic texts. "Adult" literary and cinematic materials will be supplemented with notable examples of adolescent and children's stories, so that the works (like their subjects) will mirror the life span. This course will also provide an overview of prominent developmental theories/research, which have been devoted to understanding the life span. This course is designed to stimulate active reflection and debate about the impact of literature on human development. Prerequisite: PSYCH 1000.

PSYCH 4440--Sex Differences (3).This course covers the evolution of sex differences and hormonal and environmental influences on their expressions in nonhuman species. These insights are used to understand human sex differences in mate choices, emotions, development, brain and cognition, and in modern societies. Prerequisite: PSYCH 1000.

PSYCH 4520--Behavior Genetics (3).The study of genetic influences on behavioral traits such as mood, personality, intelligence, mental health, or activity level. Prerequisite: PSYCH 3010.

PSYCH 4530--Research in Psychopathology (3).Intensive survey and evaluation of the psychological literature on abnormal behavior, emphasizes experimental and explanatory approaches. Prerequisite: PSYCH 1000; cannot receive credit for both PSYCH 2510 and 4530.

PSYCH 4540--Emotional Disorders in Childhood and Adolescence (3).Surveys disturbed behavioral development during childhood and adolescence, emphasizing factors that produce deviation from normal developmental patterns. Prerequisites: PSYCH 2410 or equivalent.

PSYCH 4560--Schizophrenia (3).This course will examine one of the most severe, debilitating, and complex mental disorders. We will review the major symptoms and clinical features of schizophrenia, explore possible causes of the disorder, and critically assess treatments for the disorder. Prerequisite: PSYCH 1000.

PSYCH 4810--Industrial/Organizational Psychology (3).Survey of basic and applied

personnel and organizational psychology. Focus on the human relations field, job satisfaction, leadership, group dynamics and formal organizational structures within the realm of industry.

PSYCH 4815--Cross-Cultural Psychology (3).This course aims to explore relationships between cultural variables and human behavior, and to look at recent attempts by cross-cultural psychologists to devise theories that reflect the cultural, social and developmental perspectives on behavior. Prerequisite: PSYCH 1000.

PSYCH 4815H--Cross-Cultural Psychology - Honors (3).The Cross-cultural Psychology course aims to explore relationships between cultural variables and human behavior, and to look at recent attempts by cross-cultural psychologists to devise theories that reflect the cultural, social and developmental perspectives on behavior. Prerequisite: PSYCH 1000; Honors eligibility required.

PSYCH 4825--Psychology at the Movies (3).In this course we watch and discuss films from multiple psychological perspectives. Connections are made between cinematic content and contemporary psychological research on culture and diversity. Race, Gender, Disability, Class, and LGBT issues in movies are explored.

PSYCH 4830--Psychology of Women (3).(same as Women's and Gender Studies 4830). Overview of current theories and research relating to the psychology of women. Topics include gender stereotyping, psychological sex differences, achievement motivation in women, and women and mental health. Prerequisite: PSYCH 1000.

PSYCH 4840--The History of Psychology (3).Historical foundations of contemporary psychology. Prerequisites: PSYCH 1000.

PSYCH 4940--Internship in Psychology (3-6).Work experience in an organization that is relevant to the psychology major. Prerequisites: must be in good standing and have completed 9 credit hours in psychology; instructor's consent. Intended for students with junior or senior standing.

PSYCH 4950--Special Problems in Psychology (cr.arr.).Independent investigation leading to a project or paper. Repeatable upon consent of department. Prerequisite: instructor's consent.

PSYCH 4960--Special Readings in Psychology (cr.arr.).Independent readings selected in consultation with supervisory faculty member. Repeatable upon consent of department. Prerequisite: instructor's consent.

PSYCH 4970--Psychological Measurement Capstone (3).Survey of theories and methods of psychological test construction, focusing on measures of intelligence and personality. Lab component involves experimental training in test construction and test evaluation. Prerequisite: grade of C or better in PSYCH 3020.

PSYCH 4971--Developmental Psychology Capstone (3).Introduces students to developmental research methods through relevant readings and by students conducting original research. Prerequisite: grade of C or better in PSYCH 3020.

PSYCH 4972--Animal Learning Capstone (3).Survey of principles of animal behavior and animal learning and cognition. The course includes laboratory projects on research in animal

behavior and animal learning. Prerequisites: grade of C or better in PSYCH 3020.

PSYCH 4973--Human Cognition Capstone (3).Students review, evaluate and conduct research on various aspects of human cognition. Prerequisite: grade of C or better in PSYCH 3020.

PSYCH 4974--The Human Senses Capstone (3).Psychophysical data, sense organs, psychological attributes, and theories of vision, hearing, and the vestibular (motion) senses. Elementary aspects of psychophysics. Prerequisite: grade of C or better in PSYCH 3020.

PSYCH 4975--Experimental Social Psychology Capstone (3).Experimental methods course emphasizing research in social psychology. Prerequisites: grade of C or better in PSYCH 3020.

PSYCH 4976H--Honors Research Seminar I (3).Individual honors thesis on a topic selected with a faculty advisor. Student projects are carried out over the course of two semesters (PSYCH 4977 in winter semester). Students should plan on enrollment in both PSYCH 4976 and 4977. Weekly class discussions of research topics, strategies and of current issues. Prerequisites: PSYCH 3020; overall and PSYCH GPA 3.3 and instructor's consent. Successful completion of thesis and maintenance of 3.3 GPA leads to degree with departmental honors in Psychology.

PSYCH 4977H--Honors Research Seminar II (3).Honors eligibility required. Prerequisite: PSYCH 4976.

PSYCH 4978--Clinical Psychology Capstone (3).Students work at assigned agencies to gain "real-world" experience in the practice of psychology and attend regularly scheduled class meetings in order to integrate their academic knowledge with their practical experience. Prerequisites: grade of C or better in PSYCH 3020.

Department of Religious Studies

Robert M Baum, Chair
 College of Arts and Science
 221 A&S Building
 (573) 882-4769
 rsinfo@missouri.edu
 http://ReligiousStudies.missouri.edu

FACULTY

PROFESSOR S. Welch
ASSOCIATE PROFESSORS R. Baum, S.M. Cohen
ASSISTANT PROFESSORS R. J. Callahan, E. Drott, R. Gregory, N. DesRosiers, J Flanagan

The department's field of study includes religious expression from all cultures and in every period of history. Systematic study of this rich world of expression employs the widest range of academic tools and competencies, from the skills of the literary critic and historian to the analytic abilities of the social scientist and anthropologist. Because of this broad base, study in the department promotes fundamental academic skills and critical judgment and provides deeper understanding of national and international culture. Thus, the religious studies major provides students with a foundation to pursue careers in business, government, counseling, law, medicine and journalism, as well as advanced professional study in religion.

The department offers BA and MA degrees with majors in Religious Studies. A minor is also available.

Major Program Requirements - Religious Studies

Students must earn a minimum GPA of 2.0 or higher in order to have the credit applied. In addition, students must complete all degree, college and university graduation requirements, including university general education.

Major core requirements	12
REL ST 1100: Introduction to Religion OR	
REL ST 2110: Major World Religions	3
REL ST 3990: Junior Seminar	3
REL ST 4100: Modern Perspectives in the Study of Religion	3
REL ST 4990: Seminar for Senior Majors	3

Additional requirements

(at least one course in Asian, Western, and Indigenous Religions and in each of three areas).....	18
History	
Religious Narratives	
Society	

RELIGIOUS STUDIES COURSES

REL ST 1100--Introduction to Religion (3). Engages students in reflection on the religious questions that human existence poses, and introduces them to conceptual tools for understanding and evaluating answers which have emerged in human history.

REL ST 1100H--Introduction to Religion - Honors (3). Engages students in reflection on the religious questions that human existence poses, and introduces them to conceptual tools for understanding and evaluating answers which have emerged in human history. Honors eligibility required.

REL ST 1500--Religion and Culture (3). The study of religion as expressed in art, literature, music, dance, drama, architecture.

REL ST 1820--Asian Humanities (3). (same as Art History and Archeology 1230, History 1820, South Asian Studies 1152). This course is an introduction to the literature and visual arts of Asia through selected master works. It focuses principally on India and China and investigates the distinctive features of their cultures.

REL ST 1820H--Asian Humanities - Honors (3). (same as Art History and Archeology 1230, History 1820, South Asian Studies 1152). This course is an introduction to the literature and

visual arts of Asia through selected master works. It focuses principally on India and China and investigates the distinctive features of their cultures.

REL ST 2001--Topics in Religious Studies-General (3). Organized study of selected topics which vary by semester and are announced at time of registration.

REL ST 2005--Topics in Religious Studies-Humanities (3). Organized study of selected topics which vary by semester and are announced at time of registration.

REL ST 2100--Indigenous Religions (3).

Double Majors

Students are encouraged to pursue dual majors that combine religion with other interests.

Departmental Honors

See the department web site for details.

Minor in Religious Studies

A minor in religious studies is available with the following requirements: a minimum of 15 credits (at least one course each in Asian, Western, and Indigenous Religions), including 6 in courses numbered 2000 or above. A minimum 2.0 MU GPA is required in all courses toward the minor.

(same as Anthropology 2100). Explores the central aspects of religious life in indigenous communities. Focusing on specific groups, it considers individual and group identity, the meaning of the sacred, and the impact of foreign domination. 2100H same as 2100 with the addition of Honors eligibility required.

REL ST 2100H--Indigenous Religions - Honors (3).(same as Anthropology 2100). Explores the central aspects of religious life in indigenous communities. Focusing on specific native communities, it considers individual and group identity and the meaning of the sacred. Honors eligibility required.

REL ST 2110--Major World Religions (3). Explores the differing ways in which Asian and Western religions interpret life and reality. Includes study of Hinduism, Buddhism, Chinese and Japanese religions, Judaism, Christianity, and Islam.

REL ST 2110H--Major World Religions - Honors (3).Explores the differing ways in which Asian and Western religions interpret life and reality. Includes study of Hinduism, Buddhism, Chinese and Japanese religions, Judaism, Christianity, and Islam. Honors eligibility required.

REL ST 2250--Religious Perspectives on Peace and War (3).In this course we will study religious approaches to peacemaking as well as religious justifications of war. We will examine the life and work of Mahatma Gandhi, Martin Luther King, Jr., Thich Nahat Hanh, and the Dalai Lama among other religious leaders. Traditions studied include Native American, Buddhist, Hindu and Christian.

REL ST 2270--Modern Literature and the Quest for Values (3).This course is an interdisciplinary study of the religious and ethical questions, quests, and solutions in the literary works of selected modern writers: Beckett, Eliot, Camus, Kazantzakis, O'Connor, Updike, Wiesel, Percy and Morrison.

RELST 2270H--Modern Literature and the Quest for Values - Honors (3).This course is an interdisciplinary study of the religious and ethical questions, quests, and solutions in the literary works of selected modern writers: Beckett, Eliot, Camus, Kazantzakis, O'Connor, Updike, Wiesel, Percy and Morrison. Honors eligibility required.

RELST 2280--Biblical Themes in American Literature (3).This course is a study of the reinterpretation of Hebrew scriptures and New Testament sources in classic American texts. The works of Melville, Faulkner, MacLeish, Baldwin, O'Connor, Updike, Percy, and Morrison create a history of certain American ideas as they transform traditional biblical figures and ideas.

REL ST 2280H--Biblical Themes in American Literature - Honors (3).A study of the sources in the Hebrew Scriptures and the New Testament and their reinterpretation in classic American texts. Such a study, initially textual, results in a history of American ideas. Authors studied include MacLeish, Baldwin, O'Connor, Updike, Percy and Morrison. Honors eligibility required.

RELST 2310--Religions of China and Japan (3).Introduction to the religions of East Asia, focusing on both popular beliefs and institu-

tionalized religion. Topics include: Buddhist, Confucian, and Daoist traditions of China; Buddhism and Shinto in Japan; self-cultivation practices; spirit mediumship; ritual; cosmology; religion and society; religion and the state.

REL ST 2310H--Religions of China and Japan - Honors (3).Introduction to the religions of East Asia, focusing on both popular beliefs and institutionalized religion. Topics include: Buddhist, Confucian, and Daoist traditions of China; Buddhism and Shinto in Japan; self-cultivation practices; spirit mediumship; ritual; cosmology; religion and society; religion and the state. Honors eligibility required.

REL ST 2400--Judaism (3).A comprehensive introduction to Judaism: an overview of Jewish philosophy and theology, rituals and customs.

RELST 2410--Essential Stories of the Torah (3).Students will examine major narratives and texts from the Pentateuch section of Hebrew Bible. This class will present such ancient, medieval, and contemporary interpretations that will demonstrate how biblical texts could be construed in more than one way.

REL ST 2450--The Holocaust and Reflections on Genocide (3).Examines the nature of genocide as an historical phenomenon using the Holocaust as the primary case study.

REL ST 2500--Introduction to Hebrew Bible/Old Testament (3).An introduction to the literature, history, institutions, and thought contained in the Hebrew Bible and to the methods and principles necessary for the scholarly study of scripture.

REL ST 2500H--Introduction to Hebrew Bible/Old Testament - Honors (3).An introduction to the literature, history, institutions, and thought contained in the Hebrew Bible and to the methods and principles necessary for the scholarly study of scripture. Honors eligibility required.

REL ST 2510--Introduction to the New Testament (3).An introduction to the literature of the New Testament and the methods and principles guiding its interpretation, with particular mention to its structure, thought, and historical setting.

REL ST 2510H--Introduction to the New Testament - Honors (3).An introduction to the literature of the New Testament and the methods and principles guiding its interpretation, with particular mention to its structure, thought, and historical setting. Honors eligibility required.

REL ST 2600--Early Christianity (3).(same as History 2600). History of Christian practices and teachings from Christian origins through the 5th century, including Eastern Orthodoxy Syrian Christianity, Roman Catholicism. Themes such as interpretation and creation of Scriptures, worship style, central rituals, debates about right teaching (orthodoxy) mysticism and developing lifestyles both in and apart from the world.

RELST 2600H--Early Christianity - Honors (3).(same as History 2600). History of Christian practices and teachings from Christian origins through the 5th century, including Eastern Orthodoxy Syrian Christianity, Roman Catholicism. Themes such as interpretation and creation of Scriptures, worship style, central rituals, debates about right teaching (orthodoxy) mysticism and developing lifestyles both in and apart from the world. Honors eligibility

required.

REL ST 2610--Medieval Christianity (3).(same as History 2610). History of Christian practices and teachings from the 5th-15th centuries, including Byzantine and Western Christianity Themes such as the influence of the Islamic world on Christianity, popular and elite formulations of theology and ritual activities.

REL ST 2610H--Medieval Christianity - Honors (3).(same as History 2610). History of Christian practices and teachings from the 5th-15th centuries, including Byzantine and Western Christianity Themes such as the influence of the Islamic world on Christianity, popular and elite formulations of theology and ritual activities. Honors eligibility required.

REL ST 2620--History of Christianity, 1500--Present (3).(same as History 2620). History of Christian practices and teachings from the 15th - 21st centuries, including global dimensions of Orthodox, Catholic, Protestant and other forms of Christianity. Themes such as right teaching and practice, indigenous-Christian contact, mission and expansion, impact of secular theories, contemporary debates.

REL ST 2620H--History of Christianity, 1500--Present - Honors (3).(same as History 2620). History of Christian practices and teachings from the 15th - 21st centuries, including global dimensions of Orthodox, Catholic, Protestant and other forms of Christianity. Themes such as right teaching and practice, indigenous-Christian contact, mission and expansion, impact of secular theories, contemporary debates. Honors eligibility required.

RELST 2700--Islam (3).Examines the historical development of Islamic traditions, noting the manner in which various sects & factions understand religion, humanity and God.

REL ST 2900--Contemporary Religious Thought (3).Explores issues within contemporary Christian theology that cut across denominational lines such as: the nature and existence of God; secularization, relativism, and humanism; the authority of the Bible; attitudes toward other religions; the moral integrity of Christianity; and the purpose of human existence.

REL ST 2910--Religion and Contemporary Social Issues (3).Study of the social ethics of Jewish and Christian theologians and movements of the 19th and 20th centuries and an examination of selected social problems in light of these systems.

REL ST 2920--Images of Good and Evil (3). Study of the symbols and myths which explore the nature and power of good and evil. Includes examination of the music, art and literature of both ancient and contemporary religions.

REL ST 2930--Religion and Psychological Perspectives (3).Examines how religion is understood from various psychological perspectives, and how psychological theories reflect religious presuppositions about the nature and purpose of human life.

RELST 2939--Religion and Human Sexuality (3).Examines attitudes within the Christian tradition toward sexuality, with particular reference to the alternatives of patriarchy and feminism, especially as they consider issues such as the meaning of bodiliness, masturbation, pornography, prostitution, homosexuality and

sexual pluralism. ?

REL ST 2950--Directed Readings in Religious Studies (3).Independent readings selected in consultation with supervisory faculty member. May not be repeated. Prerequisite: instructor's consent.

REL ST 3000--History of Religion in America to the Civil War (3).(same as History 3000). Surveys major American religious traditions, patterns, and themes from 1492 to the Civil War, especially the role of religion in American social, cultural, and political developments. Prerequisite: sophomore standing or instructor's consent.

REL ST 3000H--History of Religion in America to the Civil War - (3).(same as History 3000). Surveys major American religious traditions, patterns, and themes from 1492 to the Civil War, especially the role of religion in American social, cultural, and political developments. Prerequisite: sophomore standing or instructor's consent. Honors eligibility required.

REL ST 3001--Topics in Religious Studies-General(3).Organized study of selected topics which vary by semester and are announced at time of registration. Prerequisite: instructor's consent.

REL ST 3005--Topics in Religious Studies-Humanities (3).Organized study of selected topics which vary by semester and are announced at time of registration. Prerequisite: instructor's consent.

REL ST 3100--Religious Literacy for the Public and Professions (3).This course teaches students to engage and encounter religion in day-to-day life and in the professional workplace. Its primary goal is to examine religious diversity in private and professional contexts from a practical standpoint by examining a variety of case studies.

REL ST 3110H--History of Religion in Post-Civil War America - Honors (3).(same as History 3210). Surveys major American religious traditions, patterns, and themes from 1865 to the present, especially the role of religion in American social, cultural and political developments. Prerequisite: sophomore standing or instructor's consent. Honors eligibility required.

REL ST 3200--Hinduism (3).(same as South Asia Studies 3200). Origin and development of central themes of traditional Hinduism from earliest times to the modern period. Topics include: the Vedic tradition, rituals and practice, varieties of yoga, and meditation, Indian religious thought, and devotional Hinduism.

REL ST 3210--History of Religion in Post-Civil War America (3).(same as History 3210). Surveys major American religious traditions, patterns, and themes from 1865 to the present, especially the role of religion in American social, cultural and political developments. Prerequisite: sophomore standing or instructor's consent.

REL ST 3210H--History of Religion in Post-Civil War America - Honors (3).(same as History 3210). Surveys major American religious traditions, patterns, and themes from 1865 to the present, especially the role of religion in American social, cultural and political developments. Prerequisite: sophomore standing or instructor's consent. Honors

Eligibility Required.

REL ST 3240--Buddhism of South and Southeast Asia (3).(same as South Asian Studies 3240). Examines the origins of Buddhism in India, the narratives of the life of the Buddha, the development of early Buddhist schools, the extension of Buddhism into Central and Southeast Asia, and the current practice of Buddhism in South and Southeast Asia. Prerequisites: REL ST 2110 or instructor's consent.

REL ST 3250--Buddhism in East Asia (3).This course will trace the transmission of Buddhism from the Indian subcontinent to China, and from there to Korea and Japan. We will examine the historical development of East Asian forms of Buddhism, deal with key issues of Buddhist thought and practice, and look at the role of Buddhism in modern East Asian societies. Prerequisites: REL ST 2110, 2300, 2310 or 3200, or instructor's consent.

REL ST 3280--Chinese Popular Religion (3).Starting with a consideration of conceptual issues ("what is 'popular religion'?"), the course will give a survey of the beliefs and practices of Chinese popular religion, including ancestor worship, territorial cults, spirit-mediumism, divination, and popular sects. Prerequisite: REL ST 2110 or instructor's consent.

RELST 3300--The Prophets (3).Study of the prophetic writings of the Hebrew Scriptures, with consideration of the origin and nature of Israelite prophecy. Includes the narratives of the period of prophetic activity and study of the classical prophets. Prerequisites: REL ST 2500 or instructor's consent.

REL ST 3310--The Psalms and Wisdom Literature (3).Detailed interpretation of the Psalms, Proverbs and related writings of the broad wisdom tradition, with critical attention to the literary style and structure of the writings. Prerequisites: REL ST 2500 or instructor's consent.

REL ST 3380--Native American Religions (3).(same as Anthropology 3380). Investigation of religious lives of the native peoples of the Americas through cultural contact with modernity. Perspectives based on historical, anthropological and native texts. Prerequisite: Rel_St 2100 or instructor's consent. Rel_St 3380 same as Rel_St 3380 with addition of Honor's eligibility required.

RELST 3380H--Native American Religions - Honors (3).(same as Anthropology 3380). Investigation of religious lives of the native peoples of the Americas through cultural contact with modernity. Perspectives based on historical, anthropological and native texts. Prerequisite: REL ST 2100 or instructor's consent. Honors eligibility required.

REL ST 3400--The Gospels of Matthew, Mark, and Luke (3).Examination of the Gospels of Matthew, Mark, and Luke as single works and as literarily related compositions. Interpretation focuses on the literary form of passages and the theological and ethical themes expressed. Prerequisite: REL ST 2510 or instructor's consent.

REL ST 3400H--The Gospels of Matthew, Mark, and Luke - Honors (3).Examination of the Gospels of Matthew, Mark, and Luke as single works and as literarily related

compositions. Interpretation focuses on the literary form of passages and the theological and ethical themes expressed. Prerequisite: REL ST 2510 or instructor's consent. Honors eligibility required.

REL ST 3410--Life and Letters of Paul (3).Reconstruction of the life and letters of the Apostle Paul; examination of his thought in relation to Jesus of Nazareth and to earliest Christianity. Prerequisite: REL ST 2510 or instructor's consent.

REL ST 3410H--Life and Letters of Paul - Honors (3).Reconstruction of the life and letters of the Apostle Paul; examination of his thought in relation to Jesus of Nazareth and to earliest Christianity. Prerequisite: REL ST 2510 or instructor's consent. Honors eligibility required.

RELST 3430H--Revelation and Apocalyptic Literature - Honors (3).A study of Jewish and Christian apocalyptic literature with an emphasis on the Revelation to St. John. Prerequisite: REL ST 2510 or instructor's consent. Honors eligibility required.

RELST 3500--Second Temple Judaism: The Persian, Hellenistic, & Roman Periods (3).This course is an introduction to the origin and development of Judaism from the time of the destruction of the first Jerusalem temple (587 BCE) to the Bar Kochba revolt (132-135 CE). Prerequisite: REL ST 2400, 2410 or instructor's consent.

REL ST 3530--Rabbinic Judaism: Perspective and Literature (3).Overview of the Jewish oral tradition during the Rabbinic era. The information covered in this course will focus upon the vast literature created during the Mishnaic and Talmudic periods and the emerging new styles and directions of Jewish religious thought. Prerequisite: REL ST 2400 or instructor's consent.

REL ST 3540--Jewish-Christian Relations (3).Explores historical and contemporary relations between Christians and Jews, and the transformations in Christian thought and practice resulting from awareness of Christianity's role in the Holocaust and from post-Holocaust dialogues between Jews and Christians.

REL ST 3600Spirituality (3).Comparative investigation of selected mystical writings from Western religious traditions; consideration of contemporary psychological, philosophical, and phenomenological interpretations of mystical experience.

REL ST 3700--Modern Religious Thought (3).Examination of the theological systems of major Christian thinkers and movements of the 19th and 20th centuries in relation to historic religious traditions and modern cultural challenges.

RELST 3710--Reality of God (3).Will explore the meaning of "the loss of God" (Tillich) and various 20th-century attempts to reaffirm the reality of God.

REL ST 3740--Religion and Film (3).Addresses issues of interpretation and analysis in the convergence of religion and film. Addresses three areas under this broad rubric: 1) film representations of established religions; 2) film and the construction of social values; 3) film as contemporary "myth". Treating films as social texts, we will ask what such representa-

tions of ourselves to ourselves suggest about culture in general.

REL ST 3750--Women and Religions (3). (same as Women's and Gender Studies 3750). A rediscovery of the wealth of religious activity which women have created and enacted. Investigates women's roles and rituals in large-scale and local religions, including ancient Goddess religions, Hinduism, Buddhism, Judaism, Christianity, Islam, and African, South American, and native American groups. Prerequisite: sophomore standing.

REL ST 3760--Geography of the World's Religions (3). (same as Geography 3760). Explores the significance of place in the origin, diffusion, distribution and practice of religions, emphasizing imprints of religion on the cultural landscape and connections between culture, politics, economics, and religion. Prerequisite: 1000/2000 level Geography course; junior standing or instructor's consent.

REL ST 3800--Religion in America Today (3). Explores in depth a few selected issues currently shaping or being shaped by religion in the United States. Specific topics will be chosen from events, conflicts, developments, or news items within the last five years. Prerequisite: sophomore standing. Graded on A/F basis only.

REL ST 3820--Religion and Law in America (3). This class explores how the U.S. legal system is navigating an increasing diversity of religious traditions. Course examines the place of religious values and the ongoing tension between religion and law in the legal system of the U.S. through a variety of controversial topics.

REL ST 3990--Junior Seminar (3). In this seminar religious studies majors will be encouraged to form a community of inquiry focused on the subject of religion and public life. Prerequisite: Religious Studies majors in their junior year. Graded on S/U basis only.

REL ST 4001--Topics in Religious Studies-General (3). Organized study of selected topics which vary by semester and are announced at time of registration. Prerequisite: junior standing or instructor's consent.

REL ST 4005--Topics in Religious Studies-General (3). Organized study of selected topics which vary by semester and are announced at time of registration.

REL ST 4100--Modern Perspectives in the Study of Religion (3). The course investigates the history of the modern academic study of religion, closely exploring influential theories and methods that have shaped scholarly perspective. May include approaches such as structuralism, phenomenology, Durkheimian and Weberian sociology, Marxism, feminism, thick description, psychoanalysis, and others. Limited to Religious Studies majors and MA students.

REL ST 4110--Myth and Religious Symbolism (3). Emphasizes the comparison of one theme; e.g., a divine figure (Trickster, High God), memory and forgetting, creation, fertility, origins of death, etc.

REL ST 4120--Studies in Ritual (3). Exploration of particular themes of religious expression in seasonal, calendric and life-cycle rituals and in personal and public ceremonies. Includes comparisons of indigenous communities and modern society.

REL ST 4130--Haunting and Healing (3). This course explores beliefs and practices relating to supernatural beings and powers in American culture. We apply a variety of theoretical and methodological approaches to illuminate the diversity of meanings, functions, and contexts of ghosts, spirits, and supernatural healing in the popular culture of the United States, as well as in specific regional, ethnic, and faith communities. Prerequisite: junior standing.

REL ST 4200--Survey of West African and African Diasporic Religions (3). Explores indigenous African religions and Islam in West Africa, as well as the development of African American Christianity and African diasporic religions in the Americas.

REL ST 4210--African-American Religion (3). (same as Black Studies 4210). Historical and thematic examination of African American religious traditions and practices. Addresses intersections of religious expression with race, identity, culture, and society.

REL ST 4280--Archeology of Religion (3). (same as Anthropology 4280). This course examines how anthropologists conceptualize religious behavior, and how archaeologists use material remains to examine past religious behavior, rituals, religious practitioners, cosmological constructs, worldview and ideology in the Americas. Prerequisite: ANTHRO 2020 and/or REL_ST 2100.

REL ST 4300--Religious Narratives of South Asia (3). (same as South Asian Studies 4300). Study of major narratives of India and their interpretation in literature and art. Topics include: Vedic and Epic mythology, stories of Krishna, myths and images of Shiva, and forms of the Goddess. Prerequisite: REL ST 2110, 3200, or 3240, or instructor's consent.

REL ST 4310--The Confucian Tradition: Past and Present (3). Investigates Confucianism as the dominant religio-philosophical tradition of China and its impact on Korea and Japan. We will study basic Confucian canonical texts, follow its historical development, look at its interactions with other religions, and discuss the continuing relevance of the Confucian tradition in modern East Asia.

REL ST 4320--Introduction to Daoism (3). An introduction to the Daoist religious tradition, beginning with its background in earlier forms of philosophy, ritual, and belief. We will follow the development of the various Daoist schools and movements over the centuries and examine key aspects of their belief and practice, both historical and contemporary.

REL ST 4380--Anthropological Theories of Religion (3). (same as Anthropology 4380). Course provides a critical evaluation of anthropological explanations of various forms of traditional religious behavior such as magic, shamanism, divination, ritual, mythology, and witchcraft. The anthropological explanations examined range from nineteenth century classics to the current approaches of today. Prerequisites: ANTHRO 2030, ANTHRO/REL ST 2100, or instructor's consent.

REL ST 4400--The Catholic Intellectual Tradition (3). Students will read the great thinkers of the Catholic church such as Augustine, Abelard, Bernard of Clairvaux, Aquinas, Bonaventure, Nicholas of Cusa, Pascal, Newman,

Maritain, Rahner, Johnson, Tracy. The theme examined may vary from year to year.

REL ST 4410--Major Religious Thinkers (3). Concentrated study of one or more selected theologians, such as Augustine, Aquinas, Luther, Calvin, Buber, Tillich, and Rahner.

REL ST 4418--Religion Reporting and Writing (3). (same as Journalism 4426). Advanced seminar in religion reporting and writing. Examines the role of religion journalism in faith, public life, and culture. Prerequisite: JOURN 4450 professional writing experience and instructor's consent.

REL ST 4500--Greek and Roman Literature (3). (same as Classical Humanities 3500). Survey of religious development among the Greeks and Romans. Prerequisite: sophomore standing and CL HUM 1060 AR HA 1110 or HIST 1520.

REL ST 4550--The Historical Jesus (3). This course examines theory, method, and conclusions in recent Jesus scholarship. Attention is also paid to the historical and cultural context in which Jesus research becomes prominent. Prerequisites: REL ST 2510 or instructor's consent.

REL ST 4630--Sanskrit I (3). (same as South Asian Studies 4350). This intensive course will cover the essentials of Sanskrit grammar in one semester and prepare students for further readings in Hindu and Buddhist literature.

REL ST 4640--Sanskrit II (3). (same as South Asian Studies 4640). This course is intended as a "sampler" of Sanskrit literature. We will read Sanskrit texts in the original. The objectives of the course are 1) Expanding the students' knowledge of the Sanskrit language, 2) To acquaint the students with a broad range of textual genres in Sanskrit literature, and 3) To acquaint the students with some central ideas of Hindu and Buddhist philosophy.

REL ST 4750--Women, Religion and Culture (3). (same as Women's and Gender Studies 4750). An advanced study of the role of women in religion, focusing on the methods of determining the significance of gender in religious life, sacred texts, symbols, rituals and/or beliefs. Traditions studied include Christianity, Islam, contemporary pagan communities, and Native American traditions.

REL ST 4960--Directed Readings in Religious Studies (1-6). Independent readings selected in consultation with supervisory faculty member. May be repeated up to 6 hrs. Prerequisite: instructor's consent.

REL ST 4990--Senior Seminar in Religious Studies (3). A seminar in which Religious Studies majors use methods of understanding and comparing religions by focusing on times and places of significant contact among peoples of different religions. Prerequisite: REL ST 4100 and Religious Studies Major.

RESIDENT INSTRUCTION INSTRUCTOR
J.L. Escorcía, D. M. Heston, L. Keown

The study of a foreign language allows for the development and refinement of communication, listening and speaking skills. Such study also endows students with a concern for world affairs and an appreciation of and respect for individual differences.

The Department of Romance Languages and Literatures offers language and literature courses in French, Italian, Portuguese and Spanish. Students may elect a major in French or Spanish. Minors are also available in Afro-Romance literatures in translation, French, Italian area studies, Romance literatures in translation, and Spanish. The department also participates in the interdepartmental minor in film studies.

Double majors within the College of Arts and Science, as well as dual degree programs outside of the College of Arts and Science, can be arranged if the second degree is identified early. Combined programs with journalism, political science, agriculture, education and business are among the possibilities.

The department offers BA and MA degrees with majors in French and Spanish, an MA with a major in Foreign Language Teaching and a PhD in Romance Languages. Minors are also available.

Major Program Requirements - French

Students may obtain a BA with a major in French with a minimum of 30 credits in French beyond FRENCH 2100. Additionally, course work must be completed with a grade in the C range or higher in each of the required courses and students must maintain a 2.0 GPA in the major. Students must meet all major requirements listed below, as well as all College of Arts and Science and university graduation requirements, including university general education.

Students who work toward a double major (two degrees within the College of Arts and Science) may be able to complete the majors with a minimum of 120 credits. Students who are considering a dual degree program (in Arts and Science and in another school or college) are advised that a minimum of 132 credits are necessary.

To obtain the BA degree with a major in French, the following courses, or their equivalents, must be included in the graduation plan (numbers in parentheses indicate prerequisite courses).

Major core requirements

FRENCH 2160: Intermediate Composition and Conversation (FRENCH 2100).....	3
FRENCH 3160: Advanced Composition and Conversation (FRENCH 2160) OR	
FRENCH 3280: Commercial French (FRENCH 2160).....	3
FRENCH 3410: Introduction to Literary Analysis (FRENCH 3160)	3
FRENCH 3420: Introduction to French Literature I (FRENCH 3160 and 3410)	3
FRENCH 3430: Introduction to French Literature II (FRENCH 3160 and 3410)	3
FRENCH 4130: Stylistics (FRENCH 3160 or 3280 and FRENCH 3420 or 3430)	3

Additional Requirements

Students must complete five additional 4000-level courses (one of which must be stylistics and one must be a capstone) selected with the advisor's approval. FRENCH 4960: Special Readings cannot be used to fulfill this requirement except by permission of the department chair.

Students beginning at a level higher than FRENCH 2160 due to placement testing must still complete 30 credits in order to receive the major.

In addition, the student is required to take a Writing Intensive course in the major, normally designated sections of FRENCH 3420 or 3430, and must complete either a related field or minor. For a related field, a minimum of 8 hours, including at least two upper-class courses, as approved by the student's advisor, outside the major field of study.

It is highly recommended that students take FRENCH 2310: French Civilization as an elective and, if at all possible, study for a summer, a semester or a full year in a French-speaking country.

Major Program Requirements - Spanish

Students may obtain a BA with a major in Spanish with a minimum of 30 credits in Spanish beyond SPAN 2100. Additionally, course work must be completed with a grade in the C range or higher in each of the required courses and students must maintain a 2.0 GPA in the major. Students must meet all major requirements listed below, as well as all College of Arts and Science and University graduation requirements, including University general education.

Students who work toward a double major (two degrees within the College of Arts and Science) may be able to complete the majors with a minimum of 120 credits. Students who are considering a dual degree program (in Arts and Science and in another school or college) are advised that a minimum of 132 credits are necessary.

To obtain the BA degree with a major in Spanish, the following courses, or their equivalents, must be included in the graduation plan (numbers in parentheses indicate prerequisite courses):

Major core requirements

SPAN 2160: Intermediate Composition and Conversation (SPAN 2100)	
SPAN 3150: Advanced Spanish Conversation (SPAN 2160) OR SPAN 3721: Phonetics (SPAN 2160).....	3
SPAN 3160: Advanced Composition (SPAN 2160) OR SPAN 3280: Commercial Spanish (SPAN 2160).....	3
SPAN 3420: Introduction to Hispanic Literature I (SPAN 3160).....	3
SPAN 3430: Introduction to Hispanic Literature II (SPAN 3160).....	3

Additional Requirements

Students must complete five 4000-level courses (one of which must be a capstone) selected with the advisor's approval. These courses must be distributed in one of the following options:

Option 1: two peninsular lit., two Spanish-American lit., one course of choice (one course must be capstone.)

Option 2: one peninsular lit., one Spanish-American lit., one language/civilization, one capstone and one course of choice

It should be noted that SPAN 4960: Special Readings cannot be used to fulfill this requirement except by permission of the department chair. Students who plan to teach at any level should include courses SPAN 3160 and SPAN 3721, rather

than their alternates.

Students beginning at a level higher than SPAN 2160 due to placement testing must still complete 30 credits in order to receive the major.

In addition, the student is required to take a Writing Intensive course in the major, normally designated sections of SPAN 3420 or 3430, and must complete either a related field or minor. For a related field, a minimum of 8 hours, including at least two upperclass courses, as approved by the student's advisor, outside the major field of study.

It is highly recommended that students take SPAN 2310: Spanish Civilization as an elective and, if at all possible, study for a summer, a semester or a full year in a Spanish-speaking country.

Minor in Afro-Romance Literatures in Translation

Students may obtain a minor in Afro-Romance literatures in translation by completing the courses listed below.

SPAN/FRENCH 1100, 1200, 2100	
ITAL/PORT 1100, 1200	
Three 2000-level literature-in-translation courses chosen from	

the following list (at least two language groupings must be represented):

FRENCH 2350 New World Francophone Literature in Translation
RM LAN 2310 Literature of the African Diaspora
SPAN 2340 Hispanic Minority Literature
SPAN 2350 Afro-Hispanic Literature

Two 3000-level or 4000-level courses chosen from the following list:

FRENCH 3710 Survey of Minority & Creole Languages of the US & the Caribbean
PORT 3001/PORT 3005 Topics in Portuguese
RM LAN 4310 Literature of the African Diaspora
SPAN 3710 Survey of Minority & Creole Languages of the US & the Caribbean

Additionally, course work must be completed with a grade in the C range or higher in each of the required courses and students must maintain a 2.0 GPA in the minor.

Minor in French

Students may obtain a French minor by completing a minimum of 15 credits beyond FRENCH 2100, of which at least 6 credits must be in literature. Courses taught in English (i.e., 2310, 2320, 2330, 2340) and cross-listed courses taught in English do not count toward the minor. The courses listed below are the most likely choice.

FRENCH 2160 Intermediate French Composition and Conversation
FRENCH 3160 Advanced French Composition and Conversation OR FRENCH 3280 Commercial French
FRENCH 3410 Introduction to Literary Analysis
FRENCH 3420 Introduction to French Literature I
FRENCH 3430 Introduction to French Literature II

Students beginning at a level higher than FRENCH 2160 due to placement testing must still complete the minimum of 15 additional credits in order to receive the minor. A minimum of 9 credits, including 3 in literature, must be taken in residence.

Additionally, course work must be completed with a grade in the C range or higher in each of the required courses and students must maintain a 2.0 GPA in the minor.

Minor in Italian Area Studies

Students may obtain a minor in Italian area studies by completing at least 9 credits in Italian language beyond ITAL 1200, e.g.: ITAL 2160, 3150 or 3160. An additional 6 credits must be chosen from the list below:

ITAL 2001/2005: Undergraduate Topics in Italian
ITAL 2310 Italian Civilization
ITAL 3001/3005: Topics in Italian
ITAL 3310 20th Century Italian Fiction in Translation
Italian culture/topics emphasis courses offered by other programs/departments (e.g., History, Art History, Music or International Studies).

Normally, 9 credits must be completed in residence at MU. However, students are permitted to count 6 credits toward the minor from an officially sanctioned semester or year-long foreign study program in Italy. Six credits toward the minor can also be earned in summer programs abroad, such as the summer intensive language program offered by the University of Bergamo (near Milan) or by the Centro Fiorenza in Florence or on the Island of Elba.

Additionally, course work must be completed with a grade in the C range or higher in each of the required courses and students must maintain a 2.0 GPA in the minor.

Minor in Romance Literatures in Translation

To obtain a minor in Romance literatures in translation, students must complete the basic language sequence shown below.

SPAN/FRENCH 1100, 1200, 2100

ITAL/PORT 1100, 1200

Students must also complete three 2000-level literature-in-translation courses and two 3000-level literature-in-translation courses (one of which must be either ITAL 3310 or PORT 3001) chosen from the list below:

FRENCH 2320 French Literature and Thought in English Translation I
FRENCH 2330 French Literature in Translation II
FRENCH 2350 New World Francophone Literature in Translation
FRENCH 2370 French Women Writers in Translation
ITAL 2850 Italian Cinema
ITAL 3310 20th Century Italian Fiction in Translation
ITAL 3820 Films of Federico Fellini
PORT 3001/PORT 3005 Topics in Portuguese
SPAN 2320 Spanish Literature in Translation
SPAN 2340 Hispanic Minority Literature
SPAN 2350 Afro-Hispanic Literature

Additionally, course work must be completed with a grade in the C range or higher in each of the required courses and students must maintain a 2.0 GPA in the minor.

Minor in Spanish

Students may obtain a Spanish minor by completing a minimum of 15 credits beyond SPAN 2100, of which at least 6 credits must be in literature. Courses taught in English, i.e. 2310, 2320, 2330, 2340 and cross-listed courses taught in English do not count toward the minor. The courses listed below are the most likely choice.

SPAN 2160: Intermediate Spanish Composition & Conversation
SPAN 3150: Advanced Spanish Conversation or SPAN 3721: Phonetics
SPAN 3160: Advanced Spanish Composition or SPAN 3280: Commercial Spanish
SPAN 3420: Introduction to Hispanic Literature I
SPAN 3430: Introduction to Hispanic Literature II

Students beginning at a level higher than SPAN 2160 due to placement testing must still complete the minimum of 15 additional credits to receive the minor. A minimum of 9 credits, including 3 in literature, must be taken in residence.

Additionally, course work must be completed with a grade in the C range or higher in each of the required courses and students must maintain a 2.0 GPA in the minor.

Minor in Luso-Brazilian Area Studies

Students may obtain a minor in Luso-Brazilian Area Studies by completing at least 9 credits in the Portuguese language beyond Portuguese 1200, e.g. Portuguese 2160, 3160, and 4960

An additional 6 credits may be chosen from the following list:

Portuguese 2310: Brazilian Civilization
Portuguese 3001/3005: Topics in Portuguese
Portuguese 3420: Survey of Brazilian Literature in Translation
Portuguese 3860: Brazilian Cinema
Spanish 2330: Latin American Civilization
Luso-Brazilian culture/topics emphasis courses offered by other programs/departments (e.g. Anthropology, History, Music, Political Science).

Normally 9 credits must be completed in residence at MU. However, students are permitted to count 6 credits toward the minor from an officially sanctioned semester or year-long foreign study program in Brazil or Portugal. These include the MU in Rio de Janeiro program at the Pontificia Universidade Catolica and the CIEE Universidade Nova de Lisboa program.

FRENCH COURSES

FRENCH 1100--Elementary French I (5).

An introductory course for students who wish to begin their study of French. It teaches the four skills--listening, speaking, reading, and writing. The class meets four days a week and one day in the lab. Class time is used to practice the structures and vocabulary.

FRENCH 1200--Elementary French II (5).

The second course of the beginning language sequence is the continuation of FRENCH 1100. It places equal emphasis on the four skills--listening, speaking, reading, and writing. Students who have some prior knowledge of French are encouraged to take this course. Prerequisite: grade of C or better in FRENCH 1100 or equivalent

FRENCH 1250--Accelerated Beginning French (5).

Course is designed for students who have taken more than two years of High School French. It offers a reinforcement of the beginning concepts of the French language and the many culture it encompasses. Course allows students to further develop all language skills.

FRENCH 2001--Undergraduate Topics in French-General (1-3).

Organized study of selected topics. Subjects may vary from semester to semester. May be repeated with consent of department. Prerequisite: FRENCH 1200 with a grade of C or better.

FRENCH 2004--Undergraduate Topics in French-Social Science (1-3).

Organized study of selected topics. Subjects may vary from semester to semester. May be repeated with consent of department. Prerequisite: FRENCH 1200 with a grade of C or better.

FRENCH 2005--Undergraduate Topics in French-Humanities/Fine Arts (1-3).

Organized study of selected topics. Subjects may vary from semester to semester. May be repeated with consent of department. Prerequisite: FRENCH 1200 with a grade of C or better.

FRENCH 2100--Elementary French III (3).

A multi-skill course following French 1200, centering on cultural/ literary reading, and including a grammar review, practice the spoken language, as well as some practice in written expression. Prerequisite: grade of C or better in FRENCH 1200 or its equivalent course.

FRENCH 2160--Intermediate French Composition and Conversation (3).

A course designed to develop the ability to speak, read, and write in French via the reading of French short stories and/or a short novel. Grammar review. Prerequisite: FRENCH 2100.

FRENCH 2310--French Civilization (3).

Open to any student interested. No knowledge of French required. May not be included in area of concentration in French. Prerequisite: sophomore standing.

FRENCH 2320--French Literature and Thought in English Translation I (3).

This course examines how the masterworks of French literature, from the Middle Ages to the eighteenth century, have influenced Western literary, cultural and philosophical traditions. Prerequisite: sophomore standing or instructor's consent.

FRENCH 2330--French Literature in Translation II (3).

This course examines how the masterworks of French literature of the nineteenth and twentieth centuries have influenced

Western literary, cultural and philosophical traditions. Prerequisite: sophomore standing or instructor's consent.

FRENCH 2350--New World Francophone Literature in Translation (3).

A survey of literature written by Caribbean writers of French expression. Writers include M. Conde, P. Chamoiseau, A. Césaire, E. Glissant, S. Bart-Schwartz, R. Depestre and G. Etienne. Prerequisite: ENGLSH 1000.

FRENCH 2370--French Women Writers (in translation) (3).

Survey of texts and contributions of French women writers from the medieval period to the 20th century. Prerequisite: sophomore standing.

FRENCH 3001--Topics in French-General (1-3).

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisites: sophomore standing, departmental consent for repetition.

FRENCH 3004--Topics in French-Social Science (1-3).

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisites: sophomore standing, departmental consent for repetition.

FRENCH 3005--Topics in French-Humanities/Fine Arts (1-3).

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisites: sophomore standing, departmental consent for repetition.

FRENCH 3160--Advanced French Composition and Conversation I (3).

Development of more sophisticated skills of written and oral expression. Prerequisites: FRENCH 2160 or equivalent.

FRENCH 3280--Commercial French (3).

Composition and Conversation course based on materials related to the French business world. Acquisition of business-related vocabulary. Introduction to French business operations and correspondence. Prerequisites: FRENCH 2160 or equivalent.

FRENCH 3410--Introduction to Literary Analysis (3).

Will acquaint students with vocabulary required for analysis of literary texts. Along with the traditional French method of poetry explication, students will learn to analyze the major literary genres (poetry, theatre, prose). Prerequisite: FRENCH 3160.

FRENCH 3420--Introduction to French Literature I (3).

Study of selected masterpieces of French literature from the Middle Ages through the 18th century. Prerequisites: FRENCH 3160 is required; FRENCH 3410 is highly recommended.

FRENCH 3430--Introduction to French Literature II (3).

Study of selected masterpieces of French literature of the 19th and 20th centuries. Prerequisites: FRENCH 3160 is required; FRENCH 3410 is highly recommended.

FRENCH 3710--Survey of Minority & Creole Languages of the U.S. & the Caribbean (3).

(same as Spanish 3710 and Linguistics 3710). Analysis of the state of the minority languages of the U.S. and the Creole languages of the Caribbean with particular attention to the social status of these languages and speakers' attitudes toward them in the context of ethnic, cultural and national identity (taught in Eng.). Prerequisite: sophomore standing.

FRENCH 4070--Intensive Beginning French (3).

Rapid acquisition of a reading knowledge of French. Cannot be taken to fulfill undergraduate language requirement. Prerequisites: instructor's consent.

FRENCH 4120--Foreign Language Teaching Methodology (3).

(same as Spanish 4120). Theory and techniques of current foreign language methodology and their application in the classroom. Presentation of instructional projects, classroom observations, and strategies for classroom management. Prerequisite: departmental consent. May not be used toward Arts & Science major.

FRENCH 4130--Stylistics (3).

A technical study of French as a means of communication and of self-expression, involving levels of meaning, rhetorical structure, and textual analysis. Prerequisites: FRENCH 3160 or 3280 and 3420 or 3430.

FRENCH 4410--French Medieval Literature (3).

Survey of representative works from the principal literary genres of the Middle Ages: epic (La Chanson de Roland), courtly romance (Chretien de Troyes), chantefable (Aucassin et Nicolette), short story (lai, fabliau), theatre, and lyric poetry. Prerequisites: FRENCH 3420 and 3430.

FRENCH 4420--French Renaissance (3).

Survey of prose and poetry of the sixteenth century with significant emphasis on Montaigne, Rabelais, and the poetry of the Pleiade. Prerequisites: FRENCH 3420 and 3430.

FRENCH 4430--Seventeenth-Century French Literature (3).

Survey of major writers of the seventeenth century. The principal currents of the century as well as the Baroque and the classical movements are discussed. Authors include Corneille, Moliere, Racine, Descartes, Pascal, La Bruyere, La Rochefoucauld, and Madame de Lafayette. Prerequisite: FRENCH 3420 and FRENCH 3430.

FRENCH 4440--Eighteenth-Century French Literature (3).

Through systematic and representative readings, this course familiarizes students with the literary trends and intellectual currents of 18th century France. The course includes works by Montesquieu, Voltaire, Rousseau, Laclous, Diderot, Marivaux, Prevost, and Beaumarchais. Prerequisites: FRENCH 3420 and FRENCH 3430.

FRENCH 4450--Nineteenth-Century French Literature (3).

Selected readings from poetry and theatre with an emphasis on the various manifestations of Romanticism throughout the century. Works by Lamartine, Hugo, Vigny, Musset, Gautier, Nerval, Baudelaire, Verlaine, Rimbaud, and Mallarme are included. Prerequisites: FRENCH 3420 and FRENCH 3430.

FRENCH 4460--Twentieth-Century French Novel (3).

The course is a historical survey that deals with three topics: the modernist writings of the early twentieth century. (Proust, Gide, and Colette), existentialism of the mid-century (Sartre, Camus), and contemporary forms of writing (Beckett, RobbeGrillet, Sarraute, among others). Prerequisites: FRENCH 3420 and FRENCH 3430.

FRENCH 4470--Introduction to the Contemporary French Theatre (3).

Survey of twentieth-century French drama. Students read plays by Claudel, Giraudoux, Sartre, Anouilh,

Beckett, Ionesco, Genet, and others. Strong emphasis is played on class discussions. Written analyses of two plays are assigned, and there is an hourly exam and a final. Prerequisites: FRENCH 3420 and FRENCH 3430.

FRENCH 4480--Introduction to Modern French Poetry (3). Introduction to major currents of French poetry from beginning of the 19th century to the present. Students will write explications of poems, present oral analyses and will be tested on poetic terms and poetic content/styles of various poems and poets. Prerequisite: FRENCH 3420 and 3430.

FRENCH 4490--Nineteenth-Century French Novel (3). Study of the three major currents in prose fiction: romanticism, realism, and naturalism. Representative readings from Chateaubriand, Balzac, Stendhal, Flaubert, and Zola are included. Prerequisites: FRENCH 3420 and FRENCH 3430.

FRENCH 4510--African Francophone Literature (3). Course introduces contemporary African Literature to students via readings and detailed analysis of literary texts by Francophone African writers. Prerequisite: FRENCH 3420 and 3430.

FRENCH 4710--History of the French Language (3). (same as LINGST 4710). Study of the French language from its Latin origin to the present. The course includes a survey of the external social, political, and historical factors that have affected the development of French, followed by a diachronic study of the internal structural features of the language. Prerequisites: FRENCH 3420 and FRENCH 3430.

FRENCH 4720--Structure of Modern French (3). (same as Linguistics 4720). An introductory presentation of the phonological and syntactic systems of contemporary standard French. Prerequisites: FRENCH 3160 or equivalent or instructor's consent.

FRENCH 4960--Special Readings in French (1-3). Independent study through readings, conferences, reports. Prerequisite: FRENCH 3420 and 3430 and departmental consent.

FRENCH 4980 Special Themes in French (3). Subject varies according to instructor. Prerequisites: FRENCH 3420 and 3430. May be repeated for credit.

FRENCH 4993--The Capstone Experience in French (3). This course is required of all majors. Topics vary but all courses synthesize and review essential components of the major: speaking, writing, reading in French, and the ability to think critically and analytically.

FRENCH 4996--Honors Reading in French (1). Directed readings in area of honors thesis. Prerequisite: admission to departmental Honors program.

ITALIAN COURSES

ITAL1100--Elementary Italian I (5-6). Intensive approach to beginning language. Designed to give students an overview of the grammar and syntax of Italian. Emphasis is on oral, with some reading and writing. The 5-hour option is open ONLY to Bachelor of Music students and only with override from the Department. The 5-hour option cannot be applied to meets A&S or Journalism foreign language requirements.

ITAL 1200--Elementary Italian II (5-6). Continues basic grammar and syntax of Italian. Emphasis is on oral, with some reading and writing. The 5-hour option is open ONLY to Bachelor of Music students and only with override from the Department. The 5-hour option cannot be applied to meet A&S or Journalism foreign language requirements. Prerequisite: grade of C- or better in ITAL 1100 or its equivalent.

ITAL1200H--Elementary Italian II -Honors (5-6). Continues basic grammar and syntax of Italian. Emphasis is on oral, with some reading and writing. The 5-hour option is open ONLY to Bachelor of Music students and only with override from the Department. The 5-hour option cannot be applied to meet A&S or Journalism foreign language requirements. Prerequisite: grade of C- or better in ITAL 1100 or its equivalent. Honors eligibility required.

ITAL 2001--Undergraduate Topics in Italian-General (1-3). Organized study of selected topics. Subjects and credits may vary from semester to semester. Prerequisite: departmental consent for repetition.

ITAL 2004--Undergraduate Topics in Italian-Social Science (1-3). Organized study of selected topics. Subjects and credits may vary from semester to semester. Prerequisite: departmental consent for repetition.

ITAL 2005--Undergraduate Topics in Italian-Humanities/Fine Arts (1-3). Organized study of selected topics. Subjects and credits may vary from semester to semester. Prerequisite: departmental consent for repetition.

ITAL 2160--Intermediate Composition and Conversation (3). Reviews main grammar components of Italian. Emphasis is on acquiring the communicative and compositional skills required to study and discuss Italian literature. Prerequisite: ITAL 1200.

ITAL 2310--Italian Civilization (3). Open to any student interested. No knowledge of Italian required. Prerequisite: sophomore standing.

ITAL2850--Italian Cinema (3). (same as Film Studies 2850). A course which concentrates on the development of Italian Cinema, primarily since the Post-WWII era, and the ways in which it reflects major economic, social and political events occurring in Italy. No knowledge of Italian required. Prerequisite: sophomore standing.

ITAL 3001--Topics in Italian-General (1-3). Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisite: departmental consent for repetition. No knowledge of Italian required.

ITAL 3005--Topics in Italian-Humanities/Fine Arts (1-3). Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisite: departmental consent for repetition. No knowledge

of Italian required.

ITAL3150--Advanced Italian Conversation (3). This course will develop the student's ability to speak and understand the oral expression of Italian. Focus will be on learning new idiomatic expressions and an acquisition of new vocabulary. Prerequisite: ITAL 2160.

ITAL 3160--Advanced Italian Composition (3). An advanced grammar course that endeavors to a) develop writing skills in connection with a variety of text types; b) refine study skills; and c) improve style through the study of contemporary Italian culture. Prerequisite: ITAL 2160.

ITAL 3310--20th Century Italian Fiction in Translation (3). This course is designed to present American students with a selection of Italian novels aimed at introducing them to some key issues in the historical, social, and literary developments of Italian life from the turn of the century to the 1960s. Prerequisite: sophomore standing or ENGLISH 1000.

ITAL 3420--Introduction to Italian Literature (3). This course introduces students to the literacy terminology that will enable them to study Italian literature. Prerequisite: ITAL 3150 and 3160.

ITAL3430--Survey of Italian Literature (3). Designed to expose students to the rich variety of Italian letters. Emphasis will be placed on textual analysis as well as on authors, themes and stylistic features. Prerequisite: ITAL 3420.

ITAL 3820--Films of Federico Fellini (3). (same as Film Studies 3820). In studying the filmic career of one of the supreme stylists of the cinematic world, students will view films from each phase of Fellini's career. Prerequisite: ITAL 2850 or ENGL 1810 OR 1820; instructor's consent.

ITAL 3850--The Films of Luchino Visconti (3). (same as Film Studies 3850). Analysis of the film art of Visconti. Prerequisites: FILM S 2810, 2820 or 2850.

ITAL 4070--Intensive Beginning Italian (3). Designed for rapid acquisition of a reading knowledge of Italian. Cannot be taken to fulfill undergraduate language requirement. Prerequisites: instructor's consent.

ITAL 4960--Special Readings in Italian (1-3). Independent study through readings, conferences, reports.

PORTUGUESE COURSES

PORT 1100--Elementary Portuguese I (6). Elementary Portuguese I is designed to give students an overview of the grammar and syntax of Portuguese. Emphasis is on oral and listening skills with some reading and writing.

PORT 1200--Elementary Portuguese II (6). Elementary Portuguese 1200 is designed to give students an overview of the grammar and syntax of Portuguese. Emphasis is on oral and listening skills with some reading and writing. Prerequisite: PORT 1100.

PORT 2001--Topics in Portuguese-General (1-3). Organized study of selected topics. Subject may vary from semester to semester. May be repeated with consent of instructor.

PORT 2005--Topics in Portuguese-Humanities/Fine Arts (1-3). Organized study of selected topics. Subject may vary from semester to semester. May be repeated with consent of instructor.

PORT 2160--Intermediate Portuguese (3). Review of grammar through Brazilian culture. Designed for students who have taken either Portuguese 1200 or Portuguese 4070 and wish to continue studying the language. Prerequisite: PORT 1200 OR 4070.

PORT 2310--Brazilian Civilization (3). Survey of Brazilian history, arts and culture. Open to any student interested. No knowledge of Portuguese required. Prerequisite: sophomore standing.

PORT 3001--Topics in Portuguese-General (1-3). Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisites: sophomore standing, departmental consent for repetition.

PORT 3005--Topics in Portuguese-Humanities/Fine Arts (1-3). Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisites: sophomore standing, departmental consent for repetition.

PORT 3160--Advanced Portuguese Composition and Conversation (3). Development of more sophisticated skills of written and oral expression. Prerequisite: PORT 2160.

PORT 3420--Survey of Brazilian Literature (3). Masterpieces of Brazilian literature in translation from its origins to present. Prerequisites: sophomore standing.

PORT 3860--Brazilian Cinema (3). (same as Film Studies 3860). An introduction to Brazilian cinema, culture and society through the study of contemporary cinematic productions. Topics include: Hollywood perceptions of Brazil; re-definitions of national identity and history, representations of race and gender. Prerequisite: ENGLISH 1000.

PORT 4070--Intensive Beginning Portuguese (3). Designed for rapid acquisition of a reading knowledge of Portuguese. Cannot be taken to fulfill undergraduate language requirement. Prerequisites: instructor's consent.

PORT 4960--Special Readings in Portuguese (1-3). Independent study through readings, conferences, reports. Prerequisite: departmental consent.

ROMANCE LANGUAGES AND LITERATURE COURSES

RM LAN 2001--Undergraduate Topics in Romance Languages-General (1-3). Organized study of selected topics. Subjects and credits may vary from semester to semester. Prerequisite: departmental consent for repetition.

RMLAN 2310--Literature of the African Diaspora (3). A postcolonial analysis of selected literary texts interpreting the African diaspora in the Americas. Exemplary texts from the Caribbean (English, French, Spanish), South America and the United States are discussed in comparative perspective. No knowledge of Spanish required. Prerequisite: ENGLISH 1000.

RMLAN 2810--Introduction to Film Analysis (3). (same as Film Studies 2810 and German 2810). This course familiarizes students with the basic analytical tools for describing and interpreting films, and helps them develop a critical vocabulary for discussing and writing about film. It also introduces some theoretical approaches to film analysis. Prerequisite: freshmen and sophomores only, or consent of program director.

RM LAN 2820--Trends in World Cinema (3). (same as Film Studies 2820 and German 2820). This course is a historical overview of the major trends in international cinema. It focuses on the intersection of aesthetics, industry, and ideological and social concerns in cinematic production. Prerequisite: sophomore standing, FILM_S 2810 or instructor's consent.

RM LAN 4310--Literature of the African Diaspora (3). A study, in English translation, of writings by authors of African descent in the Americas. Prerequisite: junior standing or instructor's consent.

RM LAN 4730--Linguistic Theory and Language Acquisition (3). (same as Linguistics 4730). The goal of this class is to study the implications of current linguistic theory for contemporary research on second language acquisition. In particular, the hypothesis that second language acquisition follows some of the same principles as first language acquisition is explored. Course is taught in English. Prerequisites: SPAN 4721/7721, FRENCH 4720/7720, ENGLISH 4600/7600 or LINGST 4860/7860.

RM LAN 4940--Service Learning in Romance Languages (1). (same as Spanish 4940 and French 4940). Course offers our majors and advanced minors the opportunity to use their language skills in real-life community settings. Graded on S/U basis only. Does not meet A&S general education requirements. May be repeated once for credit. Prerequisites: junior or senior standings and departmental consent.

SPANISH COURSES

SPAN 1100--Elementary Spanish I (5). An introductory course for students who wish to begin their study of Spanish. It teaches the four skills - listening, speaking, reading, and writing. The class meets four days a week and one day in the lab. Class time is used to practice the structures and vocabulary.

SPAN 1200--Elementary Spanish II (5). The second course of the beginning sequence is the continuation of Spanish 1100. It places equal emphasis of the four skills listening, speaking, reading and writing. Students who have prior knowledge of Spanish are encouraged to take this course. Prerequisite: grade of C or better in Spanish 1100 or equivalent.

SPAN 1250--Accelerated Beginning Spanish (5). Course is designed for students who have taken more than two years of High School Spanish. It offers a reinforcement of the beginning concepts of the Spanish language and the many cultures it encompasses. Course allows students to further develop all language skills.

SPAN 2001--Undergraduate Topics in Spanish-General (1-3). Organized study of selected topics. Subjects may vary from semester to semester. May be repeated with consent of department. Prerequisite: SPAN 1200 with a grade of C or better.

SPAN 2005--Undergraduate Topics in Spanish-Humanities/Fine Arts (1-3). Organized study of selected topics. Subjects may vary from semester to semester. May be repeated with consent of department. Prerequisite: SPAN 1200 with a grade of C or better.

SPAN 2100--Elementary Spanish III (3). A multi-skill course following Spanish 1200, centering on cultural/ literary readings, and including a grammar review, practice in the spoken language, as well as some practice in written expression. Prerequisite: grade of C or better in SPAN 1200 or its equivalent course.

SPAN 2160--Intermediate Spanish Composition and Conversation (3). First course following required elementary sequence. Designed specifically to correct any remaining weaknesses in gross writing skills and to develop further conversational ability with equal emphasis on both of these aspects. Classwork involves written compositions and oral presentations. Prerequisites: SPAN 2100 or equivalent.

SPAN 2310--Spanish Civilization (3). Survey of Spanish history, arts and culture. Open to any student interested. No knowledge of Spanish required. May not be included in area of concentration in Spanish.

SPAN 2320--Spanish Literature in Translation (3). May not be included in area of concentration in Spanish. Subject varies with instructor. Prerequisite: sophomore standing.

SPAN 2330--Latin American Civilization (3). Survey of Latin American history, arts and culture. Open to any student interested. No knowledge of Spanish required. May not be included in area of concentration in Spanish.

SPAN 2340--Hispanic Minority Literature (3). This course studies the literature of Hispanic minorities in the United States: Chicanos (Mexican American), Mainland Puerto Ricans, and Cuban exile writers. It explores the question of minority versus majority literatures and the

creation of a Hispanic minority discourse. No knowledge of Spanish required. Prerequisite: ENGLISH 1000.

SPAN 3001--Topics in Spanish-General (1-3). Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisite: sophomore standing, departmental consent for repetition.

SPAN 3004--Topics in Spanish-Social Science (1-3). Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisite: sophomore standing, departmental consent for repetition.

SPAN 3005--Topics in Spanish-Humanities/Fine Arts (1-3). Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisite: sophomore standing, departmental consent for repetition.

SPAN 3150--Advanced Spanish Conversation (3). Course puts into practice the linguistic skills learned at intermediate levels. It develops and increases the capacity for comprehension and oral expression in the language. Focus is on practice of certain syntactic structures and idiomatic expressions, and on acquisition of new vocabulary. Prerequisite: SPAN 2160 or equivalent.

SPAN 3160--Advanced Spanish Composition (3). Course emphasizes writing at an advanced level, with a certain degree of sophistication about varied subjects and using different techniques of composition. Classwork consists mainly of the discussion of both the ideas and techniques used in different textual forms. Prerequisite: SPAN 2160 or equivalent.

SPAN 3280--Commercial Spanish (3). Business terminology and forms. Translate and compose business letters and documents for advertising and promotion, trade and commerce, imports and exports, money and banking. Prerequisite: SPAN 2160 or equivalent.

SPAN 3400--Mexican Culture and Civilization (2-3). Study of Mexican culture and civilization through field trips, excursions and selected readings in Mexican history and literature. No knowledge of Spanish required. Open only to participants in UMC's study programs in Mexico. Prerequisites: sophomore standing or instructor's consent.

SPAN 3420--Introduction to Hispanic Literature I (3). Selected prose fiction and nonfiction prose of Spain and Spanish America. Prerequisite: SPAN 3160 or equivalent.

SPAN 3430--Introduction to Hispanic Literature II (3). Selected plays and poetry of Spain and Spanish America. Prerequisite: SPAN 3160 or equivalent.

SPAN 3710--Survey of Minority & Creole Languages of the U.S. & the Caribbean (3). (same as French 3710 and Linguistics 3710). Analysis of the state of the minority languages of the U.S. and the Creole languages of the Caribbean with particular attention to the social status of these languages and speakers' attitudes toward them in the context of ethnic, culture and national identity (taught in Eng.). Prerequisite: sophomore standing.

SPAN 3721--Spanish Phonetics (3). (same as Linguistics 3721). Introductory course to the study of Spanish phonological, phonetic and

spelling systems, practice of pronunciation, phonetic transcriptions, and introduction to the variation of Spanish pronunciation in the Hispanic world. The course is conducted in Spanish. Prerequisite: SPAN 2160 or equivalent.

SPAN 4070--Intensive Beginning Spanish (3). Designed for rapid acquisition of a reading knowledge of Spanish. Cannot be taken to fulfill undergraduate language requirement. Prerequisite: instructor's consent.

SPAN 4120--Foreign Language Teaching Methodology (3). (same as French 4120). Theory and techniques of current foreign language methodology and their application in the classroom. Presentation of instructional projects, classroom observations, and strategies for classroom management. Prerequisite: department consent. May not be used towards Arts & Science major.

SPAN 4130--Stylistics (3). Advanced composition class. Discussion of complex grammatical structures necessary for formal writing. Examination of stylistic devices and structures beyond sentence level, in order to learn to organize discourse level production. Prerequisite: SPAN 2160 or equivalent. Recommended: SPAN 3420 and 3430.

SPAN 4410--Spanish Medieval Literature (3). The principal periods, schools, and genres of Spanish medieval literature are surveyed through representative masterworks. Lectures and periodic student reports help relate works read to the rest of contemporary Spanish and European literature. Prerequisites: SPAN 3420 and 3430.

SPAN 4420--Golden Age Poetry (3). Poetry of the principal Spanish poets of the 16th and 17th centuries and of literary criticism devoted to it. Special emphasis is placed on the works of Garcilaso de la Vega, Fray Luis de Leon, among others. Short papers and explications are generally required. Prerequisite: SPAN 3420 and 3430.

SPAN 4421--Renaissance and Golden Age Prose (3). Representative prose works from various genres are read as well as literary criticism devoted to them. Among the authors studied are Fernando de Rojas, Jorje Montemayor, Miguel de Cervantes, Francisco de Quevedo, and Maria de Zayas. Prerequisite: SPAN 3420 and 3430.

SPAN 4422--Spanish Theatre in the Golden Age (3). Dramatists to be studied include Lope de Vega, Calderon, Ruiz de Alarcon, Tirso de Molina, Guillen de Castro, Velez de Guevara, and some of Cervantes' theatre. Prerequisite: SPAN 3420 and 3430.

SPAN 4423--Don Quijote (3). In this course students read the two parts of Don Quijote in the original Spanish. Analysis and class discussion highlight elements of literary interest. Neopositivist methodology, factual background, formalist considerations and psychoanalytic approaches are used in this course. Prerequisites: SPAN 3420 and 3430.

SPAN 4441--Twentieth-Century Spanish Novel (3). Reading and critical analysis of representative novels written in Spain from early century to the post-Franco period. The objectives of the course are to develop critical skills in dealing with these fictional works and to understand the major trends of the contem-

porary Spanish novel. Prerequisites: SPAN 3420 and 3430.

SPAN 4442--Advanced Contemporary Culture of Spain (3). Study of Spanish culture and civilization through field trips, excursions, and selected readings in history, literature, and contemporary print media. Prerequisite: SPAN 3150, 3160, 3721 or equivalent. Open only to participants in the UMC's summer study in Spain.

SPAN 4450--Hispanic Literature of Resistance (3). A study of the literature of commitment in the Hispanic world: literature in its historical and political contexts that makes a conscious effort to change social conditions. Prerequisites: SPAN 3420 and 3430.

SPAN 4460--Advanced Contemporary Culture of Spanish America (3). A study of Spanish-American culture and civilization through selected readings in history and literature, and the use of visual media. Graded on A/F basis only. Prerequisites: SPAN 3150 and 3160.

SPAN 4461--Advanced Spanish Civilization (3). A survey of Spanish culture and Spanish history from the Middle Ages to the present with special emphasis on contemporary culture. Students will be provided with knowledge of chronology, geography and contemporary issues from readings of journals, novels and Internet news. Prerequisites: SPAN 3150 and 3160.

SPAN 4470--Survey of Spanish American Literature I (3). This is an introductory course in Spanish American literature. The reading material in prose and verse is studied in chronological order from the early 16th to the early 20th century. Readings include selections from 22 major Spanish American authors. Prerequisites: SPAN 3420 and 3430.

SPAN 4471--Survey of Spanish American Literature II (3). Survey of contemporary Latin American literature from approximately 1910 to the present. Close analysis and reading of representative major texts of Latin American literature. Students read complete selections and short excerpts from a standard anthology, and three complete novels. Prerequisites: SPAN 3420 and 3430.

SPAN 4490--Hispanic Oral Traditions (3). This course proposes to examine the Hispanic Oral Tradition through a study of romances and related genres, the corrido, decima and folktale. Prerequisites: SPAN 3420 and 3430.

SPAN 4520--Modernista and Contemporary Poetry (3). Careful study and analysis of selected poems by major figures in Hispanic poetry. The period covered includes the modernist movement to the present. Particular attention is given to the following figures: Ruben Dario, Octavio Paz, Pablo Neruda, and Nicolas Guillen. Prerequisites: SPAN 3420 and 3430.

SPAN 4530--The Spanish American Theatre (3). Intended as an overview of a vital genre in contemporary Spanish American studies, this survey introduces dramatists whose works are the focus of increasing attention from international specialists. The works of Emilio Carballido, Egon Wolff, Griselda Gambaro and Osvald Dragun, among others are discussed. Prerequisites: SPAN 3420 and 3430.

SPAN 4540--Afro-Hispanic Literature (3). A study of prose, poetry, and drama, in Spanish,

written by authors of African descent in the Americas. Prerequisites: SPAN 3420 and 3430.

SPAN 4550--Nobel Laureates in Spanish American Literature (3). Analyzes the creative expression of five Nobel laureates from Spanish America. Selected works of Gabriela Mistral, Pablo Neruda, Miguel Angel Asturias, Octavio Paz and Gabriel Garcia Marquez are read in relation to contemporary theory. Prerequisites: SPAN 3420 and 3430.

SPAN 4711--History of the Spanish Language (3). (same as Linguistics 4711). Diachronic analysis of phonological, morphological, and syntactical systems of Spanish, from Vulgar Latin to contemporary dialects. Prerequisite: reading knowledge of Spanish. Recommended: SPAN 3420 and 3430.

SPAN 4721--Structure of Modern Spanish (3). (same as Linguistics 4721). Synchronic analysis of phonology, morphology and syntax of spoken Spanish dialects. Prerequisites: four 3000-level courses in Spanish.

SPAN 4940--Service Learning in Spanish (1). (same as Romance Languages 4940). Course offers our majors and advanced minors the opportunity to use their language skills in real-life community settings. Graded on S/U basis only. Does not meet A&S general education requirements. May be repeated once for credit. Prerequisites: junior or senior standings and departmental consent.

SPAN 4960--Special Readings in Spanish (1-3). Independent study through readings, conferences, reports. Prerequisites: SPAN 3420 and 3430 and departmental consent.

SPAN 4980--Special Themes in Spanish (3). Subject varies according to instructor.

Prerequisites: SPAN 3420 and 3430. May be repeated for credit.

SPAN 4993--The Capstone Experience in Spanish (3). This course is required of all majors. Topics vary but all courses synthesize and review essential components of the major: speaking, writing, reading in Spanish, and the ability to think critically and analytically.

Sociology is a discipline founded about 100 years ago to bring the scientific method to the study of human societies. It has pioneered in the development of methods and techniques designed to provide accurate and verifiable information about contemporary societies. It is the inventor of survey research and a host of statistical measures. The techniques created by sociologists are now used in all disciplines concerned with human behavior.

Sociologists today conduct research and reason from research findings to generate deeper understandings of how societies work. The generation of theoretical statements and the testing of those statements in a wide variety of social settings is the core of sociological work. Sociologists are knowledge builders, rather than change agents, although there is an emergent group of “clinical sociologists” who see themselves as people who apply sociological knowledge to create changes in organizations, individuals and communities. Sociology contributes to human improvement by seeing that change can be based on good information and reasoned understanding of how humans work together in groups or larger aggregates.

Major Program Requirements - Sociology

A Bachelor of Arts with a major in Sociology consists of 30 credits organized to provide progressively more sophisticated levels of sociological analysis culminating in a capstone experience. It is expected that students start with entry courses, progress to basic courses and then to upper-level electives. In addition, students must complete all degree, College of Arts and Sciences and university graduation requirements, including university general education.

Major core requirements

Entry courses	6
SOCIOL 1000: Introduction to Sociology	
SOCIOL 2200: Social Inequalities	
Basic courses	6
SOCIOL 2950: Social Research	

SOCIOL 3100: Recent Theories in Sociology (prerequisite: SOCIOL 2200)

Post-basic courses9

Three additional sociology courses numbered 3000 or above; may include no more than 3 credits in SOCIOL 4940, and/or SOCIOL 4942

Additional hours in sociology.....6

An additional 6 credits in elective coursework in the major; may include no more than 3 credits in SOCIOL 4960

Capstone course3

SOCIOL 4970: Senior Seminar
 Should be taken in the last semester of undergraduate work

Departmental honors6

SOCIOL 4995: Honors in Sociology
 Students with a cumulative GPA of 3.3 are eligible for departmental honors in sociology. Qualified students who seek this option must write an honors thesis under the supervision of a sociology faculty member. Students who take the honors thesis option are not required to take SOCIOL 4970. Students enroll in SOCIOL 4995 for 3 credits each semester of the senior year.

Statistics

A course in statistics is not required for the major. However, such a course is highly recommended, especially for students considering graduate or professional school.

Suggested courses:

STAT 1200: Introduction Statistical Reasoning
 STAT 1300: Elementary Statistics
 SOCIOL 4120: Social Statistics

Optional Tracks

The course work in sociology fits into five recommended tracks of study. Although sociology majors are not required to select a track, students who want a closer tie between the major and future employment are encouraged to do so. Each track has recommended courses in the major, complementary internships, service learning opportunities and suggested courses offered by other departments. (Note: Tracks are not listed on transcripts or diplomas.) These tracks are outlined below.

Track: Law, Justice and Society

SOCIOL 1000: Law, Justice, and Society
 SOCIOL 1650: Social Deviance
 SOCIOL 3010: Social Problems
 SOCIOL 3600: Criminology
 SOCIOL 4500: Sociology of Social Policy
 SOCIOL 4600: Contemporary Corrections
 SOCIOL 4610: Society and Social Control

Track: Power, Inequalities and Social Change

SOCIOL 1000: Power, Inequalities and Social Change
 SOCIOL 2210: The Black Americans
 SOCIOL 3200: Class, Status and Power
 SOCIOL 3210: Globalization
 SOCIOL 3320: Sociology of Gender
 SOCIOL 3510: Public Opinion and Communication
 SOCIOL 3520: Collective Behavior
 SOCIOL 4220: Race and Ethnic Relations
 SOCIOL 4230: Global Perspectives on Women and Development

Track: Sexuality, Health and the Life Course

SOCIOL 1000: Sexuality, Health, and the Life Course
 SOCIOL 1360: The Female Experience

SOCIOL 2230: Social Perspectives on Aging
 SOCIOL 3010: Social Problems
 SOCIOL 3300: Queer Theories/Identities
 SOCIOL 3320: Sociology of Sex Roles
 SOCIOL 3420: The Family
 SOCIOL 3460: Sociology of Science
 SOCIOL 3440: Sociology of Health
 Cross-list WGST 4020: The Politics of Reproduction and Fertility Control
 SOCIOL 4210: Sociology of Aging

Track: Culture, Identity and the Media

SOCIOL 1000: Culture, Identity, and Media
 SOCIOL 2300: Self and Society
 SOCIOL 2310: Culture and Mass Media
 SOCIOL 3300: Queer Theories/Identities
 SOCIOL 3310: Social Psychology
 SOCIOL 3400: Politics of the Media
 SOCIOL 3430: Sociology of Sport
 SOCIOL 3450: Sociology of Religion
 SOCIOL 3510: Public Opinion and Communication
 SOCIOL 4320: Culture, Identity, and Interaction

Track: Organizations, Work, Technology and the Economy

SOCIOL 1000: Organizations, Work, Technology and the Economy
 SOCIOL 3200: Sociology of Class, Status, and Power
 SOCIOL 3210: Globalization
 SOCIOL 3460: Sociology of Science
 SOCIOL 3520: Collective Behavior
 SOCIOL 3700: Organizations and Institutions
 SOCIOL 3710: Sociology of Work
 SOCIOL 4230: Global Perspectives on Women and Development

Departmental Honors

See departmental honors in the degree requirements listed above.

Minor in Sociology

To minor in sociology, a student must complete a total of 15 credits of sociology course work as follows:

- SOCIOL 1000: Introduction to Sociology
- SOCIOL 2200: Social Inequalities
- Two courses at the 3000-level or above
- One other sociology course at any level

Nine credits of course work toward the minor must be MU courses.

SOCIOLOGY COURSES

SOCIOL 1000--Introduction to Sociology (1-3).Nature of organization and activities of human groupings-family, community, crowd, social class, etc.; structure, function of institutions; social influences shaping personality, behavior, social change. No credit for both SOCIOL 1000 and RU SOC 1000.

SOCIOL 1000H--Introduction to Sociology Honors (3).Nature of organization and activities of human groupings-family, community, crowd, social class, etc.; structure, function of institutions; social influences shaping personality, behavior, social change. No credit for both SOCIOL 1000 and RU SOC 1000. Honors eligibility required.

SOCIOL 1100H--Introduction to Sociology Honors (3).Nature of organization and activities of human groupings-family, community, crowd, social class, etc.; structure, function of institutions; social influences shaping personality, behavior, social change. No credit for both SOCIOL 1000 and RU SOC 1100. Honors eligibility required.

SOCIOL 1120--Population and Ecology (3). (same as Rural Sociology 1120). Changes in the structure and characteristics of population groups and their relationship to both human and non-human aspects of the biophysical environment.

SOCIOL 1360--The Female Experience: Body, Identity, Culture (3). (same as Women's and Gender Studies 1360). Study of the experience of being female in American Culture. Course will focus on development of women's identities through such topics as: sexuality, reproduction, self-image, rape and health care.

SOCIOL 1650--Social Deviance (3). Survey of approaches to the study of behaviors commonly regarded as deviant such as crime, sexual abuse, substance abuse, mental illness, etc.

SOCIOL 2103--Topics in Sociology-Behavioral Science (1-3). Organized study of selected topics. Particular topics may vary from semester to semester. Departmental consent for repetition.

SOCIOL 2104--Topics in Sociology-Social Science (3). Organized study of selected topics. Particular topics may vary from semester to semester. Departmental consent for repetition.

SOCIOL 2200--Social Inequalities (3). (same as Black Studies 2200). Survey of inequalities based upon criteria such as race, ethnicity, sex, age, religion and social class in contemporary societies. Focus on dynamics by which privilege and inequalities are structured.

SOCIOL 2210--The Black Americans (3). (same as Black Studies 2210). Analysis of history of blacks in the United States. Assessment of contemporary black community in terms of its institutions, styles of life, patterns of work and intergroup relations.

SOCIOL 2230--Social Perspectives on Aging (3). Survey of basic knowledge in social gerontology, aging and old age in American society. Analysis of changes as individuals age, differences among old people, social problems of the aged. Prerequisites: SOCIOL 1000 or equivalent.

SOCIOL 2300--Self and Society (3). Analysis of the self in modern society. Topics covered include social interaction, social perception, language and learning, the sociology of emotions and the social construction of identity.

SOCIOL 2310--Culture and Mass Media (3). Sociological study of modern folk, local, popular and mass cultural production and consumption; mass media, diffusion, change, differentiation.

SOCIOL 2950--Social Research I (3). (same as Rural Sociology 2950). Introduction to principles of methodology; theory and research; survey of basic research designs and perspectives; preparation for understanding and conducting social research. Required for Sociology majors.

SOCIOL 3000--Urban Sociology (3). (same as Rural Sociology 3000). Urbanism as a world phenomenon; ecological, demographic characteristics of cities; organization of urban society including status systems, occupational structure, formal and informal associations, racial and cultural relations, forms of communication, housing, city planning.

SOCIOL 3010--Social Problems (3). Trends in modern societies: urbanization, occupational structure, technological change, etc. as these have produced alienation and legitimacy problems. Political, economic, health, welfare, military, justice institutions may be considered. Counter movements and policy issues.

SOCIOL 3100--Recent Theories in Sociology (3). (same as Rural Sociology 3100). Introduction to major theoretical positions and issues in contemporary American sociology. Logical and intellectual structure of major theoretical schools: functionalism, conflict, exchange, symbolic interaction, phenomenological-ethnomethodological theories. Prerequisite: SOCIOL 2200.

SOCIOL 3200--Class, Status, and Power (3). Study of the structure of wealth, poverty, prestige, and power in relationship to societal, interpersonal, and individual opportunities, constraints and outcomes.

SOCIOL 3210--Sociology of Globalization (3). Globalization's origin and dynamics; the social and political effects of globalization: countervailing forces to economic globalization, in particular reassertions of "traditional" identities, labor movements, new social movements, and the global democracy movement.

SOCIOL 3230--Education and Social Inequalities (3). Examination of the ways in which inequalities are constructed, reproduced, maintained or transformed by and within educational institutions. Particular attention will be given to inequalities based on gender, race, and social class.

SOCIOL 3255--Youth in Today's World (3). Study of what factors influence the development of youth in today's society. Examined are types of behavior such as mating, deviance and the role of schools, parents, TV and friendship groups.

SOCIOL 3300--Queer Theories/Identities (3). Analysis of gay, lesbian, bisexual, transgender (glbt) and queer identities in culture and society with an emphasis on the contributions of queer theory and other glbt standpoint theories to sociology and the study of society. Prerequisite: SOCIOL 2200 or instructor's consent.

SOCIOL 3310--Social Psychology (3). Survey of theories and research concerned with the ways in which individuals construct social situations and are affected by them. Topics covered include self-identities, social influence, personal relationships, prejudice and discrimination.

SOCIOL 3320--Sociology of Gender (3). (same as Women's and Gender Studies 3320). Study of the ways in which femininities and masculinities are constructed in American society with particular attention to gender ideologies and the gendered nature of the social structure.

SOCIOL 3330--Environmental Justice (3). Environmental justice refers to the ways in which the "cost and benefits" of modern industrial society are distributed among social groups. This course is concerned with justice, not as an abstract concept, and inequality not in terms of numbers in a bank account. Social justice or inequality are lived, embodied experiences. An individual's likelihood of experiencing environmental harm is related to intersecting gender, race and class formations,

among other things. Justice or inequality is not only embodied, it also "happens" in places--national and regional differences matter. In this course we will look at some of the extensive literature documenting the ways in which communities of color and poor communities are subject to disproportionate environmental risks. In addition, we will focus on gender as an important category in understanding environmental inequality.

SOCIOL 3400--Politics of the Media (3). (same as Peace Studies 3400). In this course we study critical thinking skills and use them to compare and contrast U.S. media coverage of current issues with media in other parts of the world. Graded on A/F basis only.

SOCIOL 3410--Social Bases of War and Peace (3). (same as Peace Studies 3410). Social conditions associated with and preceding war and peace; war as a social institution; international images and stereotypes; proposals for preventing war and reducing international hostilities.

SOCIOL 3420The Family (3). Families, kin and households as interacting groups; roles, socialization, problems, structural change; family in relation to other social institutions; historical, cultural and class variations.

SOCIOL 3430--The Sociology of Sport (3). The role of sport in modern society. Includes violence in sport; politics and economics of sport; male, female, and racial inequalities; and international comparisons of sport structures.

SOCIOL 3440--Sociology of Health (3). A survey of sociological thinking and research on health, health problems, health occupations and health services. How these are shaped by the society. Problems faced by individuals and the system. Potential solutions to problems.

SOCIOL 3450--Feminist Methodologies (3). This course is an opportunity to explore the difference that feminism makes in doing research. Students can begin to identify the research tools and strategies suited to questions they want to pursue. Prerequisite: Sophomore standing.

SOCIOL 3460--Technology and Society (3). In the last few decades science and technology have permeated our lives as never before. This has led to wide ranging intellectual debates and social movements in and around the issue of relationship between science, technology, and society.

This course, which is organized on a lecture-seminar format, will critically investigate different aspects of the relationship between science, technology, and society. Graded on A/F basis only.

SOCIOL 3510--Public Opinion and Communication (3). Nature of public opinion; processes of opinion formation; special publics, pressure groups; effects of communication through personal contacts and mass media; propaganda, censorship; opinion surveying.

SOCIOL 3520--Collective Behavior (3). (same as Peace Studies 3520). Analysis of crowd behavior and related phenomena: rumors, disasters, fashions. Social responses to unclear, dangerous or unjust conditions. The dynamics of conflict, consensus and change.

SOCIOL 3600--Criminology (3). (same as Peace Studies 3600). Sociology of law; constitutional, psychological, sociological theories of

criminal behavior; process of criminal justice; treatment of corrections; control of crime.

SOCIOL 3700--Organizations and Institutions (3). Social organization of modern societies with focus on complex organizations (corporations, bureaucracies) within institutional arrangements (economy, polity, education, religion); organizational structure; interorganizational networks; interrelations of institutional sectors.

SOCIOL 3710--The Sociology of Work (3). Analysis of occupational, professional aspects of American society. Division of labor; occupational mobility; work and the self; collegueship and informal organizations of work. Prerequisites: SOCIOL 1000 or 1650.

SOCIOL 4100--Expert Systems (3). Introduction to the use of expert system shells, designed for graduate students from any department. Students create prototype expert systems under close supervision by faculty experts. Prerequisite: junior standing or instructor's consent.

SOCIOL 4110--Feminist Research and Criticism (3). (same as Women's and Gender Studies 4110). Examination of both feminist critiques of traditional social research and recent, feminist-oriented research that attempts to answer these criticisms. Prerequisites: SOCIOL 2950 or equivalent.

SOCIOL 4120--Social Statistics (3). (same as Rural Sociology 4120). Descriptive statistics and bivariate quantitative analysis techniques commonly used by social scientists. Includes coverage of parametric and non-parametric methods. Introduction to computer analysis. Prerequisite: SOCIOL 2950 or graduate standing.

SOCIOL 4200--Social Inequalities (3). Examination of theories and research concerned with inequalities based on social class, gender, and race-ethnicity. M.A. core course for sociology students. Prerequisite: graduate standing or instructor's consent.

SOCIOL 4210--Sociology of Aging (3). Sociological research and theories of aging and old age; historical, demographic, comparative, social psychological and structural topics are studied in depth. Prerequisites: 6 hours of Sociology and junior standing.

SOCIOL 4220--Race and Ethnic Relations (3). The experience of racial and ethnic minorities; inequality, assimilation, ethnic and racial conflict, accommodation. Prerequisite: junior standing or instructor's consent.

SOCIOL 4230--Women, Development, and Globalization (3). (same as Black Studies 4230 and Women's and Gender Studies 4230). Examines the history and structure of "development" discourse and practices. Stresses the interconnections and impact on women globally. Reviews women's strategies in defining and instituting programs to improve quality of life in communities. Prerequisites: SOCIOL 2200, WGST 1332, BL STU 1332, or WGST 4420.

SOCIOL 4300--Death and Dying (3). Death and dying explored from demographic, sociological and social psychological perspectives. Topics: trends and differentials; definitions of death; dying as a social process; funerals and survivors; cultural solutions to problems of death. Prerequisite: junior standing or instructor's consent.

tor's consent.

SOCIOL 4310--Advanced Social Psychology (3). Major theoretical fields and their application to human problems. M.A. core course. Prerequisite: SOCIOL 3310 or graduate standing.

SOCIOL 4315--Social Demography (3). (same as Rural Sociology 4315). General demographic theories; age, sex, and ethnic composition of population; fertility, mortality and migration as components of population change; social, economic and political implications of demographic trends. Prerequisites: SOCIOL 1000 or RU SOC 1100 and junior standing.

SOCIOL 4320--Culture, Identity and Interaction (3). Examines the interplay between culture, identity, and interaction as these intersect with issues of social inequality, social control, social change, and the everyday production of subjectives. MA core course. Prerequisites: SOCIOL 3310 graduate standing or instructor's consent.

SOCIOL 4335--Social Change and Trends (3). (same as Rural Sociology 4335). Nature of social change. Emphasis on sociological theories and models of social change and their application in analysis and implementation of change in social structures.

SOCIOL 4370--Environment and Society (3). (same as Rural Sociology 4370). An interdisciplinary examination of domestic and international environmental issues focusing on social, cultural, and policy dimensions. Perspectives of the social sciences and humanities are included. Prerequisites: junior, senior or graduate standing.

SOCIOL 4400--Sociology of Health Systems (3). Analyzes organization of U.S. health system and systems in the developed and developing world. Special attention to reform movements, universality, effectiveness, quality, and efficiency. Prerequisite: SOCIOL 2950, 3440, and 3100 or graduate standing.

SOCIOL 4410--Sociology of Education (3). (same as Educational Leadership and Policy Analysis 7458). Contexts, structures and processes of schooling; effects on class, race, ethnicity and gender; social change, educational policy, and organizational dynamics; higher education and the economy. Prerequisites: SOCIOL 1000 or equivalent.

SOCIOL 4500--Sociology of Social Policy (3). Sociological theories and methodologies focused on social policy; policy as process; contextual and critical policy analyses; assessing policy effects and consequences. Prerequisite: senior standing.

SOCIOL 4510--Social Movements and Conflicts (3). Survey of approaches and research on social movements and social change. Historical and contemporary social movements in the U.S.; collective protest and violence; political revolutions. MA core course. Prerequisite: SOCIOL 3520, 3700, or 3320 or graduate standing.

SOCIOL 4520--Political Sociology (3). (same as Peace Studies 4520). Social bases of power and politics, economic and political elites, the politiceconomy of the advanced societies, sources of political conflict and change. MA core course. Prerequisite: SOCIOL 3200, 3510, 3520, or 3700.

SOCIOL 4530--Social Organization of the Industrial Societies (3). The organizational and interorganizational structure of modern capitalist and socialist societies, including examination of alternative models such as technocracy, bureaucratic society, state capitalism, state socialism, organized capitalism. Prerequisites: SOCIOL 3700 or 3710 or graduate standing.

SOCIOL 4550--Gender and Human Rights in Cross Cultural Perspective (3). (same as WGST 4550 and PEA_ST 4550). This course focuses on the global discourse on human rights and gender, emphasizing cross-cultural theories. Course includes the meaning of rights, Western and nonwestern perspectives, feminist contributions, important substantive debates, violations, policymaking and activism. Prerequisites: WGST 1120 or SOCIOL 2200; senior standing required.

SOCIOL 4600--Contemporary Corrections (3). Development of concepts of punishment, treatment. Contemporary penal and correctional institutions; problems of custody, classification, education, industry and treatment program; probation, parole. Prerequisites: SOCIOL 2200 and 3600 or graduate standing.

SOCIOL 4610--Society and Social Control (3). The concept of social control is analyzed from both micro and macro theoretical perspectives. Focus is on patterns of social domination. MA core course. Prerequisite: SOCIOL 3700 or 3710.

SOCIOL 4700--Social Organization (3). Survey of approaches to the analysis of social organization emphasizing complex organizations, division of labor, social inequality, politics and the state, social change. MA core course. Prerequisite: SOCIOL 3700 or 3710 or graduate standing or instructor's consent.

SOCIOL 4940--Internship in Sociology (1-9). Professional experience under faculty supervision. Project must be arranged by student and faculty member prior to registration. Prerequisites: junior standing and instructor's consent.

SOCIOL 4942--Service Learning in Sociology (3). Students participate in a variety of research-oriented, community service projects which illuminate and reinforce concepts introduced in various sociology courses. Repeatable twice for credit. Does not meet A&S general education requirements. Prerequisite: instructor's consent.

SOCIOL 4960--Special Readings in Sociology (cr.arr.). Extensive reading in selected area or special field. Prerequisites: 12 hours Sociology & departmental consent. SOCIOL 4970--Senior Seminar (3). Integrates perspectives, methods, substantive foci of undergraduate courses. Analysis of sociology as a discipline and profession. Discussion of opportunities for graduate study, employment. Prerequisite: SOCIOL 2950 and 3100 and senior sociology major.

SOCIOL 4995--Honors in Sociology (3). Intensive work in a selected field within sociology, including readings and research. Repeatable up to 6 hours with departmental consent. Prerequisites: for honors candidates; SOCIOL 2950 and 3100.

Special Degree Programs

Office of Special Degree Programs
College of Arts and Science
210 Switzler Hall
(573) 882-6060

MAJORS

INTERDEPARTMENTAL – A&S

Interdisciplinary Studies

Black Studies, Environmental Studies, Peace Studies, Women's and Gender Studies

International Studies

East Asian Studies, Environmental Studies, European Studies, International Business, Latin American Studies, Peace Studies, South Asian Studies

INTERDIVISIONAL – PROVOST

Minors

Black Studies

East Asian Studies

Film Studies

Latin American Studies

Peace Studies

South Asian Studies

Women's and Gender Studies

Interdisciplinary programs provide for the special needs and interests of individual students who are not being served by one of the existing majors. The Office of Special Degree Programs is responsible for a variety of multidisciplinary majors, including Interdisciplinary Studies, International Studies and General Studies.

Major Program Requirements - Interdisciplinary Studies

Students majoring in Interdisciplinary Studies may design an individual course of study. Students with very specific career plans and goals not easily accommodated in any one department may find this program suited for their needs. Others may find that this option permits a broader approach than the major found in a single department.

The Interdisciplinary Studies major is comprised of two or three components to total 36 credits. A component consists of course work from a single department or area, which may include programs outside the College of Arts and Science (e.g., Journalism, Business or Social Work). At least 18 hours must come from the College of Arts and Science.

Interdisciplinary Studies candidates must earn no less than a 2.0 GPA in each component. Interdisciplinary Studies students are bound by rules and practices of the College of Arts and Science that pertain to admission to degree programs, the awarding of credit and the awarding of degrees. Students must complete college as well as University requirements, including University general education.

Major core requirements

Area of concentration (select one option)36

Three components of 12 credits each

Three components, one of 15, one of 12 and one of 9 credits

Two components of 18 credits each

Two components, one of 21 and one of 15 credits

All courses in the area must be at the 2000 level and at least 15 credits must be 3000 level or above.

At least one course must be completed at MU in each component, with no fewer than 12 credits total in courses in the area taken on this campus.

Capstone requirement (to be completed during final 45 hours of course work)

There are several ways a student can complete the capstone experience in interdisciplinary studies.

1. **Special Readings project:** With this option, the student completes an independent research project under the supervision of a faculty member. Most projects result in a 15-20 page research paper. The project allows the student to explore an area of interest and is designed to be an academic challenge. The department is open to creative, innovative approaches to learning. The supervising faculty member is responsible for grading the project. The student is responsible for locating a supervising faculty member.
2. **Service Learning project.** Students will engage in service activities, directly relevant to their areas of academic emphasis, in community not-for-profit agencies. At the same time as participants work in the community, they will research their agency and organization, undergo mock employment interviews, create a cover letter and resume based on the professional skills they have gained through their service, and reflect on careers and leadership in public service. Course will be submitted for Writing Intensive credit each semester. Restricted to Interdisciplinary, General and International Studies students.
3. **Internship:** Students work approximately 50 clock hours per credit at an agency, company or corporation of their choice. Grades are on a pass-fail basis. For an internship to be approved as a capstone experience, it must help the student solidify and explore the areas of concentration. Internships must have prior approval from the Interdisciplinary Studies advisor.
4. **Capstone course:** Students may have a specific course designated as a capstone course for the individual degree program. This can be a course designated by a department or a course that serves the student as a capstone course. The course must be upper level, and the course must be taken in the last 45 hours of course work as a major. A course taken previously cannot retroactively be counted as a capstone course. Approval for the course must be provided in advance of registration from the Interdisciplinary Studies advisor.

Emphasis Areas

(Interdisciplinary Studies)

Emphasis in Black Studies

An Interdisciplinary Area in the College of Arts and Science

Wilma King, Director

313 Gentry Hall

(573) 882-6229

The Black Studies Program is an interdisciplinary program leading to a dual major or minor in the College of Arts and Science.

Emphasis core requirements

Completion of an area of concentration in another Arts and Science program or department

Completion of an interdisciplinary area of concentration of at least 32 credits in black studies and related courses

In selecting a language to meet general education requirements in the College of Arts and Science, students are encouraged to consider Spanish, Portuguese or French.

Sample Eight-Semester Program

Bachelor of Arts degree with a major in Interdisciplinary and a Black Studies emphasis

Emphasis in Environmental Studies

Jan Weaver, Director

208 Tucker

(573) 882-3037

<http://web.missouri.edu/~umcsnresiwwww/index.html>

People in the environmental field work to protect and restore the natural services that clean water, build soil, scrub air, and maintain species that provide human food, shelter, and well-being. Career opportunities fall into the five categories listed below with the majors that are the best preparation for each. For some majors a Certificate in Environmental Studies (CES) may be advisable.

Advocacy, Outreach & Communication -

Environmental Studies or Business, Communication, Marketing, or Journalism with an ES Certificate.

Policy and Regulation - Environmental Studies or Political Science with CES

Conservation and Natural Resources - Biology, Environmental Science, Fisheries and Wildlife, Forestry, or Soil Science with a CES.

Environmental Engineering and Scientific Services -

Agriculture Systems Management, Biochemistry, Chemistry, Engineering, Environmental Science, Math, or Soil Science with a CES

Outdoor and Environmental Education - Parks, Recreation and Tourism, or Education with a CES.

Environmental Studies Major (in Special Degrees)

18 hours of proscribed General Education Courses

15 hours *Natural Dimensions Courses*

15 hours *Social Dimensions Courses*

9 hours of *Practicum Courses*

Natural and Social Dimensions Courses are offered in other departments throughout the university. Check the Environmental Studies website or visit with the director to get an up-to-date list of courses that fit these categories.

Practicum Courses are specific Environmental Studies Courses - a writing intensive sophomore seminar (Env St 2070 or Env St. 2110), directed independent study (Env St 2150) and a writing intensive capstone (Env St 4350)

Emphasis in Peace Studies

John Galliher, Director
335 Middle Bush Hall
(573) 882-3441

The peace studies emphasis area addresses a wide range of issues concerning peace and justice, including:
Social, political, and cultural roots of conflict
Economics of war and peace
Distribution of the world's wealth
Peace and the treatment of the environment
Peaceful and non-peaceful uses of technology
Moral and religious views of war and peace, justice and violence
Images of peace and violence in literature and the arts
Nonviolent social change and resolution of conflicts
History of pacifism and nonviolent resistance to oppression
Strategies for promoting global cooperation and world order
Anticipation and prevention of aggression and armed conflict

The issues are examined at all levels-personal, group and international. Courses provide a basis for dealing with issues in a realistic way, explore principles and values necessary to set practical goals, and inventory methods for pursuing them effectively. Field experience in organizations that deal with injustice, human needs, and conflict is an integral component of core courses. Since issues of peace and conflict cut across disciplines, the curriculum includes courses offered by both the program itself and departments of the University.

Emphasis requirements.....30

Advising of students and aid in designing student-tailored academic plans is available from the Women's and Gender Studies Office.

The curriculum includes women's and gender studies core course as well as courses from several departments throughout the university. These courses assume that knowledge cannot be separated from the study of women and gender, and that gender and sexuality are fundamental categories of analysis in all disciplines. The program stresses scholarship and teaching

that are broadly comparative and range across multiple cultures, national and transnational contexts, and historical period. Its faculty employ a broad range of theoretical approaches and methods.

Thirty credits are required in women's and gender studies. In addition to degree requirements, college and university requirements, including university general education requirements, must be met.

Emphasis core courses.....15

WGST 1120: Bodies, Cultures and Nations (3)
WGST 1332: Social Perspectives on Women, Race and Class (3)
WGST 2020: Feminist Theory I (3)
WGST 3450: Feminist Methodologies (3)
WGST 4990: Senior Research Seminar in Women's and Gender Studies (3)

Additional courses.....15

Courses from the following courses cross-listed with the women's and gender studies emphasis; 12 from courses at 2000-level or above

ENGLISH 2180: Introduction to Women's Literature

 GN HON 2114H: The Modern Era
 PHIL 2410: Philosophies of War and Peace

Major Requirements - International Studies

The International Studies major is a broad multidisciplinary program of liberal studies with a strong intercultural and international focus. The program provides a variety of regional/cultural and interdivisional emphasis areas, including East Asian Studies, Environmental Studies, European Studies, Latin American Studies, Peace Studies and South Asian Studies.

Designed to accommodate preprofessional interests as well as provide a sound foundation for more advanced study at the graduate level, this degree may be especially attractive for students planning to pursue careers in international business, trade and diplomacy, international law, technical assistance and humanitarian relief and similar fields.

The major includes a common interdisciplinary core of 18 designated credits that students earn as part of their degree requirements. In addition, all International Studies students must take a minimum of 6 credits in foreign language study beyond the 12-13 credit minimum skills proficiency requirement of the College of Arts and Science. This requires a minimum of 18 credits. Given the rigorous requirements of this program, students should begin planning their course of study in their first semester.

International Studies degree candidates must earn no less than a 2.0 GPA in their upper-class (numbered 3000 or higher) foreign language courses, emphasis area and area support components. Students must also complete all degree, college and University graduation requirements, including University general education.

Requirements are similar to those for other majors earning BA degrees in the College of Arts and Science, except that International Studies students must complete an 18-credit common core of courses as part of these requirements.

Major core requirements.....	9
ANTHRO 2030: Cultural Anthropology.....	3
GEOG 1100: Regions and Nations of the World I OR	
GEOG 1200: Regions and Nations of the World II.....	3
POL SC 1400: International Relations OR	
POL SC 2700: Comparative Political Systems.....	3
Three additional courses from the following.....	9
(At least one must be a humanities course)	
PEA ST 1050: Introduction to Peace Studies	

Foreign language.....6

Two language courses beyond the basic 12-13 credit minimum skills proficiency requirement (total: 18-19 credits in a single language)

Capstone requirement (to be completed during final 45 hours of course work)

There are several ways a student can complete the capstone experience in international studies. Select one option:

1. Special Readings project: With this option, the student completes an independent research project under the supervision of a faculty member. Most projects result in a 15-20 page research paper. The project allows the student to explore an area of interest and is designed to be an academic challenge. The department is open to creative, innovative approaches to learning. The supervising faculty member is responsible for grading the project. The student is responsible for locating a supervising faculty member.
2. Service Learning project. Students will engage in service activities, directly relevant to their areas of academic emphasis, in community not-for-profit agencies. At the same time as participants work in the community, they will research their agency and organization, undergo mock employment interviews, create a cover letter and resume based on the professional skills they have gained through their service, and reflect on careers and leadership in public service. The course will be submitted for Writing Intensive credit each semester. Restricted to Interdisciplinary, General and International Studies students.
3. Internship: Students work approximately 50 clock hours per credit per semester at an agency, company or corporation of their choice. Grades are on a pass-fail basis. For an internship to be approved as a capstone experience, it must help the student solidify and explore the areas of concentration. Internships must have prior approval from the International Studies advisor.
4. Capstone course: Students may have a specific course designated as a capstone course for the individual degree program. This can be a course designated by a department or a course that serves the student well as a capstone course. The course

must be upper level, and the course must be taken in the last 45 hours of course work as a major. A course taken previously cannot retroactively be counted as a capstone course. Approval for the course must be provided in advance of registration from the International Studies advisor.

Dual Majors (International Business)

International Business is offered as a dual major program leading to the Bachelor of Science in Business Administration with an emphasis in International Business and a BA in International Studies. See the College of Business for more information.

Major in International Studies

The major is comprised of three 12-credit blocks, plus electives, as described below. At least 30 credits must be at the 3000 level or higher; 18 must be taken in courses at the 4000-level or higher.

Humanities and language.....12

Could include additional language and literature courses from the language of major study, as well as course work from Philosophy, Religious Studies, Art History and Archeology, and Civilization courses.

Social and behavior sciences12

Could include course work from Geography, History, Political Science, Economics, Anthropology, Sociology, Rural Sociology or Peace Studies.

Focus area12

Course work from an area of the student's choice allowing the study of one area in depth. Students are encouraged to take 9 credits from a single department or area. The 3-credit capstone experience will equal 12 hrs. of credit. (See previous information on capstone requirement.)

Study Abroad Experience

Students majoring in International Studies must study abroad for a minimum of four weeks. Prior to their overseas studies participation, students must have completed at least one course related to the country in which they plan to study. Students who are unable to participate in the study abroad program must appeal to Special Degree Programs to discuss alternative requirements.

For students who do not study abroad, the following alternative will apply.

Students who are not able to study abroad as a part of their program of studies must submit written notification to Special Degree Programs indicating the reason they are unable to participate in the study abroad program.

Such students must complete 6 credits as part of their degree program that focus on a particular area or region of the world of interest to the student. These courses may be in history, religious studies, geography, political science or civilization or literature courses in the appropriate language.

Emphasis Areas (International Studies)

Emphasis in East Asian Studies

East Asian Studies is one of the emphasis areas in the International Studies major. The program is multidisciplinary, encompassing course work from the departments of Geography, History, Anthropology, Religious Studies, Political Science and Philosophy, as well as in Chinese, Japanese and Korean. The program focuses on creating an understanding and awareness of the culture, history, politics, geography and languages of the

East Asian countries, with an emphasis in China, Japan or Korea. Students are encouraged to begin study of their foreign language no later than the sophomore year. Students should consult with the International Center about appropriate locations for their study abroad experience.

Emphasis in European Studies

European studies is an emphasis area in the International Studies major. Students who are studying French, Spanish, German, Italian or Russian may wish to select European studies as their emphasis area. The student examines the politics, culture, history and geography of the European continent, with a focus on the country whose native language is being studied by the student. Given the multidisciplinary approach to this degree, students take courses that are specifically geared to a better understanding of the culture, history, and language of a given country, as well as a better understanding of the entire continent of Europe.

Emphasis in Latin American Studies

Latin American Studies is offered as an emphasis area for the BA in International Studies. The Latin American Studies option is designed to offer, in addition to linguistic competency in Spanish or Portuguese, a broad base of knowledge about Latin American politics, literature, economics and culture.

This field of inquiry, alone or in combination with another discipline, is in high demand throughout the world and can provide students with an indisputable competitive edge in the contemporary professional arena. Students who graduate with an emphasis in Latin American Studies will be fully prepared to pursue graduate study in Latin American Studies programs offered around the country.

Students are encouraged to study abroad in one of many program opportunities in Spain, Mexico, Central and South America, Brazil or the Caribbean. It is important to begin planning an emphasis area with a member of the Latin American studies committee as early as feasible, during the freshman year if possible. An advisor can tailor a program to fit specific interests.

Emphasis in Peace Studies

Students may opt for an emphasis in Peace Studies. Students with this emphasis examine issues related to global peace and social justice - in the international arena. Their studies would focus on relevant courses in Political Science, Sociology, Geography, Philosophy, Religious Studies, Economics, and Anthropology.

Emphasis in South Asian Studies

The South Asian Studies emphasis offers courses in history, politics, philosophy, religion, culture, social life and languages of India. It thus provides the opportunity for study of an ancient and extensive civilization with a significant role in human history.

An emphasis in South Asian Studies prepares students to enter MA and PhD programs in this area of specialization, which often provide intensive summer language programs. An advanced degree opens a variety of professional and job opportunities for those planning to work in such fields as international business, trade and diplomacy, international law or agricultural development, among others.

MINORS

Minor in Black Studies

Students seeking a minor in black studies must complete 15 credits, including those listed below.

BL STU 1050: Introduction to Black Studies.....	3
One course in each of three content areas (one must focus on black women).....	9
History	
Society	
Culture	

Students are also encouraged to take a course in three regional areas of study: Africa, African America, and the Black Diaspora.

A minimum of 6 credits numbered 2000 or above and at least one 3000-level course must be taken.

At least 9 credits must be in courses other than readings, methods, techniques or problems.

A maximum of 3 credits of the minor can be taken in black studies courses outside the College of Arts & Science.

Minor in East Asian Studies

Students select 15 credits from at least two departments. At least 6 credits must be at the 2000 level or above. The elementary levels of language (Japanese, Chinese, Korean) may not be used to meet any of these hour requirements for the minor. Intermediate level courses (at the 2000 level and higher) language courses may be used to meet these requirements. The Office of Special Degree Programs, 210 Switzler Hall, provides student advisement.

In addition to courses offered in Chinese, Japanese, and Korean language programs (civilization courses, literature courses), there are relevant courses offered in Religious Studies, History, Political Science, Philosophy, and Geography. Students are encouraged to consult with the advisor in Special Degree Programs or instructors in Chinese, Japanese, or Korean.

Minor in Film Studies

Roger Cook, Chair
Film Studies Committee
451 Strickland Hall
(573) 882-9452
CookRF@missouri.edu
<http://filmstudies.missouri.edu>

The interdisciplinary Film Studies program combines interests in film and culture across the departments of English, German and Russian Studies, Romance Languages and Literatures, Art History and Archeology, and Theatre. A minor is available. No major is available.

The program offers courses that help students develop basic analytical tools for describing and interpreting films and the critical vocabulary for discussing and writing about film. Drawing on the interdisciplinary mix of its faculty, the program introduces students to the major trends in American and international cinema. Courses at the advanced level focus on a variety of topics, including particular national cinemas, specific film genres, individual directors, themes such as ethnicity and gender, and

the intersection of film and other arts. Occasional courses concentrate on aspects of film production, such as screenwriting. Film Studies courses are typically cross-listed with courses in the home department of the participating faculty.

Minor core requirements

For a minor, students must take a minimum of 15 credits. The 15 credits for the minor must include courses from at least three different departments.

Two required core courses must be completed in sequence before elective courses can count toward the minor.

First core course	3
FILM S 2810: Introduction to Film Analysis	
Second core course (choose from)	3
FILM S 2820: Trends in World Cinema	
FILM S 2830: American Film in an International Context, 1895-1950	
FILM S 2840: American Film in an International Context, 1950-Present	
Electives	9
Must include two courses at the 3000-level or above.	

Minor in Women's and Gender Studies

A student earning a minor in women's and gender studies is required to take 15 credits in women's and gender studies courses, including the following:

WGST 1120: Introduction to Women's and Gender Studies....	3
WGST 1332: Social Perspectives on Women, Race and Class	3
Additional hours in courses numbered 2000 or above	9

Minor in Latin American Studies

Students who have completed the language requirement in Spanish or Portuguese (or equivalent) may select, in conjunction with an adviser, 15 additional credits of approved course work. The minor in Latin American studies must be approved by the Director of Special Degree Programs.

Minor in Peace Studies

A minor in peace studies requires a minimum of 15 credits. Requirements are PEA ST 1050: Introduction to Peace Studies and 12 additional credits selected in consultation with the program director, at least 9 selected from the core requirements for the area of concentration.

CERTIFICATES

Certificate in Environmental Studies

An Interdisciplinary Program in the Office of the Provost
Jan Weaver, Director
208 Tucker
(573) 882-3037
<http://web.missouri.edu/~umcsnrestiwwww/index.html>

Many environmental careers require the kind of discipline-specific education available in traditional majors, but with an added base of knowledge about environmental issues and the skills to address them. The Certificate in Environment Studies

provides that base.

The Certificate is available to all majors. However, because of the variety of majors and the goal of the certificate program to compliment a specific course of study, students must select courses in consultation with the Environmental Studies advisor.

Certificate Requirements

- 6 hours of Foundation Environmental Courses
- 3 hours of Environmentally-related Seminar
- 6 hours of Upper Level Environmental Courses

Sample Certificate for a Sciences Major

Soc 1120: Population and Environment.....	3
Geog 2660: Environmental Geography.....	3
Env St 2070: Intro to Ecological Econ.....	3
<i>Social Dimensions Course</i>	3
<i>Social Dimensions Course</i>	3

Sample Certificate for a Social/Behavioral Sciences or Humanities Major

Bio Sci 1060: Basic Environmental Studies.....	3
Atm Sci 1050: Intro Meteorology.....	3
Env St 2110: Environmental Sustainability.....	3
<i>Natural Dimensions Course</i>	3
<i>Natural Dimensions Course</i>	3

Natural and Social Dimensions Courses are offered in other departments throughout the university. Check the Environmental Studies website or visit with the director to get an up-to-date list of courses that fit these categories.

Social Dimensions Course (3000 level).....	3
Elective (3000 level).....	3
Elective.....	3
Total.....	120

Multicultural Studies Certificate

The College of Arts and Sciences offers a Certificate in Multicultural Studies. Students earning the certificate will become familiar with multicultural and diversity issues. In an increasingly global environment, students earning this certificate will be better prepared to understand and to facilitate cross-cultural interactions in their future careers, as well as in their general life experiences.

Requirements

Students are required to complete a coherent program of 15 credit hours from a list of approved courses*. Approved courses for the certificate critically evaluate and examine issues of social inequality and social stratification (e.g., gender, race, ethnicity, religion, region, sexuality, and/or class inequality) globally and in the United States. Courses must be chosen from at least 2 different departments/programs. At least 6 credits must be completed at the 3000 level or above. One course (up to 3 credit hours minimum and 6 credit hours maximum) may include an applied experience of cultural difference*. Approved research-based undergraduate courses, transcribed Study Abroad and other experiences approved through the Center for International Programs and Studies, and transcript-designated “Service Learning” coursework are among the possibilities. Only coursework in foreign languages that is numbered above 2100 is applicable, and the maximum number of such credit hours is 6. A grade of C- or higher must be earned in each course, and students must maintain a cumulative GPA of 2.0 for overall coursework counting towards the certificate. Consistent with MU policy on certificates, an undergraduate degree and certificate must be awarded simultaneously.

*Contact Rebecca Martínez, Coordinator, Multicultural Studies Certificate, at martinezr@missouri.edu for a list of approved courses and approval of applied experience.

BLACK STUDIES COURSES

BL STU 1100--Introduction to Swahili and African Culture (3). Introduction to Swahili and African Culture is a three credit hour course, which serves as a survey of an indigenous African language and the culture of East Africa. There are no prior requirements.

BL STU 1250--World Theatre Workshop (2). (same as Theatre 1250). Provides a diverse ensemble of student performers, writers, and technicians with an intensive immersion in the process of theatrical production through the public presentation of dramatic literature that focuses on global issues of ethnicity and culture.

BL STU 1332--Social Perspectives on Women, Race and Class (3). (same as Women’s and Gender Studies 1332.) Examines the impact of the construction of “female” on different categories of women. Reviews women’s multilayered relationships. Stresses both the roles of creator and “victim” within social structures and value systems. No credit for students who have taken WGST 1334.

BL STU 1334--Women, Race and Class (3). (same as Women’s and Gender Studies 1334). Study of women’s experiences of family, work, sexuality, spirituality, violence, power, and love across race and class lines. Examine psychological, economic, and institutional connections between racism, sexism, and classicism. No credit for students who have taken WGST 1332.

BL STU 1410--African American History (3). (Same as History 1410.) Survey of social, political and economic development to the African American people in American life from 1619 to the present.

BL STU 1500--The Black Woman in America (3). (same as Women’s and Gender Studies 1500). Review and critiques of a variety of materials about Black women from slavery to present. The course allows students to generate their own view about psychological, social and philosophical impact of the Black women’s struggle on all women. Prerequisite: sophomore standing.

BL STU 1720--African-American Theatre History (3). (same as Theatre 1720). A historical and critical analysis of the evolution of African American cultural performance in the American theatre and entertainment industry.

BL STU 1800--History of Modern Africa (3). (same as History 1800). Provides a general survey of Sub-Saharan Africa, from 1800 to the present. Topics include: state formation, the slave trade, colonialism, nation liberation and the problems of independent Africa. Prerequisite: sophomore standing or instructor’s consent.

BL STU 1810--History of South Africa (3). (same as History 1810). South African Society from the 16th century to the present with an emphasis on the last two centuries and the consolidation of the apartheid state. Prerequisite: sophomore standing or instructor’s consent.

BL STU 2000--Black Studies (3). An interdisciplinary introduction to the basic concepts and literature in the disciplines covered by

African-American studies; the role of historical, political, social, and economic forces in shaping cultural expression will be stressed.

BL STU 2001--Undergraduate Topics in Black Studies-General (1-3). Organized study of selected topics. Subjects and credits may vary from semester to semester. Prerequisite: program consent for repetition.

BL STU 2005--Topics in Black Studies - Humanities (3). Organized study of selected topics focusing on Black history and culture. Specific content may vary from semester to semester and will be announced in advance.

BL STU 2150--African-American Cinema (3). (same as Theatre 2150). Study of the impact of cinema and the entertainment industry on the social perceptions of African-Americans and on African-American culture.

BLSTU 2200--Social Inequalities (3). (Same as Sociology 2200.) Survey of inequalities based upon criteria such as race, ethnicity, sex, age, religion and social class in contemporary societies. Focus on dynamics by which privilege and inequality are structured. Prerequisite: sophomore standing or instructor's consent.

BL STU 2210--The Black Americans (3). (same as Sociology 2210.) Analysis of history of blacks in the United States. Assessment of contemporary black community in terms of its institutions, style of life, patterns of work and intergroup relations. Prerequisites: SOCIOL 1000 or equivalent or instructor's consent.

BL STU 2310--Literature of the African Diaspora (3). (Same as RM_LANG 2310) A postcolonial analysis of selected literary texts interpreting the African diaspora in the Americas.

BL STU 2400--Introduction to African Diaspora Literature (3). (same as English 2400). Introduces students to African Diaspora literature with an emphasis on literature written originally in English. Prerequisite: ENGLSH 1000. No more than six hours may be taken in the Introduction to African Diaspora Literature

BL STU 2407--Introduction to African Diaspora Literature, 1603-17 (3). (same as English 2407). See Black Studies 2400 for course description.

BL STU 2408--Introduction to African Diaspora Literature, 1789-1890 (3). (same as English 2408). See Black Studies 2400 for course description.

BL STU 2409--Introduction to African Diaspora Literature, 1890-Present (3). (same as English 2409). See Black Studies 2400 for course description.

BL STU 2410--African American Women in History (3). (same as History and Women's and Gender Studies 2410). African American Women in history is a topics course covering major issues affecting black women since their introduction into english-speaking North America to the present.

BL STU 2450--Themes in the Geography of Africa South of the Sahara (3). (same as Geography 2450). Major concepts of African geography in current and historical perspective. Case studies of major African countries. Prerequisites: sophomore standing or one introductory Geography course.

BL STU 2500--Special Problems in Black

Studies (cr.arr.). Research apprenticeship with faculty member, assisting a faculty member in the development and execution of a research project. May be repeated for a maximum of six hours. Prerequisite: sophomore standing, instructor's consent.

BL STU 2501--Undergraduate Topics in Black Studies (1-3). Organized study of selected topics. Subjects and credit may vary from semester to semester. Prerequisite: program consent for repetition; sophomore standing.

BLSTU 2570--Black Religion (3). A history of religion approach to the study of black religion which takes into consideration the unique past experiences of the African American community as it underwent the terror of forced migration, slavery, segregation, and discrimination. Prerequisite: sophomore standing.

BL STU 2610--Islam and Black America (3). (same as History 2610). A historical survey of the origins, development and impact of the Black Islamic tradition.

BLSTU 3100--African American Psychology (3). (same as Educational, School and Counseling Psychology 3100). The research, theories, and paradigms developed to understand the attitudes, behaviors, and psychosocial realities of African-Americans are discussed. Prerequisite: PSYCH 1000.

BL STU 3200--Black Freedom Movement, 1955-1973 (3). (same as History 3200). Examines the dismantling of American apartheid and its transformation into a new racial control system. It also explores how and why the Civil Rights Movement was converted into a struggle for Black Power. Offered once a year.

BL STU 3400--Survey of African American Literature, Beginnings to 1900 (3). (same as English 3400). A survey of major authors and movements in African American literature from its beginnings to 1900. Prerequisite: ENGLSH 1000.

BL STU 3410--Survey of African American Literature, 1900-Present (3). (same as English 3410). A survey of major authors and movements in African American literature from 1900 to the present. Prerequisite: ENGLSH 1000.

BLSTU 3420--Periods and Genres in African Diaspora Literature (3). (same as English 3430). Topic (e.g. Harlem Renaissance, African Diaspora Poetry) Announced at time of registration. Prerequisite: ENGLSH 1000. No more than 6 hours may be taken in the Periods and Genres in African Diaspora Literature series.

BLSTU 3427--Periods and Genres in African Diaspora Literature, 1603-1789 (3). (same as English 3247). See Black Studies 3420 for course description.

BLSTU 3428--Periods and Genres in African Diaspora Literature, 1789-1890 (3). (same as English 3248). See Black Studies 3420 for course description.

BLSTU 3429--Periods and Genres in African Diaspora Literature, 1890-Present (3). (same as English 3249). See Black Studies 3420 for course description.

BL STU 3590--Religious Biography: Black Religion (3). (same as History 3400). Studies black American religion through the biographies of representative and influential figures of the nineteenth and twentieth centuries, including

Nat Turner, W.E.B Dubois, Marcus Garvey, M.L. King, and Malcolm X.

BL STU 3670--History of Black Nationalism in the United States (3). (same as History 3410). Examines the struggle of African-Americans to construct autonomous institutions, to build all Black communities or to acquire an independent nation-state. We will study the ideology, structure, strategy and tactics. Prerequisites: HIST 1410 or SOCIOL 2210.

BL STU 3800--Women in African History (3). (same as History 3800). Focuses on the varied and changing roles of women in sub-Saharan Africa from pre-colonial times to the present. Prerequisite: sophomore standing or instructor's consent.

BL STU 4000--Special Problems in Black Studies (cr.arr.). Independent investigation leading to a paper or a project. Prerequisite: junior standing, instructor's consent.

BL STU 4001--Undergraduate Topics in Black Studies-General (1-3). Organized study of selected topics. Subjects and credit may vary from semester to semester. Prerequisite: program consent for repetition. Prerequisite: junior standing.

BL STU 4130--African-American Politics (3). (same as Political Science 4130). Surveys political participation of African-Americans in American politics. Analyzes their public lives in the context of elections, behavior of political organizations, social movements, parties, and level of government. Prerequisites: POL SC 1100 and junior standing.

BL STU 4181--Themes in Literature by Women (3). (same as Women's and Gender Studies and English 4181). Examines works by a number of women writers with particular attention to their socio political context. May repeat to six hours with department's consent. Prerequisite: junior standing.

BL STU 4210--African-American Religion (3). (same as Religious Studies 4210). Examines the organization of major African American Christian denominations, Islam and religious movements. Twentieth century issues will be discussed, including sexism, classism and homophobia in church communities. Prerequisite: junior standing or instructor's consent.

BL STU 4220--Religion in Afro-American Literature (3). (same as Religious Studies 4220). Examination of Afro-American fiction, poetry and drama which present significant racial attitudes toward the Christian religion. Prerequisites: sophomore standing.

BL STU 4230--Women, Development, and Globalization (3). (same as Sociology 4230 and Women's and Gender Studies 4300). Examines the history and structure of "development" discourse and practices. Stresses the interconnections and impact on women globally. Reviews women's strategies in defining and instituting programs to improve quality of life in communities. Prerequisites: SOCIOL 2200, WGST 1332, BL STU 2110, or WGST 4420.

BL STU 4270--African-Americans in the Twentieth Century (3). (Same as History 4270). Surveys the African-American experience from 1900 to the present. Attention is given to economic, political, social, and cultural trends.

BL STU 4300--The Black Family: Past,

Present & Future (3).(same as Human Development and Family Studies 4300). Emphasis is on the unique social, economic, religious, educational and political environments that have affected the structure and function of the black family. Prerequisite: junior standing.

BLSTU 4360--Working with Minority Youth (3).(same as Social Work 4360). Develops awareness and understanding of social/psychological/ cognitive realities influencing the behavior of black youth. Content draws upon theories, research, and practice skills relevant to understanding black youth. Minority groups included. Prerequisite: junior standing or instructor's consent.

BL STU 4380--Social Work Practice With Minorities: African-American Emphasis (3). (same as Social Work 4380). Provides students with an appreciation of the black experience in the United States on a knowledge and feeling level.

BL STU 4400--Studies in African Diaspora Literature (3).(same as English 4400). Topics (e.g., African American Poetry, African Diaspora Drama) announced at time of registration. No more than six hours may be taken in the Studies in African Diaspora Literature series. Prerequisite: junior standing.

BL STU 4407--Studies in African Diaspora Literature, 1603 to 1789 (3).(same as English 4407). See Black Studies 4400 for course description.

BLSTU 4408--Studies in African Diaspora Literature, 1789 to 1890 (3).(same as English 4408). See Black Studies 4400 for course description.

BL STU 4409--Studies in African Diaspora Literature, 1890 to Present (3).(same as English 4409). See Black Studies 4400 for course description.

BL STU 4410--Major African Diaspora Writers (3).(same as English 4410). An intensive study of selected writers of African Diaspora literature focusing on texts original in English. No more than six hours may be taken in the Major African Diaspora Writers series. Prerequisite: junior standing or instructor's consent.

BL STU 4415--African Americans and American Justice (3).(Same as HIST 4415) This course provides opportunities to review and discuss selected court cases and legislation in which black men, women, or children were plaintiffs and defendants or affected by the laws. Prerequisite: senior standing required.

BL STU 4417--Major African Diaspora Writers, 1603 to 1789 (3).(same as English 4417). See Black Studies 4410 for course description.

BL STU 4418--Major African Diaspora Writers, 1789 to 1890 (3).(same as English 4418). See Black Studies 4410 for course description.

BL STU 4419--Major African Diaspora Writers, 1890-Present (3).(same as English 4419). See Black Studies 4410 for course description.

BL STU 4420--Africana Womanism (3). (same as English 4420). An intensive study of Africana Womanism, focusing on selected Africana women writers. Prerequisites: junior

standing or instructor's consent. May be repeated to six hours with departmental consent.

BLSTU 4460--Economic Characteristics of the African American Experience (1)(same as History 4460). Examines how economic considerations have influenced African American history from the transAtlantic slave trade to the present. Prerequisite: junior standing or instructor's consent. w,s.

BL STU 4480--Major African Diaspora Women Writers (3).(same as Women's and Gender Studies 4480 and English 4480). Study of selected Africana Diaspora women writers, focusing on texts originally in English. Repeatable with department's consent. Maximum of 6 hours for 4180 and 4480.

BL STU 4487--Major African Diaspora Women Writers, 1603 to 1789 (3).(same as Women's and Gender Studies 4487 and English 4487). See Black Studies 4480 for course description.

BL STU 4488--Major African Diaspora Women Writers, 1789 to 1890 (3).(same as Women's and Gender Studies 4488 and English 4488). See Black Studies 4480 for course description.

BL STU 4489--Major African Diaspora Women Writers, 1890 to Present (3).(same as Women's and Gender Studies 4489 and English 4489). See Black Studies 4480 for course description.

BL STU 4500--Special Problems in Black Studies (cr.arr.).Independent project or paper, not leading to dissertation. Prerequisite: program's approval.

BL STU 4530--Caribbean Women Writers (3).(same as Women's and General Studies 348). Examines representative works by female authors from the Caribbean; primarily the English speaking islands. The depiction of Caribbean women will be a major consideration, as well as the unique qualities of Caribbean literature. Prerequisite: sophomore standing or instructor's consent.

BL STU 4640--African Politics (3).(same as Political Science 4640). A general comparative course focusing on post-independent Africa. Theories and concepts related to decolonization, nationalism, democratization, and ethnicity; also institutional forms and organizations: political parties, parliaments, and executives. Prerequisite: POL SC 1100 and junior standing.

BL STU 4700--Race, Gender and Ethnicity in Higher Education (3).(same as Education Leadership and Policy Analysis 4700). Historical relationships of race, gender, and ethnic issues in United States higher education. Issues include: theory and research of curriculum and teaching, diversity within the the academy, and leadership, governance, and policy.

BL STU 4710--Themes in African Diaspora Folklore (3).(same as Anthropology 4160 and English 4710.) Intensive study in a selected area of African Diaspora Folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature, or the folklore of a particular group. 4710 may be repeated for a maximum of six hours with instructor's consent. Prerequisite: junior standing.

BL STU 4720--Third World Politics (3). (same as Political Science 4720). Comparative, interdisciplinary analysis of the politics

BL STU 4972--Undergrad. Seminar in Black Studies: History of Race in the U.S. (3).Readings on problems in American history with reports and discussion on selected topics. Prerequisite: junior standing, fifteen hours or instructor's consent. Departmental consent for repetition up to a maximum of 6 hours.

ENGLISH LANGUAGE SUPPORT PROGRAM COURSES

ELSP_0100--Grammar and Composition I (3).Grammar and Composition I. Graded S/U only.

ELSP_0200--Reading and Vocabulary (3). Reading and Vocabulary. Graded on S/U basis only.

ELSP_0300--Grammar and Composition II (3).Grammar and Composition II. Graded S/U Only.

ELSP_0400--Oral Communication (3). Oral Communication. Graded S/U Only.

ENVIRONMENTAL STUDIES COURSES

ENV ST 2070--Introduction to Ecological Economics (3).(same as Agricultural Economics 2070). Examines current environmental and natural resource issues using a systems perspective and key economic concepts. Explores connections between the environment and the economy based on problems at the local, national, and international levels.

ENV ST 2101--Topics in Environmental Sciences (1-3).Selected topics not in regularly offered courses.

ENV ST 2110--Environmental Sustainability (3).Students will assess availability of key resources, estimate sustainable rates of use and develop plans for aligning current and sustainable rates of use using personal, business and government strategies. Prerequisites: ENGLISH 1000 and one introductory environmental course. Fall. Graded A-F only.

ENV ST 2150--Directed Independent Study (1-3).Working with Environmental Studies you will find and develop a research project or an internship with the university, a government agency, a business or a non-profit agency. The project will be directed towards solving an environmental problem. Prerequisite: instructor's consent.

ENV ST 3000--Natural History of Missouri (2).This class deals with the characteristics of natural ecological communities of Missouri and with the skills needed to observe, record and interpret those characteristics. Graded on A/F basis only. Prerequisites: MATH 1100 and ENGLISH 1000

ENV ST 4310--Topics in Environmental Studies (1-3).This course covers topics not covered in regularly offered courses. Students are expected to combine skills, knowledge and perspectives from the natural and social science to analyze selected environmental problems.

ENV ST 4350--Modeling Environmental Problems (3).This course covers modeling environmental problems as systems. Modeling incorporates rates of changes, feedback loops, short/long term signals, inertia, upstream causes, interventions, implementing interventions and unintended consequences. Prerequisites: 9 hours natural science courses and junior standing. Graded on A/F basis only.

FILM STUDIES COURSES

FILM S 1810--Introduction to Film: The Beginnings to 1945 (3).(same as English 1810). Surveys the basic techniques of filmmaking, some important film genres and classic films of the period. Students who have

already completed English 2830 cannot receive credit for English 1810 or Film Studies 1810.

FILM S 1820--Introduction to Film: 1945-Present (3).(same as English 1820). Surveys the basic techniques of filmmaking, some important film genres and classic American and European films of the period. 1810 is not a prerequisite. Students who have already completed English 2840 cannot receive credit for English 1820.

FILM S 2001--Topics in Film Studies-General (1-3).Organized study of selected topics. Subject may vary from semester to semester. May be repeated with consent of instructor.

FILM S 2005--Topics in Film Studies-Humanities (1-3).Organized study of selected topics. Subject may vary from semester to semester. May be repeated with consent of instructor.

FILM S 2520--Film Pre-Planning and Production (3).Provides overview of pre-production and production of a feature film with hands-on examples. Covers planning, scheduling, and shooting and language of a budget and on a schedule. Examines operational aspects and language of a working film set. Addresses filmmaking skills and aesthetic quality in the study of cameras, lights, and sound equipment. Students help to produce an independent film during the semester. Stresses quality and production values of a film with the main goal of producing a commercially viable film.

FILM S 2810--Introduction to Film Analysis (3).(same as German 2810 and Romance Languages 2810). This course familiarizes students with the basic analytical tools for describing and interpreting films, and helps them develop a critical vocabulary for discussing and writing about film. It also introduces some theoretical approaches to film analysis. Prerequisite: freshmen and sophomores only or consent of program director.

FILM S 2820--Trends in World Cinema (3).(same as GERMAN 2820 and RMLAN 2820). This course is a historical overview of the major trends in international cinema. It focuses on the intersection of aesthetics, industry, and ideological and social concerns in cinematic production. Prerequisite: sophomore standing, FILM_S 2810 or instructor's consent.

FILM S 2830--American Film in an International Context, 1895-1950 (3).(same as ENGLISH 2830). Examines the development of American cinema in relation to other national cinemas. No credit for students who have completed English 1810. Prerequisite: ENGLISH 1000, and for Film Studies credit toward minor, FILM_S 2810.

FILM S 2840--American Film in an International Context, 1950-Present (3).(same as ENGLISH 2840). Examines the relationship of American cinema to world cinema, 1950-present. No credit for students who have completed ENGLISH 2840. Prerequisite: ENGLISH 1000, and for Film Studies credit toward the minor, FILM_S 2810.

FILM S 2850--Italian Cinema (3).(same as ITAL 2850). A course which concentrates on the development of Italian Cinema, primarily since the Post-WWII era, and the ways in which it reflects major economic, social and political events occurring in Italy. No knowledge of Italian required. Prerequisite: sophomore standing.

FILM S 2860--Film Themes and Genres (3).(Same as ENGLISH 2860) Topics (e.g. Film noir, African-American filmmakers, Food and Film, The Western) announced at time of registration. No more than six hours may be taken in Film Themes and Genres. Prerequisite: ENGLISH 1000

FILM S 3001--Topics in Film-General (1-3).Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent. Prerequisites: sophomore standing or instructor's consent.

FILM S 3005--Topics in Film Studies - Humanities (1-3).Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent. Prerequisites: sophomore standing or instructor's consent.

FILM S 3780--Architecture in Film (3).(Same as AR_H_A 3780) Filmmakers use architecture to convey meaning on symbolic, psychological, and ideological levels. Using architectural history and theory, in conjunction with weekly film screenings from a variety of genres, this course explores how architecture operates within film.

FILM S 3820--Films of Federico Fellini (3).(same as ITAL 3820). In studying the filmic career of one of the supreme stylists of the cinematic world, students will view films from each phase of Fellini's career. Prerequisite: ITAL 2850 or ENGLISH 1810 or 1820; instructor's consent.

FILM S 3830--History of German Film (3).(same as German 3830). Introduction to the development of the German film. Old and recent films are viewed and discussed in terms of techniques, artistry, psychology and social impact. English dubbing or subtitles. No foreign language credit. Prerequisites: sophomore standing or instructor's consent.

FILM S 3840--German Film After 1945 (3).(same as German 3840). Examines a selection of post-War films by German directors, as well as historical, literary, and theoretical texts. Prerequisite: sophomore standing, or instructor's consent.

FILM S 3850--The Films of Luchino Visconti (3).(same as Italian 3850). Analysis of the film art of Visconti. Prerequisites: FILM S 2810, 2820 or 2850.

FILM S 3860--Brazilian Cinema (3).(same as Portuguese 3860). An introduction to Brazilian cinema, culture, and society through the study of contemporary cinematic productions. Topics include: Hollywood perceptions of Brazil; redefinition of national identity and history; representations of race and gender. Prerequisite: ENGLISH 1000.

FILM S 3870--Russian Women and Film (3).(Same as RUSS 3870/WGST 3870) Traces image(s) of the Russian woman in 20th-century Russia as constructed in Russian, Soviet and

late-Soviet film. Discusses heroines of pre-revolutionary melodrama and "new Soviet man and woman" of the 20s. Considers war-time re-alignment of gender roles in defense of motherland and their subtle revamping in post-war and post-Stalinist period, and the shifting relations between women and men, women and women, and women and the State. Emphasizes cultural-historical and ideological status of women as reflected in onscreen image(s) in Russian film. Designed to serve as an introduction to film studies and to 20th-century Russian culture more generally. Conducted in English (all films have English subtitles). Prerequisite: ENGLISH 1000 and sophomore status.

FILM S 3880--Contemporary Chinese Film (3).(same as Chinese 38) Introduces development of 20th century Chinese film and popular genres, including review of earlier times. Explores how present day Chinese understand their own history, and issues they face in drive toward modernization in a global context. Films and readings in English or with English subtitles. No previous knowledge of the culture or language required. Prerequisite: sophomore standing or instructor's consent.

FILM S 3890--Russian and Soviet Film (3).(same as Russian 3890). Introduces three significant genres of Russian cinema: comedy, literary adaptations, and films that explore issues of identity and autobiography. Includes examples from different epochs. Considers Soviet and post-Soviet films. Russia and Russian culture. Course conducted in English; films have English subtitles. Prerequisites: sophomore standing or instructor's consent.

FILM S 3930--Screenwriting for Television and Film (3).(same as Theatre 3930). Fundamentals of storytelling utilizing tools and structure used by television and film. Prerequisite: ENGLISH 1000.

FILM S 4001--Topics in Film-GENERAL(1-3).Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent. Prerequisites: sophomore standing or instructor's consent.

FILM S 4005--Topics in Film Studies - Humanities (1-3).Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent. Prerequisites: sophomore standing or instructor's consent.

FILM S 4935--Adaptation of Literature for Film (3).(same as ENGLISH 4580). This upper-division course will explore adaptation principles and practices with a variety of forms for literature that were not originally written for film.

FILM S 4963--Latin American Cinema (in Spanish)(2-3).(same as Spanish 4960). Subject varies according to instructor. Prerequisites: SPAN 3420 and 3430.

FILM S 4965--Distorted Picture: Post-War Cinema in a Police State (3).(Same as RUSS 4965) Considers strategies and stylistic devices employed by East European & Soviet directors to produce artistically worthy films under censorship. Discusses how artists adapted methods, boldness of expression, thematic content, and technical sophistication. Attention paid to production techniques. Prerequisite:

Junior Status or instructor's consent.

INTERNATIONAL STUDIES COURSES

INTL S 2940--Capstone Internship in International Studies (1-6). Internship limited to students pursuing the AB in International Studies Degree. Graded on S/U basis only. May be repeated to a maximum of six hours.

INTL S 2960--Capstone Readings in International Studies (1-6). Independent readings with supervisory faculty member. Open only to international studies majors. May be repeated up to a maximum of 6 hours.

INTL S 4290--Senior Seminar in International Studies (3). Focus on international thinking and learning. Open only to senior undergraduate international studies majors.

INTL S 4940--Internship in International Studies (1-6). Internship limited to students pursuing the AB in International Studies degree. Graded on S/U basis only. May be repeated to a maximum of six hours.

INTL S 4960--Readings in International Studies (1-6). Independent readings with supervisory faculty member. Open only to International Studies majors. May be repeated up to a maximum of 6 hours.

INTL S 4970--Special Readings in International Studies (1-6). Independent readings with supervisory faculty member; this course serves as the students' capstone experience. Open only to International studies majors.

INTL S 4971--Capstone Internship in International Studies (1-6). Internship experience which serves as the student's capstone experience. Program advisor must approve internships. Graded on S/U basis only. Section 2 of this course will be designated for Service Learning Capstone experience.

LABOR STUDIES COURSES

LAB ST 4301--Topics in Labor Studies (3). Organized study of selected topics in labor studies. Subjects may vary from semester to semester. May be repeated to a maximum of

PEACE STUDIES COURSES

PEA ST 1001--Topics in Peace Studies (3). Underclass topics. Subjects may vary from semester to semester. May be repeated to 6 hours maximum. Graded on A/F basis only.

PEA ST 1050--Introduction to Peace Studies (3). Interdisciplinary overview including theories on the nature of aggression and war, case studies of contemporary conflicts, consideration of various peace proposals, conditions making war or peace likely. Prerequisites: ENGLISH 1000, sophomore standing.

PEA ST 1150--The Amish Community (3). (same as Rural Sociology 1150). Examines historical antecedents and contemporary culture and social structure of the Amish. Topics include cultural symbols, life ceremonies, the family, counter cultural pressures, stresses and social change. Prerequisites: RU SOC 1000, SOCIOL 1000, or ANTHRO 1000.

PEA ST 1180--Undergraduate Seminar I in Peace Studies (3). Conflict Resolution in Theory and Practice. Conflicts are studied in the light of the social and behavioral sciences. Prerequisites: PEA ST 1050 or instructor's consent.

PEAST 1181--Undergraduate Seminar II in Peace Studies (3). Contemporary International Conflict: A readings and research seminar in which students will address such problems as global conflicts, the Arms Race and disarmament, global development. Prerequisites: PEA ST 1050 or instructor's consent.

PEA ST 1182--Undergraduate Seminar III in Peace Studies (3). History and Theory of Nonviolent Action. Study of such cases as Gandhi's Independence, American Civil Rights and Polish Solidarity movements. Prerequisites: PEA ST 1050 or instructor's consent.

PEA ST 1183--Undergraduate Seminar IV in Peace Studies (3). Images of War and Peace. Study of war and peace in philosophical and religious systems, film, poetry, art, fiction, and the media. Prerequisites: PEA ST 1050 or instructor's consent.

PEA ST 1195--Service Learning in Peace Studies (1). Students will perform significant and long term community service while exploring issues central to peace studies.

PEAST 1610--Russia in Modern Times (3). (same as History 1610). Survey of Russian History from 1801 to present.

PEAST 2100--The Vietnam and Iraq Wars: Lessons for the Future (3). An interdisciplinary analysis of the Vietnam War and the American-led war with Iraq. Course focuses on the reasons that America lost in Vietnam, the reasons it won in Iraq, and the lessons these conflicts provided for America's future. Graded on A/F basis only. Prerequisite: sophomore standing.

PEA ST 2201--Topics in Peace Studies-General (2-3). Organized study of selected topics in Peace Studies. Subjects and credit hours may vary from semester to semester. Prerequisite: sophomore standing.

PEA ST 2220--America in the 1960's (3). (same as History 2220). Examines the political and cultural main currents of the 1960s. Emphasizes the challenges mounted by protest groups and the responses of America's political leadership to the ferment of the period. Prerequisite: sophomore standing.

PEA ST 2300--Anthropology of War (3). (same as Anthropology 2300). Anthropological approaches to tribal and modern war; theories of war's origins; relation to ecology, economy, gender, belief systems, politics; transformation of tribal warfare by state expansion; peace. Prerequisite: sophomore standing recommended.

PEAST 2410--Philosophies of War and Peace (3). (same as Philosophy 2410). Moral issues about the recourse to war by the nation and the individual's obligations to participate. The nature of peace, social and personal. Special attention to the Vietnam War and the nuclear age.

PEA ST 2710--Politics and the Military (3). (same as Political Science 2710). Comparative study of post-cold war civil-military relations; military as an interest group, change agent, policy instrument and competitor of civilian politicians.

PEA ST 2780--World Political Geography (3). (same as Geography 2780). Geographic factors in the development of political boundaries traditions, and societal perspectives. Spatial patterns and geopolitical processes are explored in selected regions of the world. Prerequisites: GEOG 1100 or 1200 or sophomore standing.

PEA ST 3005--Topics in Peace Studies - Humanities (1-3). Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent. Prerequisite: sophomore standing. Graded on A/F basis only.

PEA ST 3130--Foreigners and Dangerous Women in Greek and Latin Literature (3). (same as Classical Humanities 3000). The study of how Greek and Roman writers depicted and reacted to other races and cultures, compared them with their own, and thereby revealed both their own values and prejudices.

PEA ST 3280--Internship in Peace Studies (1-3). Students work in a peace-related agency or institution for 1 to 3 credit hours. Repeatable for maximum of 6 hours. Prerequisite: departmental consent. S/U graded only.

PEA ST 3350--Readings in Peace Studies (1-3). Students may receive 1 to 3 credit hours for doing readings and research in a particular area of peace studies. At least one paper will be required. Repeatable for a maximum of 6 hours. Prerequisite: instructor's consent.

PEAST 3400--Politics of the Media (3). (same as Sociology 3400). We look at the history and viability of the "public sphere" in the United States and the integral role of the media to its vitality. We analyze the impact of current trends toward media concentration and debate related issues of Bias, censorship, and social control.

PEAST 3410--Social Bases of War and Peace (3). (same as Sociology 3410). Social conditions associated with and preceding war and peace; war as a social institution; international images and stereotypes; proposals for preventing war and reducing international hostilities.

PEA ST 3420--America's Environmental Experience (3). (same as History 3420). Team-taught analysis of American thought and action on physical environment during 19th-20th centuries. Relation between politics, economics, technological change, environmental quality; roles of science, law, regulatory agencies, grassroots action.

PEA ST 3440--After the Fact: Holocaust in Contemporary History, Art & Literature (3). (same as German 3440). Explores responses to the Holocaust from numerous perspectives. Considers how the Holocaust is remembered, memorialized, and debated in a variety of national contexts. Touches on historical, philosophical, and aesthetic points of view. Prerequisites: sophomore standing or instructor's consent.

PEAST 3520--Collective Behavior (3). (Same as SOCIOL 3520). Analysis of crowd behavior and related phenomena: rumors, disasters, fashions. Social responses to unclear, dangerous or unjust conditions. The dynamics of conflict, consensus and change.

PEA ST 3521--Group Decision Making Processes (3). (same as Communications 3571). Procedures and techniques for interpersonal communication and decision making in small groups. Prerequisite: sophomore standing.

PEA ST 3550--War and Democracy in Late 5th c. BCE Athens (3). (same as Classical Humanities 3550). War and Democracy in Late 5th c. B.C.E. Athens explores the discourse on war and peace in Athenian texts and art

that survives from the last quarter of the 5th century B.C.E. This as a period of adamant, unrelenting warfare: the Athenians were fighting the Spartans, Sparta's allies, unaligned cities and several of their own subject states. Prerequisite: any 2000 level CL_HUM course.

PEAST 3600--Criminology (3).(same as Sociology 3600). Sociology of law; constitutional, psychological, sociological theories of criminal behavior; process of criminal justice; treatment of corrections; control of crime.

PEAST 3810--Imperial China (3).(same as History 3810). A survey of China under the Manchu Ch'ing dynasty. Within framework of the dynastic cycle, examines imperial rule, Chinese society, culture, art, internal rebellion, Western intrusion and modernization.

PEAST 3840--Nonviolence in the Modern World (3).(same as History 3840 and South Asia Studies 3245). Readings on recent world history, emphasis on Gandhi and nonviolent tradition in America Europe and the Third World. Prerequisite: sophomore standing.

PEAST 4003--Topics in Peace Studies - Behavior Sciences (3).Upperclass Topics. Subject may vary from semester to semester. Prerequisite: junior standing required.

PEAST 4080--American Foreign Policy from Colonial Times to 1898 (3).(same as History 4080).

PEAST 4240--Theory and Practice of Theatre of the Oppressed (3).(same as Theatre 4240). Theory and practice of Augusto Boal's liberatory interactive theatre process, including application of techniques of specific social issues. Prerequisite: instructor's consent.

PEAST 4260--The Age of Ascendancy: U.S. Foreign Relations, 1945-Present (3).(same as History 4260). Surveys the Cold War in Europe and Asia, the Korean and Vietnam Wars, and Middle East policy. Prerequisite: sophomore standing.

PEAST 4330--Science and Technology of Terrorism and Counterterrorism (3).(same as Nuclear Engineering 4330). Terrorism has been a familiar tool of political conflict, and it has assumed greater importance during the past twenty years. This subject has been treated by political scientists in various forms, but the scientific and technological aspects of different forms of terrorism cannot be found in a single place. It is important for persons who propose counter measures to understand the basics of different types of terrorism such as for instance the nature of chemical agents, their properties such as toxicity, etc. in order to build better defense systems. Prerequisite: instructor's consent.

PEAST 4331--Nonproliferation Issues for Weapons of Mass Destruction (3).(same as Nuclear Engineering 4370). Nonproliferation impact on technology and world events. Prerequisite: junior or senior standing required or instructor's consent.

PEAST 4360--Economic Development (3).(same as Economics 4360). The study of less-developed countries including problems of measuring economic growth, analysis of sources of economic growth, causes of changes in economic and social structure, development and trade policies. The consequences of goals and assumptions for development policy are

analyzed. Prerequisites: ECONOM 3229 and 3251 or 4351.

PEAST 4410--Politics and War (3).(same as Political Science 4410). Why do wars occur? The function of force and uses of a threat of force. Problems of national security strategy and arms control. Prerequisite: junior standing required.

PEAST 4440--Ethical Issues in Communication (3).(same as Communication 4440). Exploration and analysis of ethical dimensions intrinsic to human communication. Prerequisite: junior standing or departmental consent.

PEAST 4480--War Crimes and Genocide (3).(same as History 4480). This course will explore the development of international law, international consciousness, and U.S. Foreign policy on the two distinct but often related issues of war crimes and genocide during the late 19th and throughout the 20th centuries.

PEAST 4510--Western Europe's Foreign Policy (3).Comparison of foreign policies of the major Western European countries; their roles within the European community. Study of institutions and functioning of the European community and its potential as an emerging world power. Prerequisite: junior standing.

PEAST 4520--Political Sociology (3).(same as Sociology 4520). Social bases of power and politics, economic and political elites, the political economy of the advanced societies, sources of political conflict and change. MA core course. Prerequisite: SOCIOL 3200, 3510, 3520, or 3700.

SOUTH ASIAN STUDIES COURSES

SA ST 1004--Topics in South Asian Studies (3).Special topics.

SAST 1100--Elementary Hindi I (5).Oral-aural and structural approach. Devanagari script.

SAST 1152--Asian Humanities (3).(same as Religious Studies 1820, History 1152 and Art History and Archeology 1152). This course is an introduction to the literature and visual arts of Asia through selected master works. It focuses principally on India and China and investigates the distinctive features of their cultures.

SA ST 1200--Elementary Hindi II (5).Continuation of South Asian Studies 1100. Spoken and written Hindi. Prerequisite: grade of C or better in SA S 1100.

SA ST 1860--History of India to 1600 (3).(same as HIST 1860). The course surveys the history of South Asia from the Indus Valley Civilization (2000 B.C.) to the consolidation of the Mughal Empire (A.D. 1600). Themes include cultural and social history, religion, art, literature, and the sources used for the study of premodern civilization.

SAST 1861--History of India from 1500 (3).(same as History 1861). This course surveys the history of South Asia from Mughals (A.D. 1526) to the Partition of 1947. Themes include Cultural and social history, art and literature, socio-religious reforms, imperialism, nationalism and the approaches used in the study of modern history.

SA ST 2100--Philosophy: East and West (3).(same as Philosophy 2100). Compares the interpretation and role of philosophical concepts such as experience, reason permanence, change, immortality, soul, God, etc., in Indian,

Chinese and European traditions. Prerequisite: sophomore standing.

SA ST 2110--Elementary Hindi III (3).Continuation of South Asian Studies 1200. Prerequisite: SA S 1100, 1200 or equivalent.

SA ST 2270--Geography of Asia (3).(same as Geography 2270). An introductory survey of the geography of Asia from India through Southeast Asia to China and Japan, emphasizing factors contributing to cultural similarities and variations, conflicts of interest, and current development. Prerequisites: sophomore standing or one Introductory Geography course.

SA ST 2800--Women in Indian History (3).(same as History 2800). This course examines the role of women in Indian (South Asian) history, focusing on women in British India from the eighteenth century up to the Partition of 1947. While previous knowledge of South Asian history may be beneficial, it is not required for this course.

SA ST 3130--Advanced Hindi Readings I (4).Directed readings in the literature of the student's area of concentration, and advanced conversation. Prerequisite: instructor's consent.

SA ST 3160--Advanced Hindi Readings II in South Asian Studies (4).Continuation of South Asian Studies 3160. Prerequisite: instructor's consent.

SAST 3200--Hinduism (3).(same as Religious Studies 3200). Origin and development of central themes of traditional Hinduism from earliest times to the modern period. Topics include: the Vedic tradition, rituals and practice, varieties of yoga and meditation, Indian religious thought and devotional Hinduism.

SAST 3240--Buddhism of South and Southeast Asia (3).(same as Religious Studies 3240). Examines the origins of Buddhism in India, the narratives of the life of the Buddha, the development of early Buddhist schools, the extension of Buddhism into Central and Southeast Asia, and the current practice of Buddhism in South and Southeast Asia.

SA ST 3245--Nonviolence in the Modern World (3).(same as History 3245 and Peace Studies 3245). Readings on recent world history, emphasis on Gandhi and nonviolent tradition in America, Europe and the Third World.

SA ST 3260--Southeast Asia (3).(same as Geography 3260). Physical, cultural, historical and regional geography of Southeast Asia, with an introduction to East Asian geography. Emphasizes the problems of tradition and development. Prerequisite: GEOG 2270 or junior standing.

SA ST 3280--Geography of South Asia (3).(same as Geography 3280). Topical and regional analysis of India, Pakistan, Sri Lanka. Historical development of distinctive cultural regions. Relations with neighboring areas. Impact of Westernization on economic activities, settlements, population. Prerequisite: junior standing.

SA ST 4004--Topics in South Asian Studies (3).Special topics.

SA ST 4300--Religious Narratives of South Asia (3).(same as Religious Studies 4300). Study of major narratives of India and their interpretation in literature and art. Topics include: Vedic and Epic mythology, stories of Krishna, myths and images of Shiva, and

forms of the Goddess.

S A ST 4620--Politics in India and South Asia (3).(same as Political Science 4620). Contemporary political and governmental patterns of India, Pakistan, Sri Lanka, Nepal, and Bangladesh.

SAST 4630--Sanskrit I (3).(same as Religious Studies 4630). This course is intended as a "sampler" of Sanskrit literature. We will read Sanskrit texts in the original. The objectives of the course are 1) Expanding the students' knowledge of the Sanskrit language, 2) To acquaint the students with a broad range of textual genres in Sanskrit literature, and 3) To acquaint the students with some central ideas of Hindu and Buddhist philosophy.

S A ST 4640--Sanskrit II (3).(same as Religious Studies 4640). This course is intended as a "sampler" of Sanskrit literature. We will read Sanskrit texts in the original. The objectives of the course are 1) Expanding the students' knowledge of the Sanskrit language, 2) To acquaint the students with a broad range of textual genres in Sanskrit literature, and 3) To acquaint the students with some central ideas of Hindu and Buddhist philosophy.

S A ST 4800--Asian Philosophy (3).(same as Philosophy 4800). This course traces the origins of Indian and Chinese philosophical world views. Included are the major ideas in Hindu, Jaina, and Buddhist thought in India, and Taoism and Confucianism in China. Emphasis is placed on the diverse, assimilative, and pragmatic nature of Indian thought and its impact on contemporary Asian philosophy. Prerequisite: junior standing.

SAST 4810--Philosophy of India (3).(same as Philosophy 4810). General development of Indian Philosophy. Prerequisite: junior standing.

S A ST 4820--Contemporary Indian Philosophy (3).(same as Philosophy 4820). Indian philosophical traditions as represented in backgrounds of Gandhi, Tagore, Tagore, Tagore, and philosophical systems of Radharkrishnan, Aurobindo, etc. Prerequisite: junior standing.

SAST 4850--Traversing the Muslim World (3).(same as History 4850) The traveler's tale formed an important part of the medieval world's system of knowledge. The writing intensive discussion-based course examines a wide array of the most influential travelers in Muslim lands such as Ibn Fadlan, Ibn Buttuta, Benjamin of Tudela and Marco Polo.

SAST 4860--Indian Army as Colonial Army (3).(same as History 4860). This writing intensive discussion-based course examines how the Indian Army acted as a colonial army in the British Empire, including Africa, the Boxer Rebellion, and the World Wars. Focus is on the role of the Indian Army, impact of the Sepoy Mutiny an martial race ideology.

Indian philosophical traditions as represented in backgrounds of Gandhi, Tagore, Tagore, Tagore, and philosophical systems of Radharkrishnan, Aurobindo, etc. Prerequisite: junior standing.

WOMEN'S AND GENDER STUDIES COURSES

WGST 1001--Topics in Women's and Gender Studies-General (1-3).Organized study of selected topics in women's and gender studies. Subjects and earnable credit may vary from semester to semester. Repeatable up to 6 hours.

Prerequisite: sophomore standing.

WGST 1003--Topics in Women's and Gender Studies-Behavioral (1-3).Organized study of selected topics in women's and gender studies. Subjects and earnable credit may vary from semester to semester. Repeatable up to 6 hours. Prerequisite: sophomore standing.

WGST 1004--Topics in Women's and Gender Studies-Social Studies (1-3).Organized study of selected topics in women's and gender studies. Subjects and earnable credit may vary from semester to semester. Repeatable up to 6 hours. Prerequisite: sophomore standing.

WGST 1005--Topics in Women's and Gender Studies-Humanities (1-3).Organized study of selected topics in women's and gender studies. Subjects and earnable credit may vary from semester to semester. Repeatable up to 6 hours. Prerequisite: sophomore standing.

WGST 1100--Self Defense for Women (2).The class is designed to teach women how to protect themselves through verbal and physical techniques. The skills taught include personal defense, the art of falling, being able to use the body as a weapon, and to devise and actively participate in a fitness program.

WGST 1120--Bodies, Cultures, and Nations (3).Introduction to the basic issues of Western feminist thought through a study of classical and contemporary sources. Course will consider images, conditions, activities and visions of women as they vary historically and socially.

WGST 1332--Social Perspectives on Women, Race and Class (3).(same as Black Studies 1332). Examines the impact of the construction of "female" on different categories of women. Reviews women's multilayered relationships. Stresses both the roles of creator and "victim" within social structures and value systems. No credit for students who have taken WGST 1334.

WGST 1334--Women, Race, and Class (3).(same as Black Studies 1334). Study of women's experiences of family, work, sexuality, spirituality, violence, power, and love across race and class lines. Examine psychological, economic, and institutional connections between racism, sexism and classism. No credit for students who have taken WGST 1332.

WGST 1360--The Female Experience: Body, Identity, and Culture (3).(same as Sociology 1360). Study of the experience of being female in American Culture. Course will focus on development of women's identities through such topics as: sexuality, reproduction, self-image, rape and health care.

WGST 1500--The Black Woman in America (3).(same as Black Studies 1500). Review and critique of a variety of materials about Black women from slavery to the social and philosophical impact of the Black woman's struggle on all women. Prerequisites: sophomore standing.

WGST 2001--Topics in Women's and Gender Studies-General (1-3).Organized study of selected topics in women's and gender studies. Subjects and earnable credit may vary from semester to semester. Repeatable up to 6 hours. Prerequisite: sophomore standing and/or WGST 1120.

WGST 2003--Topics in Women's and Gender Studies-Behavioral (1-3).Organized study of selected topics in women's and gender studies.

Subjects and earnable credit may vary from semester to semester. Repeatable up to 6 hours. Prerequisite: sophomore standing and/or WGST 1120.

WGST 2004--Topics in Women's and Gender Studies-Social Studies (1-3).Organized study of selected topics in women's and gender studies. Subjects and earnable credit may vary from semester to semester. Repeatable up to 6 hours. Prerequisite: sophomore standing and/or WGST 1120.

WGST 2005--Topics in Women's and Gender Studies-Humanities (1-3).Organized study of selected topics in women's and gender studies. Subjects and earnable credit may vary from semester to semester. Repeatable up to 6 hours. Prerequisite: sophomore standing and/or WGST 1120.

WGST 2005H--Topics in Women's and Gender Studies-Humanities - Honors (1-3).Organized study of selected topics in women's and gender

studies. Subjects and earnable credit may vary from semester to semester. Repeatable up to 6 hours. Prerequisite: sophomore standing and/or WGST 1120. Honors eligibility required.

WGST 2020--Feminist Theory I (3).Introduces central themes and problems in feminist thought, including consciousness-raising, motherhood, class, race, sexuality, nationalism, and transnational feminism. Prerequisite: WGST 1120 or sophomore standing.

WGST 2030--Gender in India: Colonial Histories, Post-Colonial Challenges (3).The aim of the course is to identify and interrogate key gender issues in India with an acute awareness of their constructions through western and local knowledges, Indian patriarchy, the nation-state, and globalization. Prerequisite: sophomore standing.

WGST 2040--Women's Empowerment (3).Women's Empowerment is a popular catch phrase in politics and research, but What does it mean? How is it measured? If we define and measure it, but find it lacking, how do we empower individuals? This course examines definitions of measurements of and routes to women's empowerment in First World and Third World contexts.

WGST 2080--Gender Freedom: Sexuality and Gender Beyond Borders (3).This interdisciplinary, cross-cultural course investigates modern constructions of sexed and gendered bodies, paying particular attention to those systems of gender-based oppression that suppress multiple gender identities and expressions. Prerequisite: sophomore standing.

WGST 2180--Introduction to Women's Literature (3).(same as English 2180). A study of traditional and non-traditional literature written by women from the perspective of feminist themes-love, power, work, family and other relations. Prerequisite: ENGLSH 1000. No more than six hours may be taken in the Introduction to Women's Literature series.

WGST 2186--Introduction to Women's Literature, Beginning to 1603 (3).(same as English 2186). See Women's and Gender Studies 2180 for course description.

WGST 2187--Introduction to Women's Literature, 1603 to 1789 (3).(same as English 2187). See Women's and Gender Studies 2180

for course description.

WGST 2188--Introduction to Women's Literature, 1789 to 1890 (3).(same as English 2188). See Women's and Gender Studies 2180 for course description.

WGST 2189--Introduction to Women's Literature, 1890 to Present (3).(same as English 2189). See Women's and Gender Studies 2180 for course description.

WGST 2250--Latinas in the U.S. (3).This course provides an introduction to the formation of Chicana and Latina identities in the U.S. Some areas covered are: immigration, transnational identity, pop culture, literary expression, body image, spirituality, racism/sexism, assimilation, acculturation, and activism.

WGST 2370--French and Francophone Women Writers (3).(same as French 2370). This course will address issues of race, gender and class in selected works originally written by women of different historical periods and geographical areas. (metropolitan France, French colonies, and territories such as the Caribbean)

WGST 2390--Latin American Women's Culture (3).(same as Spanish 2390). Examines Latin American women across class, race, ethnicity and age, as producers of high and popular culture. We will be looking at how women have been seen in art, religion, popular and high culture and the ways in which women have seen themselves over time. No knowledge of Spanish required. May not be used in area of concentration in Spanish.

WGST 2400--Social History of U.S. Women (3).(same as History 2400). This course, the social history of US women, offers a general overview of US women, beginning with the colonial period up to the present day.

WGST 2410--African American Women in History (3).(same as History 2410). Covers major issues affecting black women since their introduction into English-speaking North America to the present.

WGST 2500--Philosophy and Gender (3).(Same as PHIL 2500). A critical examination of central ideas and themes in feminist philosophical thought. Topics may include: sex, marriage, parenthood, reproduction, body image, pornography, prostitution. Prerequisite: sophomore standing.

WGST 2940--Life, Work, Community (1).This course offers students an opportunity to explore the connection between academics and civic involvement. Students will participate in a community project, and will strengthen interviewing, resume writing, and job searching skills. Prerequisite: sophomore standing.

WGST 2960--Sexual Health Advocacy and Service Learning (3).Students will critically investigate sexuality and reproductive health within a cultural context including religious, political, social justice, familial, and societal influences. Through assigned readings, reflection, experiential learning, small group activities and discussion, students will increase their awareness of sexual health issues, enhance self awareness, and learn how to effectively educate their peers surrounding issues of sexual health. Prerequisite: sophomore standing.

WGST 3001--Topics in Women's and Gender Studies-General (3).Problems, topics, issues

or review of research in any area of women's and gender studies and/or experimental development of new content areas. Repeatable up to 6 hours. Prerequisite: junior standing and/or WGST 1120.

WGST 3003--Topics in Women's and Gender Studies-Behavioral Sciences (3).Problems, topics, issues or review of research in any area of women's and gender studies and/or experimental development of new content areas. Repeatable up to 6 hours. Prerequisite: junior standing and/or WGST 1120.

WGST 3004--Topics in Women's and Gender Studies-Social Sciences (3).Problems, topics, issues or review of research in any area of women's and gender studies and/or experimental development of new content areas. Repeatable up to 6 hours. Prerequisite: junior standing and/or WGST 1120.

WGST 3005--Topics in Women's and Gender Studies-Humanities (3).Problems, topics, issues or review of research in any area of women's and gender studies and/or experimental development of new content areas. Repeatable up to 6 hours. Prerequisite: junior standing and/or WGST 1120.

WGST 3080--Sexuality and Gender Theory (3-6).(same as English 3080). Examination of major theoretical approaches and debates in the study of gender and sexuality, with particular attention to the intersection of culture, representation, and identity. May be repeated to 6 hours with departments consent. Prerequisite: sophomore standing

WGST 3180--Historical Survey of Women Writers (3).(same as English 3180). A study of writing by women from the Middle Ages to the present. Prerequisite: sophomore standing.

WGST 3220--U.S. Women's Political History, 1880-Present (3).(same as History 3220). This course explores American women's engagement with American politics (broadly defined) over the course of the twentieth century. It addresses issues of political identity, organization, ideology, and division. Prerequisite: sophomore standing.

WGST 3240--Nonprofit Work and the Pursuit of Social Justice (3).This course provides an overview of the work of nonprofit organizations. It will be framed in a social justice paradigm and will explore women's role in nonprofit organizations, why women gravitate to nonprofits, and the implications of their work to achieve social justice. Prerequisite: junior standing.

WGST 3320--Sociology of Gender (3).(same as Sociology 3320). Study of the ways in which femininities and masculinities are constructed in American society with particular attention to gender ideologies and the gendered nature of the social structure. Prerequisites: SOCIOL 1000, 1360 or equivalent.

WGST 3380--Latin American Women Writers (3).(same as Spanish 3380). An introduction to major literary and theoretical texts by twentieth century Latin American women in translation. Readings and class work in English. Prerequisite: sophomore standing.

WGST 3430--Sex Radicals in U. S. History (3).(same as History 3430). Survey of the history of sexuality in the United States. Prerequisite: sophomore standing.

WGST 3450--Feminist Methodologies (3).This course is an opportunity to explore the difference that feminism makes in doing research. Students can begin to identify the research tools and strategies suited to questions they want to pursue. Prerequisite: sophomore standing.

WGST 3530--Global Politics of HIV/AIDS (3).(same as Geography 3530). Examines AIDS science, sociopolitical causes of the epidemic, global AIDS policy and transnational AIDS activism.

WGST 3540--Geographies of Sexualities (3).(Same as GEOG 3540) This class will explore the relationship of sexuality and space. The class will focus on the ways that sexuality creates particular spaces, and the ways that sexuality and space shape one another in the midst of nation, gender, religion, race, class, and generation. Sophomore standing required.

WGST 3570--European Women in the 19th Century (3).(same as History 3570). Examines the history of European women from 1750 to 1900. The course focuses on how industrialization, the French Revolution and nation-formation changed women's role in the family, workplace and the state. Grading: exams, papers and discussions. Prerequisite: sophomore standing.

WGST 3670--Imagining Gender in a Global Context (3).This course introduces transnational feminist theories. Considers the practices and material circumstances related to globalization. Explores how class, gender, place/nation, (dis) ability, sexuality and colonial practices complicate our understanding of globalization. Prerequisite: WGST 1120; sophomore standing.

WGST 3750--Women and Religions (3).(same as Religious Studies 3750). A rediscovery of the wealth of religious activity which women have created and enacted. Investigates women's roles and rituals in large-scale and local religions, including ancient Goddess religions, Hinduism, Buddhism, Judaism, Christianity, Islam, and African, South American, and native American groups. Prerequisite: sophomore standing.

WGST 3870--Russian Women and Film (3).(Same as RUSS 3870/FILM_S 3870) Traces image(s) of the Russian woman in 20th-century Russia as constructed in Russian, Soviet and late-Soviet film. Discusses heroines of pre-revolutionary melodrama and "new Soviet man and woman" of the 20s. Considers wartime re-alignment of gender roles in defense of motherland and their subtle revamping in post-war and post-Stalinist period, and the shifting relations between women and men, women and women, and women and the State. Emphasizes cultural-historical and ideological status of women as reflected in onscreen image(s) in Russian film. Designed to serve as an introduction to film studies and to 20th-century Russian culture more generally. Conducted in English (all films have English subtitles). Prerequisite: ENGLISH 1000 and sophomore status.

WGST 4001--Topics in Women's and Gender Studies-General (3).Problems, topics, issues or review of research in any area of women's and gender studies and/or experimental development of new content areas. Repeatable up to 6 hours. Prerequisite: junior standing and/

or WGST 1120.

WGST 4003--Topics in Women's and Gender Studies-Behavioral Sciences (3). Problems, topics, issues or review of research in any area of women's and gender studies and/or experimental development of new content areas. Repeatable up to 6 hours. Prerequisite: junior standing and/or WGST 1120.

WGST 4004--Topics in Women's and Gender Studies-Social Sciences (3). Problems, topics, issues or review of research in any area of women's and gender studies and/or experimental development of new content areas. Repeatable up to 6 hours. Prerequisite: junior standing and/or WGST 1120.

WGST 4005--Topics in Women's and Gender Studies-Humanities (3). Problems, topics, issues or review of research in any area of women's and gender studies and/or experimental development of new content areas. Repeatable up to 6 hours. Prerequisite: junior standing and/or WGST 1120.

WGST 4020--Feminist Theory II: Problems in Feminist Thought (3). Examines recent problems and critical debates within feminist theory. Prerequisite: WGST 2020 or instructor's consent.

WGST 4110--Feminist Research and Criticism (3). (Same as SOCIOL 4110) Examination of both feminist critique of traditional social research and recent, feminist-oriented research that attempts to answer these criticisms. Prerequisite: SOCIOL 2950 or equivalent.

WGST 4120--Women, Art and Society (3). (same as Art History and Archeology 4120). This course surveys and analyzes the careers and works of selected European and American women artists, and images of women (by female and male artists) in the 18th, 19th and the first half of the 20th centuries. Prerequisites: instructor's consent.

WGST 4180--Major Women Writers (3). (same as English 4180). Study of a limited number (1-3) of significant writers to be read intensively using contemporary feminist critical theory. Prerequisites: two courses in British or American Literature. Repeatable with department's consent maximum of six hours for WGST 4180 and 4480.

WGST 4181--Themes in Literature by Women (3). (same as English 4181). Examines works by a number of women writers with particular attention to their sociopolitical context. May repeat to six hours with department's consent. Prerequisite: junior standing.

WGST 4186--Major Women Writers, Beginning to 1603 (3). (same as English 4186). See Women's and Gender Studies 4180 for course description.

WGST 4187--Major Women Writers, 1603-1789 (3). (same as English 4187). See Women's and Gender Studies 4180 for course description.

WGST 4188--Major Women Writers, 1789-1890 (3). (same as English 4188). See Women's and Gender Studies 4180 for course description.

WGST 4189--Major Women Writers, 1890-Present (3). (same as English 4189). See Women's and Gender Studies 4180 for course description.

WGST 4230--Women, Development, and Globalization (3). (same as Sociology 4230

and Black Studies 4230). Examines the history and structure of "development" discourse and practices. Stresses the interconnections and impact on women globally. Reviews women's strategies in defining and instituting programs to improve quality of life in communities. Prerequisites: SOCIOL 2200, WGST 1332, 1334, BL STU 1132, or WGST 4420.

WGST 4310--Adoption, Child Welfare and the Family, 1850-Present (3). (same as HIST 4310). This interdisciplinary U.S. history course will address topics such as: changing legal and social meaning of adoption since 1850; historical connections between adoption and poverty, family, gender race, sexuality, class, fertility, identity; and more recent issues such as transnational adoption.

WGST 4370--Anthropology of Gender (3). (same as Anthropology 4370). The Anthropology of Gender introduces the student to the variation in the relationships between male and females; and between men, women, and other genders from around the world. The different approaches to understanding and modeling gender are discussed, as are specific case-studies from many different cultures.

WGST 4400--Contemporary Issues in Domestic Violence (3). (same as Social Work 4400). This 3-hour course covers history of battered women's movement, violence theories, policy issues, prevention and intervention practice models for working with battered women, their children, and abusers. Graded on A/F basis only.

WGST 4420--The Politics of Reproduction and Fertility Control (3). (same as Human Development and Family Studies 4670). Examines the social construction of reproduction, including discourses and practices surrounding the body, pregnancy, birth, reproductive technology and diseases. Stresses the ethical issues and social policies affecting women. Prerequisite: junior standing or instructor's consent.

WGST 4480--Major African Diaspora Women Writers (3). (same as Black Studies and English 4480). Study of selected African Diaspora women writers, focusing on texts originally in English. Repeatable with department's consent. Maximum of 6 hours for WGST 4180 and 4480.

WGST 4487--Major African Diaspora Women Writers, 1603 to 1789 (3). (same as Black Studies and English 4487). See Women's and Gender Studies 4480 for course description.

WGST 4488--Major African Diaspora Women Writers, 1789 to 1890 (3). (same as Black Studies and English 4488). See Women's and Gender Studies 4480 for course description.

WGST 4489--Major African Diaspora Women Writers, 1890 to Present (3). (same as Black Studies and English 4489). See Women's and Gender Studies 4480 for course description.

WGST 4550--Gender and Human Rights in Cross Cultural Perspective (3). (same as SOCIOL 4550 and PEA_ST 4550). This course focuses on the global discourse on human rights and gender, emphasizing cross-cultural theories. Course includes the meaning of rights, Western and nonwestern perspectives, feminist contributions, important substantive debates, violations, policymaking and activism. Prerequisites: WGST 1120 or SOCIOL 2200; senior standing required.

WGST 4600--Women's Health (3). (same as Nursing 4600). A survey of international and domestic women's health issues; considers historical antecedents and specific effects of socio-cultural variables and economic development on women's health in developing and developed nations.

WGST 4660--European Women in the 20th Century (3). (same as History 4660). Examines the history of European women from World War I to the present. The course focuses on wars, migration, and the changing nature of family, work and community. Prerequisite: junior standing.

WGST 4716--Women and the Media (2). (same as Journalism 4716). Focus on portrayal of women in American mass media. Other goals: historical perspective on women as journalists exposure to issues usually not covered by mass media; research and writing skills. Prerequisite: instructor's consent.

WGST 4730--Women and Politics (3). (same as Political Science 4730). This course examines women's political participation and public policies towards women in countries around the world. Prerequisites: POL_SC 1100; junior standing.

WGST 4750--Women, Religion and Culture (3). (same as Religious Studies 4750). An advanced study of the role of women in religion, focusing on the methods of determining the significance of gender in religious life, sacred texts, symbols, rituals and/or beliefs. Traditions studied include Christianity, Islam, contemporary pagan communities, and Native American traditions. Prerequisite: REL ST/WGST 3750 (song) as well as material genres (quilting/arts). Prerequisite: junior standing or instructor's consent.

WGST 4830--Psychology of Women (3). (same as Psychology 4830). Overview of current theories and research relating to the psychology of women. Topics include gender stereotyping, psychological sex differences, achievement motivation in women, and women and mental health. Prerequisite: PSYCH 1000.

WGST 4860--Liberal Thought and the Owner or instructor's consent.

WGST 4780--Women's Folklore and Feminist Theory (3). (same as English 4780). Examines folklore and artistic expression of women in relations to feminist theory and in multicultural contexts. Includes verbal genres (narrative/ship of the Self (3). (same as Political Science 4860). Introduces students to foundational premises of liberal political thought through examination of the dispute between Locke and Filmer. Analyzes subsequent rethinking of that debate in works by Rousseau, Wollstonecraft, nineteenth-century American slaves, contemporary feminists, and communarians. Prerequisite: sophomore standing.

WGST 4880--Feminist Political Thought (3). (same as Political Science 4880). This course ship of the Self (3). (same as Political Science 4860). Introduces students to foundational premises of liberal political thought through examination of the dispute between Locke and Filmer. Analyzes subsequent rethinking of that debate in works by Rousseau, Wollstonecraft, nineteenth-century American slaves,

WGST 4940--Internship in Women and Gender Studies (3).Directed professional experience women's and gender studies for highly qualified and motivated students. Topic selected in consultation with supervisory faculty member. Repeatable up to 6 hours. Prerequisite: junior standing and/or WGST 1120.

WGST 4990--Senior Research Seminar in Women's and Gender Studies (3).Seminar for senior students engaged in some area of research in women's and gender studies. Students will compare and evaluate their individual projects and/or collaborate on a common theme. Prerequisite: instructor's consent in appropriate feminist related agency or organization. Prerequisite: junior standing; departmental consent. Graded on S/U basis only.

Department of Statistics

Nancy Flournoy, Chair
College of Arts and Science
146 Middlebush Hall
(573) 882-6376
www.stat.missouri.edu
dooleyj@missouri.edu

ASSOCIATE TEACHING PROFESSOR L. D. Ries
ASSISTANT TEACHING PROFESSOR J. Fresen,
L.B. Hearne, S. Lee,

Information is needed to solve the many problems of today's world. How much information? What kind? After it is obtained, what must be done with it? Statisticians are trained to help answer these questions. Early admission into the Statistics Department will allow students to plan their programs so that the math and statistics prerequisites can be taken in the proper sequence.

The department offers BA, BS, MA and PhD degrees with a major in Statistics. A minor is also available.

Major Program Requirements - Statistics

Students are encouraged to supplement their work in statistics with courses from areas such as economics, biology, accounting, finance, marketing, management, psychology, sociology, engineering, agriculture and atmospheric science. In addition, students must complete all degree, college and university graduation requirements, including university general education.

Credit for beginning courses:

A student may not receive credit toward an undergraduate degree for more than one of STAT 1200, 1300 and 1400.

A student may not receive credit toward an undergraduate degree for more than one of STAT 2500 and 2530.

Subject to the above restrictions, a student may receive a maximum of 4 credits toward an undergraduate degree for any combination of STAT 1200, 1300, 1400, 2200, 2500 and 2530.

A student may not receive credit toward an undergraduate degree for any statistics course numbered 2999 or below if a statistics course numbered 4000 or above was successfully completed prior to or concurrent with the course in question. Exceptions may be approved at the discretion of the department.

Options

Students may pursue either a BA or a BS degree. For both degrees, students may pursue either a traditional track or an applied

track. Students who are interested in graduate study in statistics are strongly encouraged to follow the traditional track.

Major core requirements - Bachelor of Arts

Mathematics courses

Traditional track

MATH 1500: Analytical Geometry & Calculus I

MATH 1700: Calculus II

MATH 2300: Calculus III

MATH 4140: Matrix Theory

Applied track

MATH 1500: Analytic Geometry & Calculus I OR

MATH 1300: Finite Mathematics and MATH 1320:

Elements of Calculus

6 additional credits in statistics (beyond those used to fulfill the statistics requirements of the degree) or approved statistically-oriented courses; must be numbered 4000 or above and may not include STAT 4050:

Connecting Statistics to Middle and Secondary Schools

Statistics Courses

Both tracks

STAT 4970: Senior Seminar

18 additional credits offered by the department, at least 15 of which must be numbered 3000 or above and may not include STAT 4050: Connecting Statistics to Middle and Secondary Schools or more than 3 credits of STAT 4999: Departmental Honors in Statistics

Computing Courses

Both tracks

CS1040: Introduction to Problem Solving and Programming OR

CS1050: Algorithm Design and Programming I

Major core requirements - Bachelor of Science

Mathematics courses

Traditional track

MATH 1500: Analytical Geometry & Calculus I

MATH 1700: Calculus II

MATH 2300: Calculus III

MATH 4140: Matrix Theory

Applied Track

MATH 1500: Analytic Geometry & Calculus I OR

MATH 1300: Finite Mathematics and MATH 1320:

Elements of calculus

6 additional credits in statistics courses (beyond those used to fulfill the statistics requirements of the degree) or approved statistically-oriented courses; must be numbered 4000 or above

Statistics courses

Both tracks

STAT 4970: Senior Seminar

18 additional credits offered by the department, at least 15 of which must be numbered 3000 or above and may not include STAT 4050: Connecting Statistics to Middle and Secondary Schools

Computing courses

Both tracks

CS1040: Introduction to Problem Solving
Programming or

CS1050: Algorithm Design and Programming I and

3 additional credits in computer science or other approved computing courses (STAT 4110: Statistical Software and

Data Analysis may be used as part of this requirement if it is not counted in statistics group above.)

Professional writing courses

ENGLSH 2030: Professional Writing

Foreign language option for students pursuing a BS degree

Students pursuing the BS degree may elect to take an alternative to a foreign language. Such students must complete no fewer than 12 upper-class credits that are not from the parent department, are not normally required of departmental majors and do not appear elsewhere in the graduation plan. This program must be carefully planned to form a coherent unit and must be approved by the director of undergraduate studies.

The following are examples of foreign language alternatives:

- mathematical sciences
- biological sciences
- behavioral sciences
- physical sciences
- business
- engineering

Minor in Statistics

A minor in statistics requires a minimum of 15 credits in statistics courses numbered 3000 or above. The courses used to complete the minor must be chosen in consultation with the director of undergraduate studies and must include at least one of the following:

- STAT 3500: Introduction to Probability and Statistics II
- STAT 4710: Introduction to Mathematical Statistics
- STAT 4750: Introduction to Probability Theory

A maximum of 3 of the 15 credits may be in:

- STAT 4002: Topics in Statistics or
- STAT 4085: Problems in Statistics for Undergraduates

Departmental Honors

To be admitted to the undergraduate honors program in the Department of Statistics, a student must have completed at least 12 of the 21 credits of statistics courses required for the major, have a grade-point average of at least 3.25 in all completed statistics courses, and identify a faculty member from the department who agrees to supervise the student’s honors research project.

In order to receive the departmental honors designation, students who have been accepted into the program must graduate with a grade-point average of at least 3.25 in statistics courses, prepare a senior thesis based on their honors project, and present the results of the thesis in a departmental colloquium or other public forum approved by their mentor. They also must earn a grade of B or better in 3 credits of STAT 4999.

STATISTICS COURSES

STAT 1200--Introductory Statistical Reasoning (3).Statistical concepts and critical reasoning needed to evaluate conclusions based on quantitative information in health studies, opinion polls, etc. Students may not receive credit if they have received or are concurrently receiving credit for a higher numbered course offered by the Statistics Department. Prerequisite: grade in C range or better in Math 1100, 1120, 1160 or 1180 or exemption from college algebra by examination. Math Reasoning Proficiency Course.

STAT 1300--Elementary Statistics (3).Collection, presentation of data; averages; dispersion; introduction to statistical inference, correlation and regression. Students may not receive credit if they have received or are concurrently receiving credit for another course offered by the Statistics Department. Prerequisite: grade in C range or better in MATH 1100, 1120, 1160, or 1180 or exemption from college algebra by examination. Math Reasoning Proficiency Course.

STAT 1300H--Elementary Statistics - Honors (3).Collection, presentation of data; averages; dispersion; introduction to statistical inference, correlation and regression. Students may not receive credit if they have received or are concurrently receiving credit for another course offered by the Statistics Department. Prerequisite: grade in C range or better in MATH 1100, 1120, 1160, or 1180 or exemption from college algebra by examination. Honors eligibility required. Math Reasoning Proficiency course

STAT 1400--Elementary Statistics for Agriculture (3).Designed for students studying agriculture and related fields. Descriptive statistics, probability, estimation, hypothesis testing, correlation and regression. Students may not receive credit if they have received or are concurrently receiving credit for another course offered by the Statistics Department. Math Reasoning Proficiency Course. Prerequisite: grade in C range or better in Math 1100, 1120, 1160, or 1180 or exemption from college algebra by examination.

STAT 2200--Introductory Statistical Methods (1).Designed to upgrade the curriculum of Statistics 1200 or 1300 or 1400 to the level of Statistics 2500. Students may not receive credit for Statistics 2200 if they have completed a course from the Department of Statistics numbered 2500 or higher. Prerequisites: grade in C range or better in STAT 1200, 1300, or 1400. Math Reasoning Proficiency Course.

STAT 2500--Introduction to Probability and Statistics I (3).Designed primarily for students in College of Business. Descriptive statistics, probability, random variables, sampling distributions, estimation, confidence intervals, hypothesis tests. Prerequisite: grade of C- or better in MATH 1300, 1320, 1400 or 1500.

STAT 2530--Statistical Methods in Natural Resources (3).Statistical methods, with emphasis on applications to natural resources and including computer exercises. Prerequisite: a college-level computing course and a grade in the C range or better in MATH 1100, 1120, 1160, or 1180.

STAT 3500--Introduction to Probability and Statistics II (3).Continuation of 2500. Coverage of additional topics including: Regression; model building; ANOVA; nonparametric methods; use of a statistical computer package. Prerequisite: grade in the C range of STAT 2200, 2500, 2530, or concurrent enrollment in STAT 2200.

STAT 4002--Topics in Statistics-Biological/Physical/Mathematics (cr.arr).Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Repeatable with departmental consent. Prerequisites: junior standing and instructor's consent.

STAT 4050--Connecting Statistics to Middle and Secondary Schools (3).Primarily for middle and secondary mathematics education majors. Uses standards-based curricular materials to demonstrate connections between college-level statistics and content taught in middle and secondary schools. No credit toward a graduate degree in statistics. Prerequisite: an introductory course in statistics or MATH 2320 or instructor's consent.

STAT 4085--Problems in Statistics for Undergraduates (1-3).Independent investigations. Reports on approved topics. Prerequisite: instructor's consent.

STAT 4110--Statistical Software and Data Analysis (3).Programming with major statistical packages emphasizing data management techniques and statistical analysis for regression, analysis of variance, categorical data, descriptive statistics, non-parametric analyses, and other selected topics. Prerequisite: STAT 3500, 7070, 4710/7710, 4760/7760, or instructor's consent.

STAT 4150--Applied Categorical Data Analysis (3).The study of statistical models and methods used in analyzing categorical data. The use of computing is emphasized and calculus is not required. No credit for students who have previously completed STAT 4830. No credit toward a graduate degree in statistics.

Prerequisite: STAT 3500, 7070, 4710/7710, or 4760/7760 or instructor's consent.

STAT 4210--Applied Nonparametric Methods (3).Statistical methods when the functional form of the population is unknown. Applications emphasized. Comparisons with parametric procedures. Goodness of-fit, chi-square, comparison of several populations, measures of correlation. Prerequisite: STAT 3500, 7070, 4710/7710, 4760/7760, or instructor's consent.

STAT 4310--Sampling Techniques (3).Theory of probability sampling designs. Unrestricted random sampling. Stratified sampling. Cluster sampling. Multistage or subsampling. Ratio estimates. Regression estimates. Double sampling. Prerequisite: STAT 3500, 7070, 4710/7710, 4760/7760, or instructor's consent.

STAT 4410--Biostatistics (3).Study of statistical techniques for the design and analysis of clinical trials, laboratory studies and epidemiology. Topics include randomization, power and sample size calculation, sequential monitoring, Carcinogenicity bioassay and case-cohort designs. Prerequisite: STAT 3500, 7070, 4710/7710, 4760/7760, or instructor's consent.

STAT 4420--Applied Survival Analysis (3).Parametric models; Kaplan-Meier estimator; nonparametric estimation of survival and cumulative hazard functions; log-rank test; Cox model; Stratified Cox model; additive hazards model partial likelihood; regression diagnostics; multivariate survival data. Prerequisite: STAT 3500, STAT 7070, STAT 4710/7710 or STAT 4760/7760 or consent of instructor.

STAT 4430--Applied Longitudinal Data Analysis (3).Repeated measurements; event history studies; linear and nonlinear mixed effects models; growth models; marginal mean and rate models; pattern-mixture models; selection models; non-informative and informative drop-out; joint analysis of longitudinal and survival data. Prerequisite: STAT 3500, STAT 7070, STAT 4710/7710, or STAT 4760/7760 or instructor's consent.

STAT 4450--Applied Statistical Methods for Bioinformatics (3).Random variables; Point estimation; Multiple t-test; Likelihood principle; Analysis of variance; Probabilistic methods for sequence modeling; Gene expression analysis; Protein structure prediction; Genome analysis; Hierarchical clustering and Gene classification. Prerequisite: STAT 3500, 7070, 4710/7710, 4760/7760, or instructor's consent.

STAT 4510--Applied Statistical Models I (3).Introduction to applied linear models including regression (simple and multiple, subset selection, estimation and testing) and analysis of

variance (fixed and random effects, multifactor models, contrasts, multiple testing). No credit toward a graduate degree in statistics. Prerequisite: STAT 3500, 7070, 4710/7710, 4760/7760, or instructor's consent.

STAT 4530--Analysis of Variance (3). Study of analysis of variance and related modeling techniques for cases with fixed, random, and mixed effects. Exposure to designs other than completely randomized designs including factorial arrangements, repeated measures, nested, and unequal sample size designs. Prerequisite: STAT 3500, 7070, 4710/7710, 4760/7760, or instructor's consent.

STAT 4540--Experimental Design (3). Examination and analysis of modern statistical techniques applicable to experimentation in social, physical or biological sciences. Prerequisite: STAT 4530/7530 or instructor's consent.

STAT 4560--Applied Multivariate Data Analysis (3). Testing mean vectors; Discriminant analysis; Principal components; Factor analysis; Cluster analysis; Structural equation modeling; Graphics. Prerequisite: STAT 3500, 7070 4710/7710 or 4760/7760 or instructor's consent. No credit towards a graduate degree in statistics.

STAT 4610--Applied Spatial Statistics (3). Introduction to spatial random processes, spatial point patterns, kriging, simultaneous and conditional autoregression, and spatial data analysis. Prerequisite: STAT 4510 or instructor's consent. Recommended: basic knowledge of calculus and matrices.

STAT 4640--Introduction to Bayesian Data Analysis (3). Bayes formulas, choices of prior, empirical Bayesian methods, hierarchical Bayesian methods, statistical computation, Bayesian estimation, model selection, predictive analysis, applications, Bayesian software.

Prerequisite: STAT 3500 or 4510/7510 or instructor's consent.

STAT 4710--Introduction to Mathematical Statistics (3). (same as Mathematics 4315). Introduction to theory of probability and statistics using concepts and methods of calculus. Prerequisite: MATH 2300 or instructor's consent. No credit for MATH4315.

STAT 4750--Introduction to Probability Theory (3). (same as Mathematics 4320). Probability spaces; random variables and their distributions; repeated trials; probability limit theorems. Prerequisite: MATH 2300 or instructor's consent.

STAT 4760--Statistical Inference (3). (same as Mathematics 4520). Sampling; point estimation; sampling distribution; tests of hypotheses; regression and linear hypotheses. Prerequisite: STAT 4750/7750.

STAT 4810--Nonparametric Methods (3). A first course in Non-parametric statistical methods based on ranks. Both theory and application are emphasized. Two-sample problems. K-sample problems. Tests for independence. Contingency tables. Goodness-of-fit tests. Prerequisite: STAT 4710/7710 or 4760/7760 or instructor's consent.

STAT 4830--Categorical Data Analysis (3). Discrete distributions, frequency data, multinomial data, chi-square and likelihood ratio tests, logistic regression, log linear models, rates, relative risks, random effects, case studies. Prerequisite: STAT 4710/7710 or 4760/7760 or instructor's consent.

STAT 4850--Introduction to Stochastic Processes (3). Study of random processes selected from: Markov chains, birth and death processes, random walks, Poisson processes, renewal

theory, Brownian motion, Gaussian processes, white noise, spectral analysis, applications such as queuing theory, sequential tests. Prerequisite: STAT 4750/7750 or instructor's consent.

STAT 4870--Time Series Analysis (3). A study of univariate and multivariate time series models and techniques for their analyses. Emphasis is on methodology rather than theory. Examples are drawn from a variety of areas including business, economics and soil science. Prerequisite: STAT 4710/7710 or 4760/7760 or instructor's consent.

STAT 4970--Senior Seminar (3). A capstone course required of and open only to senior statistics majors. Students will participate in statistical consulting, attend colloquia, and review articles in professional journals. Writing of reports will be emphasized. Prerequisite: senior statistics major and 12 completed hours of statistics courses or instructor's consent.

STAT 4999--Departmental Honors in Statistics (1-3). Special work for Honors candidates in statistics. May be repeated for credit.

Department of Theatre

Clyde Ruffin, Chair
 College of Arts and Science
 Rhynsburger Theatre
 129 Fine Arts Center
 (573) 882-2021
<http://theatre.missouri.edu>

FACULTY

PROFESSOR P. Atkinson, S. Burgoyne, J. M. Miller,
 C. Ruffin
ASSOCIATE PROFESSOR C. D. Black, M.H. Carver,
 D. A. Crespy
ASSISTANT PROFESSOR J. Sebesta
RESIDENT INSTRUCTION ASSISTANT PROFESSOR
 J. A. Drtina
ADJUNCT ASSOCIATE PROFESSOR K. S. Packard,
 R. D. Packard

The Department of Theatre offers students an appreciation of theatre as a fine art, sharpens the talents of those who seek careers in theatre and provides students with methods of stimulating and using their imagination and intensifying their communication skills.

The department offers BA, MA and PhD degrees with a major in Theatre. A minor is also available.

Major Program Requirements - Theatre

The major in theatre consists of core courses and an emphasis area. In addition, all students must complete all College of Arts and Sciences and University graduation requirements, including university general education. All courses used to satisfy requirements for the major must be completed with a grade of C or higher.

Major core requirements.....	15
THEATR 1320: Basic Scenic Construction Lab OR	
THEATR 1340: Basic Costume Construction Lab	3
THEATR 2300: Production Workshop I	1
THEATR 2710: Introduction to Theatre History	3
THEATR 2800: Principles of Script Analysis	3
THEATR 3300: Production Workshop II	1
THEATR 4990: Theatre Capstone	2
Select 3 hours from:	
THEATR 1720: African-American Theatre History	3
THEATR 2150: African-American Cinema	3
THEATR 3700: World Dramatic Literature	3
THEATR 3750: New American Theatre	3
THEATR 3770: Theatre Experience from Page to Stage and Screen.....	3
THEATR 4700: Studies in Theatre History	3
THEATR 4720: American Musicals	3
THEATR 4800: Studies in Dramatic Theory	3
THEATR 4820: Studies in Dramatic Literature.....	3

THEATR 4830: Studies in Dramatic Criticism.....	3
---	---

Emphasis Areas

Theatre students must also complete an emphasis area in performance, design/technical theatre or writing for performance.

Emphasis in Performance

THEATR 4570: Theatrical Costume	3
Performance classes chosen from	14
THEATR 1250: World Theatre Workshop (3)	
THEATR 1360: Stage Makeup (1)	
THEATR 1420: Stage Movement for the Actor (2)	
THEATR 2200: Intro to Performance Studies(3)	
THEATR 2410: Performance Workshop (1)	
THEATR 3200: Performance of Literature (3)	
THEATR 3230: Vocal Performance Technique (3)	
THEATR 3420: Acting I (3)	
THEATR 3430: Acting II (3)	
THEATR 3600: Theatrical Directing (3)	
THEATR 4220: Acting III (3)	
THEATR 4240: Theatre of the Oppressed (3)	
THEATR 4460: Musical Theatre Performance (3)	
THEATR 4600: Advanced Directing (3)	
Design/technical classes.....	2-3

Emphasis in Design/Technical Theatre

Design/technical classes chosen from.....	16
THEATR 1360: Stage Makeup (1)	
THEATR 2320: Beginning Pattern Making(3)	
THEATR 2330: Stage Management (1)	
THEATR 2360: Stagecraft (3)	
THEATR 2510: Introduction to Theatre Design (3)	
THEATR 3310: Costume Crafts	
THEATR 3320: Theatrical Patternmaking (3)	
THEATR 3330: Advanced Costume Construction (3)	
THEATR 3340: Scene Painting (2)	
THEATR 3530: Computer Graphics in Theatre Design (3)	
THEATR 3540: Advanced Makeup (1)	
THEATR 3550: Sound Design (3)	
THEATR 3560: Scene Design (3)	
THEATR 4530: Stage Lighting Design (3)	
THEATR 4570: Theatrical Costume Design (3)	
THEATR 4730: Theatre Architecture (3)	
Performance classes	3

Emphasis in Writing for Performance

THEATR 2510: Introduction to Theatre Design	3
THEATR 2920: Beginning Playwriting	3
THEATR 3200: Performance of Literature.....	3
THEATR 3920: Intermediate Playwriting	3
Two courses chosen from.....	6
THEATR 3600: Theatrical Directing	
THEATR 3700: World Dramatic Literature	
THEATR: 3930: Screenwriting for Television and Film	
THEATR 4920: Advanced Playwriting: Problems	
THEATR4220: Acting III	
THEATR 4460: Musical Theatre Performance	
THEATR 4600: Advanced Directing	
THEATR 4930: Adaptation of Literature for the Stage	
THEATR 4935: Adaptation of Literature for Film	

Double Majors

Many students in theatre choose either a double major or a minor

in another area. In either case, the student must see a theatre advisor for approval.

Departmental Honors

To graduate with honors in theatre, a student must earn a minimum overall MU GPA of 3.3 and earn a minimum GPA of 3.5 in courses in theatre completed at the University of Missouri.

Minor in Theatre

A minor in theatre consists of two core courses and 12 additional credits in theatre.

Minor core requirements	6
THEATR 1320: Basic Scenic Construction Lab OR	
THEATR 1340: Basic Costume Construction Lab	3
THEATR 2800: Principles of Script Analysis	3

Sample Eight-Semester Program

Bachelor of Arts degree with a major in Theatre (Performance Emphasis)

See also Technical Theatre and Writing for Performance emphasis areas. See the *Undergraduate Catalog* for prerequisites.

DEPARTMENT OF THEATRE COURSES

THEATR 1005--Topics in Theatre - Humanities/Fine Arts (cr.arr.). Organized study of selected topics. Subject and credit may vary from semester to semester. May be repeated with departmental consent. Prerequisite: instructor's consent.

THEATR 1100--The Theatre in Society (3). Examines the form and meaning of theatre in civilizations of the West from the ancient Greeks to modern times.

THEATR 1200--Voice and Articulation (2). Techniques for improving speaking voice; theories underlying techniques. Attention to student's articulation, pronunciation, voice quality, general expressiveness.

THEATR 1250--World Theatre Workshop (2), (same as Black Studies 1250). Provides a diverse ensemble of student performers, writers, and technicians with an intensive immersion in the process of theatrical production through the public presentation of dramatic literature that focuses on global issues of ethnicity and culture.

THEATR 1320--Beginning Scenic Construction Lab (3). Practical experience constructing and rigging theatrical scenery, properties, and stage lighting. Requires evening crew assignment.

THEATR 1340--Beginning Costume Construction Lab (3). Learn the basic sewing skills used in costume construction, through lecture, demonstration and practical application. Requires evening crew assignment.

THEATR 1360--Stage Makeup (1). Character analysis, facial anatomy, color for stage and television makeup. Practice in application.

THEATR 1400--Acting for Non-Majors (3). Basic theory and practice of acting for the non theatre major.

THEATR 1420--Stage Movement for the Actor (2). Basic work in the techniques that comprise movement training for the actor.

THEATR 1720--African-American Theatre History (3), (same as Black Studies 1720). A historical and critical analysis of the evolution of African American cultural performance in the American theatre and entertainment industry.

THEATR 2005--Topics in Theatre (3). Organized study of selected topics. Subject and credit may vary from semester to semester. May be repeated with department consent. Prerequisite: instructor's consent.

THEATR 2150--African-American Cinema (3), (same as Black Studies 2150). Study of the impact of cinema and the entertainment industry on the social perceptions of African-Americans and on African-American culture.

THEATR 2200--Introduction to Performance Studies (3). This course focuses on the writing of adaptations for the stage through performance. Students develop skills in critical reading, writing, listening, speaking and analysis of performance as they study oral and literary texts, autobiography and narratives.

THEATR 2300--Production Workshop I (1). Work backstage in support of university theatre productions. Scenery, lighting, costumes, properties or other responsibilities. May be repeated. Prerequisite: instructor's consent. Graded on

a S/U basis only.

THEATR 2330--Stage Management (1). Study of the role of the theatre stage manager. Practice in becoming effective in planning and stage managing theatre productions. Graded on A/F basis only.

THEATR 2360--Stagecraft (3). Fundamentals of properties and scenic construction stressing terminology and practical production experience. Prerequisite: THEATR 1320.

THEATR 2410--Performance Workshop (1). Credit for performance in University Theatre Production. Must audition and be cast to receive credit. May be repeated. Graded on S/U basis only.

THEATR 2510--Introduction to Theatre Design (3). Design principles and elements as they relate to theatre performance. Use of drawing and creative 3-dimensional exercises to develop design concepts. Recommended to students interested in directing, playwriting, and design for the theatre.

THEATR 2710--Introduction to Theatre History (3). Survey of major periods emphasizing the produced play in its historical context.

THEATR 2800--Principles of Script Analysis (3). Methodologies of script analysis for theatrical purposes. Extensive writing will be required. Prerequisite: ENGLISH 1000.

THEATR 2920--Beginning Playwriting (3), (same as English 2560). Study and practice of playwriting fundamentals; emphasizes the one-act play.

THEATR 3005--Topics in Theatre (cr. arr.). Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated with departmental consent. Prerequisites: junior standing and instructor's consent.

THEATR 3005H--Topics in Theatre - Honors (cr.arr.). Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated with departmental consent. Prerequisites: junior standing and instructor's consent. Honors eligibility required.

THEATR 3100--Summer Repertory Theatre (cr.arr.). Participation in production of Summer Repertory Theatre. May be repeated. Prerequisite: instructor's consent.

THEATR 3200--Performance of Literature (3), (same as English 3570 and Communication 3570). Analysis and oral interpretation of literary works. Graded on A/F basis only. Prerequisite: sophomore standing.

THEATR 3230--Vocal Performance Technique (3). This course develops the ability to use the voice as a creative and expressive instrument through a comprehensive study of speech and voice dynamics which include the exploration of proper breathing, relaxation, tonal placement, and non-regional articulation.

THEATR 3300--Production Workshop II (1). Credit earned in a technical project in support of a University Theatre production. Scenery, costumes, properties, or other responsibilities. May be repeated to total of 3 hours. Prerequisite: instructor's consent. Graded on S/U basis only.

THEATR 3310--Costume Crafts (3). To develop the skills and techniques needed in

executing costume crafts, including millinery, corsetry, painting and dyeing, and embellishment.

THEATR 3320--Theatrical Patternmaking (3). Patternmaking for the theatre. Basic knowledge of sewing required. Prerequisite: THEATR 1340 or TAM 1200.

THEATR 3330--Advanced Costume Construction (3). Learn advanced techniques in theatrical costuming through lecture, demonstration and practical application. Prerequisite: THEATR 1340 and instructor's consent.

THEATR 3340--Scene Painting (2). Studio practice in techniques of painting scenery for the Theatre. Prerequisite: instructor's consent.

THEATR 3420--Acting I (3). Basic theory, practice of acting, stage movement.

THEATR 3430--Acting II (3). Script analysis, character and role development in modern and contemporary non-realistic theatrical forms. Rehearsal and presentation of scenes, based on contemporary dramatic and performance theory. Prerequisite: THEATR 2800.

THEATR 3530--Computer Graphics in Theatre Design (3). The use of graphics and CAD software to create theatre designs. The course will progress from 2D CAD drafting to 3D image rendering. Prerequisite: sophomore standing.

THEATR 3540--Advanced Stage Makeup (1). Advanced practical experience in stage makeup techniques. projects might include: mask making, ventilation, advanced character applications. Practice in application. Graded on A/F basis only. Prerequisite: THEATR 1360 and instructor's consent.

THEATR 3550--Sound Design (3). Beginning sound design for the theatre. Units include basics of researching, recording, and augmenting sound for the use in a theatrical production. Prerequisite: THEATR 1320 and instructor's consent.

THEATR 3560--Scene Design (3). Theory/practice of scenic design for the theatre with emphasis on the evolutionary process of design from concept to reality. Prerequisite: THEATR 2510, 3530, or instructor's consent.

THEATR 3600--Theatrical Directing (3). Theory and practice of play directing, script selection, casting, play analysis, rehearsal and performance. Prerequisite: THEATR 2800 and instructor's consent.

THEATR 3700--World Dramatic Literature (3), (same as English 3170). Survey of world drama from Greeks to present, focusing on structure, theory and performance. Prerequisite: THEATR 2710 and 2800.

THEATR 3750--New American Theatre (3). Survey of drama of the most recent decade as it documents contemporary mores and amplifies cultural themes. Prerequisite: THEATR 2800.

THEATR 3770 The Theatre Experience: From Page to Stage and Screen (3). Stimulates critical thinking about theatrical performance, its relationship to the society of which it is a part, and its past and present significance as an art form, a cultural resource, a social institution, and a commercial enterprise. Prerequisite: sophomore standing; restricted to Journalism Majors.

THEATR 3920--Intermediate Playwriting (3).(same as English 3560). Intermediate study of the writing process as applied to theatre, leading to the creation of a full-length play to be considered for production. Prerequisite: THEATR 2920 or ENGLSH 2560.

THEATR 3930--Screenwriting for Television and Film (3).(same as Film Studies 3930). Fundamentals of storytelling utilizing tools and structure used by television and film. Prerequisite: ENGLSH 1000.

THEATR 4005--Topics in Theatre (cr. arr.).Organized study of selected topics. Topic and credit may vary semester to semester. May be repeated with department consent. Prerequisite: instructor's consent.

THEATR 4220--Acting III (3).Period acting styles. Special projects in interpretation, rehearsal, creation of roles. Prerequisites: THEATR 2800 and 3420 or 3430.

THEATR 4240--Theory and Practice of Theatre of the Oppressed (3).(same as Peace Studies 4240). Theory and practice of Augusto Boal's liberatory interactive theatre process, including application of techniques of specific social issues. Prerequisite: instructor's consent.

THEATR 4460--Musical Theatre Performance (3).(same as Music-Ensemble 4460). A practical study for the actor of theatrical songs through character analysis, lyric interpretation and movement. A performance course. Prerequisite: instructor's consent.

THEATR 4530--Stage Lighting Design (3).Theory and practice of lighting for theatre production. Prerequisite: instructor's consent.

THEATR 4570--Theatrical Costume Design (3).Basic practice in costume rendering using

charcoal, crayon, ink, watercolor and other media. Costume history, both theatrical and general, will be surveyed. Basic problems of theatre design will be considered. Prerequisite: THEATR 1320 or 1340.

THEATR 4600--Advanced Directing (3).Advanced principles of theatrical directing; emphasizes stylistic variations. May be repeated once. Prerequisite: THEATR 3600 and instructor's consent.

THEATR 4700--Studies in Theatre History (3).Advanced survey of major periods, movements. Prerequisite: senior standing. Repeatable to a maximum of 6 hours with instructor's consent.

THEATR 4720--American Musicals (3)(same as Music-General 4376). Historical survey of the development of the 20th-Century American Musical in Theatre and Film.

THEATR 4730--Theatre Architecture (3).Examines the renovation of existing buildings into workable theatre spaces. Includes history of theatre architecture. Prerequisite: instructor's consent.

THEATR 4800--Studies in Dramatic Theory (3).Analysis of history, meaning and function of selected concepts of contemporary dramatic and performance theory. Prerequisite: senior standing.

THEATR 4820--Studies in Dramatic Literature (3).Advanced survey of major movements, periods, writers. Prerequisite: senior standing. Repeatable to a maximum of 6 hours with instructor's consent.

THEATR 4830--Studies in Dramatic Criticism (3).Survey of methods of criticism of scripts and performances. Prerequisite: senior standing.

THEATR 4920--Advanced Playwriting: Problems (3).(same as English 4560). Advanced study of the writing process as applied to theatre, including theory and practice of special playwriting problems and techniques. Prerequisite: THEATR 3920 or ENGLSH 3560.

THEATR 4930--Adaptation of Literature for the Stage (3).(same as English 4570). This upper-division course will explore adaptation principles and practices with a variety of forms of literature that were not originally written for the stage.

THEATR 4935--Adaptation of Literature for Film (3).(same as FILM S 4935 and ENGLSH 4580). This upper-division course will explore adaptation principles and practices with a variety of forms for literature that were not originally written for film.

THEATR 4940--Internship in Theatre (1-6).Internship: Experimental learning as an actor, designer, technician, publicist/manager, or dramaturg with an approved theatre company. Prerequisites: junior/senior standing and departmental consent. S/U graded only.

THEATR 4960--Directed Readings in Theatre (1-3).Independent reading, reports. Prerequisite: instructor's consent.

THEATR 4990--Capstone in Theatre (1).Theatre experiences and knowledge gained by students are connected through compilation of resume and portfolio. Student will meet with faculty jury to discuss his/her body of theatrical work. Required for senior theatre students. Prerequisite: instructor's consent. Graded on S/U basis only.

The Robert J. Trulaske Sr., College of Business, established in 1914, educates students for professional opportunities and responsibilities in the private and public sectors. The college includes the School of Accountancy (the first established at a major public university) and the departments of Finance, Management and Marketing. The college offers an undergraduate degree in business administration, a combined bachelor's and master's degree program in accountancy, master's degrees in business administration, and doctoral degrees in accountancy and business.

Students' educational experiences are enhanced through the scholarly activities of the faculty, who conduct research on significant, timely issues. Students in the college are exposed to relevant theories and concepts applied to real-world operations of private and public enterprises. Students gain added practical insights through internships, field projects, guest speakers and executives-in-residence. The college's agencies provide information, research, continuing education and managerial assistance to practitioners and organizations throughout Missouri and in other states.

ADMISSION

Freshmen

Freshman applicants to the Robert J. Trulaske Sr., College of Business (students applying to MU from high school) will be admitted to the lower division if they meet campus admission requirements. Admission to the lower division does not guarantee admission to the BSBA degree program and emphasis areas or the Accountancy program. Admission to an upper-level emphasis area is based on the UM cumulative grade of record and completion of the Professional Development requirements.

Transfer Students

Students in good standing in another school or college at MU must submit a Transfer of Division form to the Trulaske College of Business. Such students may be admitted to the lower division if they can complete degree-program admission requirements by the completion of 60 credits (75 credits for Accountancy students).

External transfer students who request admission to the Trulaske College of Business will be admitted to the lower division if they can complete degree-program admission requirements by the completion of 60 credits. Students are encouraged to have their transcripts evaluated by an academic adviser in the Trulaske College of Business prior to their enrollment at MU.

Course work completed with a grade of D- or better at an accredited two- or four-year institution will be accepted if the courses are appropriate equivalents of the required MU courses and if the equivalent MU courses do not require a grade in the C range. The college does not accept developmental or vocational/technical course work.

Credits transferred from accredited community or junior colleges usually include general education, upper level or pre-accountancy admission requirements and unrestricted elective courses. The Trulaske College of Business accepts a maximum of 64 credits from a community or junior college toward the bachelor's degree. When more than 64 credits have been completed, the additional courses are evaluated on a course-by-course basis for applicability to lower-division requirements.

A student holding an associate of arts degree from an accredited Missouri Community College will have fulfilled general education requirements. However, this does not exempt the student from satisfying the specialized degree, major or emphasis prerequisites of the college in the areas of accounting, economics, math and statistics.

Students transferring to the college without an associate of arts degree will have their transcripts evaluated on a course-by-course basis and must meet the entrance requirements of the college in the same way as other MU students. Students transferring to the Trulaske College of Business will be required to meet the Professional Development requirements at the time of transfer.

Probationary Admissions

Students are placed on academic probation if they are admitted to the college without fully meeting the good-standing requirements of the school. (See the section on Probation Suspension and Dismissal for these requirements.)

Admission to the Business Administration Program

Capacity Limitations

Admission into the upper-level Bachelor of Science in Business Administration (BSBA) degree program is highly competitive, because enrollment is limited. Each of the individual emphasis areas (Economics, Finance and Banking, International Business, Management, Marketing or Real Estate) has its own capacity limitation. Students who have earned a 3.25 minimum UM cumulative GPA or higher will be guaranteed admission to the upper level emphasis area of their choice. Other students with at least a 2.6 minimum UM cumulative GPA will be admitted on a space available basis.

Preprofessional Information

To apply to the upper-level BSBA and a related emphasis area program, a student must have completed a minimum of 45 credits and met the Professional Development Program requirements. A student must be admitted by the semester after the 60th credit hour is earned. The following courses must be among the credits completed or in process at the time of application:

*ACCTCY 2036: Accounting I OR 2136H

*ACCTCY 2037: Accounting II OR 2137H

**ECONOM 1014 Principles of Microeconomics

**ECONOM 1015: Principles of Macroeconomics

- ENGLISH 1000: Exposition and Argumentation
- MANGMT 1010: Contemporary Business Practices
- MATH 1100: College Algebra
- MATH 1300: Finite Mathematics
- MATH 1320: Elements of Calculus
- STAT 2500: Introduction to Probability and Statistics

* Both ACCTCY 2036 and ACCTCY 2037 must be taken in residence or both must be taken at another campus.

** ECONOM 1051H may be taken in place of ECONOM 1014/1024 and ECONOM 1015.

Admission to BSBA Degree and Emphasis Areas

In addition to meeting the previous requirements, students are admitted to an upper-level BSBA emphasis area based on UM cumulative grade point average. Students with exceptional circumstances may ask to be considered for admission based on both grades and other factors.

Students request an emphasis area when applying to the upper-division BSBA degree program. If the requested emphasis area is at capacity, students who qualify for admission to the upper-division BSBA degree program are given the opportunity to choose another emphasis area. Students are notified by email when they are eligible to apply for upper-level status. Students are admitted to upper level in February and September of each year.

Students who complete 60 credits without gaining admission to an upper-level BSBA emphasis area will not be eligible to re-enroll in the Trulaske College of Business, unless special accommodations have been made in the Undergraduate Advising Office.

Admission to the Joint BSAcc and MAcc Degree Program

In the School of Accountancy, the bachelor's and master's degree programs are merged into a 150-credit program. To apply for admission to the BSAcc/MAcc degree program, a student must have completed or be in the process of completing a minimum of 54 credits but no more than 75 hours. The following are program prerequisites:

ACCTCY 2036: Accounting I ACCTCY 2037:

Accounting II

ACCTCY 2136H: Honors Accounting I and ACCTCY 2137H: Honors Accounting II

ECONOM 1014 OR 1024: Principles/Fundamentals of Microeconomics

ECONOM 1015: Fundamentals of Macroeconomics

ENGLISH 1000: Exposition and Argumentation

MANGMT 1010: Contemporary Business Practices

MATH 1100: College Algebra

MATH 1300: Finite Mathematics

MATH 1320: Elements of Calculus

STAT 2500: Introduction to Probability and Statistics

Both ACCTCY 2036 and ACCTCY 2037 must be taken in residence or both must be taken at another campus.

Minimum GPAs to be eligible to apply include each of the following:

3.0 UM cumulative grade of record

3.0 GPA in ACCTCY 2036/ACCTCY 2136H and ACCTCY 2037/ACCTCY 2137H

3.0 GPA over the following pre-accountancy courses:

ACCTCY 2036/2136H

ACCTCY 2037/2137H

ECONOM 1014 or 1024

ECONOM 1015

ENGLISH 1000

MATH 1300

MATH 1320

STAT 2500

Admission decisions will be made at the end of the spring semester for *fall admissions only*. Meeting the minimum requirements does not guarantee admission. Admission cutoffs will be revised each year in order to control accountancy undergraduate enrollment at a maximum of 230 students, the limit that can be served with current authorized faculty staffing and still maintain program quality and meet accreditation guidelines. Students meeting the minimum requirements will be selected for admission based on their ranking of a combination of cumulative GPA of record and average GPA for the set of pre-accountancy courses until the enrollment for that year is reached.

Students not admissible to the 150 credit hour degree program in the School of Accountancy may meet Trulaske College of Business admission requirements and transfer into a business administration emphasis area, depending on available space.

DEGREE CORE REQUIREMENTS

Credit Hour Requirements

In addition to University general education and graduation requirements, students must meet the following requirements:

- Students must complete a minimum of 120 credits from accredited colleges or universities for all BSBA emphasis areas except International Business, which requires 132 credits. (See separate section for international business major requirements.) Additionally, the joint BSAcc and the MAcc degree program requires students to complete a minimum of 150 credit hours.
- In completing the 120 credits for graduation, students may

count no more than 30 credits within their emphasis area.

A student who has a degree in another curricular area may receive a Bachelor of Science in Business Administration degree upon completion of all requirements for the degree, provided the courses completed include at least 24 credits taken on the MU campus.

Professional Development Program

In addition to completing required coursework to earn a Bachelor of Science, Business Administration degree, students must fulfill the requirements of the Professional Development Program (PDP). The goal of the Professional Development Program is to offer opportunities to all BS BA students to develop core competencies and values necessary for success in their business careers.

As a graduation requirement, the program is comprised of the following:

1. Completion of designated professional activities to acquire points each semester for admission to the upper division. Once admitted to the upper division, students will continue to earn points each semester to meet the graduation requirement.
2. Completion of the Professional Development Course the semester immediately following admission to the upper division.
3. Completion of a practicum course once admitted to the upper division. This can include an internship or substantial service-learning project to be approved by the program director.

If a student fails to meet the requirements of the Professional Development Program at either the lower or upper division the student is ineligible to continue in the Trulaske College of Business. Students have one semester to make up any deficiencies in PDP points. The deficiency in points must be made up in the consecutive semester (excluding summers). No points may be carried over into subsequent semesters should a student exceed the minimum.

Professional Development Graduation Requirement

- The student must earn the required professional development points each semester.
- The student must earn a C- (or higher) in the Professional Development Course.
- The student must earn a C- (or higher) in the required practicum for credit.

Capstone

Students must complete MANGMT 4970: Strategic Management to meet the capstone requirement.

Required Work in Residence

Students must complete 30 of the last 36 hours of courses in residence at MU, enrolled in the Trulaske College of Business.

Latin Honors

Graduation with Latin Honors is determined by grade point average from either the last 50 undergraduate credits in the UM system or overall UM System undergraduate credits, whichever is higher. To be eligible for Latin Honors, a student must complete the last 50 undergraduate credits within the UM System. Grade point average requirements for Latin Honors are 3.5 for *cum laude*; 3.7 for *magna cum laude* and 3.9 for

summa cum laude.

Academic Assessment

Students are required to complete a college-wide assessment exam in addition to a University assessment exam during their capstone course.

ACADEMIC REGULATIONS

Credits by Examination

The Trulaske College of Business accepts CLEP subject examinations, departmental exams and Advanced Placement (College Board) credit. More information may be obtained from academic advisers in the Trulaske College of Business and the Credit by Examination section in the beginning of this catalog.

Maximum Credits Enrolled

A student with a cumulative GPA of 3.0 or higher may register for more than 18 credits for a fall or spring term, with permission of the assistant dean of undergraduate programs.

Independent Study

Contact the Center for Distance and Independent Study for a listing of courses that may be taken online. Students must receive approval from their academic adviser prior to registering.

Academic Standing - School of Accountancy

Accountancy students are in good academic standing if they maintain a cumulative UM grade point average of 3.0 or higher for all coursework *subsequent* to admission to the 150-hour Accountancy program. Failure to meet this requirement will result in a probationary semester, and if not rectified, dismissal from the program. Accountancy students are subject to the probation and dismissal policies set by the Trulaske College of Business (see below). An undergraduate who has been ineligible to enroll for a period of one year may be readmitted only on the approval of the director of the 150-hour program in accountancy. As a condition of readmission, the director may set forth stipulations with regard to minimum standards of academic work that must be maintained by the student. After readmission, if the student again becomes ineligible to enroll, his or her ineligibility is considered permanent. Accountancy students entering the graduate portion of the 150-hour program should consult The Graduate School Catalog for academic standing policies for graduate students.

Probation, Suspension and Dismissal

Grade Point Average Requirements

Minimum GPAs must be maintained in the following categories to remain in good standing with the Trulaske College of Business:

- Students in the Upper Level, must maintain a 2.50 GPA in all MU accounting and business courses.
- All students must earn a 2.00 term and cumulative GPA on courses completed in the UM system.

Probation

See the Academic Standing section in the front of this catalog.

A student in good academic standing whose term GPA subsequently falls below 2.0 but is 1.0 or above (0.5 or above for a first term Freshman) is placed on academic probation.

A student whose cumulative GPA for courses offered by the Trulaske College of Business is below a 2.0 is placed on probation. (Courses offered by the college are those with the curricular designations of ACCTCY, ECONOM, FINANC, MANGMT and MRKTNG.) This only applies to students admitted to an upper level BSBA emphasis.

A student placed on academic probation must establish a 2.0 term GPA, a 2.0 UM System cumulative GPA and a 2.0 MU Trulaske College of Business cumulative GPA within two successive terms of enrollment; otherwise, the student is ineligible to enroll.

Students placed on probation may become ineligible to enroll in the Trulaske College of Business at the end of the first term of probation if they become subject to one or more of the first three dismissal provisions below.

Dismissal

See University requirements outlined in the Academic Standing section of this catalog.

Students become ineligible to enroll in the Trulaske College of Business if one or more of the following occurs:

- The fall or spring term GPA falls below 1.0.
- For a student who has been admitted to upper level, the cumulative GPA for courses offered by the Trulaske College of Business is below a 2.0 GPA. This includes all MU accountancy and business courses regardless of whether the courses are completed before or after admission to a BSBA emphasis area.
- The student fails to remove probationary status at the completion of the second successive term on probation. A student whose second successive term is a summer session is normally allowed another semester to remove probationary status, unless that student becomes subject to the second or third provision listed above.

A student who has been ineligible to enroll for a period of one year may be readmitted only on the approval of the assistant dean of the college. As a condition of readmission, the assistant dean may set forth stipulations about minimum standards of academic work that must be maintained by the student. After readmission, if the student again becomes ineligible to enroll, his or her ineligibility is considered permanent.

Satisfactory/Unsatisfactory Grades

The S/U grading system is limited to unrestricted elective courses.

Enrolling in Other Institutions

The Trulaske College of Business has no restrictions on a student enrolling in another institution simultaneously as long as university residency requirements are met.

Time Limit on Completion

A student must complete requirements for an undergraduate degree program in the Trulaske College of Business within 10 years of his or her initial enrollment as a first-time freshman in order to graduate under program requirements in effect at the time of initial enrollment.

STUDENT SERVICES

Advising

Students admitted to a degree program in the college are assigned an academic adviser. The academic adviser works with students in determining course work needed to complete a degree. In addition, students are assigned a faculty advisor in their emphasis area who can assist with career planning and selection of professional electives and emphasis support courses. Students are responsible for determining an appropriate schedule of courses each semester and are encouraged to meet with their academic advisor for assistance.

Business Career Services

Business Career Services is a valuable resource for all levels of students. The office provides individual assistance with students in career coaching, guidance, and advice in areas such as resume and cover letter construction, revision, interview preparation, salary negotiations, and much more. Business Career Services partners with various companies serving as a liaison to bridge employer with employee. Company sponsored events such as field trips and detailed information sessions give students first-hand knowledge of what is needed to receive job offers upon graduation from the Trulaske College of Business. All students are encouraged to register with the office and start utilizing these services as early as Freshmen year.

Professional Development Program

The mission of the Professional Development Program is to provide every BS BA student with substantive professional development experiences during their degree program. Professional Development refers to activities, both inside and outside of the classroom, that provide students with the opportunity to develop and practice skills that are needed to perform successfully in professional jobs they may seek upon graduation. Students who graduate with a BS BA degree from the Robert J. Trulaske Sr., College of Business will have content knowledge and advanced professional competencies that are necessary for success in the business world.

The accountancy program at the University of Missouri has long been nationally recognized for its excellence. MU accountancy faculty have published leading textbooks and research articles and have served at high levels in numerous professional accounting associations. The school offers the combined BSAcc and MAcc degrees.

Students wanting to explore accountancy as a major should take ACCTCY 2036: Accounting I.

Major Program Requirements - Accountancy

The undergraduate and master's degree programs with a major in accountancy are merged into an integrated 150-credit curriculum to provide high-quality preparation for a career as a professional accountant in public accounting, business or government.

The Bachelor of Science with a major in Accountancy is awarded along with the Master of Accountancy degree upon satisfactory completion of the 150-credit, integrated curriculum. In this integrated program, a minimum of 24 credits in accountancy courses at the 3000-level or above must be completed at MU.

School of Accountancy Graduation Requirements

Course requirements ensure that at least 40 percent of a student's

course work is earned in divisions other than business. The merged BSAcc and MAcc degrees require 150 total credits.

General Education*	23
Pre-Accountancy Courses	28
Accountancy Foundation Courses	9
Required Core Courses	30
Required Accountancy Courses	21
Professional Electives	9
Senior Capstone	3
Graduate Level Coursework**	30

**See the *Graduate Catalog* for course descriptions.

ECONOM 1051H satisfies both ECONOM 1014 or 1024 and 1015 requirement.

One humanities or science must be 2000-level or above.

Professional electives can be non-business electives (2000+ courses) or business electives (3000+ courses) approved by an academic advisor.

Elective must be approved by advisor so that international studies requirement is met.

Some students get an opportunity to do a spring internship for 3 credit hours during the 8th semester. Please see academic advisor to discuss courses that can be taken with a spring internship.

Requirements for Master's Degree Only

A student who has a degree in a different curricular area or a bachelor's degree in accountancy from another college or university may earn a master's degree from the School of Accountancy upon completion of the requirements for the degree. The student's program must include a minimum of 30 credits beyond the bachelor's degree (or its equivalent) selected from courses carrying graduate credit. In addition, the student must meet the following stipulations:

At least 15 of the 30 credits must be completed in 8000-9000-level courses.

A minimum of 24 credits of advanced study must be completed under MU faculty.

A maximum of 6 graduate credits may be transferred from another college or university.

All requirements must be completed within eight years from the time of initial enrollment.

See the *Graduate Catalog* for more information including enroll-

ACCOUNTANCY COURSES**ACCTCY 2010--Introduction to Accounting**

(3).Introduction to accounting for non-business majors. Emphasis on introducing students to business operations, as well as preparing and using management information and financial accounting information for business decisions (does not count as either ACCTCY 2036 or 2037).

ACCTCY 2026--Accounting I (3).An introduction to the field of accounting, this course covers the fundamentals of financial accounting. Business students at UMC must have advisor's approval. Credit may not be earned for both ACCTCY 2026 and 2036. Course only offered through the Center for Distance and Independent Study.

ACCTCY 2027--Accounting II (3).This course covers the fundamentals of managerial accounting and additional topics in financial accounting. Business students at UMC must have advisor's approval. Credit may not be earned for both ACCTCY 2027 and 2037. Prerequisite: ACCTCY 2026. Course only offered through the Center for Distance and Independent Study.

ACCTCY 2036--Accounting I (3).First half of two-part course focusing on the business environment and the use of managerial and financial accounting information for decision making in various business settings. Emphasizes the use of accounting information about a retail company (sole proprietorship) by internal and external users, followed by an introduction to other forms of business and, then, planning for corporate operations. Prerequisite: sophomore standing.

ACCTCY 2037--Accounting II (3).Second half of two-part course focusing on the business environment and the use of managerial and financial accounting information for decision making in various business settings. This half emphasizes the use of accounting information about a manufacturing company (corporation) by internal and external users. Prerequisite: ACCTCY 2036 or 2136H.

ACCTCY 2136H--Honors Accounting I (3).First part of two-part course focusing on the nature and use of managerial and financial accounting information for decision making in various business settings. Emphasizes use of accounting information by internal and external users. Prerequisite: sophomore standing in Accounting or Business, 3.3 or higher GPA. Honors eligibility required.

ACCTCY 2137H--Honors Accounting II (3).Continuation of Accountancy 2136H. Prerequisite: C or better ACCTCY 2136H. Honors eligibility required.

ACCTCY 2258--Computer-Based Data Systems (3).Introduces the computer as a tool in the efficient operation of a business. Skills developed in the course include electronic information retrieval, information analysis using a spreadsheet, what if analysis macro development, and information presentation. In addition, computer components, data storage, networks, and information technology are discussed. Prerequisite: ACCTCY 2036 or 2136H.

ACCTCY 3326--Financial Accounting Theory and Practice I (3).Institutional structure, conceptual framework, and reporting standards and practices of financial accounting,

with special emphasis on accounting for assets. Prerequisite: ACCTCY 2037 or 2137H.

ACCTCY 3328--Accounting Information Systems (3).Introduction to accounting information systems (AIS). General AIS concepts. Transaction processing systems and accounting cycles. Alternative platforms for computerized transaction processing. Database management and data modeling. Control concepts and design. Prerequisite: ACCTCY 2258.

ACCTCY 3346--Financial Accounting Theory and Practice II (3).Continuation of Accountancy 3326, with special emphasis on income recognition and accounting for liabilities and ownership equity. Prerequisite: ACCTCY 3326.

ACCTCY 3347--Cost and Managerial Accounting (3).Activity based and traditional job order and process cost systems for service, merchandising, and multinational manufacturing companies; Cost accounting techniques and procedures for financial reporting by multinational companies. Strategic focus to management accounting measurement and reporting. Standard costs and variances, capital budgeting. Prerequisites: ACCTCY 2037 or 2137H and 2258.

ACCTCY 4301--Topics in Accounting (1-3).Independent investigations, reports on approved topics. Prerequisites: instructor's consent.

ACCTCY 4353--Introduction to Taxation (3).Introduction to the structure and conceptual foundation of the U.S. federal income tax system for individual taxpayers. Topics include income recognition, deductions, property transactions, trusts, and family wealth planning. This course also introduces students to legal tax research and preparation of individual income tax returns. Prerequisite: ACCTCY 2037 or 2137H.

ACCTCY 4356--Financial Accounting Concepts (3).Current issues in the financial reporting of business corporations to external parties. Not open to accountancy majors. Prerequisite: ACCTCY 2037 or 2137H.

ACCTCY 4365--Governmental Accounting and Budgeting (3).Introduction to government and not-for-profit accounting. Concepts and principles of fund accounting, budgeting, auditing, and financial reporting in government and not-for-profit entities. Prerequisite: ACCTCY 3326.

ACCTCY 4384--Auditing Theory and Practice I (3).Introduction to the auditing profession, assurance function, and generally accepted standards for conducting audits. Prerequisites: ACCTCY 3328 and 3346.

ACCTCY 4940--Professional Accounting Internship (3-6).Provides full-time professional accounting work experience of at least eight weeks duration. Completion of first 105 hours of 150-hour accountancy curriculum (or equivalent) and consent of Internship Coordinator. Graded on S/U basis only.

Department of Finance

Through the study of finance, students learn to independently analyze security markets, understand the basic valuation techniques and use their knowledge to make investment decisions. In addition, students learn basic theoretical concepts in corporate finance and their application to corporate financing and invest-

ment decisions. Course work focuses on the areas of investments, portfolio management, real estate appraisal, financial institutions and corporate finance.

Department of Management

Management is defined by the Academy of Management as including “all processes, structures, and behaviors that are related to the work of organizations, as well as the dynamics of industries, economies, cultures, and other environmental forces that affect organizations and their employees.” Management course work at MU is quite diverse, covering the areas of human resource management, human behavior in organizations, organization theory, strategic management, entrepreneurship, information systems, e-commerce, operations management and business law.

Department of Marketing

Marketing focuses on creating and managing customers. It deals with the strategies, tactics and business processes involved in researching markets, deciding which markets and segments to pursue, identifying what unique value to provide, and then assembling the products, services, people and partner firms needed to build, communicate and deliver that value.

Exploratory Course

Students wanting to explore business administration as a major should take MANGMT 1010: Contemporary Business Practices.

Double Emphasis

Students may have a dual emphasis of Finance and Real Estate, or may add on economics emphasis to any other BSBA emphasis program.

Major Program Requirements - Business Administration

Students in the Trulaske College of Business are in either the lower level (undeclared) or the upper level (admitted to an emphasis area). Students entering the Trulaske College of Business usually enter the lower level, while they take University general education and business preparation courses. The first two years of all business programs (except international business and accounting) involve the same course sequences. A student typically applies to the upper level at the end of the sophomore year or the beginning of the junior year.

A student may count a maximum of 30 credits in their emphasis area to meet the 120-credit requirement for the undergraduate degree.

Requirements above and beyond general education requirements are listed under upper level admission courses.

Major Core Requirements

Course requirements ensure that 40 percent of a student’s course work is earned in divisions other than business.

Emphasis in Economics

The sequence of courses for the BSBA with an emphasis in economics introduces the student to the tools of economic analysis and to their use in decision-making. It also may provide training in internal and external forecasting. Such analytical techniques are appropriate for industrial, commercial and financial organizations as well as government agencies.

Emphasis Areas

Emphasis in International Business

International business is a joint degree program offered by the College of Arts and Science and the College of Business. The program incorporates foreign language, geographic region and cultural environment courses with core and international business courses. Completion of this degree program requires a minimum of 132 credits.

To complete this course of study, students must be accepted in both the Bachelor of Arts in International Studies program in the College of Arts and Science and the Bachelor of Science in Business Administration program in the College of Business.

Emphasis in Management

Management is the directing and guiding of activities to produce a desired result, product or service. Managers are repeatedly required to make decisions that will have far-reaching effects. The basic functions all managers perform are planning, organizing, staffing, motivating and directing. Professional education in management can lead to a variety of career opportunities in the private and public sectors.

Minor in Business

The business minor has the same rigor and content as the fundamental courses taken by business students. It provides flexibility in undergraduate studies and better prepares students for jobs and for graduate school. The business minor includes courses that are highly complementary. For most students, the requirements for the business minor are far more valuable than a similar number of courses in one or two areas.

15 of the 18 hours must be taken in residence and a 2.0 GPA in all business courses and those required for the business minor is required. See a business advisor for questions regarding the business minor.

FINANCE COURSES

FINANC 1000--Principles of Finance (3). Financing business, consumer, and government activity; stocks, bonds, real estate, and financial markets; risk; insurance; inflation; cash and income management; capital accumulation and appreciation. Students admitted to COB upper level degree program cannot enroll.

FINANC 2000--Survey of Business Finance (3). An overview of the global financial system, financial markets, financial institutions, and principles of financial management. Students admitted to COB upper level degree program cannot enroll.

FINANC 3000--Corporate Finance (3). Financial decision-making in a corporate environment. Time value of money, capital budgeting, cost of capital, working capital management and financial instruments issued by the firm. Prerequisites: completed 45 semester hours, ACCTCY 2036 and 2037, STAT 2500, in addition to ECONOM 1015 or 1014 or 1024 and 1015.

FINANC 3300--Personal Risk Management and Insurance (3). Teaches the importance of risk in personal endeavors and the intelligent handling of such risk. Life, health, auto, homeowner and liability risks are treated. Prerequisite: sophomore standing.

FINANC 4010--Financial Management (3). Theory and techniques of financial management, study of firm valuation, dividend policy, capital budgeting and capital asset pricing. Prerequisite: FINANC 3000.

FINANC 4020--Investments (3). Security valuation and analysis, formulation of personal and professional investment programs. Prerequisite: FINANC 3000.

FINANC 4020H--Investments - Honors (3). Security valuation and analysis, formulation of personal and professional investment programs. Prerequisite: FINANC 3000. Honors eligibility required.

FINANC 4030--Financial Intermediaries and Markets (3). Functions of intermediaries in the aggregation and allocation of funds, creation and transfer of assets, and distribution of risks. Regulation of financial institutions; financial institutions as instruments of public policy. Prerequisites: FINANC 3000 and ECONOM 3229.

FINANC 4110--Financial Management Policy (3). Application of the concepts and tools of finance to cases in working capital management, capital budgeting analysis and capital structure decisions. Prerequisite: senior standing and FINANC 4010; Corequisites: ACCTCY 3300.

FINANC 4120--Security Analysis (3). Classifies and analyzes securities, markets, industries. Formulation of investment policy for institutions, aggressive personal investors. Prerequisites: FINANC 4020, senior standing.

FINANC 4130--Management of Financial Institutions (3). Operating principles of major financial intermediaries, including commercial banking, savings, insuring, lending and investing institutions. Analysis of cases; study of current problems. Prerequisite: FINANC 4030 and senior standing.

FINANC 4185--Problems in Finance (cr. arr.). Independent study, reports on selected

topics.

FINANC 4201--Topics in Finance (3). Selected topics in finance, insurance or real estate. Offered on an experimental basis.

FINANC 4220--Portfolio Management (3). Development and application of the principles of modern portfolio theory to financial assets. Analysis of the concepts of diversification, portfolio construction, portfolio revision, and use of types of financial assets in effective portfolio management. Prerequisite: FINANC 4020 and senior standing.

FINANC 4320--Financial Futures and Options (3). A basic overview of financial futures and options markets. Topics include: theoretical pricing of financial futures contracts and stock options, institutional aspects of these markets, hedging, and speculative strategies. Prerequisites: FINANC 4020 and senior standing.

FINANC 4500--Principles of Real Estate (3). Principle factors influencing land use, practices in real estate business. Prerequisites: FINANC 3000, MANGMT 3540 or senior standing.

FINANC 4510--Real Estate Appraisal (3). Procedures for valuing industrial, commercial, residential realty by market, income, replacement cost approaches. Case method, field investigations. Prerequisite: FINANC 4500 and senior standing.

FINANC 4520--Real Estate Finance and Investment (3). Financing of residential, commercial, and industrial real estate and real estate development. Instruments, institutions, and markets; role of government agencies; investment qualities of real estate. Prerequisite: FINANC 4500 and senior standing.

FINANC 4620--Investment Strategy of Warren Buffett (3). Survey and application of the investment philosophy and valuation methods of Warren Buffett. Prerequisites: FINANC 3000; Co-requisite: FINANC 4020.

FINANC 4720--International Finance (3). Application of domestic corporate finance to the international arena. Emphasis on international capital budgeting, working capital management, foreign exchange risk management, international capital markets, balance of payments, international monetary system, and exchange rate determination. Prerequisites: FINANC 4010, senior standing.

FINANC 4820--Investment Fund Management (3). Analysis and management of securities and markets by participation in the management of a student-run portfolio of publicly traded stocks and bonds. Prerequisites: FINANCE 3000, 4120 or 4620, instructor's consent. May be repeated for credit.

FINANC 4940--Professional Finance Internship (3). Provides students experience with financial activities in business organizations (or, occasionally, in a governmental or not-for-profit setting). Students are required to prepare and execute a plan of study approved by the instructor and the complete written assignments detailed in the plan. Prerequisite: FINANC 3000, College of Business students with a finance concentration or international business students with a finance emphasis, and instructor's consent.

MANAGEMENT COURSES

MANGMT 1010--Contemporary Business Practices (1-3). Course coverage includes an overview of the accountancy, finance, man-

agement and marketing majors and careers in each of these fields as well as the integrated nature of business. Prerequisite: freshmen and sophomores only. Graded on A/F basis only.

MANGMT 3000--Fundamentals of Management (3). Introduction to the basic concepts of management and organization; their application to operations and personnel management. Prerequisite: Completion of 45 semester hours.

MANGMT 3000H--Fundamentals of Management - Honors (3). Introduction to the basic concepts of management and organization; their application to operations and personnel management. Prerequisite: Completion of 45 semester hours. Honors eligibility required.

MANGMT 3100--Job Search Strategies (1). Provides relevant information and skills to help students interested in careers in business conduct an effective job search. Topics covered include self-assessment, company research, preparing a resume, interview skills, networking skills, and negotiation skills.

MANGMT 3200--Business and Society (3). This course emphasizes the ethical implications of managerial decisions and the relationships between businesses and stakeholder groups. Major topics include corporate governance, social responsibility, rights and obligations, and international business. Prerequisite: Admission to upper level business program.

MANGMT 3300--Introduction to Business Processes and Technologies (3). Introduces students to cross-functional business processes including both transactional and decision making forms. Current and emerging technologies used to facilitate efficient and effective action in these processes are explored. Prerequisite: ACCTCY 2258. Admission to upper level business program.

MANGMT 3540--Introduction to Business Law (3). The legal aspects of business related to society--introduction to the legal system; constitutional, criminal, tort law; contracts and sales law cases and problems; administrative regulation of business and consumer issues. Prerequisite: completion of 30 semester hours.

MANGMT 4010--Operations Management (3). Managerial analysis of operating problems, with emphasis on planning and control systems. Prerequisites: MANGMT 3000. Math Reasoning Proficiency Course.

MANGMT 4020--Human Resource Management (3). Manpower policies, procedures of business enterprise. Prerequisites: MANGMT 3000.

MANGMT 4030--Organizational Behavior (3). Examines theoretical constructs and research findings on human behavior in work organizations such as businesses, especially individual differences, dyadic relations and small group behavior. Prerequisites: MANGMT 3000.

MANGMT 4050--Management of Service Operations (3). Managing services, especially the operation's activity in service firms. Includes determining the service package, forecasting service demand, managing demand, capacity analysis and management, scheduling, cost control, service quality, and human resource management. Standardization, franchising, and service automation addressed. Prerequisite: MANGMT 3000.

MANGMT 4060--Project Management Fundamentals (3). Practical methods and

MANGMT 4330--Organizational Theory (3).Elements of the managerial process; emphasis on theory of organization structure and design and the impact of technology and culture on organization systems. Prerequisite: MANGMT 3000.

MANGMT 4330H--Organizational Theory - Honors (3).Elements of the managerial process; emphasis on theory of organization structure and design and the impact of technology and culture on organization systems. Prerequisite: MANGMT 3000.

Honors eligibility required.

MANGMT 4340--Crisis Management (3).Management strategies for media relations, image and identify building, internal communication, government relations, and crisis communication are explored through case studies, film, literature, and current popular culture. Prerequisites: MANGMT 3000. May be repeated for credit.

MANGMT 4420--Collective Bargaining (3).Content, negotiation, administration of collective labor agreements and settlement of disputes. Prerequisites: MANGMT 3000 and junior standing.

MANGMT 4450--Introduction to Electronic Commerce (3).An introduction to electronic commerce. Topics covered include definition and scope of e-commerce, tools and technologies used, strategies, and understanding of this dynamic field. Prerequisite: ACCTCY 2258.

MANGMT 4460--Electronic Commerce Security (3).Comprehensive introduction to the concepts, technologies, and applications of security in electronic commerce. Topics include security policy, privacy, cryptography, types of attacks, protection, detection and response strategies. Prerequisites: MANGMT 3000 and ACCTCY 2258.

MANGMT 4480--Business Data Communication and Networking (3).Introduction to fundamental principles of technical and managerial aspects of business data communications and networks. Basic concepts and principles, protocol layers, content distribution, routing, LAN, wireless, security, network management, multimedia networking, and new developments. Prerequisite: MANGMT 3000 and ACCTCY 2258.

MANGMT 4540--Legal Aspects of Business Organization and Operation (3).Includes agency and employment relationships, sole proprietorships, partnerships, and corporations, also operational aspects of business associations such as administrative regulation, taxation, bankruptcy, and trade regulation. Prerequisite: MANGMT 3540. Restricted to COB students.

MANGMT 4560--The Law of Commercial Credit Transactions (3).Purchase and sale of goods, services and real property-discussion includes drafts, notes, security agreements under the Uniform Commercial Code, and credit financing of real estate. Prerequisite: MANGMT 3540.

MANGMT 4620--Web Development Fundamentals (3).An introduction to the fundamentals of design, technology and project management aspects of developing websites. Some web based programming languages including HTML, CSS, JavaScript and ASP/VBScript and an introduction to Adobe Photoshop and Macromedia Dreamweaver. Prerequisite: MANGMT 3000 and ACCTCY 2258.

techniques for managing projects with selective attention to human resource issues. Includes project breakdown analysis, task network scheduling, resource allocation, and assessment/evaluation of project performance. Prerequisite: MANGMT 3000.

MANGMT 4110--Total Quality Management (3).Introductory, comprehensive approach to quality planning, analysis, and control. Applications orientation. Integrates customer needs, product and service design and delivery, and continuous improvement into all organizational activities. Examines full range of behavioral, technical, and organizational aspects relating to quality. Prerequisite: MANGMT 3000.

MANGMT 4120--Human Resource Management Law (3).Analysis and evaluation of legal and administrative regulations of terms of employment; Fair Labor Standards, discriminatory practices, safety and health regulations, other regulations. Prerequisites: MANGMT 4020 and senior standing.

MANGMT 4130--Advanced Organizational Behavior (3).Based upon behavioral science concepts and research findings directed toward understanding and explaining human behavior within organizations. Case studies, individual or team projects. Prerequisites: MANGMT 4030.

MANGMT 4185--Problems in Management (cr.arr.).Undergraduate students may select topics for study and investigation. Prerequisite: instructor's consent.

MANGMT 4201--Topics in Management (3).Selected current topics in management. Offered on an experimental, one-semester basis only. Prerequisite: will vary with different topics.

MANGMT 4201H--Topics in Management (3).Selected current topics in management. Offered on an experimental, one-semester basis only. Prerequisite: will vary with different topics. Honors eligibility required.

MANGMT 4210--Management Science (3).Further development of models and quantitative analysis as applied to production management problems. Management research design and experimentation; computer applications; quantitative case analyses; individual industrial field studies. Corequisite: STAT 3500 and ACCTCY 2258 or CMP SC 1050, junior standing. Math Reasoning Proficiency Course.

MANGMT 4220--Compensation Theory and Practice (3).Examines the empirical research and theory relating to the effect of compensation administration systems upon employee satisfaction and performance. Analysis of financial compensation systems and benefit programs in use in modern organizations. Prerequisite: MANGMT 4020.

MANGMT 4310--Production Systems Analysis (3).Constructive and quantitative analysis of models of inventory and production systems; uncertainty, risk, and policy considerations; systems design/simulation; analysis of networks; management problems in application. Prerequisite: MANGMT 4010.

MANGMT 4320--Selected Problems in Human Resource Management (3).Advanced studies in selected administrative and technical policies, practices in employee relations, with individual and group project work, research. Focuses on policy issues, research findings, advanced techniques. Prerequisites: MANGMT 4020.

MANGMT 4710--The Entrepreneurial Process (3).This course deals with critical thinking, logic, emotional intelligence, ethics and a problem solving/decision making frame in the context of the entrepreneurial business phases: opportunity identification; launch after gathering resources; managing growth and harvesting rewards. Co-requisite or prerequisite: MANGMT 3000.

MANGMT 4730--New Business Planning and Management (3).Analysis of the major functional areas of the start-up firm including accounting, finance, human resources, information systems, logistics, management, marketing, production/operations, purchasing and sales. Focus is also placed on generating ideas, scanning for environmental trends, and critically evaluating opportunities. Prerequisite: MANGMT 3000.

MANGMT 4750--Entrepreneurial Innovation Management: Enterprise Conception (3).(same as Industrial Manufacturing Systems Engineering 4750). Develop a new business and technology plan including marketing, finance, engineering, manufacturing, and production concepts in this joint College of Engineering and College of Business course. Prerequisite: sophomore standing or instructor's consent.

MANGMT 4760--Entrepreneurial Innovation Management: Enterprise Design (3).(same as Industrial Manufacturing Systems Engineering 4760). Expand on MANGMT 4750 business/technology plan into an operations plan; advertising facilities layout, selling and distribution channels, product designs, accounting procedures, manufacturing processes, and prototypes. Prerequisite: MANGMT 4750; sophomore standing or instructor's consent.

MANGMT 4765H--Entrepreneurial Innovation Management: Enterprise (3).(same as Industrial Manufacturing Systems Engineering 4765H). Expand on MANGMT 4750 business/technology plan into an operations plan; advertising facilities layout, selling and distribution channels, product designs, accounting procedures, manufacturing processes, and prototypes. Prerequisite: MANGMT 4750; sophomore standing or instructor's consent. Honors eligibility required.

MANGMT 4770--Entrepreneurial Innovation Management: Enterprise Operation (3).(same as Industrial Manufacturing Systems Engineering 4770). Perform the day-to-day operations for an enterprise conceived in MANGMT 4750 and designed in MANGMT 4760 by managing all business processes including finance, manufacturing, sales and delivery. Prerequisite: MANGMT 4750 and 4760; junior standing or instructor's consent.

MANGMT 4940--Professional Management Internship (3).Provides experience with management activities in business organizations (or, occasionally, in a governmental or not-for-profit setting). Students are required to prepare and execute a plan of study approved by the instructor and to complete written assignments detailed in the plan. Course only satisfies a professional elective requirement of the program. Prerequisite: COB student with a management concentration, and Internship Coordinator's consent. Graded on S/U basis only.

MANGMT 4970--Strategic Management (3).Enterprise-level case studies, simulations, similar exercises to integrate business functional decisions; assessment of environmental

influences on business. Development, implementation of company strategies. Prerequisites: MANGMT 3000, MRKTNG 3000, FINANC 3000 and 100 credit hours earned. Open only to seniors admitted to a professional program in the CoB.

MARKETING COURSES

MRKTNG 3000--Principles of Marketing (3).Institutions, processes, and problems involved in producing and transferring goods and services from producer to consumers; emphasis on economics and social aspects. Prerequisites: 45 semester hours; ECONOM 1014, 1024 or 1051.

MRKTNG 3000H--Principles of Marketing - Honors (3).Institutions, processes, and problems involved in producing and transferring goods and services from producer to consumers; emphasis on economics and social aspects. Prerequisites: 45 semester hours; ECONOM 1014, 1024 or 1051. Honors eligibility required.

MRKTNG 3942--International Business Internship (1-3).Internship in an international setting; Marketing Independent Study Coordinator must approve internship plan. Student and mentor reports required. See Marketing website for request form, internship requirements and details. Prerequisite: departmental consent; MRKTNG 3000. Graded on S/U basis only.

MRKTNG 3985--Problems in International Business (3).Independent study associated with a course taken for credit as part of an organized study abroad program. See Marketing website for request form. Prerequisite: departmental consent; MRKTNG 3000. Graded on S/U basis only.

MRKTNG 4000--Marketing Management (3).Further examination of marketing issues: market analysis, market research, positioning, products, pricing, promotion, distribution, relationship management, other topics. Prerequisites: MRKTG 3000 and junior standing.

MRKTNG 4000H--Marketing Management - Honors (3).Further examination of marketing issues: market analysis, market research, positioning, products, pricing, promotion, distribution, relationship management, other topics. Prerequisites: MRKTG 3000 and junior standing. Honors eligibility required.

MRKTNG 4050--Marketing Research (3).Procedures for defining marketing research problems; specifying information requirements; collecting, analyzing, interpreting, and presenting data for use in marketing decision making. Utilizes student projects and research-related computer assignments. Prerequisites: MRKTG 3000, STAT 3500 and junior standing.

MRKTNG 4185--Problems in Marketing (1-3).In-depth independent study of marketing topic(s). Student must have course plan (assignments, evaluation criteria, etc.) approved by faculty sponsor. See Marketing website for course plan form and details. Prerequisite: instructor's consent, MRKTG 3000, and junior standing.

MRKTNG 4201--Topics in Marketing (3).Selected marketing-related topics. Subjects may vary across semesters. Prerequisites: MRKTNG 3000 and junior standing.

MRKTNG 4220--Consumer Behavior (3).Dimensions of the consumer market and

decision-making process of consumers; analyzing economic, psychological and socio-psychological influences on consumer market and buying behavior. Prerequisites: MRKTNG 3000 and junior standing.

MRKTNG 4220H--Consumer Behavior - Honors (3).Dimensions of the consumer market and decision-making process of consumers; analyzing economic, psychological and socio-psychological influences on consumer market and buying behavior. Prerequisites: MRKTNG 3000 and junior standing. Honors eligibility required.

MRKTNG 4250--Retail Marketing (3).Strategies, policies, tactics, and procedures of marketing in a retailing environment. Prerequisite: MRKTNG 3000 and junior standing.

MRKTNG 4250H--Retail Marketing - Honors (3).Strategies, policies, tactics, and procedures of marketing in a retailing environment. Prerequisite: MRKTNG 3000 and junior standing. Honors eligibility required.

MRKTNG 4350--Business-to-Business Relationships (3).Strategies, tactics, and challenges involved in developing, organizing, and managing interfirm relationships in business/industrial markets. Prerequisite: MRKTNG 3000 and junior standing.

MRKTNG 4380--Buying and Supply Chain Management (3).Strategies, tactics, challenges, and issues involved in buying, industrial purchasing, and supply chain management. Prerequisites: MRKTNG 3000 and junior standing.

MRKTNG 4420--Sales Management (3).Methods and tools employed by salespeople and field sales managers; emphasis on underlying behavioral and quantitative theory. Prerequisites: MRKTNG 3000 and junior standing.

MRKTNG 4450--Marketing Channels (3).Development and management of the interorganizational or internal networks through which goods and services are provided to consumer and business markets. Particular emphasis on the relationship between channel activities and the implementation of market strategy. Prerequisite: MRKTG 3000 and junior standing.

MRKTNG 4501--Topics in Marketing Strategies (1-3).Selected topics related to marketing strategy. Subjects may vary across semesters. Prerequisites: MRKTNG 3000, junior standing.

MRKTNG 4550--Integrated Marketing Communications (3).Design, coordination, and management of marketing communications. Focus on the role of integrated marketing communications in the overall marketing process, with emphasis on advertising and sales promotion strategies and tactics. Prerequisite: MRKTG 3000 and junior standing.

MRKTNG 4650--e-Marketing (3).Strategic and managerial challenges and issues related to use of the Internet and other electronic channels as marketing tools. Prerequisite: MRKTG 3000 and junior standing.

MRKTNG 4720--Global Marketing (3).Strategic and managerial issues associated with international trade and international marketing. Prerequisites: MRKTNG 3000 and junior standing.

MRKTNG 4720H--Global Marketing - Honors (3).Strategic and managerial issues associated with international trade and international marketing. Prerequisites: MRKTNG 3000 and

junior standing. Honors eligibility required.

MRKTNG 4750--Marketing, Society, and Government (3).Interface between marketing, society, and government; emphasis on potential conflicts and issues such as competition, externalities, and regulation. Prerequisite: MRKTG 3000 and junior standing.

MRKTNG 4880--Contemporary Issues in Marketing (3).Selected topical issues, their impact on marketing and marketers, and implications for firms and industries. Emphasis on scanning the external environment, projection of trends, and analysis; strategy development based on environmental analysis. Prerequisites: MRKTG 3000 and junior standing.

MRKTNG 4880H--Contemporary Issues in Marketing - Honors (3).Selected topical issues, their impact on marketing and marketers, and implications for firms and industries. Emphasis on scanning the external environment, projection of trends, and analysis; strategy development based on environmental analysis. Prerequisites: MRKTG 3000 and junior standing. Honors eligibility required.

MRKTNG 4940--Marketing Practicum (3).Course providing experience within ongoing business. Study plan, meeting, and written assignments required. See Marketing website for application, qualifications, requirements and details. Graded on S/U basis only. Prerequisites: instructor's consent; Marketing and international business-marketing majors only; MRKTG 3000 and junior standing.

College of Education

College of Education

DEGREES OFFERED

The Bachelor of Science in Education (BSEd) leads to certification to teach in the State of Missouri. The Bachelor of Educational Studies (BES) is designed for individuals interested in working in a field related to education but who do not plan to complete a teacher development program. Emphases are listed in italics below.

- Bachelor of Science in Education (BS Ed) – with majors in
 - Early Childhood
 - Elementary Education with emphasis areas in
 - Elementary Education*
 - Middle School with emphasis in
 - Language Arts, Mathematics, Science, Social Studies*
 - Secondary Education with emphasis areas in
 - Art Education, Biology, Chemistry, Earth Science, Language Arts, Mathematics Education, Music Education, Physics or Social Studies*
 - Special Education with emphasis in
 - Cross-Categorical*

Bachelor of Educational Studies (BES) with a major in Interdepartmental Studies

In addition to the bachelor's degrees above, the College offers masters, educational specialist and doctoral degrees in a variety of areas. Check the Graduate Catalog for complete information.

Certification in Agriculture Education

The Agricultural Education program is listed under the College of Agriculture, Food and Natural Resources section of this catalog.

Certification in Family and Consumer Sciences Education

The Family and Consumer Sciences Education program is listed under the College of Human Environmental Sciences section of this catalog. This program is no longer available to incoming students.

The College of Education, established in 1868, is the oldest teacher preparation program west of the Mississippi River. Today's graduates of the college are employed in a variety of

educational institutions and non-school settings. The college serves the educational community through research-based professional practice and a variety of learning constructs applied to real-world experiences. The college is a member of the American Association of Colleges for Teacher Education and was reviewed in fall 2003 by the National Council for Accreditation of Teacher Education (NCATE) and Missouri Department of Elementary and Secondary Education.

All programs are fully accredited by the North Central Association of Secondary Schools and Colleges. All programs that lead to earning a certificate by the Missouri Department of Elementary and Secondary Education are fully approved by the State Board of Education.

There are five majors offered with the Bachelor of Science degree:

- Early Childhood (certification for birth - grade 3)
- Elementary Education (certification for grades 1 - 6)
- Middle School (certification for grades 5 - 9)
- Secondary Education (certification for grades 9 - 12) with emphasis areas listed previously.
- Special Education, Art and Music (certification for grades K - 12)

Title II Report

In 2008, the College of Education at the University of Missouri (MU) submitted its annual Title II report to the state regarding the performance of the 2006-2007 program completers on the mandatory Praxis Tests. In 2006-2007, 98 percent of MU program completers passed the required Praxis Assessment for their certification area. The state average passing rate was 88-100 percent.

The total enrollment in the College of Education for 2006-2007 was 1137 and for 2007-2008 was 1139. The Missouri Department of Elementary and Secondary Education accredits all teacher certification programs at MU. These programs are sequenced into three phases and require field-based experiences in every semester. A full semester (16-week) student teaching internship is required. Clinical faculty with a 6:1 student/faculty ratio supervises this 640-hour experience. Full year internships are available for students with an emphasis in Elementary Education and Special Education.

ADMISSIONS

Even for students meeting selective admission criteria, admission to some Teacher Development programs is dependent on capacity, resulting in the selection of the best-qualified applicants. In addition to factors such as test scores and grade point average, the faculty may exercise professional judgment in the selection of students through personal interviews and program specific essays.

Admission to a specific program is a prerequisite to many upper-level education courses and associated field experiences (including the teaching internship). A student admitted to a professional program (Phase II) must maintain the standards met at the time of admission. Continued assessment will be made of the characteristics associated with effective performance in the role of a professional at each level and **in the program**. See specific requirements for admission to each of the three phases of the chosen major.

Procedures for admission to the professional program (Phase II) for the Bachelor of Educational Studies degree parallel those for the Bachelor of Science in Education degree. To be admitted, the applicant must meet the requirements described under phase requirements and have completed a minimum of 24 hours in education coursework.

Admission of Freshmen

Undergraduate students may enter the College of Education as first-year students at MU. The Teacher Development Program is the primary department of all entering first-year students.

Preprofessional Information

Many of the Teacher Development Program emphasis areas contain preprofessional course work that must be completed with specific course grades prior to the selective admission process to Phase II of the program or the teaching internship (Phase III). Contact the advising services office for the specific course work required for the area of interest.

Exploratory Courses

Students wishing to explore the Teacher Development Program may enroll in TDP 1100 for 1 credit in the emphasis area of interest. There is also an undecided category for those students interested in exploring the field of education without selecting a specific major or emphasis.

Grade Point Average

The College of Education uses the MU GPA of record to assess students' academic standing and progress. Both the MU GPA of record and overall grade point average at the level required (see Calculation of Grade Point Averages for levels) are used to determine eligibility for admittance and progression.

Transfer Admission

The College of Education accepts transfer students consistent with the transfer/articulation policy of the Missouri Department of Higher Education. The transfer policy does not waive or alter any course requirements for the Bachelor of Science in Education or the Bachelor of Educational Studies degrees. Grades received from other accredited institutions are recorded on the MU transcript as they were earned (A = A, etc.). Courses from other University of Missouri institutions are calculated into the MU GPA of Record and grades received from other accredited institutions are calculated into the overall grade point average for admission to the College of Education.

Students transferring to the College of Education with a completed Associate of Arts (AA) degree will be considered to have completed the first two years of university general education requirements. Students transferring with a completed Associate of Arts in Teaching (AAT) degree will be considered to have completed the first two years of university education and lower division (Phase I) professional education coursework. Additional course work may be needed to satisfy prerequisites or degree requirements for Phase II and Phase III of the chosen program.

International Admissions

International students enrolled in the BSEd program must have earned a score of 600 (paper-based) or 100 (internet-based) on the TOEFL exam. International students enrolled in the BES program must have a score of 550 (paper-based) or 79 (internet-based) on the TOEFL exam.

Graduation Requirements

University requirements state that students must earn 30 of the last 36 credits applicable to their degree in MU courses. For the BSEd, these courses must include the student teaching internship. For the BES, they must include an approved capstone course for a minimum of two semester hours and complete the CAAP exam.

Capstone Options

All students graduating from the College of Education are required to complete a capstone experience. For students completing a BSEd, the internship experience (Phase III) serves as the capstone.

Time Limits on Credits Earned

Transfer credit is evaluated by the Office of Admissions. All course work must meet the current state minimum requirements for teacher certification. Course work completed in the discipline must be evaluated by faculty within that area to be applicable.

Other

See degree, major and emphasis requirement listings for additional courses that would be beneficial to complete during the freshmen and sophomore years specific to the Teacher Development Program major and emphasis.

Professional Education Sample Program

Phase I

TDP 1100: Orientation	1
TDP 2000: Inquiry Into Learning I	3

TDP 4554: Secondary III Field	1

Phase III

Completion of Phases I & II required for admittance	
TDP 4971: Internship and Capstone Seminar	14

ACADEMIC REGULATIONS

Advanced Standing

In addition to University standards for advanced-standing credit, *content* courses, as defined by teacher certification, must be completed with an MU cumulative GPA of record of 2.500 or better to satisfy Missouri requirements for certification. Advanced-standing credit includes course work used to satisfy degree requirements, including any elective portion of the degree program.

Courses taken from other institutions after students have matriculated to MU must have prior approval.

Probation, Suspension and Dismissal

A student in good standing (see Calculation of Grade Point Averages below) whose MU GPA of record and/or cumulative grade point average falls below the level outlined is placed on scholastic probation. In addition, any student admitted to the College of Education who does not meet the minimum entrance standards (e.g., admitted to MU by the Committee on Entrance and Revision of Records, admission due to extenuating circumstances or admission of a returning student) will enter on scholastic probation.

A student on scholastic probation whose MU term grade point average for a subsequent enrollment semester is at or above the level specified, but whose MU cumulative grade point average is below the level required for good standing is placed on conditional scholastic probation. A student may be on conditional scholastic probation for two enrollment semesters only. If the MU cumulative grade point average is not at the level required for the student's classification at the conclusion of the period of conditional scholastic probation, the student is ineligible for continued enrollment in the College of Education.

A student whose MU term and cumulative GPA of record falls below 2.000 is ineligible for enrollment at MU. (Exception: a first-semester freshman whose MU term GPA is below 1.000 may, at the discretion of the associate/assistant dean for academic programs, be placed on conditional scholastic probation instead of being declared ineligible.)

Calculation of Grade Point Averages (GPA)

To remain in good standing with the college, a student must earn a minimum MU term and cumulative GPA of record, as described below.

0 – 29 credits	2.500
30 – 59 credits	2.600
60 credits and above	2.750

Satisfactory/Unsatisfactory Grades

In addition to University policies on S/U grading, professional education courses, excluding field experiences and orientation, may not be completed under the S/U grading system.

Graduation with Departmental Honors

The College of Education maintains a Dean's List that includes all College of Education undergraduates who are enrolled in 12 or more credits of graded (A-F) course work, and who have a 3.500 or higher MU term GPA.

The College of Education awards Latin Honors designations based on the following MU cumulative GPA:

<i>cum laude</i>	3.600
<i>magna cum laude</i>	3.750
<i>summa cum laude</i>	3.900

Students must earn a minimum of 60 credits on the MU campus to be eligible for Latin Honors designation. Determination of eligibility is based on the grade point average attained during the final portion of the program (i.e., the final 60 credits on the MU campus). In cases where the overall MU cumulative grade point average is higher than that calculated for the final 60 credits, the higher overall grade point average will be used. In no case will a Latin Honors designation be conferred for an individual whose overall MU GPA is less than 3.000.

In addition, College of Education students may participate in a University Honors Program. (See the Honors College information in the front section of this catalog).

STUDENT SERVICES

Advising

The College of Education maintains Advising Services located

in 102 Hill Hall. Professional academic advisors staff these services. A student entering the college works with a professional advisor who assists in a variety of professional and academic planning.

On progression to Phase II, a student is assigned a faculty advisor within the area of certification. It is the student's responsibility to meet with advisors as early and as regularly as possible so that requirements may be met without losing credit or carrying excessively heavy loads during the junior and senior years. In addition, prior to eligibility for the full-year internship in Elementary and Special Education, students must have all programmatic requirements met prior to the senior year curriculum. All other programs, students must have all programmatic requirements met prior to the internship semester.

Career and Program Services

The Career and Program Services office distributes information related to careers in education. Students receive extensive assistance in securing positions as well as development of portfolios, resumes and interview skills. On-campus interviews and job fairs are offered each year to students and alumni in the college and for other related areas.

SPECIAL SERVICES/PROGRAMS

Licensures

Completion of the BS Ed and any additional requirements for certification (currently completion of a portfolio and passing of the Praxis II examination) are required before the graduate is eligible for Missouri Teacher Certification.

Recommendation for initial certification after graduation requires an acceptable score on the Praxis II specialty area examination for each major. The examination should be taken during the last year of the program and official scores submitted to the College of Education. Effective September 1, 2004, those seeking certification(s) in additional area(s) must submit an official passing score for the Praxis II specialty area examination for each area where applicable, as well as completing any additional programmatic requirements.

A student recommended for teacher certification must meet the following criteria:

- Cumulative MU GPA of record of 2.750
- Overall GPA of 2.750 for all college course work completed
- GPA of 2.500 in all content area course work
- 2.000 in each professional education course with overall 2.500 GPA on all professional education course work
- Satisfactory score on the Praxis II area specialty test required by the State of Missouri
- An official copy of the student's transcripts with baccalaureate degree posted submitted to the Advising & Certification Services office in 102 Hill Hall
- Passing Portfolio

Requirements for Additional Certificates

An individual completing an MU program in teacher education leading to a Missouri certificate to teach may obtain certification in additional areas by meeting requirements established by the Missouri Department of Elementary and Secondary Education. For specified areas of course work required for additional state certifications, contact Advising Services, 102 Hill Hall.

Major Program Requirements - BS Ed

In addition to University requirements, such as University general education and graduation requirements, students must complete

the following degree requirements and additional major (and in some cases emphasis and option) requirements.

- Oral communication proficiency (demonstrate competency on communication standards in Phase I, II, and III of the Teacher Development course work)
- Computer and information proficiency (demonstrate competency on technology standards in Phase I, II, and III of the Teacher Development course work)
- POL SC 1100 (course may also be used as part of the behavioral and social science portion of University general education requirements)
- HIST 1100, 1100H, 1200, 1200H or 2210 (course may also be used as part of the behavioral and social science portion of University general education requirements)
- World international requirement: All majors must complete a course that reflects the study of world/international topics (course may also be used as part of the humanities and/or fine arts portion of University general education requirements).
- Multicultural studies requirement: Students address this requirement by demonstrating competence on diversity markers in Phases I, II, and III of the Teacher Development course work.

Professional Education

The College of Education professional education requirements include those that are common to all majors as well as requirements that are specific to each major. Students must meet the following requirements:

- Course GPA of 2.000 or better with an overall professional education GPA of at least 2.500 (required for Missouri Teacher Certification)
- MU GPA of record and overall GPA of 2.750
- GPA of 2.500 in the content area for students majoring in a degree leading to certification in a subject (K–12, 9–12, 5–9 or PK-3)

Teacher Development Program Courses

Students proceed through three phases as they complete the baccalaureate program. Each phase includes training in technology as well as clinical experience. University general education and content requirements are completed each semester in addition to the required Teacher Development Program courses.

Phase I (Inquiry into Learning, Schools, Communities and Society I)

This phase provides students with an immersion into the discipline and culture of teaching and learning before focusing on a teaching specialty. It includes five courses for a total of 9 credits: TDP 1100, 2000, 2005, 2040 and 2044. Experiences in this phase incorporate the teacher's roles in facilitating learning at all levels of development. Students also focus on how problems of schools, family, community and society affect educators. The emphasis in Phase I is on oral and written communication. All students in the BS Ed degree program complete these courses regardless of major.

Phase II (Inquiry into Learning, Schools, Communities and Society II)

This phase occurs over a three-semester sequence and focuses increasingly on a chosen teaching emphasis and on interdisciplinary teaching. Experiences in this phase focus on career exploration, general instructional strategies, human development, classroom and behavior management and educational measurement. This phase provides students with experience in the methods of teaching in a specific subject area as well as emerging problems and practices within the field of education. Certain degree programs have limited enrollments. The number

of credits is dependent on the selected program. See specific majors for courses required in Phase II.

Application to Phase II is required. Students become eligible for consideration for admittance to Phase II in a specific program after meeting the following criteria:

- Current enrollment in the College of Education
- 2.750 MU GPA of record and overall (on a 4.000 scale)
- Composite score of 22 on ACT or 1010 on the Re-centered SAT
- 235 on each subtest of the CBASE
- ENGLSH 1000 with a "C" range grade
- MATH 1100 or 1120 with a "C" range grade
- Satisfactory completion of TDP 1100: Orientation Seminar or designated alternative
- Satisfactory completion of any selected additional degree requirements as prerequisites to Phase II courses in the certification major (list available from the TDP Office or the COE Academic Programs Office advisers)
- Possession of characteristics associated with effective performance in a professional role at the level(s) and in the major(s) selected
- Demonstrated competence of Phase I mid-preparation benchmarks (as documented by Phase I instructors)
- Completion of a degree plan.
- Additional requirements as approved by the faculty for areas with enrollment limitations which currently are Early Childhood, Elementary, Secondary and Middle School Social Studies, Secondary Language Arts and Special Education.

Phase III (Internship-TDP 4971)

Phase III occurs during the last semester with student placement in a public school district for the entire semester, for approximately 14 credit hours.

Application for Phase III is required. To qualify for the teaching internship, applicants must meet the following requirements:

- Admission to Phase III in the program area
- Successful completion of Phase II
- A minimum of 90 completed credit hours
- Completion of at least the preceding semester in residence
- A minimum 2.750 MU GPA of record and an overall GPA of 2.750 (on a 4.000 scale)
- Completion of specific prerequisite professional education and subject area course requirements for the level at which the teaching internship is to be accomplished

Teaching internship assignments are available in several districts across the State of Missouri. Applications are accepted approximately a year preceding internship. More information concerning student teaching internships may be obtained from Field Placement, 101 Hill Hall, in the College of Education.

Phase IV (Induction Years Program)

Phase IV occurs after the student graduates and begins the first year of teaching and includes follow-up evaluations.

The Teacher Development Program is the primary academic unit for all undergraduate programs leading to the BS Ed (teacher preparation) or Bachelor of Educational Studies (BES) in the College of Education.

The requirements for the Bachelor of Science in Education (Teacher Development Program) are specified in three areas: University general education, professional education and a teaching major. All students preparing to be teachers in early childhood, elementary, special education, middle or secondary schools, regardless of the major field, are required to complete the University general education program. Students transferring from other institutions are required to fulfill the equivalencies of these courses.

Major Program Requirements –Early Childhood Education (Birth – Grade 3)

(For University graduation and University general education requirements, see the front section of the catalog.)

Mathematics or statistics3
STAT 1200: Introduction to Statistical Reasoning3
(This course fulfills the mathematics reasoning proficiency requirement.)

Humanities.....12
Must include one course in literature and one course in art or music. (Students who cannot read music must take a basic music theory course that enables them to read music.)

Science (a lab is required in both biological and physical sciences)..... 6-9

PHYSICS 2330: Exploring the Principles of Physics.....4
Social behavioral9
PSYCH 1000: General Psychology.....3
POL SC 1100: American Government.....3
American History.....3
One course in either Sociology, Rural Sociology or Anthropology.....3
Subject/concentration (before entering Phase II*)9
NUTR S 1034: Nutrition, Current Concepts and Controversies3
H D FS 3420: Early and Middle Childhood*3
H D FS 2300: Multicultural Study of Children and Families or H D FS 4300: Black Families ..3

Phase II47–48

Inquiring into Schools, Communities and Society (ISCS)5
TDP 4020: Inquiring into Learning II3
TDP 4060: Inquiring into Schools, Community, and Society II3

Field experience10
TDP 4124: Semester I: Emergent and Developing Literacy in Early Childhood Field Experience2
TDP 4134: Semester II (0–3): Teaching and Learning Math, Sci. & Soc. Studies w/Young Children Field Experience3
HDFS 3520: Student Teaching Pre-kindergarten.....5

Inquiry into Curriculum and Pedagogy (ICP).....33
TDP 4090: Early Childhood Seminar I2
TDP 4140: Early Childhood Seminar III (FS only)3
TDP 4160: Motor Development in Young Children2
TDP 4130: Teaching and Learning Math, Science and Social Studies with Young Children8
TDP 4110: Working with Infants and Toddlers3
TDP 4120: Emergent and Developing Literacy in Early Childhood5
TDP 4200: Young Children’s Emergent Language2
TDP 4210: Children’s Literature2
TDP 4240: Art for Children2
TDP 4250: Music for Children2
H D FS 4720: Child and Family Advocacy (WS only).....2

Electives

One elective course from an area within the College of Arts and Science is required.

Major Program Requirements – Elementary Education (Grades 1 – 6)

(For required University graduation and University general education requirements, see the front section of the catalog.)

Statistics3
STAT 1200: Introduction to Statistical Reasoning3
(This course fulfills the mathematics reasoning proficiency requirement.)

Humanities.....9
Must include one course in literature and one course in art or music. (Students who cannot read music must take a basic music theory course that enables them to read music.)

Science (Lab required in both Biological & Physical Sciences).....6-9
PHYSICS 2330: Exploring the Principles of Physics4

Social behavioral.....15
PSYCH 1000: General Psychology.....3

One course in economics.....	3
One course in geography.....	3
POL SC 1100: American Government.....	3
American History	3
Health Education	2
TDP 1200: Elements of Health Education	2
Major core requirement	
Some combination of University general education requirements and concentration area requirements must produce a total of 21 credits in one of the following categories:	
• Social and behavioral sciences	
• Humanities studies and fine arts	
• Biological and physical science/mathematics	
• Mathematics	
Phase II	39
Inquiring into Learning, Schools, Communities, and Society II	5
TDP 4020: Inquiry into Learning II	3
TDP 4060: Inquiring into Schools, Community, and Society II	3
Inquiry into Curriculum and Pedagogy with Field Experience	34
TDP 4030: Physical Education Activities for the Elementary Schools	2
TDP 4211: Essential Literacy: Reading	3
TDP 4221: Essential Literacy: Writing	2
TDP 4231: Advanced Applications of Literacy	3
TDP 4241: Inquiry into Literacy Applications.....	3
TDP 4240: Art for Children	2
TDP 4250: Music for Children	2
TDP 4260: Elementary Social Studies	3
TDP 4280: Teaching Science in Elementary Schools	3
TDP 4300: Learning and Teaching Number and Operation in Elementary School.....	3
TDP 4310: Learning and Teaching Geometry in Elementary School	3
TDP 4194: Elementary Education Field Experience I.....	3
TDP 4294: Elementary Education Field Experience II.....	3

Major Program Requirements – Middle School (Grades 5 – 9)

Within the Middle School major, students must select one of the following. (Note that emphasis areas appear on transcripts, but options do not.)

- One core area of study (the emphasis field of study) from mathematics, science, social studies or english/language arts.
- One core area of study (the option field of study) from mathematics, science, social studies, english/language arts, or art K–9.

Inquiring into Schools, Communities and Society (ISCS)	5
TDP 4020: Inquiry into Learning II	3
TDP 4060: Inquiring into Schools, Community, and Society II	3

Inquiry into Curriculum and Pedagogy (all students) . 3–6	
TDP 4410: Teaching, Engaging and Assessing Middle-Level Students	3
TDP 4420: Adolescent Literacy (not required for English/language arts emphasis or options)	3
TDP 4424: Middle School Literary Field Experience.....	1

Inquiry into Curriculum and Pedagogy (emphasis) 3–9	
Mathematics	6
TDP 4360: Intro Teaching Mathematics in Middle & Secondary Schools	3
TDP 4364: Intro Teaching Math in Middle & Secondary Schools Field Experience	1
TDP 4370: Teaching and Modeling Middle School Mathematics	3

TDP 4740: Inquiry into Art Education: Pre-School Through Middle School.....	3
TDP 4744: Inquiry into Art Education: Pre-School Through Middle School Field Experience.....	1
Total professional education requirement	44–47

Emphasis Area Field of Study Content Requirements

In meeting the major area requirements, 3–9 credits in each area may also be used to meet University general education

requirements.

Emphasis in Mathematics 29

A content area GPA of at least 2.500 is required for Missouri Teacher Certification. (2.750 UM and overall GPA required for graduation.)

MATH 1300: Finite Mathematics	3
MATH 1360: Geometric Concepts	3
MATH 1160: Precalculus Mathematics	5
MATH 2320: Discrete Mathematical Structures	3
STAT 1200: Introductory Statistical Reason	3
MATH 4060: Connecting Geometry to Middle and Secondary Schools (FS only)	3
MATH 4070: Connecting Algebra to Middle and Secondary Schools (WS only).....	3
MATH 4080: Calculus Connections (FS only)	3
STAT 4050: Connecting Statistics to Middle and Secondary Schools (WS only).....	3

Emphasis in Science 31

A content area GPA of at least 2.500 is required for Missouri Teacher Certification. (2.750 UM and overall GPA required for graduation.)

CHEM 1310, 1320, 1330	8
PHYSICS 1210 and 2330	8
GEOL 1100 or 1200	4
ATM SC 1050: Introductory Meteorology	3
BIO SC 1500 and BIO SC 1060 or 3100 or NAT R 1060	8

Emphasis in Social Studies 33

A content area GPA of at least 2.500 is required for Missouri Teacher Certification. (2.750 UM and overall GP required for graduation.)

American history including HIST 1100 & 1200	9
World history including HIST 1500 or 1510.....	9
POL SC 1100: American Government	3
Economics	3
Geography	3
PSYCH 1000: General Psychology	3
Non-Western history or Asian geography	3

Emphasis in Language Arts 27

A content area GPA of at least 2.500 is required for Missouri Teacher Certification. (2.750 UM and overall GPA required for graduation.)

ENGLISH 2010: Intermediate Composition	3
ENGLISH 2100: Writing about Literature	3
ENGLISH 3310: Survey of American Literature: 1865-Present.....	3
ENGLISH 4600: Structure of American English	3
ENGLISH 4610: History of English Language	3
English electives (at least one course from each category)	12
19th century literature/African American literature/ Folklore (ENGLISH 2400, 3420, 4420, 4120)	3
20th century literature/literature by and about women (ENGLISH 3180, 4180, 4181, 4780).....	3
Synthesize literary study (genres, comparative lit., critical theory, major authors) (ENGLISH 4004, 4060, 4100, 4170).....	3
Writing (ENGLISH 1510, 1530, 3010, 4510, 4530)	3

Option (Second Field) Area Requirements

In meeting the minor area requirements, 3–9 credits in each area

may be met by courses also used to meet University general education requirements.

Mathematics Option 23

A content area GPA of at least 2.500 is required for Missouri Teacher Certification. (2.750 UM and overall GPA required for graduation.)

MATH 1160: Precalculus Mathematics	5
STAT 1200: Introductory Statistical Reasoning	3
MATH 1300: Finite Mathematics	3
MATH 1360: Geometric Concepts	3
MATH 4060: Connecting Geometry to Middle and Secondary Schools.....	3
MATH 4070: Connecting Algebra to Middle and Secondary Schools.....	3
MATH 4080: Calculus Connections	3

Science Option 21

A content area GPA of at least 2.500 is required for Missouri Teacher Certification. (2.750 UM and overall GPA required for graduation.)

CHEM 1310 and 1320: General Chemistry	5
BIO SC 1500: Introduction to Biological Systems with Laboratory.....	5
GEOL 1100: Principles of Geology	4
PHYSICS 2330: Exploring the Principles of Physics	4
NAT R 1060 or BIO SC 1060	3

Social Studies Option 21

A content area GPA of at least 2.500 is required for Missouri Teacher Certification. (2.750 UM and overall GPA required for graduation.)

American history including HIST 1100 and 1200	6
World history including HIST 1500	6
Geography	3
POL SC 1100: American Government	3
Economics	3

English/Language Arts Option 21

A content area GPA of at least 2.500 is required for Missouri Teacher Certification. (2.750 UM and overall GPA required for graduation.)

ENGLISH 2010: Intermediate Composition	3
ENGLISH 2100: Writing about Literature	3
ENGLISH 3310: Survey of American Literature: 1865- Present.....	3
English electives (one course from each area).....	12
19th century literature/African American Literature/ Folklore: ENGLISH 2400, 3420, 4120, 4420	
20th century literature/literature by and about women: ENGLISH 4181, 4190, 4780	
Synthesize literary study (genres, comparative lit, critical theory, major authors): ENGLISH 4004, 4060, 4100, 4160, 4170	
Writing: ENGLISH 1510, 1530, 2030, 3010, 4510, 4530	

Art K-9 Option 21

A content area GPA of at least 2.500 is required for Missouri Teacher Certification. (2.750 UM and overall GPA required for graduation.)

ART GNRL 1020: Art Appreciation.....	3
ART GNRL 1040: Basic 3-D Design	3

Major Program Requirements - Secondary Education

(Grades 9 – 12)

During Phase II, all Secondary Education majors complete the requirements listed below.

Inquiring into Schools, Communities, and Society	5
TDP 4020: Inquiry into Learning II	3
TDP 4060: Inquiring into Schools, Community, and Society II	3

Emphasis in Art Education

Students who wish to teach art usually pursue the BS Ed degree. BA and BFA candidates may acquire art teaching certification by completing the art education requirements not already completed in the BA or BFA programs.

Phase II	14
Field experience	3
TDP 4734: Semester I: Overview of Art Education Field Experience	1
TDP 4744: Semester II: Inquiry into Art Education: Pre-School Through Middle School Field Experience	1
TDP 4754: Semester III: Inquiry into Art Education: Secondary Field Experience	1
Inquiry into Curriculum and Pedagogy	11
TDP 4730: Overview of Art Education	3
TDP 4740: Inquiry into Art Education: Pre-School Through Middle School	3
TDP 4750: Inquiry into Art Education:Secondary	3
TDP 4560: Teaching Reading in the Content Area	2

Subject/Concentration **47-48**

A content area GPA of at least 2.500 is required for Missouri Teacher Certification. (2.750 UM and overall GPA required for graduation.)

(9 credits may be counted in completing the general education humanities requirement; 6 of the 12 must be at 2000 or above. One 2000-level course must be designated Writing Intensive.)

Art history	12
ART GNRL 1020: Art Appreciation.....	3
AR H A 1110: Ancient and Medieval * OR AR H A 1120..	3
AR H A 2830: American Art and Architecture*.....	3
AR H A 3740: Nineteenth Century European Art* OR AR H A 3750	
OR AR H A 3760: Contemporary Art	3
*or the equivalent approved by the faculty advisor

ART 2400: Advanced Digital Imaging	2-3

Electives in studio art/art history **9**

Recommended courses include:

Upper level Art History (WI) max 3 hrs,
ART 2210, ART 2600, ART 3300, ART 3500,
ART 3510 or ART 3200, 3220, 3800

Emphasis Area in Language Arts

Phase II	14
Field experience	3
TDP4474: Semester I: Teaching Secondary English/Language Arts I Field Experience	1
TDP4484: Semester II: Teaching Secondary English/Language Arts II Field Experience	1
TDP 4494: Semester III: Teaching Secondary English/ Language Arts III Field Experience	1
Inquiry into Curriculum and Pedagogy	11
TDP 4470: Teaching English/Language Arts I	3
TDP 4480: Teaching Middle and Secondary English/ Language Arts II	3
TDP 4490: Teaching Middle and Secondary English/ Language Arts III	3
TDP 4560: Teaching Reading in the Content Area	2

Subject/concentration **45**

ENGLISH 2100: Writing Literature	3
ENGLISH 2010: Intermediate Composition	3
ENGLISH 3210: Survey of British Literature: Romanticism to the Present	3
ENGLISH 3300: Survey of American Literature: Beginning to 1865.....	3
ENGLISH 3310: Survey of American Literature: 1865–Present.....	3
ENGLISH 4150: World Literatures	3
ENGLISH 4320: 20th-Century American Literature.....	3
ENGLISH 4600: Structure of American English.....	3
ENGLISH 4610: History of the English Language	3
ENGLISH 4650: Principles of Teaching English as a Second Language	3

Electives: select one course from each of the five areas (at least 6 3000-level credits) **15**

British Literature (ENGLISH 4210, 4220, 4240, 4250, 4260)	3
African American/Ethnic Literature (ENGLISH 3420, 4120, 4420)	3
Literature by and about women (ENGLISH 4180, 4181, 4780)	3
Literary Synthesis (ENGLISH 4004, 4060, 4110, 4155, 4160)	3
Writing (ENGLISH 1510, 1530, 2030, 3010, 4510, 4530)	3

Emphasis in Mathematics

In addition to University general education requirements and the Phase I and Phase II requirements, students must also complete the following requirements.

A content area GPA of at least 2.500 is required for Missouri Teacher Certification. (2.750 UM and overall GPA required for graduation.)

Physical and biological science..... **4-5**

Physical science must be PHYSCS 1210 or 2750

Phase II	14
Field experience	3

TDP 4574: Intro. Teaching Math in Middle & Secondary School Field Experience	1
TDP 4584: Teaching Math in Secondary Schools: Algebra Field Experience	1
TDP 4594: Teach. Math in Sec. Schools: Focus on Geometry/Probability	1
Inquiry into Curriculum and Pedagogy	11*
TDP 4570: Introduction to Teaching Mathematics in Middle and Secondary Schools	3
TDP 4580: Teaching Mathematics in Secondary Schools: Algebra	3
TDP 4590: Teaching Math in the Secondary Schools: Focus on Geometry, Probability, and Statistics	3
TDP 4560: Teaching Reading in the Content Area	2
*Subject/concentration	40
*Mathematics courses must be taken on a graded basis. (A-F)	
MATH 1500: Analytic Geometry and Calculus I (fulfills math and Math Reasoning Proficiency requirement as part of University general education requirements)	5
MATH 1700: Calculus II	5
MATH 2300: Calculus III	3
MATH 2320: Discrete Mathematical Structures	3
MATH 4060: Connecting Geometry to Middle and Secondary Schools (FS only)	3
MATH 4140: Matrix Theory	3
MATH 4510: Higher Algebra (FS only)	3
MATH 4350: Non-Euclidean Geometry (SP only)	3
STAT 4050: Connecting Statistics to Middle and Secondary Schools (SP only).....	3
CMP SC 1040: Introduction to Problem Solving and Programming	3
Two elective courses at 3000-level or above.....	6

Recommended electives include:
MATH 4100: Differential Equations
MATH 4300: Numerical Analysis
MATH 4310: Numerical Linear Algebra
MATH 4500: Applied Analysis
MATH 4700: Advanced Calculus of One Real Variable I
MATH 4580: Mathematical Modeling II
MATH 4560: Nonlinear Dynamics, Fractals and Chaos
MATH 4330: Theory of Numbers
MATH 4720: Introduction to Abstract Algebra I
MATH 4150: History of Mathematics
MATH 4335: College Geometry
MATH 4340: Projective Geometry
MATH 4345: Foundations of Geometry
MATH 4400: Introduction to Topology
STAT 4750: Introduction to Probability Theory

Note: The mathematics and education faculty recommend that secondary mathematics majors take an elementary and/or middle grade mathematics methods course (TDP 4274 or TDP 4374) as an elective.

Emphasis in Music Education	
Humanities/fine arts (may also fulfill University general education requirements)	9
MUS H LI 1322: Introduction to Music in the United States.....	2
MUS H LI 2307: History of Western Music I	2
MUS H LI 2308: History of Western Music II	2
Elective in another humanities/fine arts area.....	3

A content area GPA of at least 2.500 is required for Missouri Teacher Certification. (2.750 UM and overall GPA required for graduation.)

Vocal and Instrumental Certification: Students wishing to be certified in both vocal and instrumental music must meet all requirements described in both the sections for vocal and instrumental.

Phase II	13
Field experience	3
TDP 4674: Teaching Music I Field Experience	1
TDP 4684: Teaching Music II Field Experience	1
TDP 4694: Teaching Music III Field Experience.....	1
Inquiry into Curriculum and Pedagogy	10
TDP 4670: Teaching Music I	3
TDP 4680: Teaching Music II	2
TDP 4690: Teaching Music III	3
TDP 4560: Teaching Reading in the Content Areas	2
Subject/concentration	
Instrumental	57
Vocal.....	55
A content area GPA of at least 2.500 is required for Missouri Teacher Certification. (2.750 UM and overall GPA required for graduation.)	
Music theory.....	18
MUS THRY 1220: Syntax, Structure and Style of Music I	2
MUS THRY 1221: Syntax, Structure and Style of Music II	2
MUS THRY 2220: Syntax, Structure and Style of Music III.....	2
MUS THRY 2221: Syntax, Structure and Style of Music IV.....	2
MUS THRY 1230: Aural Training and Sight Singing I	2
MUS THRY 1231: Aural Training and Sight Singing II	2
MUS THRY 2230: Aural Training and Sight Singing III ...	2
MUS THRY 2231: Aural Training and Sight Singing IV ..	2
Conducting and techniques.....	16-17
MUS I VT 2631: Basic Conducting and Score Reading....	2
<i>Instrumental tracks only</i>	
MUS I VT 2634: Rehearsal Clinic Band Conducting.....	1
MUS I VT 2634: Rehearsal Clinic Band Conducting.....	1
Instrumental Techniques: six courses, not including the course in the major instrument	
MUS I VT 2648: Percussion	1
MUS I VT 2640: Strings 1-Violin & Viola	1
MUS I VT 2641: Strings 2-Cello & Bass	1
MUS I VT 2637: Woodwinds 1-Single Reeds.....	1
MUS I VT 2638: Woodwinds 2-Flute & Double Reeds ..	1
MUS I VT 2645: Brass 1-High Brass	1
MUS I VT 2646: Brass 2-Low Brass	1
MUS THRY 4229 or Band Arranging or	
MUS THRY 4227: Orchestration	2
MUS I VT 3642: Seminar in String Techniques OR	
MUS I VT 3646: Marching Band Techniques OR	
MUS I VT 3644: Jazz Methods and Materials	1
Vocal music: choose from voice class, lessons or choir.....	1
<i>Vocal tracks only</i>	
MUS I VT 2633: Rehearsal Clinic: Choral Conducting	2
MUS I VT 2633: Rehearsal Clinic: Choral Folk Conducting (must be repeated)	2
MUSIC NM1612: Elementary Guitar Class	1
MUS I VT 3643: Symposium in Instrumental Music	2
MUS I VT 3670: Diction in Singing: Italian	1
MUS I VT 3671: Diction in Singing: German	1
MUS I VT 3672: Diction in Singing: French	1
MUS THRY 4230: Choral Arranging	2
Instrumental and vocal tracks: all of the above (plan on an extra year)	
Studio instruction, piano, recital	15

Studio Instruction:

Four semesters of MUS APMS 2455 on major instrument 4
MUSIC 3455 (four semesters on major instrument)..... 4

Piano Proficiency: must enroll in piano class until proficiency completed

MUS I VT 1610: Group Piano for Music Majors I..... 1
MUS I VT 1611: Group Piano for Music Majors II..... 1
MUS I VT 2610: Group Piano for Music Majors III 1
MUS I VT 2611: Group Piano for Music Majors IV

(remedial, taken only if proficiency is not demonstrated with Music 2610)

Ensembles

Students must enroll in one ensemble every semester of full-time enrollment except the student teaching semester. Students majoring in vocal and instrumental must take one ensemble in each area per semester. One semester of Marching Mizzou is required for band instrument majors.

Recital Attendance

Students must enroll in MUS GENL 1091 for a minimum of six semesters.

For Piano pedagogy or strings, see advisor.

Emphasis in General Science

This emphasis combines biology, chemistry, earth science and physics into one certificate with core classes common to all areas. The certificate allows a teacher to teach any of the beginning sciences. The track in the specific science is required for teaching advanced courses in that area. (Tracks are not listed on transcripts.)

A content area GPA of at least 2.500 is required for Missouri Teacher Certification. (2.750 UM and overall GPA required for graduation.)

Students may select tracks in biology, chemistry, earth science or physics. In addition to the University general education and the secondary professional requirements, students who intend to teach science must complete a core of courses in the sciences and related fields.

Phase II 14

Major Program Requirements – Educational Studies (BES)

The educational studies major is the only option for the BES degree. It may be selected by students desiring to work in a field related to education; however, this degree does not lead to teacher certification. Students interested in the BES degree may complete an individualized major course of study developed with an advisor in the department. Students must have completed a minimum of 24 hours of Education coursework prior to admission.

In addition to University requirements, such as University general education and graduation requirements, students must complete the following degree requirements.

- World/international and multicultural requirements
 - World/international: All majors must complete a course that reflects the study of world/international topics (course may also be used as part of the behavioral and social science portion of University general education requirements).
 - Multicultural studies: Students address this requirement by demonstrating competence on multicultural studies course from a list of 50 in the advising office.
- A minimum of 24 credits in the study of the field of education
- A minimum of 24 credits in a concentration option unique to other majors available at MU

The Bachelor of Educational Studies (BES) degree prepares students for education-related careers. The College of Education will not recommend certification to teach in the public schools on the basis of the BES degree.

Procedures for admission to Phase II in the Bachelor of Educational Studies degree parallel those for the Bachelor of Science in Education degree. To qualify for admission to Phase II, the applicant must meet the following requirements:

- Regular admission to the College of Education
- 2.750 UM and overall GPA (on a 4.000 scale)
- 22 on ACT or 1010 on the Re-centered SAT
- ENGLISH 1000 with a grade in the C range
- MATH 1100/1120 with a grade in the C range
- Completion of at least 45 credits
- Possession of characteristics associated with effective performance in a professional role at the level(s) and in the area(s) of emphasis selected
- Completion of an application for the BES with the appropriate signatures/approval

Certificate Requirements

None are available. For certification to teach, see Licensure information previously cited in the College of Education information.

Minor Program Requirements

The College of Education does not offer a minor at the undergraduate level. A minor in college teaching is offered as part of a master's, Education Specialist or Ph.D. degree.

Sample Eight-Semester Programs College of Education

Bachelor of Science in Education with a major in Secondary Education and an emphasis in Art Education

This program lists several semesters that include a higher number of credits than is desirable. The department recommends that students plan to complete some credits during high school or plan to take several summer courses to complete the program in four years.

CURRICULUM AND INSTRUCTION COURSES

C I 1150--Learning Strategies for College Students (3).Students' learning strategies are assessed, and their needs are given greatest emphasis. Learning through reading and listening are given major consideration as are the corollary skills of vocabulary expansion, studying and note taking.

C I 1300--First Aid (2).Study of the theory and practice of first aid procedures. Certification available.

C I 1320--Scuba Theory (3).The curriculum of the class includes bio-physics, hydrostatic pressures, physiology, fundamentals of compressed gases, environmental conditions, mechanics, first aid as it relates to diving, and planning speciality dives such as decompression, night, cave, ice, salvage and wreck diving.

C I 3630--Aiding: Intermediate Grades (1-2).Instructionally related activities in intermediate grade classrooms. Student works 30 hours with supervision for each credit. Graded on an S/U basis only. Prerequisite: instructor's consent.

C I 4010--Student Teaching (cr.arr).Hours, credit must be arranged with director of student teaching. Must apply during February for following year. Prerequisites: special methods courses in area of specialization.

C I 4085--Problems in Curriculum and Instruction (1-3).Studies professional programs and issues in health or physical education. Prerequisite: instructor's consent.

C I 4500--Emergent Language in Early Childhood (3).Study of language learning in young children; how meaning of the environment is gained through language; implications for teachers working with children from varying

language-learning environments.

C I 4510--Assessment in Early Childhood Education (3).A study of formal and informal assessment instruments and procedures used to measure progress and determine developmentally appropriate curriculum for children in early childhood settings.

C I 4520--Literature in the Elementary School (3).Surveys the field of literature for children and adolescents, with emphasis on selected readings of various types of literature. Prerequisites: junior standing or instructor's consent.

C I 4540--Teaching of Reading (3).Materials, methods used in teaching reading in elementary grades. Prerequisites: E&CPSY 2400 and professional standing.

C I 4570--Organization of Public School Art (2).Purposes, practices of art experiences in

elementary and secondary schools. Designed for teachers, supervisors, administrators.

C I 4580--Social Studies in the Elementary School (3). Problems in preparation, teaching of units with suitable materials, techniques. Prerequisites: ESC PS 2400, professional standing.

C I 4587--Seminar in Curriculum and Instruction (1-3). Seminar in Curriculum and Instruction

C I 4600--Diagnosis and Remediation of Learning Problems in Math - Middle (3). The study of diagnostic and remedial instructional techniques for the teaching of mathematics. Emphasis is placed on alternative teaching methods and strategies.

C I 4610--Teaching Techniques and Curriculum in Elementary School Math (3). The mathematics program in the elementary school from viewpoint of goals, content, techniques and evaluation.

C I 4620--Information Literacy in Teaching and Learning (3). Discusses the nature, value, and power of information as product and process; organization, retrieval, and evaluation of information; explores the Internet and information superhighway; develops skills for resource based learning for classroom instruction; policy issues.

C I 4630--Health Education in the Elementary School (3). Defines teacher's role in school health program; investigates health needs of school children; focuses on teaching strategies, health resources and development of elementary school health education curricula and materials.

C I 4640--Motor Development in Early Childhood (3). Motor development of infants and children with emphasis on: study of interaction between biological and environmental factors affecting development, motor assessment techniques, and designing programs to enhance motor development. Prerequisite: ESC PS 2400.

C I 4650--Education in Human Sexuality (3). The biological, psychosocial and educational aspects of human sexuality with special emphasis on instructional activities related to interpersonal communication, decision-making ability and clarification of values, course is designed for both teachers and health-care personnel. Prerequisite: CI 1310 or equivalent.

C I 4660--Drug Education (3). The psychosocial, legal and pharmacological aspects of the recreational use of over-the-counter and street drugs are investigated with emphasis being placed on personal decision making, principles of school and community drug education, rehabilitation and community health services.

C I 4680--Teaching Legal Rights and Responsibilities of Citizenship (2). An introductory course for teachers and undergraduate students dealing with the teaching of the basic legal concepts which underlie effective citizenship.

C I 4960--Special Readings in Curriculum and Instruction (1-3). Directed study of literature and research reports in education.

CURRICULUM AND INSTRUCTIONAL VOCATIONAL COURSES

C I V 1050--Principles of Sales (3). Provide the student with the concepts, tools and skills

to become a professional salesperson. Emphasis is placed upon participation and performance of sales skills.

C I V 1070--Keyboarding and Word Processing Concepts (3). Instruction in mastering the keyboard and operative parts of a microcomputer. Preparation of business communications: reports; and legal; medical; and government documents. Special emphasis on developing high standards of keyboarding speed and accuracy.

C I V 1110--Principles of Retailing (3). Examines problems, opportunities and trends in retailing. Problems and cases deal with store organization, budgeting, control, personnel and operation.

C I V 1210--Introduction to Microcomputers (1). An overview of the hardware and software components of a microcomputer system.

C I V 2050--Merchandising (3). Develop basic competencies essential to successful merchandising. Studies skills essential in merchandising, and analysis of merchandising functions and activities.

C I V 2110--Business and Interpersonal Communications (3). Study of communication theory and principles as applied to business situations and practices; development of communications skills in the area of communication such as speaking, writing, listening, and nonverbal communication.

C I V 2150--The Virtual Workplace (3). Encompasses the management of alternative work environments and the unique situations that arise by addressing the use of email, computerized meetings, virtual office design, web page issues for business, and other technology for virtual work.

C I V 3110--Field Experiences in PAVTE (1-4). Supervised observational and instructionally related activities within one of the PAVTE program areas at the secondary or postsecondary level. Student participates 30 clock hours for each semester hour of credit. Graded on S/U basis only.

C I V 3150--Directed Occupational Experience (1-4). Reports based on employment experience in selected occupations combined with related conferences and/or seminars. May repeat until four semester hours accumulated.

C I V 3510--Human Relations in Organizations (3). Principles, theory, processes and problems of effective human relations in marketing organizations.

C I V 4085--Problems in Curriculum and Instruction-PAVTE (cr.arr.). Study of professional programs and issues or technical problems related to the field of practical arts and vocational education.

C I V 4387--Seminar in Practical Arts and Vocational Technology Education (1-3). Seminar experiences for students within one of the PAVTE program areas. Prerequisite: instructor's consent.

C I V 4510--Coordination of Cooperative Occupational Education (3). Problems and procedures in the operation of cooperative occupational education programs. Especially designed for those who can qualify as coordinators of occupational education programs of a cooperative nature.

C I V 4550--Utility Software for Microcomputers (2). An introduction to major types of microcomputer utility programs, including desktop publishing, presentation, spreadsheet, and data base. Prerequisite: C I-V 1210 or equivalent.

C I V 4570--Vocational Guidance (2-3). Problems, methods, procedures involved in assisting individuals in choosing, preparing for, entering upon, progressing in their vocation. For teachers, counselors, school administrators.

C I V 4610--Field Study in Occupational Education (1-4). Directed observation in a cross section of business and industry combined with reports, weekly seminars and/or conferences. May repeat until four semester hours accumulated.

C I V 4650--Document Planning and Design (3). Using the hands-on approach, students will develop skills in the planning, design layout, and creation of various business documents, as well as the ability to evaluate various types of documents. Prerequisite: C I-V 4550 or equivalent.

C I V 4710--Business Software Applications (3). Advanced concepts, features, and applications central to the major types of business software--spreadsheets, database management, word processing, graphics, and communications. Prerequisite: C I-V 4550/7550 or equivalent.

C I V 4750--Occupational Analysis (2). Techniques, procedures of analyzing occupations into their basic elements. Required of trade teachers, coordinators.

C I V 4770--Methods in Vocational Education for the Disabled & Disadvantaged (3). (same as Special Education 4390). Study of legislation, interagency cooperation, curriculum, transition, evaluation/grading role of support personnel. For educators, counselors and administrators working in vocational settings with special needs students and students with disabilities.

C I V 4780--Development & Assessment of Vocational-Technical Curriculum (3). Curriculum development/assessment course focused on competencies, curriculum selection, organization, development, and assessment in the context of the Missouri Vocational Instructional Management System. Prerequisite: ESC PS 2400 and junior standing.

C I V 4790--Laboratory Planning and Management (3). This course is designed to acquaint the student with the procedures, techniques and skills necessary for proper organization, management, care, and utilization of career and technical education facilities, programs, equipment, and materials. Prerequisites: C I-V 1210 and 4550.

C I V 4801--Topics in Practical Arts and Vocational Technology Education (cr. arr.). Topics in Practical Arts and Vocational Technology

C I V 4810--Technology and Industry Education Methods (3). Develops specialized organization and administration capabilities for Industrial and Technology Education. Topics include managing activities, individualized instruction, nontraditional students, students with disabilities, and emerging technologies. Prerequisite: professional standing, senior status.

CIV 4830--Curriculum Content in Marketing Education (3).Curricular development process, knowledge of core area and competencies of Marketing Education Program. Selection of instructional material. Prerequisite: ESC PS 2400.

CIV 4840--Methods of Teaching Marketing Education (3).Instructional materials, methods and techniques used to teach the marketing education curriculum. Includes evaluating delivery of instruction. Prerequisite: CIV 4780 and 4830.

EDUCATION, SCHOOL AND COUNSELING PSYCHOLOGY COURSES

ESC PS 1010--Introduction to Psychology in Education (3).This course is a survey of the study of human behavior as applied to educational settings from the perspective of educational counselors and other human service professionals. Topics include personality theories, the self, stress, coping, interpersonal communication and relationships, diversity issues, development learning, sexuality, health and well-being, counseling and assessment.

ESC PS 1100--American Sign Language I (5).ASL 1 is designed to provide an introduction to American Sign Language (ASL). Students will develop basic expressive and receptive skills in ASL, the manual alphabet, numbers, signed vocabulary, and an overview of syntax and grammar. Graded on A-F basis only.

ESC PS 1200--American Sign Language II (5).ASL 2 is designed to increase students understanding of American Sign Language. Students will increase their expressive and receptive skills, the manual alphabet, numbers, signed vocabulary, and understanding of syntax and grammar. Prerequisites: ESC_PS 1100 and instructor consent. Graded on A-F basis only.

ESC PS 1901--Topics in Educational School, and Counseling Psychology - General (1-3).Topics place holder for lower division courses.

ESC PS 2100--Career Explorations (1-3).Contribution of career development theory to choice of career and/or major. Exploration of personal and social determinants of career choice. Class consists of lecture, laboratory experiences, and use of facilities at the Career Planning and Placement Center.

ESC PS 2150--American Sign Language III (3).ASL 3 is designed to build upon signing skills and concepts exposed to in ASL 2. Advanced grammatical constructions and vocabulary are introduced. Exams test both expressive and receptive skills. Class conducted in sign language. Prerequisite: ESC_PS 1200 or permission of instructor. Graded on A-F basis only.

ESC PS 2200--Introduction to Personal Awareness and Group Process (3).Small group experiential learning experience designed to provide a catalyst for students to evaluate and clarify attitudes and values reflected in everyday behavior and lives which impact professional functioning. Prerequisite: ESC PS 1010 or instructor's consent.

ESC PS 2250--American Sign Language IV (3).ASL 4 students increase ability to produce and comprehend American Sign Language as it is used in educational, legal, medical and social service settings. Advanced grammatical constructions and vocabulary are introduced.

Class conducted in sign language. Prerequisite: ESC_PS 1200 and 2150. Graded on A-F basis only.

ESC PS 2300--Personal and Social Effectiveness (3).Combination of didactic and experiential learning experiences designed to foster knowledge, skill, and awareness toward the development of personal and professional strategies for optimal human functioning. Prerequisites: ESC PS 1010 or instructor's consent.

ESC PS 2400--Learning and Instruction (2).The nature of human learning processes with implications for instruction. Emphasis on bases of and readiness for learning, types of learning, memory forgetting and transfer, and related topics. Prerequisites: PSYCH 1000.

ESC PS 2500--Child Development (3).The psychological, intellectual, social, and physical development of children. Prerequisites: PSYCH 1000.

ESC PS 2600--Adolescent Development (2).The psychological, intellectual, social and physical development of adolescents. Prerequisite: PSYCH 1000.

ESC PS 2700--Psychological Perspectives in Sport (3).Survey of sport psychology literature with focus upon such topics as personality, positive and negative affect, cognitive and behavioral intervention, motivation, aggression, audience effects, team cohesion, team building, leadership, exercise, and multicultural issues.

ESC PS 2901--Topics in Educational School, and Counseling Psychology - General (1-3).Topics place holder for lower division courses.

ESC PS 3085--Problems in Educational, School, and Counseling Psychology (1-3).Prerequisite: instructor's consent.

ESC PS 3100--African-American Psychology (3).(same as Black Studies 3100). The research, theories and paradigms developed to understand the attitudes, behaviors and psychosocial realities of African-Americans are discussed. Prerequisite: PSYCH 1000.

ESC PS 3200--Black Feminism (3).This course outlines the basic principles and practices of Black feminism in the United States. Examination of the multiple systems of oppression on Black women's lives and Black women's collective actions against social structures will occur. Prerequisites: PSYCH 1000 or instructor's consent.

ESC PS 3400--Educational Measurement (2).Basic concepts of standardized testing, evaluation techniques, and interpretation of test scores for the improvement of the instructional process. Prerequisites: PSYCH 1000.

ESC PS 3901--Topics in Educational School, and Counseling Psychology - General (1-3).Topics place holder for lower division courses.

ESC PS 4087--Seminar in Educational, School, and Counseling Psychology (1-3).Prerequisite: instructor's consent.

ESC PS 4100--Foundations of Educational Psychology (3).A survey course covering learning, development, and measurement. Prerequisites: PSYCH 1000.

ESC PS 4115--Human Learning (3).An introduction to the basic principles of learning. Focus is on principles of learning which have the greatest utility for professional educators. This course provides a foundation for more

advanced courses in human learning. Prerequisite: ESC PS 4100.

ESC PS 4120--Foundations of Counseling Psychology (3).Survey of contemporary theories underlying individual feminist, family systems, and multicultural approaches to counseling. Introduction to professional and ethical issues in Counseling Psychology. Prerequisite: departmental consent.

ESC PS 4130--Parent Counseling and Consultation (3).For personnel working with parents in professional settings. Examines current family needs and child-rearing practices. Basic skills in diagnosis, counseling, consultation, parent education are developed. Prerequisite: ESC PS 4120.

ESC PS 4150--Interviewing and Counseling (3).Study of beginning interviewing and counseling skills applied to helping relationships in human services professions. Emphasis placed on learning helping skills in small group format. Lab required. Prerequisites: PSYCH 1000 or 1010.

ESC PS 4160--Developmental Aspects of Human Learning (3).Investigates aspects of human development that affect classroom learning. Topics include parenting style, divorce, friendship, mental health, attachment, play, aggression, culture, and media.

ESC PS 4170--Introduction to Educational Statistics (3).Introduces statistical techniques employed in education, including descriptive statistics, correlation, simple regression and hypothesis testing. Prerequisite: college algebra or equivalent. Math Reasoning Proficiency Course.

ESC PS 4180--Foundations of Rehabilitation (3).The vocational and independent living rehabilitation system for disabled persons. Concept of disability, its social psychological implications, and techniques of preparing disabled persons for adult adjustment. Prerequisites: PSYCH 1000.

ESC PS 4185--Health Behavior: Drug and Sexuality Education (3).Psychological, social, and physical factors related to drug taking and sexuality behaviors. Prerequisites: C11310 or equivalent or consent of instructor.

ESC PS 4190--Alcohol Abuse and Rehabilitation I (3).Covers historical perspective, definition and measurement of the problem, classifications and theories about the etiology of alcoholism. Prerequisites: ESC PS 4120 or 4180 or instructor's consent.

ESC PS 4220--Measurement of Cognitive Abilities (3).Analysis of the function of psychological testing and a critical examination of various achievement, aptitude, and intelligence assessment instruments.

ESC PS 4901--Topics in Educational School, and Counseling Psychology - General (1-3).Topics place holder for lower division courses.

ESC PS 4940--Human Services Practicum (3).Supervised practice in a human services agency (approved by the College) focusing on the development and direct practice of human services professional skills. Prerequisites: senior standing; admission to professional standing.

ESC PS 4960--Readings in Educational, School, and Counseling Psychology (1-3).Prerequisite: instructor's consent.

ESC PS 4970--Senior Seminar: Professional Issues in Human Services (3). Advanced senior seminar, capstone course in human services. Project-based learning activities provided individualized focus and culmination of training. Prerequisites: senior standing and admission to professional standing.

EDUCATION HONORS COURSES

EDUC H 3050H--Special Readings in Education Honors (1-4). Directed study of literature and research reports in education. Prerequisites: instructor's consent and Honors program director.

EDUC H 3060H--Honors Seminar in Education Honors (1-2). Prerequisites: instructor's consent and Honors program director.

EDUC H 3070H--Special Practicum in Education Honors (1-4). Directed practicum experience with students in educational settings. Prerequisites: instructor's consent and Honors program director.

EDUC H 3080H--Honors Research in Education Honors (1-4). Joint research in education with a member of the education faculty. Prerequisites: instructor's consent and Honors program director.

EDUCATION, LEADERSHIP AND POLICY ANALYSIS

ED LPA 3100--Foundations of Education (1-3). Focus on developing a theoretical and conceptual knowledge of leadership. In addition, skill building-exercises will take place through group case studies and role playing exercises allowing each student to identify and achieve methods for personal development. Only the Ambassadors section can be repeated up to eight times.

INFORMATION, LEADERSHIP AND POLICY ANALYSIS

IS LT 1110--Library Research (1). Designed to improve students' use of library facilities, services, resources and to assess information critically; instruction in use of library's catalog, databases, government information, etc.

IS LT 1111--Information Use and Student Success (1). In this course, students will learn to frame meaningful questions, gain knowledge and skills to succeed academically, understand the structure and content of information resources, evaluate information, and use information resources as genuine learning tools.

IS LT 4085--Problems in Information Science and Learning Technologies (cr. arr.). Independent, directed study on a topic in the field of information science and learning technologies. Prerequisite: departmental consent.

IS LT 4301--Introduction to Information Technology (3). The nature of information and information transfer in the institutional setting; covers the culture of information in society, standards for information processing and transfer, and networking in communications perspectives of information providing agencies.

IS LT 4305--Foundations of Library and Information Science (1). The course introduces students to the background, contexts, organizations, and key issues and terms related to library and information science and the information

professions.

IS LT 4310--Seminar in Information Science and Learning Technologies (1-3). Discussion and critical study of current developments in the field of information science and learning technologies.

IS LT 4312--Principles of Cataloging and Classification (3). Elementary cataloging of library materials using Dewey Decimal Classification and Library of Congress classification with emphasis upon subject headings, also looking at other existing classification schemes presently being used and other bibliographic organization.

IS LT 4313--Managing Collections and Access (3). Selection of materials for libraries and information agencies, policies for collection management, freedom and diversity of information, access to information and evaluation of collections and access.

IS LT 4315--Management of Information Agencies (3). Concepts of management applied to libraries and information systems; management tools, programming, models and simulation in an environment of an information producing or disseminating agency.

IS LT 4350--Special Readings in Information Science and Learning Technologies (cr.arr.). Prerequisites: departmental consent.

IS LT 4357--Web Application Development I (3). Learn to develop Web applications to support and instruction using ASP, Net, PHP, or Java. Students learn fundamental web programming including: interacting with users through web forms, storing and retrieving data in relational databases, Objected-Oriented programming and web application security.

IS LT 4358--Web Application Development II (3). Students perform assignments and projects to develop Web 2.0/3.0 applications. Students individually or in group will analyze and learn how Web applications in learning environments operate and develop learning applications of their own. Prerequisite: IS_LT 4357.

IS LT 4359--Database Development (3). Students in this course will learn how to design and develop flexible and efficient data structures to support database driven web applications. Students will develop applications using database management systems, using the Structured Query Language (SQL), and using one of the following programming languages: Perl, PHP, or Java. Specific concepts covered in this course include database data types, table design, SQL statements, optimization, normalization, and security. Prerequisite: IS LT 4357.

IS LT 4360--Introduction to Web Development (3). Basic web design and HTML. Covers file transfer and UNIX/LINUX servers management. Develops understanding of web graphic formats. Emphasizes user interface, navigation, and instructional design in building web sites. Online. Graded on A/F basis only.

IS LT 4361--Introduction to Digital Media (3). Hands-on approach to multimedia production techniques. Develops understanding of image software, video software, and scanners, digital cameras, digital video cameras, graphics tablets. Graded on A/F basis only.

IS LT 4364--Flash Authoring (3). Teaches

skill required to plan, develop and evaluate a multimedia project using digital authoring software. Emphasizes instructional design and user interface issues. Course is production-based. Graded on A/F basis only.

IS LT 4368--Technology Across the Curriculum (3). The purpose of adding this course is to meet the needs of non-majors in IS & LT who need or desire a course related to technology integration in K-12 schools. Existing courses in our program assume that students enter with a higher level of knowledge regarding technology and learning theory than non-majors have. The addition of this course will allow non-majors to work together in a course that is specifically designed for them.

IS LT 4370--Intermediate Web Development (3). Development of design and web authoring skills. Interactivity through use of cgi scripts and javascript. Design capabilities using Style Sheets. Gain expertise required for the production of HTML documents incorporating these advanced techniques. Prerequisite: ISLT 4360 or instructor's consent.

SPECIAL EDUCATION COURSES

SPC ED 3300--Special Readings in Special Education (1-3). Directed study of literature and research reports in special education.

SPC ED 3310--Aiding: Special Education (1-3). Supervised observational and instructionally-related activities in special education.

SPC ED 3500--Student Teaching in Special Education (cr.arr.). Ten-week, full-time placement in Special Education classroom; field-based opportunity for the application of competencies developed in initial certification area(s). Prerequisite: advisor's consent.

SPC ED 4300--Introduction to Special Education (3). Introductory overview of the field of special education; historical developments, characteristics of special populations, and compliance with state and federal regulations.

SPC ED 4305--Introduction to Special Education for Regular Educators (3). Introduction to the field of special education for other majors; survey of exceptionalities with emphasis on the mainstreaming exceptional students.

SPC ED 4310--Behavioral Management for Exceptional Students (3). Study of classroom management and applied behavior analysis strategies. Focus on teacher as decision-maker in the design, implementation, evaluation of individual and group management programs. Prerequisite: SPC ED 4300.

SPC ED 4315--Instructional Methods and Technology for Exceptional Students (3). Study of direct instructional models as applied to academic and functional skills. Examination of instructional materials, media, technology applied to instruction of exceptional students. Prerequisite: SPC ED 4300.

SPC ED 4320--Assessment and Evaluation in Special Education (3). Procedures and instruments used in the assessment of individual with disabilities, including standardized and non-standardized measures of intellectual ability, academic achievement, oral language, social/emotional behaviors, career/vocational needs. Prerequisite: SPC ED 4300.

SPC ED 4325--Language Development of Exceptional Students (3). Study of language and communication issues and disorders in

special education; normal and atypical language development; language assessment and intervention models and programs. Prerequisite: SPC ED 4300.

SPC ED 4330--Collaboration and Consultation in Special Education (3). Study of communication, problem-solving, collaboration strategies. Application of strategies to work with exceptional students, their families, other professional members of interdisciplinary, interagency teams. Prerequisites: SPCED4300.

SPC ED 4335--Assessment of Functional Skills of Students w/Severe Disabilities (3). Trains prospective teachers in standardized and criterion-referenced methods of assessment in various curriculum areas for moderately and severely handicapped students. Opportunities to apply various assessment techniques. Prerequisites: SPC ED 4300 and 4395.

SPCED4340--Curriculum for Persons With Severe Disabilities (3). Study of development and implementation of functional, age-appropriate, community-referenced curriculum for persons with severe handicaps. Curriculum goals and instructional strategies in community access, domestic, vocational, recreation skills. Prerequisites: SPC ED 4300 and 4395.

SPC ED 4345--Mngng. Hlth. Rel. Prb. & Techn. f/Disabled Child. in Therp. Rec. (3). Provides prospective therapeutic recreators, teachers and rehabilitation personnel with information regarding managing health problems of the disabled child. Details regarding medical devising and/or technology are emphasized.

SPC ED 4350--Augmentative Communication for Persons With Severe Disabilities (3). Aided and unaided augmentative communication systems and nonspeech systems; techniques of teaching functional communication programs. Prerequisites: SPC ED 4300 and 4395.

SPC ED 4370--Literacy in Special Education (3). Addresses specific literacy needs of special needs students with a focus on assessment and instruction for special needs students in regular classrooms. Pre co-requisite: SPC ED 4300, Literacy Methods.

SPCED4371--Literacy in Special Education II (3). Advanced study in literacy methods and research for students with disabilities. Graded on A/F basis only. Prerequisites: SPC_ED 4370 or 7370.

SPC ED 4375--Cross Categorical Special Education (3). Study of characteristics of students with cross categorical disabilities and other pertinent issues including inclusion, assessment, and evaluation practices. Prerequisite: professional standing in Phase II.

SPC ED 4380--Methods in Cross-Categorical Special Education (4). This course is designed to provide students with research-based instructional and behavior management methods for use with student with cross-categorical disabilities. Prerequisites: professional standing in Phase II, SPC ED 4375, 4940.

SPC ED 4390--Methods in Vocational Education for the Disabled & Disadvantaged (2-3). (same as Curriculum and Instruction-Vocational 4770). Study of legislation, interagency cooperation, curriculum, transition, evaluation/grading role of support personnel. For educators, counselors and administrators

working in vocational settings with special needs students and students with disabilities. Prerequisite: SPC ED 4300.

SPC ED 4395--Introduction to Severely Handicapped (3). Study of historical events, legislation, casual factors, identification, and programs related to persons with severe handicaps. Emphasis on education and related services enabling these individuals to participate in integrated settings. Prerequisite: SPC ED 4300.

SPC ED 4401--Topics in Special Education (3). In-depth study of certain developments, findings, trends and issues in one or more areas of special education.

SPC ED 4940--Cross-Categorical Special Education: Practicum I (1-4). Involvement in meaningful field-based activities that extend and/or apply content information from Special Education 4375. Pre/co-requisites: SPC ED 4375, professional standing in Phase II.

SPCED4941--Practicum in Cross-Categorical II (1-4). The purpose of this course is to provide students with experience in applying the content of Special Education 4380 (i.e. assessment and intervention strategies for use with students with cross categorical disabilities). Prerequisites: SPC ED 4375 and 4940. Pre/co-requisites: SPC ED 4380. This course may be repeated for credit.

SPC ED 4972--Capstone Seminar and Portfolio in Special Education (1). Students in final student teaching internship will meet weekly to examine and compare their internship experiences. Analysis, synthesis, evaluation and problem solving are the focus of the examination of various aspects of pedagogy and experience. Additionally, students will develop and submit for scoring their State mandated certification portfolio. Prerequisites: TDP 4971, concurrent enrollment in final semester of student teaching internship.

TEACHER DEVELOPMENT COURSES

TDP 1100--Orientation (1). This course familiarizes and orients students with MU resources, College of Education programs and expectations and career options. Graded on S/U basis only.

TDP 1110--Orientation: Art Education (1). This course familiarizes and orients students with MU resources, College of Art Education programs and expectations and career options, emphasizing Art Education. Graded on S/U basis only.

TDP1120--Orientation: Math Education (1). This course familiarizes and orients students with MU resources, College of Education programs and expectations and career options, emphasizing Math Education. Graded on S/U basis only.

TDP 1130--Orientation: Middle School Education (1). This course familiarizes and orients students with MU resources, College of Education programs and expectations and career options, emphasizing Middle School Education. Graded on S/U basis only.

TDP 1140--Orientation: Music Education (1). This course familiarizes and orients students with MU resources, College Education programs and expectations and career options,

emphasizing Music Education. Graded on S/U basis only.

TDP 1150--Orientation: Science Education (1). This course familiarizes and orients students with MU resources, College of Education programs and expectations and career options, emphasizing Science Education. Graded on S/U Basis only.

TDP 1160--Orientation: Speical Education (1). This course familiarizes and orients students with MU resources, College of Education programs and expectations and career options, emphasizing Special Education. Graded on S/U basis only.

TDP 1200--Elements of Health Education (2). Health needs of university students and school-age children are investigated by knowledge and decision-making activities concerning personal and community health problems.

TDP 2000--Inquiry Into Learning I (3). This course is designed to focus students on the central themes of learning and teaching. Emphasis will be placed on the interaction of theory, philosophy and practice as related to the field of education. Required for Phase I of the Teacher Development Program.

TDP 2005--Inquiry into Learning I - Field Experience (1). This field experience course supports the Inquiry into Learning I, component of Phase I. Prerequisite: department consent. Graded on S/U basis only.

TDP2040--Inquiring into Schools, Community and Society I (3). This course focuses on schooling in American society, the school community, the school culture and students' lives and identities. Studied are the political, cultural, and economic conditions of the schools.

TDP2044--Inquiry into Schools, Community and Society: Field (1). This field experience course supports the Inquiring into Schools, Community and Society (ISCS), component of Phase I. Graded on S/U basis only.

TDP 3600--Aiding: Nursery/Day Care Programs (1-2). Instructionally related duties in the preschool classroom during semesters and summer. Student works 30 hours with supervision for each credit. Prerequisite: instructor's consent.

TDP 3610--Aiding: Kindergarten (1-2). Instructionally related activities in kindergarten classroom during semesters and summers. Student works 30 hours with supervision for each credit. Graded on an S/U basis only. Prerequisites: instructor's consent.

TDP 3620--Aiding: Primary Grades (1-2). Instructionally related activities in primary grades. Student works 30 hours with supervision for each credit. Graded on an S/U basis only. Prerequisite: instructor's consent.

TDP 3630--Aiding: Intermediate Grades (1-2). Instructionally related activities in intermediate grade classrooms. Student works 30 hours with supervision for each credit. Graded on an S/U basis only. Prerequisite: instructor's consent.

TDP3640--Aiding: Secondary Schools (1-2). Instructionally related clinical/administrative and monitorial activities in the secondary classroom during semesters and summer. Student works 30 hours with supervision for each credit. Graded on a S/U basis only. Prerequisite:

instructor's consent.

TDP 4020--Inquiry into Learning II (3).Inquiring into Learning II addresses topics in the foundations of pedagogy including classroom management, behavior management, and students with special needs. Prerequisite: Progression into Phase II. Graded on A/F basis only.

TDP 4030--Physical Education Activities for the Elementary School (2).This course is designed to be part of a larger whole in the education of teacher candidates. The focus of this course is incorporation of wellness/fitness into as many facets of the teachers daily schedule as possible.

TDP 4060--Inquiring into Schools, Community and Society II (3).Required 3 hour course for students pursuing teacher certification. Designed to transition students into the teaching internship through study of teacher roles, school organizations and cultures, and community contexts. Prerequisites: TDP 2040/7040.

TDP 4085--Problems in Teacher Development (1-5).Studies issues and trends in instruction, learning and curriculum development. Prerequisite: departmental consent.

TDP 4090--Early Childhood Seminar I (2).Consideration of major historical influences on early current childhood curriculum and assessment practices, with emphasis on the role of the family. Prerequisite: admittance to Phase II required.

TDP 4110--Working with Infants and Toddlers (2-3).Experience working with children aged 6 weeks to 2 1/2 years and their families. Opportunity to apply theories of cognitive, language, and social development. Prerequisite: course in child development and admission to Phase II; admittance to College of Education required.

TDP 4120--Emergent and Developing Literacy in Early Childhood (5).Strategies for assessing and supporting young children's literacy development. Must take concurrently with TDP 4200, 4210 and K-3 field experience. Prerequisite: admittance to College of Education required.

TDP 4124--Emergent & Developing Literacy Early Childhood Field Experience (2).This field experience supports the TDP 4120 component of Phase II. Field experience expectations are delineated in the TDP 4120 course syllabi. Phase II admittance required. Graded on a S/U basis only.

TDP 4130--Teaching & Learning Math, Sci. & Social Studies w/ Young Children (8).Strategies for assessing and supporting young children's math, science and social studies learning. Must take concurrently with a K-3 field experience. Prerequisite: completion of ECE Language/Literacy block; admittance to College of Education required.

TDP 4134--Teach & Learn Math, Sci & Soc Studies w/Young Children Field Experience (3).This field experience supports the TDP 4130 component of Phase II. Field experience expectations are delineated in the TDP 4130 course syllabi. Phase II admittance required. Graded on a S/U basis only.

TDP 4140--Early Childhood Seminar III (3).Reflection on the relationship of theory and practice in ECE. Consideration of various topics

including individualizing curriculum, working with special needs children, and working with diverse families. Prerequisites: completion of Early Childhood Seminar III; admittance to Phase II required.

TDP 4160--Motor Development in Young Children (2).For Early Childhood majors. Study of young children's motor development. Must be taken as part of the UTD ECE Motor/Art/Music block. Prerequisite: TDP 4120/7120, 4124/7124, 4200/7200, 4210/7210 and admittance to College of Education required.

TDP 4170--Pre-Kindergarten Student Teaching (5).Application of knowledge of child development in working with children aged 2-6 and their families. Emphasis on planning and implementing developmentally appropriate practice. Prerequisite: admission to Phase II and completion of Literacy Block; admittance to College of Education required.

TDP 4194--Elementary Education Field Experience I (1-3).Seminars and diverse 1-5 grade classroom experience focus is on the learner and learning in the elementary school. Prerequisites: TDP 2000, TDP 2005 or 4085, TDP 2040, TDP 2044. Must be in Phase II. Graded on a S/U basis only.

TDP 4200--Young Children's Emergent Language (2).For Early Childhood and Elementary Education majors. Study of young children's language development and implications for teachers. Must take with TDP 4120, 4210, and K-3 field experience. Prerequisite: admittance to Phase II; admittance to College of Education required.

TDP 4210--Children's Literature (2).For Early Childhood and Elementary Education majors. Surveys the field of children's literature. Must be taken with TDP 4120, 4200, and K-3 field experience. Prerequisite: admittance to Phase II; admittance to College of Education required.

TDP 4211--Essential Literacy: Reading (3).A study of children's reading development encompassing writing, Children's Literature, and emergent language. Prerequisite: admittance into Phase II of Teacher Development Program.

TDP 4220--Emergent Literacy (3).Emergent reading. Instructional methods, diagnostic procedures, and materials appropriate for learners in elementary grades 1-3. Prerequisite: completion of Phase I.

TDP 4221--Essential Literacy: Writing (2).A study of children's writing development encompassing reading, Children's Literature, and emergent language. Prerequisite: Admittance into Phase II of Teacher Development Program.

TDP 4224--Emergent Literacy Field Experience (2).This field experience supports the TDP 4220 component of Phase II. Field experience expectations are delineated in the TDP 4220 course syllabi. Phase II admittance required. Graded on a S/U basis only.

TDP 4230--Developmental Literacy (2).Instructional methods, diagnostic procedures, and materials appropriate for learners in elementary grades 4-6. Prerequisite: TDP 4200/7200, 4210/7210 AND 4220/7220.

TDP 4231--Advanced Applications of Literacy (3).Provides pre-service teachers with information about the current reading cur-

riculum and practices in their on-site program. Topics will include assessment, diversity, children's literature, technology, planning and delivering instruction, professional development and management (classroom, behavior and lesson). Prerequisite: Admittance to Phase II of the Elementary Education Program; Education and graduate students only. Graded on A/F basis only.

TDP 4240--Art for Children (2).This course focuses on appropriate teaching methods and strategies for teaching art (studio, art history, aesthetic, and criticism), artistic development of children, and curriculum, instructional, and organization strategies for the art classroom; admittance to College of Education required.

TDP 4241--Inquiry into Literacy Applications (3).Provides pre-service teachers with opportunities to study literacy topics from a broad perspective. Topics will enable students to integrate literacy theory with field-based practice in relevant and meaningful ways through writing, discussion and self-reflection. Prerequisite: Admittance to Phase II of the Elementary Education Program. Education and graduate students only. Graded on A/F basis only.

TDP 4250--Music for Children (2).Preparation of early childhood and elementary education students with the skills, knowledge, and philosophical foundations necessary to integrate music into the early childhood and elementary curricula. Prerequisite: MUSIC NM 1608, 1612, 1618 or competency test; admittance to College of Education required.

TDP 4260--Elementary Social Studies (3).To develop knowledge of social studies and the skills to teach social studies in the elementary school. The course is designed to provide the student with the skills to plan, implement, and evaluate both the teaching and learning processes for the elementary social studies classroom. Prerequisites: acceptance into Phase II, Term: Winter of junior year or Fall of Senior year; admittance to College of Education required.

TDP 4264--Elementary Social Studies Field Experience (2).This field experience supports the TDP 4260 component of Phase II. Field experience expectations are delineated in the TDP 4260 course syllabi. Phase II admittance required. Graded on a S/U basis only.

TDP 4270--Teaching Mathematics in Elementary Schools (4).Study of elementary mathematics content and curriculum, instructional techniques and materials, organizational strategies, discipline integration techniques and assessment methods and practices for teaching mathematics in the elementary school. Prerequisites: MATH 1120, STAT 1200 and MATH 1360; admittance to College of Education required.

TDP 4274--Teaching Mathematics in Elementary School Field Experience (1).This field experience supports the TDP 4270 component of Phase II. Field experience expectations are delineated in the TDP 4270 course syllabi. Phase II admittance required. Graded on a S/U basis only.

TDP 4280--Teaching Science in Elementary Schools (3).Concepts, materials, methods in the elementary school program. Prerequisite: Phase I, Fall and Winter; admittance to College Education required.

TDP 4284--Teaching Science in Elementary Schools Field Experience (1).This field experience supports the TDP 4280 component of Phase II. Field experience expectations are delineated in the TDP 4280 course syllabi. Phase II admittance required. Graded on a S/U basis only.

TDP 4290--Interdisciplinary Teaching in Elementary Schools (3).Exploration of interdisciplinary models for teaching elementary school content. Topics of discussion and study will include: effective grouping strategies, action research, inclusion differentiation and teaming strategies, performance assessment, problem solving and critical thinking as a theme of instruction in all subjects, interdisciplinary student parent conferencing strategies. Prerequisite: admittance to College of Education required.

TDP 4294--Elementary Education Field Experience II (1-3).Seminars and diverse 1-5 grade classroom experiences focus is on the teacher and instruction in the elementary school. Prerequisites: TDP2000, TDP2005 or 4085, TDP2040, TDP2044, TDP4194, must be enrolled in Phase II. Graded on S/U basis only.

TDP 4300--Learning & Teaching Number & Operation in the Elementary School (3).The purpose of this course is to (a) develop a deeper understanding of number and operation, (b) connect the mathematical knowledge of number as described in (a) to the learning and teaching of number in elementary school. Prerequisites: acceptance into Phase II of the Teacher Development Program; concurrent enrollment in TDP 4305.

TDP4305--Learning & Teaching Number & Operation in Elementary School-Field (1).The purpose of this course is to: (a) develop a deeper understanding of number and operation, (b) connect the mathematical knowledge of number as described in (a) to the learning and teaching of number in elementary school. Prerequisites: acceptance into Phase II of the Teacher Development program; concurrent enrollment in TDP 4300. Graded on S/U basis only.

TDP 4310--Learning and Teaching Geometry in the Elementary School (3).The purpose of this course is to (a) develop a deeper understanding of geometry and measurement, (b) critically examine content and issues of the complexities in teaching and learning fundamental concepts of geometry and measurement in elementary schools. Prerequisite: acceptance into Phase II of the Teacher Development Program.

TDP 4314--Learning and Teaching Geometry in the Elementary School-Field Experience (1).The purpose of this course is to (a) develop a deeper understanding of geometry and measurement, (b) critically examine content and issues of the complexities in teaching and learning fundamental concepts of geometry and measurement in elementary schools. Prerequisites: acceptance into Phase II of the Teacher Development Program; concurrent enrollment in TDP 4310. Graded on S/U basis only.

TDP 4320--Middle School Social Studies I (3).Curriculum decision making, instructional planning, techniques and strategies, materials selection, approaches to assessment in middle

level social studies, all based upon early adolescent growth and development principles. Prerequisite: admittance to the College of Education required.

TDP 4324--Middle School Social Studies Field I (1).This field experience supports the TDP 4320 component of Phase II. Field experience expectations are delineated in the TDP 4320 course syllabi. Phase II admittance required. Graded on S/U basis only.

TDP 4330--Middle School Social Studies II (3).Address issues related to assessment and the purposes/ development of assessment for all levels of middle school social studies from classroom to national assessment. Assessment will be used to reflect upon curriculum/instruction, making revision, and set goals. Prerequisite: admittance to the College of Education is required.

TDP 4334--Middle School Social Studies Field Experience II (1).This field experience supports the TDP 4330 component of Phase II. Field experience expectations are delineated in the TDP 4330 course syllabi. Phase II admittance required. Graded on a S/U basis only.

TDP 4340--Middle School Science I (3).Concepts, materials, methods in middle school program. Prerequisite: Phase I admittance; admittance to the College of Education required.

TDP 4344--Middle School Science Field I (1).This field experience supports the TDP 4340 component of Phase II. Field experience expectations are delineated in the TDP 4340 course syllabi. Phase II admittance required. Graded on a S/U basis only.

TDP4350--Middle School Science II (3).Concepts, materials, methods in the middle school program. Prerequisite: Phase I; admittance to College of Education required.

TDP 4354--Middle School Science Field Experience (1).This field experience supports the TDP 4350 component of Phase II. Field experience expectations are delineated in the TDP 4350 course syllabi. Phase II admittance required. Graded on a S/U basis only.

TDP 4360--Intro. Teaching Mathematics in Middle & Secondary Schools (3).Introduction to teaching mathematics including: professional mathematics teacher associations and journals, learning theories related to teaching mathematics, tools, and materials for teaching mathematics, curriculum and instructional strategies (middle and lower high school level), and techniques for assessing mathematical understanding. Prerequisites: professional standing, MATH 1360; admittance to College of Education required.

TDP 4364--Intro. Teaching Math in Middle & Secondary School Field Experience (1).This field experience supports the TDP 4360 component of Phase II. Field experience expectations are delineated in the TDP 4360 course syllabi. Phase II admittance required. Graded on a S/U basis only.

TDP 4370--Teaching and Modeling Middle School Mathematics (3).Major issues/topics of the course include: nature of middle school students, lesson planning, developing and utilizing teaching strategies, assessment alternatives, teaching via problem solving and mathematical modeling, interdisciplinary strategies and materials, and techniques for assessing mathematical

understanding. Prerequisite: TDP 4360/7360 and at least 18 hours of required mathematics; admittance to College of Education required.

TDP 4374--Teaching and Modeling Middle School Mathematics Field Experience (1).This field experience supports the TDP 4370 component of Phase II. Field experience expectations are delineated in the TDP 4370 course syllabi. Phase II admittance required. Graded on a S/U basis only.

TDP 4380--Teaching Middle School Language Arts I (3).Integrates an understanding of literacy (highlighting reading) with content area demands, literature and other media texts, evaluation and inquiry within a context of diversity. Prerequisite: Admittance to Phase II of College of Education.

TDP 4384--Teaching Middle School Language Arts I Field Experience (1).This field experience supports the TDP 4380 component of Phase II. Field experience expectations are delineated in the TDP 4380 course syllabi. Phase II admittance required. Graded on a S/U basis only.

TDP4390--Teaching Middle and Secondary English/Language Arts II (3).Prepares prospective educators with the knowledge, skills, and strategies necessary for integrating and teaching the English/Language Arts, primarily focusing on the teaching of writing and critical thinking. Prerequisites: Admittance to Phase II of College of Education.

TDP 4394--Teaching Middle School Language Arts II Field Experience (1).This field experience supports the TDP 4390 component of Phase II. Field experience expectations are delineated in the TDP 4390 course syllabi. Phase II admittance required. Graded on a S/U basis only.

TDP 4400--Teaching Middle and Secondary English/Language Arts III (3).Prepare prospective educators by focusing on the teaching of American culture and critical thinking, through literacy, mediacy, oracy, and cultural artifacts. Prerequisites: TDP 4380/7380 and 4390/7390; admittance to Phase II of College of Education.

TDP 4404--Teaching Middle School Language Arts III Field Experience (1).This field experience supports the TDP 4400 component of Phase II. Field experience expectations are delineated in the TDP 4400 course syllabi. Phase II admittance required. Graded on a S/U basis only.

TDP 4410--Teaching, Engaging and Assessing Middle-Level Students (3).In this course students will learn about the specific and individual needs of middle-level students and develop the skills and understandings to meet these needs. Prerequisite: admittance to College of Education required.

TDP 4414--Teaching, Engaging & Assessing Mid-Level Students Field Experience (1).This field experience supports the TDP 4410 component of Phase II. Field experience expectations are delineated in the TDP 4410 course syllabi. Phase II admittance required. Graded on a S/U basis only.

TDP4420--Adolescent Literacy (3).Explores literacy implications of content areas. Topics include determining the difficulty of text, examining literature that supports content,

creating alternative assessments, and evaluating reading/writing strategies as tools for learning. (Required of all students obtaining certification in middle school or concurrent certification in middle and secondary school area(s) except language arts. Prerequisite: admittance to College of Education required.

TDP 4424--Middle School Literacy Field Experience (1). This field experience supports the TDP 4420 component of Phase II. Field experience expectations are delineated in the TDP 4420 course syllabi. Phase II admittance required. Graded on a S/U basis only.

TDP 4470--Teaching Secondary English/Language Arts I (3). Prepares prospective educators with the knowledge, skills, and strategies necessary for integrating and teaching the English/Language Arts, Primarily focusing on Young Adult Literature and critical thinking. Prerequisite: Admittance to Phase II of College of Education.

TDP 4474 Teaching Secondary English/Language Arts I Field Experience (1). This field experience supports the TDP 4470 component of Phase II. Field experience expectations are delineated in the TDP 4470 course syllabi. Phase II admittance required. Graded on a S/U basis only.

TDP 4480 Teaching Middle and Secondary English/Language Arts II (3). Prepares prospective educators with the knowledge and strategies necessary for integrating and teaching the English/Language Arts, primarily focusing on the teaching of writing and critical thinking. Prerequisite: admittance to Phase II of College of Education.

TDP 4484 Teaching Secondary English/Language Arts II Field Experience (1). This field experience supports the TDP 4480 component of Phase II. Field experience expectations are delineated in the TDP 4480 course syllabi. Phase II admittance required. Graded on a S/U basis only.

TDP 4490 Teaching Middle and Secondary English/Language Arts III (3). Prepares prospective educators by focusing on the teaching of American culture and critical thinking, through literacy, mediacy, oracy, and cultural artifacts. Prerequisites: TDP 4470/7470 and 4480/7480; admittance to Phase II of College of Education.

TDP 4494 Teaching Secondary English/Language Arts III Field Experience (1). This field experience supports the TDP 4490 component of Phase II. Field experience expectations are delineated in the TDP 4490 course syllabi. Phase II admittance required. Graded on a S/U basis only.

TDP 4530--Introduction to Social Studies (3). Will introduce prospective teachers to the profession of social studies teaching; to the bases for making curriculum choices in social studies and the process of choosing content; and the process of planning curriculum and instruction in social studies classrooms. Prerequisites: acceptance into Phase II, Term: Fall of Junior year; admittance to College of Education required.

TDP 4534S--Secondary Social Studies I Field Experience (1). This field experience supports the TDP 4530 component of Phase II. Field experience expectations are delineated in the TDP 4530 course syllabi. Phase II admittance

required. Graded on a S/U basis only.

TDP 4540--Teaching Social Studies (3). Is designed for the secondary social studies teachers to develop knowledge of social studies and the skills to teach social studies. The student will plan, implement, and evaluate both the teaching and learning processes for secondary social studies classroom. Prerequisites: acceptance into Phase II, Term: Winter of junior year; admittance to College of Education required. Graded on A/F basis only.

TDP 4544--Secondary Social Studies II Field Experience (1). This field experience supports the TDP 4540 component of Phase II. Field experience expectations are delineated in the TDP 4540 course syllabi. Phase II admittance required. Graded on a S/U basis only.

TDP 4550--Assessment in Social Studies (3). Will address the purposes and development of social studies assessment for all levels from classroom to national assessment. Assessment will be used to reflect upon curriculum/instruction, make revisions and set goals. Prerequisites: acceptance into Phase II, Term: Fall of senior year; admittance to College of Education required.

TDP 4554--Secondary Social Studies III Field Experience (1). This field experience supports the TDP 4550 component of Phase II. Field experience expectations are delineated in the TDP 4550 course syllabi. Phase II admittance required. Graded on a S/U basis only.

TDP 4560--Teaching Reading in the Content Areas (3). For secondary school teachers. Specific ways teachers can help students improve reading skills in content areas and ways reading can be taught in reading classes. Prerequisite: ESC PS 2400.

TDP 4570--Intro. Teaching Mathematics in Middle & Secondary (3). Introduction to teaching mathematics including: professional mathematics teacher associations and journals, learning theories related to teaching mathematics, tools, and materials for teaching mathematics, curriculum and instructional strategies (middle and lower high school level), and techniques for assessing mathematical understanding. Prerequisites: professional standing, MATH 2300.

TDP 4574--Intro. Teaching Math in Middle & Secondary Sch. Field Experience (1). Field experience supporting the TDP 4570 component of Phase II. Field experience expectations are delineated in the TDP 4570 course syllabi. Phase II admittance required. Graded on a S/U basis only.

TDP 4580--Teaching Mathematics in Secondary Schools: Algebra (3). Major issues/topics of the course are: exploration of curriculum, teaching strategies, and assessment for algebra and pre-calculus/calculus. Lesson planning, integration of appropriate models, mathematical connections, calculators and computer technology will be developed. Prerequisite: TDP 4570/7570; admittance to College of Education required.

TDP 4584--Teaching Math in Secondary Schools: Algebra Field Experience (1). This field experience supports the TDP 4580 component of Phase II. Field experience expectations are delineated in the TDP 4580 course syllabi. Phase II admittance required. Graded on a S/U

basis only.

TDP 4590--Teach. Math in Sec. Schools: Focus on Geometry, Probability & Statistics (3). Provides experience which advanced students' knowledge, understanding, and facility in engaging students in learning mathematics. Major issues/topics highlighted in the course are: exploration of curriculum, teaching strategies, and assessment for geometry, probability and statistics. Prerequisite: TDP 4570/7570; admittance to College of Education required.

TDP 4594--Teach Math in Sec Sch: Focus on Geometry/Probability (1). This field experience supports the TDP 4590 component of Phase II. Field experience expectations are delineated in the TDP 4590 course syllabi. Phase II admittance required. Graded on a S/U basis only.

TDP 4630--Teach. Sci. Second. Sch.: Phil., Hist., Sci. Inq., Curr., Assm., & Tech I (3). An integration of the philosophy and history of science, technology, society; teaching science as inquiry; classroom management, strategies and curricula for teaching/learning science; and using technology in science learning. Prerequisite: professional standing; admittance to College of Education required.

TDP 4634--Teaching Middle and Secondary Science I Field (1). This field experience supports the TDP 4630 component of Phase II. Field experience expectations are delineated in the TDP 4630 course syllabi. Phase II admittance required. Graded on a S/U basis only.

TDP 4640--Teach. Sci. Second. Sch.: Phil., Hist., Sci. Inq., Curr., Assm., & Tech II (3). An integration of the philosophy and history of science, technology, society; teaching science as inquiry; classroom management, strategies and curricula for teaching/learning science; and using technology in science learning. Prerequisite: professional standing and Teaching Science in the Secondary School, Part I; admittance to College of Education required.

TDP 4644--Teach Sci Sec Sch: Phil, Hist, Sci Inq, Curr, Assm & Tech II Fld (1). This field experience supports the TDP 4640 component of Phase II. Field experience expectations are delineated in the TDP 4640 course syllabi. Phase II admittance required. Graded on a S/U basis only.

TDP 4650--Teach. Sci. Second. Sch.: Phil., Hist., Sci. Inq., Curr., Assm., & Tech III (3). An integration of the philosophy and history of science, technology, society; teaching science as inquiry; classroom management, strategies and curricula for teaching/learning science; and using technology in science learning. Prerequisite: professional standing and Teaching Science in the Secondary School, Parts I and II; admittance to College of Education required.

TDP 4654--Teach Sci Second Sch: Phil, Hist, Sci Inq, Curr, Assm & Tech III Fld (1). This field experience supports the TDP 4650 component of Phase II. Field experience expectations are delineated in the TDP 4650 course syllabi. Phase II admittance required. Graded on a S/U basis only.

TDP 4670--Teaching Music I (3). Study of skills, knowledge, and philosophical foundations necessary to teach general music to children in grades pre-K, including methods,

philosophies, and teach and learner behaviors. Prerequisite: junior standing; music education majors or instructor's consent; admittance to College of Education required.

TDP 4674--Teaching Music I Field Experience (1). This field experience supports the TDP 4670 component of Phase II. Field experience expectations are delineated in the TDP 4670 course syllabi. Phase II admittance required. Graded on a S/U basis only.

TDP 4680--Teaching Music II (2). Study of a broad repertoire of music literature and instructional materials, including critical evaluation and analysis for use in the general music classroom. Prerequisite: TDP 4670/7670; admittance to College of Education required.

TDP 4684--Teaching Music II Field Experience (1). This field experience supports the TDP 4680 component of Phase II. Field experience expectations are delineated in the TDP 4680 course syllabi. Phase II admittance required. Graded on a S/U basis only.

TDP 4690--Teaching Music III (3). A study of various strategies for the successful teaching of Middle and high school music programs. Prerequisite: TDP 4680/7680; admittance to College of Education required.

TDP 4694--Teaching Music III Field Experience (1). This field experience supports the TDP 4690 component of Phase II. Field experience expectations are delineated in the TDP 4690 course syllabi. Phase II admittance required. Graded on a S/U basis only.

TDP 4730--Overview of Art Education (3). This is the first of a three course sequence and serves as the foundation for inquiries of methodological and philosophical approaches to the teaching of the visual arts at the elementary and secondary level. Prerequisite: admittance to College of Education required.

TDP 4734--Overview of Art Education Field Experience (1). This field experience supports the TDP 4730 component of Phase II. Field experience expectations are delineated in the TDP 4730 course syllabi. Phase II admittance required. Graded on a S/U basis only.

TDP 4740--Inquiry into Art Education: Pre-School Through Middle School (3). The second of three course sequence. It will cover art education issues as they apply to the Pre-School through Middle School setting. Prerequisite: admittance to College of Education required.

TDP 4744--Inquiry into Art Education: Pre-School Thru Middle School Fld Exp (1). This field experience supports the TDP 4740 component of Phase II. Field experience expectations are delineated in the TDP 4740 course syllabi. Phase II admittance required. Graded on a S/U basis only.

TDP 4750--Inquiry into Art Education: Secondary (3). The third of a three course sequence. Student will learn about secondary art education and make application to practice with emphasis on adolescent development, curriculum design, student assessment, instruction, diversity/equity, and professionalism. Prerequisite: admittance to College of Education required.

TDP 4754--Inquiry into Art Education: Secondary Field Experience (1). This field experience supports the TDP 4750 component of Phase II. Field experience expectations are

delineated in the TDP 4750 course syllabi. Phase II admittance required. Graded on a S/U basis only.

TDP 4810--Inquiring into Foreign Language Curriculum and Pedagogy I (3). This course introduces developing teachers to issues related to foreign language instruction. It focuses on language development, individual learning styles, instruction strategies, classroom behavior and management, professional development and in-field experiences. The course lays the foundation of foreign language pedagogy and curriculum development. Prerequisite: admittance to College of Education required.

TDP 4814--Inquiring into Foreign Language Curriculum and Pedagogy Field Experience (1). This field experience supports the TDP 4810 component of Phase II. Field experience expectations are delineated in the TDP 4810 course syllabi. Phase II admittance required. Graded on a S/U basis only.

TDP 4820--Inquiring into Foreign Language Curriculum and Pedagogy II (3). This second course explores in greater depth issues related to foreign language instruction. It focuses on second language acquisition theories and research; learners; individual needs and styles; techniques and activities for the FL classroom; diversity and inclusion, resources and authentic materials; and in-field experiences. Prerequisite: admittance to College of Education required.

TDP 4824--Inquiring into Foreign Language Curriculum & Pedagogy II Fld Exp (1). This field experience supports the TDP 4824 component of Phase II. Field experience expectations are delineated in the TDP 4824 course syllabi. Phase II admittance required. Graded on a S/U basis only.

TDP 4830--Inquiring into Foreign Language Curriculum and Pedagogy III (3). This course enables developing teachers to achieve a more advanced level of competency in the field of foreign language education. It provides them with ample opportunities to put into practice ideas and techniques learned in the first two courses, and to sharpen their decision-making abilities. It focuses on the application of various methodologies to the teaching and assessment of foreign languages. In-field experiences are also included. Prerequisite: admittance to College of Education required.

TDP 4834--Inquiry into Foreign Language Curriculum and Pedagogy III Fld Exp (1). This field experience supports the TDP 4830 component of Phase II. Field experience expectations are delineated in the TDP 4830 course syllabi. Phase II admittance required. Graded on a S/U basis only.

TDP 4860--Coordination Process Community-Base Experience (3). The study of practices and procedures in the operation of programs utilizing community-based experiences such as cooperative occupational education and student internships in the field of Career and technical education. Prerequisites: TDP 1100, 2000, and 2020; professional standing in Teacher Development Program. Restricted to Business and Marketing Education majors.

TDP 4870--Curriculum Design for Career and Technical Education (3). Curricular development process, knowledge of core areas and competencies of business and marketing education programs. Selection of instruction

material. Prerequisite: admittance to College of Education required.

TDP 4874--Curriculum Construction in Business & Marketing Educ Prog Fld Exp (1). This field experience supports the TDP 4870 component of Phase II. Field experience expectations are delineated in the TDP 4870 course syllabi. Phase II admittance required. Graded on a S/U basis only.

TDP 4880--Teaching of Business and Marketing Education Subjects (3). This course concentrates on the recent trends in methods, techniques, materials of instruction, media, measurement, and school-community relations in the teaching of business and marketing subjects. Prerequisite: admittance to College of Education required.

TDP 4884--Teaching Business & Marketing Education Subjects Field Experience (1). This field experience supports the TDP 4880 component of Phase II. Field experience expectations are delineated in the TDP 4880 course syllabi. Phase II admittance required. Graded on a S/U basis only.

of foreign languages. In-field experiences are also included. Prerequisite: admittance to College of Education required.

TDP 4971--Internship and Capstone Seminar (cr.arr.). Internship is a full-semester experience in the public schools, including a capstone seminar addressing problems of practice (integrating subjects, reading and writing across the curriculum, meeting all students' needs), and evaluation of the interns preparation for entering the profession. It is offered each Fall and Winter for 10-16 credit hours. Admittance to College of Education required. Prerequisites: TDP 4060/7060 and admittance into Phase III.

College of Engineering

College of Engineering

DEGREES OFFERED

Bachelor of Science in Biological Engineering (BS BE)
with emphasis areas in

Biomedical
Bioprocess
Bioenvironmental

Bachelor of Science in Chemical Engineering (BS ChE)
with emphasis areas in

Biochemical
Environmental
Materials

Bachelor of Science in Civil Engineering (BS CIE)
with emphasis areas in

Environmental
Geotechnical
Structural
Transportation

Bachelor of Science in Computer Engineering (BS CoE)

Bachelor of Science in Computer Science (BS CMPSC)*

Bachelor of Science in Electrical Engineering (BS EE)

Bachelor of Science in Industrial Engineering (BS IE)

Bachelor of Science in Information Technology (BS
INFOTC)

Bachelor of Science in Mechanical Engineering (BS ME)
with emphasis areas in

Aerospace

*For the Bachelor of Arts in Computer Science (BA) refer to
the College of Arts and Sciences.

Minor

Computer Science
Engineering
Naval Science

Nuclear Engineering
Medical/Health Physics
Radioenvironmental Sciences

See the *Graduate Catalog* for information on MS degrees with
majors in biological engineering, chemical engineering, civil
engineering, computer engineering, computer science, electrical
engineering, and industrial engineering, mechanical and
aerospace engineering, nuclear engineering.

PhD degrees are available with majors in biological engineering,
chemical engineering, civil engineering, computer science,
electrical and computer engineering, industrial engineering,
mechanical and aerospace engineering, informatics, and nuclear
engineering.

ADMINISTRATION

James E. Thompson, Dean
Lex Akers, Associate Dean
W1025 Laffer Hall
(573) 882 4375
thompsonje@missouri.edu

When engineering classes at the University of Missouri began
in 1849, a strong tradition was born that continues to grow.
Today, the College of Engineering includes the first electrical
engineering department established west of the Mississippi River
and the only industrial engineering program in Missouri.

The college offers fully accredited degree programs in biological,
chemical, civil, computer, electrical, industrial and mechanical
engineering, along with computer science and information
technology. All programs offer both undergraduate and graduate
degrees. Naval science is under the academic administration of
the college as well.

The hallmark of the College of Engineering is excellence in teaching
and scholarly pursuits. The college seeks to involve undergraduates
in the exciting world of technological discovery, provide students
with the highest quality curriculum, and prepare them to go out
into the world with the education they need to make a difference.

ADMISSIONS

Direct Freshman Admission to Engineering

Entering freshmen are expected to have completed 17 units of
approved high school course work (in grades 9-12), including 4
units in English, 4 in mathematics and 3 in science with laboratory.
Mathematics should include 2 units of algebra, 1 unit of plane and
solid geometry (combination course), and ½ unit of trigonometry.
Additional senior mathematics is recommended.

For direct admission to the College of Engineering, the applicant
must meet the qualifications listed below (these numbers are
subject to change).

- ACT-Math of at least 24 AND
- ACT-Composite of at least 24 OR high school class rank in
the upper 25 percent

The average ACT scores for first-time freshmen admitted to the
College of Engineering for fall 2008 were ACT-Composite 27.8,
ACT-Math 28.6 and ACT-English 26.9.

Pre-Engineering Program (PEP)

Freshmen who do not meet the criteria for direct admission
to the College of Engineering are admitted initially into the
Pre-Engineering Program. Although admitted to the College
of Arts and Science, each PEP student receives advising by an
engineering advisor.

PEP reduces freshman pressures while preserving alternatives.
Because PEP students are enrolled in the College of Arts and
Science, degree options in the College of Arts and Science are
available to those who may decide to change their focus from
engineering.

Most first-semester PEP students enroll in one preparatory math
course and three courses in the College of Arts and Science,
which count in both the engineering and arts and science degree
programs. The prime objective is to strengthen math preparation
sufficiently for success in engineering.

PEP students are eligible to transfer to the College of Engineering
when they meet the following requirements:

- Satisfactory completion of 24 credits
- GPA of 2.0 or higher both Cumulative and last term
- A grade of C- or better in MATH 1500: Analytic Geometry and
Calculus I or MATH 1320: Elements of Calculus for Informa-

tion Technology.

Declared and Undeclared Status

Freshmen engineering students may start with a departmental affiliation or with an undeclared status and defer the selection of a particular department for the first few semesters. Those choosing the latter route are assigned to special faculty advisors. Undeclared students should discuss course selection with the academic advisor each semester to keep options open among departmental curricula.

It also is possible to transfer from one department to another during the early part of the curriculum. Students who transfer must satisfy the specific degree requirements of the new department.

Engineering Dean's Scholars Program

The purpose of the Engineering Dean's Scholars Program is to recognize, mentor and train the highest-achieving students in scholarship and leadership. Engineering Dean's Scholars participate in the Engineering Scholars FIG (Freshman Interest Group) which is housed in Mark Twain Residence Hall. Faculty-scholar lunches are held in the Mark Twain Dining Hall several times during the semester to allow the scholars to meet with engineering faculty and to learn about the engineering profession and undergraduate research opportunities.

Scholars participate in leadership or mentoring activities during their sophomore, junior and senior years. Examples of such activities include serving as engineering ambassadors or peer advisors for an engineering FIG. Students chosen for peer advisor positions have their room and board covered in exchange for their services.

Engineering Dean's Scholars are awarded a \$1000 scholarship in addition to the \$2000 Engineering Achievement Award. The Dean's Scholarship is renewable for up to eight semesters with 3.5 cumulative GPA at the end of each spring semester.

Students who have ACT math and composite scores of 32 and a high school rank in the top 10 percent of their class will be sent applications upon admission. Students who are close to these criteria may request an application by contacting the engineering dean's office at the address below. Consideration of students who do not meet the suggested minimum criteria will be contingent upon available space in the program. Applications are due April 1.

Mizzou Engineering Dean's Scholars Program
W1025 Laffer Hall
University of Missouri
Columbia, MO 65211
(573) 882-4092

Grade Point Average

The GPA of record for engineering is calculated using grades earned in courses offered by one of the four campuses of the UM System (Columbia, Rolla, Kansas City and St. Louis). The exception is any grade replaced on an MU course under the grade replacement or academic renewal policies. This grade point average is noted as "UM GPA" on a student's transcript.

Transfer Students

Students wishing to transfer to MU from an accredited college or university are subject to University regulations described in this catalog.

The MU College of Engineering cooperates with many colleges through articulation agreements that help pre-engineering students transfer to MU with maximum ease and minimum loss of credits. A student may take the first two years at the participating school and then transfer to MU for the junior and senior years in engineering. After the program is completed, the student is awarded a BS degree in the chosen engineering field.

To be recommended for the BS degree from the College of Engineering, a student transferring from an accredited institution must complete at least 30 upper-level credits in the degree program at a UM System campus. At least 21 of the 30 credits must be upper-level engineering courses approved by the department awarding the degree.

A student transferring with senior standing from another UM System campus must complete the last 15 credits in residence on the campus where the degree program is located. Twelve of these 15 credits must be in engineering and approved by the department awarding the degree.

Any student whose enrollment in any college-level academic program resulted in dismissal or departure while on probation will not be admitted to the College of Engineering

International Admission

Admission of international students is determined on an individual basis by a committee of representatives from the Admissions Office and the College of Engineering.

Before registering for classes at the University, international students must take the MU English Language Test, developed for international students. Students passing the test are eligible to take ENGLISH 1000 and any other required English courses.

International students whose test scores indicate that additional English training is needed, including those with transferred English credit, are required to register for an English-language support class. The course, developed for international students, should be taken during the first semester of enrollment. This course does not count toward graduation credit, but regular attendance is required and failure to attend will result in dismissal. The English-language support class taken must be satisfactorily completed before the student can enroll in ENGLISH 1000. Students not satisfactorily completing the class in the first semester of enrollment must re-enroll in the second semester. If the student does not satisfactorily complete the English-language support class in the second term of enrollment, the student will not be permitted to re-enroll in the College of Engineering.

Graduation Requirements

The curriculum provides a solid foundation of mathematics and physical sciences followed by the application of these sciences in engineering specialties. The balance of the curriculum encompasses communication skills, English, social sciences and humanities courses.

Many freshmen are eligible to start with calculus. However, some can profit from additional pre-calculus preparation, which is an addition to the undergraduate curricula.

Students should access the engineering web site (<http://engineering.missouri.edu>) for details regarding social and behavioral sciences and humanities and fine arts requirements.

In addition to the University's general education and graduation

requirements, the departments in the College of Engineering may require further specific courses to better equip students to perform in their chosen fields of study.

While many students complete the BS degree program in four years, some may find it advisable to extend the curriculum in order to carry lighter semester loads, add preparatory courses or compensate for part-time work.

GPA Requirements for Graduation from the College of Engineering

☒ GPA of record of at least 2.0

☒ GPA of at least 2.0 in all engineering courses offered by one of the four campuses of the UM System. "Engineering courses" include all courses that are offered through the College of Engineering or its equivalent on the four campuses, or that have "Engineering" in the curricular designator. Only the last grade in a repeated course will be used in the calculation.

ACADEMIC REGULATIONS

Degree with Honors Requirements

Latin Honors are granted to students who meet the following cumulative GPA requirements:

<i>summa cum laude</i>	3.9
<i>magna cum laude</i>	3.7
<i>cum laude</i>	3.5

Departmental Honors

The college maintains an undergraduate honors program to further challenge those who have established a minimum GPA of 3.0 at the beginning of the junior year. A comparable grade point average is required of transfer students. The program leads to an undergraduate honors thesis on a research or advanced design project, provides for additional curricula flexibility and contains features that ease the transition to graduate school.

Opportunities available to honors students include:

- More personal attention from an honors advisor
- Independent study or undergraduate research with a senior faculty member whose specialty interests the honors candidate
- \$1000/semester awarded for semesters during which the student is engaged in Honors Research.

A student who successfully completes the engineering honors program, including the independent project, will be designated an "Honors Scholar in Engineering." Interested students should contact their departmental office.

Qualified engineering students are also welcome to join the programs of the Honors College and may enroll in various honors courses and honors sections of regular courses.

Courses in Basic Skills

No basic skills courses may be taken to fulfill graduation requirements.

Curriculum of Record

The curriculum of record is the curriculum a student must satisfy to meet graduation requirements. For students who maintain

continuous, full-time enrollment, the curriculum of record is the one approved by the College of Engineering at the time the student achieves upper-division status in the discipline of choice. For others, the curriculum of record is decided by the department faculty.

Academic Probation and Dismissal

(See Academic Standing in the front of this catalog.)

1. A student whose term and cumulative UM GPA are 2.0 or higher is in good academic standing. A "term" is defined as a semester or summer session.
2. A student will be placed on academic probation if while in good academic standing the student has a term GPA less than 2.0 but equal to or greater than 1.0.
3. A student on academic probation has not more than two semesters to remove him/herself from probation.
 - While on academic probation, a student must enroll in and complete each semester at MU at least 12 credits of course work necessary for the degree. Courses taken through MU's Center for Distance and Independent Learning count as part of these 12 credits. Part-time students must enroll in at least as many credits each semester as the college rules governing part time enrollment.
 - A student will be removed from probation at the end of the term when the term and cumulative GPA are 2.0 or higher, provided the student completed 12 or more hours applicable toward the degree
 - A student will be continued on probation if while on probation the student has a term GPA greater than or equal to 2.0.
4. A student will be dismissed from the College of Engineering if the student:
 - Receives a term GPA of less than 1.0
 - Receives a term GPA of less than 2.0 while on probation.
5. Readmission:
 - If the appeals committee allows a student to re-enroll, it may set conditions such as courses to be taken, minimum grades, total hours, etc to which the student must adhere.
 - A student who has been dismissed for academic reasons may be readmitted upon a successful appeal to the academic appeals committee of the college. Students who are subject to dismissal (IE) and who wish to appeal their case for continuation must write an appeal letter and submit it to the chair of the academic appeals committee.
 - Similarly, students who wish to re-enroll in the college of Engineering after having been out of school as a result of a dismissal must write a letter of appeal to the College of Engineering academic appeals committee requesting readmission.
 - Letter of appeal may be addressed to: Dr. Lex Akers, Chair, Engineering Academic Appeals Committee, W1025 Lafferre Hall, University of Missouri, Columbia, MO 65211. A personal visit with the director of undergraduate studies of the students department and advisor before appealing by letter is often helpful, both to the student and to the committee.
 - The primary concern of the appeals committee is the likelihood of future success. Accordingly, any appeal should include an explanation for past poor performance and reason for expecting better in the future.

6. A student who has been twice dismissed will normally be ineligible for readmission.

Satisfactory/Unsatisfactory Grading Option

Under Satisfactory/Unsatisfactory (S/U) grading, an S is assigned for a grade in the A, B or C range, and a U is assigned for a grade in the D range or for an F. Neither an S nor a U will be calculated into a student's grade point average.

A student enrolled in the College of Engineering may not take any math, science or engineering course that counts toward degree requirements under the S/U grading option, unless the course is only offered S/U. In addition, any course specifically required (by course number) in the curriculum may not be taken S/U. This includes ENGLSH 1000 or 1000H. The 18 credits taken to fulfill the University general education distribution requirement may be taken S/U.

Restrictions

- First-semester freshmen are ineligible to take any course S/U unless it is only offered S/U.
- Only one course per semester may be taken S/U.
- Students on academic probation are not allowed to take any course S/U.
- Students who opt for S/U grading during their last 60 credits are not eligible for Latin Honors.
- To be eligible for the Dean's List each term, a student must complete 12 graded credits (S/U courses are not considered "graded").

STUDENT SERVICES

Advising

Each student in the College of Engineering is assigned a faculty advisor who assists the student in reaching academic and professional goals. Students are encouraged to meet with their advisors as often as needed.

Diversity in Engineering Program

The Diversity in Engineering Program (DEP) supports increased enrollment and graduation rates among students from underrepresented minority groups in the College of Engineering. The DEP office provides student programming designed to create a user-friendly environment for students pursuing a degree in engineering from the University of Missouri. This effort includes models for successful outreach, recruitment, early research experience, counseling, undergraduate retention, academic enrichment, mentoring and information about graduate study.

DEP provides a support network between students, faculty, and staff to ensure academic success through programming ranging from free tutoring to time management and study skills sessions. Career information sessions, resume review, and mock interviews are also provided to ensure professional preparedness. DEP also offers outreach opportunities for students to interact with the local community that include tutoring, mentoring, and giving presentations to local elementary, junior high and high school students.

Learning Communities

The college co-sponsors several living/learning options for engineering students. The college believes that an environment conducive to the formation of networks, with aspects of social and academic interaction, enhances the retention and ultimate

success of students in the engineering curriculum. Students selecting these options generally earn higher grades and are more likely to graduate than the average engineering student.

The Engineering Learning Community (ELC) is a special co-ed environment that offers engineering majors a full range of academic support and activities. ELC allows engineering students to live together, study together and have fun together. The Men of Engineering (MOE) offers the same opportunities for male students in engineering. Each community has its own computer lab, peer tutors, study groups and quiet hours.

Freshman Interest Groups (FIGs) support incoming freshmen. Members of a FIG are co-enrolled in three courses during the first semester of the freshman year with a group of up to 20 students.

Professional Engineering Registration

The revised statutes of Missouri (Section 327.221) require that each applicant for registration as a professional engineer in Missouri must be a graduate of and hold a degree in engineering in a curriculum accredited by the Accreditation Board for Engineering and Technology. The MU undergraduate programs in biological, chemical, civil, computer, electrical, industrial and mechanical engineering at MU are so accredited.

Senior students are strongly encouraged to take the Fundamentals of Engineering Exam leading to the Fundamentals in Engineering (FE) status as a first step toward registration.

MISSION

The College of Engineering will continuously improve the quality of its primary areas of responsibility—teaching, research and service. In so doing, the College:

- Provides engineering students and practicing professionals with the expertise and new knowledge required to solve society's complex technological problems
- Develops and utilizes enabling technologies for teaching, research, service and outreach
- Prepares students and practicing professionals to compete in a global economy
- Instills students with a commitment to life-long learning

ENGINEERING COURSES

ENGINR 1000--Introduction to Engineering (0-2).This course will introduce the students to university life, discuss learning strategies for success and give an overview of the engineering profession and each of the main engineering disciplines.

ENGINR 1001--Experimental Course (cr. arr.).For freshman-level students. Content and number of credit of hours to be listed in Schedule of Courses.

ENGINR 1100--Engineering Graphics Fundamentals (2).Introduction to computer-aided design and drafting. Topics include visualization methods and standards techniques for communication and presenting engineering design graphics information.

ENGINR 1110--Solid Modeling for Engineering Design (1).Introduction to 3D (three dimensional) modeling techniques using

computer aided design software. Topics include model creation techniques and advanced graphical presentation practices. Prerequisite: ENGINR 1100 and instructor's consent. May be repeated for credit. Graded on A/F basis only.

ENGINR 1200--Statics and Elementary Strength of Materials (3).Fundamentals of statics; static equilibrium and introduction to elements of mechanics of elastic materials. Prerequisites: MATH 1500 and PHYSCS 2750 concurrently.

ENGINR 1500--Computer Programming (3).Introduction to the use of digital computers. Provides the student with a basic understanding of computers and the ability to solve programming problems. Co-requisite: MATH 1500.

ENGINR 2001--Experimental Course (cr. arr.).For sophomore-level students. Content and number of credit hours to be listed in Schedule of Courses.

ENGINR 2100--Circuit Theory for Engineers (3).DC circuit analysis, inductors and capacitors, first-order response, AC circuit analysis, AC power and three-phase, transformers. Prerequisite: MATH 4100 and PHYSCS 2760 concurrent. For Non-Majors.

ENGINR 2200--Intermediate Strength of Materials (3).Elements of mechanics of elastic materials. Prerequisite: ENGINR 1200.

ENGINR 2300--Engineering Thermodynamics (3).(same as Mechanical and Aerospace Engineering 2300). Fluid properties, work and heat, first law, second law, entropy, applications to vapor and ideal gas processes. Prerequisites: PHYSCS 2750.

ENGINR 4085--Problems in Engineering (0-6).Special design, experimental or analytical problems in engineering. May be repeated to 6 hours.

Biological engineering is a science-based engineering discipline that integrates engineering and biological sciences in one curriculum. The MU biological engineering program is a broadly-based curriculum that prepares students for careers in three areas:

- Biomedical engineering (including premedicine)
- Bioprocess engineering
- Bioenvironmental engineering

Biological engineering graduates are hired by biotechnology, medical, pharmaceutical, food and agricultural companies, and by government agencies. Some attend graduate and medical schools. Graduates are well prepared to take the Fundamentals of Engineering exam during their senior year, which is the first step toward obtaining a Professional Engineer license.

The Bachelor of Science with a major in Biological Engineering (BS BE) program at MU is accredited by the Accreditation Board for Engineering and Technology. The biological engineering curriculum was developed to meet the mission, objectives and outcomes described below.

Mission and Objectives

The department's mission is to prepare biological engineering graduates for productive engineering careers characterized by continual professional growth. The undergraduate program leads to a Bachelor of Science degree with a major in Biological Engineering, producing graduates who demonstrate the following abilities:

1. Show proficiency in engineering analysis and design, and development (outcomes a, b, c, d, e)
2. Interact effectively with life science and other professionals (outcomes a, b, c, d, e, g)
3. Integrate biological and engineering sciences for the design and development of innovative systems and processes for

improved health, bio-resource utilization and environmental protection (outcomes a, b, c, d, e, f, g, k, l)

4. Exhibit professionalism as they continually add value to their chosen field of endeavor (outcomes h, i, j)
5. Succeed in advanced study in engineering, medicine or veterinary medicine, if pursued (outcomes a, b, d, e, g, k, l)

Graduates of the biological engineering program meet the following outcomes:

- a. Ability to apply knowledge of mathematics, science and engineering
- b. Ability to design and conduct experiments, as well as to analyze and interpret data
- c. Ability to design a system, component or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.
- d. Ability to function on multi-disciplinary teams
- e. Ability to identify, formulate and solve engineering problems
- f. Understanding of professional and ethical responsibility
- g. Ability to communicate effectively
- h. The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context.
- i. Recognition of the need for and an ability to engage in life-long learning
- j. Knowledge of contemporary issues
- k. Ability to use the techniques, skills and modern engineering tools necessary for engineering practice
- l. Ability to integrate engineering and biological sciences to develop systems, and processes for improved health, bio-resource utilization and environmental protection

Exploratory Course

Students who want to learn more about the field should take BIOL EN 1000: Introduction to Biological Engineering.

Major Program Requirements - Biological Engineering (BS BE)

The curriculum encompasses basic sciences, social and behavioral sciences, humanities and fine arts, engineering sciences and topics, and program core courses. The core courses cover topics of biological engineering principles and design. In a capstone design course, each student completes a design project under the direction of a faculty adviser. Technical electives allow students to place emphasis on biomedical, bioprocess or bioenvironmental engineering. The requirements listed below are in addition to University general education requirements.

BIOLOGICAL ENGINEERING COURSES

BIOL EN 1000--Introduction to Biological Engineering (1-2). For first semester engineering students. Develop appreciation for professional engineering. Students will participate with senior design students to conceptualize a case-study problem.

BIOL EN 2000--Professional Development in Engineering (1-2). A review of professional opportunities, registration, ethics, and societies. Prerequisite: sophomore standing.

BIOL EN 2080--Introduction to Programming for Engineers (3). The objectives of this course are to teach the student how to write scientific programs for analysis of data, simulation of physical phenomena, and experimental hardware control. This objective is satisfied by gaining proficiency in Microsoft Excel, Matlab and LabView. Graded on A/F basis only.

BIOL EN 2180--Engineering Analysis of

Bioprocesses (3). Fundamentals and application of biological engineering. Prerequisites: BIO SC 1500.

BIOL EN 3001--Topics in Biological Engineering (3). Current and new technical developments in biological engineering. Prerequisite: instructor's consent.

BIOL EN 3050--Environmental Control for Biological Systems (3). Systems for controlling the physical environments (heat, moisture, light, contaminating organism, chemicals) for plant and animal systems including livestock, aquacultures, crops and agricultural products. Prerequisite: ENGINR 2300 and MATH 4100.

BIOL EN 3070--Biological Fluid Mechanics (3). Basic principles of fluid mechanics applied to transport processes in biological systems. Prerequisites: PHYSICS 2750 and MATH 1700. Graded on A/F basis only.

BIOL EN 3170--Biomaterials (3). Biomateri-

als used for medical applications. An understanding of structure-property relationship between materials implanted into the body and the surrounding tissues. Biocompatibility testing and degradation of implanted materials will be addressed. Prerequisite: BIOL EN 2180. Co-requisite: PHYSICS 2760 and ENGINR 2200.

BIOL EN 3180--Heat and Mass Transfer in Biological Systems (3). Application of transport phenomena to biological systems. Theory and examples of heat transfer and mass transfer. Prerequisites: ENGINR 2300, CH ENG 3261, CHEM 3300.

BIOL EN 4001--Topics in Biological Engineering (3). Current and new technical developments in biological engineering. Prerequisite: instructor's consent.

BIOL EN 4070--Bioelectricity (3). The equivalent circuit of cell membranes. How ion

channels are gated and studied including the electronic design of patch-clamp amplifiers. The role ion channels play in physiology. Prerequisites: PHYSCS 2760 and BIOL EN 3180.

BIOL EN 4080--Engineering Computation (3).An introduction to numerical methods relevant to biological engineering in the context of scientific computing. Prerequisite: MATH 4100.

BIOL EN 4085--Problems in Biological Engineering (1-5).Supervised independent study at the undergraduate level. Prerequisite: instructor's consent.

BIOL EN 4150--Soil and Water Conservation Engineering (3).(same as Civil Engineering). Analysis of run-off and erosion from urban and agricultural lands. Design and layout of erosion control structures. Prerequisites: CV ENG/MAE 3200 or MAE 3400 or BIOL EN 2810.

BIOL EN 4160--Food Process Engineering I (3).Study of transport phenomena and unit operations in food processing systems. Emphasis on rheology of food heating and cooling processes and thermodynamics of food freezing. Prerequisite: BIOL EN 2180 or instructor's consent.

BIOL EN 4170--Biomaterials Interfaces of Implantable Devices (3).Topics include biosensors, VADS (ventricular assist devices) and drug delivery systems, self-organization of biomembranes and supramolecular systems, bioactive materials, molecular basis for surface recognition and masking. Prerequisites: BIOL EN 3170 or instructor's consent.

BIOL EN 4250--Irrigation and Drainage Engineering (3).Soil, water, plant relationships. Water supplies and design of surface sprinkler and trickle irrigation systems. Surface and tile drainage. Prerequisites: CV ENG 3700 or MAE 3400 or BIOL EN 2180.

BIOL EN 4260--Food Process Engineering II (3).Continuing study of transport phenomena and unit operations in food processing systems. Emphasis on fluid food evaporation concentration food dehydration, contact equilibrium processes and mechanical separation processes. Prerequisite: BIOL EN 4160 or instructor's consent.

BIOL EN 4270--SQC and DOE for Chemical and Biological Engineers (3).(same as CH_ENG 4270). Statistical tool box for chemical engineers: design of experiments that compare treatment means and explore the effects of process variables; various methods of data interpretation and empirical modeling; statistical quality control. Prerequisite: experience with Excel.

BIOL EN 4280--Survey of Bioengineering Techniques (3).Laboratory techniques to train students in Bioelectricity, Biomechanics, Bioenvironment, Biomaterials, Biophotonics, Bioprocessing. Prerequisites: senior standing. Graded on A/F basis only.

BIOL EN 4314--Biochemical Engineering Operation (3).(same as CH_ENG 4314). Transport processes in bioreactors, agitation and aeration, scale-up, sterilization, liquid-solid separation, cell disintegration, and other units operations related to product recovery. Prerequisite: instructor's consent.

BIOL EN 4315--Introduction to Biochemical Engineering (3).(same as CH_ENG 4315).

General introduction to biochemical engineering follows fundamentals of microbiology and biochemistry. Topics: fermentation, microbial population kinetics, bioproduct separation and purification, enzyme engineering techniques, biochemical reaction energetics. Prerequisites: CHEM 2120, MATH 2300 or instructor's consent.

BIOL EN 4350--Watershed Modeling Using GIS (3).(same as Civil Engineering 4720). Watershed modeling using GIS based AVSWAT program for hydrology, sediment yield, and water quality; includes analysis of erosion processes with USLE, MUSLE, and WEPP. Procedures are presented for model calibration and sensitivity analysis of data inputs. Prerequisites: CV ENG 3700 or MAE 3400; instructor's consent.

BIOL EN 4380--Applied Electronic Instrumentation (4).Fundamental concepts and theories, basic electronics, analog and digital circuits, signal conditioning, computer interfacing, measurement principles and techniques used in developing computer-based instrumentation systems. Prerequisite: PHYSCS 2760.

BIOL EN 4470--Biomolecular Engineering and Nanobiotechnology (3).Borrow nature's design principles to create new supramolecular block for biomedical applications; Address state-of-art protein engineering, bi-mimic self-assembly, single molecule detection, nanotechnology for molecular manipulation, lab-on-a-chip, bio-silicon interface design. Prerequisites: senior or graduate standing or instructor's consent. Graded on A/F basis only.

BIOL EN 4480--Physics and Chemistry of Materials (3).(same as Physics 4190). Physics and Chemistry of Materials is a 3 credit hours undergraduate/graduate level course offered every winter semester for students from Physics, Chemistry, Engineering and Medical Departments and consists of lectures, laboratory demonstrations, two mid term and one final exam. Graduate students will submit a term paper. Prerequisite: PHYSCS 2760/CHEM 1320 or equivalent/prior approval by instructor.

BIOL EN 4550--Design of Livestock Waste Management Systems (3).Development and application of design criteria to the design of agricultural waste management facilities. Prerequisites: CHEM 1310 and CV ENG 3700 MAE 3400 or instructor's consent.

BIOL EN 4570--Biomedical Imaging (3).Principles and applications of molecular and cellular fluorescent imaging. The course covers: Image formation in microscope; Fundamentals of fluorescence and fluorescent microscopy; Application of molecular and cellular fluorescent imaging in life science research. Prerequisites: BIO SCI 1500 and PHYSICS 2760, or junior or senior standing.

BIOL EN 4580--Mechanical Systems Engineering (3).Fundamentals and applications of prime movers and power transmissions for the design of engineering systems. Prerequisites: Thermodynamics course, Fluid Mechanics course/ Corequisite: ENGINR 2100 or BIO L EN 4380 or instructor's consent.

BIOL EN 4670--Photonics and Nanotechnologies in Optical Biosensors (3).Latest applications of photonics and nanotechnologies in optical bio-chemical sensors will be reviewed. Prerequisite: PHYSCS 2760. Graded on A/F

BIOL EN 4770--Biomedical Optics (3).The fundamentals and applications of Biomedical Optics will be covered including basic engineering principles used in optical therapeutics, optical diagnostics. Essential concepts and techniques in this interdisciplinary subject that connects Optics and Biomedicine will be discussed. Prerequisite: PHYSCS 2760 and instructor's consent.

BIOL EN 4870--Molecular and Cell Mechanics (3).Application of mechanics and engineering principles to biological systems at the cellular and molecular levels. Prerequisite: ENGINR 2200. Graded on A/F basis only.

BIOL EN 4940--Engineering Internship (2-5).Problem course following prior approved work experience. Problem selected by internship company representative, faculty problem adviser and student. Supervised by faculty problem advisor and presented in engineering report form. Prerequisite: advisor's consent.

BIOL EN 4980--Biological Engineering Design (3).Capstone design course for the biological engineering major. Design of biological system devices or processes. Prerequisite: senior standing or instructor's consent.

BIOL EN 4990--Undergraduate Research in Biological Engineering (1-5).Supervised independent study at the undergraduate level. Prerequisite: instructor's consent.

BIOL EN 4995--Undergraduate Honors Research in Biological Engineering (2-4).Open only to honor students in biological engineering. Independent investigation in biological engineering to be presented as a thesis. Prerequisite: advisor's consent. in Biological Engineering (1-5).Supervised independent study at the undergraduate level. Prerequisite: instructor's consent.

BIOL EN 4995--Undergraduate Honors Research in Biological Engineering (2-4).Open only to honor students in biological engineering. Independent investigation in biological engineering to be presented as a thesis. Prerequisite: advisor's consent. in Biological Engineering (1-5).Supervised independent study at the undergraduate level. Prerequisite: instructor's consent.

Chemical Engineering at the University of Missouri focuses on education and research involving industrial chemicals, materials, environmental, and life-science processes. We aim to be a reservoir of talent for the research, design, and management of complex process challenges. The Department strives to provide its faculty and students with an environment for research, learning, and professional growth.

The faculty of the MU Department of Chemical Engineering prepares its students for careers in a broad range of fields and to assume leadership roles in society through a well-rounded general and rigorous technical education. The technical curriculum challenges students with a broad education in Chemical Engineering theory and practice, and to improve their skills in problem solving, critical thinking, and appreciation of the relationship between technology and society. Innovative development and use of technology facilitates both research and teaching, creating a diverse, learning environment.

MU Chemical Engineering program aims to develop versatile professionals who can excel in a variety of career environments. Our curriculum is focused on the basic sciences, engineering topics, and problem solving and design. A flexible program offering environmental, material, and biochemical options allows our graduates to move into non-traditional careers as well as traditional chemical engineering. Additionally, we build teamwork and design skills by integrating team design projects, laboratories, and reports into our curriculum.

The objective of the Chemical Engineering faculty at the University of Missouri is to provide an academic program whose graduates are well educated in the areas of mathematics, basic

sciences, and engineering so that they are:

1. Capable and confident in applying their problem-solving abilities as well as communicating these results in a clear and persuasive manner;
2. Able to satisfy the present and future requirements of the Chemical Engineering profession; and
3. Committed to the pursuit of life-long learning.

Some of our graduates work in the traditional areas of chemical engineering such as the petroleum and chemical industries. Many graduates practice their profession in the areas of microelectronics, pharmaceuticals, materials, polymers, environmental protection, consumer products, or as managers in business, government careers, and engineering consultants. Still others use the chemical engineering degree as a foundation for pursuing advanced studies in medicine, law, business, or the basic sciences.

Exploratory Course

A student wanting to explore chemical engineering as a major should take CH ENG 1000: Introduction to Chemical Engineering (2).

Major Program Requirements - Chemical Engineering (BS ChE)

Each graduate must complete the required curriculum designed to demonstrate knowledge and integration of chemical engineering science and practice using analytical, computational and experimental techniques. In addition, each graduate must have a comprehensive background in advanced chemistry. Graduates have a detailed working knowledge of the entire spectrum of chemical engineering activities.

All requirements listed below are in addition to University graduation requirements, including University general education, and College of Engineering requirements.

Major core requirements

Required entry-level courses

MATH 1500: Analytic Geometry and Calculus I	5
MATH 1700: Calculus II	5
MATH 2300: Calculus III	3
MATH 4100: Differential Equations	3
PHYSCS 2750: University Physics.....	5
PHYSCS 2760 University Physics.....	5

CHEMICAL ENGINEERING COURSES

CH ENG 1000--Introduction to Chemical Engineering (2). Orientation course for freshmen-level students. Introduction to careers and opportunities in chemical engineering, basic engineering principles, simple calculations. Prerequisites: MATH 1500, CHEM 1320, or concurrently.

CH ENG 1000H--Introduction to Chemical Engineering - Honors (2). Orientation course for freshmen-level students. Introduction to careers and opportunities in chemical engineering, basic engineering principles, simple calculations. Prerequisites: MATH 1500, CHEM 1320, or concurrently. Honors eligibility required.

CH ENG 2118--Introduction to Energy Technology and Sustainability (3). An introductory course on energy technology and those resources and practices that allow for sustainable commercialization. Prerequisite: sophomore standing in engineering. Graded on A/F basis only.

CH ENG 2225--Mass and Energy Balance (3). Industrial stoichiometry, material and energy balances, thermophysics, thermochemistry; related topics. Prerequisites: PHYSICS 2750, CHEM 2100, or concurrently.

CH ENG 2226--Computer-aided Calculations in Chemical Engineering (3). Survey of computational methods in chemical engineering; use of structured programming, spreadsheet, and software packages; numerical solutions of chemical engineering problems that involve roots of equations, simultaneous equations, curve fitting, integration and differentiation, differential equations. Prerequisite: MATH 4100 and CH ENG 2225, or concurrent.

CH ENG 3234--Principles of Chemical Engineering I (3). Fluid flow, heat transfer. Prerequisites: grade of C or better in CH ENG 2225.

CH ENG 3235--Principles of Chemical Engineering II (3). Mass transfer. Prerequisite: CH ENG 3234.

CH ENG 3242--Chemical Process Measurements (3). Laboratory study of physical and chemical measurements and some chemical engineering unit operations essential to chemical process industries. Prerequisites: junior standing, CH ENG 3234.

CH ENG 3243--Chemical Engineering Laboratory I (3). Laboratory study of some principal unit operations of chemical engineering. Prerequisite: CH ENG 3242 AND 3235 or concurrently.

CH ENG 3261--Chemical Engineering Thermodynamics I (3). Study of thermodynamics, with particular reference to chemical engineering applications. Prerequisites: grade of C or better in CH ENG 2225.

CH ENG 3262--Chemical Engineering Thermodynamics II (3). Prerequisite: CH ENG 3261.

CH ENG 4001--Topics in Chemical Engineering (3). Current and new technical developments in chemical engineering. Prerequisite: instructor's consent.

CH ENG 4085--Problems in Chemical Engineering (2-4). Directed study of chemical engineering problems. Prerequisite: instructor's consent.

tor's consent.

CH ENG 4220--Hazardous Waste Management (3). (same as Civil Engineering 4220). Engineering principles involved in handling, collection transportation, processing and disposal of hazardous waste minimization, legislation on hazardous wastes and groundwater contamination. Prerequisite: junior standing.

CH ENG 4270--SQC and DOE for Chemical and Biological Engineers (3). (same as BIOL_EN 4270/7270). Statistical tool box for chemical engineers: design of experiments that compare treatment means and explore the effects of process variables; various methods of data interpretation and empirical modeling; statistical quality control. Prerequisite: experience with Excel.

CH ENG 4306--Advanced Engineering Math (3). (same as Nuclear Engineering 4306). Applies ordinary and partial differential equations to engineering problems; Fourier's series; determinants and matrices; Laplace transforms; analog computer techniques. Prerequisite: MATH 4100.

CH ENG 4311--Chemodynamics (3). Environmental movement of chemicals in air, water, and soil; designed to introduce students to the basic principles and techniques useful for the prediction of the movement and fate chemicals in ecosystems. Prerequisites: CH ENG 3234 or instructor's consent.

CH ENG 4312--Air Pollution Control (3). Modeling of urban air pollution and control techniques. Topics treated are plume dispersion theories, photochemistry, methods of monitoring, methods of industrial abatement and legal aspects. Prerequisites: CH ENG 3234 or instructor's consent.

CH ENG 4314--Biochemical Engineering Operation (3). (same as BIOL_EN 4314). Transport processes in bioreactors, agitation and aeration, scale-up, sterilization, liquid-solid separation, cell distegration, and other units operations related to product recovery. Prerequisite: instructor's consent.

CH ENG 4315--Introduction to Biochemical Engineering (3). (same as BIOL_EN 4315). General introduction to biochemical engineering follows fundamentals of microbiology and biochemistry. Topics: fermentation, microbial population kinetics, bioproduct separation and purification, enzyme engineering techniques, biochemical reaction energetics. Prerequisites: CHEM 2120, MATH 2300 or instructor's consent.

CH ENG 4317--Chemical Processing in Semiconductor Device (3). This course covers the current plasma processing methods used to produce semiconductor devices with emphasis on memory devices. The physics and chemistry of how plasmas are formed, sustained and interact with the semiconductor wafers being processed. Plasma chemistry and the chemical reactions used in plasma etching are discussed. MATH 4100/7100.

CH ENG 4318--Energy Technology and Sustainability (3). An introductory course on energy technology, resources, practices, and common calculations used for energy analysis. Prerequisite: at least one engineering thermodynamics course or a Physical Chemistry course or instructor's consent. May be repeated for credit.

CH ENG 4319--Introduction to Polymer Materials (3). An introduction to the structure and properties of polymers. Solution properties, molecular weight determination and rheological behavior are studied. Manufacturing and processing techniques are considered. Prerequisites: CH ENG 3262 and CHEM 2120.

CH ENG 4321--Introduction to Ceramics (3). Introductory course in ceramics materials, crystal structure, processes and properties. The course content and level of presentation would allow an entry level engineering to be conversant with the terminology and concepts of ceramic science and engineering. Prerequisite: Chemistry and Physics.

CH ENG 4335--Transport Phenomena (3). Integrated study of momentum, heat and mass transport. Prerequisites: CH ENG 3235, and MATH 4100/7100.

CH ENG 4345--Special Reading in Chemical Engineering (2-5). Individually supervised special reading leading to an engineering report. Prerequisite: senior standing.

CH ENG 4363--Chemical Reaction Engineering and Technology (3). Reactor design and optimization; rate equations; thermal effects in reactor. Prerequisites: CH ENG 2226, 3262, or instructor's consent.

CH ENG 4370--Modern Methods of Chemical Process Control (3). Process description using state space theory; introduction to digital control techniques; stability analysis. Prerequisites: CH ENG 4363.

CH ENG 4385--Chemical Engineering Design I (3). The course presents optimum design methods, cost estimation, material selection and other relevant areas for the design of chemical plants. In addition, chemical safety and risk assessment will be covered. Prerequisite: CH ENG 2226, 3235, 3262, PHYSICS 2760, CHEM 2120.

CH ENG 4980--Process Synthesis and Design (3). Continuation of Chemical Engineering 385: application of chemical analysis and modeling to a capstone design project. Prerequisite: CH ENG 4385.

CH ENG 4990--Undergraduate Research in Chemical Engineering (2-4). Directed study of chemical engineering problems. Prerequisite: instructor's consent.

CH ENG 4995--Undergraduate Research in Chemical Engineering - Honors (3-6). Individual research for a senior thesis; research is supervised by the chemical engineering faculty. The thesis is to be defended before the departmental Honors committee. Prerequisite: senior standing.

ADJUNCT FACULTY S. K. Banerji, P.E., D. P. Gwaze, C. G. Ingersoll, R. Karup, W. K. Moser, C. J. Nemmers P.E., G. Zang,

Civil engineering is about community service, development, and improvement. Civil engineers are involved in all levels of the planning, design, construction, and operation of facilities essential to modern life, ranging from infrastructure development and maintenance, waste disposal, transit systems, water supply and treatment systems, and offshore energy exploration structures. Civil engineers are problem solvers, meeting the challenges of pollution, traffic congestion, drinking water supply and energy needs, national security, communication, urban redevelopment, and sustainable community planning. At MU, a civil engineering student can specialize in four basic areas:

- ☒ Structural engineering (reinforced concrete and steel buildings and bridges)
- ☒ Environmental/water resources engineering (water supply, wastewater treatment, solid waste disposal, hazardous waste management, and surface and groundwater)
- ☒ Transportation engineering (traffic, safety, operations, planning, and multi-modal simulation)
- ☒ Geotechnical engineering (foundations, slopes, dams, earthquakes, pavements, landfills, groundwater, and non-destructive evaluation)

The Department of Civil and Environmental Engineering offers a Bachelor of Science with a major in Civil Engineering (BS CiE).

The Department of Civil and Environmental Engineering provides extensive laboratories for concrete and steel materials testing, soils testing, fluid mechanics, traffic operations, and chemical and microbiological analysis related to water supply and waste-water treatment.

Most graduates take the Fundamentals of Engineering Exam. Graduates are encouraged to become registered professional engineers and to continue their education throughout their careers.

EDUCATIONAL MISSION

The educational mission of the MU program in civil engineering is to prepare students for the profession of civil engineering. It does this by providing educational opportunities for two major constituencies: the undergraduate student working toward a BS CiE, the graduate student studying and conducting research leading to an MS and/or PhD.

The educational objectives of the Bachelor of Science with a major in Civil Engineering describe the expected accomplishments of graduates during the first 5 to 6 years after graduation. It is expected that nearly all students completing the requirements of the Bachelor of Science with a major in Civil Engineering will engage in the life-long learning necessary to advance professionally in the field of civil engineering and contribute to society and the profession through involvement in professional or other service activities.

It is expected that most students will

1. Enter the profession of civil engineering with proficiency in environmental engineering, geotechnical engineering, structural engineering, transportation engineering and water resources engineering. In doing so, these students will
 - a. Take and pass the Fundamentals of Engineering exam
 - b. Gain employment as an engineer-in-training
 - c. Take and pass the Professional Engineers Exam, and
 - d. Be licensed to practice engineering in one or more states

It is expected that some students will

2. Begin careers in civil engineering-related industries, especially construction and other careers not requiring professional licensure
3. Begin and complete graduate study in civil engineering at MU or other Carnegie doctoral extensive universities, and
4. Begin and complete graduate/professional study in other associated fields

The following list of outcomes describes what students are expected to know and to be able to do when they complete the program. At graduation, students will have:

- a. Ability to apply knowledge of mathematics through differential equations, probability and statistics, calculus-based physics and general chemistry to civil engineering problems
- b. Ability to conduct laboratory experiments and to critically analyze and interpret experimental data related to soil mechanics, fluid mechanics and civil engineering materials
- c. Ability to perform civil engineering design by means of design experiences integrated throughout the professional component of the curriculum
- d. Ability to function on teams that must integrate contributions from different areas of civil engineering toward the solution of multidisciplinary projects
- e. Ability to identify, formulate and solve civil engineering problems
- f. Understanding of professional practice issues in civil engineering including professional and ethical responsibility, procurement of work, bidding vs. quality based selection processes, how design professionals and construction professions interact to construct a project and the importance of professional licensure and continuing education
- g. Ability to write and speak effectively

- h. The broad education necessary to understand the impact of civil engineering solutions in a global and societal context
- i. Recognition of the need for, and an ability to engage in, life-long learning
- j. Knowledge of contemporary issues as they relate to civil engineering problems and solutions
- k. Ability to use the techniques, skills and modern engineering tools necessary for civil engineering practice, particularly in areas of environmental/water resources, geotechnical, structural and transportation engineering

Major Program Requirements - Civil Engineering (BS CiE)

Engineering topics start with basic computer and graphics courses. These are followed with basic engineering science courses, which ground the students in the fundamentals necessary for future course work and a sophomore design experience.

Engineering topics courses in the junior year provide students with the basic fundamentals in the areas of environmental engineering, geotechnical engineering, hydrology, water resources, structural engineering, transportation/traffic engineering, engineering economics, and probability and statistics. Many of these topics courses contain elements of civil engineering design. Elective courses in the senior year enable students to specialize or obtain a broad educational background across the civil engineering discipline.

Design is integrated throughout the curriculum. The capstone design project is supplied by consultants or governmental agencies. The course requires working in teams, making oral and written presentations and completing a final design report. Oversight, interaction and evaluation are provided by practicing engineers from industry and governmental organizations.

In addition to the major core requirements, students must complete all University graduation requirements including University general education, as well as all degree and college or school requirements.

Major core requirements

MATH 1500: Analytic Geometry and Calculus I.....	5
CHEM 1320: General Chemistry II with Lab.....	3
ENGINR 1100: Engineering Graphics Fundamentals	2
MATH 1700: Calculus II.....	5

CV ENG 4980: Civil Engineering Systems Design (WI).....	3
Civil engineering electives	15
Engineering topics elective - select two from: (a) CIRCUITS ENGINR 2100 or BIO EN 4380 or CV ENG 4610 (b) THERMODYNAMICS ENGINR 2300 or CH ENG 3261 and (c) DYNAMICS CV ENG 2080 or MAE 2600.....	6
Advisor-approved electives.....	6

Departmental Honors

Students who will graduate with a 3.0 GPA or higher are eligible for the College of Engineering honors program. Interested students should ask their advisor for details about this highly rewarding program that can include earning a salary for research performed under the guidance of a faculty member.

CIVIL ENGINEERING COURSES

CV ENG 1000--Introduction to Civil Engineering (1). Introduces various aspects of Civil Engineering practice. May be repeated one time for credit.

CV ENG 1001--Experimental Course (cr. arr.). For freshman-level students. Content and number of credit hours to be listed in Schedule of Courses.

CV ENG 2001--Experimental Course (cr. arr.). For sophomore-level students. Content and number of credit hours to be listed in Schedule of Courses.

CV ENG 2080--Introduction to Dynamics (3). Basic fundamentals of particle and rigid body dynamics; energy and momentum methods. Prerequisite: ENGINR 1200.

CV ENG 3001--Fundamental Topics in Civil Engineering (1-3). Special engineering topics for undergraduate students. Prerequisite: instructor's consent.

CV ENG 3010--Decision Methods for Civil Engineering Design (3). Essential features of civil engineering including the design process, design teams, experimental and computational tools, engineering economy, communication skills, and ethical considerations. Prerequisite: grade of C- or better in ENGLSH 1000. Co-requisite: ENGINR 1200.

CV ENG 3100--Fundamentals of Transportation Engineering (4). Covers fundamentals of transportation engineering including geometric design, traffic engineering, pavements, and planning. Prerequisite: grade of C- or better in ENGINR 1100. Co-requisite: CV_ENG 3010.

CV ENG 3200--Fundamentals of Environmental Engineering (4). Fundamentals of water quality engineering and water resources, water and wastewater treatment, solid and hazardous and radioactive waste management, air pollution, environmental regulation, and environmental ethics. Prerequisite: grade of C- or better in CHEM 1320 or equivalent; co-requisite: CV_ENG 3010.

CV ENG 3300--Structural Analysis I (4). Analysis of statically determinate beams, frames; shear and moment diagrams; influence line diagrams; beam deflections. Analysis of statically indeterminate structures; moment distribution; energy methods. Introduction to matrix analysis. Prerequisites: grade of C- or better in ENGINR 2200.

CV ENG 3312--Reinforced Concrete Design (3). Basic principles of reinforced concrete design. Design of beams for flexure and shear; design of short and slender columns. Prerequisite: grade of C- or better in CV_ENG 3300.

CV ENG 3313--Structural Steel Design (3). Basic principles of structural steel design. Design of beams, axially loaded members, columns, and bolted and welded connections. Corequisites: CV_ENG 3300.

CV ENG 3400--Fundamentals of Geotechnical Engineering (4). Detailed study of physical and mechanical properties of soil governing its behavior as an engineering material. Prerequisite: grade of C- or better in ENGINR 2200; Co-requisite: CV_ENG 3010.

CV ENG 3600--Civil Engineering Materials (3). Introduces composition, structure, properties, behavior, and selection of civil engineering materials. Prerequisites: grade of C- or better in ENGINR 2200 or instructor's consent; co-

requisite: CV_ENG 3010.

CV ENG 3700--Fluid Mechanics (3). Statics and dynamics of fluids, principles of continuity, momentum and energy, pipe flow. Prerequisite: grade of C- or better PHYSCS 2750.

CV ENG 3702--Hydrology (4). Fundamental concepts of hydrology in engineering; quantitative estimation of stream-flow magnitude and frequency; and open channel flow considerations from streamflow. Fluid Mechanics lab with lab reports. Prerequisites: grade of C- or better MATH 2300 and CV_ENG 3200 and 3700.

CV ENG 4001--Topics in Civil Engineering (3). Study of current and new technical developments in civil engineering. Prerequisite: instructor's consent.

CV ENG 4008--Risk and Reliability for Civil Engineers (3). This course focuses on how to use probability and statistics to quantify uncertainties and consider risks when making civil engineering decisions and designing civil engineering systems. Prerequisites: grade of C- or better in CV_ENG 3010 or other introductory probability/statistics course.

CV ENG 4080--Advanced Surveying (3). Celestial observations for determination of position; state coordinate systems, precise surveys, introduction to geodetic surveys, principles of photogrammetry. Theory of optical surveying instruments. Prerequisites: CV_ENG 2090 and MATH 1500.

CV ENG 4085--Problems in Civil and Environmental Engineering (2-4). Directed investigation of civil engineering. Prerequisite: instructor's consent.

CV ENG 4100--Traffic Engineering (3). Characteristics and studies associated with highway traffic. Capacity analysis and evaluation of freeways, rural highways, and urban streets. Traffic signal control and coordination. Prerequisites: grade of C- or better in CV_ENG 3100.

CV ENG 4102--Infrastructure Management (3). Civil infrastructure condition assessment, performance modeling, deterioration processes and models, maintenance and rehabilitation strategies, management techniques, data analysis, management systems, financing, case studies, emerging technologies. Prerequisites: grade of C- or better in CV_ENG 3100.

CV ENG 4103--Planning and Geometric Design of Highways (3). Techniques of highway planning in rural and urban areas. Design of the visible elements of highways. Prerequisites: grade of C- or better in CV_ENG 3100.

CV ENG 4104--Pavement Materials and Design (3). Properties of materials used in roads, airports and other pavement construction. Design methods for rigid and flexible pavements. Prerequisites: grade of C- or better in ENGINR 2200.

CV ENG 4106--Intelligent Transportation Systems (3). This is an introductory course in Intelligent Transportation Systems (ITS). Topics include the theory of transportation networks and systems optimization, current implementations of ITS, and practical issues and implications of ITS. Prerequisite: grade of C- or better in CV_ENG 3100.

CV ENG 4108--Bicycle and Pedestrian Transportation (3). This course teaches how to integrate pedestrian and bicyclist accommodations into the planning and design of transportation facilities. Topics include bicy-

clist safety, accommodation at intersections, traffic calming techniques and facility design. Prerequisite: grade of C- or better in CV_ENG 3100. Graded on A/F basis only.

CV ENG 4110--Transportation Simulation (3). Theory and application of simulation in transportation engineering. Prerequisites: grade of C- or better in CV_ENG 3100.

CV ENG 4120--Airport Engineering (3). Airport systems planning, design, and management. Prerequisite: grade of C- or better in CV_ENG 3010.

CV ENG 4130--Transportation Safety (0). This course is an introduction to transportation safety. The focus will be on surface transportation. The student is expected to analyze safety data and to devise engineering solutions to safety problems. Prerequisite: CV_ENG 3010.

CV ENG 4200--Remote Sensing of the Environment (3). Principles, characteristics and applications of remote sensing in engineering, geosciences, agriculture and environmental projects. Topics: basic concepts, photographic, thermal multispectral and microwave systems, satellite remote sensing and digital image processing. Prerequisites: junior standing.

CV ENG 4210--Solid Waste Management (3). Engineering principles involved in generation, handling, collection, transport, processing, and disposal of solid wastes, resource recovery and reuse, legislation on solid wastes and groundwater contamination problems. Prerequisite: junior standing.

CV ENG 4220--Hazardous Waste Management (3). (same as Chemical Engineering 4220). Engineering principles involved in handling, collection, transportation, processing and disposal of hazardous wastes, waste minimization, legislation on hazardous wastes and groundwater contamination.

CV ENG 4230--Introduction to Water Quality (3). Methods for determining and characterizing water quality, effects of pollution on streams and lakes, and an introduction to engineered systems for the distribution, collection and treatment of water and wastewater. Prerequisite: junior standing.

CV ENG 4240--Water Quality Analysis (3). Chemical, physical and biological methods for analysis of streams, lakes, wastewaters and water supplies and their use in water quality management. Prerequisite: grade of C- or better in CV ENG 4230 or instructor's consent.

CV ENG 4250--Environmental Regulatory Compliance (3). Systems of water law; provisions of major federal environmental laws and regulations; development of regulations at the federal, state, and local levels; regulatory frameworks; permits; and enforcement.

CV ENG 4260--Environmental Public Policy (3). Engineering and economic aspects of environmental policy. Basic understanding of environmental statutes and case law.

CV ENG 4270--Environmental Engineering Microbiology (3). Theory and application of fundamental principles of microbiology, ecology, and aquatic biology of the microorganisms of importance to sanitary engineers. Prerequisite: senior standing or instructor's consent.

CV ENG 4290--Hazardous Waste and Aquatic Chemistry (3). Redox, carbonate chemistry, sorption topics. Innovative processes for hazardous waste treatment.

CV ENG 4300--Advanced Structural Steel

Design (3).Design of steel structures and bridges. Topics include composite beams, plate girder design, and moment resistant connections. Prerequisite: grade of C- or better in CV_ENG 3313.

CV ENG 4302--Prestressed/Advanced Reinforced Concrete (3).Principles of prestressing. Constituent materials, loading and allowable stresses. Working and ultimate stress analysis and design. Shear and torsion. Deflections. Prestress losses. Continuous beams. Composite beams. Compression members. footings. Co-requisite: CV_ENG 3312.

CV ENG 4310--Structural Design and Analysis (3).Design and analysis of building frames and bridges in steel and concrete using case studies. Economic selection of structural type and material. Basic methods of analysis for statically indeterminate structures. Prerequisite: grade of C- or better in CV_ENG 4300.

CV ENG 4320--Energy Methods in Mechanics (3).Variational mechanics including practical examples. Topics include calculus of variation of boundary value problems, energy methods such as Ritz and Galerkin methods, approximate solutions methods such as the finite element and finite difference, and eigenvalue problems. Prerequisites: senior or graduate standing required.

CV ENG 4330--Structural System Design (3).Design of buildings in steel and reinforced concrete, including estimation of loads and design of gravity and lateral force resisting systems. Prerequisite: grade of C- or better in CV_ENG 3312 and 3313.

CV ENG 4350--Matrix Methods of Structural Analysis (3).An introduction to the fundamentals of stiffness and flexibility methods for analysis of truss and frame structures. Application of the STRUDL and NASTRAN programs to three dimensional structures. Prerequisite: senior standing; grade of C- or better in CV_ENG 3300.

CV ENG 4360--Bridge Engineering (3).Review of Highway Bridge Analysis and Design Fundamentals. Study of Influence Line Diagrams and Shear and Moment Envelopes. Design of Medium- and Short-Span Girder Bridges based on AASHTO LRFD specs. Prerequisite: grade of C- or better in CV_ENG 3312 and CV_ENG 3313.

CV ENG 4404--Geotechnical Earthquake Engineering (3).This course provides an introduction to geotechnical aspects of earthquake engineering. Topics include: basic seismology, seismic hazard analysis, dynamic soil properties, site response analysis and soil liquefaction. Prerequisite: grade of C- or better in CV ENG 3400 or instructor's consent.

CV ENG 4406--Geotechnics of Landfill Design (3).This course will focus on geotechnical and construction aspects in the analysis, design and construction of waste containment facilities (landfills) including expansions of existing facilities. Prerequisite: instructor's consent.

CV ENG 4410--Foundation Engineering (3).Subsurface exploration. Design of basic foundation structures, shallow foundations, retaining walls, deep foundations. Prerequisites: Grade of C- or better in CV_ENG 3400.

CV ENG 4412--Earthwork Engineering and Design (3).Study of concepts, theories, and design procedures for modern earthwork engineering including: compaction and densification of soils and soil improvement, seepage

and drainage, slope stability and performance, and earth retaining structures. Prerequisite: grade of C- or better in CV_ENG 3400.

CV ENG 4500--Introduction to Construction Management (3).Structure of the construction industry; construction drawings and specifications; estimating and bidding; construction contracts, bonds and insurance; planning and scheduling of construction operations; project management; computer techniques. Prerequisite: junior standing.

CV ENG 4600--Advanced Mechanics of Materials (3).(same as Mechanical and Aerospace Engineering 4600). Analysis of more complicated problems in stresses, strains. Prerequisite: grade of C- or better in ENGINR 2200.

CV ENG 4610--Sensors and Experimental Stress Analysis (3).Sensors and instrumentation for stress analysis, mechanical measurement and health monitoring of civil structures. Application and design of data acquisition systems, basic digital signal processing. Electronics and instrumentation circuits. Prerequisite: grade of C- or better in ENGINR 2200 and PHYSICS 2760.

CV ENG 4660--Vibration Analysis (3).(same as Mechanical and Aerospace Engineering 4660). Vibration theory with application to mechanical systems. Prerequisites: grade of C- or better in CV_ENG 2080 and MATH 4100.

CV ENG 4692-I-ntrroduction to Structural Dynamics (3).Theory of structural response to dynamic loads. Computation of dynamic response of structures to dynamic loads like blast and earthquake. Modal analysis and single degree of freedom methods will be covered. Prerequisite: grade of C- or better in CV_ENG 3300.

CV ENG 4700--Hydraulics of Open Channels (3).Gradually varied flow and theory of the hydraulic jump. Slowly varied flow involving storage; rating curves. Prerequisite: grade of C- or better in CV_ENG 3700.

CV ENG 4703--Applied Hydrology (3).Modern methods of applied hydrologic analysis and synthesis of hydrologic records. Prerequisites: grade of C- or better in CV_ENG 3700 and 3702 or instructor's consent.

CV ENG 4710--Soil and Water Conservation Engineering (3).(same as Biological Engineering 4150). Analysis of run-off and erosion from urban and agricultural lands. Design and layout of erosion control structures. Prerequisites: CV_ENG 3700 or MAE 3400.

CV ENG 4720--Watershed Modeling Using GIS (3).(same as Biological Engineering 4350). Watershed modeling using GIS based AVSWAT program for hydrology, sediment yield, and water quality; includes analysis of erosion processes with USLE, MUSLE, and WEPP. Procedures are presented for model calibration and sensitivity analysis of data inputs. Prerequisites: CV_ENG 3700 or MAE 3400 or instructor's consent.

CV ENG 4792--Analysis of Water-Resource Systems (3).Applies hydrology, hydraulic and sanitary engineering, and economics to water-resource design problems considering man and his environment. Uses methods of systems analysis. Prerequisite: instructor's consent.

CV ENG 4980--Civil Engineering Systems Design (3).Design of civil engineering systems. Prerequisite: senior standing in Civil Engineering at the University of Missouri-Columbia or written consent of Chairman.

CV ENG 4990--Undergraduate Research in Civil and Environmental Engineering (1-4).Independent investigation or project in Civil Engineering. Prerequisites: senior standing in Civil and Environmental Engineering and instructor's consent. May be repeated to 6 hours.

CV ENG 4995--Research in Civil & Environmental Engineering-Undergraduate Honors (1-3).Independent project, supervised by the honors advisor, to be presented as a formal written report. Prerequisite: participation in the Civil and Environmental Engineering Departmental Honors Program.

The Department of Computer Science offers a broad curriculum that spans the theory, design and applications of computing and information technology. The Bachelor of Science degree in Computer Science includes a strong component of mathematics and sciences along with more theoretical courses in computer science. The Bachelor of Science in Information Technology offers two focus areas including information systems and media technologies. Students develop skills in database administration, cyber security, game development and film production. The Bachelor of Arts degree, offered by the College of Arts and Science, includes applications-oriented computer science courses and encourages students to develop skills in related fields in areas such as computer animation, business, art, music and geography. A minor is available.

Major Program Requirements - Bachelor of Science in Computer Science (BS)

The Bachelor of Science with a major in Computer Science emphasizes the study of software systems and graphics, computational theories and algorithms, computer organization, networking and multimedia, and programming methodology. Students who complete the BS in Computer Science can work for government agencies, academic institutions, or private industry creating and applying new technologies to solve complex problems.

The BS degree requires the completion of the three-semester

calculus sequence plus discrete math and statistics. A student who selects an appropriate additional math course as a technical elective and has at least 9 credits in math at MU can earn a math minor.

The BS degree requires the completion of 126 credits. To graduate, a student must earn a 2.0 GPA or better in all courses that have an MU engineering prefix. A grade of C- or better is required in each CMP SC course that is a prerequisite for a CMP SC course that the student takes.

The Engineering Career Services Office, W1025 Laffer Hall, can assist students in searching for employment opportunities upon graduation and for internship/co-op positions.

Course requirements listed here apply to students beginning as regular college freshmen in fall 2009. A student who started college before fall 2009 and who has been continuously enrolled as a full-time student may be pursuing the previous program and should contact the department for information on these degree requirements.

In addition to the major core requirements, students must complete all University graduation requirements including University general education, as well as all degree and college or school requirements.

Major core requirements

Computer science courses	60
CMP SC 1000: Introduction to Computer Science	1
CMP SC 1040: Introduction to Problem Solving and Programming.....	3
CMP SC 1050: Algorithm Design and Programming I.....	3
CMP SC 2050: Algorithm Design and Programming II	3
CMP SC 2110: Programming in C	3
CMP SC 3270: Introduction to Digital Logic	3
CMP SC 3280: Assembly Language and Computer Organization	3
CMP SC 3380: Database Applications and Information Systems	3
CMP SC 4050: Design and Analysis of Algorithms I	3
CMP SC 4320: Software Engineering I	3
CMP SC 4520: Operating Systems I.....	3
CMP SC 4850: Computer Networks I.....	3
CMP SC 4970: Senior Capstone Design I.....	3
CMP SC 4980: Senior Capstone Design II	2
CS courses chosen from the following list.....	21
At least 15 must be numbered above 4000; two of the 4000-level courses must be CMP SC 4410, 4430, or 4450. One 3000/4000 level INFOTC course can be taken as a CMP SC elective but it is counted as a lower level (below 4000) CMP SC course.	
CS 2830: Introduction to the Internet, WWW and Multimedia Systems (3)	
CMP SC 3330: Object Oriented Programming (3)	
CMP SC 3530: UNIX Operating System (3)	
CMP SC 3940: Internship in Computer Science (3)	
CMP SC 4001: Topics in Computer Science (1-3)	
CMP SC 4060: String Algorithms (3)	
CMP SC 4085: Problems in Computer Science II (1-6)	
CMP SC 4270: Computer Architecture I (3)	
CMP SC 4330: Object Oriented Design I (3)	
CMP SC 4380: Database Management Systems I (3)	
CMP SC 4410: Theory of Computation I (3)	
CMP SC 4430: Compilers I (3)	
CMP SC 4450: Principles of Programming Languages (3)	
CMP SC 4610: Computer Graphics I (3)	
CMP SC 4620: Physically Based Modeling and Animation (3)	
CMP SC 4650: Image Processing (3)	

CMP SC 4670: Digital Image Compression (3)
 CMP SC 4730: Building Intelligent Robots (4)
 CMP SC 4750: Artificial Intelligence I (3)
 CMP SC 4770: Introduction to Computational Intelligence (3)
 CMP SC 4830: Science and Engineering of the World Wide Web (3)
 CMP SC 4860: Network Security (3)
 CMP SC 4870: Wireless and Mobile Networks (3)
 CMP SC 4995: Undergraduate Research in Computer Science-Honors (1-6)

Related courses.....22
 MATH 1500: Analytic Geometry and Calculus I5
 MATH 1700: Calculus II.....5
 MATH 2300: Calculus III3
 MATH 2320: Discrete Mathematical Structures3
 MATH 4315/STAT 4710: Introduction to Mathematical Statistics3
 Technical elective.....3
 2000-level or above CMP SC course or 4000-level Math course,
 2000-level or above engineering courses, MANGMT 3000, FINANC 3000 or other courses that meet prior approval of CMP SC advisor.
 An INFOTC course at the 2000 level or above can be taken. Students cannot take INFOTC 2810 or 2910 as a technical elective if they have already taken CMP SC 4850.

Science courses minimum 12
 Including one of the two-semester sequences below. At least one of the courses must include a lab. Labs listed separately are not considered a second science course (for example, BIO SC 1010 and 1020 equal one science course).

Science sequences (choose one of the following four sequences)

Physics sequence (credit not given for both PHYSCS 1210 and 2750 or PHYSCS 1220 and 2760)

PHYSCS 2750: University Physics (5)
 PHYSCS 2760: University Physics (5)
 OR
 PHYSCS 1210: College Physics I (4)
 PHYSCS 1220: College Physics II (4)

Chemistry sequence

CHEM 1310: General Chemistry I (2)
 CHEM 1320: General Chemistry II with Lab(3)

Biology sequence

BIO SC 1010: General Principles and Concepts Biology (3)
 AND
 BIO SC 1020: General Biology Laborator (2)
 AND one of the following courses
 BIO SC 1200: General Botany with Laboratory (5)
 BIOCHM 2110: The Living World: Molecular Scale (3)
 BIOCHM 2112: Biotechnology in Society (3)
 ANTHRO 2050: Introductory to Biological Anthropology with
 Lab (5) OR
 ANTHRO 2051: Introduction to Biological Anthropology (3) AND
 ANTHRO 2052: Biological Anthropology Laboratory (2)
 BIO SC 2100: Infectious Diseases (3)
 BIO SC 2600: Ornithology (4)
 BIO SC 3050: Genetics and Society (3)
 BIOCHM 3630: General Biochemistry (3)
 BIO SC 3210: Plant Taxonomy (4)

Geology sequence

GEOL 1100: Principles of Geology with Laboratory (4)
 OR
 GEOL 1200: Environmental Geology with Laboratory (4)
 AND one of the following courses
 GEOL 2150: The Age of the Dinosaurs (3)
 GEOL 2200: Oceanography (3)
 GEOL 2300: Earth Systems and Global Change (3)

GEOL 2350: Historical Geology (3)
 GEOL 2400: Surficial Earth Processes and Products with Laboratory (4)
 GEOL 3110: Geology of Missouri (3) AND
 GEOL 3115: Geology of Missouri Lab (1)
 Upper-class geology course

Courses to complete 12 credits in science

ASTRON 1010: Introduction to Astronomy (4)
 ASTRON 1020: Intro to Laboratory Astronomy (2)
 CHEM 1100: Atoms and Molecules with Lab (3)
 CHEM 1330: General Chemistry III with Lab(3)
 CHEM 2050: Introduction to Organic Chemistry with Lab (5)
 Any science sequence courses outside the student's selected sequence
 Any biology, biochemistry, chemistry, geology, or physics courses beyond the levels listed above
 Other science courses pre-approved by the advisOr
 Non-science electives9
 Students must complete 9 hours of non-science electives to satisfy the 30 hour non-science requirement.

Major Program Requirements - Bachelor of Arts in Computer Science (BA)

Major Program Requirements - Bachelor of Science in Information Technology (BS)

This degree program is offered by the Computer Science Department within the College of Engineering. The curriculum offers two focus areas including information system and media technologies. (Focus areas will not be designated on transcripts.) Career opportunities include database administration, web design, cyber security, game development, film production, and more.

To receive the Bachelor of Science Degree in Information Technology, the candidate must successfully complete 126 semester hours of credit including the following distribution: Computer Science (CS) course requirements - 19 hours of CS core courses, 35 hours of IT courses, 12 hours of related math and business courses, 9-12 hours of science, 15-22 hours of courses in a minor and any remaining hours for elective courses. The BS IT degree requires the completion of at least 9 hours of mathematics and statistics including 3 hours of business calculus. An IT student can earn a minor in a related area outside of IT/CS.

Information Technology students must earn a C-range grade or better in all IT/CS courses that are prerequisites for other IT/CS courses that the student takes. To graduate, a student must earn a cumulative UM grade point average of 2.0 or better and a 2.0 grade point average or better in all courses that have an MU engineering prefix.

The Engineering Career Services Office, W1025 Lafferre Hall, can assist students in searching for employment opportunities and for internship/co-op positions.

These course requirements apply to students beginning full-time Fall 2009 or after.

In addition to the major core requirements, students must complete all University graduation requirements including University general education, as well as all degree and college or school requirements. See course descriptions for prerequisites.

Minor in Computer Science

A minor in computer science is offered through the College of Engineering. To obtain a minor, a student must complete courses approved by the Department of Computer Science. The student must earn a grade of C- or better in each course counting toward the minor and have a 2.0 GPA in all courses counting toward the minor. The following courses are required.

CMP SC 1050: Algorithm Design and Programming I.....	3
CMP SC 2050: Algorithm Design and Programming II	3
CMP SC 3270: Introduction to Digital Logic	3
Three additional department-approved CMP SC courses with at least one numbered above 3000	9

COMPUTER SCIENCE COURSES

CMP SC 1000--Introduction to Computer Science (1). Provides an overview of the computer science discipline. Topics include data representation, hardware, problem solving and program design, algorithms, and ethical issues and responsibilities within the discipline. Current research in graphics, multimedia, databases, data mining, info systems, networks and artificial intelligence will also be presented.

CMP SC 1001--Topics in Computer Science (cr.arr). Topic and credit may vary from semester to semester. May be repeated upon consent of department.

CMP SC 1010--Fund. Personal Computing: Hardware, Software, & Communication (3). Introduction to the fundamentals of computers, especially personal computers. Basics of computer hardware, computer software and computer communications are presented. Learners will gain an understanding of how these basic components form a system for problem solving.

CMP SC 1020--Introduction to Computing (3). Introduction to word processing, spreadsheets, and database software. Taught in classrooms equipped with microcomputers. May not be taken for credit after a computer science course numbered above 1001 or ACCTCY 2258 has been completed. Does not fulfill a mathematical sciences requirement for Arts and Science students.

CMP SC 1040--Introduction to Problem Solving and Programming (3). An introduction to problem solving methods and programming concepts, providing experience in designing, developing, implementing, and testing programs. Cannot be taken for credit after CMP SC 1050.

CMP SC 1050--Algorithm Design and Programming I (3). This course provides the student with experience in developing algorithms, designing, implementing and testing programs. It discusses the fundamental object-oriented programming concepts, and uses the Java language as an implementation vehicle. Prerequisites: MATH 1100 and CMP SC 1040 (C- or better) or passing entrance exam. Math Reasoning Proficiency Course.

CMP SC 2001--Topics in Computer Science (cr.arr). Topic and credit may vary from semester to semester. May be repeated upon consent of department. Prerequisite: departmental consent.

CMP SC 2050--Algorithm Design and Programming II (3). A study of fundamental techniques and algorithms for representing and manipulating data structures. Topics include data abstraction, recursion, stacks, queues, linked lists, trees, efficient methods of sorting and searching, and Big-O analysis. Prerequisite: CMP SC 1050.

CMP SC 2110--Programming in C (3). The primary goal of this course is for students to achieve proficiency in the C programming language. The course will teach students the syntax, semantics and skills in C. The students will work to develop advanced data structures/algorithms, obtain an understanding of 'lower level' programming, become familiar with utilities and other resources necessary to build large-scale projects, debug sizable code, and understand a system level representation of executables produced. Prerequisite: CMP SC 2050.

CMP SC 2111--Production Languages (1-3). The study of the syntax, semantics, and applications of one programming language suitable for large scale scientific or commercial projects, such as FORTRAN, COBOL, PL/1, C, or ADA. May be taken more than once for credit. Prerequisite: CMP SC 2050.

CMP SC 2830--Introduction to the Internet, WWW and Multimedia Systems (3). This course will attempt to provide a comprehensive understanding of the evolution, the technologies, and the tools of the Internet. In particular, issues pertaining to the World Wide Web and Multimedia (HTML, CGI, Web based applications) will be discussed in detail. Prerequisites: CMP SC 2050.

CMP SC 3001--Topics in Computer Science (cr.arr). Current and new technical developments in computer science. For juniors and seniors. Prerequisite: departmental consent. May be repeated for 6 hours credit.

CMP SC 3270--Introduction to Digital Logic (3). Basic tools, methods and procedures to design combinational and sequential digital circuits and systems, including number systems, boolean algebra, logic minimization, adder design, memory elements, and finite state machine design. Prerequisites: CMP SC 2050.

CMP SC 3280--Assembly Language and Computer Organization (3). Introduces microcontroller-based systems, programming concepts, subroutines, bus control, input-output transfers, and interrupts. Prerequisite: CMP SC

Minor in Information Technology

A minor in Information Technology is offered through the College of Engineering. To obtain a minor, a student must complete courses in a sequence approved by the Department of Computer Science. The student must earn a grade of C- or better in each course counting toward the minor and have a 2.0 GPA in all courses counting toward the minor. At least 9 hours must be taken in residence at MU. A total of 15 credit hours are required.

The following courses are required for sequence one. At least 9 hours must be at the 2000 level or above. For other possible sequences, contact the department.

INFOTC 2610: Audio/Video I.....	3
INFOTC 3640: Digital Effects (INFOTC 1610 or 2610).....	3
INFOTC 4640: Digital Effects II (INFOTC 3640).....	3
INFOTC or CMP SC Electives.....	6

3270. Graded on A/F basis only.

CMP SC 3330--Object Oriented Programming (3). This course focuses on teaching the student to master the necessary object-oriented programming concepts: abstraction, polymorphism, encapsulation, inheritance, interfaces, abstract classes. The Java language is used to illustrate the fundamental principles of object-oriented software design and implementation. Modern programming topics, including Graphical User Interface and event-driven programming, are also tackled. It is assumed the student has a basic knowledge of C syntax and programming. Prerequisite: CMP SC 1050.

CMP SC 3380--Database Applications and Information Systems (3). Covers fundamental topics of database management systems (DBMS) and database-enabled applications. Topics include a brief history of secondary storage and databases, data modeling, introductory SQL, an overview of current database trends, and current popular database systems. Prerequisite: CMP SC 2050. Graded on A/F basis only.

CMP SC 3530--UNIX Operating System (3). Introduction to the UNIX operating system and its interfaces including the file system, shell, editors, pipes and filters, input/output system, shell programming, program development including C, and document preparation. Prerequisite: Advanced C programming experience.

CMP SC 3940--Internship in Computer Science (1-3). Computer-related experience in business or industry jointly supervised by faculty and computer professionals. Students should apply one semester in advance for consent of the supervising professor. Prerequisite: CMP SC 2050. Graded on a S/U basis only.

CMP SC 4001--Topics in Computer Science (cr.arr). Topic and credit may vary from semester to semester. May be repeated upon consent of department.

CMP SC 4050--Design and Analysis of Algorithms I (3). This course reviews and extends earlier work with linked structures, sorting and searching algorithms, and recursion. Graph algorithms, string matching, combinatorial search, geometrical algorithms and related topics are also studied. Cannot be counted toward CS MS/PHD. Prerequisite: CMP SC 2050 and MATH 2320.

CMP SC 4060--String Algorithms (3). This course provides an introduction to algorithms that efficiently compute patterns in strings.

Topics covered include basic properties of strings, data structures for processing strings, string decomposition, exact and approximate string matching algorithms. Prerequisite: CMP SC 4050. Graded on A/F basis only.

CMP SC 4085--Problems in Computer Science (1-6).Independent investigation or project in Computer Science. Prerequisite: senior standing in Computer Science. May be repeated to up 6 hours.

CMP SC 4270--Computer Architecture I (3).Architectural features of high-performance computer systems including hierarchical and virtual memory, pipelining, vector processing and an introduction to multiple-processor systems. Prerequisites: CMP SC 3270.

CMP SC 4310--Systems Analysis II (3).Advanced theory and practice of systems analysis. Including data-flow analysis, structured and data-oriented methodologies, project management, measurement and estimation, peer reviews, quality assurance, and system acquisition. Team projects involving real clients provide guided experience. Prerequisite: CMP SC 3310.

CMP SC 4320--Software Engineering I (3).Overview of software life cycle, including topics in systems analysis and requirements specification, design, implementation testing and maintenance. Uses modeling techniques, project management, peer review, quality assurance, and system acquisition. May not be counted toward CS MS/PHD Prerequisite: CMP_SC 2050.

CMP SC 4330--Object Oriented Design I (3).Building on a prior knowledge of program design and data structures, this course covers object-oriented design, including classes, objects, inheritance, polymorphism, and information hiding. Students will apply techniques using a modern object-oriented implementation language. Enrollment limited to undergraduate students only. Prerequisite: CMP SC 2050.

CMP SC 4380--Database Management Systems I (3).Fundamental concepts of current database systems with emphasis on the relational model. Topics include entity-relationship model, relational algebra, query by example, indexing, query optimization, normal forms, crash recovery, web-based database access, and case studies. Project work involves a modern DBMS, such as Oracle, using SQL. Prerequisite: CMP SC 3380.

CMP SC 4410--Theory of Computation I (3).An introductory study of computation and formal languages by means of automata and related grammars. The theory and applications of finite automata, regular expressions, context free grammars, pushdown automata and Turing machines are examined. May not be counted toward CS MS/PHD. Prerequisite: MATH 2320.

CMP SC 4430--Compilers I (3).Introduction to the translation of programming languages by means of interpreters and compilers. Lexical analysis, syntax specification, parsing, error-recovery, syntax-directed translation, semantic analysis, symbol tables for block structured languages, and run-time storage organization. May not be counted toward CS MS/PHD. Prerequisite: MATH 2320.

CMP SC 4450--Principles of Programming Languages (3).An introduction to the structure, design and implementation of programming languages. Topics include syntax, semantics,

data types, control structures, parameter passing, run-time structures, and functional and logic programming. May not be counted toward CS MS/PHD. Prerequisite: CMP_SC 2050.

CMP SC 4520--Operating Systems I (3).Basic concepts, theories and implementation of modern operating systems including process and memory management, synchronization, CPU and disk scheduling, file systems, I/O systems, security and protection, and distributed operating systems. Cannot be counted toward CS MS/PHD. Prerequisites: CMP_SC 2110 in C/C++ or an equivalent course in C/C++.

CMP SC 4610--Computer Graphics I (3).Basic concepts and techniques of interactive computer graphics including hardware, software, data structures, mathematical manipulation of graphical objects, the user interface, and fundamental implementation algorithms. Prerequisites: CS 2110 (or instructor's consent) and MATH 1500 or MATH 1300 and MATH 1320.

CMP SC 4620--Physically Based Modeling and Animation (3).This course introduces students to physically based modeling and animation methodology for computer graphics and related fields such as computer vision, visualization, biomedical imaging and virtual reality. We will explore current research issues and will cover associated computational methods for simulating various visually interesting physical phenomena. This course should be appropriate for graduate students in all areas as well as advanced undergraduate students. Graded on A/F basis only. Prerequisites: CMP SC 4610, good knowledge of C or C++ programming, no physics background necessary.

CMP SC 4650--Image Processing (3).(same as Electrical and Computer Engineering 4850). Fundamentals of digital image processing hardware and software including digital image acquisition, image display, image enhancement, image transforms and segmentation. Prerequisites: CMP SC 2050, STAT 4710 or instructor's consent.

CMP SC 4670--Digital Image Compression (3).Covers digital image formation, information theory concepts, and fundamental lossless and lossy image compression techniques including bit plane encoding, predictive coding, transform coding, block truncation coding, vector quantization, subband coding and hierarchical coding. Prerequisite: CMP SC 2050.

CMP SC 4730--Building Intelligent Robots (4).(same as ECE 4340). Covers the design and development of intelligent machines, emphasizing topics related to sensor-based control of mobile robots. Includes mechanics and motor control, sensor characterization, reactive behaviors and control architectures. Prerequisites: ECE 2210 or CS 3270 and CS 2050 or instructor's consent.

CMP SC 4750--Artificial Intelligence I (3).Introduction to the concepts and theories of intelligent systems. Various approaches to creating intelligent systems, including symbolic and computational approaches, insight into the philosophical debates important to understanding AI. Prerequisite: at least junior standing, CMP SC 2050

CMP SC 4770--Introduction to Computational Intelligence (3).(same as ECE 4870). Introduction to the concepts, models and algorithms for the development of intelligent systems from the standpoint of the computational paradigms of neural networks, fuzzy set

CMPSC 4810--Multimedia Engineering and Technology (3).(same as Electrical and Computer Engineering 4810). Survey of multimedia applications. Capture, coding, storage, mobile mission and software tools for developing productions involving text, graphics, images, animation, sound and video. Term Projects. Lecture and laboratory. 4 credits. Prerequisites: CMP SC 3210 and 3830.

CMP SC 4830--Science and Engineering of the World Wide Web (3).This course will study the science and engineering of the World Wide Web. We will study the languages, protocols, services and tools that enable the web. Emphasis will be placed on basics and technologies. Prerequisites: CMP SC 2830.

CMP SC 4850--Computer Networks I (3).Introduction to concepts and terminology of data communications and computer networking. Basic protocols and standards, transapplications of networking, routing algorithms, congestion avoidance, long-haul and local networks. Prerequisite: CMP SC 3270 and MATH 2320.

CMP SC 4860--Network Security (3).Principles and practice of cryptography, network security, and computer system security. It includes symmetric and asymmetric cryptography, authentication, security applications such as secure email, IP security, Web security, and system security issues such as intruders, viruses, worms, Trojan horses, and firewalls. Graded on A/F basis only. Prerequisite: CMPSC 4850.

CMP SC 4870--Wireless and Mobile Networks (3).Concepts and techniques in wireless networks: cellular concepts, wireless physical layer, wireless MAC protocol, mobility management, power management, wireless network security, wireless telecommunication system, wireless LAN, wireless ad hoc networking, wireless personal area network. Prerequisite: CMP SC 4850. Graded on A/F basis only.

CMP SC 4970--Senior Capstone Design I (3).Design projects emphasizing team work, communication skills, and prototyping. Covers professional ethics, intellectual property/patenting, knowledge of engineering literature, safety, economic and environmental impact of technology. Essays, oral and written reports. Prerequisites: CMP_SC 4320 and senior standing.

CMP SC 4980--Senior Capstone Design II (2).Course entails completion of CMP_SC 4970 design project. Design prototyping, testing, evaluation, presentation, and preparation of documentation. Prerequisite: CMP_SC 4970.

CMP SC 4990--Undergraduate Research in Computer Science (0-6).Independent investigation or project in Computer Science. Prerequisite: senior standing in Computer Science. May be repeated to 6 hours.

CMP SC 4995--Undergraduate Research in Computer Science - Honors (1-6).Independent investigation to be presented as an undergraduate honors thesis. Prerequisite: honors student in Computer Science.

INFORMATION TECHNOLOGY COURSES

INFOTC 1001--Topics in Information Technology (3).Topics may vary from semester to semester. May be repeated upon consent of department.

INFOTC 1610--Introduction to Entertainment Media (3).This course is an introduction to the basic fundamentals of entertainment products such as postproduction technology, camera and lighting technology, audio creation and mixing technology, and broadcast technology. Computer programs designed for visual special effects are used.

INFOTC 2001--Topics in Information Technology (3).Topics may vary from semester to semester. May be repeated upon consent of department. Graded on A/F basis only.

INFOTC 2600--Digital Multimedia (3).This course introduces broad views of concepts, software, hardware, and solutions in entertainment media applications. It will examine career options in fields such as information technology, news, film production and postproduction, website design, advertising, or communication.

INFOTC 2610--Audio/Video I (3).This is an introductory course on digital audio and video editing. Background presented in the course will include an overview of the techniques used in modern Non-Linear video editing, and understanding of block editing, and why it is essential when using modern digital technology. The course is hands-on with students at workstations, learning the software directly at the keyboard, and working on assignments in a lab context.

INFOTC 2620--Computer Modeling and Animation I (3).Introduction to the field of computer modeling and animation with an emphasis on tools. Learn programming methods for developing customized modeling and animation algorithms. Prerequisites: CMP SC 1050, and 2050 concurrently. Graded on A/F basis only.

INFOTC 2810--Fundamentals of Network Technology (3).This course includes an overview of networking and the common wireless standards. Prerequisites: CMP SC 1050. Graded on A/F basis only.

INFOTC 2910--Cyber Security (3).This course covers numerous platform-independent security topics including threats, problem reports and services, theory and practice of defense in security, intrusion detection, data security, securing remote access, user education and support, designing a secure network and security management. Prerequisites: CMP SC 1050, INFOTC 2810. Graded on A/F basis only.

INFOTC 3001--Topics in Information Technology (3).Topics may vary from semester to semester. May be repeated upon consent of department. Graded on A/F basis only.

INFOTC 3610--Audio/Video II (3).This course presents broad professional techniques for completing an off-line edit and the progression to online and finishing, adding depth to topics introduced in A/V I. Students will gain experience in editing techniques involving dialogue, action, documentaries, music videos, and multi-camera projects. The course also introduces special effects, audio finishing, clip and media management, and use of various

media formats. Prerequisites: INFOTC 2610 and co-requisites CMP SC 2050.

INFOTC 3620--Computer Modeling and Animation II (3).This course covers advanced methods for modeling and animation with an emphasis on computer science theory and virtual reality. Prerequisites: INFOTC 2620 and CMP SC 2050. Graded on A/F basis only.

INFOTC 3630--Introduction to Game Design (3).This class will focus on the theory, design, and implementation of games. Students will learn about designing and implementing vital components for modern game engines, with respect to data structures, algorithms, content, development tools, and optimization strategies. In addition, students will use the Valve Source Engine (used to power Half-Life 2) to develop their own mod. The final project is a fully functional game. Prerequisite: INFOTC 2620, CMP SC 2050.

INFOTC 3640--Digital Effects (3).This course is an introduction to the fundamentals of digital motion picture effects technology. This course is designed for a student interested in pursuing a career in information technology, news, film production and film postproduction, website design, or communication. Prerequisites: INFOTC 1610 OR 2610.

INFOTC 3850--Computer System Administration (3).This course will cover network management tools, network maintenance, data management, remote access management, management tasks, responsibilities and ethics, required plans and policies, design of a well-managed network. Some work will be done in both Windows and Linux environments. Prerequisites: CMP SC 2050, junior standing. Graded on A/F basis only.

INFOTC 4001--Topics in Information Technology (3).Topics may vary from semester to semester. May be repeated upon consent of department. Graded on A/F basis only.

INFOTC 4390--Database Administration (3).This course is designed to give a firm foundation in Database Administrators' tasks. The primary goal is to give necessary knowledge and skills to setup, maintain and troubleshoot an Oracle database. This is an instructor-led course featuring lecture and hands-on exercises. Online demonstration and written practice sessions reinforce the concepts and skills introduced. The course defined objectives are designed to support preparation for the Oracle Certified Professional examination. Prerequisites: CMP SC 4380.

INFOTC 4630--Game Design II (3).This course explores 1) the manual and procedural development of static and dynamic game content, 2) programming for gameplay, interactivity, UI, game Artificial Intelligence, and 3) algorithms, ADTs, and research vital to game design. Prerequisite: INFOTC 3630.

INFOTC 4640--Digital Effects II (3).This course builds on fundamentals of digital motion picture effects technology learned in Digital Effects I. Computer programs designed for digital visual special effects in film and broadcast are integrated throughout the course. Prerequisites: INFOTC 3640.

INFOTC 4650--Shader Programming (3).The focus of this course is modern computer graphics algorithms and programming, with an

emphasis on games, shader languages, (GLSL and CG) and Graphical Processor Units (GPUs).

Prerequisites: CMP SC 2050, INFOTC 2620.

ASSOCIATE PROFESSOR EMERITUS R. W. Leavene Jr

The Department of Electrical and Computer Engineering offers both the Bachelor of Science with a major in Electrical Engineering and the Bachelor of Science with a major in Computer Engineering. The undergraduate program in both degrees at the University of Missouri provides students with the requisite fundamentals in either discipline and prepares them for beginning practice in both the traditional and emerging fields of these disciplines. The degree programs are flexible 126-credit structures that provide the fundamentals of engineering, in addition to a thorough coverage of the major specialties within their respective fields. In addition, technical electives allow concentration in selected areas.

The ECE department emphasizes close interaction with industry. Industry engineers visit regularly and industry-sponsored student projects are provided to give extra dimension to the program.

Many students in the ECE department combine the electrical engineering major with the computer engineering major in a special 138-credit program. These students receive both the BS EE and BS CoE degrees.

Students interested in interdisciplinary studies may use some electives to study business, premedicine, prelaw, and other areas. Students are able to choose from a wide variety of courses offered by other departments in the College of Engineering, as well as from other MU colleges, taking advantage of the multidisciplinary nature of the campus.

The Program Educational Objectives for electrical engineering are:

- Effectively use the principles and methods of electrical engineering, including mathematics and science, to analyze and design electrical systems
- Have confidence in technical capabilities and skills gained from an extensive laboratory experience including structured, to increasingly open-ended design
- Possess the ability to professionally work in teams, and communicate effectively
- Engage in professional activities that promote the electrical engineering profession and provide continuing learning
- Succeed in graduate study and research if pursued

The Program Educational Objectives for computer engineering are:

- Effectively use the principles and methods of computer engineering, including mathematics and science, to analyze and design computer systems
- Have confidence in technical capabilities and skills gained from an extensive laboratory experience including structured, to increasingly open-ended, design
- Possess the ability to professionally work in teams, and communicate effectively
- Engage in professional activities that promote the computer engineering profession and provide continuing learning
- Succeed in graduate study and research if pursued

ECE Honors Program:

The ECE Honors Program follows the general rules and philosophy of the College of Engineering Honors Program. Students may enter the program from the beginning of the junior year and must have a GPA of 3.0/4.0 at the start. Eligible students participate in the program by enrolling in ECE 4995: "Undergraduate Honors Research in Electrical and Computer Engineering" for one to three credit hours, which replace an equivalent number of hours of ECE technical electives.

The heart of the program is a research or advanced design project culminating in an undergraduate honors thesis. The project is conducted under the supervision of the honors advisor, who is an ECE faculty member selected by mutual agreement between the student and the professor. Satisfactory completion of the project requires approval (signatures) of the honors thesis by both the honors advisor and an additional faculty member, who serves as second reader of the thesis. Students who complete the program and graduate with a GPA of at least 3.0 receive the designation "Honors Scholar in Engineering" at graduation and on their diploma.

Another valuable feature of the Honors Program is that participants may reduce the number of credit hours required for degree completion to the University minimum of 120 by substituting up to six hours of credit from graduate courses through dual (undergraduate/graduate) enrollment during the

last four semesters of the undergraduate program and after completion of the honors project.

Department Requirements

Both the Bachelor of Science in Electrical Engineering (BS EE) and the Bachelor of Science in Computer Engineering (BS CoE) require that students earn a 2.0 GPA or better in all courses that have an MU engineering prefix. All ECE courses require a grade of C- or better in ECE prerequisites.

Engineering design in both the electrical engineering and computer engineering programs is provided through an integrated laboratory structure. Beginning with the first laboratory course in the fourth semester of each program, students have a significant design and laboratory experience in each semester of their respective programs.

In addition to the major core requirements, students must complete all University graduation requirements including University general education, as well as all degree and college or school requirements.

Major Program Requirements - Electrical Engineering (BS EE)

The electrical engineering degree offers course work in all traditional areas of the electrical engineering field. Focused areas of work are offered in the areas of communications, digital systems, discrete and integrated electronics, electromagnetics, energy systems and power electronics, robotics and system control. (Focus areas are not listed on transcripts or diplomas).

ELECTRICAL AND COMPUTER ENGINEERING COURSES

ECE 1000--Introduction to Electrical and Computer Engineering (1).Introduction to department, college and campus computing facilities and software; overview of areas encompassed by electrical engineering; small-team lab/projects. Lectures help sessions, and lab sessions. Prerequisite: freshman status.

ECE 1001--Experimental Course (cr. arr.).For freshman-level students. Content and number of credit hours to be listed in Schedule of Courses.

ECE 2001--Experimental Course (cr. arr.).For sophomore-level students. Content and number of credit hours to be listed in Schedule of Courses.

ECE 2100--Circuit Theory I (3).DC circuit analysis, inductors and capacitors, first order response, AC circuit analysis, single phase AC power. Co-requisite: MATH 2300. Graded on A/F basis only.

ECE 2110--Experimental Electrical Engineering I (3).Application of standard electronic test equipment to basic experimental tasks of measurement and characterization of electronic phenomena and devices. Prerequisites: ENGINR 2100 concurrently.

ECE 2210--Introduction to Digital Systems (3).Introduces microprocessor-based systems, computer organization, programming concepts, bus control, input-output transfers, subroutines and interrupts. Prerequisite: CMP SC 1040 or 1050. Graded on A/F basis only.

ECE 3110--Electrical and Computer Engineering Projects (2).Open ended design projects which encourage innovative solutions to design and measurement problems. Students teams complete several projects from different areas. Both oral and written presentations emphasized. Prerequisites: at least two of three from the following: STAT 4710 and at least 2 of 3 of ECE 3210, 3410 and 3510. Graded on A/F basis only.

ECE 3210--Logic Design (4).Digital electronics, chip level design, algorithmic state machines, microprocessor architecture and interfacing, and digital system design methodology. Lecture and lab. Prerequisites: ECE 2210.

ECE 3220--Computing for Embedded Systems (3).Software/Hardware development for embedded systems, including memory, I/O and interrupts; an overview of C and C++, class structures in object oriented programming; software development with UML and testing and debugging strategies. Prerequisites: ECE 3210 and C++ or Java. Graded on A/F basis only.

ECE 3230--Algorithms and Software Design (3).Covers basic algorithms including: arithmetic operations, sorting, string processing, parsing, hashing, and tree and graph manipulations. The C language and UNIX operating system are used as vehicles for illustration and practice in use of the algorithms and in the application of software design techniques. Prerequisite: ECE 2210.

ECE 3410--Electronic Circuits and Signals I (4).Electron Devices, modeling and applications to basic electronic circuits, including RC amplifiers and power supplies. Prerequisite: ECE 2110, 3810 concurrent.

ECE 3470--Introduction to Power Engineering (3). Real and reactive power in single and three-phase ac circuits; magnetic circuits and transformers; energy conversion, DC machines, induction and synchronous machines; power transmission and distribution. Co-requisite ECE 3810. Graded on A/F basis only.

ECE 3510--Electromagnetic Fields (4). Elements of vector analysis, transmission line theory, electrostatics, magnetostatics, time varying fields and plane waves. Prerequisite: PHYSCS 2760, MATH 4100 and ECE 2110. Graded on A/F basis only.

ECE 3610--Semiconductors and Devices (3). Crystal structure; quantum aspects of energy, radiation and matter; quantum mechanics and energy bands in solids; electronic and optical properties of semiconductors; p-n junctions and diodes; bipolar and field-effect transistors. Prerequisites: ECE 3510.

ECE 3810--Circuit Theory II (3). Transformers, 2-ports, RLC networks, continuous system time and frequency analysis and convolution, and intro to Laplace transforms. Prerequisite: ECE 2100 and Corequisite MATH 4100. Graded on A/F basis only.

ECE 3830--Signals and Linear Systems (3). Transform Analysis of Signals and Linear Systems. Laplace transforms, z-transforms, Fourier series and transforms. Prerequisite: ECE 3810.

ECE 4001--Topics in Electrical and Computer Engineering (3). Current and new technical developments in electrical engineering. Prerequisite: senior standing.

ECE 4010--Digital Computer Applications in Engineering (3). Use of digital computer for solution of engineering problems involving roots of equations, simultaneous equations, curve fitting, integration, differentiation and differential equations. Prerequisite: MATH 2300.

ECE 4020--Energy Systems and Resources (3). (same as Nuclear Science and Engineering 4315). Analysis of present energy usage in Missouri, USA and the world, evaluation of emerging energy technologies and trends for the future. Economics and environmental impact of the developed technologies. Prerequisite: ENGINR 2300.

ECE 4030--Introduction to Nuclear Reactor Engineering (3). (same as Nuclear Science and Engineering 4346). Engineering principles of nuclear power systems, primarily for the production of electrical energy. Prerequisites: ENGINR 1200, 2300.

ECE 4085--Problems in Electrical and Computer Engineering (2-4). Analytical or experimental problems pertaining to electric circuits, machines, fields or electronics. Prerequisites: 12 hours Electrical and Computer Engineering credit or instructor's consent.

ECE 4150--Solid State Area Laboratory (1). Laboratory experiments involved with solid state theory and integrated circuit fabrication and testing. Prerequisites: ECE 4650 and 4670.

ECE 4170--Control Systems Laboratory (1). Experiments in computer process control and industrial automation; automated process modeling; control algorithm design; control simulation; direct digital real-time control; transducers; computer interfacing; industrial control mechanisms; Programmable Logic Controllers. Prerequisites: ECE 4310, 3210,

3110.

ECE 4220--Real Time Embedded Computing (3). Embedded systems development with real time constraints including RTOS, task management and synchronization, real time scheduling algorithms, deadlocks, performance analysis and optimization, interfacing to external devices, and device drivers. Prerequisite: ECE 3220. Graded on A/F basis only.

ECE 4250--VDHL and Programmable Logic Devices (4). Design techniques including module definition, functional partitioning, hardware design language descriptions and microprogramming; design examples include arithmetic units, programmable controllers, and microprocessors. Prerequisites: ECE 3210.

ECE 4270--Microcomputer Architecture and Interfacing (4). Advanced microcomputer architecture and programming; memory management, memory and cache organizations, bus timing applications, serial parallel and custom interfaces. Prerequisite: ECE 4250.

ECE 4310--Feedback Control Systems (3). System modeling and time and frequency response, closed loop control, stability, continuous system design intro to discrete time control, software and hardware experiments on compensator design and PID control. Prerequisite: ECE 3810. Graded on A/F basis only.

ECE 4330--Introduction to Mechatronics and Robotic Vision (4). Covers 1) mechatronic systems; 2) the mathematical tools used to model industrial and mobile robots; and 3) vision sensors, their underlying models and algorithms that allow us to control and interact with robots. Prerequisites: ECE 3220 or 4220 or a C/C++ languages.

ECE 4340--Building Intelligent Robots (4). Covers the design and development of intelligent machines, emphasizing topics related to sensor-based control of mobile robots. Includes mechanics and motor control, sensor characterization, reactive behaviors and control architectures. Prerequisites: Junior standing and programming experience in one of the following programming languages: Basic, C, C++, or Java.

ECE 4350--Programmable Logic Controllers (4). Hardware and software aspects of PLC's; computer/PLC Communications; developing ladder logic programs; interfacing I/O devices, including sensors, to the PLC; labeling and documentation; utilizing analog capabilities; applications; developing Supervisory Control and Data Acquisitions (SCADA) applications. Prerequisite: junior standing or above.

ECE 4370--Automatic Control System Design (3). Techniques for feedback system design and analysis; compensation using root locus and frequency-domain methods; state-variable design methods; techniques for nonlinear systems analysis and design; sample-data control systems. Prerequisite: ECE 4310.

ECE 4390--Computer Process Control (3). Role of digital computer in process control; digital controller design; computer interfacing; transducers; programmable logic controllers; process modeling; introduction to robotics. Prerequisites: ECE 4310 and 3210.

ECE 4410--Power Electronics I (4). Power electronic device characteristics, important

circuit and component concepts, loss mechanisms and thermal analysis, phase controlled rectifiers, dc-dc converters, and dc-ac inverters. Includes laboratory projects. Prerequisites: ECE 3610 and 3410.

ECE 4430--Electronic Circuits and Signals II (3). Advanced study of electronic devices including frequency response of amplifiers, nonlinear effects in transistor amplifiers, oscillators, and feedback amplifiers. Prerequisites: ECE 3830 and 3410.

ECE 4450--Amplifier Analysis and Design (3). Design of electronic networks with application to instrumentation, control and communications systems. Practical specifications and problems in design. Lectures and projects. Prerequisite: ECE 4430

ECE 4510--Pulsed Power Engineering (3). Concepts of energy generation and storage systems used in pulse power engineering, high power opening and closing switches, high voltage engineering, grounding and shielding, high voltage safety. Prerequisite: ECE 3510.

ECE 4530--Photonics (3). Introduction to the physical principles and optical materials used in diagnostics, optical communications, semiconductor and solid state lasers, optical fiber transmissions, optical detectors, optical signal processing. Prerequisite: ECE 3510.

ECE 4550--Introduction to Plasmas (3). (same as Nuclear Science and Engineering 4375). Equations of plasma physics, interaction of waves and plasmas; plasma sheaths and oscillations; measurements and applications. Prerequisites: ECE 4930.

ECE 4570--Lasers and Their Applications (3). (same as NE ENG 4382). An introductory course in lasers. The course treats the subject from both a conceptual viewpoint and from the application of Maxwell's equations, to develop the optical theory for lasers. The course includes approximately 10 classroom hours of laboratory work with lasers. Prerequisites: PHYSCS 2760 and MATH 4110.

ECE 4580--Computational Neuroscience (3). (same as Biological Science 4580). Interdisciplinary course in biology and quantitative sciences with laboratory and modeling components. Explores basic computational and neurobiological concepts at the cellular and network level. Introduction to neural processing and experimental methods in neurobiology; modeling of neurons and neuron-networks. Prerequisite: MATH 1500 or equivalent. Graded on A-F basis only.

ECE 4610--Physical Electronics (3). Introduction to physical principles of semiconductors and semiconductor devices; gas, solid state, and semiconductor lasers; electro-optics; plasma physics and gaseous electronics; materials interaction with electric and magnetic fields. Prerequisite: ECE 3510.

ECE 4620--Introduction to BioMEMS (3). Study of BioMEMS devices and applications. Topics cover BioMEMS including overview of microfabrication techniques, common bioMEMS material, microfluidic principles, microfluidic devices, drug delivery, biomedical microdevices for neural implants, patch-clamping and single cell based analysis systems, microelectroporation, DNA microarrays, Polymerase Chain Reaction and biopolymers,

chemical and gas sensors and biosensors. Graded on A/F basis only.

ECE 4630--Introduction to Optical Electronics (3). Principles, devices and materials used to generate, modulate, and detect optical radiation. Review of important properties of light and semiconductors. Light-emitting diodes and lasers. Electro-optic modulation. Thermal and quantum detection. Emphasis on semiconductor-based devices and application to fiber-optical communications. Prerequisite: ECE 3610.

ECE 4640--MEMS Laboratory (4). The main objective of this course is to provide hands-on skills for the interdisciplinary Microelectromechanical Systems (MEMS). It puts emphasis on the practical aspects of design, fabrication, test, and characterization of micro/nano devices and systems. Prerequisites: PHYSCS 2760, CHEM 1320, or ECE 2100; instructor's consent.. Graded on A/F basis only.

ECE 4650--Semiconductor Device Theory (3). Band theory, equilibrium and non-equilibrium semiconductor electronics, junction theory, p-n junction devices, bipolar and field effect transistors including SPICE simulation. Prerequisite: ECE 3610.

ECE 4670--Microelectronic Fabrication (4). Basic silicon integrated circuit fabrication processes, basic techniques of wafer processing, economics of fabrication and resulting device properties, interdependence of process flow and device design. Accompanying laboratory. Prerequisite: ECE 3610.

ECE 4690--Design and Simulation of VLSI Circuits (4). Design of CMOS integrated circuits with emphasis on analog applications. Device models are developed for circuit simulation. Lecture and laboratory. Prerequisite: ECE 4670.

ECE 4710--Communications Systems (3). Concepts of communication systems, signal analysis and power spectrum density, signal transmission and filtering, linear modulation, exponential modulation, sampling, baseband digital communication, modulated digital communication, spread spectrum communication. Prerequisites: ECE 3830.

ECE 4730--Introduction to Wireless Communication System (3). Principles of wireless communication analysis and design. Digital communication basics, cellular radio, wireless PCS communications, multiple access techniques, channel coding and equalization, and standards of digital cellular/PCS systems.

ECE 4770--Electromechanical Conversion I (4). Theory and applications of electric machinery. Steady state and transient performance analysis of AC and DC electrical machines with emphasis on internal electromagnetic phenomena. Fundamentals of electronic speed controls. Prerequisite: ECE 3470.

ECE 4810--Multimedia Engineering and Technology (4). (same as Computer Science 4810). Survey of multimedia applications. Capture, coding, storage, transmission, and software tools for developing productions involving text, graphics, images, animation, sound and video. Term projects. Lecture and laboratory. Prerequisites: ECE 3210 and 3830.

ECE 4830--Introduction to Digital Signal Processing (4). Concepts, analytical tools,

design techniques used in computer processing of signals; signal representation, sampling, discrete-time systems analysis, recursive and non-recursive filters, design/implementation, discrete Fourier transform. Prerequisites: ECE 2110, 2210, 3830.

ECE 4850--Introduction to Digital Image Processing (4). (same as Computer Science 4650). Fundamentals of digital image processing hardware and software including digital image acquisition, image display, image enhancement, image transforms and segmentation.

ECE 4870--Introduction to Computational Intelligence (3). (same as Computer Science 4770). Introduction to the concepts, models, and algorithms for the development of intelligent systems from the standpoint of the computational paradigms of neural networks, fuzzy set theory and fuzzy logic, evolutionary computation and swarm optimization. Prerequisite: some exposure to rigorous axiomatic mathematical development of a topic (as can be found in most senior/graduate level math or statistics courses) is needed to appreciate some of the development of the theory. Also, the ability to program (well) in some high level language is essential to perform the computer projects. Graded on A/F basis only.

ECE 4880--Micro/Nano Systems (3). Micro/nano systems including micromachining, material properties, micro-actuators, optical, RF, inertial/mechanical and acoustic M/NEMS and M/Nanofluidic systems. Prerequisite: ECE 3610 or instructor's consent. Graded on A/F basis only.

ECE 4910--Microwave Systems (3). Theory and applications of transmission systems with emphasis on transmission lines at low and high frequencies. Prerequisites: ECE 3510.

ECE 4920--Microwave Engineering (3). Wave equation, plane wave propagation, transmission line theory, Smith Chart analysis, impedance transformers, waveguides modes, basic antenna theory, impedance matching and tuning, basic microstrip and stripline circuits.

ECE 4930--Distributed Transmission Systems (4). Theory and application of transmission systems with emphasis on transmission lines for low and high frequencies. Lecture and laboratory. Prerequisites: ECE 2110 and 3510.

ECE 4940--Antenna Theory and Design (3). Introduction to antenna theory and design emphasizing engineering aspects of antenna systems, transmitting and receiving antenna parameters, various wire and aperture antennas, the role of parasitic elements, reflectors, and arrays. Prerequisites: ECE 3510.

ECE 4950--Microwave Principles (4). Maxwell's Equations, transmission lines, plane wave propagation and reflection, waveguides, resonant cavities, microwave devices and components, radiation, radio wave propagation. Lecture and laboratory. Prerequisites: ECE 3510 and 3410.

ECE 4970--Senior Capstone Design I (3). (same as Computer Science 4970). Group design projects. Design methodology, project management, development of specifications, examination of alternatives, preparation of proposal. Oral and written reports. Not for

graduate credit. Prerequisites: ECE 3110 and senior standing.

ECE 4980--Senior Capstone Design II (2). (same as Computer Science 4980). Completion of ECE 4970 design project. Design prototyping, testing, evaluation and preparation of documentation. Lectures on ethics, professionalism, safety, economic consideration. Oral and written reports. Not for graduate credit. Prerequisites: senior standing and ECE 4970.

ECE 4990--Undergraduate Research in Electrical Computer Engineering (1-3). Supervised independent study or project in electrical or computer engineering, culminating in a written report.. Prerequisites: Undergraduate Program Director's consent.

ECE 4995--Undergraduate Honors Research in Electrical Computer Engineering (1-3). Independent investigation or project in electrical or computer engineering to be presented as an undergraduate honors thesis. Prerequisites: Participation in the ECE Honors Program.

ASSISTANT PROFESSOR M.Y. Sir, L. Barker, E. Sisokoglu

Industrial and manufacturing systems engineering is a blending of natural sciences, engineering science, mathematics, computers, social science and management. This fusion of diverse skills allows industrial engineers to design and implement socio-technical systems - complex combinations of people and technology brought together to solve problems. With its diversity, industrial engineering is used in a wide variety of areas in both manufacturing and service industries.

Industrial engineers in a manufacturing organization address many issues including designing workplaces, considering not only the capabilities of machines, but also the physiological and psychological capabilities of humans. They may design computer-integrated manufacturing systems with robots and computer systems to control production or manage inventory and quality of complex products, determining plant and warehouse locations. They may also develop sales forecasts, evaluate proposals to produce new products and build new or improved production facilities.

The same skills used as an industrial engineer to design manufacturing systems are also useful in designing better systems to care for patients in hospitals, to facilitate the judicial process, to provide faster and more accurate mail distribution and to improve airline routing and reservation methods. In effect, the industrial engineer may be involved in the design of a range of systems that provide beneficial services at a cost that society can afford.

The department offers the Bachelor of Science with a major in Industrial Engineering (BS IE) and BSIE/MBA 5 yr program.

Major Program Requirements – Industrial Engineering (BS IE)

Industrial engineering undergraduates complete a curriculum similar to all engineering students during the first two years. The objective of this curriculum is to give the student a rigorous foundation in mathematics, natural sciences, basic engineering sciences, applied probability and computer science, as well as a complementary and meaningful exposure to the humanities and social sciences.

In addition to the foundational courses, students gain knowledge of optimization methodologies, static and dynamic modeling. They also learn evaluation techniques for the modeling and evaluation of integrated systems of people, technology and information in the areas of strategic planning, production systems, control systems, quality systems, information systems, product and process design.

These fundamental skills provide the foundation from which students learn to develop systematic and integrated solution approaches to large-scale enterprise problems. In order to be successful as they begin their careers (or graduate study) students learn to communicate effectively in both oral and written forms, and become proficient in working in diverse teams of individuals.

Lastly, the curriculum prepares the student to practice in an ethical and professional manner, to serve as well as benefit from the engineering profession, and to continue the learning of and the contribution to the advancement of industrial and manufacturing systems engineering concepts.

Industrial engineering design experiences are integrated throughout the curriculum, many times in a team-based environment. Industrial engineering design is the process of developing and improving integrated systems that include people, materials, information, equipment and energy.

Educational Objectives

Graduates of the Department of Industrial and Manufacturing Systems Engineering (IMSE) at the University of Missouri are able to:

- Assess and create enterprise value through the optimization of systems by using methodologies that make processes faster or more innovative, reliable or cost-efficient
- Analyze and design integrated systems problems comprised of people, technology and information
- Provide leadership for and communicate effectively in a team-based environment in order to be agents of change in dynamically changing organizations

Educational Outcomes

All IMSE graduates should have:

- Foundational knowledge in mathematics, natural sciences, engineering sciences, applied probability, computer science, humanities and social science
- Optimization skill sets for modeling, optimization and evaluation of integrated systems of people, technology and information
- Problem-solving ability based upon knowledge and skills to develop integrated solutions to large-scale, socio-technical problems
- Communication and group dynamics skills to communicate in both oral and written forms and to become proficient in working in diverse teams of individuals
- Understanding of professional and ethical behavior to be

prepared for ethical decision making and service to the engineering profession, and to have the means to continue in the acquisition of knowledge

In summary, graduates of the Department of Industrial and Manufacturing Systems Engineering (IMSE) will possess a strong foundation upon which they can grow professionally, and continue to build a focused set of fundamental and engineering knowledge and skills that are integrated and applicable to real-world problems in any enterprise setting.

Because industrial engineering graduates are capable of solving complex problems requiring an understanding of an entire organization, they become prime candidates for top management or administrative positions.

In addition to the major core requirements, students must complete all University graduation requirements including University general education, as well as all degree and college or school requirements.

Major core requirements

MATH 1500: Analytical Geometry and Calculus I.....	5

INDUSTRIAL AND MANUFACTURING SYSTEMS ENGINEERING COURSES

IMSE 1010--Experimental Course (cr. arr.). For freshman-level students. Content and credit to be listed in the Schedule of Courses.

IMSE 1087--Undergraduate Seminar (0). Seminars are held monthly to provide a forum for departmental communication of upcoming opportunities (jobs, speakers, deadlines, etc.), speakers from industry to provide educational context, and student interaction. Required every semester of enrollment for graduation. Graded on S/U basis only.

IMSE 2030--Fundamentals of Systems Design and Analysis (3). Develop an understanding of a systems approach to the design and operation of modern industrial organizations: systems structure and function, system specification, structured problem solving and system design methodology.

IMSE 2110--Probability and Statistics for Engineers (3). Introduction to data analysis, probability concepts, random variables, parameter estimation and hypothesis testing. Prerequisite: MATH 1500.

IMSE 2210--Linear Algebra for Engineers (3). Study of quantitative methods necessary for analysis, modeling and design of optimal industrial systems. Prerequisite: CMPSC 1001, 1040, 1050 and MATH 1700.

IMSE 2410--Introduction to Information Technologies (1). A survey of current technologies and their use. Different technologies will be reviewed. Examples: web search strategies, common application tools, searching and sorting on the WWW, upcoming trends and directions in information technologies. This is a web-based self-study course with instructor's guidance.

IMSE 2710--Engineering Economic Analysis (3). Fundamentals of cost and breakeven analysis. Decision making using capital budgeting techniques and time value of money. This includes cash flow analysis, replacement and make-or-buy taxes, inflation, risk and sensitivity analysis.

IMSE 2810--Performance Measurement and Ergonomics (3). Design of man-machine systems considering capabilities and limitations of the human component. Method of measuring human performance in man-machine systems; includes lab. Prerequisite: IMSE 2110.

IMSE 3001--Topics in Industrial and Manufacturing Systems Engineering (0-4). Current and new technical developments in industrial engineering. Prerequisite: instructor's consent. May be repeated to 6 hours.

IMSE 3030--Manufacturing and Supply Systems (3). Provide a structured approach for the design and optimization of a system throughout its lifecycle: techniques following the logical sequence of strategic analysis, system design, implementation, and monitoring. Prerequisite: IMSE 2030.

IMSE 3280--Industrial Systems Simulation (3). Traditional IE data collection techniques leading to an introduction to discrete-event stochastic systems modeling and experimentation using specialized software. Statistical design and analysis including distribution fitting and alternative comparison methodologies. Prereq-

uisites: grade of C- or better in IMSE 2110. Corequisites: IMSE 2030.

IMSE 3410--Management Information Systems Design (3). MIS concepts and management issues, HTML for web pages and eShop (front-office operations), back-office operations using relational databases, introduction to SQL. Prerequisite: CMP SC 1040 or 1050.

IMSE 3810--Ergonomics and Workstation Design (3). Ergonomics and engineering psychology applied to the design of man-machine systems, includes robotic workstation design and workplace safety; includes lab. Prerequisites: IMSE 2110.

IMSE 4001--Topics in Industrial and Manufacturing Systems Engineering (3). Current and new technical developments in industrial engineering.

IMSE 4085--Problems in Industrial Engineering (1-4). Supervised investigation in industrial engineering presented in form of engineering report.

IMSE 4110--Engineering Statistics (3). Understanding and application of statistical analysis techniques. Emphasis on hypothesis testing, regression analysis, analysis of variance (ANOVA) and design of experiments (DOE). Prerequisites: IMSE 2110.

IMSE 4210--Linear Optimization (3). Theory and application of linear optimization. Prerequisite: grade of C- or better in IMSE 2210.

IMSE 4230--Operations Research Models (3). Formulates probabilistic models and determines optimal control policies for queueing and inventory systems. Introduces Markov chains and dynamic programming. Prerequisites: grade of C- or better in IMSE 2110 and 2210.

IMSE 4310--Integrated Production Systems Design (3). Design and operation of flow shop, job shop, and cell-based production systems, including scheduling, layout and material flow issues. Prerequisites: IMSE 4210, 3280.

IMSE 4350--Production and Operations Analysis (3). Quantitative methods for forecasting, scheduling, and production control in complex manufacturing systems. Use of Enterprise Resource Planning (ERP) systems. Prerequisite: IMSE 4210 and 4230.

IMSE 4410--Web-Based Information Systems (3). Data models, design of databases using E-R, UML (Access/Oracle), web databases, web servers and interfaces (Visual Basic, JavaScript), E-commerce infrastructure (PDM, STEP, XML), data mining for management information and services. Prerequisites: IMSE 3410 and instructor's consent.

IMSE 4550--Computer Aided Design and Manufacturing (4). Product realization process from design, process planning, to manufacturing. Includes CE, DFS/DFM, CAD, CAPP, CNC, and survey of manufacturing methods. Prerequisites: IMSE 4610, 4310.

IMSE 4570--Computer Integrated Manufacturing Control (3). Implementation of computer integrated manufacturing (CIM) at the shop floor level. Covers essential components of machine sensing and actuation, information representation and processing, data communication and networking.

IMSE 4610--Engineering Quality Control (3). Analysis of quality in manufacturing in-

cluding control charts, sampling plans, process capability, experimental design; introduction to system reliability. Prerequisite: IMSE 4110.

IMSE 4750--Entrepreneurial Innovation Management: Enterprise Conception (3). (same as Management 4750). Develop a new business and technology plan including marketing, finance, engineering, manufacturing, and production concepts in this joint College of Engineering and College of Business course. Prerequisite: sophomore standing.

IMSE 4755H--Entrepreneurial Innovation Management: Enterprise Conception-Honors (3). Develop a new business and technology plan including marketing, finance, engineering, manufacturing, and production concepts in this joint College of Engineering and College of Business course. Prerequisite: sophomore standing. Honors eligibility required.

IMSE 4760--Entrepreneurial Innovation Management: Enterprise Design (3). (same as Management 4760). Expand on IMSE 4750 business/technology plan into an operations plan; advertising facilities layout, selling and distribution channels, product designs, accounting procedures, manufacturing processes, and prototypes. Prerequisite: IMSE 4750.

IMSE 4765H--Entrepreneurial Innovation Management: Enterprise Design-Honors (3). Expand on IMSE 4755H business/technology plan into an operations plan; advertising facilities layout, selling and distribution channels, product designs, accounting procedures, manufacturing processes, and prototypes. Prerequisite: IMSE 4755H. Honors eligibility required.

IMSE 4770--Entrepreneurial Innovation Management: Enterprise Operations (3). (same as Management 4770). Perform the day-to-day operations for an enterprise conceived in IMSE 4750 and designed in IMSE 4760 by managing all business processes including finance, manufacturing, sales and delivery. Prerequisite: IMSE 4760.

IMSE 4775H--Entrepreneurial Innovation Management: Enterprise Operations-Honors (3). Perform the day-to-day operations for an enterprise conceived in IMSE 4755H and designed in IMSE 4765H by managing all business processes including finance, manufacturing, sales and delivery. Prerequisite: IMSE 4765H. Honors eligibility required.

IMSE 4970--Capstone Design I (1). Combination of case study and industry based problem analysis, each structured to integrate material presented in several theory or methods courses. Prerequisite: senior standing.

IMSE 4980--Capstone Design II (3). Industry-based design problem structured to integrate material presented in several theory or methods courses. Must immediately follow IMSE 4970. Prerequisite: IMSE 4970, 3810, 4310, 4350.

IMSE 4990--Undergraduate Research in Industrial Engineering (0-6). Independent investigation or project in industrial engineering. May be repeated to 6 hours.

IMSE 4995--Undergraduate Research Industrial Engineering - Honors (0-6). Independent investigation or project in industrial engineering. Prerequisite: honors student in Industrial Engineering. May be repeated to 6 hours.

The MU Department of Mechanical and Aerospace Engineering trains students in two distinct stems of mechanical engineering: thermal systems and mechanical systems. The department instructs students in four major focus areas: design and manufacturing, dynamics and controls, energy systems and materials. Collaborations with other departments include joint capstone design projects. (Note: focus areas are not listed on transcripts or diplomas.)

The department endeavors to present a strong experimental program through laboratory experiences to expose undergraduate students to modern instrumentation and measurement methodologies. Students work in well-equipped laboratories in design optimization, engineering computation, fluid power dynamics and control, materials, structural dynamics, measurement and instrumentation, laser processing, heat transfer and fluid dynamics, stress measurement and nondestructive evaluation.

The MU Mechanical Engineering program offers a Bachelor of Science in Mechanical Engineering (BS ME) and prepares students for practice of the profession in industry or government or for further study toward other degrees such as the JD, MD, MS and PhD.

MISSION STATEMENT

The mission of the Mechanical and Aerospace Engineering Department is to:

- (1) prepare our students for successful careers in the mechanical engineering profession,
- (2) conduct high quality and innovative research, and
- (3) serve the community and industry providing educational and research resources

Program Educational Objectives

The educational objectives of the undergraduate program in Mechanical Engineering are to produce graduates who (during the first several years following graduation)

1. are able to apply the analytical, experimental, and computational techniques to solve engineering problems associated with the design and manufacture of devices, machines and systems (a,b,e,k);
2. are able to synthesize and analyze integrated thermal/fluid and mechanical systems (a,c,e,k);
3. are able to communicate effectively and work collaboratively on multidisciplinary teams (d,g);
4. contribute to society and the profession through professional activities, and understand the impact of engineering solutions on a diverse and global society and their professional and ethical responsibility (f,h,j);
5. engage in life-long learning necessary to advance professionally through continued education and training (a,h,i,j);
6. succeed in graduate studies in mechanical engineering or a related field if pursued (a-k).

Note: letter(s) in parentheses indicates ME Program Outcome(s).

Program Outcomes

Students from the Mechanical Engineering program will attain (by the time of graduation):

- a. an ability to apply knowledge of engineering, science, and mathematics (including multivariate calculus and differential equations);
 - a1. a knowledge of chemistry and calculus-based physics with depth in at least one;
 - a2. an ability to apply advanced mathematics through multivariate calculus and differential equations;
 - a3. familiarity with statistics, linear algebra, and numerical methods;
- b. an ability to design and conduct experiments, as well as to analyze and interpret data;
- c. an ability to design thermal, fluid, and mechanical systems, components, or processes to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
- d. an ability to function on multi-disciplinary teams;
- e. an ability to identify, formulate, and solve mechanical engineering problems;
- f. an understanding of professional and ethical responsibility;
- g. an ability to communicate effectively in oral, written and graphical forms;
- h. the broad education necessary to understand the impact of engineering solutions global, economic, environmental, and societal context;
- i. a recognition of the need for, and an ability to engage in,

- life-long learning;
- j. a knowledge of contemporary issues in mechanical engineering;
- k. an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

Major Program Requirements - Mechanical and Aerospace Engineering (BS ME)

The MAE curriculum allows students to transfer among departments during the first two years. Students concentrate on departmental requirements during the junior year. The senior year includes three MAE electives that allow students to develop individual study programs. This enables students to complete a traditional program or create their own with special emphasis on system design, materials, manufacturing, energy systems, controls, or aerospace.

Experience in design is integrated throughout the required courses in the curriculum and culminates in the capstone design sequence. The capstone design experience integrates earlier technical work with economic, safety and environmental considerations. The projects are primarily obtained from industrial or private business clients. The presentations of project results are made to a review panel consisting of members of the faculty, the MAE Industrial Advisory Council and representatives of the client firms.

Major core requirements

In addition to the University general education and graduation requirements, the Department of Mechanical and Aerospace Engineering requires the following courses:

CHEM 1320: General Chemistry II with Lab	3
ENGINR 1100: Engineering Graphics Fundamentals	2
ENGINR 1110: Solid Modeling for Engineering Design ..	1
IMSE 2710: Engineering Economic Analysis	3
MATH 1500: Analytical Geometry and Calculus I	5
MATH 1700: Calculus II	5
MATH 2300: Calculus III	3
MATH 4100: Differential Equations	3
STAT 4710: Introduction to Mathematical Statistics OR	
IMSE 2110: Probability and Statistics for Engineers ..	3
PHYSCS 2750: University Physics	5
PHYSCS 2760: University Physics	5
ENGINR 1200: Statics and Elementary Strength of	
Materials	3
ENGINR 2100: Circuit Theory for Engineers	3
ENGINR 2200: Intermediate Strength of Materials	3
ENGINR 2300: Engineering Thermodynamics	3
MAE 1000: Introduction to Mechanical Engineering	1
MAE 2100: Programming and Software Tools	2
MAE 3100 Computational Methods for Engineering	
Design	4
MAE 2600: Dynamics	3
MAE 3200: Engineering Materials	4
MAE 3400: Fluid Mechanics	3
MAE 3600: Dynamic Systems and Control	3
MAE 3800: Instrumentation and Measurements	
Laboratory	3
MAE 3900: Mechanical Design I	3
MAE 4300: Heat Transfer	3
MAE 4500: Manufacturing Methods	3
MAE 4800: Thermal and Fluid Sciences Laboratory	3
MAE 4900: Mechanical Design II	3
MAE 4980: Senior Capstone Design	3
Elective in approved area of Engineering, Science or	
MATH, 3000 or above	3

Refer to MAE Undergraduate Handbook for more information or see the web site at <http://web.missouri.edu/~mae/degrees/ungrhdbk/ungrhdbk.html>

Electives

MAE 4000 +: MAE elective	9
Free elective	2

Options

The senior year includes three MAE electives that allow students to develop individual study programs. This enables students to complete a traditional program or create their own program with special emphasis on system design, materials, manufacturing, energy systems or controls.

An Aerospace Emphasis area is available to students wanting to pursue careers in the aerospace industry. Completing the aerospace emphasis requires taking at least three senior MAE 4000+ electives from a selection of available courses. These can be chosen from the broad areas of structures/materials, thermal/propulsion, aerodynamics/fluids, flight mechanics/dynamics/controls, and design. Upon completion of the appropriate coursework, an Aerospace Emphasis is shown on the students transcript.

An entrepreneurship option may be added by taking IMSE 4750 and IMSE 4760 in the sixth and seventh semesters before the Senior Capstone Design Experience (MAE 4980). These three courses combine to give the student a fundamental understanding of entrepreneurial methods. This option will add credits to the degree program.

Double Majors and Dual Degrees

Dual majors and dual degrees are possible at the undergraduate level. These could lead to degrees in the College of Engineering and the College of Arts and Sciences or the College of Agriculture. Dual enrollments could also lead to two engineering majors within the College of Engineering. Any of these dual enrollments would add to the traditional 126-credit undergraduate degree program. Consult with the directors of undergraduate studies of the departments involved for further information.

MAE Honors Program

The MAE Honors Program follows the general rules, regulations and philosophy of the College of Engineering Honors Program, and as such is intended to encourage, facilitate and reward independent study by high-ability undergraduate students.

The heart of the program is an undergraduate honors project, undertaken and completed by the time of graduation while enrolling in 1 to 6 credits of MAE 4995: Undergraduate Honors Mechanical and Aerospace Engineering Research. The academic credit for the honors project (1-6 credits in MAE 4995) replaces an equivalent number of credits of technical or MAE elective. The project is conducted under the direction of an MAE professor (honors advisor) who is selected by the student, with agreement by the professor. The project culminates in an honors thesis, which is read and approved by the honors advisor and then approved by the chair of the MAE honors committee. A finished copy of the honors thesis, signed by the honors advisor and second reader, is required for satisfactory completion of the project.

Academic Qualifications for the Honors Program

Honors students must maintain and graduate with a 3.0 overall GPA.

In the case of a transfer student, transferred credit plus MU credit must average 3.0/4.0. A student is typically eligible for the honors program at the junior year of their undergraduate program.

The successful honors scholar is given a degree of flexibility in the program of study. Additionally, honors scholars may reduce the credits required for degree completion to the University minimum (i.e., 120 credits) by substituting graduate course credits through dual enrollment (undergraduate/graduate at MU) during the last two semesters of the undergraduate program.

*Denotes General Education Requirements

MECHANICAL AND AEROSPACE ENGINEERING COURSES

MAE 1000--Introduction to Mechanical Engineering (1). Introduction to the mechanical engineering profession, the Mechanical and Aerospace Engineering Department and curriculum, and the core disciplines of mechanical engineering. Introduction to engineering problem solving, ethics, and design. Restricted to engineering students only.

MAE 1001--Experimental Course (cr. arr.). Experimental course. For freshmen-level students. Content and credit hours to be listed in Schedule of Courses.

MAE 2001--Experimental Course (cr. arr.). Experimental course. For sophomore-level students. Content and credit hours to be listed in Schedule of Courses.

MAE 2100--Programming and Software Tools (2). Introduction to the use of computers, programming, and software. Topics include MATLAB syntax and programming techniques, algorithm design, and programming with Excel spreadsheets. Prerequisite: MATH 1500 concurrent.

MAE 2300--Thermodynamics (3). (same as Engineering 2300). Fluid properties, work and heat, first law, second law, entropy, applications to vapor and ideal gas processes. Prerequisites: PHYSICS 2750.

MAE 2600--Dynamics (3). Basic fundamentals of particle and rigid body dynamics; energy and momentum methods. Prerequisite: grade of C or better in ENGINR 1200. Restricted to

MAE students only.

MAE 3100--Computational Methods for Engineering Design (4). Introduction to numerical methods for linear system analysis, curve-fitting, integration and differentiation, and optimization. The numerical methods are demonstrated through computer implementation and application to engineering design problems. Prerequisites: MAE 2100; MATH 4100 concurrent. Restricted to MAE students only.

MAE 3200--Engineering Materials (4). The nature of the structure of engineering materials. The relationship of material structure to physical properties. Mechanical behavior of engineering materials. Prerequisites: Grade of C or better in ENGINR 2200 and CHEM 1320. Restricted to MAE students only.

MAE 3400--Fluid Mechanics (3). A basic course in fluid mechanics. Topics include: fluid properties, hydrostatics, conservation laws, infinitesimal and finite control volume analysis, Navier-Stokes equations, dimensional analysis, internal and external flows. Prerequisites: MAE 2600; ENGINR 2300 concurrent. Restricted to MAE students only.

MAE 3600--Dynamic Systems and Control (3). Modeling and analysis of dynamic systems and introduction to feedback control. Topics include dynamic modeling and response of mechanical, electrical, fluid, and thermal systems; and feedback control systems analysis. Prerequisites: MAE 2600; 3100; ENGINR 2100 concurrent. Restricted to MAE students only.

MAE 3800--Instrumentation and Measurements Laboratory (3). Design and reporting

of experimental investigations. Topics include instrument design equations, sources of error, and calibration. Survey of instruments to measure: voltage, resistance, current, time, frequency, displacement, velocity, acceleration, strain, force, and torque. Prerequisites: ENGINR 2100; 2200; MAE 3600 concurrent. Restricted to MAE students only.

MAE 3900--Mechanical Design I (3). Kinematics of machinery, and introduction to finite element analysis. Topics include linkage analysis and design, cam design, and numerical stress analysis. The course involves a major design project. Prerequisites: ENGINR 2200 and MAE 2600. May be repeated for credit. Graded on A/F basis only.

MAE 4001--Topics in Mechanical and Aerospace Engineering (3). Current and new technical developments in mechanical and aerospace engineering. Prerequisite: instructor's consent. Restricted to MAE students only.

MAE 4085--Problems in Mechanical and Aerospace Engineering (cr.arr.). Special design, experimental and analytical problems in mechanical and aerospace engineering.

MAE 4210--Aerospace Structures (3). Fundamentals of the mechanics and design issues of aerospace structures. Analysis of thin skins with stiffeners for external surfaces, bulkheads and frames for shape support, and fasteners for holding components together. Prerequisites: Grade of C or better in ENGINR 2200. Graded on A/F basis only.

MAE 4220--Materials Selection (3). Study of the physical and mechanical metallurgy of alloy

systems of interest in engineering applications. Prerequisite: MAE 3200. Restricted to MAE students only.

MAE 4230--Nanomaterials (3). The primary goal of this course is to introduce students into the new field of nanostructured materials. The emphasis of the course is to introduce the students into synthesis and characterization of nanomaterials, the behavior of such materials with nanoscale structures, and their technological applications. Prerequisites: MAE 3200 or equivalent.

MAE 4240--Diffraction Methods in Materials Science (3). Introduction to crystal structure and the use of x-rays and neutrons to study materials aspects including phase analysis, structure determination, residual stress and texture. Prerequisite: instructor's consent. Restricted to MAE students only.

MAE 4250--Composite Materials (3). A survey of composite materials used in engineering emphasizing fiber-reinforced composites but including laminate and particulate composites. Prerequisite: MAE 3200. Restricted to MAE students only.

MAE 4260--Experimental Stress Analysis (3). The course introduces basic concepts of stress and strain using elasticity theory. Single point and full-field experimental methods for stress and strain measurement, such as strain gages and photoelasticity, are discussed. Application of experimental methods in transducer development and design of structures will be covered. Prerequisite: senior standing.

MAE 4270--Nondestructive Evaluation of Materials (3). The role of nondestructive evaluation (NDE) in engineering is explored. Ultrasonic NDE is studied in detail. Labs are used to support the study of ultrasonic NDE. Other NDE techniques are surveyed. Prerequisite: MAE 3200. Restricted to MAE students only.

MAE 4280--Introduction to Finite Element Methods (3). The application of matrix operations, energy concepts and structural mechanics to the development of the finite element method. Application of finite element method to beams, frames and trusses. Prerequisites: ENGINR 2200 and MAE 3100. Restricted to MAE students only.

MAE 4290--Welding Engineering (3). Welding is the most common method of joining similar as well as dissimilar materials. This course thus introduces the basic science and engineering aspects of commonly used fusion and non-fusion welding processes. Stress analysis and failure of welded joints is also introduced to develop safe and durable welded structures. Prerequisites: senior standing.

MAE 4300--Heat Transfer (3). Fundamentals of conduction, convection and radiation. Use of nondimensional parameters. Theory and design of simple heat exchangers. Prerequisites: MAE 3400, grade of C or better in ENGINR 2300. Restricted to MAE students only.

MAE 4310--Intermediate Heat Transfer (3). Advanced topics in conduction, convection, and radiation. Heat exchanges and their applications will also be analyzed. Prerequisite: MAE 4300. Restricted to MAE students only.

MAE 4320--Design of Thermal Systems (3). Thermal systems are simulated by mathematical models (often on a digital computer), followed

by optimization. Supporting topics include: economics, heat transfer, thermodynamics, and optimization. Prerequisite: MAE 4300.

MAE 4340--Heating and Air Conditioning (3). General principles of thermal science applied to the design of environmental control systems. Topics covered include heating and cooling load calculations, annual operating and life cycle cost estimating, duct and pipe sizing, and equipment selection. Prerequisites: MAE 4300. Restricted to MAE students only.

MAE 4380--Intermediate Thermodynamics (3). Topics from classical and statistical thermodynamics. Prerequisite: ENGINR 2300.

MAE 4390--Aerospace Propulsion (3). Analysis of aircraft engines and spacecraft propulsion systems. Prerequisites: MAE 3400.

MAE 4420--Intermediate Fluid Mechanics (3). Topics in potential and viscous flow theory, and computational fluid dynamics. Prerequisite: MAE 3400.

MAE 4430--Introduction to Computational Fluid Dynamics and Heat Transfer (3). Introduction to the principles and development of the finite difference approximations to the governing differential equations of viscous and inviscid fluid flow, as well as heat transfer. Introduction to discretization methods and the calculation of flow fields, convection, diffusion and conduction. Prerequisites: MAE 3400, 4300 and 4420.

MAE 4440--Aerodynamics (3). Presents fundamentals of wing and airfoil theory for incompressible flow, including fluid kinematics and dynamics, potential flow, flow about a body, thin-airfoil theory, and finite wing. Prerequisites: MAE 3100 and 3400.

MAE 4450--Gas Dynamics (3). One dimensional compressible flow with and without friction and heat transfer. Isentropic flow and shock phenomenon in nozzles and diffusers. Prerequisites: MAE 3400.

MAE 4500--Manufacturing Methods (3). Introduction to manufacturing processes with emphasis on those aspects most relevant to methods, problems in force analysis, and practicum and experimentation in machine tool applications. Prerequisite: ENGINR 1110; grade of C or better in MAE 3200. Restricted to MAE students only.

MAE 4520--Manufacturing Process Analysis (3). Methods and techniques used in process analysis, optimization and control. These include deterministic modeling (slab, upper bound and FEM), physical modeling techniques and statistical process control. Prerequisite: MAE 4500.

MAE 4550--Integrated Production Systems (3). (same as Industrial and Manufacturing Systems Engineering 4550).

MAE 4600--Advanced Mechanics of Materials (3). (same as Civil Engineering 4600). Analysis of more complicated problems in stresses, strains. Prerequisite: ENGINR 2200.

MAE 4620--Aircraft Flight Mechanics (3). Analysis of aircraft flight dynamics and aircraft performance. Topics include airplane aerodynamics and propulsion, steady flight, flight performance, aircraft maneuvers, aircraft stability, and an introduction to flight controls. Prerequisite: MAE 3600. Graded on

A/F basis only.

MAE 4630--Space Flight Mechanics (3). Analysis of spacecraft motion. Topics include orbital dynamics, spacecraft attitude dynamics, satellite trajectory design, and spacecraft control system design. Prerequisite: MAE 3600. Restricted to MAE students only.

MAE 4650--Synthesis of Linkages (3). Type, number and dimensional synthesis of linkages to produce a given input-output motion and/or force. Prerequisites: MAE 3100.

MAE 4660--Vibration Analysis (3). (same as Civil Engineering 4660). Vibration theory and its application to mechanical systems. Topics include free and forced vibration analysis of single- and multi-degree of freedom systems. Prerequisite: MAE 2600 and MATH 4100.

MAE 4670--Vehicle Dynamics (3). Analysis and prediction of the dynamic behavior of ground vehicles utilizing computer simulation. Mechanics of various suspension systems, tire-roadway interaction, vehicle aerodynamics, vehicle handling and steering characteristics. Special topics including nonholonomic constraint formulation and stability of motion. Prerequisite: MAE 3600.

MAE 4680--Introduction to MEMS (3). The course will start with a survey of the widespread applications of MEMS sensors and actuators. Micro fabrication methods used in conventional semiconductor industry will be introduced. MEMS-specific process will be emphasized. Fundamental principles in electric circuits and mechanics will be reviewed. Special attention is on mechanical issues encountered in MEMS design and fabrication.

MAE 4710--Hydraulic Control System (3). Analysis of hydraulic control components and systems. Topics include pumps, valves, actuators, and industrial and mobile control systems. Prerequisites: MAE 3400 and 3600. May be repeated for credit. Graded on A/F basis only.

MAE 4720--Modern Control (3). Analysis and design of control systems using state-space methods. Topics include controllability and observability, feedback control using pole-placement, state observers, optimal linear-quadratic feedback control, and optimal estimation. Prerequisites: MAE 3600. Graded on A/F basis only.

MAE 4730--Mechatronics (3). Design of systems which require the integration of mechanical and electronic components. Topics include microcontrollers, sensors, actuators, mechanical systems, real time control system programming, and modeling of electronic and mechanical systems. Prerequisites: MAE 3600

MAE 4740--Digital Control (3). Design and analysis of control systems using discrete time methods will be the focus of this course. Multivariable as well as single input single output techniques will be considered for digital control system design and analysis. Co-requisite: MAE 4700. Graded on A/F basis only.

MAE 4750--Classical Control (3). Study of feedback control design based on classical continuous-time methods. Topics include performance specifications, stability analysis, root locus compensator design, and frequency domain analysis and compensator design. Prerequisites: MAE 3600.

MAE 4800--Thermal and Fluid Science

Laboratory (3).Continuation of MAE 3800 with emphasis on: instruments to measure temperature, pressure fluid flow, fluid velocity, sound, and computer data acquisition. Prerequisite: MAE 4300. Restricted to MAE students only.

MAE 4820--Experimental Methods in Fluid Flow and Heat Transfer (3).Laboratory experiments involving fundamental mechanisms and phenomena associated with fluid flow and heat transfer. Current experimental methods and techniques employed. Prerequisites: MAE 4800 and 4300.

MAE 4900--Mechanical Design II (3).Application of the fundamentals of stress analysis of structures and materials science to the design, durability, and selection of machine elements, such as fasteners, springs, shafts, and gears. Prerequisites: MAE 3900; grade of C or better in MAE 3200. Restricted to MAE students only.

MAE 4920--Advanced Computational Design (3).Development and application of modern simulation-based design methodologies. Topics include structural optimization, multidisciplinary design methods, reliability-based design, non-deterministic methods, design sensitivity analysis, and finite elements in design. Prerequisite: MAE 3100. May be repeated for credit. Graded on A/F basis only.

MAE 4930--Applied Mechanical Optimization (3).Introduction to mathematical programming techniques and applications to the design of mechanical systems and components. Prerequisite: MAE 3100. Restricted to MAE students only.

MAE 4980--Senior Capstone Design (3).Senior design experience. Topics include reliability, safety, manufacturability, economic, and environmental constraints; design case studies; and industrial design projects. Prerequisites MAE 3600, 4500, 4900; STAT 4710 or IMSE 2110. Restricted to MAE students only.

MAE 4990--Undergraduate Research in Mechanical and Aerospace Engineering (0-6).Independent investigation or project in Mechanical Engineering. Prerequisites: senior standing in Mechanical Engineering and instructor's consent.

MAE 4995--Undergraduate Honors Research Mechanical & Aerospace Engineering (cr.arr).Independent investigation to be presented as an undergraduate honors thesis. Prerequisite: Honors student in Mechanical and Aerospace Engineering.

FACULTY

VISITING PROFESSOR R. D. Wilson, Jr., CAPT, USN

VISITING PROFESSOR Michael G. Waldhauser, CDR, USN

VISITING INSTRUCTORS M. R. Smith, Capt., USMC, T. R. Anderson, LT, USN, M. G. Keating LT, USN

The Naval Reserve Officers Training Corps (NROTC) was established in 1926 to offer college students the necessary naval science courses to qualify for commissions in the Navy or Marine Corps Reserve. Today, NROTC is one of the primary accession sources of officers for the Navy and Marine Corps.

Scholarship NROTC midshipmen incur no military obligation during their freshman year. This allows students to get a better understanding and appreciation of the life of a Navy or Marine Corps officer. Navy NROTC graduates incur a minimum five year military obligation. Marine NROTC graduates incur a minimum four year military obligations.

Navy scholarship students should major in a technical course of study while marine ROTC students may major in any course

of study leading to a baccalaureate degree. Academic credit for naval science courses is accepted toward a baccalaureate degree by most MU schools and colleges. All courses are included in a student's grade point average.

Midshipmen take one naval science course for credit each semester, which provides education and training in various aspects of the Navy or Marine Corps. Associated with each course is a leadership laboratory. NROTC activities include water survival, self-defense, physical fitness, orienteering, aviation, nuclear power indoctrination, pistol/rifle marksmanship and a variety of field trips. Upon graduation, midshipmen are commissioned as Ensigns in the Navy or Second Lieutenants in the Marine Corps.

The two-year NROTC program is designed for transfer students and for MU students who did not participate in NROTC during the first two years. The program is similar to the programs described above. However, the equivalent of the first two years of naval science training is accomplished during a six-week summer session at the Naval Science Institute in Newport, RI. Students receive active-duty pay while at the Naval Science Institute.

Program core requirements

Naval science freshmen and sophomore courses..... 11

NAVY 1100: Introduction to Naval Science	2
NAVY 1200: Seapower and Maritime Affairs	3
NAVY 3120: Marine Navigation	3
NAVY 3140: Leadership and Management	3

Junior year

NAVY 2110: Naval Ship Systems I	3
NAVY 2210: Naval Ship Systems II.....	3

Senior year

NAVY 3220: Naval Operations.....	3
NAVY 4940: Leadership and Ethics	3

Marine Corps

Marine Corps students are not required to take NAVY 2110, 2210, 3120 or 3220.

Freshmen and sophomore courses (Marine Corps)..... 11

NAVY 1100: Introduction to Naval Science	2
NAVY 1200: Seapower and Maritime Affairs	3
NAVY 2130: Evolution of Warfare.....	3
NAVY 3130: Amphibious Warfare.....	3

Minor in Naval Science

A minor in Naval Science is available upon the completion of 20 semester hours to include 11 hours of the lower level and 9 hours of the upper level Naval Science curriculum.

NAVAL SCIENCE COURSES

NAVY 1100--Introduction to Naval Science (2).This course serves as an introduction to the organization of the Naval Service, the varied career opportunities available, the long held customs and traditions of the service, and the duties of a Junior Officer.

NAVY 1200--Seapower and Maritime Affairs (3).Seminars examine the application of seapower as an instrument of foreign policy by the major nations of the world. Emphasis placed on role of the Navy.

NAVY 2110--Naval Ship Systems I (3).Ship

construction, stability and damage control, basic thermodynamics, the steam cycle and engineering plant, including introduction to gas turbine, diesel and nuclear powered systems.

NAVY 2130--Evolution of Warfare (3).Evolution of strategy, tactics, weapons and leadership from earliest beginning through the Vietnam period. Development of military policy, the impact of warfare on the political, social and economic structure of nations.

NAVY 2210--Naval Ship Systems II (3).Naval weapons systems, their employment and control, including the basic fire control problem,

with emphasis on new systems.

NAVY 3120--Marine Navigation (3).Theoretical and practical application of the principles of marine navigation. Includes fundamentals of dead reckoning, piloting, tides and current, celestial navigation, electronic navigation.

NAVY 3130--Amphibious Warfare (3).History and development of amphibious warfare, principles of amphibious warfare techniques; their application in selected examples from modern.

NAVY 3140--Leadership and Management (3).This course will provide a basic understand-

ing of the interrelationship between authority, responsibility and accountability within a task oriented organization. Students will learn to apply leadership and management skills to prioritize competing demands and to attain mission objectives; the importance of planning and follow-up; and develop a basic understanding of communication and counseling as it pertains to personnel management. Prerequisites: sophomore standing or by consent of Professor of Naval Science.

NAVY 3220--Naval Operations (3). Principles and concepts of naval operations: rules of the road, command and control in naval operations, communications, ASW warfare, international maritime law, and practical solution of relative motion problems. Prerequisite: NAVY 3120.

NAVY 4940--Leadership and Ethics (3). (same as PEA_ST 4940). The curriculum provides a foundation in leadership, ethical decision making, the Law of Armed Conflict and the military justice system. Course explores ethical theories and helps students to build an ethical framework for decision making. Topic areas include: Kant, Utilitarianism, Stoicism, Constitutional Paradigm, Uniform Code of Military Justice and Law of Armed Conflict. Designed as a capstone course for juniors and seniors enrolled in NROTC it is open to all MU students. Prerequisite: junior standing.

School of Health Professions

School of Health Professions

DEGREES OFFERED

Bachelor of Health Science (BHS) with the following majors:

Clinical Laboratory Sciences with an emphasis area in *Medical Technology*

Communication Science and Disorders

Diagnostic Medical Ultrasound

Health Science

Preprofessional Physical Therapy*

Radiologic Sciences, with emphasis areas in *Radiography* or *Nuclear Medicine Technology*

Respiratory Therapy

The department also offers a Bachelor of Occupational Science (BOS)**

*Students can only earn the BHS concurrently with the Doctor of Physical Therapy

**Students can only earn the BOS concurrently with the Master of Occupational Therapy.

ADMINISTRATION

Richard E. Oliver, Dean

Kristofer J. Hagglund, Associate Dean

(573) 882-8011

The School of Health Professions is Missouri's only state-supported health professions school on a campus with an academic health center. It is uniquely positioned to educate highly qualified health care professionals committed to fulfilling the mission of improving society through education, service and discovery in diagnostic, medical imaging, and rehabilitation sciences. The school is credited with establishing the nation's first baccalaureate degree program in respiratory therapy and the first master's degree program in diagnostic medical ultrasound. Its five departments and eight accredited academic programs have long and distinguished histories. Graduates of the School of Health Professions are nationally recognized leaders in their fields.

The school offers undergraduate degrees with majors in communication science and disorders, diagnostic medical ultrasound, health sciences, occupational therapy, respiratory therapy, radiologic sciences with emphasis in radiography or nuclear medicine technology, and clinical laboratory sciences with an emphasis in medical technology. The school offers graduate degrees in communication science and disorders, diagnostic medical ultrasound, occupational therapy and physical therapy.

Students gain valuable experience by participating in nationally recognized service centers including The Adult Day Connection, The Health Connection, the Speech and Hearing Clinic,

Robert G. Comb's Language Preschool and more than eight hundred fieldwork sites.

ADMISSIONS

Undergraduate students are enrolled in the School of Health Professions for academic advisement in order to complete University general education and prerequisite requirements. Students will be advised by faculty of the department in which they have declared a major, or by an advisor in the Student Affairs Office. Students should contact the SHP Advising Office to ensure satisfactory progress toward completion of the prerequisites.

Admission to the University and to the School of Health Professions as a pre-professional student does not constitute admission as a candidate for most Bachelor of Health Science degree programs. Pre-professional students are admitted to candidacy for the BHS only when they have been selected to participate in the professional component of a program. Application deadlines and requirements vary for each program. Students are strongly encouraged to seek advising to ensure they are making satisfactory progress towards pre-requisites, MU General Education, and program requirements.

Exploratory Courses

The School of Health Professions offers introductory courses and experiences to provide information about career opportunities in these areas. These courses are listed below:

HTH PR 1000: Introduction to the Health Professions

NUCMED 1000: Orientation to Nuclear Medicine

OC THR 1000: Introduction to Occupational Therapy

PH THR 1000: Introduction to Physical Therapy

RS THR 1000: Introduction to Respiratory Therapy

DMU 1000: Introduction to Diagnostic Medical Ultrasound

CSD 1000: Introduction to Communication Science and Disorders

CL LSS 1000: Orientation to Clinical Laboratory Science

Required Entry-level Courses

To be admitted into or continue in the School of Health Professions, all students with 55 or more credits must have completed MATH 1100 or 1120 and ENGLSH 1000, or their equivalents, with grades in the C range or higher.

While completing prerequisite requirements, students must make formal application for admission to the professional component of the program of their choice. Enrollment is limited and is governed by program admission committees. Application to the professional component is also required for transfer students.

In addition to academic record, attributes such as interpersonal skills, motivation, attitude, interest, commitment and knowledge of the field are considered in selecting students to participate in the professional phase of any program. Applicants may also be evaluated on school and college aptitude tests, pattern of academic achievement, verbal expression, extracurricular activities and motivation demonstrated by employment and volunteer activities.

To achieve the goals of diversity and equal opportunity, the School of Health Professions encourages the participation of minority and disadvantaged students in its programs.

The application deadlines for the professional component of each program are shown below.

Professional program	Application deadline	Classes begin
Communication Science and Disorders	Feb. 1, sophomore	Fall
Occupational Therapy	Jan. 31, sophomore	Summer
Radiography	Feb. 1, sophomore	Summer
Physical Therapy	Jan. 24, senior	Summer
Nuclear Medicine	Feb. 1, junior	Fall
Respiratory Therapy	Feb. 1, sophomore	Summer
Diagnostic Medical Ultrasound	Feb. 1, sophomore	Summer
Clinical Laboratory Science	Nov. 1, junior	Summer
Health Sciences	N/A, freshman	Fall

School of Health Professions Scholars Guaranteed

Admission Program (SHarP Scholars)

High school seniors and first-time college students may apply to the School of Health Professions (SHP) Scholars Guaranteed Admissions Program. Requirements include an ACT minimum composite of 30 or 1320 SAT and rank in the top 10 percent of the high school class. Application materials are available in the School of Health Professions Student Affairs Office.

Students accepted as SHarP Scholars who maintain participant status at MU are guaranteed admission into one of the following degree programs:

- Clinical Laboratory Sciences with an emphasis in Medical Technology
- Communication Science and Disorders (BHS program only)
- Occupational Therapy
- Diagnostic Medical Ultrasound
- Radiologic Sciences, with emphasis in *Radiography* OR *Nuclear Medicine Technology*
- Respiratory Therapy
- Physical Therapy

International Admissions

Students whose native language is not English should contact the School of Health Professions for requirements.

Prerequisite Curriculum Requirements

See the degree requirements in the following pages for specific course requirements in the various programs. The student is responsible for meeting graduation requirements for the program and the University.

Graduation Requirements

In addition to degree and major requirements, students must complete university graduation requirements, which include university general education requirements.

Degree Core Requirements

The Bachelor of Health Science degree is granted to candidates who have successfully fulfilled all didactic and clinical requirements of the program as described for each area, in addition

to all University requirements, including University general education requirements.

In addition to the academic and clinical education requirements of a program, students must possess and exhibit those personal qualities and characteristics that are associated with patient welfare and professional trust. These elements are a part of the overall evaluation process for the professional phase of each program. Should it be determined that these qualities are not present in sufficient degree or that a student does not demonstrate satisfactory growth and progress in these areas, the student is subject to dismissal from the program.

Degree with Honors Requirements

To earn Latin Honors in the School of Health Professions, a student must meet the following requirements:

- 50 graded MU undergraduate credits
- At least a 3.0 MU cumulative GPA
- MU cumulative GPA equal to or greater than 3.5 OR last 50 graded credits at MU equal to or greater than 3.5 GPA for each level
- Cum laude* 3.5
- Magna cum laude* 3.7
- Summa cum laude* 3.9

ACADEMIC REGULATIONS

Time Limits on Credits Earned

Contact each department for information on time limits.

Credits by Examination

Students with previous training or experience may be allowed to earn advanced-standing credit through challenge or equivalency evaluation in certain programs. Contact the Health Professions Student Affairs Office for information pertaining to the awarding of credit for these exams.

Maximum Credits Enrolled

A student may not enroll for more than 17 credits in a term without permission from the associate dean.

Independent Study

Students must receive prior approval before enrolling in independent study courses.

Satisfactory/Unsatisfactory Grades

A student wishing to enroll in a course on an S/U basis must receive permission from the faculty advisor in his or her department and from the SHP Advising Center.

Enrolling in Other Institutions Simultaneously

Students must receive approval from the SHP Advising Center before enrolling simultaneously at another institution.

Student Services

Advising

Students may be assigned a faculty advisor in their program of study or a professional academic advisor in the Office of

Student Affairs.

Students should select an area of interest prior to completing the first two years of college. To assist with career decisions, the School of Health Professions offers introductory courses and experiences to provide information and career opportunities in these areas.

Career Placement

Graduates of programs in the School of Health Professions are highly recruited and frequently hired prior to receiving degrees.

Bachelor of Health Science in Health Sciences

School of Health Professions
504 Lewis Hall
(573) 882-8422
Director: Rosemary Hogan

The Bachelor of Health Science degree program is for students who wish to enter a non-clinical health career such as medical case management, corporate wellness, human services, medical sales, pharmaceutical manufacturing and distribution, and more. Graduates of the BHS degree program may also be qualified to enter either graduate or professional health science programs, such as physical, biological, behavioral and social sciences to provide students with an education in foundational sciences, human function, health research, service and policy.

General education requirements comprise a minimum of 42 credit hours; Health Science core course requirement comprise 20 credit hours; Elective fulfilling the student's concentration area comprise the remaining 40 credit hours. A minimum of 120 credit hours is required for the BHS degree.

Students are required to file a graduation plan for the BHS degree by the time they have completed 60 university-level credit hours, including all MU and transfer credits. Students should meet with their academic advisor to discuss the graduation plan, and then file their plan prior to early registration for the fall, summer and spring semesters. Students who transfer from another institution or another school/college at MU with more than 60 hours must file their graduation plan within their first semester of coursework in SHP and at MU.

Admission to the BHS program

The BHS in Health Sciences program does not require an application. Students may declare their major in the BHS program by indicating the program on the MU application (for new students), filling out a transfer of division form (for current MU students), or indication of their intention to declare a health science major to their academic advisor (for current SHP students). There is a 2.0 cumulative GPA requirement to declare a major in health sciences. The cumulative GPA is calculated on all MU and transfer coursework.

Major Program Requirements

- Students must maintain the 2.0 GPA, term and cumulative, to remain in the health science program. Students who fail to achieve a 2.0 GPA may stay in the program for one probationary semester, and if they fail to earn a 2.0 term or cumulative GPA after the probation semester, students must transfer out of the program.

- All required core and elective coursework for the BHS program, including requirements outside the department, must be completed with a grade of C- or higher.

Capstone Requirement (to be completed during the final 12 months of coursework)

The BHS capstone course, HP4975 allows students several ways to complete the capstone experience through fieldwork. The fieldwork will be approved by the capstone course instructor, and students may find their own fieldwork experience or work with the course instructor/academic advisor to identify an appropriate placement given interests and goals.

Students may choose from:

- an internship at an agency, company, or corporation of their choice. For an internship to be approved as a capstone experience, it must help students solidify and explore areas of concentration. Internships must have prior approval from their advisor;
- service learning project which allows a student to serve approximately 35 clock hours in an organization. This can be arranged with their advisor or through the Office of Service Learning on campus, and
- an approved study abroad program

Required Core Courses

HTH PR1000: Introduction to the Health Professions.....	2
HTH PR2190: Medical Terminology.....	3
HTH PR 3300: Public Health Principles and Practice.....	3
HTH PR 4300: Health Care in the United States.....	3
HTH PR 4975: Fieldwork in Health Sciences (capstone).....	3
CPD4480: Clinical Ethics.....	3
CPD4955: Introduction to Research or OT4950 Research Methods.....	3

General Education Requirements

MATH 1100, 1120, 1160, 1180 or equivalent: College Algebra.....	3
ENGLISH 1000, 1000H or equivalent: Exposition and Argumentation.....	3

Biological, Physical, and Mathematical Sciences requirement (9 or more credits):

Biological Science
1010/1020 or 1500

Physical Science

Mathematical Science
STAT 1200 or 1300

Math Reasoning Proficiency Course

Typically fulfilled by STAT 1200, STAT 1300, CHEM 1320, PHYSICS 1210, PHYSICS 1220, etc.

Behavioral and Social Sciences (9 or more credits):

Behavioral Science

Social Science

HIST 1100, 1200, of POL SC 1100 or other approved course

Behavioral or Social Science

Humanities and Fine Arts (9 or more credits required from 2 different areas)
(12 or more credits of a single foreign language may be used to fulfill this requirement)

Distribution of Content: Students must have at least one 2000 level or above course in two of three areas:

- 1) Biological/Physical/Mathematical Science
- 2) Behavioral/Social Science
- 3) Humanities/Fine Arts

BHS Electives

Students must complete 18 hours of approved elective courses. At least 9 credit hours must be from 3000/4000 level courses.

HEALTH PROFESSIONS COURSES

HTH PR 1000--Introduction to the Health Professions (2). Overview of various health science majors and careers, as well as the aptitudes and abilities needed to each career. Presents information regarding current health concerns, topics affecting the current and future state of health care, historical developments and basic information about the U.S. health care system. Assists with career planning and selection of appropriate major. Graded on A/F basis only.

HTH PR 1001--Topics in Health Professions (1-3). Organized study of selected topics in Health Professions. Particular topics and credit may vary each semester. Prerequisite: instructor's consent.

HTH PR 2001--Topics in Health Professions (cr.arr.). Organized study of selected topics in health professions. Particular topics and earnable credit may vary from semester to semester. Prerequisite: sophomore standing and instructor's consent.

HTH PR 2100--Health Sciences Seminar (1). Designed to analyze career opportunities and establish career expectations for students in the sophomore year. Development of a four-year plan, identification of individual skill sets and resume development. Sophomore standing required. Graded on S/U basis only.

HTH PR 2190--Medical Terminology (3). Medical terminology based on a word building system. This course is intended for students majoring in health professions, nursing and other helping professions, pre-med and biology. Prerequisite: sophomore standing.

HTH PR 2960--Special Readings in Health Professions (1-3). Directed study of literature and research reports in the health-related

professions. Prerequisite: instructor's consent.

HTH PR 3200--Essentials of Pathology (2). Provides basic foundation for understanding etiology of disease with emphasis on systemic pathology for non-medical students. Prerequisites: general biology and one course in either physiology or anatomy.

HTH PR 3300--Public Health Principles and Practice (3). This course focuses on the basic structures of the public health system in the US and provides an introduction to the factors that influence and shape that system including financing, politics and global issues. Graded on an A/F basis only.

HTH PR 4001--Topics in Health Professions (1-3). Organized study of selected topics. Subjects will vary from semester to semester.

HTH PR 4085--Problems in Health Professions (cr.arr.). Prerequisite: instructor's consent.

HTH PR 4250--Human Kinesiology (3). (same as Physical Therapy 4250 and Occupational Therapy 4250). Study of principles of physical laws, biomechanics and anatomic structure relative to human movement. Application through analysis of daily functional performance, exercise and sport. Prerequisite: anatomy.

HTH PR 4300--Health Care in the United States (3). Overview of financing, structure, and outcomes in the U.S. health care system. Contemporary health care issues, policy, and politics will be addressed. Graded on A/F basis only.

HTH PR 4300H--Health Care in the United States - Honors (3). Overview of financing, structure, and outcomes in the U.S. health care system. Contemporary health care issues, policy, and politics will be addressed. Graded on A/F basis only. Honors eligibility required.

HTH PR 4310--Health Policy for the Health Professional (1-3). Seminar to facilitate understanding of health policy, the legislative process, and politics. Emphasis on health professions, including issues of workforce, funding, and advocacy in the context of current health policy issues.

HTH PR 4975--Fieldwork in Health Sciences (3). Focuses on knowledge, skills and attitudes that enhance personal effectiveness and professional success. Opportunities to research selected career paths and related topics in health sciences and participate in directed service learning projects or internships in selected emphasis area. Senior Standing Required. Instructor Consent Required. Graded A/F only.

Anderson

The Department of Cardiopulmonary and Diagnostic Sciences offers the Bachelor of Health Science (BHS) with majors in Clinical Laboratory Science (with an emphasis area of Medical Technology), Diagnostic Medical Ultrasound, Respiratory Therapy, and Radiological Sciences. Students majoring in Radiological Sciences must complete emphasis areas in Radiography or Nuclear Medicine Technology.

Major Program Requirements - Clinical Laboratory Science with an emphasis in Medical Technology (BHS)

Clinical Laboratory Scientists make a valuable contribution to patient care by developing, performing and evaluating clinical

laboratory procedures. Certified Clinical Laboratory Scientists are skilled scientists who work with the kinds of tests that would confirm a case of diabetes, verify a potentially dangerous drug level, monitor the level of anti-rejection drugs in transplant patients, determine compatibility for organ donation, detect cases of cancer or leukemia, identify the causative microorganism in a blood or wound infection, or detect a cancerous tumor with DNA techniques. Clinical Laboratory Scientists have various levels of responsibility - as staff technologists, research technologists, supervisors, managers, or educators can work in a variety of settings, including hospitals, clinics, laboratories, and research centers.

The Clinical Laboratory Science (CLS) program at MU is a unique collaboration with the University of Nebraska Medical Center in Omaha. The CLS program includes three years of prerequisite coursework, requiring 16 hours of both Biology and Chemistry, and 11 months in the professional phase of the CLS program. The professional year begins in May, with 11 weeks of coursework and clinical lab rotations (in the University of Nebraska's Medical Center in Omaha. After the initial 11 weeks in the program, students return to Columbia and complete the CLS coursework online and clinical laboratory rotations at Boyce and Bynum Pathology Laboratories, P.C. and the University of Missouri Hospital and Clinics. Students graduate with a Bachelor of Health Science degree in Clinical Laboratory Science from the University of Missouri with a Certificate in Medical Technology from the University of Nebraska Medical Center.

Professional Certification

Upon completion of the program, students are eligible to take the Medical Technology Licensure examination given by the American Society for Clinical Pathology (ASCP).

Major core requirements

*Depending on course, may count toward another requirement in addition to the Writing Intensive Requirement.

Major Program Requirements - Diagnostic Medical Ultrasound (BHS)

The Diagnostic Medical Sonographer uses high-frequency sound waves to perform a variety of diagnostic examinations. The sonographer performs an essential role in the process of data gathering and synthesis required to reach a diagnosis. Ultrasound is a profession requiring a high degree of independence, skill, judgment and knowledge. Sonographers work in hospitals, clinics, private physician offices and other medical facilities performing examinations in their areas of specialization. The Diagnostic Medical Ultrasound (DMU) Program offers multiple educational options.

Any student interested in applying to the DMU Program should seek advisement as soon as possible to assure that all general education and prerequisite courses including the criteria for application have been completed.

Students must complete the courses listed below in addition to degree and university requirements, which include university general education requirements.

Major core requirements

Prerequisites.....	47
PSYCH 1000: General Psychology	3
CHEM 1100: Atoms and Molecules with Lab.....	3
COMMUN 1200: Intro to Speech Communication	3
BIO SC 1010: General Principles and Concepts of Biology AND	
BIO SC 1020: General Biology Laboratory.....	5
ENGLSH 1000: Exposition	3
HIST 1100: Survey of American History to 1865 OR HIST 1200: Survey of American History since 1865 OR	
POL SC 1100: American Government.....	3
SOCIOL 1000: Introduction to Sociology OR	
RU SOC 1000: Rural Sociology	3
PHYSCS 1210: College Physics I.....	4
PTH AS 2201: Human Anatomy Lecture AND	
PTH AS 2203: Human Anatomy Laboratory.....	5
ESC PS 4170: Introduction to Educational Statistics	3
HTH PR 2190: Medical Terminology.....	3

Professional Certification

Upon successfully completing the requirements of the program, BHS graduates are eligible to apply to the American Registry of Diagnostic Medical Sonographers (ARDMS) for certification in Abdomen, Obstetrics and Gynecology and Vascular Technology.

Major Program Requirements - Radiologic Sciences (BHS)

There are two active emphasis areas in the radiologic sciences: Radiography and Nuclear Medicine. Students planning to complete one of these emphasis areas should contact the program director to determine eligibility for admission.

Emphasis in Radiography

Radiographers are highly skilled health professionals who work closely with physicians specializing in the use of x-rays. They provide patient services using a variety of imaging modalities such as general x-ray, computed tomography, magnetic resonance imaging, mammography, interventional radiography, and bone densitometry. The radiographer must apply the principles of radiation protection, must be competent in the use and maintenance of delicate equipment and must have the ability to deal with patients and medical professionals.

Accreditation of the program is granted by the Joint Review Committee on Education in Radiologic Technology.

Students transferring from other institutions should contact the program director to select appropriate prerequisite courses for admission. Students must complete these courses in addition to major, degree and University requirements, including University general education requirements.

Professional Certification

Upon completion of the program, students are eligible to sit for

the national certifying exam given by the American Registry of Radiologic Technologists.

Emphasis in Nuclear Medicine Technology

The nuclear medicine technologist is concerned with the use of radioactivity for patient diagnosis, monitoring of treatment and in some cases the treatment itself. The nuclear medicine technologist uses radioactive compounds to perform body function studies, produce images of internal organs and analyze biological specimens.

The curriculum incorporates the fundamentals needed for specialization as a nuclear medicine professional. Accreditation of the program is granted by the Joint Review Committee on Educational Programs in Nuclear Medicine Technology.

The following are MU courses. Students transferring from other institutions should contact the program director to select appropriate prerequisite courses for admission. Students must complete these courses in addition to major, degree and University requirements, including University general education requirements.

Students are strongly encouraged to take the following course:

CPD 4440: Organization and Administration	3
---	---

Professional Certification

Upon completion of the program, students are eligible to take the national certifying examinations given by the Nuclear Medicine Technology Certification Board. Students may also pursue credentials offered through the American Registry of Radiologic Technologists.

Major Program Requirements - Respiratory Therapy (BHS)

Respiratory care is a diverse, growing, health profession with extensive patient contact, often with the critically ill. Respiratory therapists administer prescribed respiratory care and life support to patients with deficiencies and abnormalities of the cardiopulmonary system. They work in many settings requiring a considerable degree of independent clinical judgment under the direct or indirect supervision of a physician.

The two-year, professional phase of the program begins the summer semester of the junior year. Students complete lecture and laboratory courses designed to develop knowledge and skills necessary for application to the clinical settings. Required courses in management, research, respiratory physiology and pharmacology, pathology and cardiology are integrated with the respiratory therapy curriculum. The final semester of the program consists entirely of clinical externships and online coursework. Students may select affiliated hospitals outside the Columbia area for this clinical experience or remain on campus at MU Health Care. The MU RT program has a satellite campus at St. John's Mercy Hospital for those students living in the St. Louis area.

Accreditation of the program is granted by the Committee on Accreditation for Respiratory Care (CoARC) in collaboration with the Commission on Accreditation of Allied Health Programs (CAAHEP).

The following are MU courses. Students transferring from other institutions should contact the program director to select appropriate courses for admission. Students must complete the courses listed below in addition to degree and University requirements, which include University general education requirements.

CARDIOPULMONARY AND DIAGNOSTIC SCIENCES COURSES

CPD2190--Medical Terminology (3). Medical terminology based on a word building system. This course is intended for students majoring in health professions, nursing and other helping professions, pre-med and biology. Prerequisite: sophomore standing.

CPD 3460--Cardiovascular and Pulmonary Diagnostic Applications I (3). (same as Radiologic Sciences 3460 and Respiratory Therapy 3460). Interdisciplinary small group, case-based study of common cardiovascular, pulmonary and other diseases. Pathophysiology, diagnosis and treatment from the perspective of allied health professionals. Emphasis on critical thinking, teamwork skills.

CPD 4440--Organization and Administration (3). (same as Radiologic Science 4440 and Respiratory Therapy 4440). Examines design and operation of allied health service departments and educational programs, including facilities, personnel procedures, record systems, ethics, medical-legal aspects, interdepartmental relations and curriculum development.

CPD4460--Cardiovascular and Pulmonary Diagnostic Applications II (3). (same as Radiologic Sciences 4460 and Respiratory Therapy 4460). Interdisciplinary study of cardiac dysrhythmias, MI, stroke. Application of current American Heart Association Advanced Cardiac Life Support (AHA ACLS) algorithms. Successful completion of this course fulfills AHA ACLS Provider requirements.

CPD 4480--Clinical Ethics (3). Analysis of clinical situations per ethical principles and decision-making models. Examination of fundamental doctrines and principles for legal and ethical clinical practice and policy. Prerequisites: instructor's consent.

CPD 4500--Bioterrorism in Healthcare (1). This course will provide the student with an orientation the principles of disaster management in the community (both state and federal levels) and the acute care facility. Topics include biological agents, allocation of resources and ethical considerations.

CPD 4955--Introduction to Research (3). (same as Respiratory Therapy 4955). An interdisciplinary course designed to promote undergraduate allied health research. Includes identifying and designing research problems through formulating relevant questions, learning to systematically search for answers, and methods for searching the literature.

CLINICAL LABORATORY SCIENCE COURSES

CLLS1000--Orientation to Clinical Laboratory Science (1). The class is designed to give prospective CLS students clinical experience in the field of Clinical Laboratory Science. Prerequisite: Intro to Health Professions HP 1000. Graded on S/U basis only.

CL L S 4412--Clinical Laboratory Science Theory, Application and Correlation (5). Application, evaluation and correlation of laboratory procedures used in the diagnosis and treatment of common disease states. Opportunities for building critical thinking, problem solving, and leadership skills are provided in small group clinical case discussions. Prerequisites:

departmental approval, accepted into the Medical Technology Program. Course may be repeated for credit. Graded on A/F basis only.

CLLS 4414--Chemistry I (1-4). Introduction to theory, practical application, technical performance and evaluation of clinical chemistry laboratory procedures. Prerequisites: departmental consent, accepted into the Medical Technology Program. May be repeated for credit. Graded on A/F basis only.

CL L S 4415--Chemistry II (3). Advanced theory, practical application, technical performance and evaluation of clinical chemistry laboratory procedures. Prerequisites: departmental consent, accepted into the Medical Technology Program. May be repeated for credit. Graded on A/F basis only.

CL L S 4416--Clinical Hematology I (1-4). Introduction to the theory, practical application, technical performance and evaluation of hematological and coagulation procedures. Emphasis on correlations of clinical laboratory data with the diagnosis and treatment of anemia, leukemia, and bleeding/clotting disorders. Prerequisites: departmental consent, accepted into the Medical Technology Program. May be repeated for credit. Graded on A/F basis only.

CLLS4417--Clinical Hematology II (3). Advanced theory, practical application, technical performance and evaluation of hematological and coagulation procedures. Emphasis on the correlation of clinical laboratory data with the diagnosis and treatment of anemia, leukemia, and bleeding/clotting disorders. Prerequisites: departmental consent, accepted into the Medical Technology Program. May be repeated for credit. Graded on A/F basis only.

CL L S 4418--Clinical Microbiology I (1-4). Introduction to the theory, practical application, technical performance and evaluation of procedures for isolation, identification and susceptibility testing of infectious disease organisms in humans. Prerequisites: departmental approval, accepted into the Medical Technology Program. May be repeated for credit. Graded on A/F basis only.

CL L S 4419--Clinical Microbiology II (3). Advanced theory, practical application, technical performance and evaluation procedures for isolation, identification and susceptibility testing of infectious disease in humans; bacteriology, mycology, parasitology, virology and serology and correlation of data with diagnosis and treatment. Prerequisites: departmental approval, accepted into the Medical Technology Program. May be repeated for credit. Graded on A/F basis only.

CL L S 4420--Clinical Immunology (1). Theory, practical application, and evaluation of immunological components; principles and methods used to assess immunologically-related disorders, including hypersensitivity reactions, autoimmune, immunoproliferative and immunodeficiency disorders, tumors and transplantations. Prerequisites: departmental approval, accepted into the Medical Technology Program. May be repeated for credit. Graded on A/F basis only.

CL L S 4422--Immunohematology I (1-4). Introduction to the theory, practical application, technical performance and evaluation of blood bank procedures required for transfusion of blood and blood components and for handling

and storage of blood and blood components. Prerequisites: departmental approval, accepted into the Medical Terminology Program. May be repeated for credit. Graded on A/F basis only.

CL L S 4423--Immunohematology II (2). Advanced theory, practical application, technical performance and evaluation of blood bank procedures required for transfusion of blood and blood components and for handling and storage of blood and blood components. Prerequisites: departmental approval, accepted into the Medical Technology Program. May be repeated for credit. Graded on A/F basis only.

CL L S 4424--Phlebotomy (1). Theory, practical application, technical performance and evaluation of procedures used in collecting, handling and processing blood specimens. Prerequisites: departmental approval, accepted into the Medical Technology Program. May be repeated for credit. Graded on S/U basis only.

CLLS4426--Body Fluid Analysis (1). Theory, practical application, technical performance and evaluation of procedures used in the analysis of urine and other body fluids, including cerebrospinal, synovial, serous, seminal, amniotic and feces. Prerequisites: departmental consent, accepted into the Medical Technology Program. May be repeated for credit. Graded on A/F basis only.

CL L S 4970--Clinical Laboratory Management I (2). Theory, practical application and evaluation of laboratory management principles and associated models in communication, educational methodology, healthcare systems and financial resources. Opportunities for building critical thinking, problem-solving, and management/professional leadership skills are provided. Prerequisite: departmental approval, accepted into the Medical Technology Program. May be repeated for credit. Graded on A/F basis only.

CL L S 4980--Clinical Lab Management II (3). Continuation of Clinical Lab Management I. Theory, practical application, and evaluation of laboratory management principles and associated models in compliance and regulatory issues, human resource management, method evaluation, professionalism and laboratory quality. Prerequisite: CLS 4970 or departmental consent; accepted into the Medical Technology Program. Graded on A/F basis only.

DIAGNOSTIC MEDICAL ULTRASOUND

DMU 1000--Introduction to Diagnostic Medical Ultrasound (1). Introduction to the profession of diagnostic medical ultrasound. Imaging characteristics, educational requirements, professional trends. Observation opportunities. Graded on S/U basis only.

DMU 4001--Topics in Diagnostic Medical Ultrasound (cr.arr.). Organized study of selected topics in medical ultrasound. Topics may vary. Graded on A/F basis only. May be repeated for credit. Prerequisites: restricted to DMU undergraduate students; program director's consent.

DMU 4085--Problems in Diagnostic Medical Ultrasound (cr.arr.). Independent study leading to a special project or paper. Graded on A/F basis only. May be repeated for credit. Prerequisites: restricted to DMU undergraduate students only; program director's consent.

DMU 4200--Principles of Diagnostic Medical Ultrasound (3).Principles and history of ultrasound, ultrasound equipment, sonographic techniques, aspects of patient care. Prerequisites: departmental consent.

DMU 4234--Clinical Pathophysiology (3). Abnormal function of organ systems in the presence of disease; clinical manifestations and medical management.

DMU 4309--Normal Ultrasound Clinical (5). Integration of ultrasound instrumentation and clinical practice in a laboratory setting. Interaction between the sonographer, equipment and patient. Prerequisites: DMU 4312, 4313 and 4315; instructor's consent.

DMU 4311--Pathological Images Ultrasound (3).Disease presentation in ultrasound imaging. Practical aspects of ultrasound scanning techniques in pathology. Prerequisites: DMU 4200, 4312 and 4315; instructor's consent.

DMU 4312--Sectional Anatomy (3).(same as Radiological Science 4110). A study of human anatomy using the sectional approach; anatomical structures will be related to modern medical imaging techniques. Prerequisite: instructor's consent.

DMU 4313--Ultrasound Physics (3).Principles of diagnostic ultrasound physics. Sound wave characteristics, tissue interaction, power intensity, and Doppler physics. Prerequisites: MATH 1100, CHEM 1100 or 1320, PHYSICS 1210, and departmental consent.

DMU 4314--Abdominal Ultrasound (5).Differentiation between normal and pathological ultrasound studies of the abdomen. Differential diagnosis of pathological states. Prerequisites: DMU 4312, 4309 and 4311; instructor's consent.

DMU 4315--Ultrasound Instrumentation (3). Integration of ultrasound physics and instrumentation components in a laboratory setting. Practice in modes of operation and safety. Prerequisite: DMU 4200; instructor's consent.

DMU 4318--Gynecology Ultrasound (3). Study of normal and abnormal gynecological ultrasound anatomy. Distinction between normal and pathological states and ultrasound differential diagnosis. Prerequisites: DMU 4312, 4309 and 4311.

DMU 4320--Obstetrics Ultrasound (3).Study of normal and abnormal obstetrical ultrasound anatomy. Distinction between normal and pathological OB ultrasound studies with emphasis on differential diagnosis. Prerequisites: DMU 4312, 4309 and 4311; instructor's consent.

DMU 4322--Superficial Organs Ultrasound (3).Ultrasound evaluation and diagnosis of normal and abnormal superficial organs; thyroid gland, testes, breasts, soft tissues and musculoskeletal. Prerequisites: DMU 4312, 4309 and 4311; instructor's consent.

DMU 4325--Ultrasound Clinical Pharmacology and Contrast Agents (3).Study of the biophysical, biochemical and complete action of ultrasound contrast agents and other drugs used in DMU and their pharmacodynamics.

DMU 4326--Vascular Ultrasound Physics, Instrumentation and Hemodynamics (3). Study of vascular principles and fundamentals including physics and instrumentation. Emphasis on ultrasound wave characteristics, Doppler principles, tissue interaction and

hemodynamics. Prerequisites: DMU 4313 and 4315; instructor's consent.

DMU 4330--Vascular Ultrasound Lab (3). Vascular ultrasound scanning techniques, protocols, measurements, film/video critique, and Plethysmography in a clinical lab setting. Prerequisite: DMU 4312, and 4326; instructor's consent.

DMU 4332--Vascular Ultrasound (4).Vascular ultrasound for normal and pathological processes: study of disease, correlation of patients' clinical data and ultrasound findings used in differential diagnosis. Prerequisites: DMU 4312, 4311, 4322, and 4326 or instructor's consent.

DMU 4338--Cardiac Ultrasound, Principles and Hemodynamics (3).Study of cardiac ultrasound fundamentals including: wave characteristics, principles of 2-D/3-D/4-D imaging, M-mode, and Doppler, cardiac anatomy and physiology, embryology, evaluation methods and hemodynamics. Prerequisites: DMU 4313, 4315, instructor's consent. Graded on A/F basis only.

DMU 4941--Ultrasound Clinical I (7).Application of medical ultrasound in supervised clinical settings. Decisions regarding diagnosis, patient handling and imaging. Prerequisites: DMU 4312, 4309 and 4311 and instructor's consent.

DMU 4943--Ultrasound Clinical III (6). Final clinical application of general medical ultrasound practicum in supervised clinical settings. Further enhancement of practice, decision making, patient handling, image processing and case studies. Prerequisite: DMU 4993 and instructor's consent.

DMU 4944--Vascular Ultrasound Clinical IV (7).Application of diagnostic vascular ultrasound in supervised clinical settings: practice, decision making, patient handling and image processing. Prerequisite: DMU 4326 and instructor's consent.

DMU 4993--Ultrasound Clinical II (8).Application of medical ultrasound in supervised clinical settings with practice and decision making related to ultrasound diagnosis, patient handling and image processing. Prerequisite: DMU 4941; instructor's consent.

NUCLEAR MEDICINE COURSES

NUC MED 1000--Orientation to Nuclear Medicine (1).An overview using a series of short rotations through local nuclear medicine departments and a self-directed review of a current text. Clinical rotations for this course are arranged on an individual basis. Graded on S/U basis only.

NUC MED 3255--Orientation to Clinical Practice (2).This course provides an introductory experience to clinical practice. Prerequisite: Must be accepted into Nuclear Medicine Program; junior standing required. Graded on A/F basis only.

NUC MED 3256--Clinical Nuclear Medicine I (2).Introductory clinical course for senior level

students. Introduces instrumentation, administration, procedures, and laboratory techniques. Includes supervised clinical participation. Prerequisite: NUCMED 3263.

NUC MED 3263--Morphological Correlations in Nuclear Medicine I (3).Anatomy, physiology, and pathology of the human body as assessed using medicine techniques. The first of two courses that address current clinical applications of nuclear medicine. Prerequisite: NU ENG 4303.

NUC MED 3328--Introductory Radiation Biology (3).(same as Biological Sciences 4328, Nuclear Engineering 4328, Veterinary Medicine & Surgery 7328). Concepts of ionizing radiations, their actions on matter through effects on simple chemical systems, biological molecules, cell, organisms, man. Prerequisite: junior standing Sciences/Engineering; one course in Biological Sciences & Physics/Chemistry; or instructor's consent."

NUC MED 4085--Problems in Nuclear Medicine (1-3).Supervised investigation in an aspect of nuclear medicine technology, usually culminating in a written report.

NUC MED 4232--Clinical In Vitro (6).Practical experience in the clinical setting with radioassay procedures performed in nuclear medicine. Includes lectures describing clinical applications.

NUC MED 4268--Clinical Nuclear Medicine II (2).Continuation of clinical series taught in conjunction with Nuclear Medicine 3256 and 4232. Addresses advanced therapeutic and diagnostic procedures, computer applications, and quality assurance procedures. Prerequisite: NUCMED 3256.

NUC MED 4269--Clinical Nuclear Medicine III (2).Final course in clinical series. Seminar discussion of the areas of professional ethics, current medical-legal considerations, and future nuclear medicine applications. Prerequisite: NUCMED 3256.

NUC MED 4299--Morphological Correlations in Nuclear Medicine II (3).Anatomy, physiology, and pathology of the human body as assessed using nuclear medicine techniques. The second of two courses that address current clinical applications of nuclear medicine. Prerequisite: NUCMED 3263.

NUC MED 4327--Nuclear Medicine Instrumentation (3).Radionuclide imaging systems and the use of computers. Topics include Anger camera systems, emission tomography, ultrasound, nuclear magnetic resonance, and bone absorptionmetry. Prerequisites: PHYSICS 1220 and MATH 1400.

NUC MED 4329--Radiopharmaceuticals in Nuclear Medicine (3).Introduces concepts of radiopharmacy, generator systems, labeling of materials, quality control procedures and FDA regulations concerning radiopharmaceuticals. Prerequisites: CHEM 1320 and instructor's consent.

NUC MED 4330--PET in Nuclear Medicine (3).Overview of special isotope production techniques for positron emitting agents; instrumentation concerns beyond standard Anger imaging; and image critique and analysis with morphologic correlation. Graded on A/F basis only. Prerequisite: PHYSICS 1210 and NUCMED 4327 or instructor's consent. May

be repeated for credit.

NUCMED 4940--Clinical In Vivo I (6). Practical experience in the clinical setting with imaging procedures performed in nuclear medicine.

NUCMED 4941--Clinical In Vivo II (7). Practical experience in clinical setting with advanced imaging techniques and instrument quality control. Prerequisite: NUC MED 4940. Restricted to undergraduate students.

RADIOLOGICAL SCIENCES COURSES

RASCI 1000--Introduction to Radiography (1). Overview of radiography through small group discussions and onsite visitations in radiology departments. Graded on S/U basis only.

RA SCI 3110--Radiographic Positioning I (2). Instruction in radiographic positioning of the chest, upper extremity, shoulder girdle, and lower extremity.

RA SCI 3120--Fundamentals of Radiography (3). Orientation to radiology department, ethics, basic nursing procedures, medical legal considerations and radiation safety procedures.

RA SCI 3130--Basic Radiographic Skills (2). An introduction to radiographic processing techniques, intensifying screens, sensitometry and silver reclamation procedures.

RA SCI 3140--Principles of Radiographic Exposure I (3). Theory and principles of X-ray technique; correlation of factors with application.

RASCI 3150--Radiologic Pharmacology (3). Introductory study of drugs commonly used in medical imaging with emphasis on pharmacokinetics and pharmacodynamics. Designed for allied health students and personnel in the medical imaging sciences.

RA SCI 3160--Radiologic Physics (3). Fundamentals of physics of electricity and radiant energy; principles of generation of electromagnetic radiations and applicable equipment.

RA SCI 3170--Imaging Modalities (2). A presentation of various recording media emphasizes fluoroscopy, image intensification, computed tomography, digital, xeroradiography, thermography, ultrasound, magnetic resonance imaging; automatic exposure devices; and a brief introduction to nuclear medicine and radiation therapy.

RA SCI 3180--Radiographic Positioning II (2). Instruction in radiographic positioning of the pelvic girdle, vertebral column, bony thorax, cranium, gastrointestinal system, and urinary system.

RA SCI 3190--Radiographic Positioning III (3). Advanced positioning techniques; emphasizes trauma radiography, vascular studies, mammography, and other procedures.

RA SCI 3460--Cardiovascular and Pulmonary Diagnostic Applications I (3). (same as Respiratory Therapy 3460). Problem-based study of cardiopulmonary anatomy and physiology using current imaging methods. Emphasis given to assessment of the acutely distressed cardiac or pulmonary subject, emergency pulmonary support and vascular access techniques.

RA SCI 3941--Clinical Education I (3). Supervised clinical rotations in basic areas of radiography. Must complete: mandatory exams from one category competency; two elective exams; and must be competency-tested in chest and abdomen.

RA SCI 3942--Clinical Education II (3). Supervised clinical rotations in basic areas of radiography and in special procedures. Must complete: mandatory exams from one category competency; one neurological exam; three elective exams; two exams from miscellaneous category; and three periodical exams.

RASCI 4085--Problems in Medical Imaging (1-3). Supervise investigation in an aspect of medical imaging science usually culminating in a written report. Prerequisite: instructor's consent.

RA SCI 4110--Sectional Anatomy (3). (same as Diagnostic Medical Ultrasound 4312/7312). A study of human anatomy using the sectional approach; anatomical structures will be related to modern medical imaging techniques. Prerequisite: instructor's consent.

RA SCI 4140--Magnetic Resonance Imaging: Physics and Procedures (5). Magnetic Resonance imaging fundamentals, applications, instrumentation, physical principles. Basic imaging concepts including positioning, scanning protocols, contrast imaging, anatomy review, and pathological considerations.

RA SCI 4150--Computed Tomography: Physics and Procedures (5). Computed tomography imaging fundamentals, applications, instrumentation, physical principles. Applied concepts regarding patient care and CT imaging procedures.

RA SCI 4303--Radiation Safety (3). (same as Nuclear Science and Engineering 4303/7303) Types and origins of radiation; radiation detection and measurement; radiation interactions; shielding; dose calculations; federal, state and local regulations; and procedures for safe uses of radiation. Laboratory experiments in radiation measurements and protection.

RA SCI 4440--Organization and Administration (3). (same as Respiratory Therapy 4440). Examines design and operation of allied health service departments and educational programs, including facilities, personnel procedures, record systems, ethics, medical-legal aspects, interdepartmental relations and curriculum development.

RASCI 4943--Clinical Education III (3). Progression from basic to more advanced rotations. Must complete: mandatory exams from one category competency; one neurological exam; three elective exams; three exams from miscellaneous category; and three periodical exams.

RA SCI 4944--Clinical Education IV (3). Advanced clinical rotations. Experience with Equipment Quality Control. Must complete: mandatory exams from one category; one neurological exam; three elective exams; three exams from miscellaneous category; and three periodical exams.

RA SCI 4945--Clinical Education V (3). Advanced clinical rotation at one of three clinical centers to include an evening and a

night rotation; must complete final competency.

RA SCI 4946--Advanced Medical Imaging Externship (1-3). Supervised clinical experience in a medical imaging speciality with emphasis on patient care and technical practice. Prerequisite: instructor's consent.

RA SCI 4947--Radiography Overview (3). A comprehensive overview of all aspects of diagnostic radiology with emphasis on procedures, technique, radiation protection, positioning, radiographic anatomy and patient care.

RA SCI 4980--Imaging Pathology (3). Etiology and processes of disease. Emphasis on pathology of body systems and the manifestation of pathology through imaging.

RESPIRATORY THERAPY COURSES

RS THR 1000--Introduction to Respiratory Therapy (1). Introductory course to assist students acquiring information about the respiratory therapy profession. Students observe therapists in hospitals and participate in lectures on credentialing, program requirements, placement and future trends in the profession. Graded on S/U basis only.

RS THR 3000--Fundamentals of Respiratory Care (1). Orientation to the profession. Focus on professional attributes of communication, teamwork, licensure and safety. Prerequisite: acceptance into respiratory therapy major.

RS THR 3220--Equipment and Techniques (5). History, organization of respiratory therapy. Theory, application of gas laws. Equipment for invasive and non-invasive pulmonary assessment, therapeutic aerosol and humidity, gas delivery, airway management. Techniques for infection control, lung expansion, bronchial hygiene. Graded on A/F basis only.

RS THR 3290--Cardiopulmonary Pharmacology (2). To provide the student with specific knowledge of the pharmacologic strategies in treating cardiopulmonary disorders. Prerequisites: restricted to students in the respiratory therapy program. Graded on A/F basis only.

RS THR 3420--Principles of Mechanical Ventilation (3). Continuation of Respiratory Therapy 3220. Emphasis on the principles of mechanical ventilation, including physiologic and clinical application. Prerequisite: RS_THR 3220, 3941 and 4040.

RS THR 3440--Mechanical Ventilation Lab (3). Application of mechanical ventilation emphasizing acute care: pressure, volume, and oscillatory ventilation of adults. Pediatrics, and infants. Related graphical, laboratory, and hemodynamic analysis; therapeutic intervention. Prerequisites: RSTHR 3220, 3941, 4040. Graded on A/F basis only.

RS THR 3941--Clinical Practice I (2). To be taken concurrently with RS THR 3220 for which it serves as an extension of the laboratory time and an opportunity for structured clinical experience exposures.

RS THR 3942--Clinical Practice II (4). To be taken concurrently with Respiratory Therapy 3420, for which it serves as an extension of the laboratory time, and an opportunity for structured clinical experience exposures.

RS THR 3943--Clinical Practice III (2). Continuation of supervised clinical experience from RS THR 3942. Graded on A/F basis only.

RSTHR4020--Perinatal/Neonatal Respiratory Care (3).Evaluation and management of perinatal/neonatal pulmonary, medical and surgical conditions which require respiratory care. Emphasis on resuscitation, pathophysiology, evaluation, blood gas and x-ray interpretation, treatment and mechanical ventilation. Prerequisites: RS_THR 4040. Respiratory Therapy students only.

RS THR 4040--Respiratory Pathophysiology (5).Clinical pulmonary disease, organized around the gross structural components of the lung, airways, alveoli and pulmonary vasculature. Impact of disease on normal structure function; clinical, roentgenographic, and physiologic manifestations are described.

RS THR 4085--Problems in Respiratory Therapy (cr.arr).Independent work on special problems related to cardiopulmonary health. Course not offered for graduate credit. Graded on A/F basis only. Prerequisite: instructor's consent.

RSTHR4220--Community and Patient Education I (1).Design and implement materials for educational presentations for a given patient population. Prerequisites: RS THR 3943 or instructor's consent. Graded on A/F basis only.

RS THR 4240--Pulmonary Rehabilitation (3).Focus is on an interdisciplinary approach to pulmonary rehabilitation and home care of the adult cardiopulmonary patient. Prerequisite: senior Respiratory Therapy standing or instructor's consent. Graded on A/F basis only.

RS THR 4420--Pediatric Respiratory Care (3).Evaluation and management of pulmonary, medical and surgical pediatric conditions requiring respiratory care. Emphasis on pediatric resuscitation, pathophysiology, treatment and prevention of respiratory conditions, mechanical ventilation, lab interpretation. Prerequisite: RS_THR 3420, 4020, 4040 or instructor's permission.

RS THR 4440--Organization and Administration (3).(same as Radiological Science 4440). Examines design and operation of allied health service departments and educational programs, including facilities, personnel procedures, record systems, ethics, medical-legal aspects, interdepartmental relations and curriculum development.

RSTHR4460--Clinical Respiratory Therapy I (3).Rounds, case studies and extended clinical practice. Specific applications of respiratory therapy in emergency medicine, surgery, obstetrics, pediatrics, etc.

RS THR 4620--Pulmonary Function Technologies (1).This course will provide the student with a specific knowledge of the testing procedures and equipment for pulmonary function technology. The student will learn to interpret pulmonary function tests and perform quality assurance within the pulmonary function laboratory. Prerequisite: restricted to Respiratory Therapy students only.

RS THR 4640--Teaching Practicum (3).Structured and supervised experience identifying student characteristics, methods for teaching, improving assessment, current development and instructional design.

RSTHR4660--Clinical Respiratory Therapy II (3).Continuation of Respiratory Therapy 4460. Clinical rounds, case presentations and

advanced study.

RS THR 4920--Community and Patient Education II (1-3).Presentations to a variety of community groups. Emphasis on wellness and disease prevention. Prerequisites: RS THR 4220 or instructor's consent. Graded on A/F basis only.

RS THR 4940--Clinical Practice IV (6).Structured and supervised clinical experience and case conferences regarding bioterrorism response and emergency/disaster planning. Prerequisites: RSTHR 3420, 3942, 3440, 3943, 4020. Graded on S/U basis only.

RSTHR4956--Research in Respiratory Therapy (2-6).Selected research projects guided by a senior staff member. Prerequisite: CPD 4955.

RS THR 4973--Clinical Practice V (5).An extension of the supervised practicum begun in Respiratory Therapy 4940. Emphasis in adult critical care and special procedures including bronchoscopies, cardiac catheterization and chest tube placement.

RS THR 4983--Clinical Practice VI (4).An extension of the supervised practicum begun in Respiratory Therapy 4940. Emphasis in perinatal and pediatric critical care including pediatric pulmonary function testing and airway management.

RS THR 4993--Clinical Practice VII (5).An extension of the supervised practicum begun in Respiratory Therapy 4940. Emphasis in rehabilitation and home care, inservice education, and management. Students will participate in on-going research projects and community service activities.

RESEARCH ASSOCIATE PROFESSOR L. S. Day
CLINICAL INSTRUCTOR L.B. Lawrence

Communication Science and Disorders includes the study of normal language, speech and hearing across the life span, as well as communication disorders that result from biological, environmental and behavioral factors. Communication Science and Disorders includes the professions of speech-language pathology and audiology.

Speech-language pathologists evaluate the speech and language of children and adults to determine whether problems exist in such areas as voice, articulation, fluency and receptive or expressive language. They also plan and carry out programs for the treatment of these problems. Audiologists evaluate hearing, identify hearing loss and participate in the rehabilitation of persons with hearing impairments.

The professions of speech-language pathology and audiology require master's or doctoral degrees. Acceptance to an undergraduate program does not guarantee acceptance to a graduate program. Refer to the *Graduate Catalog* for information about the MHS and PhD degrees.

Major Program Requirements – Communication Science and Disorders (BHS)

Students are required to apply to the Communication Science and Disorders major. Applications into the BHS program are considered once a year, and they must be submitted by February 1 of the student's sophomore year. Applicants must have completed at least 42 hours of college credit before applying, and students who are admitted must have completed 60 hours of college credit before beginning coursework as

Communication Science and Disorders majors. A minimum GPA of 2.75 on a four-point scale and a composite score of 22 or above on the ACT are required for acceptance into the BHS program. Meeting the minimum criteria and declaring a major of pre-Communication Science and Disorders do not guarantee acceptance into the program.

In addition to university, college and degree requirements, including university general education, students must complete the following:

Major core requirements.....	38-40
ENGLISH 1000: Exposition and Argumentation	3
COMMUN 1200: Public Speaking	3
PSYCH 1000: General Psychology.....	3
PSYCH 2410: Developmental Psychology.....	3
MATH 1120: College Algebra OR	
MATH 1160: Precalculus Mathematics	3
STAT 1200: Introductory Statistical Reasoning OR	
STAT 1300: Elementary Statistics OR	
ESC PS 4170: Introduction to Educational Statistics	3
ENGLISH/LINGST 4600: Structure of American English.....	3
SOCIAL SCIENCES REQUIREMENT	
HIST 1100: Survey of American History to 1865 OR	
HIST 1200: Survey of American History Since 1865 OR	
POL SC 1100: American Government	3
BIOLOGICAL SCIENCE REQUIREMENT	
(BIO SC 1010: General Principles and Concepts of	
Biology and BIO SC 1020: General Biology Laboratory	
OR BIO SC 1500: Introduction to Biological Systems	
with Laboratory).....	5
PHYSICAL SCIENCES REQUIREMENT	
(PHYSICS 1150: Concepts of Physics I OR	
PHYSICS 1210: College Physics I OR	
CHEM 1100: Atoms and Molecules with Lab OR	
CHEM 1310: General Chemistry I	3-5
One Biology, Chemistry or Physics lab required.	
HUMANITIES ELECTIVES.....	6
Communication science and disorders courses	40
CSD 1060: Human Language	3

COMMUNICATION SCIENCE AND DISORDER COURSES

C S D 1000--Introduction to Communication Science and Disorders (1).Nature of communication and its development; types of speech, language and hearing disorders; professional preparation, settings, and work of speech-language pathologists and audiologists. Course graded on S/U basis only.

C S D 1060--Human Language (3).(same as Anthropology 1060, Linguistics 1060 and English 1060). General introduction to various aspects of linguistic study. Elementary analysis of language data with some attention to application of linguistic study to other disciplines.

C S D 1110--Manual Communication I (3). Introduction to the English-based sign system, Signed English, a system that has been developed to bridge the gap between English and American Sign Language. Offered on a S/U basis only.

C S D 2120--Survey of Communication Disorders (3).Systematic survey of the disorders of speech, language and hearing.

C S D 3010--American Phonetics (3).(Same as Linguistics 3010). Analysis of production and acoustics of the sounds of speech with an emphasis on American English; practice in broad and narrow transcription using the International Phonetic Alphabet.

CSD3020--Normal Language Development (3).(same as Psychology 3810). Language development in children and changes in language processing during normal aging. Cognition and language; language learning processes; language sample analysis; relationship between spoken and written language. Prerequisites: LINGST 4600 or Child Psych.

C S D 3210--Anatomy and Physiology of the Speech Mechanism (3).(same as Linguistics 3210). Introduction to anatomical and functional aspects of the speech mechanism.

C S D 3230--Hearing Science (3).Introduction to the nature of sound and its measurement; anatomy and physiology of the auditory and vestibular systems; psychoacoustic methods and phenomena.

C S D 4001--Topics in Communication Science and Disorders (2).Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated with program consent. Prerequisites: junior standing and instructor's consent.

C S D 4020--Language Disorders in Children (3).Overview of language disorders from early childhood through adolescence. Includes language disorders as primary disability and as secondary to other disabilities. Introduction to assessment and intervention. Prerequisites: CSD 2120, 3020, LINGST 4600. CSD majors only.

C S D 4030--Language Disorders of Adults (2).Introduction to acquired adult language disorders. Review of neuroanatomy/physiology, etiology and symptomatology, with introduction to assessment and treatment procedures. Prerequisites: CSD 2120, CSD 3020, CSD 4430, and LINGST 4600 or consent of instructor.

C S D 4200--Professional Voice (2).Voice production, common voice problems and their causes; healthy vocal habits and techniques to achieve optimal voice. CSD students may not take for graduate credit.

C S D 4210--Fluency Disorders (2).Introduction to the nature, assessment, and treatment of

fluency disorders. Emphasis on developmental stuttering. Prerequisite: CSD 2120, 3210.

C S D 4220--Voice Disorders (1).Introduction to voice disorders in children and adults. Includes overview of perceptual and instrumental assessment procedures and selected treatment approaches. Prerequisites: CSD 2120, 3010, 3210, 4430.

C S D 4320--Disorders of Phonology and Articulation (3).Overview of disorders of use and production of speech sounds with an emphasis on developmental disorders. Introduction to assessment and treatment. Prerequisites: CSD 2120, 3010, 3020, 3210. CSD majors only.

C S D 4330--Introduction to Audiology (3). Principles and techniques of audiological testing; etiologies of hearing impairment; current technologic in rehabilitation. Prerequisites: CSD 3230 or instructor's consent.

C S D 4340--Aural Rehabilitation (3). Identification, evaluation, and management of problems associated with hearing impairment in both children and adults. Includes issues related to speech/language development, communication, education, and social factors. Prerequisites: CSD 3230 and 4330.

C S D 4420--Reading and Language Disabilities in School-Age Children (3).Theories, research, and practice in reading development and disorders. Focus on reading disabilities related to language disorders of various etiologies including developmental language disorders and head injury. Assessment, remediation, teaching methods.

C S D 4430--Neurophysiology for Speech, Language, and Hearing (3).Principles of basic neurophysiology, emphasizing correlation of

structure and function of the nervous system.

C S D 4810--Psycholinguistics (3).(same as Linguistics 4810). Examination of the knowledge and processes that underlie the human ability to produce and understand language. Prerequisite: instructor's consent.

C S D 4820--Speech Perception (3).(same as Linguistics 4820). Selected topics in the perceptual processing of speech sounds and spoken language. Prerequisite: consent of instructor.

C S D 4830-Individual Differences in Language Processing (2).Examination of the normal variations exhibited across individuals in the acquisition, use, and representation of language. Also considered are individual differences seen in second language learning,

the aging process, and language disorders. Prerequisite: instructor's consent.

C S D 4900--Clinical Observation in Communication Disorders (1).Directed clinical observations designed to prepare the student for clinical practicum. Repeated for a total of 2 credit hours. Graded on a S/U basis only. Prerequisite: senior standing and departmental consent. CSD majors only.

C S D 4945--Clinical Apprenticeship in Communication Disorders (1-3).Supervised observation and clinical experience in speech-language pathology for undergraduates. CSD majors only. Prerequisite: senior standing and departmental consent.

C S D 4950--Research Apprenticeship (cr. arr.).Research apprenticeship with a faculty member, assisting in the development and execution of research in communication processes and disorders. May be repeated to 6 hrs. maximum. Prerequisite: instructor's consent.

C S D 4960--Directed Reading in Communication Science and Disorders (3).Independent reading; reports. Prerequisite: instructor's consent.

FACULTY

ASSISTANT PROFESSOR D. Smith, E. Shatz

CLINICAL PROFESSOR G.L. McCormack

CLINICAL ASSISTANT PROFESSOR G. Krug, L. Lowery

CLINICAL INSTRUCTOR D. E. Weston

ADJUNCT INSTRUCTORS K. Hickey, J. Sample,

L. Brandt, B. Earnest, S. Dunnaway, K. Herbert, M. Boatman

Occupational therapists are skilled health professionals who provide services to infants, children, adults and elderly persons experiencing physical, emotional or mental limitations in performing everyday activities. The department's philosophy supports a holistic model that emphasizes empowerment and the mind, body, spirit model. The curriculum focuses on the value of occupation in relationship to health and wellness. The department's mission is to produce competent practitioners who can meet the challenges and changes occurring in institutions, community-based programs and educational settings in both urban and rural areas of Missouri.

Occupational therapists are employed in public and private schools, hospitals, rehabilitation centers, mental health facilities, nursing homes, home health agencies, community health programs and industry. As independent health practitioners, they are also involved in business, working with disability claims, in work-hardening programs and wellness/health promotion, or as proprietors of their own therapy services. Occupational therapists also work as educators, administrators, consultants and researchers.

The department offers the Bachelor of Occupational Science (BOS) followed by the entry level master degree (MOT). To become a registered therapist the master degree is required.

Department accreditation is granted by the Accreditation Council for Occupational Therapy Education of the American Occupational Therapy Association, 4720 Montgomery Lane, Bethesda, MD 20814-3425, (301) 652-2682.

Major Program Requirements – Occupational Therapy

The professional degree program requires three years of course work after completion of all prerequisites and university general education requirements. Six months of field experiences in affiliated clinical and community-based sites, must be completed within 24 months after required didactic courses.

Students with a bachelor's degree must complete the prerequisite courses and meet the university and OT admission requirements.

The following are MU courses. Students transferring from other institutions should seek advisement from the OT advisor and select appropriate prerequisite courses for admission. Medical terminology proficiency and at least 30 hours of volunteer or observation is required. In addition to university, college and degree requirements, students must complete the following:

Major core requirements

Prerequisites to the major

COMMUN 1200: Public Speaking	3
BIO SC 1010 and 1020: General Principles and Concepts of Biology OR BIO SC 1500: Introduction to Biological Systems with lab OR	
BIO SC 1020: General Biology Lab.....	5
PSYCH 2510: Survey of Abnormal Psychology	3
PHYSICS 1210: College Physics I.....	4
H D FS 2400: Principles of Human Development.....	3
MPP 3202: Elements of Physiology	5
SOCIOL 1000: Introduction to Sociology OR	
ANTHRO 1000: General Anthropology	3
PSYCH 1000: General Psychology.....	3
E&CPSY 4170: Introduction to Educational Statistics OR	
STAT 1300: Elementary Statistics.....	3
OC THR 1000: Introduction to Occupational Therapy OR	
HTH PR 1000: Introduction to the Health Professions.....	1
HTH PR 2190: Medical Terminology	3

Departmental course requirements

PTH AS 4222: Gross Human Anatomy (The Health Professions).....	7
OC THR 4060: Professional Issues.....	2
OC THR 4240: Applied Neurophysiology for Allied Health Students.....	3
OC THR 4220: Clinical Kinesiology	3
OC THR 4020: Therapeutic Media	1
OC THR 4380: Adult Assessment	3
OC THR 4510: Professional Perspectives.....	4
OC THR 4310: Foundation of Occupation	3
OC THR 4590: Disability in Context (WI).....	2
HTH PR 3200: Essentials of Pathology	2
OC THR 4100: Complementary Therapies.....	3
OC THR 4270: Clinical Pathophysiology	3
OC THR 4410: Developmental Framework	3
OC THR 4770: Community Assessment.....	2
OC THR 4970: Research Methods (WI).....	3
OC THR 4944: Fieldwork: Children.....	1
OT THR 4942: Fieldwork: Older Adults	3
HTH PR 4300: Health Care in the United States	3
OC THR 4450: Pediatric Practice	3
OC THR 4350: Rehabilitation Practice.....	4
OC THR 4550: Psychopathology.....	2

Professional Certification

Upon successful completion of all courses, including field work

experiences, students are eligible to sit for the examination of the National Board for Certification in Occupational Therapy, 800 South Fredrick, Suite 200, Gaithersburg, MD 20977-4150, (301) 990-7979. Successful completion of the exam is required by state regulatory agencies before entering into the profession.

to apply. The occupational therapy graduate courses include a minimum of 34 credits beyond the bachelor's degree in OT. The masters degree is required to become certified and licensed to practice as an Occupational Therapist.

Requirements for Masters degree in Occupational Therapy

The Department of Occupational Therapy and Occupational Science offers the Master of Occupational Therapy degree as the terminal degree of the program. All students must complete the prerequisite courses and meet the admission requirements

OCCUPATIONAL THERAPY COURSES

OC THR 1000--Introduction to Occupational Therapy (1).Introductory course to provide students information about the occupational therapy profession. Registered therapists lecture on clinical aspects. Students participate in discussions on program requirements, placement, and trends in the profession.

OC THR 2001--Topics in Occupational Therapy (cr.arr).Organized study of selective topics in occupational therapy. Particular topics and credit hours may vary from semester to semester. Prerequisites: freshman or sophomore standing; instructor's consent. Repeatable upon consent of department.

OC THR 2085--Problems in Occupational Therapy (cr.arr).Independent investigation leading to the completion of a project or paper. Prerequisite: freshman or sophomore standing; instructor's consent.

OC THR 4001--Topics in Occupational Therapy (cr.arr).Organized study of selective topics in occupational therapy. Particular topics and credit hours may vary from semester to semester. Prerequisite: junior standing; instructor's consent. Repeatable upon consent of department.

OC THR 4020--Therapeutic Media (1).Laboratory course for developing competency in the use of therapeutic media for diversion, emotional expression and skill building. Emphasis on task analysis, adaptation and health promotion. Graded on a S/U basis only.

OC THR 4060--Professional Issues (2).Occupational therapy roles from philosophical and ethical perspectives. Examines structure of the profession, professional associations, the curriculum, and professional literature. Study of collaboration, creativity and human occupation through experiential activities. Prerequisite: junior standing; acceptance into the major. Graded on A/F basis only.

OC THR 4085--Problems in Occupational Therapy (cr.arr).Independent investigation leading to the completion of a project or paper. Prerequisite: junior standing; instructor's consent. Repeatable upon consent of department.

OC THR 4100--Complementary Therapies (3).Introduction to systems of complementary/alternative medicine (CAMs) as it pertains to occupational therapy practice. The course will provide a critical analysis of complementary therapies, techniques, and culture health beliefs. Prerequisite: human anatomy, physiology; Pre/corequisite: clinical pathophysiology. Graded on A/F basis only.

OC THR 4220--Clinical Kinesiology (3).Functional anatomy and biomechanics in normal and abnormal conditions of extremities, back, neck and thorax. Dynamics of human motion and motor skills. Muscle testing and goniometry lab.

OC THR 4240--Applied Neurophysiology for Allied Health Students (3).(same as Communicative Science and Disorders 4430 and Physical Therapy 4240). Principles of basic neurophysiology, emphasizing correlation of structure and function of the nervous system.

OC THR 4270--Clinical Pathophysiology (3).(same as PH_THR 4270) Interdisciplinary and case-based examination of the pathophysiology,

prevention and general health management of disease/injury across the lifespan encountered in occupational and physical therapy practice.

OC THR 4310--Foundations of Occupation (3).The course examines the foundations of occupation within the health-wellness continuum. Task analysis, adaptation, frames of reference and history are learned through interactive process. Seminar topics form the basis for understanding occupation-based practice.

OC THR 4330--Human Motion and Activity (3).Analysis of movement within the framework of human occupation. Assessment of musculoskeletal function. Participation in activity adaptation and analysis of performance components. Introductory motor control concepts.

OC THR 4350--Rehabilitation Practice (4).Analysis of major disability areas from an occupational perspective. Administration and interpretation of assessments and application of treatment theories and approaches for deficits in movement, sensation, cognition and perception.

OC THR 4380--Adult Assessment (3).The evaluation process, including principals of instrument selection, administration, scoring, and interpretation for adults with physical disabilities are addressed in this course. Areas of assessment include: ADL; IADL; sensorimotor function, cognition, and perception.

OC THR 4410--Developmental Framework (3).Lecture and Laboratory course designed to provide the occupational therapy student with an understanding of the process of normal development and prepare the student to administer common developmental assessments for infants and young children.

OC THR 4450--Pediatric Practice (3).Lecture/clinical course designed to provide an understanding of frames of reference utilized in pediatric occupational therapy including motor control theory, acquisitional, sensory integration, biomechanical, and neurodevelopmental. Students will evaluate children with special needs, learn documentation, and treatment planning skills.

OC THR 4510--Professional Perspectives (4).Understanding and directing personal and professional communication through activities. Includes instruction of stress management and communication through experiential activities. Includes formation of a professional and therapeutic relationship, and leadership development. Concepts of dyad and group dynamics will be presented.

OC THR 4530--Loss and Disability (3).Reactions to illness, disability, and death. Identifies the roles of caregivers and patients. Addresses body image, self concept, and adjustment problems met in life when terminal illness or disability is present.

OC THR 4550--Psychopathology (2).Focus on the major theories in etiology of psychosocial dysfunction as applicable to occupational therapy; review of classification and characteristics of pathological syndromes.

OC THR 4590--Disability in Context (2).Community experiences for observational, interviewing, assessment, and relational skills with persons experiencing cross disabilities throughout the lifespan. Overview of professional and therapeutic relationships. Lecture,

seminar weekly.

OC THR 4770--Community Assessment (2).Focus on role of occupational therapy in health prevention and promotion. Concepts of program evaluations and development provided through community needs assessment and health promotion project. Emphasis on understanding the environment for health care services. Prerequisite: junior standing; acceptance into the major. Graded on A/F basis only.

OC THR 4920--Clinical Documentation (2).Development of assessment skills as these pertain to effective documentation of occupational therapy services. Emphasizes exposure to various clinical settings, and third party payers. May be repeated for credit.

OC THR 4942--Fieldwork: Older Adults (2).Examines the aging process in context of the environment. Develops clinical observation skills through field placement with older adults in support living environments. Opportunities to gather/organize data, plan/implement activities, and develop therapeutic relationships. Prerequisite: completion 1st semester of major in professional curriculum; junior standing. Graded on A/F basis only.

OC THR 4943--Fieldwork: Clinical (1).Clinical experience in occupational therapy settings. emphasis on classroom to clinical transition. Exposure to the occupational therapy process; assessment, planning, implementation. Emphasis on professional communication and observational skills. Prerequisite: completion of 1st semester in major in professional curriculum; junior standing. Graded on A/F basis only.

OC THR 4944--Fieldwork: Children (1).Development of clinical observation skills via on-site observation of active healthy children. Opportunities to gather/organize data, plan/implement activities, and develop therapeutic relationships with children and their care providers. Prerequisite: completion of first semester of major professional curriculum; junior standing. Graded on A/F basis only.

OC THR 4960--Readings in Occupational Therapy (cr.arr).Directed readings of the literature and research in occupational therapy. Prerequisite: junior standing; instructor's consent. Repeatable upon consent of department.

OC THR 4970--Research Methods (3).Research methodology and efficacy studies emphasizing development of knowledge and skills in critiquing research and professional literature pertinent to occupational therapy. Application of evidence-based research results to practice settings.

Department of Physical Therapy

M. Minor, Chair
Department of Physical Therapy
School of Health Professions

FACULTY

PROFESSOR M. Brown, M. A. Minor
ASSOCIATE PROFESSOR C. C. Abbott, K. L. Wingert,
M.S. Hargrove
ASSISTANT PROFESSOR E. A. Dannecker, K.M. Nevins,
S. P. Sayers, L. Wright, K. Gibson
INSTRUCTOR C. A. Blow, J. Krug, S. E. Lindaman, J. J.
McElroy, E. Prost, K. L. Della Rocca,
T. Briedwell, J. Bridges

Physical Therapy involves the evaluation and treatment of physical disability and pain that may result from injury, disease or developmental disability. Prevention of disability and public education are also roles of the physical therapist. Physical therapists use tests and measurements to assess body system dysfunction and determine diagnosis and treatment. Daily living skills, including work, are also addressed.

The University of Missouri offers a Doctor of Physical Therapy degree. No master's degree or terminal undergraduate degree in Physical Therapy are available.

ADMISSIONS

Doctor of Physical Therapy Program, Regular Admissions

Most students admitted to the Doctor of Physical Therapy program will have a baccalaureate degree. Students who are interested in pursuing application to the Doctor of Physical Therapy program are encouraged to work on an undergraduate degree that will allow them to fulfill application requirements.

Doctor of Physical Therapy Program, Early Admissions

Admission to the Doctor of Physical Therapy program may be available to a small group of students who have completed at least 90 credit hours, completed at least six fulltime semesters of residential course work, all MU general education requirements and have shown excellent academic progress. Students who gain early admission to the Doctor of Physical Therapy program will be awarded the Bachelor of Health Science in pre-professional physical therapy upon completing one year of coursework in the physical therapy program.

Information regarding the admissions procedures and curriculum for the Doctor of Physical Therapy program can be found in the University of Missouri Graduate School catalog.

PHYSICAL THERAPY COURSES

PH THR 1000--Introduction to Physical Therapy (1). Acquaints students with the physical therapy profession including the required educational preparation, practice settings, sample interventions, current issues, trends and research. Graded on S/U basis only.

PH THR 2420--Biology of Healthy Living (2). (Same as BIOMED 2420). Biology of inactivity as a casual factor in chronic disease.

PH THR 3022--Principles of Physical Therapy (1). History of physical therapy: the profession; basic skills: first aid, infection control, vital signs; medical terminology. Graded on S/U basis only.

PH THR 3085--Problems in Physical Therapy (1-3). Independent study, based upon educational goals, leading to completion of a project or paper. Specific objectives and time line developed with the supervision of a faculty member. Prerequisite: instructor's consent.

PH THR 4085--Problems in Physical Therapy (1-3). Independent study, based upon educational goals, leading to completion of a project or paper. Specific objectives and time line developed with the supervision of a faculty member. Prerequisite: instructor's consent.

PHTHR4120--Introduction to Clinical Education I (1). Focus on professional attributes of communication, teamwork, problem solving, and therapeutic behaviors in a case-based format. Graded on S/U basis only.

PH THR 4150--Introduction to Clinical Education II (1). Continuation of Introduction to Clinical Education I with increased time in clinical settings. Graded on S/U basis only.

PH THR 4240--Applied Neurophysiology for Allied Health Students (3). (same as Occupational Therapy 4240). Principles of basic neurophysiology, emphasizing correlation of structure and function of the nervous system.

PH THR 4250--Human Kinesiology (3). (same as Health Professions 4250). Study of principles of physical laws, biomechanics and anatomic structure relative to human movement. Applications through analysis of daily functional performance, exercise, and sport. Prerequisite: Human Anatomy.

PHTHR4270--Clinical Pathophysiology (3). (same as OC_THR 4270) Interdisciplinary and case-based examination of the pathophysiology, prevention and general health management of disease/injury across the lifespan encountered in occupational and physical therapy practice.

PH THR 4330--Physical Agents (3). Biophysics, theory and technique concerning the use of physical agents as adjuncts to exercise programs. Includes thermal, electrical, light, hydrotherapy and mechanical agents.

PHTHR 4420--Foundations of Therapeutic Exercise (3). Physiological basis of exercise throughout the lifespan with emphasis on the musculoskeletal, neuromuscular, cardiovascular/pulmonary and integumentary systems and the effects of injury and disease on these systems.

PH THR 4480--Medical Testing in Rehabilitation (3). Diagnostic tests used by disciplines within and outside of physical therapy. Studies include laboratory, nuclear medicine, radiologic, and motion analysis. Emphasis

placed on interpretation of results as they apply to physical therapy examination and intervention. Restricted to students accepted into professional major.

PHTHR4510--Evidence-Based Practice (3). Clinical research design and methods overview. Critical review of current and historically important professional literature. Effective writing related to clinically applicable research using computer and library resources. Identification of research questions. Prerequisite: departmental consent.

PH THR 4520--Applied Therapeutic Exercise (3). Application of therapeutic exercise with an emphasis on evidenced-based exercise prescription, modes and techniques of exercise typically seen in rehabilitation.

PH THR 4560--Movement Theory and Application (2). Human sensorimotor development; motor learning; motor control theories; developmental and practical application to exercise; proprioceptive neuromuscular facilitation.

PH THR 4570--Bridging the Clinical-Research Gap (3). This class focuses on theories of clinical decision making and Evidence-based Practice, their applications to the clinical setting and dissemination of such information to colleagues in professional forums. Graded on A/F basis only.

PH THR 4620--Introduction to Orthopedic Physical Therapy with Laboratory (3). Physical therapy diagnosis, management, and prevention of disorders of the musculoskeletal system; basics of orthopedic manual therapy. Includes laboratory.

PH THR 4680--Orthopedic Physical Therapy (3). Physical therapy diagnosis, management, and prevention of disorders of the musculoskeletal system; continuation of orthopedic manual therapy emphasizing the axial skeleton; traction; massage; taping; sport-specific injury rehabilitation; orthotics. Prerequisites: PH THR 4620.

PH THR 4730--Pediatric Physical Therapy (4). Physical therapy evaluation and treatment of children with movement dysfunction. Emphasis on therapeutic exercise.

PHTHR 4770--Rehabilitation of the Neurologically Impaired Adult (4). Physical Therapy evaluation and treatment of adults who have incurred neurological deficits; emphasis on the restorative care of individuals following spinal cord injury, stroke, and traumatic head injury.

PHTHR4790--Pharmacology in Rehabilitation (2). Principles of pharmacology including pharmacokinetics, pharmacodynamics, and toxicology of common drugs encountered in rehabilitation. Emphasis on pharmacology related to the musculoskeletal, neuromuscular, cardiovascular/pulmonary and integumentary systems across the lifespan. Restricted to students accepted into a professional major.

PH THR 4940--Clinical Education I (4). Full time, supervised clinical experience addressing application of basic skills in patient evaluation and treatment, documentation and professional behaviors. Graded on S/U basis only.

PH THR 4945--Clinical Education II (5). Continuation of supervised clinical education. (Capstone course)

PHTHR 4960--Special Readings in Physical Therapy (1-3). Independent readings selected in consultation with supervising faculty member. Identified educational goals and activities; discussion, annotated bibliography or report. Prerequisite: instructor's consent.

PHTHR 4965--Directed Readings in Physical Therapy (cr.arr.). Selected readings on specific topics. Prerequisite: instructor's consent.

PH THR 4980--Clinical Evaluation and Procedures with Laboratory (3). Principles and procedures of basic evaluation methods and documentation: muscle strength, range of motion, muscle balance, posture, neurologic tests. Includes laboratory.

PH THR 4981--Clinical Kinesiology with Laboratory (3). Advanced Kinesiology addressing functional mobility; specifics of normal human gait; pathokinetics of gait. Assistive devices; wheelchairs; orthoses and prostheses. Includes laboratory.

umchesdevelopment@missouri.edu

The mission of the College of Human Environmental Sciences is to improve the quality of life for individuals and families where they live and work. The human sciences seek scientific solutions to everyday problems such as food and wellness, clothing, shelter, money and financial planning, human growth, family resiliency and social justice. The College of Human Environmental Sciences prepares students to be leaders in some of the largest industries in the world.

The college is unique among its peers in its comprehensive use of professional advisory boards, whose members are leaders in business, government, education and the social services. These experts provide guidance and support from their specialized fields to students and faculty and contribute powerful perspectives to curriculum development.

ADMISSIONS

Undergraduate students may enter the College of Human Environmental Sciences as freshmen. Some programs have requirements beyond those of the University. An entering freshman has the first year to explore the departments and the college as well as the combinations of subject areas for positions in fields such as education, health and welfare, business, industry and government.

All freshmen entering the College of Human Environmental Sciences enroll in GN HES 1100: Introduction to Human Environmental Sciences or SOC WK 1110: Introduction to the Social Work Major. These courses emphasize career decision-making, provides an orientation to the campus and the college, and bring into focus the role of a professional in the improvement of the quality of life in the near environment.

TRANSFER STUDENT APPLICATION

Human Environmental Sciences

Students in another MU school or college or from another UM System campus must have a cumulative GPA and term GPA of 2.0 or better to be eligible for admission to the College of Human Environmental Sciences. For students who transfer to the UM System from another institution and then apply for transfer into the college, transcripts are re-evaluated by the college to determine what courses will apply to the degree.

A student ineligible to enroll in another school or college may not enroll in the College of Human Environmental Sciences during the period of ineligibility. An appeal for admission may be made after the period of ineligibility is over.

School of Social Work

Undergraduate students who have been admitted to the University after attending another college may request a social work major. Those who have completed more than 55 credits need a GPA of 2.5 or higher on all college work attempted.

Graduation Requirements – Human Environmental Sciences (BS HES)

The completion of all requirements for graduation is the responsibility of the student. To receive the Bachelor of Science in Human Environmental Sciences, the student must complete the requirements for a professional area of competence in one of the departments, in addition to University requirements.

Students earning a BS HES degree must complete the following courses. Courses of similar content transferred from accredited schools may be substituted for courses listed.

Degree core requirements

GN HES 1100: Introduction to Human Environmental Sciences.....1
Freshmen students must take; strongly recommended if a student enters as a sophomore.

Human Environmental Sciences Foundation courses6

A minimum of two courses outside the student's major selected from two different departments and chosen from the list below.

Architectural Studies

ARCHST 1600: Fundamentals of Environmental Design
ARCHST 4620: Environment and Behavior

Human Development and Family Studies

H D FS 1600: Foundation of Family Studies
H D FS 1610: Intimate Relationships and Marriage
H D FS 2400: Principles of Human Development

Nutritional Sciences

NUTR S 1034: Nutrition, Current Concepts and Controversies
NUTR S 1340: Introduction to Exercise and Fitness
NUTR S 2380: Diet Therapy for Health Professionals

Personal Financial Planning

FINPLN 2183: Personal and Family Finance
FINPLN 2185: The Consumer as Entrepreneur

Social Work

SOC WK 1115: Social Work and Social Welfare
SOC WK 2000: Exploration in Social and Economic Justice
SOC WK 4710: Social Justice and Social Policy

Textile and Apparel Management

T A M 1100: Introduction to the Textile and Apparel Industry
T A M 1300: Softgoods Retailing
T A M 1400: Softgoods Consumer Behavior
T A M 2200: Textiles
T A M 2400: Global Consumers
T A M 2500: Social Appearance in Time and Space
T A M 3100: Fundamentals of E-Commerce
T A M 3510: History of Western Dress

Electives

Electives vary with the student's professional objectives and are chosen by the student in consultation with the adviser.

Human Environmental Sciences Extension Specialist

A student who plans to be an extension specialist may choose a subject-matter area of interest. In addition, a master's degree in a subject-matter area generally is required in Missouri.

The student must fulfill the requirements for the chosen major while pursuing the extension objective. Additional electives can be chosen from such areas as adult education, communications and the social sciences.

Maximum Credits Enrolled

A student with a cumulative GPA below 3.0 must obtain permission from the adviser and the student services director to enroll in more than 17 credits.

Dual Degree - BS HES and BSW

A dual degree is offered in Human Development and Family Studies and Social Work. Students must be admitted to both programs and complete 133 credits. Contact the directors of both programs for more information.

STUDENT SERVICES

Advising

One of the outstanding features of the College of Human Environmental Sciences is its advisement program. It is designed to assist the student in planning a college program, with each student assigned a faculty advisor during the first registration period. In addition, the Student Services Office provides consultation on student problems and concerns.

Students earning credit from another institution will have a transfer equivalencies form completed by the advisor for course work in their professional program. Transfer work is evaluated by the Office of Admissions. The HES Office of Student Services determines how transferred courses fit into a particular degree program.

It is the student's responsibility to initiate a graduation check to be certain that all requirements are met. An appointment for the graduation check should be made in the HES Student Services Office the semester preceding graduation.

Career Services

Career services cover a spectrum of career options. These include business, education and agriculture career services offices on the campus. The Student Services Office and individual advisors provide information regarding procedures. Career exploration information may be obtained in the Career Center.

ASSISTANT PROFESSOR EMERITUS P. Hildebrand

The Department of Architectural Studies offers a Bachelor of Science in Human Environmental Sciences. The Department's mission is to educate future design practitioners, advance research of the built environment, and disseminate knowledge of architectural studies to improve quality of life for people.

The philosophy of the Department of Architectural Studies embraces the synergy created between architecture and interior design. Having a symbiotic relationship, both fields explore the design process and its final products. Promoting the meaning and value of physical settings and responding to the human condition, the program investigates the interaction between people and their surroundings to create a more beautiful and sustainable world. The program encourages an interdisciplinary, scholarly climate celebrating aesthetic values and the human sciences.

Students may wish to consider a minor in art or art history to complement their undergraduate degree. The department offers a minor in architectural studies.

Portfolio Review and Admission to Studio Sequence in Architectural Studies

Students must apply for admission to the studio sequence required for all of the undergraduate majors. Applications must

be made at the end of the spring semester of the freshman level for enrollment in ARCHST 2811: Studio I.

Application forms with deadlines are available from the department and department website. Admittance decisions are based on:

1. Review of design work submitted in a portfolio, which should include:
 - Satisfactory completion of ARCHST 1200-Architectural Drafting and Working Drawings
 - Satisfactory completion of a minimum of one of the following courses (or equivalents):
 - 2-dimensional design coursework from ARCHST 1100-Visual Design, or ART GNRL 1030 Basic 2-D Design
 - ART DRAW 1050-Drawing I
2. Overall grade point average (including transfer courses), grades received in courses completed, and ACT scores (or equivalent for transfer students)
3. Enrollment capacity (approximately 40 students)

Laptop Computer Requirements

A laptop computer is required for the studio sequence at the beginning of the sophomore year. Information about the laptop required can be found on the department website.

Major Program Requirements – Human Environmental Sciences (BS HES) in Architectural Studies

Emphasis Areas

Emphasis in Interior Design

The Interior Design emphasis is a four-year, first-professional baccalaureate interior design program accredited by the Council for Interior Design Accreditation (formerly FIDER). The Architectural Studies emphasis includes the accredited interior design program plus additional course work to prepare students to enter a master's program in architecture.

Emphasis in Architectural Studies

The Architectural Studies emphasis prepares students at the undergraduate level for application to professional architectural programs as well as for other roles in society in related fields—in research, government, development, management, planning, etc. While many of these occupations do not require a professional license, they do require an understanding of, and exposure to, a professional education.

Students may choose to continue their program of study for a master's degree in architecture (MARCH) at another university. Program reciprocity agreements were developed with the University of Kansas (KU) and University of Nebraska. All students interested in these programs are encouraged to maintain regular communication with the cooperating institution, because application and transfer procedures are subject to change.

Sample Eight-Semester Program

Bachelor of Science in Human Environmental Science with a major in Architectural Studies (Architectural Studies emphasis)

Emphasis Areas

Emphasis in Interior Design

The professional interior designer enhances the function and quality of interior spaces. Design studio experiences are the core of the undergraduate design curriculum. Studio exercises focus on a cyclical refinement of the design process and the integration of increasingly complex problem parameters. Studios encourage interaction between instructor and students in the design studio sequence.

Minor in Architectural Studies

A minor in the Department of Architectural Studies is comprised of a minimum of 15 credits.

Minor core requirements 3
ARCHST 1600: Fundamentals of Environmental Design
Electives (choose from) 12
ARCHST 1100: Visual Design
ARCHST 1200: Architectural Drafting and Working Drawings
ARCHST 2220: Computer Aided Drafting with AutoCAD
ARCHST 2310: Building Systems

ARCHST 2315: Building Systems Lab
 ARCHST 3100: Color and Light
 ARCHST 4230: Computer Graphic Application for Design I
 ARCHST 4320: Materials, Methods and Products
 ARCHST 4323: Sustainable Technologies and Systems
 ARCHST 4410: History of the Designed Environment to 1750
 ARCHST 4420: History of the Designed Environment after 1750
 ARCHST 4555: Recent Trends
 ARCHST 4620: Environment and Behavior

For exceptional students, with consent of instructor and department approval, additional course work in the department may be selected.

ARCHITECTURAL STUDIES

ARCHST 1005--Topics in Architectural Studies - Humanities (cr.arr.). Organized study of selected topics in architectural studies. Particular topic and earnable credit may vary by semester. Prerequisite: instructor's consent. May be repeated for credit up to 6 credit hours.

ARCHST 1100--Visual Design (3). Design study on introduction to basic design and visual composition and their application to creation of two- and three-dimensional abstract and/or functional design. Studio exercises expressed through drawings and abstract models, using various media.

ARCHST 1200--Architectural Drafting and Working Drawings (3). Beginning drafting including equipment and materials; lettering; floor plans, sections, elevations; orthographic and axonometric drawings; working drawings; and details.

ARCHST 1600--Fundamentals of Environmental Design (3). Survey of the architectural environment emphasizing design fundamentals such as use, aesthetics, stability of structures and human relationships with places and time.

ARCHST 2005--Topics in Architectural Studies - Humanities (cr.arr.). Organized study of selected topics in architectural studies. Particular topic and earnable credit may vary by semester. Prerequisite: instructor's consent. May be repeated for credit up to 6 credit hours.

ARCHST 2085--Problems in Architectural Studies (3). Supervised independent work. Prerequisite: instructor's consent.

ARCHST 2100--Understanding Architecture (3). Overview of the architectural environment emphasizing historical, cultural-behavioral, perceptual and conceptual studies.

ARCHST 2220--Computer-Aided Drafting with AutoCad (3). Introduction to computer-aided drafting and design with AutoCad software. Emphasis will be placed on development of skills and problem solving related to the professions of environmental and interior design. Prerequisite: ARCHST 1200.

ARCHST 2230--Design Communication I (3). Beginning studio course in techniques and conventions of graphic communication as an aid in the design process for interior designers. Prerequisites: ARCHST 1200 or equivalent and admission to Studio Sequence in Architectural Studies.

ARCHST 2310--Building Systems (3). Integrated building systems: structure, construc-

tion, technology, comfort; including voice-data communication, safety, floor, wall, ceiling, mechanical, electrical, and plumbing systems; and project estimating. Prerequisites: ARCHST 1200, MATH 1100/1120.

ARCHST 2315--Building Systems Laboratory (1-6). Building system renovations, materials, processes, finishes, and applications testing: furniture design, fabrication, finishing, lighting, concrete and masonry, wood and steel light framing construction, and mock-up fabrication and testing. May be repeated for credit.

ARCHST 2811--Studio I (4). Application of basic design and composition to built form. Studio exercises in two and three dimensions using various media relating to usable spaces. Formation of design concept, development of form and space, and application in built environment. Prerequisite: ARCHST 1200 and admission to Studio Sequence in Architectural Studies.

ARCHST 3100--Color and Light (3). The theory, application, and specification of color and light for interior and architectural design. Lecture and studio format. Prerequisite: ARCHST 1100

ARCHST 3182--Studio II (4). Application of basic design principles to built forms and functional spaces. Identification and manipulation of elements of design, understanding spatial relationships between human body and spatial enclosures related to built forms. Spatial organization and familiarity with role of immediate context. Prerequisites: ARCHST 2600, 2811, instructor's consent. Co-requisites: ARCHST 2230, 2310.

ARCHST 3230--Design Communication II (3). Advanced studio course in techniques and conventions of graphic communication as aids in the design process. Prerequisite: ARCHST 2230.

ARCHST 3371--Design Resource Management (1). Field experience (5 hours per week) in organization and management of resources used by interior designers, including references, product information, and samples of materials and finishes. Prerequisite: ARCHST students.

ARCHST 3600--Environmental Analysis (3). Discover through analytical methods of primary organizational factors which operate in a building and reveal the preoccupations of designer. Analytical approach investigates design principles by means of dissection. Prerequisite: ARCHST 1200, 1600.

ARCHST 3860--Human Factors Programming (2). Design Programming for Human Factors using a Case Study. Prerequisite: ARCHST 1600.

ARCHST 4001 Topics in Architectural Studies (cr.arr.). Selected current topics in field of interest.

ARCHST 4085--Problems in Architectural Studies (cr.arr.). Supervised independent work. Prerequisites: 3000-level course in field of problem and junior or senior standing and instructor's consent.

ARCHST 4230--Computer Graphic Application for Design I (3). Applications of computer graphics for design and art; includes visualization, animation and creative development. Prerequisite: junior standing. May repeat up to 12 credit hours maximum.

ARCHST 4320--Materials, Methods and Products (3). Inherent qualities of materials used in the design of interior environments. Manufacturing, application, and installation methods. Focus on environmentally sensitive materials. Prerequisite/Corequisite: ARCHST 2310 or instructor's consent.

ARCHST 4323--Sustainable Technologies and Systems (3). An in-depth study of ecologically-sensitive and energy-efficient strategies used in building and interiors. Prerequisite: junior standing required.

ARCHST 4333--Compliance and Specifications (3). Application of laws, codes, regulations, standards in specifying for life safety, barrier-free and universal design, lighting, human factors, and contract documents. Prerequisites: ARCHST 2220, 4320, 4813 or 4823.

ARCHST 4355--Recent Trends in Digital Media I (cr.arr.). Recent Trends in Digital Media I

ARCHST 4410--History of the Designed Environment to 1750 (3). An in-depth study of the designed environment including housing interiors, and furniture of the major historical periods from prehistory to the Industrial Revolution. Prerequisites: AR HA 1110 or 1120.

ARCHST 4420--History of the Designed Environment after 1750 (3). An in-depth study of the designed environment, including housing, interiors, and furniture of the major historical periods from the Industrial Revolution to today. Prerequisites: AR HA 1110 or 1120.

ARCHST 4550--Electronic and Manual Portfolio (3). Studio course emphasizing techniques and conventions of preparation

for portfolio material. Focus on concepts of design, layout, reprographic techniques, and final production.

ARCHST 4555--Recent Trends (cr.arr.).Upper-division students seeking additional knowledge in specific subject matter areas including digital media software.

ARCHST 4620--Environment and Behavior (3).Evaluate relationships between human behavior and environmental design. Survey of environment and behavior theoretical foundations examining how these concepts translate into a more responsive theory of design. Prerequisites: junior standing.

ARCHST 4630--Shaping Human Settlements (3).Review classic designs and designers, key concepts and enduring issues of community design within the overall framework of environmental design. Prerequisite: junior standing.

ARCHST 4660--Housing Concepts and Issues (3).Evaluate housing policies, regulations, codes, programs; global and ecological perspectives of environment and behavior; historic preservation; financial issues; trends and projections. Prerequisite: junior standing.

ARCHST 4700--Place-Making in Community Design (3).Ideologies, case studies and participatory methods on place-making in community design. Use processes to design a place-making scheme in actual community project. Prerequisite: junior standing.

ARCHST 4710--Design Business Practices (3).Analysis of the basic professional, human, and business skills necessary for the successful design practice. Pre- or Co-requisites of Studio IV and anticipated graduation during final academic year.

ARCHST 4813--Interiors Studio III (4).Spatial morphology, organization pattern, construction methods, materials, systems, and processes and integration with total design processes. Space planning and spatial manipulation in response to social, environmental, functional, and aesthetics specific to interiors. and instructor's consent. Co-requisite: ARCHST 3182 and 3230.

ARCHST 4814--Interiors Studio IV (4).Continuation of Architectural Studies 4813. Manipulation of form and space responding to programmatic functions and activities, and constraints imposed by structure, building materials, spatial enclosure, and related factors. Projects may involve designing single-function space to multiple-function layered spaces--both vertically and horizontally. Prerequisite: ARCHST 4813.

ARCHST 4815--Studio V (4).A continuation of previous studio with emphasis on digital media. Prerequisite: ARCHST 4814.

ARCHST 4823--Architectural Studio III (4).Continuation of ARCHST 3182. Spatial morphology, organization pattern, construction methods, materials, systems, and processes and integration with total design process. Space planning and spatial manipulation in response to social, environmental, functional, and aesthetics specific to architecture. Prerequisites:

ARCHST 3182; 3230.

ARCHST 4824--Architectural Studio IV (4).Continuation of ARCHST 4823. Manipulation of form and space responding to programmatic functions and activities, and constraints imposed by structure, building materials, spatial enclosure, and related factors. Projects may involve designing single-function space to multiple-function layered spaces - both vertically and horizontally. Prerequisite: ARCHST 4823.

ARCHST 4860--Programming for Thesis Design Studio (1-2).Develop written comprehensive program for thesis design studio project. Supervised by student-selected committee -- one departmental thesis advisor and at least one additional faculty member. Prerequisite/corequisite: ARCHST 4814 or 4824.

ARCHST 4940--Internship in Environmental Design (cr.arr.).Field experience in design under professional and educational supervision. Prerequisites: instructor's consent. Graded on S/U basis only.

ARCHST 4960--Readings in Architectural Studio (cr.arr.).Readings in recent research materials.

ARCHST 4990--Thesis Design Studio (4).Capstone experience on a single comprehensive project. Objective is to enable synthesis of previous course work by addressing a design problem defined in ARCHST 4860. Prerequisites: ARCHST 4860 ARCHST 4814 or ARCHST 4824.

PROFESSOR EMERITUS K. Thornburg

CHILD LIFE PROGRAM COORDINATOR N. Hager

The Department of Human Development and Family Studies (HDFS) combines basic understanding of human development with preparation for professional service to individuals and families. Career opportunities are primarily found in human service agencies serving children, adolescents, older adults, parents and families. The human development and family studies major also prepares the student for graduate study in HDFS and related fields.

The department offers the BS HES with a major in Human De-

velopment and Family Studies. A dual degree with the School of Social Work also is available. The student's program is developed from a base of human development and family studies courses. The student working with children must be able to maximize the resources offered by the family. The student concerned with the quality of family life must also recognize the intricate spiral of changing needs in the growing individual. The human development and family studies area focuses on this synthesis and requires further specialization in emphasis areas. (Note: Emphasis areas appear on transcripts but not on diplomas.)

Emphasis Areas

• *Child Development and Education*

• *Child Life*

• *Family and Consumer Sciences Education*

• *Family Studies*

• *Human Development*

• *Human Development and Family Studies and Social Work*

Major Program Requirements - Human Development and Family Studies (BS HES)

Majors in all of the emphasis areas in HDFS must complete the core courses below:

Grade of 2.0 or better required in the following classes:

H D FS 1600: Foundations of Family Studies3

H D FS 2200: Research Methods in Human Development
and Family Studies.....3

H D FS 2300: Multicultural Study of Children and
Families3

H D FS 2400: Principles of Human Development.....4

H D FS 3420: Early and Middle Childhood3

H D FS Laboratory Classes* 3-6

Major core requirements..... 19-22

*Child Development Laboratory Courses H D FS 3500, 3700, 3710, 3520 and 4971 all have prerequisites and require the consent of the instructor. Because enrollment is limited, students must see their advisors to be placed on the waiting list a minimum of two semesters before anticipated enrollment. Students in the Human Development emphasis may substitute another practicum experience (in adolescence or adulthood) with consent of advisor.

In addition to the required courses, the degree program is completed with courses selected from within the department, from other areas in the College of Human Environmental Sciences, and from the social sciences and allied professional fields such as education, recreation, business and health. For some students, courses in the arts, humanities, or biological sciences may be appropriate. For the degree requirements for the dual degree - BS HES and Social Work refer to the section for the School of Social Work.

Emphasis in Child Development and Education

This emphasis is designed to prepare graduates for positions of responsibility and leadership in public and private preschool programs, child-care centers, infant-care programs, after-school programs and other educational and social service facilities that serve families and children. Additional job opportunities include group homes, shelters, child care and provider training agencies, Parents as Teachers and YMCA/YWCA.

The general goal of the emphasis area is to provide instruction and experience to help students gain competence in working with young children and their families. The emphasis is on understanding human development, with primary focus on child development, behavior and learning, and on planning for

families. Attention is devoted to the development of working relationships with children, parents, professional colleagues and community workers.

Required Entry Courses HDFS 1600*, 2400*7

Emphasis core requirements15

COMMUN 1200: Public Speaking OR

COMMUN 3571: Group Decision Making Processes3

NUTR S 1034: Nutrition, Current Concepts and Controversies3

FINPLN 2183: Personal and Family Finance OR

2185: The Consumer as Entrepreneur.....3

H D FS 2200*: Research Methods in Human Development and Family Studies.....3

STAT 1200: Introductory Statistical Reasoning OR

STAT 1300: Elementary Statistics OR

ESC PS 4170: Introduction to Educational Statistics3

Subject area requirements in HDFS43

*H D FS 2300: Multicultural Study of Children and Families3

*H D FS 3420 Early and Middle Childhood.....3

*H D FS 3500: Infant-Toddler Development and Programs4

*H D FS 3510: Curriculum and Activities for the Early Childhood Setting.....3

*H D FS 3530: Foundations of Community-Based Programs for Children and Youth.....3

*H D FS 3600: Working With Parents3

*H D FS 3700: Child Development Laboratory6

*H D FS 4971: Advanced Child Development Lab.....12

*H D FS 4570: Development and Administration of Child Services Programs3

*H D FS 4720: Child and Family Advocacy3

* Student must earn 2.00 or better in course.

Requirements in related areas12

CI 4500: Emergent Language in Early Childhood3

CI 4510: Assessment in Early Childhood Education3

SPC ED 4300: Introduction to Special Education3

Supporting courses (from HDFS and related areas)3

Emphasis in Child Life

This emphasis prepares graduates to provide for the social/emotional needs, and support the optimum growth and development of children and their families in a variety of health care settings. Child life specialists use therapeutic play, psychological preparation, and coping skills interventions to help reduce the anxiety and stress related to illness, disability, hospitalization and medical procedures. Through a “family-centered care” approach, they provide parents and other family members reassurance and emotional support, help them understand children’s psychosocial needs, and provide tools to help them minimize psychological trauma.

Courses focus on understanding normal and exceptional child and family development, effective methods of working with children and families, as well as integration of theory and research into hands-on clinical practice experiences (evidence-based practice). Students who successfully complete the degree program should be well prepared to take the Child Life Professional Certification Exam presented by the Child Life Council Certification Committee. The student’s last semester is spent outside Columbia in a 480-clock-hour (minimum) clinical internship in a pediatric hospital setting.

All courses in sections A-B below are required.

Required Entry Courses: H D FS 1600* and 2400*7

A. Major core requirements 25-26

Biological Sciences: Choose from PTH AS 2201 and 2203 (Recommended) OR

BIO SC 1010 and 1020, or 1030.....5

Physical Sciences: Choose from CHEM 1100: Atoms and Molecules with lab OR

CHEM 1310 General Chemistry I..... 2-3

FINPLN 2183: Personal and Family Finance3

*H D FS 2200: Research Methods in Human Development and Family Studies.....3

HP 2190: Medical Terminology (Required).....3

NUTR S 1034: Nutrition, Current Concepts and Controversies3

PHIL 4510: Medical Ethics OR

PHIL 1100: Introduction to Ethics OR

PHIL 1150: Introductory Bioethics.....3

STAT 1200: Introductory Statistical Reasoning OR

STAT 1300: Elementary Statistics OR

ESC PS 4170: Introduction to Educational Statistics3

B. Requirements in HDFS56

*H D FS 2300: Multicultural Study of Children and Families3

*H D FS 3420: Early and Middle Childhood.....3

H D FS 3430: Adolescence and Young Adulthood3

H D FS 3600: Working with Parents3

*H D FS 3500: Infant-Toddler Development and Programs4

*H D FS 3700: Child Development Laboratory6

***H D FS 4085: Problems (Child Life Volunteering)1

H D FS 4100: Children in Health Care Settings3

H D FS 4110: Child Life Theory Practice3

H D FS 4570: Development and Administration of Child Services Programs3

** H D FS 4130: Child Life Practicum3

H D FS 4400: Childhood Death and Bereavement3

H D FS 4720: Child and Family Advocacy OR

H D FS 4700: Children and Families in Poverty3

***H D FS 4993: Internship in Human Development and Family Studies..... 15

* Student must earn 2.00 or better in course.

** Students are admitted to H D FS 4130 on a competitive and space-available basis. Interview applications are considered the semester before the student wishes to take H D FS 4130.

***Students are admitted to H D FS 4993 after satisfactory completion of H D FS 4130 (grade of 3.0 or higher). Students must be selected by hospitals through a student-initiated competitive application process.

****Should be completed prior to end of sophomore year.

Supporting course work (choose from).....6

Choose from H D F S or related areas such as CI, PSYCH, SPC ED, and SOC WK.

Emphasis in Family and Consumer Sciences Education

This emphasis prepares graduates for certification to teach family and consumer sciences from birth to grade 12 in public schools. The program combines courses in the human sciences with courses in teacher preparation from the College of Education. In order to progress to Phase II, students must earn a minimum GPA of 2.75 and a composite ACT score of 22.

*Must earn 2.00 or better in course.

***Must have completed General Certification Requirements, Professional Education Requirements for TDP 2000 and TDP 2040 prior to enrolling.

Emphasis in Family Studies

This emphasis acquaints the student with the concepts and principles basic to the development of a broad understanding of families and how they function in a changing environment. Relationships within families are studied, as are the relationships between families and other social groups (communities, schools, employees, etc.). The family studies major emphasizes diverse and multicultural family structures and processes.

Students completing this program will have met most of the academic qualifications to apply to become a provisional Certified Family Life Educator (by the National Council on Family Relations).

Major core requirements

NUTR S 1034: Nutrition, Current Concepts and

Controversies	3
Total from Categories I-XII	60

A minimum of 60 credits must be selected from categories I-XII below.

At least one course must be taken from each category I-XI, although additional courses can be used to fulfill the 60-credit requirement.

Students must take at least 14 credits in HDFS courses at the 3000-level from categories I-X listed below (not including H D FS 3710, 4640 and 4993).

H D FS 1600 must be taken before H D FS 2300 or any 3000-level H D FS course.

I. Families and society

**H D FS 1600: Foundations of Family Studies (3)

**H D FS 2300: Multicultural Study of Children and Families (3)

RU SOC 1150: The Amish Community (3)

SOCIOL 3420: The Family (3)

II. Internal dynamics of families (Take at least 4 of the following)

H D FS 4300: Black Families (3)

H D FS 4610: Stress in Families (3)

H D FS 4700: Children and Families in Poverty (3)

H D FS 4620: Family Interaction (3)

H D FS 4630: The Process of Divorce (3)

III. Human growth and development

** H D FS 2400: Principles of Human Development (4)

** H D FS 3420: Early and Middle Childhood (3)

H D FS 3430: Adolescence and Young Adulthood (3)

H D FS 3440: Adulthood and Aging (3)

H D FS 3500: Infant-Toddler Development and Programs Lab (4)

SOCIOL 4210: Sociology of Aging (3)

WGST 1360: The Female Experience: Body, Identity and Culture (3)

IV. Human sexuality

PSYCH 2810 Human Sexuality (3)

V. Interpersonal relations

**H D FS 4640: Interpersonal Relationships (3)

(Course is required and need a 2.0 or better)

H D FS 1610: Intimate Relationships and Marriage (3)

COMM 3441: Nonverbal Communication (3)

COMM 3561: Relational Communication (3)

COMM 4520: Family Communication (3)

VI. Family resource management

FINPLN 2183: Personal and Family Finance (3)

FINPLN 4380: Assessing the American Dream (3)

VII. Parent education

H D FS 3600: Working with Parents (3)

**H D FS 3710: Child and Family Development Laboratory (6)

VIII. The family, the law and public policy

*H D FS 4720: Child and Family Advocacy (3)

IX. Ethics

PHIL 1100: Introduction to Ethics (3)

PHIL 2400: Ethics and the Professions (3)

PHIL 4510: Medical Ethics (3)

X. Family Life Education Methods

**H D FS 4970: Human Developmental Family Studies Capstone (3)

*H D FS 4993: Internship in Human Developmental and Family Studies (3-6)

XI. Research Foundations

**H D FS 2200: Research Methods in Human Development and Family Studies OR

PSYCH 3010: Research Methods in Psychology OR

SOCIOL 2950: Social Research I (3)
 *STAT 1200: Introductory Statistical Reasoning OR
 STAT 1300: Elementary Statistics OR
 ESC PS 4170: Introduction to Educational Statistics 1
 OR

SOCIOL 4120: Social Statistics (3)

XII. Related electives (approved by advisor) to total 60 credits in categories I-XII

*Course is required

**Students must earn a 2.00 or better in course

Emphasis in Human Development

This emphasis provides students with an in-depth understanding of normative human development across the lifespan, as well as appreciation for diversity in developmental experiences within and across cultures and socioeconomic groups. Students also are introduced to problems of development. It emphasizes the acquisition of basic critical thinking skills as they relate to the research process and the application of human development principles and critical thinking skills as they relate to practice. Students select one phase of the lifespan (infancy-early childhood, adolescence, youth services, or adulthood) as a focus.

Human Development emphasis area

I. Infancy, early and middle childhood (18 credits)

Required Course

H D FS 3500: Infant-Toddler Development and Programs (4)

Four of the following

H D FS 3600: Working with Parents (3)
 H D FS 3530: Foundations of Community-Based Programs for Children and Youth (3)
 H D FS 4510: Administration of Programs for Children and Families (3)
 CS&D 3020/PSYCH 3810: Normal Language Development (3)
 CSD 4420: Reading and Language Disabilities in School-age Children (3)
 CI 4500: Emergent Language in Early Childhood (3)
 CI 4510: Assessment in Early Childhood Education (3)
 SOC WK 4450: Introduction to Child Welfare Practice and Services (3)
 SOC WK 4390: Helping Strategies with Children and Adolescents (3)
 SPC ED 4305: Introduction to Special Education for Regular Educators (3)

II. Adolescence

Four of the following

H D FS 3600: Working with Parents (3)
 H D FS 3530: Foundations of Community-Based Programs for Children and Youth (3)
 H D FS 4400: Childhood Death and Bereavement (3)
 H D FS 4640: Interpersonal Relationships (3)
 NUTR S 2460: Eating Disorders (2)
 PSYCH 2810: Human Sexuality (3)
 SOC WK 4360: Working with Minority Youth (3)
 SOC WK 4370: Delinquency, Corrections and Social Treatment (3)
 SOC WK 4390: Helping Strategies with Children & Adolescents (3)

III. Adulthood and Aging

Four of the following

ANTHRO 2580: Evolution of Human Sexuality (3)
 H D FS 3600: Working with Parents (3)
 H D FS 4640: Interpersonal Relationships (3)
 ESC PS 4180: Foundations of Rehabilitation (3)
 NUTR S 2450: Nutrition Throughout the Life Span (3)
 PSYCH 2810: Human Sexuality (3)
 PSYCH 3140: Cognitive Psychology (3)
 PSYCH 3150: Human Memory (3)
 PSYCH 4410: Psychology of Aging (3)
 PSYCH 4830: Psychology of Women (3)
 SOCIOL 2230: Social Perspectives on Aging (3)
 SOCIOL 4210: Sociology of Aging (3)

IV. Youth Services

One of the Following:

H D FS 3600: Working with Parents (3)
 SOCIOL 3255: Youth in Today's World (3)
 SOC WK 4380: Social Work Practice with Minorities: African-American Emphasis (3)

One of the Following:

H D FS 3530: Foundations of Community-Based Progs. for Children and Youth (3)

SOC WK 4360: Working with Minority Youth (3)
 SOC WK 4390: Helping Strategies with Children and Adolescents

One of the Following:

RU SOC 4341: Building Communities from the Grassroots (3)
 SOC WK 4740: Introduction to Community and Organizational Practice (3)

Students Must Take:

P R TR 1010: Introduction to Leisure Studies (3)

Optional Related Electives

P R TR 4208: Administration of Leisure Services (3) OR
 H D FS 4510: Administration of Programs for Children and Families (3)

Capstone/internship experience

H D FS 4970: Human Development and Family Studies Capstone3
 H D FS 4993: Internship in Human Development and Family Studies 3-6

Students must participate in a faculty supervised research experience dealing with their developmental emphasis area or work with the particular age group (with good supervision) in their emphasis area. (This experience should be different from that done in the required practicum course.) For most students the research experience is advised, but depending on student interests and career goals and on advisor recommendations, the practitioner option would be available.

Supporting course work

H D FS-related course work (approved by the advisor; 3 credits for Youth Services; 6 credits for others).

Note: Only six hours of graduate work may be completed by undergraduates, and only during their senior year. See Dual Enrollment in the Academic Rules and Regulations section of this catalog.

Minor in Human Development and Family Studies

A minor in HDFFS may be obtained by taking 15 credits in the following courses:

H D FS 1600: Foundations of Family Studies3
 H D FS 1610: Intimate Relationships and Marriage3
 H D FS 2300: Multicultural Study of Children and Families3
 H D FS 2400: Principles of Human Development4
 *H D FS 3420: Early and Middle Childhood OR
 H D FS 3430: Adolescence and Young Adulthood OR
 H D FS 3440: Adulthood and Aging3

* Students who have completed PSYCH 2410 cannot receive credit for H D FS 3420.

Emphasis in Human Development and Family Studies and Social Work-Dual Degree

This option is designed to provide instruction and experiences that will help students develop competence in understanding, guiding, and working with individuals and families. Emphasis is placed on understanding human and family development, administrative aspects of community programs, communication skills, and program development and evaluation.

The program leads to dual degrees: a Bachelor of Social Work and a Bachelor of Science in Human and Environmental Sciences with a major in Human Development and Family Studies. Careers include positions in family and children's services, youth organizations, religious organizations, court and justice systems, mental health centers, and programs for older adults.

Students apply for admission to the Social Work program after

completing H D FS 1600, 2400, and an additional 54 credits. A minimum GPA of 2.5 must have been attained for the first 60 credit hours.

Required Entry Courses: H D FS 1600 and 2400

A. Major core requirements (6 credit hours)

NUTR S 1034: Nutrition, Current Concepts and Controversies3
 FINPLN 2183: Personal and Family Finance3

B. HDFFS Requirements (32 credit hours)

*H D FS 1600: Foundation of Family Studies3
 *H D FS 2200: Research Methods in Human Development and Family Studies3
 *H D FS 2300: Multicultural Study of Children and Families3
 *H D FS 2400: Principles of Human Development4
 *H D FS 3420: Early and Middle Childhood3
 *H D FS 3710: Child & Family Development Laboratory6
 *H D FS 4300: Black Families3
 *SOC WK 4310: Social Statistics3
 H D FS 4400: Childhood Death & Bereavement OR
 H D FS 4610: Stress in Families OR
 H D FS 4700: Children & Families in Poverty3
 H D FS 4720: Child and Family Advocacy3

Choose either a Family Studies or Human Development area of specialization which is 6 hours

Family Studies (2 courses from the following):

HD F S 4620: Family Interaction3
 HD F S 4630: The Process of Divorce3
 HD F S 4640: Interpersonal Relationships3
 HD F S 4740: Parent-Child Relations Over the Life Course ..3
 OR

Human Development

HD F S 3430: Adolescence and Young Adulthood3
 HD F S 3440: Adulthood and Aging3

C. Social Work Requirements (48 credit hours)

Students must be admitted to the School of Social Work before taking any of these courses. For admission, the student must have attained 60 credit hours and a 2.5 cumulative GPA.

SOC WK 1110: Introduction to the Social Work Major1
 **SOC WK 1115: Social Welfare and Social Work3
 SOC WK 2220: Human Behavior and the Environment3
 SOC WK 3320: Understanding Personality in a Social Context OR
 PSYCH 4310: Theories of Personality3
 SOC WK 4710: Social Justice and Social Policy3
 SOC WK 4711: Social Justice and Social Policy II3
 SOC WK 4720: Variations in Human Behavior3
 ***SOC WK 4730: Introduction to Social Work Practice3
 SOC WK 4740: Introduction to Community Organizations Processes4
 SOC WK 4750: Interaction Skills Workshop3
 SOC WK 4760: Theory and Practice of Social Group Work ..3
 ****SOC WK 4770: Strategies of Direct Practice3
 SOC WK 4970: Senior Professional Seminar3
 Social Work elective course chosen from Field of Practice...3

Capstone/internship experience is 9 credit hours

*****SOC WK 4971: Undergraduate Field Practicum6
 This course and SOC WK 4970, constitute the capstone experience.

*Must attain a grade of 2.0 or better

**Optional

***To be taken fall semester, junior year

****To be taken fall semester, senior year

****To be taken spring semester, senior year

HUMAN DEVELOPMENT AND FAMILY STUDIES COURSES

HD FS 1520--Drop-In Child Care Programs (3).Examination of appropriate planning for and experience in a drop-in child care program. Prerequisites: H D FS 2420 or equivalent and instructor's consent.

HD FS 1600--Foundations of Family Studies (3).Introduction to family studies discipline and profession. Introduces historical changes in families, diversity by race, ethnicity, class and sexual orientation, and interaction of families with neighborhoods, schools, the workplace, and larger systems. H E S major only or H D FS minors.

H D FS 1600H--Foundations of Family Studies - Honors (3).Introduction to family studies discipline and profession. Introduces historical changes in families, diversity by race, ethnicity, class and sexual orientation, and interaction of families with neighborhoods, schools, the workplace, and larger systems. H E S major only or H D FS minors. Honors eligibility required.

H D FS 1610--Intimate Relationships and Marriage (3).Examination of issues pertaining to intimate and marital relationships such as relationship foundation and dissolution processes, love, sex, behavioral scripts, and conflict. Diversity related to race, ethnicity, gender, and sexual orientation is explored.

HD FS 2085--Problems in Human Development and Family Studies (cr.arr.).Graded on S/U basis only.

H D FS 2200--Research Methods in Human Development and Family Studies (3).Introduction to research methods in the social sciences. Emphasis on both qualitative and quantitative methods, as well as applied research and program evaluation. Prerequisite: sophomore standing.

H D FS 2300--Multicultural Study of Children and Families (3).Study of cultural variation in family life around the world and within America (e.g.: African-American, Hispanic American). Attention is paid to the external conditions that affect the internal workings of these families. Prerequisites: H D FS 1600 or equivalent or instructor's consent.

H D FS 2400--Principles of Human Development (4).Concepts and principles basic to an understanding of human development and learning throughout the life span. Prerequisite: ENGLISH 1000

H D FS 2400H--Principles of Human Development - Honors (4).Concepts and principles basic to an understanding of human development and learning throughout the life span. Prerequisite: ENGLISH 1000. Honors eligibility required.

H D FS 2450--Human Sexuality Across the Life Span (3).An introductory survey of human sexuality including gender, love and intimacy, sexual expression and variation, sexual orientation, contraception, pregnancy and birth, sexually transmitted infections, sexual coercion, and sex in society. Sexuality within the context of intimate relationships across the life course will be emphasized.

H D FS 3085--Problems in Human Development and Family Studies (cr.

arr.).Independent work on special problems in human development and family studies. Prerequisite: instructor's consent. Graded on S/U basis only.

H D FS 3420--Early and Middle Childhood (3).Emotional, cognitive, and physical development of the child before puberty. Observation is integral part of course. Cannot receive credit for more than one of the following: PSYCH 2410, H D FS 2420, or ESC PS 2500.

H D FS 3430--Adolescence and Young Adulthood (3).Physical, intellectual, and psychosocial maturation of adolescents and young adults within the context of life long developmental sequelae.

H D FS 3440--Adulthood and Aging (3).Examination of biological, cognitive, psychological and social changes experienced across adulthood.

H D FS 3500--Infant-Toddler Development and Programs (4).Applied cognitive, language, and social development of infants and toddlers. Emphasizes development in a child care setting and staff relations. Co-requisites: H D FS 2420

HD FS 3510--Curriculum and Activities for the Early Childhood Setting (3).Development of curriculum for children birth through 5 in preschool setting. Also emphasizes the development of program activities for children birth through 5; and 6 through 10 in after-school care settings. Prerequisites: may be taken concurrently with H D FS 3420 and 3500 and instructor's consent.

H D FS 3530--Foundations of Community-Based Programs for Children and Youth (3).Examines non-academic community-based programming for children and youth. Experience working these age groups. Prerequisites: H D FS 3420 or equivalent or instructor's consent. Graded on A/F basis only.

H D FS 3600--Working With Parents (3).Understanding of parental roles, perspectives, relationships, and diverse parenting types, approaches, and challenges. Researching, compiling, and presenting educational materials relative to parenting are integral course components. Prerequisite: H D FS 3420.

H D FS 3700--Child Development Laboratory (3-6).Experience working with young children (ages 2-6 years), and applying developmentally appropriate practice. Focus on general guidance, curriculum planning, family and staff relations. Prerequisites: H D FS 3500 or equivalent and instructor's consent.

H D FS 3710--Child and Family Development Laboratory (6).Experience working with young children (birth-9 years) and their families, application of child development principles, and planning for parent education. Prerequisites: H D FS 3420 or equivalent and instructor's consent.

H D FS 3720--Student Teaching Prekindergarten (6).Experience working with children (2-5 years), using general guidance principles and methods for fostering creativity. Prerequisites: H D FS 3420 or equivalent and instructor's consent.

H D FS 3730--Field Training Practicum (3).Field training experiences under supervision. Prerequisite: advisor's consent. May be repeated for credit. Graded on A/F basis only.

HD FS 3960--Readings in Human Development and Family Studies (cr.arr.).Readings in recent research; critical discussions.

HD FS 4001--Topics in Human Development and Family Studies (cr.arr.).Selected current topics in field of interest.

H D FS 4085--Problems in Human Development and Family Studies (cr. arr.).Independent work on special problems in human development and family studies. Prerequisites: instructor's consent. Graded on S/U basis only.

H D FS 4100--Children in Health Care Settings (3).Overview of the medical conditions and treatments commonly encountered by children and adolescents in health care settings and their typical reactions to them. Introduction to the philosophy and the role of the child life profession. Prerequisites: H D FS 2400 and 2420, or equivalent.

HD FS 4110--Child Life Theory and Practice (3).Focuses on theoretical foundations and principal intervention strategies used in Child Life professional practice. Prerequisites: H D FS 2420, 2500 and instructor's consent.

H D FS 4130--Child Life Practicum (3).Observation of Child Life staff at Children's Hospital and experience helping children and adolescents cope with hospitalization. Prerequisites: H D FS 2500 and 3500, consent required.

HD FS 4300--Black Families (3).(Same as BL STU 4300). Emphasis is on the unique social, economic, religious, educational, and political environments that have affected the structure and function of the black family. Prerequisites: H D FS 2200 or equivalent, and junior standing.

HD FS 4400--Childhood Death and Bereavement (3).An exploration of issues that arise for children and families when facing terminal illness or death. The course also includes an examination of coping and helping strategies for dying and grieving children. Prerequisites: H D FS 2400 and 2420.

H D FS 4510--Administration of Programs for Children and Families (3).The ABCs of administering community- and hospital-based programs for children and their families. Includes an overview of office procedures, staff and volunteer management, public relations, budgeting, accounts, accountability and quality assurance. Prerequisites: HD FS 3500 or 3510.

H D FS 4570--Development and Administration of Child Services Programs (3).The development of leadership and management skills for administering community- and hospital-based programs for children. Includes an overview of office policy and procedure, staff and volunteer management, public relations, budgeting, accounts, accountability, and quality assurance. Prerequisites: H D FS 3700 and 3710.

HD FS 4610--Stress in Families (3).Introduction to the study of stressor events in families, such as poverty, violence within families, substance abuse, and health problems. Emphasis is on both prevention and coping.

HD FS 4620--Family Interaction (3).Analysis of intrafamilial interaction from a systems perspective; includes comparative study of family paradigms, family subsystems, goals, and resources, boundaries, and patterns of

feedback. Prerequisites: HDFS 1600 and 2200 or equivalent; or instructor's consent.

H D FS 4630--The Process of Divorce (3). Examination of theory and research related to marital dissolution. The impact of divorce on children and adults, and divorce intervention strategies are considered. Prerequisites: H D FS 1600, and 2200 or equivalent; or instructor's consent.

H D FS 4640--Interpersonal Relationships (3). In-depth examination of interpersonal relationships, including theoretical perspectives, research methods, relationship forms, relationship processes, and how context affects relationships. Students are introduced to the field of close relationships.

HDFS4655H--History of the Family in Russia - Honors (3). Survey of family relations in Russia from the Kievan period. Materials drawn from child development and family studies, education, history, sociology, and literature. Prerequisite: 3 hours in Social/Behavioral Sciences. Honor eligibility required.

H D FS 4680--Family Communication (3). (same as COMMUN 4520).

H D FS 4700--Children and Families in Poverty (3). Study of the extent, distribution, and implications of poverty of children and families. Examination of myths and realities, social conditions, policies, and programs that contribute to or reduce poverty and its consequences. Prerequisites: H D FS 1600, 2400, and 2420 or equivalent.

H D FS 4720--Child and Family Advocacy (3). Study of the processes of social policies, legislation, and regulations affecting children and families at the local, state and federal levels. The course emphasizes current issues and need for citizen involvement.

HDFS4800--Program & Curriculum Design for FACS Education in Mid. & Sec. Schools (3). What should a teacher do about planning for student learning in FACS? Includes objectives, lesson designs, resources, learner diversity, thinking skills, reasoning processes, articulation, legislation. Prerequisites: TDP 2000 and TDP 2020 or equivalent. Admission to Phase II, and instructor's consent.

H D FS 4820--Assessment in Family and Consumer Sciences Education (2). What should a teacher do to determine the extent to which program/lesson objectives have been achieved? Includes the selection, design, and use of a wide variety of assessment tools and techniques, and the impact of assessment on the evaluation of learners and program design. Prerequisites: admission into Phase II, H D FS 4800, and instructor's consent.

H D FS 4830--Methods of Teaching FACS in Middle and Secondary Schools (3). What should a teacher do to help students achieve learner objectives? Includes classroom management strategies, choosing and using instructional methods to stimulate thinking skills and reasoning processes, communication skills, professionalism, and public relations. Prerequisites: admission into Phase II, and instructor's consent.

HDFS4940--Field Experience in Family and Consumer Sciences (1). Students will observe and assist in FACS classroom. Prerequisite: to

be taken concurrently with H D FS 4800, and instructor's consent.

H D FS 4941--Field Experience in Family and Consumer Sciences (1). Students will be involved in real-world experiences in a FACS classroom. Prerequisites: to be taken concurrently with H D FS 4830; requires instructor's consent.

H D FS 4942--Student Teaching FACS in Middle and Secondary Schools (cr.arr.). What guided practicum experiences will directly contribute to success as a classroom teacher? Students will teach for sixteen weeks within the state of Missouri under the supervision of an experienced FACS teacher. Prerequisites: H D FS 4800, 4820, 4830, instructor's consent.

H D FS 4970--Human Development and Family Studies Capstone (3). Focus is on students integrating, extending, critiquing, and applying knowledge gained in the family studies or human development option. Prerequisites: include core courses plus minimum of 12 hours of 4000 H D FS credits.

H D FS 4971--Advanced Child Development Laboratory (12). Practical experience working with young children (up to 10) in out-of-home care facilities. Program planning for children and working with parents. Lab hours required. Prerequisites: H D FS 3500 and 3700 or equivalent and instructor's consent.

H D FS 4993--Internship in Human Development and Family Studies (cr.arr.). Internships or field training experiences under supervision. Graded on S/U basis only. Prerequisite: advisor's consent.

FACULTY

PROFESSOR C. D. Hardin, L. Hillman, K. L. Fritsche, T. R. Thomas

ASSOCIATE PROFESSOR S. Ball, P.S. Hinton, M.J. Petris, C. Zhang

ASSISTANT PROFESSOR P. M. Landhuis, C. A. Peterson, J. Thyfault, J. Perfield

TEACHING ASSISTANT PROFESSOR M. Raedeke

ADJUNCT INSTRUCTOR L. Hudson, T. P. LaFontaine

ASSOCIATE PROFESSOR EMERITUS R. P. Dowdy

The program leading to the BS in Human Environmental Sciences with a major in Nutritional Sciences offers designated emphasis areas in medical dietetics, nutrition and fitness, and nutritional sciences. A minor is also available in nutritional sciences. The department administers graduate programs in nutritional sciences and exercise physiology.

Students who want to explore the major can take NUTR S 1034: Nutrition, Current Concepts and Controversies or NUTR S 1340: Introduction to Exercise and Fitness.

Major Program Requirements – Nutritional Sciences (BS HES)

Required entry-level courses for the program include CHEM 1310 and 1320 and BIO SC 1500.

Emphasis in Medical Dietetics

The Coordinated Program in Dietetics combines academic course work with supervised practice in healthcare settings.

Enrollment is limited. To apply, students must have completed (or be enrolled in) prerequisite courses and have a GPA of at least 2.9. Students must achieve a course grade of B- or better in NUTR S 2340 and BIOCHM 3630, or equivalent transfer courses approved by faculty.

Graduates are eligible to take the Registration Examination for Dietitians, which is required to obtain the RD (Registered Dietitian) credential. The program is accredited by the Commission on Accreditation for Dietetics Education of the American Dietetic Association.

Emphasis in Nutrition and Fitness

Graduates of this program are prepared for employment in the fitness and health promotion area or for graduate studies in exercise science. This is a rapidly expanding area with opportunities in corporate and commercial industries, government and non-profit sectors. Typical employment responsibilities include fitness assessment, nutrition education, health promotion, exercise supervision and program administration.

Students desiring to declare Nutrition and Fitness as a major are required to have earned a minimum overall GPA of 2.5 after 30 credit hours, including completion of the following courses or their equivalents:

- CHEM 1320

- BIO SC 1010 & 1020 or BIO SC 1500
- MATH 1120
- NUTR S 1034 or 1340 or 2380

Prior to achieving these requirements, students will be considered “Pre-Nutrition and Fitness”

Electives chosen to meet college requirements and career objectives	16
Anatomy lab and internships are available and highly recommended.	

Emphasis in Nutritional Sciences

This program of study provides a strong foundation in science with a focus on human nutrition. Graduates are prepared for advanced study in human nutrition, medicine, dentistry or other health-related careers. This program is an excellent choice for premedicine students with an interest in family practice or rural medicine.

Emphasis core requirements	32
NUTR S 2340: Human Nutrition I.....	3

NUTRITIONAL SCIENCE COURSES

NUTRS 1001--Topics in Nutritional Sciences (cr.arr.). Supervised study in specialized topic of nutritional sciences.

NUTRS 1034--Nutrition, Current Concepts and Controversies (3). Basic nutrition principles and current controversies are presented. Emphasis on role of nutrition in maintaining health as well as exploring the scientific validity of popular nutrition beliefs. No credit if taken after Nutritional Sciences 2340.

NUTR S 1340--Introduction to Exercise and Fitness (3). This course is a survey of information in the fields of exercise science and physical fitness. It is a required course for students majoring in Nutrition and Fitness, but it is open to non-majors as well. The goal of the course is to provide students with practical information about exercise and how to be physically fit.

NUTRS 2001--Topics in Nutritional Sciences (cr.arr.). Supervised study in a specialized topic of Nutritional Sciences.

NUTRS 2085--Problems in Nutritional Sciences (cr.arr.). Supervised study in a specialized phase of nutritional sciences.

NUTRS 2340--Human Nutrition I (3). Basic concepts of normal nutrition related to physiological/chemical processes; changing nutrient

needs during human life cycle, emphasis on adult; some social/psychological influences on dietary habits. Prerequisites: Organic Chemistry, MPP 3202 or instructor's consent.

NUTR S 2380--Diet Therapy for Health Professionals (3). Principles underlying normal nutrition and diet for health and disease. Prerequisites: sophomore standing. Graded on A/F basis only.

NUTR S 2420--Biology of Healthy Living (2). (same as PH THR 2420 and BIOMED 2420). Biology of inactivity as a causal factor in chronic disease.

NUTR S 2450--Nutrition Throughout the Life Span (3). Nutritional requirements, challenges, community nutrition programs, and eating patterns throughout the life span with emphasis on health promotion and disease prevention; Role of beliefs, culture, socio-psychological influences, and economic resources in food selection and nutrition/health status. Lecture/discussion course. Prerequisites: introductory nutrition course.

NUTR S 2460--Eating Disorders (2). Definition, etiology, treatment, and research related to eating disorders: anorexia nervosa, bulimia

NUTR S 2450: Nutrition Throughout the Life Span.....	3
NUTR S 4330: Human Nutrition II Laboratory.....	2
NUTR S 4340: Human Nutrition II Lecture	3
NUTR S 4950: Capstone: Research in Nutritional Sciences..	2
NUTR 4951: Nutrition Research Communication.....	1
BIOCHM 4270: Biochemistry	3
BIOCHM 4272: Biochemistry	3
BIO SC 2200: General Genetics	4
BIO SC 2300: Introduction to Cell Biology.....	3
MPP 3202: Elements of Physiology OR	
BIO SC 3700: Animal Physiology	5

Supporting area

Choose from selected courses in biochemistry, chemistry, nutritional sciences or molecular microbiology and immunology

Electives to total 120 hours

Additional courses may be required to meet college requirements or career objectives. On-campus research internships are available and highly recommended.

Minor in Nutritional Sciences

The minor in nutritional sciences is intended for students majoring in biological sciences, biochemistry, health and exercise sciences or related fields.

Minor core requirements 15

NUTR S 2340: Human Nutrition I.....	3
Courses selected from the following list of approved nutrition courses	
NUTR S 2380: Diet Therapy for Health Professionals.....	3
NUTR S 2450: Nutrition Throughout the Life Span.....	3
NUTR S 2460: Eating Disorders.....	2
NUTR S 3390: Teaching and Counseling Techniques in Nutrition	2
NUTR S 4330: Human Nutrition II Laboratory.....	2
NUTR S 4340: Human Nutrition II Lecture	3
NUTR S 4360: Nutritional Assessment	3
NUTR S 4370: Nutrition Therapy I	3
NUTR S 4380: Nutrition Therapy II.....	2

nervosa and binge eating disorder/obesity. Graded on A/F basis only. Prerequisites: NUTR S 1034 or higher level nutrition course.

NUTRS 3085--Problems in Nutritional Sciences (cr.arr.). Advanced problems in a selected field of food science and nutrition.

NUTRS 3280--Food Service I: Introduction to Food Service (3). Organizational structure and relationships; policy making and implementation; budgeting and cost control; menu as a management tool; sanitation and safety; food preparation; and food delivery systems. Prerequisite: H R M 1995.

NUTR S 3290--Food Service I: Supervised Practice Experience (1). A practicum designed to expose the student to concepts of quantity food production, evaluation of products and resources, personnel administration and application of food microbiological principles. 4 hours of supervised practice per week. Prerequisites: concurrent enrollment in NUTRS 3280; open to students enrolled in the Coordinated Program in Dietetics only.

NUTR S 3360--Nutritional Assessment Supervised Practice Experience (2). Supervised practice to develop skills in screening

individuals for nutrition risk; use of dietary, anthropometric, laboratory, clinical and sociocultural criteria to assess nutritional status of individuals, 8 hours of supervised practice per week. Prerequisites: concurrently enrolled in NUTR 4360; Open to students enrolled in the Coordinated Program in Dietetics only.

NUTR S 3370--Nutrition Therapy I: Supervised Practice Experience (3). Practice and application of principles of nutrition care for selected disease states. 12 hours of supervised practice per week. Prerequisites: Concurrently enrolled in NUTR S 4370; Open to students enrolled in the Coordinated Program in Dietetics only.

NUTR S 3390--Teaching and Counseling Techniques in Nutrition (2). Principles and theories of learning; Resources, methods and techniques for teaching food/nutrition principles and dietary guidelines; Group dynamics and facilitation; Introduction to counseling theories and methods used in nutrition care of individuals. Lecture course. Prerequisites: PSYCH 1000 and NUTR S 2340.

NUTR S 3400--Teaching & Counseling Techniques in Nutr. Supervised Practice Exp (1). Skill development and practice in counseling individuals for health promotion and disease prevention and the teaching of food and nutrition topics to groups. 4 hours of supervised practice per week. Prerequisites: concurrent enrollment in NUTR S 3390; Open to students enrolled in the Coordinated program in Dietetics only.

NUTR S 3590--Community Nutrition Supervised Practice Experience (1). A practicum which explores and applies the concepts and techniques of nutrition programming in a community setting. 4 hours of supervised practice per week. Prerequisites: NUTR S 2590; Open to students enrolled in the Coordinated Program in Dietetics only.

NUTR S 3800--Prevention and Care of Athletic Injury (2). Theory, practice in prevention, emergency care, rehabilitation of injuries encountered in vigorous games. Prerequisite: PTH AS 2201.

NUTR S 3800--Prevention and Care of Athletic Injury (2). Theory, practice in prevention, emergency care, rehabilitation of injuries encountered in vigorous games. Prerequisite: PTH&AS 2201.

NUTR S 3810--Advanced Athletic Training (3). Advanced study in areas of prevention, evaluation, care, and treatment and rehabilitation of athletic injuries at high school and college level. Graded on A/F basis only. Prerequisite: NUTR S 3800 and instructor's consent.

NUTR S 3900--Field Training in Nutritional Sciences (cr.arr.). Prerequisites: junior or senior standing and instructor's consent.

NUTR S 4001--Topics in Nutrition and Exercise Physiology (1-3). Instruction in specific subject matter areas in the field of nutrition science and exercise physiology.

NUTR S 4020--Monogastric Nutrition (3). (same as Animal Science 4312 and Nutrition 7020). Principles of nutrition, feed formulation and recent research in poultry feeding. Graded on A/F basis only. Prerequisite: AN SCI 3212 and BIOCHM 3630.

NUTR S 4200--Sports Performance and

Conditioning (3). Course utilizes scientific theory and applied instruction to teach procedures, techniques, and modalities used to improve physical sports performance. Prerequisites: Physiology and Anatomy, Kinesiology. Junior or Senior senior standing required. Graded on A/F basis only.

NUTR S 4280--Food Service II: Advanced Food Service Management (1). Issues related to marketing and financial control in the food-service sector. Lecture course. Prerequisite: NUTR S 3280, NUTR S 3290.

NUTR S 4290--Food Serv. II: Adv. Food Service Manage. Supervised Practice Exp (2). A practicum tailored to apply marketing and budgetary principle in the foodservice industry. 8 hours of supervised practice per week. Prerequisite: Concurrent enrollment in NUTR S 4280; Open to students admitted to the Dietetics program.

NUTR S 4330--Human Nutrition II Laboratory (2). A techniques course in nutrition, usually taken concurrently with NUTR S 4340. Prerequisites: NUTR S 2340, Biochemistry and instructor's consent.

NUTR S 4340--Human Nutrition II Lecture (3). Physiological and biochemical aspects of nutrition; functions of methods of measuring nutritional status; various aspects of applied nutrition. Continuation of NUTR S 2340. Prerequisites: NUTR S 2340, Biochemistry or instructor's consent.

NUTR S 4360--Nutritional Assessment (3). Introduction to the nutrition assessment process. The identification of dietary, anthropometric, laboratory, clinical and sociocultural parameters used to assess nutritional status of individuals. Lecture course. Prerequisites: PSYCH 1000, NUTR S 2340.

NUTR S 4370--Nutrition Therapy I (3). In-depth study of physiological/biochemical changes in selected disease states (cardiovascular disease, rehabilitation, diabetes and cancer); development of principles underlying nutrition therapy. Lecture course. Prerequisites: NUTR S 4360.

NUTR S 4380--Nutrition Therapy II (2). Evaluation, design and monitoring of the nutrition care of complex health disorders such as renal disease, trauma, and multi-system organ failure; emphasis on nutrition support (enteral and parenteral nutrition). Lecture course. Prerequisites: NUTR S 4370.

NUTR S 4381--Nutrition Therapy II: Supervised Practice Experience (4). Practice in the nutrition care of complex health disorders with emphasis on nutrition support. 16 hours of supervised practice per week. Prerequisites: concurrent enrollment in NUTR S 4380; Open to students admitted to Dietetics program only.

NUTR S 4390--Issues in Dietetic Practice (1). Lectures and discussions focus on issues and trends in dietetics. Discussions are used to encourage the development of skills and attitudes which foster life-long professional learning. Lecture/discussion course. Prerequisite: NUTR S 4950 and 4380; or instructor's consent.

NUTR S 4590--Community Nutrition (3). Public health nutrition and chronic disease prevention, food security, nutrition programs and food access, public policy, sustainable agriculture and food production systems,

cultural food practices, needs assessment. Prerequisites: Nutrition course or instructor's consent. Graded on A/F basis only.

NUTR S 4850--Physiology of Exercise (3). Effects of exercise on the human organism; physiologic capacity and limitation for activity; role of exercise in health and fitness. Prerequisite: MMP 3202 PTH AS 2201 recommended.

NUTR S 4860--Exercise Prescription (3). Course investigates theory and methods of testing and prescribing exercise for circulatory fitness, body composition, muscle strength, joint and muscle ranges in motion, and posture. Prerequisites: HTH PR 4250 and MPP 3202. Graded on A/F basis only.

NUTR S 4940--Internship in Nutritional Science (1-6). Combines study, observation and employment in an area of food science and nutrition. Written reports, faculty evaluation. Prerequisites: 90 hours including 3 courses in Nutritional Sciences and instructor's consent.

NUTR S 4950--Capstone: Research in Nutritional Sciences (2). Introduction to research, including the types of basic, clinical, and outcomes-based research. Defining research problems related to nutrition and exercise sciences, developing hypotheses, reviewing scientific literature, writing research protocols, analyzing data. Lecture course. Prerequisites: NS 2340, statistics course, and senior standing or instructor's consent.

NUTR S 4951--Nutrition Research Communication (1). Analyze and interpret data; present results of a research study in manuscript and seminar presentation formats. Emphasis on effective communication of nutrition research to scientific and lay audiences. Prerequisite: NUTR S 4950 or instructor's consent; Dietetics: 4 hours of SPE per week. Winter; Graded A-F only.

NUTR S 4960--Readings in Nutritional Sciences (cr.arr.). Prerequisites: 8 hours of course work in field of subject and instructor's consent.

NUTR S 4970--Nutrition Capstone: Sports Nutrition (2). Integration of research literature with knowledge from previous coursework, emphasis on sports nutrition research, nutrient requirements of athletes, critical evaluation of ergogenic aids. Prerequisites: STAT, NUTES 2340, Physiology, Senior Standing, open to Nutrition and Fitness majors only. Graded on A/F basis only.

NUTR S 4975--Practice of Dietetics Supervised Practice Experience (10). Supervised practice in providing quality nutrition services in clinical, community, management and long-term care settings. 40 hours of supervised practice per week. Prerequisite: NUTR S 4280, 4290, 4380, and 4381; Open to students admitted to the Dietetics Program only.

FACULTY

ASSOCIATE PROFESSOR D. L. Sharpe,
R. O. Weagley, M. J. Zelenak
ASSISTANT PROFESSOR R. Yao, T. Yilmazer
EXTENSION INSTRUCTOR B. J. Procter, A. Zumwalt

Admissions

Students must have a University of Missouri cumulative GPA of at least a 2.5, based on at least 50 credits attempted, and a C (2.0) or better in FINPLN 2183 and FINPLN 3283 to be admitted to the Personal Financial Planning professional program of the department. Other departmental programs require a 2.0 GPA. A grade in the D range is allowed in only one course under the department core and professional specialization. Students must complete the FINPLN Department program assessment in May or December prior to graduation.

Major Program Requirements – Personal Financial Planning (BS HES)

The Department of Personal Financial Planning offers a major in Personal Financial Planning with two emphasis areas: Personal Financial Planning and Personal Financial Management Services. The department also offers a track in E-Consumer Studies. In each option, the student must complete requirements for each phase of the degree program listed below:

- University general education requirements
- College of Human Environmental Sciences graduation requirements
- Major core courses
- Professional specialization

Major core requirements16
FINPLN 2083: Financial Planning Careers 1

FINPLN 2183: Personal and Family Finance	3
FINPLN 2185: Consumer as Entrepreneur	3
FINPLN 4188: Community Agencies and Volunteerism	3
FINPLN 3287: Consumer and Household Economics I	3
FINPLN 4380: Assessing the American Dream	3

Note: The Personal Financial Planning major requires students to complete PSYCH 1000, SOCIOL 1000, ECONOM 1014 and ECONOM 1015, (or AG EC 1041 and AG EC 1042) within the social and behavioral sciences requirement. ECONOM 1014 and 1015 require a minimum grade of C (2.0).

Emphasis in Personal Financial Planning

The Personal Financial Planning emphasis is registered with the Certified Financial Planner Board of Standards. This emphasis satisfies the academic requirements for the CERTIFIED FINANCIAL PLANNER™ certification and allows the graduate to sit for the comprehensive CFP® certification examination. Graduates must complete education requirements, pass a national professional exam, obtain professional experience, and agree to adhere to the professional code of ethics before being able to use the CFP® marks.

 These courses are selected by students from a list of approved courses to complement their degree. Contact the Student Services Office of the College of Human Environmental Sciences for examples of how students are able to focus their additional credits in a specific area, while satisfying either the requirements for a minor from the College of Business or the Department of Economics.

Track in E-Consumer Studies

This track prepares students to conduct consumer-oriented/customer-focused market research to be applied in an electronic retail environment. Students are prepared for numerous occupations in which understanding consumer tastes and preferences is necessary for product positioning and sale. (Note: Tracks do not appear on transcripts or diplomas.)

Minor in Personal Financial Management Services

Students can minor in Personal Financial Management Services to complement their degrees in journalism, business, arts and science or other disciplines that provide expertise in matters related to personal financial management. A specific agreement exists with both the Department of Agricultural Economics and the Department of Finance that allows students from those departments to complete a set of specific courses and be awarded a minor in Personal Financial Management Services. Upon graduation the students have completed a CFP® Board Registered Program, allowing them to sit for the CFP® certification examination.

PERSONAL FINANCIAL PLANNING COURSES

FINPLN 1183--Financial Survival (1).Examines financial management issues needed to survive the critical college years-credit/credit cards, budgeting/planning, financial aid, loans, common financial mistakes, debt management, setting financial goals, effective use of financial resources. Graded on S/U basis only.

FINPLN 2083--Financial Planning Careers (1).This course will provide the student with a broad, general introduction to careers in financial planning. Through readings, introspection, discussions, and guest speakers, the student will develop an understanding of the field.

FINPLN 2180--Personal and Family Management (3).Principles of resource management for achieving life satisfaction, with emphasis on interpersonal interaction, balancing career and family demands. Uses family systems perspective. Prerequisites: ENGLSH 1000, and sophomore or above standing.

FINPLN 2183--Personal and Family Finance (3).Individual and family finance, with particular emphasis on financial planning, savings, insurance, investments, taxes, use of credit, and financial aspects of housing. Prerequisites: MATH 1100/1120 with grade of C or above, and sophomore or above standing. Math Reasoning Proficiency Course.

FINPLN 2185--Consumer as Entrepreneur (3).The American economic system and marketplace from both a consumer and an entrepreneurial perspective.

FINPLN 3282--Financial Counseling (3).Practical course on client financial counseling. Includes development of sales techniques and training, focus on personality strengths and weaknesses, creation of the sales process, and the role of technology in counseling. Prerequisite: FINPLN 2183 or instructor's consent.

FINPLN 3283--Financial Planning: Computer Applications (3).Development of expertise in analyzing family financial case situations via applications of the mathematics of finance, utilizing computer spreadsheets and family financial management software. Prerequisites: FINPLN 2183.

FINPLN 3285--Financial Planning: Real Estate (3).Family housing and real estate investments as components of the family's quality of life and asset portfolio. Prerequisites: FINPLN 3283; 5-6 hours of ECONOM; STAT 1300 or 2500.

FINPLN 3287--Consumer and Household Economics I (3).Theory, concepts, principles underlying consumer decision-making, including rationality, uncertainty, optimal search, heuristics, interactive decisions; strategies for their application in the marketplace. Prerequisites: 5-6 hours of ECONOM.

FINPLN 4000-Problems in Personal Financial Planning (cr.arr.).Supervised and independent work. Prerequisites: a 2000- or

3000-level course in field of problem, and senior standing, and instructor's consent.

FINPLN 4183--Sales Management (3).Prepares students to enter financial service occupations dependent upon sales and sales management. Attention given to skill development, evaluation of current and best practices. Prerequisites: junior standing; acceptance into professional program; FINPLN 2183, pre or co-requisite FINPLN 3283 or instructor's consent.

FINPLN 4187--Tax Planning (3).Principles, current law and practice of income taxation and its impact on personal financial planning for individuals, couples and families in their roles as investors, employees, and business owners. Graded on A/F basis only. Prerequisites: FINPLN 2183, FINPLN 3283, ACCTCY 2010 or equivalent or instructor's consent.

FINPLN 4188--Community Agencies and Volunteerism (3).Service learning in a non-profit community social support agency. Examines economic role of non-profits and volunteerism. Students engage in service and evaluate experience in seminar. Pre/corequisites: FINPLN 3282, FINPLN 4187/7187 or instructor's consent. Graded on A/F basis only.

FINPLN 4318--Topics in Personal Financial Planning (cr.arr.).Selected current topics in field of interest. Prerequisites: vary with topic.

FINPLN 4355--Recent Trends in Personal and Financial Planning (1-3).For upper-class and graduate students who wish additional knowledge and understanding in specific subject matter areas. Prerequisites: vary with the topic.

FINPLN 4380--Assessing the American Dream (3).A systems perspective examining ways choice and culture shape American levels and standards of living. The impact of trends in personal and family values, technology the economy, mass media and social movements on household resource management. Prerequisite: ENGLSH 1000 and junior standing or instructor's consent.

FINPLN 4382--Financial Planning: Risk Management (3).Analysis of family financial risks and conservation of family assets via risk management, with primary focus on personal lines of insurance. Prerequisites: FINPLN 3283; 5-6 hours of ECONOM; STAT 1300 or 2500.

FINPLN 4383--Financial Planning: Investment Management (3).Introduction to investment for family financial planning. Prerequisite: FINPLN 3283; 5-6 hours of ECON; STAT 1300 or 2500; ECONOM 3229 or consent.

FINPLN 4386--Financial Planning: Employee Benefits and Retirement Planning (3).Fundamentals of employee benefits and retirement planning. Consideration of options via government, employer, financial markets. Special circumstances of women, part-time, and contingent workers considered. Prerequisites: FINPLN 4382, 4383, or instructor's consent.

FINPLN 4387--Consumer and Household Economics II (3).Theory of economic behavior examining the household as both consumer and producer of goods and services, human capital investments, intertemporal decisionmaking, and use of comparative studies to examine price and income effects. Prerequisite: FINPLN 3287 or ECONOM 3251; STAT 1300 or 2500.

FINPLN 4388--Effective Consumer Decision-Making (3).Theory, concepts, principles underlying consumer decision-making, including rationality, uncertainty, optimal search, heuristics, interactive decisions; strategies for their application in the marketplace. Prerequisites: 5-6 hours of ECONOM.

FINPLN 4389--Financial Planning: Case Analysis (3).The course emphasizes the use of analytical tools to develop effective financial plans for individuals and households. Prerequisites: FINPLN 4187, 4382, 4383 or instructor's consent.

FINPLN 4393--Financial Planning: Estate and Gift Planning (3).Fundamentals, practical problems and solutions in basic estate and gift planning, business succession planning, and taxation issues. Prerequisites: FINPLN 4382 and 4383 or instructor's consent.

FINPLN 4418--Topics in Personal Financial Planning (cr.arr.).Selected current topics in field of interest. Prerequisites: instructor's consent.

FINPLN 4483--Financial Success (1).Examines financial management issues needed to survive the critical post-college years - managing educational debt; after-school budgeting; auto, health, and other forms of insurance; retirement planning and other investment issues; setting financial goals; effective use of financial resources. Graded on S/U basis only.

FINPLN 4992--Readings in Personal Financial Planning (cr.arr.).Prerequisite: 2-3 hours in subject.

FINPLN 4993--Internship in Personal Financial Planning (cr.arr.).Prerequisites: junior standing and instructor's consent.

FACULTY

PROFESSOR K. G. Dickerson, L. E. Wilson
ASSOCIATE PROFESSOR P. S. Norum
ASSISTANT PROFESSOR L. Boorady, J. Ha-Brookshire,
B. Harben

The Department of Textile and Apparel Management focuses on the global production, distribution, and consumption of softgoods. The department differs from many others in that it stresses preparation for product development management, combining knowledge related to a specific commodity with marketing and management skills. Within the context of the human environment, the program also focuses on consumer needs and wants, including service and satisfaction.

Students who major in Textile and Apparel Management may choose from several options and tracks:

Business studies:

- Apparel Marketing and Merchandising
- Apparel Product Development and Management

International Studies:

- International Apparel Marketing and Merchandising
- International Apparel Product Development and Management

E-Consumer Studies:

- E-Consumer

*(Note: Tracks do not appear on transcripts or diplomas.)

Students who want to explore Textile and Apparel Management may take the following classes:

- T A M 1100: Introduction to the Textile and Apparel Industry
- T A M 1200: Basic Concepts of Apparel Design and Production
- T A M 1300: Softgoods Retailing

T A M 1400: Softgoods Consumer Behavior

Major Program Requirements - Textile and Apparel Management

The following courses are required of all students majoring in TAM. Students majoring in Textile and Apparel Management may not take departmental courses using the Pass/Fail grading option. See the following sections for descriptions of additional requirements for the options in business studies and international studies. In addition to college and department requirements, students must meet all University graduation requirements including University general education.

Major core requirements	28
T A M 1100: Introduction to the Textile and Apparel Industry	3
T A M 1200: Basic Concepts of Apparel Design and Production	3
T A M 1300: Softgoods Retailing	3

Dept. of Textile and Apparel Management

¹ Course required for a Business minor-apply at 111 Cornell Hall. At least 15 of the 18 total hours must be taken in residence at the University of Missouri-Columbia. A student is able to use only one transfer course from another institution for the minor and it must be below the 3000 level. To earn the business minor, students must have at least a 2.0 GPA in the required courses. If a student has taken more than 18 business hours, all business courses taken will be included when calculating the business minor GPA. Both Accounting courses must be either both from MU or both transferred.

Track in International Studies

The international studies tracks are designed to provide students with tools and sensitivities required to function in intellectual and applied environments outside their own. Tracks are available in Apparel Product Development and Management and in Apparel Marketing and Merchandising. Tracks and options do not appear on transcripts or diplomas.

Track in E-Consumer Studies

The Department of Textile and Apparel Management offers a program in e-consumer studies in cooperation with the Department of Personal Financial Planning. Check the degree requirements under the Department of Personal Financial Planning.

Minor in Textile and Apparel Management

The undergraduate minor requires a minimum of 18 semester hours, with at least six hours at the 2000 level or above. Prerequisites for all courses must be met, or student must have permission of instructor. The required hours within each content area are shown below.

Apparel Industry Studies

General

T A M 1100: Introduction to the Textile Apparel and Industry	
T A M 3100: Fundamentals of E-Commerce	
T A M 2400: Global Consumer	
T A M 3110: Textiles and Apparel in the Global Economy	
T A M 3410: The Clothing/Textile Consumer: Research and Analysis	
T A M 4100: Electronic-Commerce Applications	

Apparel Merchandising & Retailing

T A M 1300: Softgoods Retailing	
T A M 4310: Global Retailing	
T A M 4990: Retail Marketing and Merchandising	

Apparel Manufacturing Management

T A M 1200: Basic Concepts of Apparel Design and Production	
T A M 2280: Apparel Production	
T A M 3280: Principles of Apparel Manufacturing	
T A M 4110: Global Sourcing	
T A M 4980: Apparel Production Management	

Textiles.....

T A M 2200: Textiles	
----------------------	--

Historical/Behav. St. in Dress.....

T A M 3510: History of Western Dress	
T A M 2500: Social Appearance in Time and Space	
T A M 4500: History of Textile Manufacturing and Trade	
T A M 4510: 19th and 20th Century Dress	

Specialty Area

These courses are to be selected in consultation with a T A M advisor, and should come from the list above.

TEXTILE AND APPAREL MANAGEMENT COURSES

T A M 1100--Introduction to the Textile and Apparel Industry (3).Surveys the development, production and marketing of softgoods merchandise from concept to consumer.

T A M 1200--Basic Concepts of Apparel Design & Production (3).Introduction to design techniques, coordination of fabric with design, selection of support materials, and basic understanding of garment assembly operations.

TAM 1300--Softgoods Retailing (3).Surveys merchandising and retailing principles with specific applications to the softgoods industry. Prerequisite: TAM 1100

TAM 1400--Softgoods Consumer Behavior (3).Analysis of softgoods consumer behavior; softgoods consumption's contribution to the broader social world; models of consumer behavior which underscore the complex inter-

relationships between the individual softgoods consumer and his/her social reality.

T A M 2120--Professional Seminar (1). Exploration of issues in professional activity/success including: evaluating opportunities, oral and written communication for presenting oneself, the articulation of professional/private life, and professional ethics. Prerequisites: second semester junior, first semester senior, or prior to internship.

T A M 2200--Textiles (3).Textile fibers and their processing related to usage, selection, care, and performance of end products. Strong emphasis on practical application of various textiles that are fundamental to human lives. Graded on A/F basis only

TAM 2210--Patternmaking (3).A beginning course in the methods of pattern drafting. Methods explored include: flat patterning, draping,

and theatrical patterning techniques. Graded on A/F basis only. Prerequisites: TAM 2280 or THEATR 1340 and instructor's consent.

T A M 2211--Patternmaking Lab (1).Beginning course in the methods of pattern drafting including flat patterning and Computer Aided Patternmaking. Graded on A/F basis only. Prerequisites: TAM 2280 or THEATR 1430. Must be taken concurrently or after 2210.

T A M 2280--Apparel Production (4).Introduction to sewn products industry applications in which students assemble sample garments and products on industrial equipment. Order of operations is emphasized and industry specific software is introduced. Prerequisite: T A M 1200 or taking concurrently and T A M 2200.

T A M 2300--Retail Finance and Merchandise Control (3).Emphasizes assortment and financial planning utilizing computer applica-

tions in the retail environment. Prerequisites: T A M 1300, MATH 1100/1120 and computer familiarity. Math Reasoning Proficiency Course.

T A M 2400--Global Consumers (3).This course uses consumer behavior and cultural frameworks, integrated with critical and creative thinking processes to develop global perspective that is sensitive to diverse consumers' needs and preferences for products and services in the global marketplace. Graded on A/F basis only.

T A M 2500--Social Appearance in Time and Space (3).An investigation of the motives and meanings that individuals negotiate through the use of dress in presenting themselves as players in complex social contexts. The emphasis is on cross-cultural, historical, and contemporary settings. Prerequisite: ENGLISH 1000.

T A M 3001--Recent Trends in Textiles and Apparel Management (1-3).For upper-class students who wish additional knowledge and understanding in specific subject matter areas.

T A M 3100--Fundamentals of E-Commerce (3).An overview of the development, present status, barriers, and future e-commerce from a managerial point of view. Prerequisite: junior standing.

T A M 3110--Textiles and Apparel in the Global Economy (3).Economic, social, and political dimensions of the textile complex and trade in a global economy; implications for production, distribution, and consumption of products. Prerequisite: T A M 1100 and 6 hours of economics.

T A M 3120--Apparel Manufacturing and Merchandising (3).Investigation of the complex interaction of manufacturing, marketing, and merchandising in the apparel industry, achieved through instructional and experiential study. Includes study trip. Additional fees required. Prerequisite: T A M 1200 or 2200, minimum 2.5 GPA required, and instructor's consent.

T A M 3140--Apparel Manufacturing and Merchandising (3).Investigation of the complex interaction of manufacturing, marketing, and merchandising in the apparel industry, achieved through instructional and experiential study. Includes study trip. Additional fees required. Prerequisite: T A M 1200 or 3280, minimum 2.5 GPA required, and instructor's consent.

T A M 3210--Computer Aided Design (3).Use of computer aided design technology to create designs for textiles and apparel. Prerequisite: Consent of instructor.

T A M 3280--Principles of Apparel Manufacturing (3).A study of the apparel manufacturing industry including the decision making involved in marketing, merchandising, and producing apparel. Prerequisites: T A M 1200, T A M 2200 or instructor's consent.

T A M 3281--Principles Apparel Manufacturing Lab (1).Emphasis on computer technology applications using the Gerber systems of digitizing, marker making, and system management (models and orders). Should be taken concurrently with T A M 3280.

T A M 3400--Clothing, Behavior, and Society (3).Utilization of contextual perspective to examine and to understand use of clothing as a tool in symbolic interaction. Prerequisite: T

A M 2500 or instructor's consent.

T A M 3410--The Clothing/Textile Consumer: Research and Analysis (3).Examines the effects of economic, social and marketing factors on the clothing consumption process. Legislative and quality issues related to clothing and textiles are also discussed. Prerequisites: 3 hours of merchandising or marketing or microeconomics; 3 hours in statistics.

T A M 3510--History of Western Dress (3).Surveys the history of Western dress from pre-history through the 18th Century. Prerequisite: ENGLISH 1000.

T A M 3949--Study Abroad in Textile and Apparel Management (3).International experience of textile and apparel management, including visitation of foreign industries, government agencies, and cultural/historical sites. Destination may vary. Course may be repeated up to 3 times. Prerequisite: Instructor's consent; Minimum GPA of 2.5. Graded on A/F basis only.

T A M 4001--Topics in Textiles and Apparel Management (cr.arr.).Selected current topics in field of interest.

T A M 4085--Problems in Textiles and Apparel Management (cr.arr.).Selected current problems in field of interest. Prerequisites: junior standing and instructor's consent.

T A M 4087--Seminar in Textiles and Apparel Management (1-4).Reports and discussion of recent work in area of concentration.

T A M 4100--Electronic Commerce Applications (3).Integration of theory, design, management, and application processes used in Electronic Commerce. Prerequisite: T A M 3100.

T A M 4110--Global Sourcing (3).Global sourcing refers to how and where manufactured goods or components will be procured. In today's global softgoods industry, sourcing has become a major competitive strategy for both manufacturers and retailers. Graded on A/F basis only. Prerequisite: T A M 3110.

T A M 4130--Supply Chain Management (3).This course examines how the supply chain management can be used to gain a competitive advantage in the softgoods industry. Prerequisite: T A M 3110 and junior standing.

T A M 4140--Web-Based Marketing Research (3).This project-oriented course will focus on principles of marketing research applicable to textile/apparel online environments. Students will learn how to develop, utilize, and analyze web-based research. Prerequisites: 3 hours of statistics and junior standing.

T A M 4300--Softgoods Brand Management (3).Management of branded product lines produced by textile and apparel firms; strategic implications of the development of brand equity toward increasing customer loyalty. Prerequisites: T A M 1100 or 1300 and MRKTNG 3000.

T A M 4310--Global Retailing (3).This course will examine how to apply retail concepts and activities to overseas markets, how to evaluate potential overseas markets, and how to develop global retail strategies. Prerequisite: T A M 1300.

T A M 4500--History of Textile Manufacturing and Trade (3).Focuses on changing issues affecting the textile and apparel industry today and examines those issues from both historic and current perspectives. Prerequisite: T A M 2500 or T A M 3510 or instructor's consent.

T A M 4510--19th and 20th Century Western Dress (3).A study of nineteenth and twentieth century Western dress as influenced by time, place, and culture. Prerequisites: T A M 2500 or T A M 3510, or THEATR 1320 or instructor's consent.

T A M 4949--Field Training in Textiles and Apparel Management (cr.arr.).Practical aspects of internship experience coordinated with the university curriculum. Available for various areas of emphasis. Prerequisites: 2.5 GPA, T A M 2120, instructor's consent, and necessary prerequisite for area of emphasis.

T A M 4960--Readings in Textiles and Apparel Management (cr.arr.).Selected current readings in field of interest. Prerequisites: senior standing and instructor's consent.

T A M 4980--Apparel Production Management (4).Examination of issues and management strategies necessary to produce a competitively priced apparel product of high quality. Graded on A/F basis only. Prerequisites: T A M 2280, T A M 2210, and junior standing or above.

T A M 4990--Retail Marketing and Merchandising (3).Analytical management techniques appropriate for evaluation of retailing productivity. Emphasis on the use of these techniques and others in the development of a comprehensive retail marketing strategy. Prerequisites: T A M 2300, ACCTCY 2036 and 2037, MRKTNG 3000.

Social work is a dynamic and growing human service profession that plays an increasingly important and visible role in our everyday lives. The major educational objective of the undergraduate program in the School of Social Work, which is a unit in the College of Human and Environmental Sciences, is to prepare students for competent and skillful first-level professional social work practice.

The Bachelor of Social Work (BSW) professional program is built upon a rigorous liberal arts foundation that prepares students for general practice in social work. Within this framework, students are prepared to apply a configuration of knowledge, values and skill to a variety of individual, family and community problems to effect positive change.

The School of Social Work is accredited by and a charter member of the Council on Social Work Education. BSW students and graduates are eligible for membership in the National Association of Social Workers.

Career & Employment Outlook

Jobs in social work are expected to grow faster than average into the 21st century. Through social work's unique person-in-environment focus, BSW graduates are prepared to work effectively with individuals, families, small groups, communities and organizations.

Graduates are employed in many different settings, including

nursing homes, hospices, hospitals, home care agencies, family service agencies, children and youth services, aging services, residential treatment programs, domestic violence shelters, criminal justice agencies, schools, and legal services agencies.

Graduation Requirements

A minimum of 120 credits with a GPA of 2.5 is required for graduation. The requirements include liberal arts foundation courses, professional BSW core courses and general electives. Students must have a grade of C+ or better in all required social work core classes.

The Professional BSW core consists of 46 credits. BSW core courses are offered only once each year in sequence and require three semesters to complete. In the third semester of the BSW core, each student spends three full days a week in a social service agency for supervised field instruction.

Admission to the School of Social Work

Students in good academic standing may declare a social work major. Students are required to complete a range of courses in liberal arts as foundation to the BSW professional program and as electives.

Admission to the BSW professional program is competitive. Students may apply early in the spring semester for fall admission to the BSW professional program social work core if they meet the following criteria:

- At least 42 credits completed (second semester sophomore status) by the application deadline and
- 55 credits expected before the beginning of the first semester (fall) of the BSW core
- 2.5 cumulative GPA
- Completion of required liberal arts prerequisite courses (denoted with *) with minimum grades
- Submission of BSW Professional Program application, including essay and 3 references by early deadline of February 1 or late deadline of June 15.

Students wanting to explore social work as a major may take the following exploratory courses:

- SOC WK 1110: Introduction to the Social Work Major
- SOC WK 1115: Social Welfare and Social Work

Required Entry-Level Courses

Specific liberal arts requirements for graduation are listed below (* denotes a prerequisite course to the BSW professional program that must be completed before beginning social work core courses).

Degree core requirements

English Composition (grade must be C range).....3

*ENGLSH 1000 3

Writing intensive classes6

Students accepted into the professional BSW program must take SOC WK 2220 and 4951, both designated "WI." No additional "WI" courses are required.

Humanities (grades for communication and philosophy must be in the "C" range).....9

*COMMUN 1200 3

*PHIL (1000, 1100 or 1200 recommended)..... 3

Additional humanities 3

Humanities include art and music history and appreciation

classes, classical studies courses, foreign civilization courses, literature courses in English or other languages and religious studies courses. Applied art and music performance courses do not count toward the humanities requirement. Students are urged to check with their advisor before selecting courses.

Science and Math Reasoning Proficiency.....9

*BIO SC 1010 with a minimum grade in the C range.3
Lab Science AND

Physical or Mathematical Science to reach 9 hours
SOC WK 4310, ECS PS 4710, STAT 1200 and 1300 are

approved for social work students.

College Algebra3

*MATH 1100/1200.....3

Note: One course in humanities or biological, physical or mathematical sciences must be at the 2000 level or higher.

Social science (minimum grade for economics and government must be in the C range)12

*Economics (micro or macroeconomics).....3

*Anthropology (student’s choice)3

History.....3

Political Science3

*One course from either history or political science must meet the state government requirement; may be satisfied by POL SC 1100, 1700 or 2100; or HIST 1100, 1200, 1400, 2440, 7000, 4220, 4230

Behavioral science (grades for sociology and psychology must be in the “C” range).....15

*SOCIOLOG 10003

*PSYCH 10003

SOCIOLOG 3310 OR PSYCH 23103

Theories of personality course (SOC WK 3320 or PSYCH 4310)3

SOC WK 2220: Human Behavior and the Environment

Cultural, ethnic and racial diversity6

Two courses that reflect the cultural diversity of our society; often selected from social work, sociology, anthropology, peace studies, english, foreign civilizations, religious studies and human development and family studies, black studies and women and gender studies. SOC WK 2000: Explorations in Social and Economic Justice, is strongly preferred as one of the courses. Students are urged to check with their advisor before selecting courses.

Electives to reach 120 credits

In addition to the above liberal arts requirements and the 46-credit Professional BSW Core (inclusive of SOC WK 2220), students select electives to reach the total credit requirement. SOC WK 1115: Social Welfare and Social Work is strongly recommended.

Social work requirements.....46

SOC WK 2220: Human Behavior and the Environment3

SOC WK 4710: Social Justice and Social Policy3

SOC WK 4711: Social Justice and Social Policy II.....3

SOC WK 4720: Variations in Human Behavior3

SOC WK 4730: Introduction to Social Work Practice.....3

SOC WK 4770: Strategies of Direct Practice3

SOC WK 4740: Introduction to Community and

Organizational Processes.....4

SOC WK 4750: Interaction Skills Workshop3

SOC WK 4760: Theory and Practice of Social Group Work..3

SOC WK 4951: Research for Social Work Practice3

SOC WK 4952: Research Methods for Social Work.....3

SOC WK 4971: Undergraduate Field Practicum.....6

SOC WK 4970: Senior Professional Seminar.....3

Social work elective (4000-level) in a field of practice3

Capstone Requirements

All students accepted into the professional BSW program must take SOC WK 4971: Undergraduate Field Practicum and SOC WK 4970: Senior Professional Seminar as their capstone experience.

Basic Skills Credit Limitations

No more than 4 credits may be taken from “skills” courses to count toward the required 120 credits. More skill classes may be taken, but will be in excess of the 120 credits. Examples of skills courses are applied art and music performance classes, computer skills, self-defense and first aid.

Departmental Honors

Candidates for departmental Honors must be students in the BSW professional program with a 3.5 or higher GPA. Students must complete honors designated sections of SOC WK 4951: Research for Social Work Practice and SOC WK 4952: Research Methods for Social Work.

Minor in Social Justice

The social justice minor is designed to give non-social work majors the opportunity to develop knowledge and understanding about social justice in the person-environment context. Social justice involves the idea that in a perfect world all citizens would have identical social benefits, protections and opportunities regardless of their backgrounds and membership in diverse groups. Recognizing that the world is not perfect, the primary goals for the minor in social justice are to enhance sensitivity to vulnerable and at-risk populations, to provide opportunity for critical review of social policies and the allocation of societal resources and to stimulate interest in advocacy and the planned change process.

Students who complete the social justice minor may not refer to themselves as BSW-level social workers upon graduation.

A minimum of 15 credits, comprised of the courses below, is required to complete the social justice minor.

Minor core requirements9

SOC WK 1115: Social Welfare and Social Work.....3

SOC WK 2220: Human Behavior and the Social

Environment.....3

SOC WK 2000: Exploration in Social and Economic

Justice OR

SOC WK 4710: Social Justice and Social Policy.....3

Social work electives (choose from)6

SOC WK 4330: Addiction Treatment and Prevention

SOC WK 4360: Working with Minority Youth

SOC WK 4370: Delinquency, Corrections and Social

Treatment

SOC WK 4380: Social Work Practice with Minorities:

African American Emphasis

SOC WK 4390: Helping Strategies with Children and

Adolescents

SOC WK 4400: Domestic Violence

SOC WK 4410: Law and Social Work Practice

SOC WK 4450: Introduction to Child Welfare Practice

and Services

SOC WK 4455: Latino/a Immigrants in Receiving

Communities

SOCIAL WORK COURSES

SOC WK 1101--Topics in Social Work (1-3). Special and emerging topics in social work and social welfare. Subject, content and credit varies depending on available faculty and student interest. For undergraduate students only.

SOC WK 1110--Introduction to the Social Work Major (1). Students examine their interest in social work and other human service professions; learn of career possibilities in their interest area; and develop an educational plan to reach their goal. Prerequisite: freshman or sophomore standing.

SOC WK 1115--Social Welfare and Social Work (3). Survey course that examines the history and development of social welfare in the United States and the profession of social work, as well as contemporary issues.

SOC WK 2000--Exploration in Social and Economic Justice (3). This course explores issues of fairness and equality in economic, political and social systems, and applies social

justice principles to major social problems. Graded on A/F basis only. Course may be repeated two times for credit.

SOC WK 2101--Topics in Social Work (1-3). Special and emerging topics in social work and social welfare. Subject, content, and credit varies depending on available faculty and student interest. For undergraduate students and graduate students outside the school. Prerequisite: consent required.

SOC WK 2220--Human Behavior and the Environment (3). The first of two required courses providing an introduction to selected theories, multidisciplinary knowledge, and perspectives into human development and behavior. Prerequisite: ENGLISH 1000 or sophomore standing. Graded on A/F basis only.

SOC WK 3101--Topics in Social Work (1-3). Special and emerging topics in social work and social welfare. Subject, content and credit varies depending on available faculty and student interest. For undergraduate and graduate

students. Prerequisite: consent required.

SOC WK 3310--Comparative Social Policy (2-3). A comparative study of social policy aspects in the framework of international development. Policy areas include South Asia, as well as other regions relevant to such study. Prerequisite: consent required.

SOC WK 3320--Understanding Personality in a Social Context (3). Introduces students to diverse personality theories and examines background, key concepts, motivation, structure, development dynamics and applications of each theory in a social context. Required of all undergraduate social work majors.

SOC WK 3330--Medical Social Problems (2). Interrelations of biological, psychological, social factors in understanding people with common physical illnesses. Prerequisites: junior standing and instructor's consent.

SOC WK 3340--Dynamics of Interviewing (3). Analysis of interviewing techniques employed in communication for securing reliable,

valid data to modify behavior in accordance with professional objectives. Prerequisites: junior standing and consent required.

SOC WK 3350--Problems in Social Work (1-3). Research and independent study projects offered on a tutorial basis to undergraduate social work students. Prerequisites: consent required.

SOC WK 4101--Topics in Social Work (3). Special and emerging topics in social work and social welfare. Subject, content and credit varies depending on available faculty and student interest. For undergraduate and graduate students. Prerequisite: consent required. May be repeated for credit

SOC WK 4300--Women and Health Care (3). Provides a study of the role of women as health care providers and an analysis of the impact of value systems and the women's movement on the organization and delivery of health services to women.

SOC WK 4310--Social Statistics (4). Descriptive, analytic techniques applied to qualitative and quantitative social data. Prerequisite: sophomore standing. Math Reasoning Proficiency Course.

SOC WK 4320--Rural Human Services (3). A study of the effect of rural and small community environments on the planning and delivery of social and health services. Emphasis on policy and program analyses relevant to rural issues and concerns. Prerequisite: junior standing.

SOC WK 4330--Addiction Treatment and Prevention (3). Provides knowledge generic to social work and other disciplines involved in substance abuse treatment. Integrated approach to problems of substance abuse and development of self-awareness are emphasized. Didactic and experiential methods employed. Prerequisite: junior standing.

SOC WK 4350--Deaf Culture: A Social Work Perspective (3). An introduction to the deaf community as a linguistic and cultural minority. Examines the complexities of Deaf culture from a historical and contemporary perspective. Addresses cultural identity, communication, education, social services, civil rights and advocacy. Graded on A/F basis only.

SOC WK 4360--Working with Minority Youth (3). (same as Black Studies 4360). Develops awareness and understanding of social/psychological and cognitive realities influencing the behavior of minority youth. Content draws upon theories, research and practice skills relevant to understanding and counseling minority youth. Prerequisite: junior standing.

SOC WK 4370--Delinquency, Corrections and Social Treatment (3). Focuses on problems and causative factors in developing and maintaining delinquent and criminal behavior and attitudes: addressing critical and comparative understanding of social change strategies employed in this field. Prerequisite: junior standing.

SOC WK 4380--Social Work Practice With Minorities: African-American Emphasis (3). (same as Black Studies 4380). Provides students with an appreciation of the African-American experience in the United States on a knowledge and feeling level. Prerequisite: junior standing.

SOC WK 4390--Helping Strategies With Children and Adolescents (3). Theory and

practice of work with children and adolescents. Focus on youth in transition, protective services and permanency planning, and special needs populations. Prerequisite: junior standing.

SOC WK 4400--Domestic Violence (3). (same as Women's and Gender Studies 4400). This 3-hour course covers history of battered women's movement, violence theories, policy issues, prevention and intervention practice models for working with battered women, their children, and abusers. Prerequisite: junior standing

SOC WK 4410--Law and Social Work Practice (3). Legal processes relevant to social work practice and court procedures, and study of decisions affecting social work across micro and macro practice. Prerequisite: junior standing.

SOC WK 4450--Introduction to Child Welfare Practice and Services (3). Introductory course designed to develop the student's awareness, understanding and appreciation of the field of child welfare and specifically of its most critical function: child protection. Prerequisite: junior standing.

SOC WK 4455--Latino/a Immigrants and Receiving Communities (3). This interdisciplinary course is designed to educate students about the Latino/a immigrants seeking better lives and the communities that receive them. Special attention is given to social justice issues; micro, mezzo, and macro systems will be used to explore content.

SOC WK 4710--Social Justice and Social Policy (3). Based on the concepts of human need and social justice, a historical and analytical approach to social welfare policies and programs. Graded on A/F basis only. Prerequisites: junior standing and consent required.

SOC WK 4711--Social Justice and Social Policy II (3). Advanced course in the analysis of policies and programs relevant to social work and social welfare. Prepares students to understand and conduct policy analysis of public, voluntary, and proprietary human service organizations. Prerequisites: SOC WK 4710. Social Work Professional Standing. Graded on A/F basis only.

SOC WK 4720--Variations in Human Behavior (3). Basic concepts and principles regarding psychological/social dynamics of deviance; implications for social welfare policy and social interventions. Prerequisites: junior standing and consent required.

SOC WK 4730--Introduction to Social Work Practice (3). Introductory, generalist practice theory course promoting student's understanding of professional social work practice as holistic, identifiable, unique configuration of knowledge, values and skills. Graded on A/F basis only. Prerequisite: Social Work Professional standing and consent required.

SOC WK 4740--Introduction to Community and Organizational Processes (4). Introduction to contextual framework of social work practice with particular emphasis on community and organization as social systems. Graded on A/F basis only. Prerequisite: Social Work Professional standing and consent required.

SOC WK 4750--Interaction Skills Workshop (3). Generalist practice at individual, group and community levels. Group communication and social influence theories address generic and

unique aspects of interaction across systems. Uses laboratory instruction. Graded on A/F basis only. Prerequisites: Social Work Professional standing and consent required.

SOC WK 4760--Theory and Practice of Social Group Work (3). Focuses on small group dynamics and models of group work practice suitable in all social work fields. Emphasizes practice theory and skills. Graded on A/F basis only. Prerequisites: Social Work Professional standing.

SOC WK 4770--Strategies of Direct Practice (3). Examines social structures, processes: underlying assumptions/concepts of social change, client constellation, organizational arrangements, role relationships by which social workers define professional intervention. Prerequisites: SOC WK 4730 and 4750; third semester professional program standing; consent required. Co-requisite: SOC WK 4971 and 4970. f.

SOC WK 4951--Research for Social Work Practice (3). This course introduces social work research and its relevance to practice, emphasizing the School of Social Work's social justice mission. Graded on A/F basis only. Prerequisites: Social Work Professional standing or consent required.

SOC WK 4952--Research Methods for Social Work (3). Survey of research methods germane to the development of the knowledge base of social work practice. Graded on A/F basis only. Prerequisites: Social Work Professional standing or consent required.

SOC WK 4960--Special Readings in Social Work (1-3). Extensive readings in selected area or intensive reading in a special field. Prerequisites: consent required.

SOC WK 4970--Senior Professional Seminar (3). Integrative professional practice seminar for BSW students, focusing on the principles of generic social work and its application to direct practice in diverse fields, career planning and responsibilities. Prerequisite: SOC WK 2220, 4710, 4730, 4740, 4750, 4760, and 4720; consent required. Co-requisite: SOC WK 4770 and 4970.

SOC WK 4971--Undergraduate Field Practicum (6). Supervised social work practice in a school-approved agency focusing on development of direct practice skills. Fall semester, three days per week. Prerequisites: senior standing; SOC WK 2220, 4710, 4730, 4740, 4750, 4760, and 4720; consent required. Co-requisite: SOC WK 4770 and 4970. Graded on S/U basis only.

ASSISTANT PROFESSOR (PROFESSIONAL PRACTICE) B. Ifshin, L.W. Powell
ASSOCIATE PROFESSOR EMERITUS H.B. Hager

The world's first School of Journalism was established in 1908 at the University of Missouri to strengthen the effectiveness of public communication in a democratic society. The school's first dean, Walter Williams (who went on to become president of the University in 1930) wrote the Journalist's Creed, which stresses the profession's rights and responsibilities as a public trust.

The faculty is committed to educating students in the responsibilities and skills of the professional journalist. It also has a broader commitment to advance the profession of journalism through scholarly research, analysis and criticism and through special programs to serve practitioners. The school also prepares students for careers in corporate communications through its strategic communication emphasis area. Students in that area typically pursue careers in advertising or public relations or in strategic communication, a combination of those fields.

The Missouri Plan assures a journalism graduate the broad,

liberal education essential for a journalist whose work may span many segments of today's complex society. In addition to a liberal arts education, students complete practical laboratory work in a variety of settings, including a public radio station, a commercial daily newspaper and a network-affiliated television station. The school offers the Bachelor of Journalism, Master of Arts and Doctor of Philosophy degrees, along with cooperative programs with other divisions in the University. It was the first school in the world to offer all three of those degrees.

The Accrediting Council on Education in Journalism and Mass Communication has accredited the undergraduate program and a professional master's degree.

ADMISSIONS

Admission to Journalism

(Effective Fall Semester 2008)

Students must be admitted to the School of Journalism to pursue the Bachelor of Journalism degree. Students are admitted in one of two categories:

Directly Admitted Students. A freshman applicant will be directly admitted to the School of Journalism if he or she meets standard MU admissions requirements and *any one* of the following three criteria:

- Ranks in the top 10 percent of his or her high school class.
- Scores 29 or higher on the ACT Composite.
- Scores 1290 or higher on the math-verbal portions of the SAT.

Pre-Journalism A&S Students. Students accepted by MU who do not meet one of the criteria for direct admission are admitted as pre-Journalism students in the College of Arts and Science and apply for admission to Journalism as the student is completing the fourth journalism course, which is either JOURN 2000: Cross-Cultural Journalism or JOURN 2100: News. That usually occurs in the second semester of the sophomore year as the student is completing 61 credits and all other requirements.

NOTE: All undergraduate admissions to MU are handled by the Office of undergraduate Admissions, not the School of Journalism, and no exceptions are made to the standards for direct admission to Journalism. A student either meets one of the admissions standards or does not. *There is no appeals process for direct admission.*

However, once accepted to MU as a pre-Journalism student, the student may continue to take the ACT or SAT to try to improve his or her score. If the student receives the necessary score for direct admission, once the score is received by the Admissions Office the student may request a change of admissions status. The new test score must be received by the Admissions Office at least one month before the student is to begin classes at MU. Similarly, a student who was admitted outside the top 10 percent of his or her class but who subsequently achieves top 10 percent standing at the end of the senior year of high school may request a change of admissions status. *No change is possible later than one month before the student begins classes at MU.*

Differences in the Admission Categories

Directly admitted students have several advantages over students admitted as pre-Journalism students in the College of Arts and Science. Directly admitted students:

- Advance automatically to upper-class status in Journalism if they maintain a cumulative GPA of record of 3.0 or higher upon completion of 61 credit hours and fulfill all other requirements.
- Are guaranteed admission to the upper-class emphasis area of their choice provided they maintain a cumulative GPA of record of 3.0 or higher.
- Have access to a far larger portion of the School of Journalism's freshman scholarship pool. The School of Journalism annually awards about \$100,000 in scholarships in addition to scholarships awarded by the Admissions Office and others. To apply for all scholarships, including those offered by the School of Journalism, apply through the Office of Financial Aid (<https://sfa.missouri.edu/index.php>). Priority consideration is given to those who apply by Dec. 1.

To continue to enjoy these benefits, directly admitted students are expected to maintain an MU cumulative GPA of 3.0 or higher. Those without GPAs of at least 3.0 after completion of 61 credit hours lose these benefits and will be placed in a pool with pre-Journalism students and considered individually for upper-class status through a process outlined below.

Unlike directly admitted students, pre-Journalism A&S students:

- Are **not** guaranteed to advance to upper-class status in Journalism if they maintain a cumulative GPA of record of 3.0 or higher upon completion of 61 credit hours and after fulfilling all other requirements. Students in this category instead are accepted on a space-available basis. However, to date no one who has earned a 3.0 cumulative GPA or higher has been rejected, and space has been available. The School merely reserves the right to reject students should overcrowding occur in the future.
- Are **not** guaranteed an emphasis area of choice even with a cumulative GPA of record of 3.0 or higher. Admission to the emphasis area of choice is dependent upon space availability.
- Have access to fewer scholarships from the School of Journalism. The school has only four scholarships available to pre-Journalism Arts and Science students. That's because most scholarships are designated for "Journalism students," and pre-Journalism A&S students have not yet been accepted to the School of Journalism. To apply for all scholarships, including those offered by the School of Journalism, apply through the Office of Financial Aid (<https://sfa.missouri.edu/index.php>).

The School of Journalism is eager to accept hard-working pre-Journalism students who earn their way into upper-class status. Many do just that.

Admission to Upper-Class Status and Emphasis Area

As noted above, directly admitted students who maintain a GPA of record of 3.0 or higher and complete the necessary coursework are automatically admitted to upper-class status and their emphasis area of choice upon completion of 61 credits and other requirements for upper-class status.

Students who do not meet the criteria for direct admission and directly admitted students who have not maintained a cumulative GPA of record of 3.0 or higher must apply for upper-class status upon completion of 61 credit hours and fulfillment of all other requirements for upper-class status. Committees of faculty in each emphasis area will review applications for admission, and admission will be by emphasis area based on space available in that program.

GPA alone will **not** be used to evaluate the applications of pre-Journalism students and directly admitted students with GPAs below 3.0. In addition to GPA, the committees will consider a student's stated desire to work in the fields of journalism or strategic communication, demonstrated commitment to journalism or strategic communication (as evidenced by work with student or professional media, high school activities or participation in journalism student groups), needs of the profession, etc. For example, it is possible for a student with a 2.87 GPA who has demonstrated strong commitment to the field to be selected over one with a 2.95 GPA who has shown no similar commitment. Students applying through this process must submit brief letters of application (not to exceed two pages) stating a case for admission to an emphasis area.

The School will attempt to match interests of students applying through this process with openings in the School's various academic disciplines. The School does not guarantee first choice of sequence to students admitted through this process. It may be necessary from time to time to limit enrollment in high-demand areas.

Students who are rejected for upper-class status through this process must transfer to another MU division and will no longer be considered Journalism or pre-Journalism students. If, however, a student subsequently spends a semester taking non-journalism courses and raises his or her cumulative GPA of record above 3.0, the student may reapply. No such application will be accepted after a student has completed 80 or more hours of college credit.

Transfer Student Admissions Standards

Transfer students are admitted to upper-class status in Journalism when they complete 61 credit hours, fulfill all prerequisites and establish a cumulative GPA of record of at least 3.0. Completion of at least one semester at MU is required for transfer students to qualify for admission. Because of that, students who plan to major in Journalism are encouraged to transfer to MU after taking no more than 45 credit hours elsewhere.

Transfer students who have completed 61 credit hours and the necessary coursework but who do not have a 3.0 GPA of record are placed in the same pool of applicants as pre-journalism students and will be considered using the same process. Criteria used in evaluating these applications are similar to those for pre-Journalism applicants and direct admits who do not maintain 3.0 GPAs. The Admissions Committee will review the student's GPA of record as well as a student's stated desire to work in the fields of journalism or strategic communication, demonstrated commitment to journalism or strategic communication (as evidenced by work with student

or professional media, high school or junior college activities, or participation in journalism student groups), needs of the profession, etc. A transfer student in this category also must submit a brief letter of application (not to exceed two pages) stating a case for admission.

Unless otherwise specified by a formal articulation agreement that allows additional hours, up to 64 credits may be transferred from two-year colleges at any time before graduation. Students must also complete 30 of their last 36 hours in MU coursework. The Office of Undergraduate Admissions, not the School of Journalism, determines transfer equivalencies for the University. Transfer students from other accredited schools and colleges in Missouri should check the MU website to see how coursework will transfer to MU or contact the Office of Admissions. Students also should contact an advisor to see how these courses would apply toward a degree at MU. A course taken on a pass/fail basis is accepted only if the MU grading system also allows pass/fail grading in that course. *The School of Journalism does not count any journalism course from another institution toward the Bachelor of Journalism degree either as a requirement or an elective, even if MU accepts the course in transfer.* Many communications courses are similarly rejected and may not be used toward graduation requirements even as electives. Some other courses may not count toward the degree. See the *Undergraduate Handbook* for additional guidance.

Honors Eligibility Upon Admission

The School of Journalism attracts some of the best students at MU. The School encourages high-ability students to enroll in the MU Honors College (<http://honors.missouri.edu>) and take honors courses whenever possible. Such courses are taught by some of MU's best professors.

Most directly admitted students, and a few pre-Journalism students in the College of Arts and Science, qualify for admission to the Honors College. Upon admission as freshmen, directly admitted students are designated Journalism Scholars if they earn a composite ACT score of 29 or higher (1290 or higher on the SAT) and rank in the top 10 percent of their high school graduating classes. Students who meet those criteria qualify for automatic admission to the Honors College but must request honors eligibility by filling out a simple application at the Honors College website (<http://honors.missouri.edu/prospective-students/application.html>). *A student must be admitted to the Honors College to be designated as Journalism Scholar.* Those who score a 29 on the ACT but do not rank in the top 10 percent of their high school classes may petition for honors eligibility by completing the form and writing a brief essay. Decisions to award honors eligibility are made by the Honors College and not the School of Journalism.

Journalism Scholars with ACT composite scores of 33 or higher (1440 or higher on the SAT and who rank near the top of their high school classes, are designated Walter Williams Scholars. More about both scholars programs may be found later in this section.

Designation as a Journalism Scholar or Walter Williams Scholar is noted in the program when a student participates in Commencement exercises.

International Admission

A minimum score of 100 (internet) or 250 (computerized) on the Test of English as a Foreign Language (TOEFL) is required for all pre-Journalism and journalism students whose native language is other than English.

Required Entry-Level Courses

Prior to admission to the School of Journalism, the student must complete a course of study that includes at least 61 credits of work at MU or another accredited two- or four-year institution. The courses listed below are required for students to be admitted to an emphasis area in journalism.

English Composition (3 credits):

☒ ENGLISH 1000: Exposition and Argumentation (3 credits) with a grade of B or better OR a grade of C and a satisfactory score on the Missouri College English Test. AP and IB test credit will satisfy this requirement.

College Algebra (3 credits):

☒ MATH 1120 with a C-range grade is required. Students are exempt from College Algebra with a math ACT sub-score of 26 or better, or math SAT subscore of 600 or better.

Foreign Language (12-13 credits):

☒ Unless students have completed four or more years in a single foreign language in high school, they must complete 12-13 credits in a single foreign language at the college level.

☒ The final 3-credit course may be taken the first semester in an emphasis area in the School of Journalism. In this case, it will count as elective credit. Placement and proficiency exams are available in French, German and Spanish.

☒ If you have four or more years of high school credit and elect to take a lower-level course in the same language, you negate the option of satisfying your language requirement based on high school credit. You must either continue through level 3 or request that the credits for the lower-level course not be counted toward graduation.

Biological, Mathematical and Physical Science (9 credits):

☒ Statistics (3 credits): STAT 1200: Introductory Statistical Reasoning, STAT 1300: Elementary Statistics or its equivalent in transfer may be accepted.

☒ Additional courses (6 credits) from the following areas: biological anthropology, astronomy, biology, chemistry, CECS 1050, geology, math and physics. One course must include a lab.

☒ Note that College Algebra, with a C-range grade, must be the prerequisite for math courses counting in the science area. MATH 1140: Trigonometry, counts as general elective credit only.

Social and Behavioral Science (14 credits):

☒ American History: HIST 1100, 1200, 1400, 1410, 2210 or 2440

American Government OR State Government OR Introduction to Political Science: POL SC 1100, 1700 or 2100.

☒ Economics: ECONOM 1051 OR ECONOM 1014 AND ECONOM 1051 OR AG EC 1041 and AG EC 1015

☒ A 3-credit behavioral science course

☒ Note that ECONOM 1014 is the prerequisite for ECONOM 1015

☒ Note that AG EC does not count toward the Business minor.

Humanistic Studies (9 credits):

☒ Any literature course, including foreign language literature courses.

Additional courses in two of six areas (6 credits):

- ☒ Communication/film studies/theater
- ☒ History or appreciation of art or music
- ☒ Humanities
- ☒ Non-US civilization or classics
- ☒ Philosophy
- ☒ Religious studies

Journalism (10 credits, effective fall semester 2005):

☒ JOURN 1010: Career Explorations must be taken in the freshman year.

☒ JOURN 1100: Principles of American Journalism should be taken in the second semester of the freshman year, after completion of 15 credits, and must be completed with a C-range grade or better. To enroll, students must have a minimum GPA of record of 2.75.

☒ JOURN 2000: Cross-Cultural Journalism should be taken in the sophomore year, after completion of 30 credits, and must be completed with a C-range grade or better. To enroll, students must have completed JOURN 1100 and have a minimum GPA of record of 2.80.

☒ JOURN 2100: News should be taken in the sophomore year, after the completion of 30 credits, and must be completed with a C-range grade or better. To enroll, students must have completed JOURN 1100 and have a minimum GPA of record of 2.80 and B-range grade in English 1000.

☒ JOURN 2100 and JOURN 2000 should be taken in separate semesters.

Word-Processing Skill

Journalism courses require the use of a computer. Students must demonstrate word-processing proficiency. Since the Fall Semester 2005, incoming freshmen are required to purchase wireless laptop computers, which will be needed in many journalism classes.

SPECIAL PROGRAMS

Journalism Scholars Program

Any incoming freshman journalism major who has a composite ACT score of 29 (1290 or higher on the combined math and verbal portions of the SAT) and who ranks in the top 10 percent of his or her high school graduating class qualifies for the following:

- ☒ Direct admission to the Missouri School of Journalism
- ☒ Designation as a Missouri Journalism Scholar
- ☒ Automatic eligibility for the MU Honors College. Students still must complete the Honors College enrollment form for eligibility.

The Walter Williams Scholars Program

The highest-achieving Journalism Scholars win separate designation as Walter Williams Scholars. The Walter Williams Scholars program is named in honor of the school's founding dean, a Missouri newspaper publisher who went on to become president of the University of Missouri. To win acceptance into this circle of top scholars, incoming freshmen must earn an ACT composite score of 33 or higher (1440 or higher on the SAT). Walter Williams Scholars also must rank in the top 20 percent of the high school class or must have maintained a high school GPA of at least 3.25 on a 4.0 scale. In addition to the benefits enjoyed by the Journalism Scholars, benefits to Walter Williams Scholars include the following:

- ☒ Placement in a special housing Freshmen Interest Group
- ☒ The chance to work with individual faculty mentors
- ☒ A \$1,000 scholarship that can be used to study abroad or in the school's New York or Washington, D.C., programs at any time before graduation.

Transfer Credit

The Office of Undergraduate Admissions, 230 Jesse Hall, determines transfer equivalences for the University, including the School of Journalism.

The School of Journalism accepts transfer credit according to the transfer credit equivalency report. Transfer credit from two-year colleges can transfer only as lower-level credit.

Transfer students from other accredited schools and colleges in Missouri should check the web site of the Office of Undergraduate Admissions to see how course work will transfer to MU. https://musis1.missouri.edu/course_equiv/intro.cfm

The school accepts no journalism or communication credits in transfer. In certain instances, students may be excused from repeating some introductory journalism courses but still must complete a minimum of 40 journalism credits at MU. The School does not accept most applied courses in related disciplines such as communication.

Dual-Degree — Bachelor of Arts/Bachelor of Journalism

To receive two bachelor's degrees, a Bachelor of Arts and a Bachelor of Journalism, a student must complete a minimum of 132 credits and complete all of the specific requirements for both degrees. Normally, a minimum of one additional semester is required for both degrees. Each candidate for a dual degree is assigned an advisor in the School of Journalism and in the department of major interest in the College of Arts and Science.

Agricultural Journalism

The College of Agriculture, Food and Natural Resources, in cooperation with the School of Journalism, offers an interdisciplinary Bachelor of Science degree in Agricultural Journalism. This is not considered a dual degree. For more information, see the College of Agriculture, Food and Natural Resources in this catalog.

CONCENTRATIONS

Note: Concentrations are not noted on diplomas or transcripts.

Concentration in Business and Economics Reporting

To obtain the Bachelor of Journalism with a concentration in Business and Economics Reporting, students must meet the following requirements:

- Complete requirements for the print and digital news emphasis
- Pass JOURN 4438: Business and Economics Reporting
- Complete 12 credits in the College of Business or in the Department of Economics

Concentration in Management

To obtain the Bachelor of Journalism with a concentration in Management, students must meet the following requirements:

- Complete JOURN 4978: Media Management and Leadership
- Complete 12 credits in the College of Business; the following

courses are highly recommended:

- ACCTCY 2037: Accounting II
- MANGMT 4020: Human Resource Management
- MANGMT 4420: Collective Bargaining
- MANGMT 4030: Organizational Behavior
- MRKTNG 3000: Principles of Marketing
- MRKTNG 4000: Marketing Management
- FINANC 3000: Corporate Finance

- Complete one of the following courses in the School of Journalism:
 - JOURN 4220: Creative Portfolio
 - JOURN 4250: Management of Strategic Communications
 - JOURN 4710: Newspaper Management

Public Affairs Journalism

The program in Public Affairs Journalism prepares students for graduate work. Political science students with a minimum of 60 credits and 3.0 or above cumulative GPA of record may include up to 13 credits of journalism in their Bachelor of Science program in Public Administration.

Recommended Journalism courses include:

- ☒ JOURN 1100: Principles of American Journalism
- ☒ JOURN 3000: History of American Journalism
- ☒ JOURN 4000: Communications Law

While the program is designed for students who proceed to graduate school in journalism, the journalism courses are also valuable for city officials who do not go beyond the bachelor's degree.

Public Relations

There is no specific public relations emphasis area in the School of Journalism. Students preparing for careers in public relations should enroll in the strategic communication emphasis, which offers several courses in public relations and prepares students for careers in strategic communication—a blend of advertising and public relations commonly sought in corporate communications departments.

Service Journalism

This magazine concentration prepares students to work on service-oriented periodicals by taking courses in magazine writing, editing and publishing. The program is advised by the Meredith Professor of Magazine Journalism.

Concentrations in Science, Health or Environmental Writing

Students who wish to take science, medical or environmental writing as an area of concentration may do so while enrolled in the newspaper or magazine emphasis area leading to a Bachelor of Journalism degree.

To obtain the Bachelor of Journalism with a concentration in science, health or environmental writing, students must meet the requirements below.

- Be regularly admitted to a sequence in the school
- Complete at least 33 credits in journalism, including:
 - JOURN 1100: Principles of American Journalism
 - JOURN 2100: News
 - JOURN 4400: Editing

JOURN 4450: Newspaper Reporting
 JOURN 3000: History of American Journalism
 JOURN 4406: Newspaper Editing
 JOURN 4416: Science, Health and Environmental Writing

- Complete at least 30 credits in the physical, biological and social sciences, and environment studies (a list of suggested courses is available from the faculty coordinator)
- Complete a total of 123 credits and otherwise meet requirements for the Bachelor of Journalism degree

MAJOR PROGRAM REQUIREMENTS

Effective Fall Semester 2008, the Bachelor of Journalism degree requires 40 journalism credits and 83 non-journalism credits. At least 65 of the 83 non-journalism credits must be in approved credits from the College of Arts and Science.

To obtain the Bachelor of Journalism degree, a student must:

- Be regularly admitted to an emphasis area within the school
- Complete at least 30 upper-division credits of acceptable journalism course work
- Complete at least 30 credits of acceptable course work outside the school
- Earn a cumulative GPA of at least 2.0 for all work taken while in the School of Journalism and a GPA of at least 2.0 for all journalism courses
- Complete all University graduation requirements, including University general education requirements

Major core requirements

JOURN 4000: Communications Law
 JOURN 4950: Solving Practical Problems in Journalism
 OR
 JOURN 3000: History of American Journalism

Electives outside Journalism (must be numbered 3000 or above or Honors courses numbered 2000H or above.).....	24
Behavioral, biological, physical and mathematical science....	3
Select from anthropology, biology, computer science, chemistry, geology, psychology, physics, sociology, statistics or mathematics.	
Social science.....	6
Select from two of four areas: economics, history, political science or geography.	
Humanities.....	6
Select from two of seven areas: history or appreciation of art or music, non-US civilization or classics, humanities, literature, philosophy, appreciation of communication and theater or religious studies.	
Nonjournalism electives.....	9
Must be numbered 3000 or above or 2000H or above.	

General Electives

Electives necessary to complete a minimum of 83 credits of nonjournalism classes. Any course acceptable to the school and advisor is allowed.

DEGREE WITH HONORS REQUIREMENTS

Graduation with honors is based on the grade point average during the final 60 credits in residence. *Cum laude* requires 3.5, *magna cum laude* 3.7, and *summa cum laude* 3.9. The student must have a minimum of 60 credits in residence at MU to be considered for graduation with honors. A student must request consideration for graduation with honors when applying for

graduation.

Kappa Tau Alpha is a journalism honorary society that accepts the top 10 percent of each graduating class. Qualifying students are sent a letter with details about the society and are recognized at the journalism graduation ceremony.

ACADEMIC REGULATIONS

Credit Restrictions

Students may enroll in a maximum of 10 journalism credits each semester without permission from the associate dean for undergraduate studies.

Journalism and most communications courses completed at any other institution will not count toward graduation from the School of Journalism.

Academic Assessment

Students in Radio-TV news, magazine, convergence, print and digital news, and photojournalism must compile a portfolio (resume tape or scrapbook) of their best work in each class. This is a requirement for graduation. Information about the assessment process is sent to students from their faculty chair during their final semester in school. Strategic communication students must complete this requirement as part of the capstone course.

Independent Study

A maximum of 6 credits, approved in advance by the advising office of the School of Journalism, may be earned through independent study and accepted as partial fulfillment of the requirements for upperclass arts and sciences.

Standards for Academic Performance

The School of Journalism is a competitive environment in which students are expected to maintain high standards of academic achievement.

In general, the faculty expects each student to maintain a grade point average of 3.0 or higher to be considered in good standing. The faculty has established rules for handling students who fall below that level. Those rules follow:

1. A student admitted directly to the School of Journalism as a freshman must maintain a cumulative GPA of record of at least 2.5 during the first 29 hours of credit. The credits applicable in this sense are all credits earned in any way, including transfer, advanced placement and credit by examination. Grades in courses taken elsewhere will not be considered for this purpose. Those who do not meet the standard will be dismissed from the School of Journalism and will not be permitted to re-enroll.
2. A student admitted directly to the School of Journalism as a freshman must maintain a cumulative GPA of record of at least 2.75 after completion of 30 to 70 hours of credit. The credits applicable in this sense are all credits earned in any way, including transfer, advanced placement and credit by examination. Grades in courses taken elsewhere will not be considered for this purpose. Those who do not meet the standard will be dismissed from the School of Journalism and will not be permitted to re-enroll.
3. Students with 70 credits who have still not earned admission to the School of Journalism will be dismissed from the School of Journalism. The credits applicable in this sense are

all credits earned in any way, including transfer, advanced placement and credit by examination.

4. Directly admitted freshmen with 70 credits who have still not earned admission to an emphasis area will be dismissed from the School of Journalism. The credits applicable in this sense are all credits earned in any way, including transfer, advanced placement and credit by examination.
5. Students must repeat any required journalism course in which they do not earn a grade of C- or higher.
6. Only elective, non-journalism courses, and only one per semester, may be taken on an S/U (pass/fail) basis. Journalism courses graded only on a S/U basis are exceptions.

Probation, Suspension and Dismissal

Journalism students are placed on probation when either their journalism or their overall (term or cumulative) grade point average falls below 2.0. Students may remain on probation no more than one term. They regain good standing when their term and cumulative grade point averages, for journalism and overall, climb to 2.0 or higher.

First semester freshman journalism students are placed on final probation when their first term grade point average falls between 0.50 - 1.99. Students may remain on final probation no more than one term. They regain good standing when their term and cumulative grade point averages climb to 2.0 or higher.

First-semester freshman journalism students are dismissed and become ineligible to enroll for a period of one calendar year when their first- term grade point average is below 0.50.

Students may be placed on academic probation and may be declared ineligible to enroll if they neglect their academic duties.

Students are suspended and become ineligible to enroll for a period of one regular semester when their term grade point average (journalism or overall) is below 1.5, when they pass less than one-half of their work in any term or when they are on probation and their term grade point average is 2.0 or lower.

Students are dismissed and become ineligible to enroll for a period of one calendar year when their term grade point average (journalism or overall) is below 1.0, when they pass less than one-fourth of their work in any term or when they fail to perform their academic duties.

A student who fails a required course for the second time will be permanently dismissed from the School of Journalism for lack of acceptable progress toward the degree. That student may be readmitted only with the consent of the faculty chair of the student's sequence and the associate dean for undergraduate studies. Before recommending approval for the student to reenroll, the faculty chair will consult with the instructor or instructors of record in the required course to determine the likelihood of that student passing the course on the third attempt. The faculty chair then will make a recommendation to the associate dean, who shall make the final decision to readmit or deny admission to the School of Journalism.

A student may be placed on probation, suspended or dismissed for excessive incompletes at the discretion of the associate dean for undergraduate studies. In such cases, the associate dean shall set a time limit for successful completion of all the courses in which the student has an incomplete. That time limit shall be no more than one calendar year from the scheduled completion of the course and may be a shorter duration. The associate dean also may place limitations on the number of additional credit hours in which the student may enroll before the incompletes

are resolved. If the student fails to finish the required courses within the time limit set by the associate dean, the student is subject to dismissal.

A student who has been declared ineligible to enroll may be readmitted only on the approval of the dean or associate dean of the school or college in which the student desires to enroll. As a condition of readmission, the dean may set forth stipulations with regard to minimum standards of academic work that must be maintained by the student. If the student, after readmission, again becomes ineligible to re-enroll, his or her ineligibility normally is considered permanent.

Satisfactory/Unsatisfactory Grading System

No required course or courses in a required area may be taken on a Satisfactory/Unsatisfactory basis either before or after admission to the School of Journalism. Only elective, non-journalism courses may be taken S/U and only one per semester. An exception is JOURN 1010, Career Explorations, which is offered only as an S/U course.

Enrollment in Other Institutions

Pre-journalism students in the College of Arts and Science may not enroll in another institution while enrolled in classes on campus. Students may enroll in courses at other institutions in the summer if they are not enrolled in classes on campus.

Ethics of Journalism

The School of Journalism is committed to the highest standards of academic and professional ethics and expects its students to adhere to those standards. Students are expected to observe strict honesty in academic programs and as representatives of school-related media.

Should any student be guilty of plagiarism, falsification, misrepresentation or other forms of dishonesty in assigned work, he or she may be subject to a failing grade from the course teacher and such disciplinary action as may be recommended pursuant to university regulations.

SPECIAL PROGRAMS

Students from other divisions with junior or higher standing may take non-laboratory courses in journalism without being admitted to the school. Permission of the journalism academic unit is required. Courses directly related to the three media are usually not open to students while they are undergraduates in other disciplines. Students from other schools or colleges admitted to journalism courses are expected to meet the course prerequisites and grade point averages required of students in the School of Journalism.

STUDENT SERVICES

Advising

Students directly admitted to Journalism as freshmen have a full-time academic advisor in the school.

Pre-journalism students receive academic advising from the College of Arts and Science. Students admitted to a sequence in the school have a full-time academic advisor and a faculty advisor from their selected sequence. Students are expected to seek the advice of the academic advisor in the selection of courses. The

faculty adviser provides career counseling.

The school provides advising checklists so that students can maintain a record of academic course work. The forms are used by the student and advisor to plan the student's program. Students are responsible for determining an appropriate schedule of courses each semester; however, the course schedule should be approved by the student's advisor. The responsibility for meeting admission and graduation requirements rests with the student.

EMPHASIS AREAS

Emphasis in Strategic Communication

This program is designed for students who wish to develop a solid understanding of strategic communication and proficiency with skills such as writing, design, oral presentation, strategy development, creativity and critical thinking. Students learn to apply these skills to various forms of communication, which include advertising, public relations and web and interactive programming. Emphasis requirements are described below:

Strategic Communication	30
Emphasis core requirements	12
JOURN 4200: Principles of Strategic Communication	
JOURN 4206: Strategic Writing I	
JOURN 4952: Strategic Communication Research I	
JOURN 4226: Strategic Design and Visuals I	

In addition, JOURN 4970: Strategic Campaigns is a capstone course that students should take during their final semester.

Journalism electives	9
Suggested Strategic Communication emphasis electives:	
JOURN 4216: Media Sales	3
JOURN 4218: MoJo Advertising Staff	3
JOURN 4238: Broadcast Advertising	3
JOURN 4220: Creative Portfolio	3
JOURN 4208: Strategic Writing II	3
JOURN 4248: Media Strategy and Planning	3
JOURN 4250: Management of Strategic Communication	3
JOURN 4256: Public Relations	3
JOURN 4258: Global Communication	3
JOURN 4260: Impact of Advertising on American Culture	3
JOURN 4228: Strategic Design and Visual II	3
JOURN 4266: Advertising Law and Ethics	3
JOURN 4270: Public Relations Writing	3
JOURN 4130: Account Services	1
JOURN 4136: Creative Techniques	1
JOURN 4138: Public Relations Techniques	1
JOURN 4140: Interactive Techniques	1
JOURN 4146: Strategic Communication Techniques	1
JOURN 4268: Strategic Communications Practicum	3

Marketing electives for a strategic communication emphasis requirements

6 Strategic communication students must complete 6 credits of upper-division marketing credit. Three of the 6 must be MRKTNG 3000 or its equivalent in transfer. These credits take the place of 6 of the 9 credits of upper-division electives required of all journalism students.

Emphasis in Radio-TV News

This program is designed for students who wish to pursue a career in radio or television journalism. Emphasis requirements

are described below:

Radio-TV NEWS	30
Emphasis core requirements	9
JOURN 4300: Broadcast News I	3
JOURN 4306: Broadcast News II	3
JOURN 4308: Broadcast News III	3
Journalism electives	12
JOURN 4310: News Producing	3
JOURN 4320: Advanced Broadcast Reporting	3
JOURN 4326: Issues in Broadcast Management	2-3
JOURN 4328: Advanced News Communication	1
JOURN 4430: Computer-Assisted Reporting	3
JOURN 4436: Investigative Reporting	3
JOURN 4510: Visual Communication	3
JOURN 4550: Basic Photography and Photo Editing	3
JOURN 4650: International Issues Reporting	3
JOURN 4656: International News Media Systems	3
JOURN 4660: Media Forces Shaping the European Union	3
JOURN 4700: Online Journalism	3
JOURN 4716: Women and the Media	2
JOURN 4718: Law and the Courts	3
JOURN 4720: Internet Law:	3
JOURN 4730: Journalism & Conflict	3
JOURN 4736: Economics and Finance of the Media	3
JOURN 4050: Communications Practice	1-3
JOURN 4350: Problems in Journalism	1-3
JOURN 4940: Internship in Journalism	1-3
JOURN 4974: Advanced Internet Applications for Radio/TV News	3
JOURN 4976: Seminar in Radio/TV News	3
JOURN 4978: Media Management and Leadership	3
Capstone course (select one to be taken during the final semester)	3
JOURN 4974: Advanced Internet Applications for Radio/TV News OR	
JOURN 4976: Seminar in Radio/TV News OR	3
JOURN 4978: Media Management and Leadership	3

Emphasis in Photojournalism

This program is designed for students who wish to pursue careers as photographers and picture editors for newspapers and magazines as well as multi-media producers for online publications. Emphasis requirements are described below:

PHOTOJOURNALISM	30
Emphasis core requirements	12
JOURN 4450: Newspaper Reporting	3
JOURN 4556: Fundamentals of Photojournalism	3
JOURN 4558: Advanced Techniques in Photojournalism	3
JOURN 4560: Staff Photo Journalism	3
Journalism electives	9
Suggested Photojournalism electives:	
JOURN 4500: Advanced Newspaper Editing and Design	3
JOURN 4566: Electronic Photojournalism	3
JOURN 4568: History of Photojournalism	3
JOURN 4510: Visual Communication	3
JOURN 4506: Magazine Design	3
JOURN 4670: Newspaper Photo Desk Management	3
Capstone course	3
JOURN 4980: The Picture Story and Photographic Essay	3

Emphasis in News-Editorial

This program is designed for students who are interested in news-

paper careers. Emphasis requirements are described below:

PRINT AND DIGITAL NEWS	30
Emphasis core requirements	9
JOURN 4400: Editing	3
JOURN 4450: Newspaper Reporting	3
JOURN 4406: Newspaper Editing	3
One Advanced Course.....	3
Reporting and Writing Track: JOURN 4460: Advanced Newspaper Reporting	
Editing and Design Track: JOURN 4500: Advanced Newspaper Editing and Design	
Online Media Track: JOURN 4700: Online Journalism	
Journalism electives	9
Electives suggested for Print and Digital News emphasis:	
JOURN 4410: Intermediate Writing	3
JOURN 4416: Science, Health and Environmental Writing	3
JOURN 4420: Editorial Writing	3
JOURN 4430: Computer-Assisted Reporting	3
JOURN 4436: Investigative Reporting	3
JOURN 4438: Business and Economic Reporting.....	3
JOURN 4460: Advanced Newspaper Reporting	3
JOURN 4986: Advanced Writing.....	3
Electives suggested for Editing and Design track:	
JOURN 4326: Issues in Broadcast Management	2-3
JOURN 4408: Magazine Editing	3
JOURN 4438: Business and Economics Reporting	3
JOURN 4500: Advanced Newspaper Editing and Design	3
JOURN 4506: Magazine Design.....	3
JOURN 4508: Information Graphics	3
JOURN 4550: Basic Photography and Photo Editing.....	3
JOURN 4706: The Community Newspaper.....	3
JOURN 4710: Newspaper Management	3
JOURN 4720: Internet Law	3
Capstone course (Must be taken during the final semester)	3
JOURN 4990: Journalism and Democracy	3

Emphasis in Magazine Journalism

This program is designed for students who are interested in careers in the magazine world, including writing, editing and designing for consumer, trade, corporate, association and organization publications of all kinds. Emphasis requirements are described below:

MAGAZINE JOURNALISM.....	30
Emphasis core requirements	12
JOURN 4408: Magazine Editing	3
JOURN 4410: Intermediate Writing	3
JOURN 4450: Newspaper Reporting	3
JOURN 4506: Magazine Design.....	3
Journalism electives	9
Suggested electives for Magazine emphasis:	
JOURN 4268: Strategic Communication Practicum.....	3
JOURN 4416: Science Health Environmental and Writing	3
JOURN 4418: Critical Reviewing	3
JOURN 4420: Editorial Writing.....	3
JOURN 4430: Computer-Assisted Reporting	3
JOURN 4436: Investigative Reporting	3

JOURN 4986: Advanced Writing.....	3
JOURN 4988: Advanced Magazine Design.....	3

Emphasis in Convergence Journalism

This program is designed for students who envision working in multiple media. Students are exposed to careers in print, broadcast and online journalism.

CONVERGENCE JOURNALISM	30
Emphasis core requirements	15
JOURN 4802: Fundamentals of TV, Radio and Photojournalism	
JOURN 4804: Convergence Reporting (Basic skills courses + Convergence Reporting may substitute for 4450 or 4300 for students who choose to switch to Broadcast News, Magazine, News-Ed or Photojournalism sequences	
JOURN 4806: Convergence Editing and Producing (pre-req: Convergence Reporting or 4450/4300 + Basic skills not yet acquired - convergence students get enrollment priority).	
Concentration (6 hours)	
Journalism Electives (6 hours) - see advisor for recommended list	
Capstone (3 hours - take in senior year)	
JOURN 4992: Reporting, Editing and Marketing of Converged Media (3)	

Convergence Journalism Tracks (6 Credits)

A Convergence Journalism Track is up to 6 credit hours in an existing area that allows students to specialize in a particular area along with convergence reporting, editing and producing. The prerequisite for each track is JOURN 4804: Convergence Reporting, or instructor's consent.

Radio-Television Reporting Track	
JOURN 4306: Broadcast News II	3
JOURN 4308: Broadcast News III.....	3
Radio-Television Producing Track	
JOURN 4306: Broadcast News II	3
JOURN 4310: News Producing	3
Information Graphics Track	
JOURN 4508: Information Graphics	3
And any one of the following:	
JOURN 4430: Computer-Assisted Reporting	3
IS LT 4364 Macromedia Flash Authoring.....	3
International Journalism Track	
JOURN 4650: International Issues Reporting (3) and JOURN 4656: International News Media Systems (3) JOURN 4658: International Journalism (3) JOURN 4660: Media Forces Shaping the European Union (3) JOURN 4050: Communications Practice (3) (with an advisor-approved international focus)	
Investigating Reporting Track	
JOURN 4430: Computer Assisted Reporting (3)	
JOURN 4436: Investigative Reporting (3)	

Online Journalism Track

- JOURN 4700: Online Journalism (3) **or**
- JOURN 4974: Advanced Internet Applications for Radio/TV News (3) **and** one of the following:
- JOURN 4566: Electronic Photojournalism (3)
- JOURN 4508: Information Graphics (3)
- IS LT 4364 Macromedia Flash Authoring

Photojournalism Track

- JOURN 4550: Basic Photography and Photo Editing.....3
- JOURN 4566: Electronic Photojournalism.....3

Print Design Track

- JOURN 4500: Advanced Newspaper Editing and Design OR Customized concentration with faculty advisor's signature.....3
- JOURN 4506: Magazine Design.....3
- JOURN 4508 Information Graphics.....3

Print Editing Track

- JOURN 4400: Editing.....3
- JOURN 4406: Newspaper Editing.....3

Print Reporting Track

- JOURN 4410: Intermediate Writing3
- Specialty writing course choices. Select one.
- JOURN 4106: Media and Art Criticism: The Role of the Critic.....3
- JOURN 4416: Science Health and Environmental Writing3
- JOURN 4418: Critical Reviewing3
- JOURN 4420: Editorial Writing.....3
- JOURN 4426: Religion Reporting and Writing.....3
- JOURN 4430: Computer-Assisted Reporting.....3
- JOURN 4436: Investigative Reporting.....3
- JOURN 4438: Business and Economic Reporting.....3
- JOURN 4460: Advanced Newspaper Reporting.....3
- JOURN 4650: International Issues Reporting.....3

OPTIONS

Summer Session

The School of Journalism offers three summer sessions in which most of its media laboratory courses are offered. The first session begins in mid-May and the second in early July. The third extends for the entire summer. Students may combine one or both of the sessions with the regular University summer session or in special four-week sessions. If their enrollment does not exceed 9 credits at any one time.

Many non-media journalism courses, including graduate courses, are offered in the regular University summer session. Courses offered in the journalism summer sessions include those courses in which lab work is completed under faculty supervision on the *Missourian*, KBIA and KOMU-TV.

Classes are smaller in the summer sessions, and students have the opportunity to consult on a one-to-one basis with faculty members. Because labs are smaller, students' opportunities are much greater for obtaining publishing and broadcasting experience.

Intersession

An intersession is offered as part of the fall semester, beginning and ending prior to the start of other spring courses. Enrollment is limited, and work is in laboratory courses only. Students who wish to do some of their lab work in spring intersession should

make arrangements for enrollment with the instructor of the intersession courses as the fall term begins.

Opportunities for Graduate Study on the MU Campus

The five-year combined bachelor/master degree program was designed for students in the Missouri School of Journalism who desire a graduate education after the undergraduate program is complete. Students in the program complete requirements as outlined for the Bachelor of Journalism degree and then spend one more year (approximately 12 months) to earn a master's degree. The program requires students to carry an intensive load (12-15 credits) each semester. Course work in the program builds on the undergraduate program and enhances student's skills and understanding of the chosen area of journalism. At the present time, students can focus their program in areas such as strategic communication, newspaper design, broadcast management, computer-assisted reporting and magazine areas such as magazine writing and magazine design.

JOURNALISM MINOR

Journalism Minor Policies and Procedures

The School of Journalism's minor is for students within other MU academic divisions who wish to broaden their understanding of the news media's role in society. Courses for minors parallel MU's broader liberal arts traditions and are not skills-oriented.

Admissions

JOURN 1000 is open to any MU student who is a non-journalism major in good academic standing. To declare a minor, a student must be in good academic standing at MU and have completed 60 credits.

Pre-journalism students who follow the School of Journalism's general education requirements are preferred for admission. Prejournalism students who complete JOURN 1100 and JOURN 2100 with a C or better (and then decide to minor within the School of Journalism) are eligible to take 9 more credits within the School. The 6 credits already earned in JOURN 1100 and JOURN 2100 will count toward completion of a minor. Prejournalism students who decide to minor after completing JOURN 1100 are ineligible to take JOURN 1000.

Other MU students with a GPA of record of 3.0 or higher are eligible as space permits. Journalism majors are ineligible for this program.

All students apply to be a journalism minor and complete a form that is available from a designated staff liaison. Journalism minors must apply to be eligible to register for courses.

All admission and other requirements apply to both current and transfer students. Transfer students with more than 6 credits of mass communication and society courses from another college or university will not be eligible to minor in journalism.

Courses

- Up to 15 credits selected from the following classes:
- JOURN 1000 The News Media's Ethics and Social Responsibilities
- JOURN 1100 Principles of American Journalism

JOURN 2000	Cross-Cultural Journalism
JOURN 3000	History of American Journalism
JOURN 4000	Communication Law
JOURN 4200	Principles of Strategic Communication

JOURN2100: News, is not open to journalism minors. However, prejournalism students who complete JOURN 2100 as part of their requirements and then decide to minor in journalism will receive full course credit toward the minor.

Other eligible courses: (all require permission of course instructor emailed or sent to the designated advisor for minors):

JOURN 4568	History of Photojournalism
JOURN 4656	International News Media Systems
JOURN 4658	International Journalism
JOURN 4990	Journalism and Democracy

These are the classes the School of Journalism currently offers for international and U.S. exchange, MU interdisciplinary and general studies majors plus non-degree seeking undergraduate students. These courses are not skills oriented and frequently have room for non-majors to enroll. JOURN 1000 also was intended as a class for non-majors.

The selected courses focus on news media and society issues. Students can choose whatever combination of classes they wish to reach 15 credits. Journalism minors are ineligible to take any other courses with the School of Journalism. Journalism minors may take no more than 15 credits within the School of Journalism.

Registration

MU students can register for JOURN 1000 through regular procedures. For all other classes, journalism minors place their course preference on a waiting list. Students are eligible to enroll after course registration by journalism majors is completed. The School's designated liaison for journalism minors will inform students when course space is available following registration periods each semester.

Academic Status

Journalism minors are subject to probationary or suspension status as determined by the division in which each student's major resides. Journalism minors who receive lower than a C- in any journalism course must repeat it until they receive a C- or better.

Fees

Journalism minors must pay School of Journalism activity fees for all journalism courses.

Advising

Journalism minors will not be assigned a faculty advisor or an academic advisor within the Journalism School. Academic advising occurs in the division of each student's major. Journalism minors are free to consult with the school's designated liaison and with the School of Journalism faculty on course-specific matters at any time. Journalism minors also can consult on longer-range career and professional issues with journalism faculty. However, faculty advising priority is given to journalism majors.

Placement Services

Journalism minors are ineligible to interview with prospective employers who visit the School of Journalism. Journalism minors should interview employers in their home division. The School

of Journalism's placement website is open for use by journalism minors. Journalism minors can consult with the School of Journalism's placement officers, although priority is given to journalism majors and pre-journalism students.

Other Disciplinary Actions

Disciplinary actions for journalism minors are the same as for journalism majors. All cases of alleged academic misconduct will be immediately forwarded and reviewed by the MU Provost's office. All cases of classroom misconduct will be immediately forwarded and reviewed by the office of the Vice Chancellor for Student Affairs.

Sample Eight-Semester Programs

Students pursuing each curricular emphasis will follow the eight-semester plan shown below. Check the Undergraduate Catalog for course prerequisites.

^Denotes Degree Program requirements

Check *Undergraduate Catalog* for prerequisites

SCHOOL OF JOURNALISM COURSES

JOURN 0900--News Practicum (3).Instruction in fundamentals of news writing for students entering the graduate program without an undergraduate degree in journalism.

JOURN 1000--The News Media's Ethics and Social Responsibilities (3).This course surveys the major ethical issues that concern journalists and their critics. The course describes the ethical dilemmas that confront broadcast and print journalists. It attempts to link descriptive with normative ethical theory, so course examples can be applied to other disciplines.

JOURN 1010--Career Explorations in Journalism (1).Colloquium in which experts discuss their specialties and answer students' questions on the nature and current status of their disciplines. Open primarily to freshmen. Graded on S/U basis only.

JOURN 1010H--Career Explorations in Journalism - Honors (1).Colloquium in which experts discuss their specialties and answer students' questions on the nature and current status of their disciplines. Open primarily to freshmen. Graded on S/U basis only. Honors eligibility required.

JOURN 1100--Principles of American Journalism (3).Introductory course designed to acquaint students with concepts and functions of journalism in American society. Stresses the basic issues and problems facing journalists and the mass media. Prerequisites: 2nd semester freshman (15 hrs) and 2.75 MU GPA. Restricted to Pre-Journalism, Journalism and Agriculture Journalism students only. Journalism minors can register on space available basis.

JOURN 1940--Pre-Sequence Internship (0-1).Internship for Journalism students who have not yet entered their emphasis areas. Used to satisfy employer requirements. Journalism students only. Instructor consent required. Graded on S/U basis only.

JOURN 2000--Cross-Cultural Journalism (3).Cross-Cultural Journalism provides journalistic tools for the coverage of diverse ethnic, gender, ability and ideological groups inside and outside the United States. The critical role of diverse voices in a democracy will be discussed. Prerequisites: JOURN 1100; GPA 2.8. Restricted to Pre-Journalism, Journalism and Agriculture Journalism students only.

JOURN 2100--News (3).Introduction to fundamentals of news writing. Lectures, discussions and laboratory work provide training under deadline pressure in writing basic news stories. Stories cover several "live" assignments. Prerequisite: ENGLSH 1000 with "B" range grade or higher, 30 credit hours and 2.8 MU GPA.

JOURN 2100H--News (3).Introduction to fundamentals of news writing. Lectures, discussions and laboratory work provide training under deadline pressure in writing basic news stories. Stories cover several "live" assignments. Prerequisite: ENGLSH 1000 with "B" range grade or higher, 30 credit hours and 2.8 MU GPA.

JOURN 3000--History of American Journalism (3).American mass media from colonial days to present in the context of social, economic and political change.

JOURN 4000--Communications Law (3).

Legal concepts, including prior restraint, libel, privacy, obscenity, contempt and access as they relate to print, broadcast, advertising and other areas.

JOURN 4050--Communications Practice (1-3).Special instruction in the school's media as an extension of existing advanced media courses, or, in advertising, an extension of advertising creative courses. Contract must be approved by instructor and dean.

JOURN 4056--Intersession Colloquium (1).Lecture portion of any course the student plans to take later during an intersession. Prerequisite: Dean's consent.

JOURN 4058--New York Program: Journalism Theory and Practice (2-3).Interdisciplinary course offering on-site study at national media venues in New York. Journalism alumni working in Manhattan provide weekly discussions on contemporary practices, job networks and work experiences. Prerequisite: junior standing.

JOURN 4116--Managing and Leading People (1).Dramatic changes in technology and in the media's role in covering technologies requires new management and leadership techniques and paradigms based on new management theories. Students will write case studies examining these changes and applying these new theories. Prerequisite: junior standing.

JOURN 4120--New Media Basics (1).Students will learn how to use the Internet to communicate with others, find human and electronic sources for stories and publish on the World Wide Web. Prerequisite: junior standing.

JOURN 4126--Digital Audio and Visual Basics for Journalists (1).Introduces journalism students to audio and video tools used in converged environments. Students will create news stories, ads or promos to meet journalistic or strategic communication goals.

JOURN 4130--Account Services (1).Designed for advanced strategic communication students preparing for careers in account services. Section topics vary.

JOURN 4136--Creative Techniques (1).Designed for advanced strategic communication students preparing for careers in creative work. Section topics vary.

JOURN 4138--Public Relations Techniques (1).Designed for advanced strategic communication students preparing for careers in public relations. Section topics vary.

JOURN 4140--Interactive Techniques (1).Designed for advanced strategic communication students preparing for careers in interactive media. Section topics may vary.

JOURN 4146--Strategic Communication Techniques (1).Designed for advanced strategic communication students. Section topics vary.

JOURN 4148--Interviewing Essentials (1).This class allows students to focus on the journalistic interviewing process, from spot news interviews to the sort of interviews required for personality, sports and in-depth work.

JOURN 4150--Using Infographics (1).An introduction to the various types of information graphics and how each can be used effectively to help explain the news. Additional emphasis on generating graphic ideas and on the specific

challenges of gathering information for graphics. Prerequisites: instructor's consent.

JOURN 4198--Area Seminar (3).Special lectures, readings, discussions relating to the urban journalism, state government reporting or local public affairs reporting programs.

JOURN 4200--Principles of Strategic Communication (3).Foundation course familiarizing students with an array of strategic communication tools and how they are used in the field. Prerequisite: junior standing.

JOURN 4206--Strategic Writing I (3).Students learn strategic writing for a variety of media such as print, radio, television, outdoor, new media, news releases, pitch letters and other persuasive messages. Prerequisites: JOURN 4200, 4226, 4952.

JOURN 4208--Strategic Writing II (3).Advanced course in the creation of advertising and public relations materials with an emphasis on strategic planning, developing creative concepts, producing and polishing copy and visuals, execution of finished product and refining. Prerequisite: JOURN 4206.

JOURN 4216--Media Sales (3).Focus of this course is to familiarize students with how to sell a variety of media, including newspaper, radio, television, outdoor, new media, and others. Prerequisites: JOURN 4206.

JOURN 4218--Mojo Advertising Staff (3).Application of strategic communication skills in a professional services agency specializing in the youth and young adult segment. Position include management, planning, creative media and research. Other electives required based on position. Application required. Prerequisites: JOURN 4206 or 7206.

JOURN 4220--Creative Portfolio (3).Students will produce a free-standing collection of outstanding, polished creative work to demonstrate his/her ability to perform at a high level of creativity. Prerequisites: core courses and JOURN 4208.

JOURN 4226--Strategic Design and Visuals I (3).Course gives students a foundation in visual communication in areas such as typography, balance, eye flow and layouts. Prerequisite: junior standing.

JOURN 4228--Strategic Design and Visuals II (3).Advanced course in strategic design and visuals. Persuasive visual principles applied to variety of integrated media including print, broadcast and on-line. Prerequisite: JOURN 4206.

JOURN 4238--Broadcast Advertising (3).Broadcast advertising production. Emphasis on equipment, directing, script/storyboard preparation and commercial analysis. Students become familiar with procedures, techniques and facilities used in basic radio and television production. Prerequisites: JOURN 4206.

JOURN 4240--Direct and Mail Order Advertising (2).Direct mail advertising and mail order promotion, retail and national; mailing lists, copy, production, postal regulations, strategy. Prerequisite: JOURN 4206.

JOURN 4248--Media Strategy and Planning (3).Course deals with strategic planning and the selection and evaluation of appropriate media outlets. Students gain a clear understanding of the problems and issues involved in crafting

effective media strategies, creative problem solving and selection of appropriate media. Prerequisite: JOURN 4200, 4952, 4226.

JOURN 4250--Management of Strategic Communication (3).How to lead and contribute to strategically sound, highly creative and seamlessly integrated strategic communication on the agency or client side of the business. Directly relevant to agency account management and account planning, as well as client career paths. Prerequisites: JOURN 4200/7200, 4226/7226 and 4952/7952.

JOURN 4256--Public Relations (3).Current methods of communicating with constituents as practiced by agencies, corporations and government/not-for-profit organizations. Prerequisite: JOURN 4200.

JOURN 4258--Global Communication (3).Understanding global communication systems with an emphasis on planning and executing strategic communication campaigns. Particular attention will be paid to cultural, political and economic differences as they affect marketing and development communication. Prerequisites: JOURN 4200, 4226, 4952.

JOURN 4262--Interactive Advertising (3).Course covers every step from integrating Internet efforts into the overall business plan to building a website that works. Designed for those with an interest in interactive advertising. Prerequisite: JOURN 4200 and 4226; junior or senior standing. Graded on A/F basis only.

JOURN 4268--Strategic Communication Practicum (3).Practical experience in public relations, corporate communications and strategic planning with the Missouri School of Journalism serving as client. Students from all journalism disciplines will apply knowledge and skills on a variety of platforms. Prerequisite: JOURN 4206 for Advertising students, JOURN 4306 for Broadcast students, JOURN 4450 for News-Editorial and Magazine students, JOURN 4556 for Photojournalism students.

JOURN 4270--Public Relations Writing (3).Develop skills and capabilities in strategic communication applications, including news releases, media advisories, pitch letters, video news releases, media relations techniques, writing for electronic and broadcast media, feature writing, brochures and speeches. Prerequisites: JOURN 4206 and JOURN 4256. Graded on A/F basis only.

JOURN 4300--Broadcast News I (3).Beginning reporting and news writing for radio, television and their on-line services. Introduction to use of audio and video recorders and editing systems in production of news stories. Consideration of ethical issues, economic factors, relationships with news sources and gender and ethnic diversity in the newsroom and in news stories. Prerequisite: JOURN 2100.

JOURN 4301--Topics in Journalism (1-3).Selected current topics in journalism. Specific topics to be announced at time of registration.

JOURN 4306--Broadcast News II (3).Introduction to general assignment reporting skills for the newsroom environment. Instruction in time management, writing, storytelling and performance. Team skills and ethnic diversity in the newsroom are discussed. Students begin work for broadcast newsrooms. Prerequisite: JOURN 4300.

JOURN 4308--Broadcast News III (3).Intermediate reporting and news writing skills for radio and television. Advanced techniques in the use of video and sound in production of news stories. Prerequisite: JOURN 4306.

JOURN 4310--News Producing (3).Instruction in techniques of television newscast preparation. Emphasis on role of the television news producer. Prerequisite: JOURN 4308.

JOURN 4320--Advanced Broadcast Reporting (3).In-depth reporting and editing for radio or television; advanced production techniques; emphasis on writing, interviewing, effective use of audio or videotape at KOMU-TV or KBIA. Prerequisites: JOURN 4308.

JOURN 4328--Advanced News Communication (1).This course will examine and practice the components of effective interviewing and on-set and live reporting for television news. Students will anchor KOMU-TV's morning newscasts. Prerequisite: graduate standing and JOURN 4306.

JOURN 4350--Problems in Journalism (1-3).Independent research arranged with individual faculty member. Contract must be approved by instructor and dean. Not accepted as a substitute for any regularly scheduled course.

JOURN 4400--Editing (3).Introduces the fundamentals of copyediting of stories for newspaper publication; emphasizes style and grammar; introduces headline writing. Prerequisite: JOURN 2100.

JOURN 4406--Newspaper Editing (3).Laboratory work on the Columbia Missourian plus lectures on ethics, page design and news decision making. Prerequisite: JOURN 4400.

JOURN 4408--Magazine Editing (3).Review of grammar, punctuation, style rules; measuring articles copy fitting; writing captions, titles; editing, proofreading, condensing, rewriting magazine articles. Prerequisites: JOURN 4450/7450.

JOURN 4410--Intermediate Writing (3).In-depth research and writing techniques. Students produce articles for the Missouriian and school-produced magazines or other publications. Prerequisites: JOURN 4450 or equivalent and instructor's consent.

JOURN 4412--Lifestyle Journalism (3).In-depth research and writing techniques focused on lifestyle journalism. Students produce articles for the Missouriian and school-produced magazines or other publications. Prerequisites: JOURN 4450 or equivalent and instructor's consent. Substitutes for JOURN 4410. Graded on A/F basis only.

JOURN 4416--Science, Health and Environmental Writing (3).Advanced course in the reporting of science, health and environment. Write for publication. Prerequisite: JOURN 4450 and instructor's consent.

JOURN 4418--Critical Reviewing (3).A combination of theory and practice that covers the philosophy and craft of reviewing the arts, including books, movies, television, dance, painting, sculpture and architecture. Students must attempt to publish reviews and essays locally, regionally and nationally. Reviews published in Sunday Magazine. Prerequisites: JOURN 0900 or 2100 and instructor's consent.

JOURN 4420--Editorial Writing (3).Empha-

sizes writing and thinking. Discussion of current problems. Correct and effective use of English language. Mission, obligations and history of editorial pages. Prerequisite: JOURN 4450.

JOURN 4426--Religion Reporting and Writing (3).(same as Religious Studies 4418). Advanced seminar in religion reporting and writing. Examines the role of religion journalism in faith, public life and culture. Prerequisite: JOURN 4450 or its equivalent in professional writing experience and instructor's consent.

JOURN 4430--Computer-Assisted Reporting (3).How to negotiate for, transfer and process electronic information; the unique opportunities computers provide for analyzing information. Prerequisite: instructor's consent.

JOURN 4436--Investigative Reporting (3).Advanced course designed to acquaint reporters with public issues. Students write two in-depth projects and other shorter assignments. Students meet weekly with instructor for editorial suggestions. Prerequisites: JOURN 4450 and instructor's consent.

JOURN 4438--Business and Economics Reporting (3).Advanced reporting course concentrating on writing and reporting about business and the economy. Emphasis on sources, records, documents and writing techniques. Prerequisites: JOURN 4408 and 4410 or 4506.

JOURN 4440--Mapping for Stories and Graphics (2).Learn mapping software to discover information for news stories and lay the foundation for compelling news information graphics. Students will learn how to create maps for print, broadcast and online. Prerequisites: Journalism 2100 and instructor's consent. Graded on A/F basis only.

JOURN 4450--Newspaper Reporting (3).Assignments on a daily city newspaper covering community news, city, county and state affairs, sports and lifestyle issues. Experience in gathering and writing news, writing under deadline conditions. Prerequisites: JOURN 2100.

JOURN 4460--Advanced Newspaper Reporting (3).Assignments to more difficult beat areas, team reporting and some investigative reporting for community newspaper. Individual conferences and weekly class sessions on contemporary reporting problems. Prerequisite: JOURN 4450.

JOURN 4500--Advanced Newspaper Editing and Design (3).Continuation of desk editing with emphasis on page design, graphics and typography. Prerequisite: JOURN 4406, 4408 or instructor's consent.

JOURN 4506--Magazine Design (3).Introduction to typography of magazines from manuscript markup through layout to page proof. Extensions and limitations of typography are considered in light of current practice and economic possibilities.

JOURN 4508--Information Graphics (3).Work as a news artist for a daily city newspaper graphically covering community news, sports and lifestyle issues. Emphasis on visual thinking and effective presentation. Experience with state-of-the-art software. Prerequisite: JOURN 4450 or the professional equivalent, or instructor's consent.

JOURN 4510--Visual Communication (3).How to communicate through pictures. Topics: visual perception, vocabulary, the role of words,

picture editing, design and layout, printers, taste and judgment, camera mechanics. For journalism students who are not photographers.

JOURN 4550--Basic Photography and Photo Editing (3).A basic survey for non-photojournalism majors and others with no prior experience who desire a working knowledge of photojournalistic theory and practice. Prerequisite: instructor's consent.

JOURN 4556--Fundamentals of Photojournalism (3).A rigorous skills course for advanced students preparing for a career in photojournalism consisting of weekly exercises in black and white and color photographic story telling and lectures that explore the philosophical, historical and ethical roots of the profession. Prerequisite: instructor's consent.

JOURN 4558--Advanced Techniques in Photojournalism (3).Advanced techniques and problem solving in photojournalism. Stresses lighting techniques--available, studio, electronic flash and color correction of color film. Strobed documentary, portraiture, fashion, food, architecture, sports. Prerequisite: JOURN 4556.

JOURN 4560--Staff Photojournalism (3).A laboratory course exploring the photojournalist's role in the news-gathering process. As staffers for the Columbia Missourian, students cover news, sports, features, food assignments and originate single pictures and stories. Prerequisite: JOURN 4558.

JOURN 4566--Electronic Photojournalism (3).Digital photography as a medium, including legal, ethical, editing and professional aspects. Prerequisite: JOURN 4556 and instructor's consent.

JOURN 4568--History of Photojournalism (3).Examination of the aesthetic and technological development of photography from its invention in 1839 to the present. Primary emphasis on the evolution and impact of the picture press and the documentary tradition in America, although international developments are studied as well.

JOURN 4650--International Issues Reporting (3).An advanced professional seminar on how to recognize, report and write about the domestic influence of international political, economic and cultural problems and trends. Prerequisites: JOURN 4450.

JOURN 4656I--International News Media Systems (3).A comparative survey of current news media systems and how they affect the international flow of information. Newspapers, news agencies, broadcasting and satellite networks of the world are analyzed. Prerequisite: junior standing in JOURN or AG JRN.

JOURN 4658--International Journalism (3).An examination of the gathering, editing and dissemination of international news. The impact of social, economic, cultural and political structures on news media performance is evaluated. Prerequisites: junior standing.

JOURN 4660--Media Forces Shaping the European Union (3).Seminar analyzes the role of media in shaping policies and actions of the European Union member nations and their people. Open to graduate students regardless of major and to undergraduates with instructor's consent. Course qualifies for EU Certificate Program.

JOURN 4662--International Magazine Staff (3).Magazine staff production for an international magazine. Students plan, edit, design and produce the quarterly magazine and consult with writers, photographers and designers. Prerequisite: JOURN 4408 and 4410, instructor's consent. Restricted to Journalism and Agricultural Journalism majors.

JOURN 4670--Newspaper Photo Desk Management (3).Survey of management of photographic journalism, art illustration and design in newspapers; includes work on graphics desk of Columbia Missourian. Prerequisites: JOURN 4560 or 4226 or 4408 and instructor's consent.

JOURN 4700--Online Journalism (3).Examination of the emerging forms of information delivery by computer and related convergence of print and broadcast media. Students gain practical experience in the production of an electronic information delivery product. Prerequisites: JOURN 2100 and one of the following: JOURN 4400, 4450 or instructor's consent.

JOURN 4706--The Community Newspaper (3).The role of the newspaper in the community. Handling of news categories especially applicable to smaller newspaper. Field trips giving students experience in publishing newspapers in the state. Prerequisites: JOURN 2100.

JOURN 4710--Newspaper Management (3).Department-by-department organization, business practices, personnel, rate structures, equipment, production, laws and regulations of concern to newspaper management. Cases examine critical newspaper management issues.

JOURN 4716--Women and the Media (2).(same as Women's and Gender Studies 4716). Focus on portrayal of women in American mass media. Other goals: historical perspective on women as journalists; exposure to issues usually not covered by mass media; research and writing skills. Prerequisite: instructor's consent.

JOURN 4718--Law and the Courts (3).Lectures, readings, discussions, writing assignments relating to justice system reporting from the view of attorneys, prosecutors, judges, correction and probation officers with the cooperation of the Missouri Bar. Prerequisites: JOURN 2100.

JOURN 4720--Internet Law (3).This course will focus on how to avoid legal pitfall while doing e-mail or e-commerce or browsing the Web and how to use the law to your benefit.

JOURN 4728--Confronting Controls on Information (3).A review of actions by government, society and the communications media calculated to limit or alter the content of information in the United States and elsewhere around the world. Prerequisite: instructor's consent.

JOURN 4730--Journalism and Conflict (3).(same as Peace Studies 4830). Introduction to the basic principles of conflict theory and negotiation, including the sources of conflict, why conflict escalates and what the conditions are for de-escalation, all with a special emphasis on the implications for the working journalist.

JOURN 4736--Economics and Finance of the Media (3).Analysis of the economic and financial environment of mass media. Examine mass media as they are financed and as they are affected by advertisers, competition, financial

markets, etc.

JOURN 4738--General Semantics in Journalism (3).The everyday usefulness of the methods of science as applied to language and the practice of journalism. The course deals with the general effect of language habits on journalists and their readers/listeners.

JOURN 4802--Fundamentals of TV, Radio and Photojournalism (3).Skills, theory and ethics of broadcast news and photojournalism for non-broadcast majors. Prerequisites: JOURN 2100, junior or sophomore standing with instructor's consent. Graded on A/F basis only.

JOURN 4804--Convergence Reporting (3).Practice and theory of reporting for converged media. Students produce multimedia reports for traditional and converged media operations. Prerequisites: JOURN 4802, junior standing required and instructor's consent. Graded on A/F basis only.

JOURN 4806--Convergence Editing and Producing (3).Practice and theory of editing and producing material for publication or broadcast in a converged environment. Students produce media for multiple outlets. Prerequisites: JOURN 4804, junior standing and instructor's consent. Graded on A/F basis only.

JOURN 4810--Advanced Global Converged News (3).Internet news services offers real-world newsroom experience synthesizing worldwide news coverage and revealing alternative perspectives on current events. Prerequisite: instructor consent; junior or higher standing. Graded on A/F basis only.

JOURN 4940--Internship in Journalism (1-3).Credit for approved employment in journalism. Specifications for this course appear in the Undergraduate Catalog. Prerequisite: Journalism students only. Graded on S/U basis only.

JOURN 4950--Solving Practical Problems in Journalism (3).Finding solutions to practical problems journalists face by applying insights from communication theory, using on-line secondary and syndicated research and conducting original research. Hands-on experience conducting surveys, experiments and qualitative research. Prerequisites: JOURN 2000 and junior standing.

JOURN 4952--Strategic Communication Research I (3).Introduction to techniques and practice of strategic communication research. Emphasis on research techniques and use of research results, including consumer analysis, attitude measurement and evaluation of externally supplied research. Prerequisite: junior standing.

JOURN 4970--Strategic Campaigns (3).This capstone course, gives students a hands-on opportunity to use their skills and apply strategic communication learning to a real client situation. To be taken final semester. Application required for Mojo Ad section and will include additional leadership responsibilities. Prerequisite: JOURN 4206 or 7206.

JOURN 4974--Advanced Internet Applications for Radio/TV News (3).Integration of advanced Internet research and publishing skills with production and management of the KOMU-TV/KBIA Radio World Wide Web news service. Prerequisite: JOURN 4306.

JOURN 4976--Seminar in Radio-TV News

(3).Seminar in network and local news process, in coverage of major issues and social problems, in relationships of radio-TV news and government institutions. Prerequisite: instructor's consent.

JOURN 4978--Media Management and Leadership

(3).Dramatic changes in technology and the media's role in converging technologies require new management and leadership techniques and paradigms. Students will write case examining these changes. Prerequisites: instructor's consent.

JOURN 4980--The Picture Story and Photographic Essay

(3).Production of photo stories/ essays for newspapers, magazines and news media presentations. Research, photography, design and layout. Final portfolio will show journalistic strength and versatility in black and white, and color. Prerequisite: JOURN 4560.

JOURN 4984--Magazine Staff

(3).A laboratory course exploring the role of editorial staff in the magazine editing process. As staff for school-produced magazines, students plan, edit, write display type, proofread and coordinate with writers, photographers and designers. Prerequisites: JOURN 4410, 4408 and instructor's consent.

JOURN 4986--Advanced Writing

(3).For those who wish to emphasize writing as a career. In addition to writing assignments, students discuss writings of well-known magazine and book authors. Prerequisites: JOURN 4450, 4410 and instructor's consent.

JOURN 4988--Advanced Magazine Design

(3).Class critiques of spreads, sequences, and magazines are implemented by students who make typographic specifications and design individual spreads, and complete magazines for actual printed production. Prerequisite: JOURN 4506.

JOURN 4990--Journalism and Democracy

(3).This course seeks to cultivate critical-thinking skills by helping students synthesize and apply knowledge gained from a journalism education to the evaluation of news media performance in a democratic society. Prerequisite: 4450 and second-semester senior standing. Undergraduates only.

JOURN 4992--Reporting, Editing and Marketing of Converged Media

(3).Capstone course bring together the reporting, editing, management and marketing skills gained in previous convergence courses. Students plan, produce, promote and evaluate longform, creative journalistic content. Prerequisite: JOURN 4806, senior standing and instructor's consent. Graded on A/F basis only.

JOURN 4994--Magazine Publishing

(3).The audience, economics, job opportunities and content of the American magazine. Deals with general audience and specialized magazines, business and institutional magazines, news magazines, etc. Case histories of individual magazines, guest lecturers from various fields. Prerequisites: JOURN 4408 and 4410 or 4508. Graded on A/F basis only.

The nursing program at MU began in 1901 with the establishment of Parker Memorial Hospital Training School. Today, the Sinclair School of Nursing is committed to promoting, maintaining and improving health and health-care delivery in Missouri and worldwide through nursing education, research and service. Nursing faculty combine research and education to offer students hands-on experience in the art and science of nursing.

The school offers a baccalaureate program that prepares students for the general practice of nursing, a master's degree program that prepares advanced-practice nurses and a doctoral degree program. The continuing education program serves practicing nurses throughout the state to update and increase nursing knowledge and skills.

The graduate of the baccalaureate program is a generalist in the practice of nursing, able to design, implement and evaluate nursing systems for individuals, families and small groups. As a generalist, the graduate uses a general concept of nursing as a

framework for integrating and organizing specific knowledge in nursing, the sciences and the humanities. Graduates begin their professional careers with a focused nursing perspective and, along with other professional health providers, assume responsibility for meeting the health needs of our society.

The School of Nursing is approved by the Missouri State Board of Nursing and has national accreditation.

The undergraduate program is approved by the Missouri State Board of Nursing. The Baccalaureate Program at the University of Missouri-Columbia is accredited by the Commission on Collegiate Nursing Education, One Dupont Circle, NW, Suite 530, Washington, DC 20036, (202) 887-6791.

ADMISSIONS

Traditional Option

The freshman and sophomore years are designated as the "pre-nursing" years. The junior and senior years are designated as the "clinical nursing major" years. Any student who is a Nursing Scholar is guaranteed admission into the clinical nursing major. *Students apply for admission to the clinical major during the last semester of general education and prerequisite coursework and are admitted to the clinical nursing major on a competitive and space-available basis when prerequisite courses have been completed.*

Each student's application is reviewed systematically and considered holistically for each admission period. The School values MU's Commitment to Diversity and the call of the American Nurses Association that the nursing workforce should reflect the diversity of the population. The School is also committed to rural health care and to educating nurses for practice in rural Missouri. Therefore, the School seeks to ensure that the student body includes persons from rural Missouri and persons of backgrounds that are underrepresented in the nursing workforce.

Clinical application and admission criteria include:

Successful completion of all general education and prerequisite coursework.

Satisfactory grades from biology, chemistry, and two of the three advanced lab sciences (microbiology, anatomy, physiology) to be eligible to apply for the clinical nursing major;

Minimum cumulative grade-point average of 2.5 (on a 4.0 scale) for all college/university courses;

Competitive grade-point average in nursing prerequisite courses

Minimum GPA of 2.5 for any nursing prerequisite courses;

Evidence of capacity to uphold the practice standards and ethical codes of the nursing profession; and

Evidence of motivation toward a nursing career

Licensed Registered Nurses (RNs)

RN/BSN programs is for registered nurses who have earned a diploma or associate degree in nursing and seek a bachelor's degree in nursing. RN/BSN courses are offered via the Internet with limited trips to campus for each nursing course.

RN/BSN registered nurse applicants must meet the same admission standards described above for the Traditional BSN Option. They must be currently licensed to practice nursing (or eligible for licensure) in Missouri or another state. Completion of the program includes 120 credit hours. The length of the program varies, depending on equivalent prerequisite courses completed and choice of part-time or full-time enrollment.

BSN Accelerated Option

The BSN Accelerated Option is a 15 month program designed for individuals who hold a non-nursing degree at the baccalaureate level or higher.

Students are admitted to the Accelerated BSN Option based on the following criteria:

A baccalaureate or higher degree from an accredited college or university.

Two letters of reference from individuals that can attest to the student's motivation and ability to complete a course of intensive study.

Statement of career goals

Description of the applicant's view of nursing as a profession. A personal interview.

Evidence of academic achievement of a 2.5 cumulative GPA or higher on a 4.0 scale on undergraduate degree.

Completion of prerequisite courses with a minimum of a C or better

Evidence of potential and motivation for nursing.

Evidence of prior work success and/or ability to handle a fast-paced academic program.

A Bachelor of Science (BSN) degree is awarded at graduation, and the graduate may be eligible to take the licensing examination to become a registered nurse (RN).

Transfer Students

Students transferring to MU from another accredited institution of higher education or other schools and colleges within the University are subject to the regulations established by the MU Faculty Council concerning transfer of credit.

For more information regarding the transfer guidelines for the School of Nursing, call (573) 882-0277. Prior to admission, transfer students must have the following:

- Appropriate GPA for credit hours attempted
- Approval from the associate dean's office

<http://www.missouri.edu/admissions/>

International Students

In addition to the admission criteria described above, international students must meet the following criteria:

- Test of Written English (TWE) score of 4 or higher
- Test of Spoken English (TSE) score of 50 or higher
- TOEFL score of 600 (paper-based) or 250 (computer-based) or 100 (internet-based)

- English Language Support Program Test taken with success

ACADEMIC REGULATIONS

Credit by Examination

Students may earn advanced-standing credit in some courses by satisfactorily completing examinations. Those who elect not to take the examinations or who fail to achieve satisfactory results are required to enroll in the courses. The cumulative grade point average is not affected by examination results. A student who has a record of enrollment in a support course with a grade lower than C is not eligible later for credit on the basis of an examination covering the same subject.

The student may acquire advanced standing by taking subject CLEP examinations in university general education courses and required support courses. If no CLEP examination is offered, department examinations may be available.

Maximum Credits Enrolled

A student with a cumulative GPA below 3.0 must obtain permission from the associate dean to enroll for more than 16 credits.

Distance Education Courses

Certain courses offered by the University's Center for Distance and Independent Study may be applied toward degree requirements. Courses such as literature, advanced psychology or sociology may be taken through independent study. Students should not expect to begin nor continue work on independent study courses during the regular semester except by special permission of the associate dean and then only when carrying less than a full course load in residence.

Progression Criteria

Pre-nursing Years

- Satisfactory academic standing requires a minimum semester GPA of 2.0 and a cumulative GPA at or above the standards listed below:

Freshman	1st semester	1-15 credits	2.3
Freshman	2nd semester	16-30 credits	2.5
Sophomore	3rd semester	31-45 credits	2.5
Sophomore	4th semester	46-60 credits	2.5

- A grade of C or better is required for anatomy, biology, chemistry, ENGLSH 1000, human development, microbiology, nutrition, pharmacology, physiology, zoology, nursing courses and Writing Intensive courses. A grade of D or F is not acceptable in algebra or statistics.
- Students may repeat a course in which an unsatisfactory grade was earned. If less than a C is earned on repetition of a course, students are ineligible to continue enrollment in the School of Nursing.
- Students who are in the traditional BSN option and withdraw in good standing for any reason must contact the Associate Dean for readmission.

Clinical Nursing Years

- Progression into the next semester's nursing courses is contingent on the completion, with a grade of C or better, of all

of the previous semester's courses.

- A satisfactory academic standing for clinical students is a minimum semester GPA and cumulative GPA of 2.0.
- A grade of C or better is required for all nursing courses. One repetition of a course is permitted, but requires approval of SAP committee. Students who earn less than a C on repetition of a nursing course are ineligible to continue enrollment in the School of Nursing.
- Students in the clinical nursing phase who withdraw in good standing for any reason must contact the Associate Dean for readmission.

Probation and Academic Dismissal

The faculty of the School of Nursing has established criteria governing nursing probation and dismissal.

Pre-nursing Years

- Students who do not meet the requirements set forth in the progression criteria are placed on academic probation. They must attain the cumulative grade point average required for their classification, as outlined above, within two semesters or they are ineligible to re-enroll in the School of Nursing. This constitutes dismissal from the School of Nursing.
- A student whose semester GPA falls below 1.0 is ineligible to re-enroll at MU for the period of one year.

Clinical Nursing Years

- A student who does not meet the requirements set forth in progression criteria is placed on academic probation.
- A student on academic probation must obtain a cumulative GPA of 2.0 within two semesters or is ineligible to re-enroll in the School of Nursing.
- Students who have been dismissed may reapply through the established admissions procedure for all students and petition the Faculty Assembly Student Admissions and Progression Committee. Students who are readmitted are guided by the rules in operation for the class they join.
- A student in the clinical nursing phase who has been dismissed from the School of Nursing for a second time may not reapply for admission.

Major Core Requirements - Nursing (BSN)

The completion of all requirements for graduation is the responsibility of the student. The Bachelor of Science in Nursing (BSN) is granted to candidates who have satisfactorily completed all of the following requirements:

- Completion of all foundational and clinical nursing courses
- Minimum cumulative GPA of 2.0
- No more than 30 credits through independent study or extension courses
- Completion of all University graduation requirements, including University general education requirements

Pre-Nursing requirements60-63

Curriculum is based on prerequisite of one year of high school biology with lab and grades of C or better. The student must meet all University general education requirements.

NURSE 4970: Nursing in Communities	5
Total for BSN	123-127

Additional Requirements

Students in the clinical phase of the degree requirements must be prepared to provide their own transportation to clinical agencies. In addition, they must meet the following requirements:

- Valid CPR certificate
- Yearly TB tests
- Hepatitis B series
- School of Nursing medical form showing current immunizations
- Negative drug screen
- Criminal background check

Practicums

Clinical practicums (patient/client care) are an integral part of the curriculum. Students have the opportunity to practice in a variety of health care and related agencies, including:

- University of Missouri Health Care
- Boone Hospital Center
- Truman Veterans Hospital
- Fulton State Hospital
- Mid-Missouri Mental Health Center
- Multiple county and city health departments
- Long-term care facilities
- Day-care centers
- Schools (K-12)

Licensure by the Missouri State Board of Nursing

On receipt of the Bachelor of Science in Nursing degree, students may be eligible to write the NCLEX examination for licensure as registered nurses. The Missouri State Board of Nursing grants a license to practice to persons who meet the policies and regulations contained within the Nursing Practice Act, Chapter 335.011 to 335.096.

STUDENT SERVICES

Advising

The academic advisor's office is in room S235 of the School of Nursing Building, (573) 882-0277. In addition, each clinical nursing major is assigned a faculty adviser who is available for consultation about academic or professional matters.

Health Care

Nursing students participate in a variety of on- and off-campus educational experiences. The School of Nursing does not assume responsibility for health-care expenses incurred in either setting.

NURSING COURSES

NURSE 1000--Advisory Seminar for Nursing (1). Orientation to the undergraduate nursing program, professional role development, and introduction to the professional milieu. Graded on an S/U basis only.

NURSE 2000--Nursing as a Profession (3). Introduces the structure of nursing knowledge and explores professional nursing role characteristics from historical, ethical, legal, economic, professional, occupational and social

perspectives. Examines nursing as subsystem of the health care system. Prerequisite: sophomore standing.

NURSE 2900--Introduction to Nursing Science (3). Introduces nursing as a science from the perspective of knowledge development. Structures nursing knowledge from a self-care deficit nursing theory perspective. Presents nursing research as a method of knowledge development and validation. Prerequisite or concurrent: Statistics.

NURSE 3002--Topics in Nursing - Biological, Physical, Mathematical (1-3). Specialized topics in nursing not available through regularly offered course. Any semesters, no prerequisites. Sections may be offered either on S/U or A/F basis.

NURSE 3006--Cultural Expeditions in Nursing (3). Directed field experiences in varied settings exploring local customs and cultural/ethnic diversities influencing health care delivery. Prerequisite: NURSE 3670 and instructor's consent. Graded on S/U basis only.

NURSE 3080--Communication and Computer Skills (2). Introduces RN students to MU and MU Sinclair School of Nursing. Provides education in essential competencies needed for success in the RN-BSN Option including writing skills, computer literacy, library and Internet research. Prerequisite: clinical major.

NURSE 3100--Pharmacology for Nursing (3). This course will focus on pharmacological classification and the nurse's role in medication administration and patient education. Medication issues with special populations will be addressed. Prerequisites: Anatomy and Physiology or instructor's consent. May be repeated for credit. Graded on A/F basis only.

NURSE 3170--Methods of Assisting I (3). Introduces methods of assisting. Focuses on application of therapeutic interventions and technologies to provide direct care in selected nursing situations. Co-requisite: NURSE 3270.

NURSE 3180--Role Transitions (3). Explores returning-to-school issues important to adult learners. Links previous basic nursing courses with baccalaureate courses and begins building new knowledge on prior nursing education. Pre/Co-requisite: NURSE 3080.

NURSE 3200--Pathophysiology and Therapeutics (5). Focuses on commonly occurring alterations in health as a result of pathophysiological deviations. Developmental concepts, diagnostics, and treatment modalities are integrated throughout course content. Prerequisite: Anatomy and Physiology.

NURSE 3260--Pathophysiology (3). Focus is on commonly occurring alterations in health across the life-span. Development concepts, diagnostics, and treatment modalities are integrated throughout course content. Enrollment requires admission to the accelerated BSN option. May be repeated for credit. Graded on A/F basis only.

NURSE 3270--Foundations of Nursing: Physical Assessment & the Nursing Process (6). Provides knowledge and skills in physical assessment and applications of nursing process. Foundational knowledge is applied to individual patients in clinical settings. Pre/co-requisite: NURSE 2000, 2900, 3170, 3200, pharmacology.

NURSE 3350--Individual Study (cr. arr.). Independent study for qualified students in specific areas of interest in nursing under faculty guidance. Prerequisite: instructor's consent.

NURSE 3570--Methods of Assisting II (2). Expands on Methods of Assisting I. Focuses on application of selected complex nursing interventions to provide direct care in selected nursing situations. Prerequisite: NURSE 3170, corequisite: clinical course.

NURSE 3670--Nursing of Adults I (6). Application of nursing process to care for adults with chronic physiological health deviations. Psychosocial health factors developmental states will be incorporated in designing individualized nursing systems in various settings. Prerequisites: NURSE 3270; Pre/corequisite 3570.

NURSE 3750--Nursing of the Childbearing Family (4). Provides learning experience with childbearing family. Applies nursing process to promote health and well-being for the childbearing family. Prerequisites: NURSE 3260, 3270, and admission to accelerated BSN option. Graded on A/F basis only. May be repeated for credit.

NURSE 3760--Pediatric Nursing (3). Provides learning experiences with children and their families from newborn to adolescents. Examines health alterations that interfere with self-care in and for children. Prerequisites: NURSE 3260, 3270, admission to accelerated BSN option.

NURSE 3770--Nursing of Women and Newborns (5). Focuses on newborn care, women's reproductive and postreproductive health, and health deviation concerns of women and newborns. Emphasizes development, implementation, and evaluation of nursing systems for families and their members. Prerequisite: NURSE 3270.

NURSE 3870--Gerontological Nursing Care (3). Emphasis on normal aging processes, health promotion, disease prevention, and management of acute and chronic health problems in the older adult. Prerequisite: NURSE 3270.

NURSE 4200--Nursing Ethics and Law (3-4). Analyzes clinical nursing situations using ethical principles and decision-making models. Examines the basic doctrines and principles foundational for providing legally sound nursing practice. Pre/Corequisite: Senior Clinical Major or NURSE 3080.

NURSE 4270--Nursing of Children (5). Nursing of children with acute and chronic health and developmental deviations. Self-care and dependent care abilities are emphasized. Content includes health promotion for infants and children. Prerequisites: NURSE 3670 and 3770.

NURSE 4300--Nursing Issues/Leadership and Management (2). Examines leadership and organizational theories in relation to resource management and effective delivery of nursing to sets of clients. Analyzes societal/political issues and trends related to nursing and contemporary health care. Pre/Corequisite: NURSE 3670 or NURSE 3180 or instructor's consent.

NURSE 4370--Mental Health Nursing (5). Behavioral, social, interpersonal, and systems dimensions of nursing. Emphasis is on therapeutic use of self in designing and implementing

NURSE 4380--Health Assessment and Pathophysiology (4). Examines biologic basis for selected commonly occurring diseases throughout the life-span. Study and performance of health assessments with application of findings to adults and children. Prerequisites: NURSE 4950.

NURSE 4580--Evidence-Based Nursing Practice (4). Concepts of evidence-based nursing practice are applied to selected clinical situations. Care of aging person and patient safety issues are included. Clinical application experiences are designed to translate research to practice. Pre/Corequisite: NURSE 4380.

NURSE 4600--Women's Health (3). (same as Women's and Gender Studies 4600). A survey of international and domestic women's health issues; considers historical antecedents and specific effects of socio-cultural variables and economic development on women's health in developing and developed nations.

NURSE 4870--Nursing of Adults II (7). Application of nursing process to care for adults with acute physiological health deviations. Leadership and management principles are integrated in delivering care for sets of clients. Prerequisites: NURSE 4270, 4370; or pre/corequisite: 4300.

NURSE 4875--Principles of Public Health Nursing: Population-Based Practice (4). Focuses on population-based concepts of public health nursing and application to practice through completion of a major project. Designed for practicing public health nurses employed in local public health agencies in Missouri. Prerequisites: RN license and employed in Public Health in Missouri. Course may be repeated for credit. Graded on A/F basis only.

NURSE 4950--Nursing Theory and Research (3). Addresses nursing research as means of acquiring and refining knowledge. Research utilization to impact nursing addressed. Examines development and utilization of nursing theory, primarily Self-Care Deficit Nursing Theory. Pre/corequisite: NURSE 3080.

NURSE 4970--Nursing in Communities (5). Examines roles and functions of nurses within community with emphasis on application of community/public health concepts and design and implementation of nursing systems of care for individuals, families, and populations. Prerequisite: NURSE 4270 and 4370; or 3760 or 4580.

NURSE 4975--The Capstone Experience (1). Community project-based course that integrates and applies principles previously learned in the RN-BSN curriculum. Open to students who have previously completed Nursing 4875. Prerequisites: NURSE 4875; RN license and employed in Public Health in Missouri. Course may be repeated for credit. Graded on A/F basis only.

(573) 882-1620

Below are undergraduate courses offered through the Student Success Center. For an explanation of services and programs, see pg. 37 in this catalog.

STUDENT SERVICES COURSES

SSC 1020--University Freshmen Seminar (1).(same as Interdisciplinary Studies 1020). To maximize student's potential to achieve academic success and to adjust responsibly to the individual and interpersonal challenges presented by collegiate life. Attainment of an appropriate balance between personal freedom and social responsibility underlies all seminar activities. Prerequisite: Restricted to first time college student. No credit for students who have earned credit for AGRIC 1115, INTRDS 1001, IS LT 1110, ELPA 3100 or an equivalent first-year orientation course at another institution. Credit restrictions that apply to orientation classes apply to this course. Students are not allowed to be enrolled in SSC 1020 and SSC 1150 in the same semester.

SSC 1020H--University Freshmen Seminar - Honors (1).(same as Interdisciplinary Studies 1020). To maximize student's potential to achieve academic success and to adjust responsibly to the individual and interpersonal challenges presented by collegiate life. Attainment of an appropriate balance between personal freedom and social responsibility underlies all seminar activities. Prerequisite: Restricted to first time college student. No credit for students who have earned credit for AGRIC 1115, INTRDS 1001, IS LT 1110, ELPA 3100 or an equivalent first-year orientation course at another institution. Credit restrictions that apply to orientation classes apply to this course. Students are not allowed to be enrolled in SSC 1020 and SSC 1150 in the same semester. Honors eligibility required.

SSC 1150--Learning Strategies for College Students (1-3).Students' learning strategies are assessed, and their needs are given greatest emphasis. Learning through reading and listening are given major consideration as are the corollary skills of vocabulary expansion, studying and note taking.

SSC 1151--Learning and Motivation (3). To maximize student's potential to achieve academic success and to adjust responsibly to the individual and interpersonal challenges presented by collegiate life. Restricted to first time college students. No credit for students who have earned credit for AGRIC 1115; INTDSC 1001; IS LT 1110; ELPA 3100, or an equivalent first-year orientation course at another institution. Credit restrictions that apply to orientation classes apply to this course. Students not allowed to be enrolled in SSC 1020, 1150 or 1151 in the same semester.

SSC 1500--Disney Internship (0). Internship: Experiential learning as a "cast member" of the Walt Disney World College Program. Students work for a semester at the Walt Disney World resort and have the option of taking Disney Classes. Prerequisites: instructor's consent; departmental signature. Graded on S/U basis only.

SSC 2100--Career Explorations (1-3). Contribution of career development theory to choice of career and/or major. Exploration of personal and social determinants of career choice. Class consists of lecture, laboratory experiences, and use of facilities at the Career Planning and Placement Center.

SSC 2150--Tutoring University Students: Theory & Practice (3). An introduction to tutoring university students. Provides a pedagogical foundation for tutoring college students in content areas. Topics include but are not limited to diversity, the tutoring relationship, plagiarism, learning strategies, and best practices. Students will observe tutorials during the first part of the course and will conduct their own tutorials later in the semester. Graded on A/F basis only. Prerequisite: Instructor's consent.

SSC 3100--Advanced Disney Internship (0). Advanced Internship: Experiential learning opportunity with the Walt Disney World College Program. Students work for a semester at the Walt Disney World resort and have the option of taking Disney classes. This is a second internship that is more field-specific and carries with it more responsibilities. Prerequisite: instructor's consent, departmental signature. Graded on S/U basis only.

Student
Success Center

Graduate School

Nuclear Science and Engineering Institute

Graduate School
<http://nsei.missouri.edu>

The NSEI administers the graduate Nuclear Engineering degree program, with some courses available to undergraduate students. Undergraduate minors are available in one of three emphasis areas in Nuclear Engineering. The descriptions and requirements for each of these are listed below.

FACULTY

CURATORS' PROFESSOR S. K. Loyalka

PROFESSOR H.R. Chandrasekhar, M. Chandrasekhar, G. Christensen, R. Curry, J. Gahl, T. Ghosh, V. Gopalartnam, T. Hoffman, D. Jonassen, S. Jurisson, K. Katti, P. Miceli, W. Miller, J. S. Morris, T. Quinn, M. Prelas, J.D. Robertson, A. Singh, H. Taub, H. Tyrer

ASSOCIATE PROFESSOR J. Lattimer, J. Lever, S. Lever, M. Lewis, R. Marra, R. Thompson, K. Trauth, A. Winholtz, D. Worcester.

ASSISTANT PROFESSOR L. Ma, J. Smith, P. Yu

RESEARCH PROFESSOR G. Ehrhardt, J. Farmer, K. Gangopadhyay, M. Glascock, K. Hickey, A. Ketring

RESEARCH ASSOCIATE PROFESSOR E. Boote, C. Cutler, D. Kutikkad

RESEARCH ASSISTANT PROFESSOR M. Giblin, T. Hander, C. McKibben

PROFESSOR EMERITUS R. Brugger, M. Devaney, A.H. Emmons, J. Kunze, T. Storvick, H. Tillema, D. Viswanath, W. Volkert

Minor Program Requirements

Three minors are offered within the Nuclear Engineering academic curriculum to provide students the opportunity to obtain education and training in the nuclear sciences: Nuclear Engineering; Medical and Health Physics, and Radioenvironmental Sciences. Each minor requires a minimum of 15 credits of course work. As background preparation, the Nuclear Engineering minor requires math through differential equations and two semesters of calculus-based physics. The other two minors require prerequisites of a minimum of college algebra and two semesters of college physics.

Minor in Nuclear Engineering

The minor in Nuclear Engineering is designed for students in the College of Engineering who are interested in nuclear power engineering. The minor is satisfied by selecting five courses from the following list (*courses denoted with an "*" are required*):

- ENGR 2300: Engineering Thermodynamics* (3)
- NU ENG 2201: Topics in Nuclear Engineering (3)

- NU ENG 4303: Radiation Safety (3)
- NU ENG 4315: Energy Systems and Resources* (3)
- NU ENG 4330: Scientific and Technology of Terrorism and Counter Terrorism (3)
- NU ENG 4346: Introduction to Nuclear Reactor Engineering I* (3)
- NU ENG 4353: Introduction to Fusion (3)
- NU ENG 4391: Nuclear Radiation Detection* (*co-taught with CHEM 4600*) (3)

Minor in Medical/Health Physics

The minor in Medical/Health Physics is designed for students from Biology, Chemistry, Engineering, Physics or related disciplines who are interested in the biological effects of radiation in medical utilization and in occupational health and safety. The minor is satisfied by selecting five courses from the following list (*courses denoted with an "*" are required*):

- NU ENG 2201: Topics in Nuclear Engineering (3)
- NUCMED 3256: Clinical Nuclear Medicine I (3)
- NU ENG 4303: Radiation Safety* (3)
- CHEM 4170: Medicinal Chemistry (3)
- NU ENG 4319: Physics and Chemistry of Materials (3)
- NU ENG 4328: Introductory Radiation Biology* (3)
- NUCMED 4329: Radiopharmaceuticals in Nuclear Medicine (3)
- BIOL EN 4570: Biomedical Imaging (3)
- NU ENG 4391: Nuclear Radiation Detection* (*co-taught with CHEM 4600*) (3)
- BIOCHM 3630: General Biochemistry (3)

Minor in Radioenvironmental Sciences

The minor in Radioenvironmental Sciences is designed for students from Biology, Chemistry, Engineering, Physics or related disciplines who are interested in radiation in the environment. The minor is satisfied by selecting five courses from the following list (*courses denoted with an "*" are required*):

- NU ENG 2201: Topics in Nuclear Engineering (3)
- NU ENG 4303: Radiation Safety* (3)
- NU ENG 4328: Introductory Radiation Biology* (3)
- NU ENG 4330: Scientific & Technology of Terrorism and Counter Terrorism (3)
- Terrorism & Counter Terrorism (3)
- NU ENG 4350: Nuclear Methods in Bioenvironmental Studies (3)
- NU ENG 4379: Particulate Systems Engineering (3)
- NU ENG 4391: Nuclear Radiation Detection* (*co-taught with Chem 4600*) (3)
- CHEM 3300: Fundamentals of Physical Chemistry (3)
- CHEM 4280: Environmental Chemistry (3)
- CV ENG 3200: Fundamentals of Environmental Engineering (3)
- CV ENG 4220: Hazardous Waste Management (3)
- CV ENG 4250: Environmental Regulation and Compliance (3)

GRAD COURSES

GRAD 4010--Preparing To Be A Graduate Teaching Assistant (1). Provides an understanding of the roles and responsibilities of teaching assistants to prepare students for graduate school. Learning will take place through observation, lecture, reading and discussion. Graded on S/U basis only.

NUCLEAR ENGINEERING COURSES

NU ENG 2201--Topics in Nuclear Engineering (3). Current and new developments in nuclear engineering. Prerequisites: sophomore standing; PHYSCS 1210 and 1220 and MATH 1100 or 1120 or instructor's consent.

NU ENG 2303--Harnessing the Atoms in Everyday Life: Fulfill M Curie's Dream (3). Introduction to applications of nuclear science and technology, utilizing web-based learning scenarios.

NU ENG 4001--Topics in Nuclear Engineering (2-5). Current and new developments in nuclear engineering. Prerequisite: instructor's consent. May be repeated for credit.

NU ENG 4302--Safe Handling of Radioisotopes (1). Introduction of methods and procedures for safe handling of radioisotopes in the research laboratory. Intensive lecture and laboratory training sessions designed for persons planning to use radioisotopes at the University. Prerequisite: instructor's consent.

NU ENG 4303--Radiation Safety (3). Types and origins of radiation; radiation detection and measurement; radiation interactions; shielding; dose calculations; federal, state and local regulations; and procedures for safe uses of radiation. Laboratory experiments in radiation measurements and protection. Prerequisite: college physics, calculus based.

NU ENG 4305--Survey of Nuclear Engineering (3). Introductory topics in nuclear engineering. Atomic and nuclear physics; nuclear reactor principles under steady-state and transient conditions; heat removal; shielding; instrumentation; power generation; fusion. Prerequisite: concurrent with MATH 4100.

NU ENG 4306--Advanced Engineering Math (3). (same as Chemical Engineering 4306). Applies ordinary and partial differential equations to engineering problems; Fourier's series; determinants and matrices; Laplace transforms; analog computer techniques. Prerequisite: MATH 4100.

NU ENG 4315--Energy Systems and Resources (3). (same as Electrical and Computer Engineering 4020). Analysis of present energy usage in Missouri, USA and

the world, evaluation of emerging energy technologies and trends for the future. Economics and environmental impact of the developed technologies. Prerequisite: ENGINR 2300 or equivalent.

NU ENG 4319--Physics and Chemistry of Materials (3). (same as Physics 4190 and Nuclear Engineering 4319). Undergraduate/graduate level course offered every winter semester for students from Physics, Chemistry, Engineering and Medical Departments and consists of lectures, laboratory demonstrations, two mid term and one final exam. Graduate students will submit a term paper. Prerequisite: PHYSCS 2760 and CHEM 1320 or equivalent and instructor's consent.

NU ENG 4320--Natural Resources and Nuclear Energy (3). Not for engineering students. Lecture, demonstration; describes physical environment, energy, power plants, nuclear reactors; radioactivity, its biological effects; health physics measures, rad-waste disposal; nuclear safeguards, nuclear explosives, societal implications. Prerequisite: high school algebra.

NU ENG 4328--Introductory Radiation Biology (3). (same as Biological Sciences 4328, Radiology 4328, Veterinary Medicine & Surgery 7328). Concepts of ionizing radiations, their actions on matter through effects on simple chemical systems, biological molecules, cell, organisms, man. Prerequisite: junior standing, Sciences/Engineering; one course in Biological Sciences and Physics/Chemistry; or instructor's consent.

NU ENG 4330--Science and Technology of Terrorism and Counter Terrorism (3). (same as Peace Studies 4330). Terrorism has been a familiar tool of political conflict, and it has assumed greater importance during the past twenty years. This subject has been treated by political scientists in various forms, but the scientific and technological aspects of different forms of terrorism cannot be found in a single place. It is important for persons who propose counter measures to understand the basics of different types of terrorism such as for instance the nature of chemical agents, their properties such as toxicity, etc. in order to build better defense systems.

NU ENG 4331--Nonproliferation Issues for Weapons of Mass Destruction (3). Nonproliferation and impact on technology and world events. Prerequisites: junior/senior standing or instructor's consent. May be repeated for credit.

NU ENG 4341--Nuclear Chemical Engineering (3). Principles and processes of importance in the field of nuclear technology.

NU ENG 4346--Introduction to Nuclear Reactor Engineering I (3). (same as Electrical and Computer Engineering 4030). Engineering principles of nuclear power systems, primarily for the production of electrical energy. Prerequisites: ENGINR 1200, 2300 or equivalent.

NU ENG 4349--Nuclear Engineering Materials (3). Properties of materials for reactor components; radiation damage and corrosion; metallurgy of reactor materials. Prerequisites: upper division or graduate standing in Physical Sciences or Engineering, or instructor's consent.

NU ENG 4350--Nuclear Methods in Bio-environmental Studies (3). Principles/applications of nuclear techniques in solution of bioenvironmental problems. Uses of nuclear methods in studies of water/air pollution, biology, medicine, pesticides, geochemistry, ecological transport. Lectures, laboratory. Prerequisites: senior standing or instructor's consent.

NU ENG 4353--Introduction to Fusion (3). Basic plasma physics, principles of thermonuclear fusion, plasma confinement and heating, and devices. Prerequisites: senior standing in Engineering or Science or instructor's consent.

NU ENG 4357--Nuclear Heat Transport (2). Principles of heat transport in nuclear reactors. Brief review of the theory of flow coast down and convective heat transfer. Heat transfer loop experiments on flow coast down, steady state and transient forced convection heat transfer, boiling heat transfer. Prerequisites: NU ENG 4305, 4346 or instructor's consent.

NU ENG 4365--Nuclear Power Engineering (3). Nuclear reactor heat generation and removal; nuclear reactor coolants; analysis of nuclear reactor power plants. Prerequisite: ENGINR 2300.

NU ENG 4369--Principles of Direct Energy Conversion (3). Principles and utilization of thermoelectric, thermionic, photovoltaic, magnetohydrodynamic generators and fuel cells. Prerequisites: ENGINR 2300, MAE 3400, or equivalent.

NU ENG 4375--Introduction to Plasmas (3). (same as Electrical and Computer Engineering 4550). Equations of plasma physics, interaction of waves and plasmas; plasma sheaths and oscillations; measurements and applications. Prerequisites: ECE 4930 or instructor's consent.

NU ENG 4379--Particulate Systems Engineering (3). An introduction to natural and engineered particulate systems. Prerequisites: CH ENG 3234 or MAE 4300 or equivalent.

NU ENG 4382--Lasers and Their Applications (3). (same as ECE 4570). Introduction to lasers, from both a conceptual

viewpoint and from the application of Maxwell's equation, to develop the optical theory for lasers. Prerequisites: PHYSCS 2760, and MATH 4100.

NU ENG 4391--Nuclear Radiation Detection (3).Principles and application of radiation detectors and analyzers: ionization, Geiger-Muller, proportional, liquid and solid scintillation, semiconductor, pulse height analyzers, coincidence circuits, data reduction, tracer applications, activation analysis. Lectures, laboratory. Prerequisites: senior standing or instruc-

BIOMEDICAL SCIENCES COURSES

BIOMED 1010--Biomedical Career Explorations (1).An introduction to the variety of career possibilities within the growing field of biomedical sciences. Speakers from various aspects of biomedical sciences will be invited to present opportunities within their respective disciplines. Graded on S/U basis only.

BIOMED 2001--Topics in Veterinary Biomedical Science (cr.arr.).May be repeated 2 times for credit. Prerequisite: instructor's consent. Graded on A/F basis only.

BIOMED 2085--Problems in Biomedical Research (cr.arr.).Assignment of special Topics for Research training in biomedical research. Prerequisite: instructor's consent.

BIOMED 2110--Biomedical Terminology (3).Life science etymology (Greek for "true meaning, means the study of word derivation) taught by classroom presentation and discussion. The course organization is based primarily on common themes of Greek and Latin terms along with historical reasons for current usage. The application of these terms is for all biomedical sciences and life sciences. Graded on A/F basis only.

BIOMED 2111--Veterinary Medical Terminology (1).Veterinary Medical Terminology is an extension of BIOMED 2110, Biomedical Terminology. The course organization is lecture, based primarily on domestic species and common themes of Greek and Latin terms. In addition, major veterinary medical eponyms, acronyms, and medical and surgical instruments are included. Prerequisites: BIOMED 2110 or instructor's consent. Graded on A/F basis only.

BIOMED 2120--Animal Handling and Physical Restraint (2).Fundamentals of handling and physical restraint of domestic large and small animals, laboratory animals, and common non-domestic pets. Graded on A/F basis only.

BIOMED 2140--Companion Animals (3).(same as Animal Science 2140). Focus on companion dog, cat, horse owners concerns re:

FACULTY

PROFESSOR F. Booth, C. B. Chastain, M. H. Laughlin,
R. Johnson, P. Johnson

ASSOCIATE PROFESSOR Ross P. Cowart,

C.S. Reddy

ASSISTANT PROFESSOR T. Reilly, D. Bowles

CLINICAL ASSISTANT PROFESSOR K. Branson,
C. Datz

In addition to the four-year professional curriculum leading to the Doctor of Veterinary Medicine (DVM) degree, the college offers a variety of undergraduate courses. Currently the college does not offer a major or minor in any of the departments. However, courses serve as electives for other degree programs, a component to the Bachelor of General Studies degree program, and as partial requirements in the Pre-veterinary Medicine and Agriculture Scholars programs.

health, zoonoses, legal responsibilities, inbreeding, choice of breeds, behavioral problems and loss of companion animals.

BIOMED 2210--Microbiology for the Health Sciences (5).Introductory course for students in the applied health curricula. Presents biomolecules of life, enzyme interaction, physiology and structure of representative organisms. Emphasizes bacteria, viruses, fungi and protozoa of health significance. Prerequisite: CHEM 1100 or equivalent and instructor's consent. Graded on A/F basis only.

BIOMED 2230--Animal Sanitation and Disease Prevention (3).Preventative measures for diseases and parasites of farm animals.

BIOMED 2235--Domestic Animal Behavior (3).An examination of the effects of domestication on the behavior of companion and food animal species. Comparisons to similar animals in feral or wild conditions will be made. The causes, development and potential treatments of abnormal behavior will also be examined. Graded on A/F basis only.

BIOMED 2420--Biology of Healthy Living (2).(same as PH THR 2420 and NUTRS 2420). Biology of inactivity as a casual factor in chronic disease.

BIOMED 2940--Internship in Biomedical Sciences (1-6).Supervised work experience to develop technical skills and enhance student knowledge in an area of biomedical science. Not intended for more than 50% independent research. Graded on S/U basis only. Prerequisites: sophomore standing and instructor's consent.

BIOMED 3001--Topics in Biomedical Sciences (cr.arr.).Topics in Biomedical Sciences.

BIOMED 3085--Problems in Biomedical Science (cr.arr.).Assignment of special topics for research training in biomedical research. Prerequisite: DVM degree and instructor's consent.

BIOMED 3219--Elements of Comparative

Anatomy (5).Relationship of organ structure and function in humans and common domestic animals. Graded on A/F basis only. Prerequisites: five hours of biological science or zoology or equivalent and instructor's consent.

BIOMED 3250--Parasitology (3).Parasitism is considered as a fundamental type of interspecies interaction. Identifying characteristics, life cycle, and resulting disease caused by the common parasites of domestic animals, common laboratory animals, selected wildlife, and humans are described. Special emphasis is given to parasites that can be transmitted from animals to man. Prerequisite: 8 hours of biology or instructor's consent.

BIOMED 3300--Animal Welfare and Ethics (3).An introductory examination of contemporary ethical issues related to biomedical science including animal welfare, agriculture, and cloning. Topics related to animal law issues will also be discussed. Prerequisite: junior standing.

BIOMED 3310--Equine Health Topics (3).An in-depth examination of equine disease and health topics that are pertinent to today's horse owner and veterinarian. The course will integrate horse management practices with disease recognition, control and prevention. Students will learn how to recognize problems and when to call a veterinarian. Emerging disease problems such as West Nile Virus will be examined as well as topics of continuing concern. Prerequisites: AN SCI 4977 or equivalent or instructor's consent. Graded on A/F basis only.

BIOMED 3326--Pharmacology (3).An introduction to terminology used in pharmacology. Mechanisms of drug administration, absorption, distribution, metabolism, and excretion are described. Basics of drug actions and the medicolegal aspects of pharmacology are discussed.

BIOMED 3335--Techniques in Pathology (cr. arr.).Methods and techniques in fixing, prepar

ing, staining pathological specimens.

BIOMED 3347--Clinical Epidemiology and Environmental Health (1-10). Ecologic basis of health and disease and cause-effect relationships. Evaluation of control programs. Includes epidemiology of important acute and chronic animal diseases.

BIOMED 4001--Topics in Biomedical Sciences (cr.arr.). Topics in Biomedical Sciences.

BIOMED 4010--Life Sciences Research: Models and Methods (3). (same as V_BSCI 4010). A review of basic laboratory animal and non-animal research models and procedures commonly used in the life sciences area in academia and drug/chemical industry. Prerequisite: Biology or Cell Biology; junior standing required. Graded on A/F basis only.

BIOMED 4310--Basics of Equine Theriogenology (3). An in-depth introduction to normal and abnormal aspects of horse reproduction including diseases, assisted reproductive technologies and neonatology. Prerequisite: AN SCI 3254 or equivalent; instructor's consent. Graded on A/F basis only.

BIOMED 4333--Veterinary Cell Biology (4) (same as Veterinary Biomedical Science 5506). Course material stresses cell biology as related to animal health and medical issues. A comprehensive course overviewing molecular and biochemical issues of cell function especially as related to medicine and the underlying molecular causes of disease. Prerequisite: instructor's consent.

BIOMED 4993--Internship in Veterinary Medical Technical Specialties (1-6). Supervised work experience in the MU Veterinary Medical Teaching Hospital of affiliated veterinary medical specialty practices or in MU laboratory animal facilities to develop technical skills and knowledge relevant to becoming a specialist in veterinary medical technology. A written report and oral presentation are required. Graded on S/U basis only. Prerequisites: junior standing, an AAS degree from an AVMA accredited veterinary technical program or its equivalent, and instructor's consent.

<http://som.missouri.edu/>

HEALTH MANAGEMENT AND INFORMATICS COURSES

HMI 2210--The American Health Care System (3). Student is provided with a basic understanding of the major components (financing, planning, and regulating) of the American health care system. Emphasis is placed on current issues and their impact on the delivery system.

HMI 3310--The Health Care System (3). Overview of health care system and relationship between its components. Focuses on changing nature of the system and issues confronting the future health care system. Prerequisite: senior standing.

RADIOLOGY COURSES

RADIOL 4328--Introductory Radiation Biology (3). (same as Biological Sciences 4328, Nuclear Science and Engineering 4328, Veterinary Medicine and Surgery 7328). Concepts of ionizing radiations, their actions on matter through effects on simple chemical systems, biological molecules, cell, organisms, man. Prerequisite: junior standing Sciences/Engineering; one course in Biological Sciences and Physics/Chemistry; or instructor's consent.

Medical Pharmacology and Physiology

School of Medicine
MA415 Medical Science Building
(573) 882-4957
<http://www.muhealth.org/~mpp/>

FACULTY

PROFESSORS E. H. Blaine, G. E. Davis, M. J. Davis,
W. Durante, L. R. Forte, C. D. Hardin, M. A. Hill,
L. J. Holland, T.W. Hurley, V. H. Huxley, T. C. Hwang,
R. J. Korthuis, G. A. Meininger, M. A. Milanick, M. J.
Rovetto, S. S. Segal, S. D. Shukla

ASSOCIATE PROFESSORS K. H. Byington,
S. P. Halenda, M. J. James-Kracke, R. W. Lim,
K. S. McDonald, P. A. Wilden

ASSISTANT PROFESSORS P. J. Fadel,
L. A. Martinez-Lemus, L. Polo-Parada, G. Sowa

JOINT PROFESSORS F. W. Booth, K. C. Dellsperger,
W. P. Fay, E. M. Hasser, M. H. Laughlin, L. J. Rubin,
J. R. Sowers, R. L. Terjung

JOINT ASSOCIATE PROFESSORS D. K. Bowles,
V. Demarco
K. D. Gillis, J. A. Ibdah, J. R. Lever

JOINT ASSISTANT PROFESSOR M. Thakkar

The Department of Medical Pharmacology and Physiology in the School of Medicine does not offer an undergraduate degree in Medical Pharmacology and Physiology, but some courses are available to undergraduate students.

MEDICAL PHARMACOLOGY AND PHYSIOLOGY COURSES

MPP 3202--Elements of Physiology (5). Beginning course for sophomore and above designed to cover the basic functional aspects of major organ systems of the body. Prerequisite: sophomore standing.

MPP3204--Medical Pharmacology (4). Survey of drugs commonly used in clinical medicine with mechanistic explanations of drug actions and therapeutic uses. Also general principles of pharmacology and therapeutics. Designed for nursing, physical therapy, premedical students and other health related professionals. Prerequisite: MPP 3202 or BIO SC 3700 or the equivalent, or instructor's consent.

MPP 3290--Undergraduate Research (1-3). Laboratory experience and opportunity to explore research in medical pharmacology and physiology.

MPP 4001--Undergraduate Topics in Medical Pharmacology and Physiol-

ogy (1-3). Selected topics not in regularly offered courses. Prerequisite: instructor's consent.

MPP4085--Undergraduate Problems in Medical Pharmacology and Physiology (1-3). This course is designed to provide well-qualified undergraduate students the opportunity to engage in advanced study in topics in pharmacology or physiology with individual faculty members. Topics will be drawn from recent primary literature. Graded on A/F basis only. Prerequisites: instructor's consent.

MPP 4310--Mammalian Cell Function (3). An overview of the structure and function of mammalian cells including topics in membrane physiology and transport, cell signaling, compartmentalization and metabolism, cell proliferation and differentiation and the structure and function of certain specialized cells (e.g. muscle cells, epithelial cells and neurons). Laboratory and/or discussion sessions will be included as part of the course with laboratory topics

to be determined. We will devote approximately 75% of the lecture to generalized cell functions, and 25% to deal with topics concerning specialized cells. Graded on A/F basis only. Prerequisite: instructor's consent. For graduate credit, students will be required to participate in laboratory exercises.

Molecular Microbiology and Immunology

School of Medicine
M616 Medical Science Building
(573) 882-8152
<http://mmi.missouri.edu>

The Department of Molecular Microbiology and Immunology in the School of Medicine does not offer an undergraduate degree in microbiology, but some courses are available to undergraduate students. A degree in Microbiology can be obtained through the Biological Science Department, their requirements are listed below our courses.

FACULTY

PROFESSOR M. A. McIntosh, M. L. Misfeldt, D. J. Pintel, K. S. Wise, H. Zaghouani

ASSOCIATE PROFESSOR K. L. Bennett, D. Burke, J. F. Cannon, D. Duan, D. R. Lee, L. S. Thai

ASSISTANT PROFESSOR M. Johnson, S. Sarafianos

JOINT PROFESSOR J. K. Critser, H. Mullen, G. Stacey, J. D. Wall

JOINT ASSOCIATE PROFESSOR C.R. Brown, K. L. Fritsche, C.L. Lorson, W. J. Mitchell, R.A. Ortman

JOINT ASSISTANT PROFESSOR M. J. Calcutt, D. Fang, U. Atasoy

Degree BA in Microbiology

The Division of Biological Sciences in the College of Arts and Science, in cooperation with the colleges of Agriculture, Food and Natural Resources and Veterinary Medicine and the School of Medicine, offers an area of concentration with emphasis in microbiology.

MICROBIOLOGICAL SCIENCES COURSES

MICROB 3200--Introduction to Medical Microbiology and Immunology (4). Focus on medically important viruses, bacteria, fungi and parasites with emphasis on their disease causing potential and mechanisms. Introduction to cells and molecules of the immune system with emphasis on their role in fighting infectious diseases. Discussion of treatment and prevention strategies. Lecture material will be reinforced with laboratory demonstrations and hands-on exercises. The course is intended for pre-professional students.

MICROB 4300--Microbial Pathogenesis (3). This is a team taught, microbial pathogenesis course that covers the concepts of virulence and pathogenicity of bacteria. Topics covered include microbial structure, physiology, and metabolism; mobile genetic elements; antibiotic resistance; microbial gene regulation;

microbial toxins; microbial evasion; emerging pathogens; and emerging pathogens. This course is designed for upper level undergraduates and beginning graduate level students.

MICROB 4303--Medical Virology (3). Classification of viruses, life cycles, genome organization and expression, host virus interactions, oncogenes and cellular transformation, viral pathogenesis, viral gene therapy approaches, strategies for anti viral therapy. Prerequisite: MICROB 3200 or 4300 or equivalent or instructor's consent.

MICROB 4304--Immunology (3). This is a comprehensive team-taught, basic immunology course covering cells and organs of the immune system, lymphocyte development, innate immunity, antibody production, antibody-antigen presentation, CD4+ and CD8+ T lymphocyte responses, cytokines, autoimmunity and immunodeficiency among other immunologically relevant topics. Completion of a biochemistry, genetics, or molecular biology course would

Graduates of the program often obtain employment in industrial and academic research laboratories.

The following courses are required to receive the undergraduate degree in microbiology.

Major core requirements (Microbiology)	46
BIO SC 1500: Introduction to Biological Systems with Laboratory	
BIO SC 2300: Introduction to Cell Biology.....	5
CHEM 2120: Organic Chemistry II	5
BIO SC 3750: General Microbiology	4
BIO SC 2200: General Genetics	4
CHEM 1310 (2) and 1320 (3): General Chemistry I, II.....	5
CHEM 1330: General Chemistry III with Lab.....	3
CHEM 2100: Organic Chemistry I	3
PHYSICS 1210 and 1220: College Physics I, II	8
MATH 1400 and 2100: Calculus for Social and Natural Sciences I and II	6
(MATH 1500 and 1700 may be substituted for a total of 10 credits)	

Electives 18-24

The following courses are suggested as appropriate electives:

- BIO SC 3780: Genetics Laboratory (2)
- BIOCHM 4270: Biochemistry (3)
- BIOCHM 4272: Biochemistry (3)
- BIOCHM 4974: Biochemistry Laboratory (4)
- MICROB 4300: Microbial Pathogenesis (3)
- MICROB 4303: Medical Virology (3)
- MICROB 4305H: Honors Microbial Pathogenesis (3)
- MICROB 4304: Immunology (3)

Other courses in biochemistry, microbiology, veterinary microbiology, food sciences and human nutrition, and engineering are recommended based on discussions between the student and the undergraduate microbiology advisor.

be helpful. Prerequisites: MICROB 3200 or BIOCHEM 4270 recommended.

MICROB 4305H--Honors Microbial Pathogenesis (3). This is a team taught, microbial pathogenesis course that covers the concepts of virulence and pathogenicity of bacteria. Topics covered include microbial structure, physiology, and metabolism; mobile genetic elements; antibiotic resistance; microbial gene regulation; microbial toxins; microbial evasion; emerging pathogens; and emerging pathogens. This course is designed for upper level undergraduates and beginning graduate level students. Honors eligibility required.

Pathology and Anatomical Sciences

Douglas Anthony, Chair
School of Medicine
M263 Medical Science Building
(573) 882-1201
<http://www.pathology~missouri.org>

FACULTY

PROFESSOR D. Anthony, C. Caldwell, G. Davis, W. Krause II, M. Ravosa, S. Stack, C. Ward
ASSOCIATE PROFESSOR E. Adelstein, A. Diaz-Arias, E. Ingram, T. Loy, A. Luger, R. Mitra, M. Petrides, L. Spollen
ADJUNCT ASSOCIATE PROFESSOR T. Scanlon
RESEARCH ASSOCIATE PROFESSOR R. Little
CLINICAL ASSOCIATE PROFESSOR A. Havey
PROFESSOR EMERITUS M. Rosenholtz
ASSISTANT PROFESSOR K. Aldridge, L. Bennett, M. Esebua, S. Frazier, V. Glinskii, Z. Gu, H. Shi, C. Stacy, M. Wang
INSTRUCTOR A. Konrad, D. Shin
LECTURER A. Deane

PATHOLOGICAL & ANATOMICAL COURSES

PTH AS 2000--Basic Pathology (2). Provides nonmedical students with a general understanding of the essential nature of disease, including mechanisms of its development and cause/effect relationships. Prerequisites: 5 hours Biological Science or equivalent and 5 hours Chemistry. or PTH AS 2201.

PTHAS 2201--Human Anatomy Lecture (3). Basic microscopic and gross human anatomy for Nursing, and Health Profession students.

PTHAS 2203--Human Anatomy Laboratory (2). Laboratory. Study of human microscopic and gross anatomical materials. Concurrent registration or passing grade (C) in PTH AS 2201 required.

PTH AS 2600--Cytology Female Genital Tract (10). A definitive study of normal and abnormal cellular changes occurring within the organ system by means of light microscopy with histologic correlation. Prerequisite: instructor's consent.

PTH AS 2610--Respiratory Cytology (4). A

definitive study of the normal and abnormal cellular changes occurring within the system by means of light microscopy, with histologic correlation. Prerequisite: instructor's consent.

PTH AS 2615--Cytology of Body Fluids (4). Normal and abnormal cellular changes within pleural, peritoneal, pericardial and cerebrospinal fluids by means of light microscopy, with histologic correlation. Prerequisite: instructor's consent.

PTH AS 2620--Gastrointestinal Cytology (4). A definitive study of the normal and abnormal cellular changes occurring within the system by means of light microscopy, with histologic correlation. Prerequisite: instructor's consent.

PTH AS 2625--Oral Cytology (2). Studies normal and abnormal cellular changes within the oral cavity and oropharynx by means of light microscopy, with histologic correlation. Prerequisite: instructor's consent.

PTH AS 2630--Urinary Cytology (4). Studies normal and abnormal cellular morphology from kidney, ureter and bladder samples, with

histologic correlation. Prerequisite: instructor's consent.

PTH AS 2685--Special Problems in Cytology (2). Relating hematologic morphologic findings in conventional body fluid cytology; also review of techniques used in chromosome cultures and karyotyping, with emphasis on sex-related abnormalities.

PTH AS 3400--Fundamentals of Medical Technology I (3). Emphasizes diseases and basic laboratory methods used in clinical laboratory areas: microbiology, hematology, immunology, virology, tissue typing, blood banking and chemistry.

PTH AS 3410--Fundamentals of Medical Technology II (3). Continuation of Pathology and Anatomical Sciences 3400.

PTH AS 3415--Fundamentals of Medical Technology III (3). Continuation of Pathology and Anatomical Sciences 3400 and 3410.

PTH AS 3420--Clinical Practicum (3). Presentation and application of concepts and laboratory method used in areas of immunology, toxicology, mycology, urinalysis

and cytogenetics.

PTH AS 3425--Hemostasis (2).Lectures and laboratory exercises in basic theory and techniques of hemostasis including platelet function and disorders, plasma coagulation system, acquired and inherited thrombotic disorders. Prerequisites: PTH AS 3400, 3410, 3415.

PTH AS 3430--Clinical Immunology (3).Antigen-antibody reactions and their role in determining infectious, auto-allergic and inflammatory disease states.

PTHAS 3435--Blood Banking (3).Principles and techniques of transfusion practices related through lectures and experience in the blood bank laboratory.

PTH AS 3440--Clinical Hematology (6).Lectures and laboratory regarding procedures for diagnosing hematologic disorders. Experience in collection of specimens from patients; staining, counting and identifying blood and bone marrow cells.

PTH AS 3445--Clinical Microbiology (6).Diagnostic procedures related to the isolation and identification to infectious microorganisms; bacteria and parasites. Emphasis on human pathogens and their sensitivity patterns with commonly used antibiotics.

PTH AS 3450--Clinical Chemistry (6).Principles of quantitative analysis applied to the measurement of substances in biological fluids. Significance of these findings in the diagnosis and treatment of disease.

PTH AS 3455--Principles of Management and Education (1).Lectures and discussion of management techniques and theories used in supervising laboratory personnel. Analysis of educational objectives and exam questions.

PTH AS 3460--Research and Instructional Techniques (3).Involves library and laboratory research. Includes development of oral and written communications skills.

PTHAS 3485--Problems in Medical Technology (1-3).Individual supervised work in a area of interest in medical technology. Prerequisite: instructor's consent.

PTH AS 3500--Cytology of the Female Genital Tract (8).A definitive study by means of light microscopy of normal and abnormal cellular changes occurring within the female genital tract along with histologic correlation. Prerequisite: senior standing and instructor's consent.

PTHAS 3510--Cytology of Respiratory Tract (4).A definitive study by means of light microscopy of normal and abnormal cellular changes occurring with the respiratory tract along with immunohistologic correlation. Prerequisite: senior standing and instructor's consent.

PTH AS 3515--Cytology of Urinary Tract (4).A definitive study by means of light microscopy of normal and abnormal cellular changes occurring within the urinary tract along with histologic correlation. Prerequisites: senior standing and instructor's consent.

PTHAS 3520--Cytology of Gastrointestinal Tract (5).A definitive study by means of light microscopy of normal and abnormal cellular changes occurring within the gastrointestinal tract along with histologic correlation. Prerequisites: senior standing and instructor's consent.

PTH AS 3525--Cytology of Body Fluids (4).A definitive study of light microscopy of normal and abnormal cellular changes occurring within body fluid along with histologic correlation. Prerequisites: senior standing and instructor's consent.

PTH AS 3530--Cytology of Breast (2).A definitive study by means of light microscopy of normal and abnormal cellular changes occurring within the breast with histologic correlation. Prerequisite: senior standing and instructor's consent.

PTH AS 3535--Fine Needle Aspiration Cytology (2).A definitive study by means of light microscopy of normal and abnormal cellular changes occurring within the fine needle aspirations from various body sites along with histologic correlation. Prerequisites: senior standing and instructor's consent.

PTH AS 3540--Special Procedures in Cytology (2).Study of hematologic findings in body fluid cytology: chromosome cultures and karyotyping. Emphasizing sex-related abnormalities; hormonal evaluation of smears from the female genital tract and their clinical significance. Prerequisites: senior standing and instructor's consent.

PTH AS 3545--Clinical Management (1).Procedures and processes helpful in operating in cytology laboratory, especially at the supervisory level. Prerequisites: senior standing and instructor's consent.

PTH AS 3550--Technical Application with Research in Cytotechnology (2).Research is an area of interest in cytology resulting in a written and oral presentation. Prerequisite: senior standing and instructor's consent.

PTH AS 3555--Cytologic Preparation (2).Independent applications of techniques used to prepare cytologic material. Prerequisite: senior standing and instructor's consent.

PTHAS 3560--Practical Cytotechnology (6).Independent application of techniques used to examine cytology material and manage a cytology laboratory. Prerequisite: senior standing and instructor's consent.

PTHAS 3585--Problems in Cytotechnology (1-3).Individual supervised work in a area of interest in cytology. Prerequisite: instructor's consent.

PTH AS 3600--Elementary Histology (3).Simplified gross and microscopic anatomy of normal organs and tissues commonly found in the routine histopathology laboratory.

PTH AS 3610--Basic Histotechnology (6).Theories and technical application of procedures used in the preparation of tissue sections & slides of microscopic examination; including instrumentation, fixation, dehydration, clearing infiltration, embedding, microtomy, H&E staining and coverslipping.

PTHAS 3615--Special Staining Techniques (6).Principles and procedures for special staining techniques for carbohydrates, connective tissues, blood, fat and lipids, pigments and minerals, bacteria and fungi, nerve, and other special cell stains.

PTHAS 3620--Applied Histotechnology (9).Application of basic histological techniques in the preparation of histologic sections and slides in a clinical setting.

PTH AS 3625--Research and Instructional Techniques (3).Involves library and laboratory search. Includes development of oral and written communications skills. Prerequisite: senior students admitted to Histotechnology Curriculum.

PTHAS 3630--Clinical Management (2).Supervisory techniques and procedures helpful in operating a histopathology laboratory: including laboratory safety, workload recording, and personnel management in a laboratory situation.

PTH AS 3635--Basic Disease Processes (2).Special readings and discussions of basic disease processes of interest to the anatomic pathology laboratory.

PTH AS 3680--Advances Histotechnology (6).Advanced and specialized techniques used in the preparation and processing of muscle, nerve and rectal biopsies; special techniques in cytology; electron microscopy; enzyme and immunohistochemistry; plastic embedding and neuropathologic techniques.

PTHAS 3685--Problems in Histotechnology (1-3).Individual supervised work in a specialized area of histotechnology. Prerequisite: instructor's consent.

PTH AS 4200--General Pathology (5).Basic pathological mechanisms of human disease. Introductory principles of clinical laboratory measurements of altered organ system function studied. Prerequisites: PTH AS 7200, 7220, 7310; and instructor's consent.

PTH AS 4205--General Pathology Laboratory (3).Gross and microscopic applied study of basic pathological disease mechanisms. Laboratory assessment of these basic disease mechanisms. Prerequisites: PTH AS 7200, 7220, 7310; or the equivalents; and instructor's consent.

PTH AS 4210--Seminar in Pathology and Anatomical Sciences (1).Presentation and discussion of original investigations and current literature.

PTH AS 4220--Forensic Pathology and Death Investigation (2).Forensic Pathology and Death Investigation.

PTHAS 4222--Gross Human Anatomy (The Health Professions) (7).Gross structure and neuroanatomy of the human body; dissection of extremities, back, head, neck abdomen and thorax. Prerequisites: instructor's consent.

PTH AS 4250--Interpretations of Lab Procedures in Primary Health Care (1).Discussion and analysis of selected laboratory test procedures used in office and clinic settings involved with primary health care. Prerequisites: graduate level Physiology course and departmental consent.

Faculty

Faculty

- Abbott, Carmen Casanova**, associate professor, physical therapy; MA, University of Missouri
- Abbott, Jeanne Martha**, assistant professor professional practice, journalism; PhD, University of Missouri
- Abell, Sandra K.**, curators professor, learning teaching and curriculum; PhD, University of Iowa
- Aberbach, Ian M.**, professor, mathematics; PhD, University of Michigan-Ann Arbor
- Ackmann, Rodney F.**, assistant professor, bassoon; MM and Performer's Certificate, Indiana University
- Adelstein, Edward**, associate professor, department of pathology and anatomical sciences; MD, DVM, University of Missouri-Columbia
- Adams, Johanna**, extension assistant professor, rural sociology; PhD, University of Missouri
- Adams, John E.**, professor, chemistry; PhD, University of California-Berkeley
- Agashe, Amod**, assistant professor, mathematics; PhD, University of California-Berkeley
- Aguilar, Francisco Xavier**, assistant professor, forestry; PhD, Louisiana State University
- Akcora, Pinar**, assistant professor, chemical engineering
- Akers, Lex A.**, professor, electrical engineering; PhD, Texas Tech University
- Akhmadullin, Iskander**, assistant professor, music. trumpet; DMA, University of North Texas
- Alcazar, Asier**, assistant professor, romance languages and literature; PhD, University of Southern California
- Aldrich, Eric Michael**, instructor, soil, environmental and atmospheric sciences; BS, University of Missouri-Columbia
- Aldridge, Kris**, assistant professor, department of pathology and anatomical sciences, PhD, Johns Hopkins University School of Medicine
- Alexander, Greg**, assistant professor, nursing; PhD, University of Missouri
- Alexander, Hannah**, adjunct associate professor, biological science; PhD, University of Missouri
- Alexander, Stephen**, professor, biological science; PhD, Brandeis University
- Almasri, Mahmoud**, assistant professor, electrical and computer engineering; PhD, Southern Methodist University-Dallas
- Allee, Gary L.**, professor, animal science; PhD, University of Illinois at Urbana-Champaign
- Allen, Carla**, clinical assistant professor, cardiopulmonary and diagnostic sciences, MED
- Allen, William**, assistant professor and coordinator, agricultural journalism; MS, University of Illinois at Urbana-Champaign
- Almarza, Dario Jose**, assistant professor, learning teaching and curriculum; PhD, University of Iowa
- Anderson, Anthony W.**, assistant professor, aerospace studies; MBA, Wright State University
- Anderson, Carol E.**, associate professor, history; PhD, Ohio State University
- Anderson, Kim Marie**, assistant professor, social work; PhD, University of Kansas
- Anderson, Sharlette Dawn**, clinical instructor, cardiopulmonary and diagnostic sciences; BS, University of Oklahoma
- Anderson, Stephen H.**, adjunct professor, soil, environmental and atmospheric sciences; PhD, North Carolina State University. Soil physics.
- Anderson, Timothy Robert**, visiting instructor, naval science; BS, University of Illinois-Urbana
- Anderson, Wayne**, professor emeritus, psychological sciences; PhD, University of Missouri
- Anthony, Douglas**, chair, professor, department of pathology and anatomical sciences, PhD, Duke University
- Antoniou, Eric**, assistant professor, animal science; PhD, University of Limoges
- Appold, Martin**, assistant professor, geological sciences, PhD, Johns Hopkins University
- Arelli, Prakash R.**, adjunct professor, plant sciences; PhD, University of Georgia.
- Arbaugh, E. Frances**, assistant professor, learning teaching and curriculum; PhD, Indiana University Bloomington
- Arce, Moises**, associate professor, political science; PhD, University of New Mexico
- Ariew, André**, associate professor, philosophy; PhD, University of Arizona
- Armer, Jane M.**, professor, nursing; PhD, University of Rochester
- Arndt, Jamie L.**, associate professor, psychological sciences; PhD, University of Arizona
- Artz, Georgeanne, M.**, assistant professor, agricultural economics; PhD, Iowa State University
- Arunachalam, Vairam**, professor, accountancy; PhD, University of Illinois at Urbana-Champaign
- Ashbaugh, Mark S.**, professor, mathematics; PhD, Princeton University
- Ashby, Wendy**, visiting assistant Professor, german and russian studies; PhD, University of Arizona
- Ashworth, Sarah**, assistant professor, professional practice, radio-television journalism; BJ, University of Missouri
- Asmar, Nakhle**, professor, mathematics; PhD, University of Washington
- Atasoy, Ulus**, joint assistant professor, surgery and molecular microbiology and immunology, M.A. and M.D., University of Minnesota
- Athanassiou, Alexandra**, adjunct instructor, mathematics; MA, University of Missouri
- Atkinson, Warren Patrick**, professor, theatre; MFA, Illinois State University
- Atwood, Jerry L.**, curators professor, chemistry; PhD, University of Illinois at Urbana-Champaign
- Aubrey, Jason**, business mathematics coordinator, PhD, University of Michigan
- Aubrey, Jennifer Stevens**, assistant professor communication; PhD, University of Michigan
- Aud, Myra A.**, associate professor, nursing; PhD, Saint Louis University
- Aura, Saku Petteri**, assistant professor, economics; PhD, Massachusetts Institute of Technology
- Awika, Joseph**, assistant professor, food science; PhD, Texas A&M
- Bailey, Angela Michelle**, adjunct instructor, radio-television journalism; BS, University of Missouri
- Bailey, Wayne C.**, associate professor, plant sciences; PhD, Iowa State University
- Bader, V.**, instructor, clinical nursing; MS(N), University of Washington
- Badiane, Mamadou**, assistant professor, romance language and literature; PhD, University of Iowa
- Bajpai, Rakesh K.**, professor emeritus,

- chemical engineering; PhD, Indian Institute of Technology, Kharagpur India
- Baker, David E.**, associate professor, biological engineering, agriculture systems management; MS, Illinois State University
- Baker, Elizabeth A.**, associate professor, learning teaching and curriculum; EDD, Vanderbilt University
- Balakrishnan, Bimal**, assistant professor, architectural studies; PhD, Pennsylvania State University
- Baldwin, James W.**, professor emeritus, civil engineering, PhD, PE, University of Illinois
- Ball, Anna**, associate professor, agricultural education; PhD, University of Missouri-Columbia
- Ball, Steve**, assistant professor, nutritional sciences; PhD, Arizona State University
- Ballenger, Erma**, assistant professor emeritus, social work; PhD, University of Nebraska
- Banaszynski, Jacqueline M.**, professor, newspaper journalism; BS, Marquette University
- Banerji, Shankha Kumar**, professor emeritus, civil/environmental engineering; PhD, University of Illinois at Urbana-Champaign
- Bank, Barbara**, professor emeritus, sociology; PhD, University of Iowa
- Banks, William D.**, professor, mathematics; PhD, Stanford University
- Barabtarlo, Gene**, professor, german and russian studies; PhD, University of Illinois at Urbana-Champaign
- Barbieri, Carla Eliana**, assistant professor, parks, recreation and tourism; PhD, Michigan State University
- Barbis, Anthony**, visiting assistant professor, learning, teaching & curriculum; PhD, University of Missouri
- Bardone Cone, Anna Marie**, assistant professor, psychological sciences; PhD, University of Wisconsin
- Barham, Mary E.**, assistant professor, rural sociology; PhD, Cornell University
- Barnes, Michael H.**, assistant teaching professor; PhD, University of Missouri-Columbia
- Barnstone, Aliko D.**, professor, english; PhD, University of California-Berkeley
- Barrett, Bruce Allen**, associate professor, plant sciences; PhD, Washington State University
- Barriuso, Carlos**, assistant professor, romance languages-spanish; PhD, Princeton University
- Barrow, Lloyd H.**, professor, learning teaching and curriculum; PhD, University of Iowa
- Bartholow, Bruce**, associate professor, psychological sciences; PhD, University of Missouri
- Bartow, Nicole Lee**, instructor of nursing; MN, Maryville University-St. Louis
- Basker, Emek Meira**, assistant professor, economics; PhD, Massachusetts Institute of Technology
- Bauer, Robert L.**, associate professor, geological sciences; PhD, University of Minnesota
- Baum, Robert**, associate professor, religious studies; PhD, Yale University
- Bausler, Cheryl**, assistant teaching professor, nursing; PhD, University of Missouri
- Beamer, Lesa**, associate professor, biochemistry; PhD, Johns Hopkins School of Medicine
- Bednar, Michael**, assistant professor, history; PhD, University of Texas at Austin
- Berntsen, Brenda T.** adjunct assistant professor, plant sciences; PhD, University of Wisconsin-Madison
- Bell, Debora Jeneen**, associate professor, psychological sciences; PhD, West Virginia University
- Bell, Jacquelyn Sue**, professional practice assistant professor, photojournalism; MS, Ohio University
- Benner, Kalea E.**, teaching assistant professor, social work; MSW, University of Missouri
- Bennett, John**, adjunct assistant professor, marketing, MBA, University of Memphis
- Bennett, Karen L.**, associate professor, molecular microbiology and immunology; PhD, Oswell Park Memorial Institute State University of New York-Buffalo
- Bennett, Linda**, associate professor, learning teaching and curriculum; EDD, University of Northern Colorado
- Bennett, Lynda**, assistant professor, department of pathology and anatomical sciences, PhD, University of Northern Colorado
- Benoit, Pamela**, professor, communication; PhD, Wayne State University
- Benoit, William**, professor, communication; PhD, Wayne State University
- Benson, Jerry Kenneth**, professor emeritus, sociology; PhD, University of Texas at Austin
- Bentley, Clyde**, associate professor, convergence journalism; PhD, University of Oregon
- Bergee, Martin**, associate professor, music and learning, teaching & curriculum; PhD, University of Kansas
- Bernards, Matthew T.** assistant professor, chemical engineering; PhD, University of Washington
- Bettencourt, B. Ann**, professor, psychological sciences; PhD, University of Southern California
- Beuselinck, Paul R.**, adjunct professor, plant sciences; PhD, Oregon State University.
- Biddle, Bruce**, professor emeritus, psychological sciences; PhD, University of Michigan
- Bien, Joseph Julius**, professor, philosophy; PhD, University of Paris
- Bienvenu, Richard Thomas**, professor, history; PhD, Harvard University
- Bier, Gregory L.**, assistant teaching professor, management, PhD, University of Missouri-Rolla
- Biers, William Richard**, professor emeritus, art history and classical archaeology; PhD, University of Pennsylvania
- Bilyeu, Kristin D.**, adjunct assistant professor, plant sciences; PhD, Baylor College of Medicine.
- Birchler, James A.**, curators professor, biological science; PhD, Indiana University Bloomington
- Bird, Christine Ann**, clinical instructor, occupational therapy; MA, New York University
- Black, Cheryl D.**, associate professor, theatre; PhD, University of Maryland College Park
- Black, Lillian Wilkins**, professor, radio-television journalism; PhD, University of Oregon
- Blakely, Mary Kay**, associate professor, magazine journalism; MA, Northern Illinois University
- Blandón, Erick**, assistant professor, romance languages and literature; PhD, University of Pittsburgh
- Blevins, Dale Glenn**, professor, plant sciences; PhD, University of Kentucky
- Bloch, Peter H.**, professor, marketing; PhD, University of Texas at Austin
- Blomquist, Gregory**, assistant professor, anthropology; PhD, University of Illinois-Urbana
- Bloom, Tina Lee**, assistant professor, nursing; PhD, Oregon Health & Science University
- Blow, Constance A.**, instructor, physical therapy; MS, University of North Carolina at Chapel Hill
- Bludorn, Allen C.**, professor, management; PhD, University of Iowa
- Blumberg, Eric M.** adjunct instructor, radio-television journalism
- Boessen, Christian R.**, resident instruction assistant professor,

- agricultural economics; PhD, University of Missouri
- Bolch, Dorothy H.**, professor, newspaper journalism; MA, University of North Carolina at Chapel Hill
- Bolls, Paul**, associate professor, strategic communication; PhD, Indiana University
- Bolshakova, Natalia**, adjunct assistant professor, piano; MM, University of North Texas
- Bondeson, William Blaine**, distinguished teaching professor, philosophy; PhD, University of Chicago
- Boorady, Lynn M.**, assistant professor, textile and apparel management; PhD, University of Missouri
- Booth, Frank**, professor, veterinary biomedical sciences and physiology; PhD, University of Iowa
- Borcherding, Sharon Young**, clinical associate professor, occupational therapy; MA, George Peabody College for Teachers
- Borduin, Charles M.**, professor, psychological sciences, PhD, Memphis State University
- Borgelt, Steven C.**, associate professor, biological engineering and agricultural systems management; PhD, Texas A&M University
- Bostick, Jane E.**, associate teaching professor, nursing; PhD, University of Missouri
- Boote, Evan J.**, research associate professor, nuclear science and engineering; PhD, University of Wisconsin-Madison
- Bowders Jr., John J.**, professor, civil/environmental engineering; PhD, University of Texas at Austin
- Bowers, Greg**, assistant professor, newspaper journalism; M.A., Western Washington University
- Bowles, Douglas K.**, joint associate professor; pharmacology and physiology, PhD, University of Texas-Austin
- Boyer, Nathan Paul**, assistant professor, art; MFA, Yale University
- Boyle, Diane M.**, adjunct instructor, editorial
- Bradley, Kevin W.**, assistant professor, plant sciences; PhD, Virginia Tech
- Brake, Kimberly J.**, clinical instructor, cardiopulmonary and diagnostic sciences; BS, Central Methodist University
- Braley-Mullen, Helen**, professor, internal medicine and molecular microbiology and immunology; PhD, Purdue University
- Branson, Keith**, clinical assistant professor, veterinary medicine and surgery; DVM, Kansas State University
- Brandt, L.**, adjunct instructor, occupational therapy; OTD, Creighton University
- Brekhus, Wayne H.**, associate professor, sociology; PhD, Rutgers The State University at New Jersey
- Brent Jr., Edward Everett**, professor, sociology; PhD, University of Minnesota-Twin Cities
- Bridges, Jeff A.**, instructor, physical therapy; MD, University of Missouri-Columbia
- Briedwell, Teresa A.**, instructor, physical therapy; PhD, A.T. Still University
- Brier-Mackie, Sarah**, assistant teaching professor of clinical nursing, nursing; PhD, University of Tasmania
- Brinkman, Barbara L.**, clinical associate professor, communication science and disorders; MS, University of Colorado
- Brittain, Leann Heath**, clinical assistant professor, occupational therapy; MED, University of Missouri
- Britten, Robert**, instructor, editorial; MA, University of Missouri
- Brixey, Elizabeth K.**, professional practice assistant professor, newspaper journalism; BJ, University of Missouri
- Brockman, Paul**, associate professor, finance; PhD, Louisiana State University
- Brooks, Brian Shedd**, professor, journalism studies; MA, University of Missouri
- Brooks, Phillips R.**, associate professor, radio-television journalism; MA, PhD, University of Missouri
- Brown, Charles R.**, associate professor, veterinary pathobiology and molecular microbiology and immunology; PhD, University of Chicago
- Brown, Douglas Scott**, research assistant professor, agriculture economics; PhD, University of Missouri
- Brown, Eric**, assistant professor, PhD, University of California-Berkeley
- Brown, Larry G.**, assistant teaching professor, geography; PhD, University of Missouri
- Brown, Marybeth**, professor, physical therapy; PhD, University of Southern California
- Broz, Robert R.**, extension assistant professor, agricultural systems management, biological engineering; MS, University of Missouri
- Brueggjenjohann, Jean M.**, professor, art; MFA, Indiana University Bloomington
- Brugger, Robert M.**, professor emeritus, nuclear science and engineering institute; PhD, Rice University
- Bruhn, Johann N.**, research associate professor, plant sciences; PhD, University of California-Berkeley
- Brunsmma, David L.**, associate professor, sociology; PhD, University of Notre Dame
- Bruzzese, Leonard**, professional practice associate professor, journalism studies; BA, University of Alabama at Birmingham
- Bryan, James E.**, assistant professor, mechanical and aerospace engineering; PhD, Texas A&M University
- Budds, Michael J.**, professor, music history; PhD, University of Iowa
- Buehler, Jeffery Lawrence**, laboratory instructor, human development and family studies
- Bullion, John Lewis**, professor, history; PhD, University of Texas at Austin
- Bullock, Linda F C.**, professor, nursing; PhD, University of Otago
- Burchette, Betty**, professor emeritus, learning, teaching & curriculum
- Burgoyne, Suzanne**, professor, theatre; PhD, University of Michigan-Ann Arbor
- Burke, Judith L.**, associate professor emeritus, social work; PhD, Bryn Mawr College
- Burke, Donald**, associate professor, molecular microbiology and immunology; biochemistry; PhD, University of California-Berkeley
- Bush, Sarah L.**, teaching associate professor, biological science; PhD, University of East Anglica, Norwich
- Buss Bakken, Kristin Ann**, assistant professor, psychology; PhD, University of Wisconsin
- Cahoon, Ed**, adjunct associate professor, plant sciences; PhD, Michigan State University.
- Cairns, Scott**, professor, english; PhD, University of Utah
- Calcutt, Michael J.**, assistant professor, veterinary pathobiology and molecular microbiology and immunology; PhD, Leicester University, UK
- Caldwell, Charles**, professor, department of pathology and anatomical sciences; MD, University of Missouri
- Callahan, Richard J.**, assistant professor, religious studies; MS, University of California-Santa Barbara
- Calvin, James Halvorsen**, associate professor, art; MFA, Bowling Green State University
- Cameron, Glen T.**, professor,

- advertising; PhD, University of Texas at Austin
- Campbell, Benedict**, professor emeritus, biochemistry; PhD, Northwestern University
- Campbell, Rex R.**, professor emeritus, rural sociology; PhD, University of Missouri
- Campione-Barr, Nicole**, assistant professor, psychological sciences; PhD, University of Rochester
- Cannon, John F.**, associate professor, molecular microbiology and immunology; PhD, University of Wisconsin-Madison
- Carmer, Sara Halley**, teaching assistant professor, social work; MD, University of Missouri
- Carpenter, Jason Matthew**, assistant professor, textile and apparel management; PhD, University of Tennessee-Knoxville
- Carr, Deborah**, associate dean, teacher development program; PhD, University of Missouri
- Carrel, James Elliott**, distinguished professor, biological science; PhD, Cornell University
- Carroll, Mark M.**, associate professor, history; PhD, University of Houston
- Carson, William L.**, professor, mechanical and aerospace engineering; PhD, University of Iowa
- Carstens, Vicki M.**, associate professor, english; PhD, University of California-Los Angeles
- Carter, Robert L.**, professor emeritus, nuclear science and engineering institute; PhD, Duke University
- Carver, Mary Heather**, assistant professor, theatre; PhD, University of Texas at Austin
- Cary, Suzanne M.**, teaching assistant professor, social work; MD, University of Missouri
- Casady, William W.**, extension associate professor, agriculture systems management, biological engineering; PhD, University of Illinois
- Casazza, Peter**, professor, mathematics; PhD, University of Iowa
- Cavanaugh, Joseph E.**, associate professor, statistics; PhD, University of California-Davis
- Caviglioli, Rita C.**, associate professor, romance languages and literature; PhD, University of California-Los Angeles
- Chaddad, Fabio**, assistant professor, applied social sciences; PhD, University of Missouri
- Chadha, Janice Hays**, adjunct instructor, social work; PhD, University of Illinois at Urbana-Champaign
- Chakraborty, Sounac**, assistant professor, statistics; PhD, University of Florida
- Chan, Paul Chun Ho**, associate professor, chemical engineering; PhD, California Institute of Technology
- Chandrasekhar, Anand**, associate professor, biological science; PhD, University of Iowa
- Chandrasekhar, H. R.**, professor and chair, physics; PhD, Purdue University
- Chandrasekhar, Meera**, professor, physics; PhD, Brown University
- Chang, Cheng Hsiung Alec**, associate professor, industrial and manufacturing systems engineering; PhD, Mississippi State University
- Chang, Elizabeth Hope**, assistant professor, english; PhD, University of California-Berkeley
- Chant, Sara**, assistant professor, philosophy; PhD, University of Wisconsin-Madison
- Chapman, Linda Fleet**, associate professor, biological science; PhD, University of California-Los Angeles
- Chastain, C. B.**, professor, biomedical sciences; DVM, MS, University of Missouri; Iowa State University
- Chatterjee, Arun**, professor, plant sciences; PhD, University of Guelph-Ontario, Canada
- Chavez, Oscar**, assistant professor, learning, teaching & curriculum; PhD, University of Missouri
- Chen, Jinn-Kuen**, William and Nancy Thompson professor, mechanical and aerospace engineering; PhD, Purdue University
- Chen, Shi-Jie**, professor, biochemistry, physics; PhD, University of California-San Diego
- Chen, Zhen**, professor, civil/environmental engineering; PhD, University of New Mexico
- Cheng, Jianlin**, assistant professor, computer science; PhD, University of California
- Chicone, Carmen Charles**, professor, mathematics; PhD, University of Wisconsin-Madison
- Chiles, Todd H.**, assistant professor, management; PhD, University of Oregon
- Cho, Seonghee**, assistant professor, hotel and restaurant management/food science; PhD, University of Nevada-Las Vegas
- Cho, Uee Wan**, associate professor, mechanical and aerospace engineering; PhD, Brown University
- Choe, Kwang Yoon**, assistant adjunct professor, economics; PhD, University of Missouri
- Christ, Shawn**, assistant professor, psychological sciences; PhD, Washington University
- Christiansen, Tanya**, professor, mathematics; PhD, Massachusetts Institute of Technology
- Chval, Kathryn B.**, assistant professor, learning teaching and curriculum; PhD, University of Illinois at Chicago
- Clark, M. Elizabeth**, clinical instructor, nursing; MS(N), University of Missouri
- Clarke, Andrew D.**, associate professor, food science; PhD, Colorado State University
- Clarke, Robert Bede**, professor, art; MFA, University of Iowa
- Clart, Philip A.**, assistant professor, religious studies; PhD, University of British Columbia-Vancouver
- Clem, Douglas Wayne**, clinical assistant professor, cardiopulmonary/diag sci; MA, University of Southern Mississippi
- Clevenger, Thomas Eugene**, professor, civil/environmental engineering; PhD, University of Missouri
- Click, Melissa Anne**, assistant professor, communication, PhD, University of Massachusetts-Amherst
- Cocroft, Reginald B.**, associate professor, biological science; PhD, Cornell University
- Cohen, Signe M.**, associate professor, religious studies; PhD, University of Pennsylvania
- Colbert, Jan Louise**, associate professor, magazine journalism; MA, University of Missouri
- Coleman, Marilyn**, professor & director of graduate studies, human development and family studies; EdD, University of Missouri
- Collins, Kent S.**, professional practice assistant professor, radio-television journalism; BJ, University of Missouri
- Collins, Robert Maurice**, professor, history; PhD, Johns Hopkins University
- Colwell, Brian**, assistant professor, sociology; PhD, Stanford University
- Comas, James N.**, assistant professor, english; PhD, University of Southern California
- Commuri, Suraj**, assistant professor, marketing; PhD, University of Nebraska
- Cone, Karen Camille**, professor, biological science; PhD, Duke University
- Conn, Vicki S.**, professor, nursing; PhD, University of Missouri
- Cook, Edward P.**, clinical instructor, newspaper journalism
- Cook, Michael L.**, professor, agriculture economics; PhD, University of Wisconsin-Madison

- Cook, Roger F.**, professor, german and russian studies; PhD, University of California-Berkeley
- Cooley, Jason W.**, assistant professor, chemistry; PhD, Arizona State University
- Cooney, Teresa M.**, associate professor, human development and family studies; PhD, Pennsylvania State University
- Cooper, M. Lynne**, professor, psychological sciences; PhD, University of California-Santa Cruz
- Cordones Cook, Juanamaria**, professor, romance languages and literature; PhD, University of Kansas
- Cormier, Marie H.**, assistant professor, geological sciences; PhD, University of California-Santa Barbara
- Cornelison, Dawn D.**, assistant professor, biological sciences; PhD, Caltech
- Coudron, Thomas A.**, adjunct associate professor, plant sciences; PhD, North Dakota State University.
- Cowan, Nelson**, curators professor, psychological sciences; PhD, University of Wisconsin-Madison
- Cowart, Ross P.**, associate professor, veterinary medicine and surgery; DVM, University of Georgia
- Cowell, Charles M.**, associate professor, geography; PhD, University of Georgia
- Cowger, Charles D.**, associate professor emeritus, social work; PhD, University of Illinois
- Crabb, Richard Paul**, associate professor, choirs.conducting; PhD, Florida State University
- Craft, Stephanie**, associate professor, journalism studies; PhD, Stanford University
- Crespy, David A.**, assistant professor, theatre; PhD, City University of New York
- Crews, Sandra M.**, assistant teaching professor, management, PhD, University of Missouri-St. Louis
- Critser, John K.**, professor, veterinary pathobiology, molecular microbiology & immunology; PhD, University of Wisconsin-Madison
- Cropp IV, Frederick William**, associate professor, strategic communication; PhD, University of Missouri
- Cross, David T.**, clinical assistant professor, general biomedical sciences; PhD, DVM, The Ohio State University and the University of Missouri
- Crown, Patricia Dahlman**, professor, emerita, art history and classical archaeology; PhD, University of California-Los Angeles
- Cumbie, Billy G.**, professor emeritus, biological science; PhD, University of Texas at Austin
- Cunningham, Billie M.**, associate teaching professor, accountancy; PhD, North Texas State University
- Curl, Angela Lynn**, assistant professor, social work; PhD, Case Western Reserve University
- Curry, Randy D.**, associate professor, electrical engineering; PhD, University of St Andrews
- Cutkosky, Steven Dale**, professor, mathematics; PhD, Brandeis University
- Cutter, Bruce Emery**, professor, forestry; PhD, University of Missouri
- Danis, Fran S.**, associate professor, social work; PhD, Case Western Reserve University
- Dannecker, Erin A.**, assistant professor, physical therapy; PhD, University of Florida
- Darko, Jessica**, director, child development laboratory, MA, Michigan State University
- Datz, Craig**, clinical assistant professor, veterinary medicine and surgery; DVM, Virginia Polytechnic Institute and State University
- Dauve, Jan L.**, resident instruction associate professor, agriculture economics; PhD, Colorado State University
- Davenport, Judith**, professor emeritus, social work; PhD, University of Wyoming
- David, John Dewood**, associate professor, biological science; PhD, Vanderbilt University
- David, Larry G.**, professor emeritus, industrial and manufacturing systems engineering; PhD, Purdue University
- Davidson, Sandra Ann**, associate professor, journalism studies; PhD, University of Connecticut
- Davis, Charles Nelson**, associate professor, journalism studies; PhD, University of Florida
- Davis, Curt H.**, adjunct professor, geography; PhD, University of Kansas
- Davis, George**, professor, medical pharmacology and physiology, MD, University of California-San Diego
- Davis, Georgia L.**, associate professor, plant sciences; PhD, University of Wisconsin-Madison
- Davis, Linda M.**, clinical instructor, cardiopulmonary and diagnostic science; BS, Missouri Baptist University
- Davis, Michael John**, professor, pharmacology and physiology; PhD, University of Nebraska
- Day, Linda S.** research associate professor, communication science and disorders; PhD, University of Missouri
- Deakayne, Carol A.**, associate professor, chemistry; PhD, Princeton University
- Deane, Andrew**, lecturer, department of pathology and anatomical sciences, PhD, University of Toronto
- Deaton, Brady James**, professor, agriculture economics; PhD, University of Wisconsin-Madison
- deChazal, Marc**, professor emeritus, chemical engineering; PhD, Oklahoma State University
- Defacio, Brian**, professor, physics; PhD, Texas AandM University
- Della-Rocca, Kelly**, instructor, physical therapy; MD, Webster University
- Deng, Baolin**, associate professor, civil/environmental engineering; PhD, Johns Hopkins University
- DeSouza, Guilherme**, assistant professor, electrical and computer engineering; PhD, Purdue University
- DesRosiers, Nathaniel Patrick**, assistant professor, religious studies; PhD, Brown University
- D'Souza, N.**, assistant professor, darchitectural studies, PhD, University of Wisconsin-Milwaukee
- Deutscher, Susan**, professor, biochemistry; PhD, St. Louis University
- Devaney, Michael Joseph**, associate chair, professor, electrical engineering; PhD, University of Missouri
- Devaney, Susan A.**, clinical assistant professor, nursing; PhD, Nova Southeastern University
- Devlin, Albert**, professor, english; PhD, University of Kansas
- Diaz-Arias, Alberto**, associate professor, department of pathology and anatomical sciences, MD, University of Missouri
- Dickerson, Kitty G.**, professor, textile and apparel management; PhD, Saint Louis University
- Dickey, Frances**, visiting assistant professor, English; PhD, Johns Hopkins University
- Ding, Shinghua**, assistant professor, biological engineering; PhD, State University of New York
- Dingo, Rebecca**, assistant professor, english; PhD, University of Minnesota
- Dolbashian, Edward**, associate professor, orchestra/conducting; MMA, Yale University
- Dolezal, Darry L.**, associate professor, cello; MM, Peabody Institute
- Donald, William W.**, adjunct assistant professor, PhD, University of Wisconsin. Weed science.
- Donelson, Tery L.**, visiting assistant professor, aerospace; MS, A.F.I.T.

- Dorigan, Michael P.**, visiting assistant professor, finance; PhD, University of Missouri
- Dostoglou, Stamatis**, associate professor, mathematics; PhD, University of Warwick
- Dougherty, Debbie S.**, associate professor, communication; PhD, University of Nebraska
- Dougherty, Thomas Warren**, professor, management; PhD, University of Houston-University Park
- Douty, Richard T.**, professor emeritus, civil engineering, PhD, PE, Cornell University
- Dow, Jay K.**, associate professor, political science; PhD, University of Texas at Austin
- Dowdy, Richard P.**, associate professor emeritus, nutritional sciences; PhD, North Carolina State University at Raleigh
- Downey, Barbara S.**, assistant teaching professor, management; PhD, University of Missouri
- Downing, Daniel L.**, extension associate, agricultural systems management, biological engineering; MS, University of Missouri
- Downs, Harry W.**, professor, agricultural systems management, biological engineering; PhD, Oklahoma State University
- Downs, H. Willard**, extension professor, agriculture systems management; PhD, University of Illinois
- Draper, Jack**, assistant professor, romance languages and literature; PhD, Duke University
- Drtna, Jon A.**, resident instruction assistant professor, theatre; MFA, University of Southern Mississippi
- Drury, A Cooper**, associate professor, political science; PhD, Arizona State University
- D'Souza, Newton S.**, assistant professor, architectural studies; PhD, University of Wisconsin-Milwaukee
- Duan, Dongsheng**, associate professor, molecular microbiology and immunology; PhD, University of Pennsylvania
- Duan, Ye**, assistant professor, computer science; PhD, State University of New York at Stony Brook
- Duffield, Roger C.**, professor, mechanical and aerospace engineering; PhD, University of Kansas
- Duffy, Margaret E.**, associate professor, strategic communication; PhD, University of Iowa
- Dumas, Wayne**, professor emeritus, learning, teaching & curriculum
- Dunn, Michael Wayne**, adjunct instructor, radio-television journalism; PhD, University of Mississippi
- Dunnaway, S.**, adjunct instructor, occupational therapy; MA, Fort Hays University
- Durham, Weldon Bruce**, professor emeritus, theatre; PhD, University of Iowa
- Dwyer, John Patrick**, associate professor, forestry; PhD, University of Missouri
- Eagle, Linda Boldan**, clinical instructor, occupational therapy; BHS, University of Missouri
- Earnest, B.**, adjunct professor, occupational therapy; BS University of Missouri
- Edara, Praveen K** assistant professor, civil and environmental engineering; PhD, Virginia Polytechnic Institute
- Eddy, Tonya**, clinical instructor, nursing; MS(N), University of Missouri
- Edgell, Holly**, assistant professor, professional practice, radio-television journalism; MA, Kent State University
- Edidin, Dan S.**, professor, mathematics; PhD, Massachusetts Institute of Technology
- Eggener, Keith L.**, associate professor, art history and classical archaeology; PhD, Stanford University
- Eggert, Lori Suzanne**, assistant professor, biological sciences; PhD, University of California-San Diego
- Eisenstark, Abraham**, emeritus professor, biological sciences, PhD, University of Illinois
- Ehrhardt, Gary Jason**, research professor, nuclear science and engineering
- Elder, W. L.**, research associate professor, social work, PhD, University of Missouri
- El Gizawy, Ahmed S.**, professor, mechanical and aerospace engineering; PhD, University of Waterloo, Canada
- Ellis, Ladonna**, assistant instructor, human development and family studies
- Elshoff, Denise**, assistant teaching professor, theory; PhD, Yale University
- Emerich, David William**, professor, biochemistry; PhD, University of Wisconsin-Madison
- Emmons, A. H.**, professor emeritus, nuclear science and engineering institute; PhD, University of Michigan
- Endersby, James W.**, associate professor, political science; PhD, University of Texas at Austin
- Engel, Thomas G.**, associate professor, electrical engineering; PhD, Texas Tech University
- Engelstein, Stefani**, associate professor, german and russian studies; PhD, University of Chicago
- English, James T.**, professor, plant sciences; PhD, University of Florida
- Erb, Laurie**, research associate professor, biochemistry, PhD, University of Missouri
- Ernst, Zachary**, associate professor, philosophy; PhD, University of Wisconsin-Madison
- Escorcía, Jose Luis**, resident instruction instructor, romance languages and literature; MA, Indiana University-Bloomington
- Esebua, Magda**, assistant professor, pathology and anatomical sciences; MD, Tbilisi State Medical University
- Espinosa, Linda M.**, professor, learning teaching and curriculum; PhD, University of Chicago
- Esser, Frank**, assistant professor, communication; PhD, Johannes Gutenberg University of Mainz
- Evans, Karl N.**, professor emeritus, civil engineering, MS, PE, University of Illinois
- Evans-Smith, Pamela**, clinical instructor, nursing; MS(N), University of Missouri
- Evelev, John O.**, associate professor, english; PhD, Duke University
- Faaborg, John Raynor**, professor, fisheries and wildlife sciences; PhD, Princeton University
- Fadel, Paul Joseph**, assistant professor, pharmacology and physiology; PhD, UNT Health Science Center
- Fagan, Mary K**, assistant professor, communication science and disorders; PhD, University of Missouri-Columbia
- Fales, Roger**, assistant professor, mechanical and aerospace engineering; PhD, Iowa State University
- Fan, Xudong**, assistant professor, biological engineering; PhD, University of Oregon
- Fang, Deyu**, assistant professor, otolaryngology; molecular microbiology and immunology, M.D., PhD., Gunma University
- Farber, David B.**, assistant professor, accountancy; PhD, Cornell University-
- Farmer, Janet E.**, professor, health psychology; PhD, University of Missouri
- Farmer, John William**, research professor, nuclear science and engineering; PhD, Kansas State University
- Farre, David E.**, adjunct instructor, photojournalism
- Fauquet, Claude**, adjunct professor, plant sciences; PhD, Strasburg.

- Fay, William Phillip**, joint professor, pharmacology and physiology; MD, University of Illinois
- Feather, Milton**, professor emeritus, biochemistry, PhD, Purdue University
- Feng, Zaichun Frank**, associate professor, mechanical and aerospace engineering; PhD, University of Minnesota
- Fennell, John**, professional practice associate professor, magazine journalism; MA, University of Wisconsin-Milwaukee
- Fennwald, Dennis James**, resident instruction instructor, animal sciences; MA, Montana State University-Bozeman
- Ferree, Nancy S. B.**, assistant instructor, human development and family studies; MS, Kansas State University
- Ferreira, Marco Antonio Rosa**, assistant professors, statistics; PhD, Duke University
- Ferris, Stephen P.**, professor and director of financial research institute, finance; PhD, University of Pittsburgh
- Field, Gregory L., Captain, USMC**, assistant professor, naval science, adult education; MA, Central Michigan University
- Fine, Mark A.**, professor, human development and family studies; PhD, Ohio State University
- FinFgeld-Connett, Deborah**, associate professor, nursing; PhD, University of Texas at Austin
- Finke, Deborah L.**, assistant professor, plant sciences; PhD, University of Maryland
- Firman, Jeffrey D.**, professor, animal science; PhD, University of Maryland College Park
- Fischer, Monika**, assistant teaching professor, german and russian studies; PhD, University of Oregon
- Flanagan, John R.**, assistant professor, religious studies, PhD, The University of Iowa
- Flinn, Mark V.**, associate professor, an; PhD, Northwestern University
- Floros, Katharine M.**, assistant professor, political science; PhD, University of Pittsburgh
- Flournoy, Nancy**, professor, statistics; PhD, University of Washington
- Foley, John Miles**, curators professor, english; professor, classical studies; PhD, University of Massachusetts Boston
- Foley, Richard** assistant professor; classical studies, PhD, Northwestern University
- Folk, William**, professor and Associate Dean of Research, biochemistry, PhD, Stanford University
- Forgacs, Gabor**, professor, physics; PhD, Eotvos Lorand University
- Forrester, Joe**, research associate professor, biochemistry; PhD, University of Missouri-Columbia
- Foulkes, Matthew Walton**, assistant professor, geography; PhD, University of Illinois
- Fox, Neil Ian**, associate professor, soil, environmental and atmospheric sciences; PhD, University of Salford-England
- Fox, Roy F.**, professor, dept. chair, learning teaching and curriculum; PhD, University of Missouri
- Francis, Jere R.**, professor, accountancy; PhD, University of New England
- Francisco, Ben**, associate research professor, nursing; PhD, University of Missouri
- Franz, Charles**, professor, management; PhD, University of Nebraska
- Franz, Lori**, professor, management; PhD, University of Nebraska
- Franzel, Sean**, assistant professor, german and russian studies; PhD, Cornell University
- Frazier, Shellanie**, assistant professor, department of pathology and anatomical sciences; DO, Kirksville College of Osteopathic Medicine
- Freelin, Tammy Lee W.**, teaching assistant professor, social work; MSW, University of Missouri
- French, Dan**, professor and department chair, finance; PhD, Louisiana Tech University
- Fresen, John L.**, assistant teaching professor, statistics; PhD, University of Johannesburg
- Freund, Stefan R.**, assistant professor, music theory, composition; DMA, Eastman Music
- Frey, Crystal J.**, instructor, soil, environmental and atmospheric sciences; BS, University of Missouri-Columbia
- Freyermuth, Shari**, resident instruction assistant professor, biochemistry, PhD, Duke University
- Friedrichsen, Patricia J.**, assistant professor, learning teaching and curriculum; PhD, Pennsylvania State University
- Friesen, Steven J.**, associate professor, religious studies; PhD, Harvard University
- Frisby, Cynthia M.**, associate professor, strategic communication; PhD, University of Florida
- Fritsche, Kevin L.**, professor, animal science, nutritional sciences, molecular microbiology and immunology; PhD, University of Illinois at Urbana-Champaign
- Fritschi, Felix B.**, assistant professor, plant sciences, PhD, University of California-Davis
- Fritz, Dana R.**, clinical assistant professor, communication science and disorders; PhD, University of Missouri
- Frymire, John M.**, assistant professor, history; PhD, University of Arizona
- Funkenbusch, Karen**, extension research associate, agriculture systems management; MS, Truman State University
- Gable, Sara E.**, associate professor, human development and family studies; PhD, Pennsylvania State University
- Gafke, Roger A.**, professor emeritus, radio-television journalism; MA, University of Missouri
- Gahl, John**, professor, nuclear science and engineering institute, electrical engineering; PhD, Texas Tech University
- Gaines, Julia R.**, assistant professor, music.percussion; DMA, University of Oklahoma
- Galambos, Colleen M.**, professor, social work; PhD, Catholic University of America
- Galen, Candace**, professor, biological science; PhD, University of Texas at Austin
- Galliher, John**, professor, sociology; PhD, Indiana University Bloomington
- Gallimore, Rangira Bea**, associate professor, romance languages and literature; PhD, University of Cincinnati
- Gangopadhyay, Shubhra**, professor, electrical engineering; PhD, Indian Institute of Technology, Kharagpur India
- Ganley, Brian C.**, assistant teaching professor, chemistry; PhD, University of Missouri-Columbia
- Ganong, Lawrence H.**, professor, nursing, human development and family studies; PhD, University of Missouri
- Ganong, Marilyn Coleman**, professor, human development and family studies; EDD, University of Missouri
- Gantzer, Clark J.**, professor, soil, environmental and atmospheric sciences; PhD, University of Minnesota-Twin Cities
- Gao, Ting**, assistant professor, economics; PhD, University of Michigan
- Garcia, Michael Leonard**, assistant professor, biological sciences; PhD, Mayo College of Medicine
- Garcia Pinto, Magdalena**, emeritus associate professor, romance languages and literature; PhD, University of Texas at Austin
- Garrett, Harold Eugene**, professor, forestry; PhD, University of

- Missouri
- Garrison II, Paul W.**, associate professor, music. clarinet; MM, Yale University
- Garton, Bryan L.**, assistant dean, academic programs, agriculture; professor, agricultural education; PhD, Ohio State University
- Garton, Susan Lynn**, assistant instructor, human development and family studies; BS, University of Missouri
- Garverick, Henry Allen**, professor, animal science; PhD, Purdue University
- Gassmann, Walter**, associate professor, plant sciences; PhD, University of California-San Diego
- Gates, Kent S.**, professor, chemistry, biochemistry; PhD, Northwestern University
- Gayer, Debra A.**, associate teaching professor, nursing; PhD, University of Missouri
- Gayou, Douglas**, teaching assistant professor, biological science; PhD, University of Missouri
- Geary, David C.**, professor, psychological sciences; PhD, University of California-Riverside
- Geden, Elizabeth**, professor emeritus, nursing; PhD, University of Missouri
- Geen, Russell Glen**, professor emeritus, psychological sciences; PhD, University of Wisconsin-Madison
- Geibel, Steven Randolph**, associate professor, music. flute; MM, University of Missouri
- Geisert, Rodney D.**, professor, animal sciences; PhD, University of Florida
- Geiss, Charles**, associate professor emeritus, economics; PhD, University of North Carolina-Raleigh
- Gelatt, Rod Gerald**, professor emeritus, radio-television journalism; MA, University of Iowa
- George, Milon Fred**, associate professor, forestry; PhD, University of Minnesota-Twin Cities
- Gerardy, Nancy**, clinical associate, special education; EDS, University of Missouri
- Gerhardt Jr., Howard Carl**, curator's professor, biological science; PhD, University of Texas at Austin
- Gesztesy, Friedrich**, professor, mathematics; PhD, University of Graz
- Geyer, Elizabeth O.**, laboratory instructor, human development and family studies; MA, University of Missouri
- Geyer, Francis A.**, assistant instructor, human development and family studies
- Ghosh, Tushar K.**, professor, nuclear science and engineering institute; PhD, Oklahoma State University
- Gibson, Kyle**, instructor, physical therapy; MA, University of Missouri
- Gilles, Carol**, associate professor, learning teaching and curriculum; PhD, University of Missouri
- Gilles, Jere Lee**, associate professor, rural sociology; PhD, Cornell University
- Gillis, Kevin D.**, associate professor, biological engineering; D.Sc, Washington University
- Gladden, Patricia L.**, assistant professor, economics; PhD, Northwestern University
- Glascok, Michael D.**, research assistant professor, nuclear science and engineering institute; PhD, University of Iowa
- Glaser, Rainer Ernst**, professor, chemistry; PhD, University of California-Berkeley
- Glass, Timothy E.**, associate professor, chemistry; PhD, Stanford University
- Glick, Elisa Fern**, associate professor, english; PhD, Brown University
- Glinskii, Vladislav**, assistant professor, pathology and anatomical sciences; MD, Medical Institute-Ukraine
- Gold, Michael**, research professor, forestry; PhD, Michigan State University
- Goldfarb, Joseph Michael**, assistant professor, learning teaching and curriculum; MS, Indiana University Bloomington
- Goldschmidt, Michael**, resident instruction assistant professor, architectural studies; M ARCH, San Francisco Institute of Architecture
- Golomb, Miriam W.**, associate professor, biological science; PhD, University of California-Berkeley
- Gomez, Francisco Gustavo**, assistant professor, geological sciences; PhD, Cornell University
- Gompper, Matthew E.**, associate professor, fisheries and wildlife sciences; PhD, University of Tennessee-Knoxville
- Goodman, Cynthia**, research assistant professor, PhD, University of Missouri. Insect physiology and virology.
- Goodman, Judith C.**, associate professor, communication science and disorders; PhD, University of Chicago
- Gopalakrishna, Srinath**, associate professor, marketing; PhD, Purdue University
- Gopalaratnam, Vellore S.**, professor, civil/environmental engineering; PhD, Northwestern University
- Gordon, Matthew J.**, associate professor, english; PhD, University of Michigan-Ann Arbor
- Gowdy, Mary Ann**, resident instruction assistant professor, plant sciences; PhD, Oklahoma State University
- Goyne, Keith W.**, assistant professor, soil, environmental, and atmospheric sciences, PhD, Pennsylvania State University
- Grafakos, Loukas**, professor, mathematics; PhD, University of California-Los Angeles
- Granberg, Don**, professor emeritus, sociology; PhD, Pennsylvania State University
- Grant, Sheila Ann**, associate professor, biological engineering; PhD, Iowa State University
- Green, Jonathan Andrew**, assistant professor, animal science; PhD, University of Missouri
- Greening, Daniel W.**, associate professor, management; PhD, Pennsylvania State University
- Greenlief, C. Michael**, associate professor, chemistry; PhD, University of Texas at Austin
- Greenwood, K.**, assistant professor, photojournalism; PhD, University of Missouri-Columbia
- Gregory, Gretchen**, clinical instructor, nursing; MS(N), University of Missouri
- Gregory, Rabia Anne-Geha**, assistant professor, religious studies; PhD, UNC-Chapel Hill
- Grider, Chris**, clinical instructor, nursing; MS(N), University of Missouri
- Grigsby, Gary**, professional practice assistant professor, radio-television journalism; MA, University of Missouri
- Grigsby, Mary**, associate professor, rural sociology; PhD, University of Missouri
- Grill, J. B.**, assistant professor, art; MS
- Grinfeld, Michael J.**, professional practice associate professor, magazine journalism; JD, New England School of Law, Boston
- Groening, Christopher John**, assistant professor, finance, management and marketing; PhD, University of Pittsburgh
- Grouws, Douglas Arthur**, research professor, learning teaching and curriculum; PhD, University of Wisconsin-Madison
- Groves, James L.**, associate professor, hotel and restaurant management; PhD, Kansas State University
- Gruen, Ingolf Uwe**, associate professor, food science; PhD, Virginia Polytechnic Institute and State University
- Gu, Chao**, assistant professor, economics; PhD, Cornell University
- Guinn, Jeffrey A.**, resident teaching instructor, food systems and bioengineering; BA, University of

- Missouri-Columbia
- Gu, Li-qun**, assistant professor, biological engineering; PhD, Nankai University, China
- Gu, Zezong**, assistant professor, pathology and anatomical sciences; MD, Tianjin Medical School, PhD, University of Texas-Medical Branch
- Gubrium, Jaber Fandy**, professor, sociology; PhD, Wayne State University
- Guell, David L.**, associate professor emeritus, civil engineering, PhD, PE, Northwestern University
- Guha, Suchismita**, associate professor, physics; PhD, Arizona State University
- Guilfoyle, Thomas**, professor, biochemistry, PhD, University of Illinois
- Gupta, Bina**, curators professor, philosophy; PhD, Southern Illinois University-Carbondale
- Gupta, Sanju**, adjunct assistant professor, electrical and computer engineering; PhD, University of Puerto Rico
- Gustafson, J. Perry**, adjunct professor, plant sciences; PhD, University of California-Davis.
- Guyette, Richard**, research professor, forestry; PhD, University of Missouri
- Ha-Brookshire, Jung E.**, assistant professor, textile and apparel management; PhD, University of North Carolina-Greensboro
- Hackley, Steven A.**, associate professor, psychological sciences; PhD, University of Wisconsin-Madison
- Hagen, Gretchen**, research professor, biochemistry, PhD, University of Georgia
- Hager, Henry B.**, associate professor emeritus, strategic communication; BA, Yale University
- Hagglund, Kristofer**, professor, health psychology; PhD, University of Alabama at Birmingham
- Haithcoat, Timothy L.**, instructor, geography; MS, University of Missouri
- Haldey, Olga**, assistant professor, music; PhD, Ohio State University
- Hale, Calvin C.**, associate professor, veterinary medicine; PhD, University of Texas at Austin
- Hall, Peter**, professor emeritus, sociology; PhD, University of Minnesota
- Hall, Robert Dickinson**, professor, plant sciences; PhD, Virginia Polytechnic Institute And State University
- Hammerli, Barbara A.**, laboratory instructor, human development and family studies; MS, Kansas State University
- Hannink, Mark**, professor, biochemistry; PhD, University of California-San Diego
- Hanson, Brenda M.**, clinical instructor, nursing; MS(N), University of Missouri
- Hanuscin, Deborah**, assistant professor, learning, teaching & curriculum, physics and astronomy; PhD
- Hao, Qing (Grace)**, assistant professor, finance, PhD, University of Florida
- Harcharras, Asma**, associate professor, mathematics; PhD, Universite Paris 6
- Hardin, Christopher**, professor, pharmacology and physiology; PhD, University of Cincinnati
- Hardy, Richard J.**, associate professor, political science; PhD, University of Iowa
- Hargrove, Marilyn K.**, associate professor, physical therapy; PhD, University of Missouri-Columbia
- Harlan, James D.**, instructor, geography; MA, University of Missouri
- Harmata, Michael**, Rabjohn distinguished professor, chemistry; PhD, University of Illinois at Urbana-Champaign
- Harmon, A.**, instructor, clinical nursing; MS(N), University of Missouri
- Harrell, Ann M.**, associate professor, music. voice; MM, University of Texas at Austin
- Harrison, Sheri-Marie Laura**, assistant professor, english; BS, University of Miami
- Harrison, William L.**, assistant professor, computer science; PhD, University of Illinois at Urbana-Champaign
- Harstad, Ronald, J.** Rhoads Foster professor, economics; PhD, University of Pennsylvania
- Hartsfield, Paula K.**, adjunct instructor, dean of human environmental science; PhD, University of Missouri
- Haslag, Joseph H.**, associate professor, economics; PhD, Southern Methodist University
- Hasser, Eileen Mary**, joint professor, pharmacology and physiology; PhD, University of Oklahoma
- Hasselriis, Peter**, professor emeritus, learning, teaching & curriculum
- Havey, Ann**, clinical associate professor, department of pathology and anatomical sciences; MD, Southern Illinois University
- Hawthorne**
- Hawk, William A.**, associate professor, art; MFA, Washington University
- Hawley, Jana M.**, associate professor, textile and apparel management; PhD, University of Missouri
- Hawley, Kristin**, assistant professor, psychological sciences; PhD, University of California
- Hayward, Robert S.**, associate professor, fisheries and wildlife PhD, Ohio State University
- Hayashida, Frances M.**, assistant professor, anthropology; PhD, University of Michigan
- Hazelbauer, Gerald**, professor, biochemistry; PhD, University of Wisconsin
- Hdeib, Ecaterina Mariana**, clinical assistant professor, cardiopulmonary/diagnostic sciences; MA, Institute of Architecture of Bucharest
- Hdeib, Moses M.**, clinical associate professor, cardiopulmonary/diagnostic sciences; MD, Carol Davila University of Medicine
- He, Hong S.**, associate professor, forestry; PhD, Chinese Academy of Sciences
- He, Zhihai**, assistant professor, electrical engineering; PhD, University of California-Santa Barbara
- He, Zhuoqiong**, associate professor, statistics; PhD, Purdue University
- Hearne, Joanna**, assistant professor, english; PhD, University of Arizona
- Hearne, Leonard**, assistant teaching professor, statistics, PhD, George Mason University
- Heggie, Glen David**, clinical associate professor, cardiopulmonary/diagnostic sciences; EdD, University of Alberta
- Heiman, Suzette T.**, professional practice associate professor, strategic communication; MA, Truman State University
- Heine, Anne Gray**, clinical instructor, nursing; MS(N), University of Missouri
- Heiss, Andrea**, assistant professor professional practice, journalism; PhD, University of Iowa- Iowa City
- Helfer, Adam D.**, professor, mathematics; PhD, Oxford University, England
- Hendrickson, Mary**, extension associate professor, rural sociology; PhD, University of Missouri
- Hendrickson, Matthew D.**, adjunct instructor, editorial
- Henzl, Michael**, professor, biochemistry; PhD, University of Wisconsin
- Heringman, Noah I.**, associate professor, english; PhD, Harvard University
- Herman, Eliot**, adjunct professor, plant sciences; PhD, University of California-San Diego.
- Hermesen, Joan M.**, associate

- professor, sociology; PhD, University of Maryland College Park
- Herzog, David L.**, professional practice assistant professor, newspaper journalism; BA, Temple University, Philadelphia
- Hess, Jonathan A.**, associate professor, communication; PhD, University of Minnesota
- Hesse, Antje**, research assistant professor, biochemistry; PhD, Michigan State University
- Hessler, Richard M.**, professor emeritus, sociology; PhD, University of Pittsburgh
- Heston, Dawn M.**, resident instruction instructor, romance languages and literature; MA, University of Missouri-Columbia
- Hibbard, Bruce E.**, adjunct associate professor, plant sciences; PhD, Colorado State University.
- Hickey, Kim**, adjunct instructor, occupational therapy; MA, University of Missouri
- Hicks, W. Whitney**, professor emeritus, economics; PhD, Stanford University
- Hill, Michael A.**, professor, pharmacology and physiology; PhD, University of Melbourne
- Hill, Sarah E.**, adjunct instructor, radio-television journalism; BS, University of Missouri
- Hillemann, Linda K.**, teaching assistant professor, social work; MSW, University of Missouri
- Hillman, Laura**, professor, child health; MD, Yale University
- Hillman, Robert**, professor emeritus, biochemistry; PhD, Yale University
- Himmelberg, Glen R.**, emeritus professor, geological sciences; PhD, University of Minnesota
- Hinkebein, Joseph**, clinical associate professor, health psychology; PhD, University of Missouri
- Hinkel, Howard Hollis**, associate professor, english; PhD, Tulane University of Louisiana
- Hinnant, Amanda**, assistant professor, magazine journalism; PhD, Northwestern University
- Hinnant, Charles H.**, professor emeritus, english; PhD, Columbia University
- Hinton, Pamela S.**, associate professor, nutritional sciences; PhD, University of Wisconsin-Madison
- Hitzhusen, Gerald Lee**, associate professor, parks recreation and tourism; MS, University of Missouri
- Ho, Dominic King Choi**, associate professor, electrical engineering; PhD, Chinese University of Hong Kong
- Hoard, Adrienne Walker**, professor, learning, teaching & curriculum and art; MFA, EDD, University of Illinois at Urbana-Champaign
- Hobbs, Joseph John**, professor, geography chair; PhD, University of Texas at Austin
- Hoberek, Andrew P.**, associate professor, english; PhD, University of Chicago
- Hockman, Kristen, M.**, assistant teaching professor, accountancy; MACC, University of Missouri
- Hocks, Richard A.**, professor emeritus, english; PhD, University of North Carolina
- Hodder, Grant H.**, assistant instructor, newspaper journalism; BA, University of Missouri
- Hodge, Sandra**, extension associate professor, rural sociology; PhD, Michigan State University
- Hodges, John Q.**, assistant professor, social work; PhD, University of California-Berkeley
- Hoffman, Timothy**, professor, nuclear science and engineering institute; PhD, University of Missouri-Columbia
- Hofmann, Steven**, professor, mathematics; PhD, University of Minnesota
- Hogan, Rosemary Grace**, clinical associate professor, cardiopulmonary/diagnostic sciences; MED, Central Missouri State University
- Holan, Scott Harold**, assistant professor, statistics; PhD, Texas A&M University College Station
- Holland, Catherine A.**, associate professor, political science; PhD, New School for Social Research
- Holman, Martin**, assistant teaching professor; german and russian studies; MA, University of California-Berkeley
- Holtsford, Timothy P.**, associate professor, biological science; PhD, University of California-Riverside
- Hooley, Daniel M.**, professor, classical studies; PhD, University of Minnesota
- Horisk, Claire S.**, assistant professor, philosophy; PhD, University of North Carolina at Chapel Hill
- Horner, William Thomas**, resident instruction professor, political science; PhD, University of Texas at Austin
- Horstmeier, Greg**, extension instructor; BS, University of Missouri
- Hosmer, Julie Ann**, resident teaching instructor, food systems and bioengineering; MA, Webster University
- Houseman, Richard M.**, associate professor, plant sciences; PhD, Texas A&M University
- Houston, Mark B.**, associate professor, marketing; PhD, Arizona State University
- Howard, Thomas P.**, professor and director, accountancy; PhD, Arizona State University
- Howe, John**, professor and missouri bankers chair, finance; PhD, Purdue University
- Hsieh, Fu Hung**, professor, biological engineering; PhD, University of Minnesota-Twin Cities
- Hubbart, Jason A.**, assistant professor, forestry; PhD, University of Idaho-Moscow
- Hu, Zhiqiang**, assistant professor, civil and environmental engineering; PhD, University of Connecticut
- Hudson Weems, Clenora**, professor, english; PhD, University of Iowa
- Hudson, Fraser Berkley**, assistant professor, magazine journalism; PhD, University of North Carolina at Chapel Hill
- Hudson, LeGreta**, adjunct instructor, nutritional sciences; MS, University of Missouri
- Huelsbergen, Deborah L.**, associate professor, art; MFA, Iowa State University
- Huneycutt, Lois L.**, associate professor, history; PhD, University of California-Santa Barbara
- Hunt, Douglas G.**, associate professor, english; MA, Oxford University, England
- Huntze, Sharon L.**, assistant professor, special education; EdD, University of Missouri
- Hurley, Thomas**, professor, medical pharmacology & physiology, PhD, Duke University
- Hurst, Robin D.**, teaching associate professor, biological science; PhD, University of Missouri
- Hussam, Ali A.**, resident assistant professor, education; PhD, University of Ulster, N. Ireland
- Huxley, Virginia H.**, professor, pharmacology and physiology; PhD, University of Virginia
- Hwang, Johye**, assistant professor, food science; PhD, Pennsylvania State University
- Hwang, Tzyh Chang**, professor, pharmacology and physiology; PhD, Johns Hopkins University
- Ibrahim, Abdullahi A.**, associate professor, history; PhD, Indiana University Bloomington
- Ifshin, Barbara Elaine**, assistant professor professional practice, strategic communication; MBA, Columbia University
- Ingram, Ellis**, associate professor, department of pathology and anatomical sciences; MD, University of Michigan-Ann Arbor
- Inniss, Enos Charles**, assistant professor, civil and environmental

- engineering; PhD, University of Notre Dame
- Iosevich, Alex**, professor, mathematics; PhD, University of California-Los Angeles
- Ireton, Sean M.**, associate professor, german and russian studies; PhD, University of Washington
- Islam, Naz E.**, associate professor, electrical engineering; PhD, Rensselaer Polytechnic Institute
- Ispa, Jean Mona**, professor, human development and family studies; PhD, Cornell University
- Iyengar, Srikanth**, associate professor, mathematics; PhD, Purdue University
- Jacobson, Robert B.**, research associate, adjunct professor, geography; PhD, Johns Hopkins University
- Jacoby, William A.**, associate professor, chemical engineering; PhD, University of Colorado at Boulder
- Jago, Arthur G.**, professor, management; PhD, Yale University
- James, Harvey S.**, associate professor, agriculture economics; PhD, Washington University
- James-Kracke, Marilyn**, associate professor, medical pharmacology & physiology, PhD, University of British Columbia, Vancouver, Canada
- James, Patrick**, professor, political science; PhD, University of Maryland College Park
- Jang, Wooseung**, associate professor, industrial and manufacturing systems engineering; PhD, University of California-Berkeley
- Janku, Anne M.**, research assistant professor, social work; PhD, University of Missouri
- Jaramillo, Alejandra**, assistant professor, biological sciences; PhD, Duke University
- Jeanetta, Stephen**, extension assistant professor, rural sociology; MA, University of Nebraska-Lincoln
- Jen, Philip Hung Sun**, professor, biological science; PhD, Washington University
- Jensen, Susan**, assistant professor, music, violin, MM, University of Southern California
- Jenkins, Patricia Wallace**, adjunct assistant professor, learning teaching and curriculum; PhD, University of Missouri
- Jennings, Marci W**, resident instruction instructor, animal sciences; MA, University of California-Davis
- Jeon, Kyung Seon**, research associate, economics; PhD, University of Missouri
- Jesse, George William**, professor, animal science; PhD, University of Missouri
- Jett, Leslie Glenn**, resident teaching instructor, food systems and bioengineering; MA, University of Missouri-Columbia
- JiJi, Renee Denise**, assistant professor, chemistry; PhD, Arizona State University
- Johnson, Christopher**, visiting assistant professor, aerospace; MAE, University of Wyoming
- Johnson, Joseph W**, assistant professor, art; MFA, Massachusetts College of Art
- Johnson, Marc**, assistant professor, molecular microbiology and immunology; PhD, Oregon State University
- Johnson, Paul C.**, assistant professor, religious studies; PhD, University of Chicago
- Johnson, Phillip J**, professor, veterinary medicine: DVM, University of Bristol
- Johnson, Rebecca A.**, associate professor, nursing; PhD, University of Iowa
- Johnson, Richard A.**, professor, Hibbs Middlebush chair in entrepreneurship, management; PhD, Texas A&M
- Johnson, Robert N.**, associate professor, philosophy; PhD, University of North Carolina at Chapel Hill
- Johnson, Thomas**, professor, agriculture economics; PhD, Oregon State University
- Johnson, Victoria L.**, associate professor, sociology; PhD, University of California-Davis
- Johnston, Christopher J.**, resident instruction assistant professor, mathematics; PhD, Northeastern University
- Johnston Jr., Joseph Andrew**, professor, education, school and counseling psychology; PhD, University of Michigan-Ann Arbor
- Johnston, Laura C.**, instructor, newspaper journalism; BJ, University of Missouri
- Johnstone, George**, professor, health psychology; PhD, University of Georgia
- Jonassen, David H**, professor, nuclear science and engineering institute; PhD, Temple University
- Jones Jr., Melvin Eugene**, visiting assistant professor, music; MM, University of Texas at Austin
- Jones, John Richard**, professor, fisheries and wildlife sciences; PhD, Iowa State University
- Jorgensen, Stephen Robert**, professor, human development and family studies; PhD, University of Minnesota-Twin Cities
- Jurczyk, Michael**, associate professor, computer science; PhD, University of Stuttgart
- Jurisson, Silvia S.**, professor, chemistry, nuclear science and engineering institute; PhD, University of Cincinnati
- Justice, George Lewis**, associate professor, english; PhD, University of Pennsylvania
- Kalaitzandonakes, Nicholas**, professor, agriculture economics; PhD, University of Florida
- Kallenbach, Robert L.**, associate professor, plant sciences; PhD, Texas Tech University
- Kalton, Nigel J.**, professor, mathematics; PhD, Cambridge University
- Kantner, Larry**, professor emeritus, learning, teaching & curriculum; EDD
- Kanne, Stephen M.**, clinical assistant professor, health psychology; PhD, Washington University
- Karthas, Hyana**, assistant professor, history; PhD, Brown University
- Katti, Kattessa V**, professor, nuclear science and engineering institute; PhD, Indian Institute of Science
- Kauffman, John F.**, associate professor, chemistry; PhD, University of Illinois at Urbana-Champaign
- Kaupp, Verne**, Director of ICREST and research professor, DE, University of Kansas
- Kausler, Douglas**, curators professor emeritus, psychological sciences; PhD, Washington University
- Kausen, Valerie M.**, associate professor, romance languages and literature; PhD, University of California-Santa Cruz
- Kaylen, Michael S.**, associate professor, agriculture economics; PhD, Purdue University
- Kazic, Toni**, associate professor, computer science; PhD, University of Pennsylvania
- Keating, Michael Gene**, visiting instructor, naval science; BS, University of Wisconsin-Madison
- Keely, Jennifer Loraine**, clinical instructor, cardiopulmonary and diagnostic sciences; BS, University of Missouri-Columbia
- Keiser, Lael R.**, associate professor, political science; PhD, University of Wisconsin-Milwaukee
- Keisler, Duane H.**, professor, animal science; PhD, West Virginia University
- Keller, James M.**, professor, electrical engineering; PhD, University of Missouri
- Keller, Steven W.**, associate professor, chemistry; PhD, University of

- California-Berkeley
- Kelley, Cheryl A.**, associate professor, geological sciences; PhD, University of North Carolina at Chapel Hill
- Kelley, Dennis Francis**, visiting assistant professor, religious studies; ABD, University of California-Santa Barbara
- Kelley, Karen D.**, laboratory instructor, human development and family studies; MA, University of Missouri
- Kelly, Glenda Lou**, adjunct instructor, nursing; MD, University of Missouri-Columbia
- Kelly, Michael Joseph**, professor, social work; PhD, University of Texas at Austin
- Kemp, David J.**, resident instruction instructor, animal science; M.S., University of Missouri
- Kennedy, George**, professor emeritus, journalism studies; PhD, University of Missouri
- Keown, Linda Jane**, resident instruction instructor, romance languages and literature; MA, Emory University
- Kerley, Monty S.**, professor, animal science; PhD, University of Illinois at Urbana-Champaign
- Kerns, John Gerald**, associate professor, psychological sciences; PhD, University of Illinois at Urbana-Champaign
- Kerwin, William J.**, associate professor, english; PhD, University of North Carolina at Chapel Hill
- Kesler, Dylan Charles**, assistant professor, fisheries and wildlife sciences; PhD, Oregon State University
- Ketter, Diane**, clinical instructor, nursing; MS(N), University of Missouri
- Keyvan, Shahl**, research professor, mechanical and aerospace engineering; PhD, University of California-Berkeley
- Khanna, Sanjeev K.**, associate professor, mechanical and aerospace engineering; PhD, University of Rhode Island
- Khurana, Inder K.**, professor, accountancy; PhD, Arizona State University
- Kierland, Brian B.**, assistant professor, philosophy; PhD, Princeton University
- Kiger, Sam A.**, professor, civil/environmental engineering; PhD, University of Illinois at Urbana-Champaign
- Kilburn, Erin Denise**, clinical instructor, nursing; MS(N), University of Missouri
- Kim, Byung**, assistant professor, sociology; PhD, Stanford University
- Kim, Dae-Young**, assistant professor, systems and bioengineering; PhD, Purdue University
- Kim, Nam-Jung**, research assistant professor, mechanical and aerospace engineering; PhD, University of North Carolina
- King, Laura A.**, professor, psychological sciences; PhD, University of California-Davis
- King, Wilma**, distinguished professor, history; PhD, Indiana University Bloomington
- Kingsley, Laurie**, clinical associate, learning, teaching and curriculum
- Kirk, Mark D.**, professor, biological science; PhD, Rice University
- Kist, Sharon E.**, clinical instructor, nursing; MS(N), University of Missouri
- Kitchen, Newell R.**, adjunct associate professor, plant sciences; PhD, Colorado State University.
- Kleen, Penny**, assistant teaching professor, accountancy; PhD, University of Missouri
- Klein Trull, Meg A.**, clinical associate professor, psychological sciences; PhD, University of Kentucky
- Klein, Cerry M.**, professor, industrial and manufacturing systems engineering; PhD, Purdue University
- Klein, John R.**, associate professor, art history and classical archaeology; PhD, Columbia University
- Klein, Peter G.**, associate professor, agriculture economics; PhD, University of California-Berkeley
- Klein, Sandra K.**, assistant adjunct professor, economics; PhD, Auburn University
- Kluever, Craig Allan**, professor, mechanical and aerospace engineering; PhD, Iowa State University
- Knerr, Julie**, assistant professor, music; PhD, University of Oklahoma-Norman
- Knight, Michael**, associate teaching professor, bands/conducting; DMA, University of Iowa
- Knipping, Nancy**, associate professor, learning teaching and curriculum; PhD, Southern Illinois University-Carbondale
- Knowlton, Matthew**, research assistant professor, fisheries and wildlife sciences; PhD, University of Missouri
- Koc, Bulent Ali**, assistant professor, food systems and bioengineering; PhD, Pennsylvania State University
- Koditschek, Theodore**, associate professor, history; PhD, Princeton University
- Koedel, Cory**, assistant professor, economics; PhD, University of California
- Koehn, Hans Friedrich**, assistant professor, psychological sciences; PhD, University of Illinois-Champaign
- Koldobskiy, Aleksandr**, professor, mathematics; PhD, Leningrad State University
- Kolenikov, Stanislav**, assistant professor, statistics; PhD, University of North Carolina
- Konkle, Maureen A.**, associate professor, english; PhD, University of Minnesota
- Konrad, Angela D.**, clinical instructor and research associate professor, pathology and anatomical sciences; DO, Kirksville College of Osteopathic Medicine, PhD, Florida State University
- Kopcha, Stephen C.**, professional practice associate professor, strategic communication; BJ, University of Missouri
- Kopeikin, Sergei M.**, associate professor, physics; PhD, Moscow State University
- Kopp, Kristin**, assistant professor, german and russian studies; PhD, University of California-Berkeley
- Korkin, Dmitri**, assistant professor, computer science; PhD, University of New Brunswick
- Kosztin, Dorina C.**, associate teaching professor, physics; PhD, University of Illinois Urbana
- Kosztin, Ioan**, associate professor, physics; PhD, University of Illinois at Urbana-Champaign
- Kovacs, Laszlo**, adjunct associate professor, plant sciences; PhD, University of Missouri.
- Kovaleski, Scott D.**, assistant professor, electrical engineering; PhD, University of Michigan
- Kramer, Michael**, professor, communication; PhD, University of Texas at Austin
- Kramer, Johanne**, assistant professor, english; PhD, Cornell University
- Krause, William II**, professor, department of pathology and anatomical sciences; PhD, University of Missouri
- Krawitz, Aaron D.**, professor, mechanical and aerospace engineering; PhD, Northwestern University
- Kraxberger, Lynda S.**, professional practice associate professor, convergence journalism; MA, University of Missouri
- Kremer, Robert J.**, adjunct professor, soil, environmental & atmospheric sciences; PhD, Mississippi State University. Soil microbiology.
- Kreuger, Larry**, professor, social work; PhD, Saint Louis University
- Kriechhaus, Jonathan T.**, associate professor, political science; PhD, Princeton University

- Krishnan, Hari B.**, adjunct professor, plant sciences; PhD, Washington State University.
- Krug, Giulianne**, clinical assistant professor, occupational therapy; MA, University of Missouri
- Krug, Jeffrey**, instructor, physical therapy; BS, University of Wisconsin
- Kuehn, Alice**, associate professor emeritus, nursing; PhD, University of Missouri
- Kultgen Jr, John Henry**, professor emeritus, philosophy; PhD, University of Chicago
- Kunze, J. F.**, professor emeritus, nuclear science and engineering institute; PhD, Carnegie-Mellon
- Kwon, Jae Wan**, assistant professor, electrical and computer engineering; PhD, University of Southern California
- Kyle, Greeley A.**, professional practice associate professor, radio-television journalism; MA, Memphis State University
- Lackey, David J.**, adjunct instructor, occupational therapy; MEd, University of Missouri
- LaFontaine, Thomas Paul**, adjunct instructor, nutritional sciences; PhD, University of Missouri
- Lamberson, William R.**, professor, animal science; PhD, University of Nebraska
- Lambert, Michael**, Millsap professor, human development and family studies; PhD, University of North Carolina at Chapel Hill
- Lambeth, Edmund**, professor emeritus, journalism studies; PhD, American University
- Land Jr, Norman Earl**, professor, art history and classical archaeology; PhD, University of Virginia
- Landes, Eric E.**, assistant professor, art; MFA, Indiana University Bloomington
- Landhuis, Pauline Marie**, assistant professor, nutritional sciences; MS, University of California-Davis
- Langdon, Susan Helen**, associate professor, art history and classical archaeology; PhD, Indiana University
- Langen, Timothy C.**, associate professor, german and russian studies; PhD, Northwestern University
- Langeneckert, Mark G.**, resident instruction instructor, art; BFA, Art Center College of Design
- Langley, April C. E.**, associate professor, english; PhD, Notre Dame University
- Lannin, John**, assistant professor, learning teaching and curriculum; PhD, Illinois State University
- Larsen, David R.**, professor, forestry; PhD, University of Washington
- Larsen, Soren C.**, assistant professor, geography, PhD, University of Kansas
- Larvick, Karen**, visiting associate professor, music; MM, University of Wisconsin
- Lattimer, Jimmy Christian**, associate professor, nuclear science and engineering institute; DVM, Washington State University
- Latushkin, Yuri**, professor, mathematics; PhD, Odessa University
- Laughlin, Maurice Harold**, professor and chair, veterinary anatomy and physiology; PhD, University of Iowa
- Laur Jr., George Clark**, extension instructor, agricultural journalism; BS, University of Missouri
- Lawless, Elaine**, curator's professor, english; PhD, Indiana University Bloomington
- Lawrence, Mary**, research associate, newspaper journalism; MS, Ohio State University
- Lawrence, Robert K.**, adjunct assistant professor, plant sciences; PhD, Michigan State University.
- Lazzaro-Weis, Carol**, professor, romance languages and literature; PhD, University of Pennsylvania
- Leavene Jr, Robert W.**, associate professor emeritus, electrical engineering; PhD, University of Missouri
- Ledoux, David R.**, professor, animal science; PhD, University of Florida
- Lee, David R.**, director of graduate studies, associate professor, molecular microbiology and immunology; PhD, University of Virginia
- Lee, James Chak Man**, assistant professor, biological engineering; PhD, University of Pennsylvania
- Lee, Maurice S.**, teaching assistant professor, english; PhD, University of California-Los Angeles
- Lee, Maw Lin**, professor emeritus, economics; PhD, University of Wisconsin-Madison
- Lee, Myoung**, assistant teaching professor, economics; PhD, University of Missouri
- Lee, Suhwon**, assistant teaching professor, statistics, PhD, University of Missouri
- Legarsky, Justin J.**, assistant professor, electrical engineering; PhD, University of Kansas
- Leibinger, Douglas J.**, assistant professor, music; PhD, University of Miami
- Leigh, James, E.**, professor emeritus, special education; PhD, University of Southern California
- Lembke, Erica**, assistant professor, special education; PhD, University of Minnesota-Twin Cities
- Lenau, Charles W.**, professor emeritus, civil engineering, PhD, PE, Stanford University
- Len-Rios, Maria**, assistant professor, strategic communication; PhD, University of Missouri
- Leong, Lampo**, chair, associate professor, art; MFA, California College of Arts and Crafts
- Leshner, Glenn M.**, associate professor, radio-television journalism; PhD, Stanford University
- Leuci, Mary S.**, extension assistant professor, rural sociology; DED, University of Missouri
- Lever, Susan Z.**, associate professor, chemistry; PhD, North Carolina State University at Raleigh
- Levy, Ellen Jo**, assistant professor, english; MA, Ohio State University
- Lewis, Marvin A.**, professor emeritus, romance languages and literature; PhD, University of Washington
- Lewis, Timothy J.**, professor, associate dean, special education; PhD, University of Oregon
- Lewis, Trudy Lynne**, professor, english; PhD, University of Illinois at Chicago
- Lewis, Virginia L.**, resident instruction associate professor, german and russian studies; PhD, University of Pennsylvania
- Li, Aigen**, assistant professor, physics and astronomy; PhD, Leiden University
- Li, Hao**, assistant professor, mechanical and aerospace engineering; PhD, Stevens Institute of Technology
- Li, Huaiyin**, assistant professor, history; PhD, University of California-Los Angeles
- Li, Yanguang**, professor, mathematics; PhD, Princeton University
- Li, Yingkui**, assistant professor, geography; PhD, Peking University
- Libbus, Martha Kay**, professor, nursing; DRPH, University of Texas Health Science Center
- Lijia, Linnea**, professor emeritus, learning, teaching & curriculum; PhD
- Likholetov, Vladislav**, research assistant professor, chemical engineering; PhD, St. Petersburg State University, Russia
- Likos, William J.**, assistant professor, civil/environmental engineering; PhD, Colorado School of Mines
- Lim, Robert W.**, associate professor, medical pharmacology & physiology university of Washington
- Lin, Chun Shin**, associate professor, electrical engineering; PhD, Purdue University

- Lin, Mengshi**, assistant professor, food systems and bioengineering; PhD, Washington State University
- Lin, Yuyi**, associate professor, mechanical and aerospace engineering; PhD, University of California-Berkeley
- Lindaman, Susan E.**, instructor, physical therapy; BS, University of Missouri
- Linit, Marc Jeffrey**, professor, plant sciences; PhD, University of Arkansas-Fayetteville
- Lipton, Emma E.**, associate professor, english; PhD, Duke University
- Liscum III, Emmanuel**, professor, biological science; PhD, Ohio State University
- Little, Randie**, research associate professor, department of pathology and anatomical sciences; PhD, Florida State University Tallahassee
- Liu, Fei**, assistant professor, statistics; PhD, Duke University
- Liu, Henry**, professor emeritus, civil engineering, PhD, PE, Colorado State University
- Liu, Mian**, professor, geological sciences; PhD, University of Arizona
- Lo, Clarence Y.**, associate professor, sociology; PhD, University of California-Berkeley
- Loch, Wayne**, research professor, animal science; PhD, University of Missouri
- Loehr, J. Erik**, associate professor, civil/environmental engineering; PhD, University of Texas at Austin
- Loginova, Oksana**, assistant professor, economics; PhD, Duke University
- Lombardo, Stephen J.**, associate professor, chemical engineering; PhD, University of California-Berkeley
- Loory, Stuart H.**, professional practice professor, magazine journalism; MS, Columbia University
- Looser, Devoney K.**, associate professor, english; PhD, State University of New York at Stony Brook
- Lopez, Chavez Oscar**, assistant professor, teacher development program; PhD, University of Missouri
- Lopiccolo, Joseph**, professor, psychological sciences; PhD, Yale University
- Lorenzen, Carol L.**, associate professor, animal sciences; PhD, Texas A&M University
- Lorson, Christian L.**, associate professor, veterinary pathobiology and molecular microbiology and immunology; PhD, University of Missouri
- Lory, John A.**, extension associate professor, plant sciences; PhD, University of Minnesota-Twin Cities
- Loschky, David J.**, professor emeritus, economics; PhD, Harvard University
- Luo, Yuyan**, assistant professor, psychological sciences; PhD, University of Illinois
- Loy, Timothy**, associate professor, department of pathology and anatomical sciences; MD, Southern Illinois University
- Loyalka, Sudarshan K.**, curators' professor, nuclear science and engineering institute; PhD, Stanford University
- Lu, Haibin**, assistant professor, computer science; PhD, University of Florida
- Lubahn, Dennis**, professor, biochemistry; PhD, Duke University
- Lucy, Matthew C.**, professor, animal science; PhD, University of Florida
- Ludwig, Gail S.**, associate professor, geography; DA, University of Northern Colorado
- Luecke, Richard H.**, professor emeritus, chemical engineering; PhD, University of Oklahoma
- Luger, Alan**, associate professor, department of pathology and anatomical sciences; MD, Duke University
- Lupo, Anthony R.**, associate professor, soil, environmental and atmospheric sciences; PhD, Purdue University
- Lyman, Richard Lee**, professor, anthropology; PhD, University of Washington
- Ma, Hongbin**, associate professor, mechanical and aerospace engineering; PhD, Texas A&M University
- Mabary, Judith**, assistant professor, music history, PhD, Washington University
- MacLeod, Kenneth G.**, associate professor, geological sciences; PhD, University of Washington
- Madsen, Richard**, adjunct professor, statistics; PhD, Iowa State University
- Maiorino, Renata**, instructor, learning teaching and curriculum; MA, University of Iowa
- Makarov, Konstantin A.**, professor, mathematics; PhD, Leningrad State University
- Malcom K. Wallace, Jr.**, visiting professor, military science; MS, Naval Post Graduate School
- Malugani, Izelda**, adjunct instructor, dean of agriculture; DVM, Universidad de Montevideo, Uruguay
- Mandy, David M.**, professor and chair, economics; PhD, University of Illinois at Urbana-Champaign
- Mann, Brian**, assistant professor, mechanical and aerospace engineering, D.Sc., Washington University
- Mann, William**, visiting assistant professor, trombone; MM, University of Texas
- Manring, Noah D.**, associate professor, mechanical and aerospace engineering; PhD, Iowa State University
- Mantrala, Murali Krishna**, professor, marketing; PhD, Northwestern University
- Manzo, Angelo A.**, assistant professor, music, tuba/euphonium; DMA, University of Texas-Austin
- Manzo, Eric**, adjunct assistant professor, music theory/clarinets; DMA, University of Texas
- Marcos-Llinas, Monica**, teaching assistant professor, romance languages and literature; PhD, Universitat Illes Balears
- Marinova, Detelina Christova**, assistant professor, finance, management and marketing; PhD, University of Cincinnati
- Market, Patrick S.**, associate professor, soil, environmental and atmospheric sciences; PhD, Saint Louis University
- Markie, Peter Joseph**, distinguished teaching professor, philosophy; PhD, University of Massachusetts - Amherst
- Marks, Raymond D.**, associate professor, classical studies; PhD, Brown University
- Markward, Martha J.**, associate professor, social work; PhD, University of Illinois at Urbana-Champaign
- Marra, Rose M.**, associate professor, nuclear science and engineering institute; PhD, University of Colorado-Denver
- Marrero, T. R.**, professor, chemical engineering; PhD, University of Maryland College Park
- Marrs, Mary Elizabeth**, assistant teaching professor, management; PhD, University of Missouri
- Marsh, Troy**, assistant professor, music; DMA, University of Missouri-Kansas City
- Marshall, Howard W.**, professor emeritus, art history and classical archaeology; PhD, Indiana University Bloomington
- Martin, Gregg Dale**, assistant teaching professor, management; PhD, University of Missouri
- Martin, Mark**, associate professor, biochemistry; PhD, University of Mississippi Medical Center
- Martin, Thomas A.**, clinical assistant professor, health psychology; PsyD, Adler School of Professional

- Psychology
- Maruniak, Joel**, associate professor, biological science; PhD, University of Texas at Austin
- Mascendaro, Paula Renee**, instructor of nursing
- Mashhoon, Bahram**, professor, physics; PhD, Princeton University
- Mason, Debra L.**, associate professor, professional practice, journalism studies; PhD, Ohio University
- Massey, Raymond**, extension associate professor, agricultural economics; PhD, Oklahoma State University
- Materer, Timothy John**, professor, English; PhD, Stanford University
- Mathews, Michelle C.**, laboratory instructor, human development and family studies; MS, University of Missouri
- Matisziw, Timothy Clark**, assistant professor, civil environmental engineering; PhD, Ohio State University
- Matsuda, Sandra J.**, clinical assistant professor, occupational therapy; PhD, University of Missouri
- Matthews, Stephen Frank**, professor, agriculture economics; PhD, University of Missouri
- Mauldin, Elaine G.**, associate professor, accountancy; PhD, University of Nebraska
- Mawhinney, Thomas**, associate professor, biochemistry; PhD, Albany Medical College
- Mayer, Joy Mathis**, professional practice assistant professor, editorial; BA, University of Oklahoma
- McCann, Laura M. J.**, associate professor, agriculture economics; PhD, University of Minnesota
- McCarthy, Denis Michael**, associate professor, psychological sciences; PhD, University of Kentucky
- McCartney, James Lee**, professor emeritus, sociology; PhD, University of Minnesota-Twin Cities
- McCathren, Rebecca**, associate professor, special education; PhD, Vanderbilt University
- McClellan, Andrew D.**, professor, biological science; PhD, Case Western Reserve University
- McClure, Bruce**, associate professor, biochemistry; PhD, University of Minnesota
- McCormack, Guy L.**, clinical professor, occupational therapy; PhD, Saybrook Graduate School
- McCracken, Michael W.**, assistant professor, economics; PhD, University of Wisconsin - Madison
- McGarraugh**, professor emeritus, civil engineering, PhD, PE, Purdue University
- McDaniel, Roxanne W.**, associate professor, nursing; PhD, University of Texas at Austin
- McDonald, David George**, professor, psychological sciences; PhD, Washington University
- McDonald, Kenneth F.**, research associate professor, electrical engineering; MS, Texas Tech University
- McElroy, Jan J.**, instructor, physical therapy; BS, University of Missouri
- McGlew, James F.**, associate professor, classical studies; PhD, University of Chicago
- McGrath, Matthew S.**, associate professor, philosophy; PhD, Brown University
- McIntosh, Arthur H.** adjunct associate professor, plant sciences; ScD, Harvard University.
- McIntosh, Mark A.**, chair, professor, department of molecular microbiology and immunology; PhD, University of Texas
- McKean, Michael L.**, associate professor, radio-television journalism; MA, Rice University
- McKendry, Anne Leslie**, associate professor, plant sciences; PhD, University of Manitoba, Canada
- McKenney, William Thomas**, professor, composition/theory; PhD, Eastman School of Music, University of Rochester.
- McKinney, Mitchell S.**, associate professor, communication; PhD, University of Kansas
- McKinstry, Megan Louise**, lecturer, german and russian studies; MS, University of Washington
- McLaren, Robert Wayne**, professor emeritus, electrical engineering; PhD, Purdue University
- McLay, Barbara**, clinical associate professor, communication science and disorders; MA, University of Iowa
- McLeod, John Dwight**, associate professor, music; MM, Manhattan Music
- McMahon, Lynne**, professor, english; PhD, University of Utah
- McMullen, Michael D.** adjunct professor, plant sciences; PhD, University of Chicago
- Meisenbach, Rebecca J.** assistant professor, communication; PhD, Purdue University
- Melnyk, Andrew**, professor, philosophy; PhD, Oxford University
- Mendenhall, Denice L.**, clinical instructor, nursing; MN, University of Washington
- Menezes, Carmen Francis**, professor emeritus, economics; PhD, Northwestern University
- Mermelstein, Joanne**, associate professor emeritus, social work; PhD, St. Louis University
- Merrell, Arlene J.**, clinical instructor, nursing; MS(N), University of Missouri
- Mertz, Dan**, emeritus professor, biological sciences, PhD, University of Texas-Austin
- Metcalf Wilson, Kristin**, clinical instructor, nursing; MS, Vanderbilt University
- Meyer, Seth**, research assistant professor, agricultural economics; PhD, University of Missouri
- Meyers, William H.**, professor, agriculture economics; PhD, University of Minnesota
- Miceli, Paul**, professor, physics; PhD, University of Illinois at Urbana-Champaign
- Miceli, Paul F.**, associate professor, nuclear science and engineering institute; PhD, University of Illinois-Champaign/Urbana
- Micheas, Athanasios**, associate professor, statistics; PhD, University of Connecticut-Storrs
- Miernyk, Jan**, research molecular biologist, biochemistry; PhD, Arizona State University
- Mihail, Jeanne Denyse**, professor, plant sciences; PhD, University of Arizona
- Milanick, Mark**, professor, pharmacology and physiology; PhD, University of Chicago
- Miles, C. Donald**, emeritus professor, biological sciences, PhD, University of Indiana
- Miles, John B.**, professor, mechanical and aerospace engineering; PhD, University of Illinois
- Miles, Randall J.**, associate professor, soil, environmental and atmospheric sciences; PhD, Texas A&M University
- Miller, Douglas**, visiting associate professor, economics; PhD, University of California-Berkeley
- Miller Jr, Dennis K.**, associate professor, psychological sciences; PhD, Texas A&M University
- Miller, James Madison**, professor, theatre; MFA, University of Southern Mississippi
- Miller, Kerby Alonzo**, curators professor, history; PhD, University of California-Berkeley
- Miller, Louise**, associate teaching professor, nursing; PhD, University of Missouri
- Miller, Owen W.**, professor emeritus, industrial and manufacturing systems engineering; D.Sc. Washington University
- Miller, William H.**, professor, nuclear science and engineering institute; PhD, University of Missouri
- Miller, Zachary**, assistant professor,

- economics; PhD, Rice University
- Mills, R. Dean**, professor, convergence journalism; PhD, University of Illinois at Urbana-Champaign
- Millsbaugh, Joshua J.**, associate professor, fisheries and wildlife sciences; PhD, University of Washington
- Minor, Marian Adams**, professor, physical therapy; PhD, University of Missouri
- Minturn, Neil B.**, associate professor, music theory; PhD, Yale University
- Milyo, Jeffrey D.**, professor, economics; PhD, Stanford University
- Misfeldt, Michael L.**, professor, molecular microbiology and immunology; PhD, University of Iowa
- Missiri, Olga Victorovna**, rji editor(video), journalism; MA, University of Missouri-Columbia
- Mitchell, W. Jefferson**, veterinary pathobiology and molecular microbiology and immunology; DVM, Auburn University; PhD, Cornell University
- Mitchell, Karen Kay**, assistant professor, journalism; MD, University of Missouri
- Mitchum, Melissa Goellner**, assistant professor, plant sciences; PhD, University of North Carolina at Raleigh
- Mitra, Ranadhir**, associate professor, department of pathology and anatomical sciences; PhD, University of Missouri
- Mitreva, Dorina I.**, professor, mathematics; PhD, University Central office
- Mitreva, Marius**, professor, mathematics; PhD, University of South Carolina - Columbia
- Miyagi-Lusthaus, Hiron**, lecturer, german and russian studies; BA, Waseda University
- Miyamoto, Peter**, assistant professor, piano; DMA, Michigan State University
- Moe, Aaron P.**, visiting assistant professor, music; MM, Northern Illinois University
- Moeller, Jennifer L.**, professional practice assistant professor, magazine journalism; MA, University of Missouri
- Moen, Daryl R.**, professor, journalism studies; MA, University of Minnesota-Twin Cities
- Moesel, Douglas D.**, associate professor, management; PhD, Texas A&M University
- Molavi, Nancy**, teaching assistant professor, romance languages and literature; PhD, University of Missouri
- Monnier, Nicole M.**, assistant teaching professor, german and russian studies; PhD, Princeton University
- Monson, Michael J.**, Chair, agriculture economics; PhD, University of Florida
- Monson, Sandra J.**, research assistant professor, dean of agriculture; PhD, University of Florida
- Montfrooij, Wouter Theodorus**, associate professor, physics; PhD, University of Delft
- Montgomery Smith, Stephen**, professor, mathematics; PhD, Cambridge University
- Mooney, Brian**, research assistant professor, biochemistry, PhD, University College Dublin
- Moore, Julia A.**, assistant instructor, human development and family studies
- Moore, Kevin C.**, associate professor, agriculture economics; PhD, Iowa State University
- Morgan, John Mark**, associate professor, parks recreation and tourism; PhD, Texas A&M University
- Morgan, Ralph Speer**, professor, english; PhD, Stanford University
- Mori, Anatole**, associate professor, classical studies; PhD, University of Chicago
- Morpurgo, Carlo**, associate professor, mathematics; PhD, Washington University
- Morris, Mark David**, assistant professor, history; PhD, Indiana University Bloomington
- Morris, Michelle**, assistant professor, history; PhD, Harvard University
- Morris, Roy**, professor emeritus, biochemistry, PhD, University College, London
- Morrison, Johnetta W.**, associate professor, human development and family studies; EDD, Syracuse University
- Morrison, K. C.**, professor, political science; PhD, University of Wisconsin-Madison
- Morrow, Eva**, assistant instructor, human development and family studies, BS, University of Missouri
- Mortal, Sandra**, assistant professor, finance; PhD, University of Georgia
- Moscattelli, Ezio**, professor emeritus, biochemistry; PhD, University of Illinois
- Mosely, Wayne**, visiting assistant professor, aerospace; MSA, Central Michigan University
- Moser, William J.**, assistant professor, school of accountancy, PhD, University of Arizona
- Moss, Kathryn Sue**, clinical assistant professor, cardiopulmonary/diagnostic sciences; MED, University of Missouri
- Mossine, Valeri**, research assistant professor, agriculture biochemistry; PhD, Institut of Physical Chemistry, Academy of Science of Ukraine
- Motavalli, Peter P.**, adjunct associate professor, soil, environmental and atmospheric sciences; PhD, Cornell University. Soil nutrient management.
- Mueser, Peter**, professor, economics; PhD, University of Chicago
- Mullen Jr, Edward John**, professor, romance languages and literature; PhD, Northwestern University
- Mumford, Judith**, adjunct instructor, human development and family studies; PhD, University of Missouri
- Muratore, Mary Jo**, professor, romance languages and literature; PhD, University of California-Davis
- Murfett, Jane**, research assistant professor, biological science; PhD, University of Melbourne
- Musser, Dale**, assistant professor, computer science; PhD, The Ohio State University
- Mustapha, Azlin**, associate professor, food science; PhD, University of Nebraska
- Muzika, Rosemarie**, associate professor, forestry; PhD, Michigan State University
- Myers, Anne Marie**, assistant professor, english; PhD, University of California-Los Angeles.
- Myers, Robert L.**, adjunct associate professor, plant sciences; PhD, University of Minnesota.
- Nabelek, Peter I.**, professor, geological sciences; PhD, State University of New York at Stony Brook
- Nagel, Susan Carol**, research assistant professor, biological science; PhD, University of Missouri
- Nair, Satish S.**, professor, electrical and computer engineering; PhD, Ohio State University
- Nathan, Manjula**, extension associate professor, plant sciences; PhD, South Dakota State University
- Naveh-Benjamin, Moshe**, professor, psychological sciences; PhD, University of Michigan
- Naz, Sabiha**, teaching assistant professor, mechanical and aerospace engineering; PhD, University of Missouri-Columbia
- Neal, Steven Phelps**, associate professor, mechanical and aerospace engineering; PhD, Iowa State University
- Neitz, Mary Jo**, professor, sociology; PhD, University of Chicago
- Nelson, Curtis J.**, Curator's professor emeritus, PhD, University of Wisconsin. Crop physiology.
- Nelson, Kelly A.**, research associate professor, plant sciences; PhD,

- Michigan State University
Nemmers, Charles, director, transportation infrastructure center, civil & environmental engineering, B.S., M.A., Marquette University and Ohio State University
- Neth, Mary C.**, associate professor, history; PhD, University of Wisconsin-Madison
- Neville, Eryca**, assistant professor, professional practice, learning, teaching and curriculum; PhD, University of Missouri
- Nevins, Kim M.**, assistant professor, physical therapy; PhD, University of Missouri
- Newcomer, Lori L.**, research assistant professor, special education; PhD, University of Missouri
- Newton, Kathleen J.**, professor, biological science; PhD, Indiana University Bloomington
- Nguyen, Henry Thien**, endowed professor, plant sciences; PhD, University of Missouri
- Nguyen, Mary M.**, adjunct instructor, journalism; BS, University of Missouri
- Ni, Daxin**, lecturer, german and russian studies; BA, Beijing Foreign Languages Institute
- Ni, Xiaoguang**, professor, economics; PhD, University of Minnesota-Twin Cities
- Nicholson-Crotty, Sean**, assistant professor, political science; PhD, Texas A&M University
- Nickell, Glenda**, clinical instructor, nursing; MS(N), University of Missouri
- Nikolai, Loren Alfred**, professor, accountancy; PhD, University of Minnesota-Twin Cities
- Nilon, Charles H.**, professor, fisheries and wildlife sciences; PhD, State University of New York
- Noble, James Stewart**, associate professor, industrial and manufacturing systems engineering; PhD, Purdue University
- Noble, William A.**, associate professor emeritus, geography; PhD, Louisiana State University
- Nolan, Michael F.**, professor, rural sociology; PhD, Pennsylvania State University
- Noltie, Douglas B.**, associate professor, fisheries and wildlife sciences; PhD, University of Western Ontario
- Norum, Pamela S.**, associate professor, textile and apparel management; PhD, Cornell University
- Nothwehr, Steven F.**, associate professor, biological science; PhD, Washington University
- Nunnally, William Charles**, interim chair, professor, electrical engineering; PhD, Texas Tech University
- O'Brien, David J.**, professor, rural sociology; PhD, Indiana University Bloomington
- O'Brien, Michael J.**, professor, anthropology; PhD, University of Texas at Austin
- Oceña, Luis G.**, associate professor, industrial and manufacturing systems engineering; PhD, Purdue University
- O'Connell, Robert M.**, professor, electrical and computer engineering; PhD, University of Illinois
- O'Dell, Boyd**, professor emeritus, agriculture biochemistry; PhD, University of Missouri
- O'Hara, John M.**, adjunct professor, nuclear science and engineering institute; PhD, Adelphi University
- Okamura, Lawrence**, associate professor, history; PhD, University of Michigan-Ann Arbor
- Okker, Patricia**, professor, english; PhD, University of Illinois at Urbana-Champaign
- Okonkwo, Christopher**, associate professor, english; PhD, Florida State University
- Olesen, Mark**, assistant professor, HES; Utah State University
- Oliver, Melvin J.**, adjunct professor, plant genetics; PhD, University of Calgary
- Oliver, Gina M.**, assistant teaching professor, nursing; PhD, Saint Louis University
- Oliver, Melvin J.**, adjunct professor, plant sciences; PhD, University of Calgary
- Oliver, Richard Edward**, associate professor, health professions; PhD, University of Missouri
- Olsen, Margaret M.**, associate professor, romance languages and literature; PhD, Tulane University of Louisiana
- Oleson, Mark**, assistant professor, personal financial planning, PhD, Utah State University
- Olson, Loreen N.**, assistant professor, communication; PhD, University of Nebraska
- O'Neal, Thomas John**, associate professor, bands/conducting; DMA, University of Arizona-Tucson
- Orme, Daniel**, clinical associate professor, health psychology; PhD, Indiana State University
- Ortega, Suzanne T.**, professor, sociology; PhD, Vanderbilt University
- Ortmann, Robert A.**, associate professor, internal medicine-rheumatology and immunology and molecular microbiology and immunology; MD, Case Western Reserve University
- Orton, Diane J.**, teaching assistant professor, social work; MSW, University of Iowa
- Orton, Sarah L.**, assistant professor, civil and environmental engineering; PhD, University of Texas-Austin
- Ortwerth, Beryl**, professor emeritus, biochemistry; PhD, University of Missouri
- Osbourne, Victoria Anne**, assistant professor, social work; PhD, Washington University
- Otabela-Mewolo, Joseph**, teaching assistant professor, romance languages and literature; PhD, UNED-Madrid
- Otto, Donna C.**, clinical instructor, nursing; MS(N), University of Missouri
- Overby, Erik Richard**, visiting professor, military science and leadership; MA, University of Nebraska-Lincoln
- Overby, Leroy Marvin**, professor, political science; PhD, University of Oklahoma
- Overby, Osmund**, professor emeritus, art history and classical archaeology; PhD, Yale University
- Overholser, Geneva**, professor, journalism studies; MS, Northwestern University
- Packard, Kerri S.**, adjunct associate professor, theatre; MFA, University of Iowa
- Packard, Raymond Dean**, adjunct associate professor, theatre; MFA, University of Iowa
- Pai, P. Frank**, professor, mechanical and aerospace engineering; PhD, Virginia Polytechnic Institute And State University
- Palaniappan, Kannappan**, associate professor, computer science; PhD, University of Illinois at Urbana-Champaign
- Pallardy, Stephen Gerard**, professor, forestry; PhD, University of Wisconsin-Madison
- Palm, Harlan L.**, research assistant professor, plant sciences; PhD, University of Missouri
- Palmer, Craig T.**, associate professor, anthropology; PhD, Arizona State University
- Palmer, Mark Henry**, assistant professor, geography; PhD, University of Oklahoma Norman
- Palonsky, Stuart**, professor, learning, teaching & curriculum; PhD, Michigan State University
- Pang, Michael Man Ho**, associate professor, mathematics; PhD, London University
- Papick, Ira Joel**, professor emeritus, mathematics; PhD, Rutgers University New Brunswick

- Parcell, Joseph**, assistant professor, agriculture economics; PhD, Kansas State University
- Parker, Jeffrey M.**, visiting assistant professor, german and russian studies; PhD, University of Cincinnati
- Parker, Michael D.**, adjunct professor, social work; PhD, Arizona State University
- Parker, Sara Wing**, clinical instructor, cardiopulmonary and diagnostic sciences; BS, University of Missouri-Columbia
- Pasley, Jeffrey L.**, associate professor, history; PhD, Harvard University
- Patterson, David J.**, professor, animal science; PhD, Kansas State University
- Patton, Martha D.**, assistant professor, english; PhD, University of Missouri
- Payne, Thomas L.**, professor, plant sciences; PhD, University of California-Davis
- Pearce, Ibitola**, professor, sociology; PhD, Brown University
- Pearsall, Deborah Marie**, professor, anthropology; PhD, University of Illinois at Urbana-Champaign
- Peck, Scott**, associate professor, biochemistry; PhD, Michigan State University
- Peculis, Brenda**, associate professor, biochemistry; PhD, Johns Hopkins University
- Pennington, Delilah**, clinical instructor, nursing; MS, University of Missouri
- Pereira, Raynolde**, associate professor, accountancy; PhD, University of Arizona
- Pereyra, Martin**, assistant teaching professor; PhD, University of Missouri-Columbia
- Peritore, Norman Patrick**, professor, political science; PhD, University of California-Santa Barbara
- Perna, Leslie**, professor, viola; MM, Boston University
- Perry Jr., Earnest Lee**, associate professor, journalism studies; PhD, University of Missouri
- Peters, Matthew D.**, Lieutenant, USN, assistant professor, naval science, BS, Colorado State University
- Peterson, Catherine A.**, assistant professor, nutritional sciences; PhD, University of Illinois Urbana-Champaign
- Peterson, Charles J.**, associate professor, physics; PhD, University of California-Berkeley
- Peterson, Virginia E.**, resident instruction associate professor, biochemistry; PhD, University of Maryland
- Petrides, Marian**, associate professor, pathology and anatomical sciences, MD, Dartmouth Medical School
- Petris, Michael J.**, associate professor, biochemistry, nutritional sciences; PhD, University of Melbourne, Australia
- Petrocik, John R.**, professor, political science; PhD, University of Chicago
- Pettey, Dix Hayes**, professor, mathematics; PhD, University of Utah
- Peyton, Lee**, research associate professor, civil engineering, PhD, PE, Colorado State University
- Pfeifer, Peter**, professor, physics; PhD, Swiss Federal Institute of Technology, Zurich
- Pham, Van Hoang**, assistant professor, economics; PhD, Cornell University
- Pheiffer, Abigail M.**, adjunct instructor, photojournalism; MJ, University of Missouri
- Phillips, Charlotte**, associate professor, biochemistry; PhD, North Carolina State University
- Phillips, Lynelle Mae**, assistant professor, nursing, Emory University
- Phillips, Ronald G.**, associate professor, architectural studies; ARCH D., University of Michigan-Ann Arbor
- Phillips, Thomas E.**, professor, biological science; PhD, Northwestern University
- Piasecki, Thomas M.**, associate professor, psychological sciences; PhD, University of Wisconsin-Madison
- Pickett, Edward**, professor emeritus, biochemistry; PhD, Ohio State University
- Pierce II, Robert A.**, extension assistant professor, fisheries and wildlife sciences; PhD, University of Missouri
- Pierce, Vern**, extension associate professor, agricultural economics; PhD, University of Missouri
- Pinhero, Patrick Joseph**, associate professor, chemical engineering; PhD, University of Notre Dame
- Pintel, David J.**, professor, molecular microbiology and immunology; PhD, University of Illinois
- Piper, Karen L.**, associate professor, english; PhD, University of Oregon
- Pippert, Wesley G.**, associate professor, journalism studies; MA, Wheaton College
- Pires, Joseph C.**, assistant professor, biological sciences; PhD, University of Wisconsin
- Plain, Ronald**, professor, agricultural economics; PhD, Oklahoma State University
- Platt, Melvin C.**, professor, music; PhD, University of Michigan
- Podgursky, Michael J.**, professor, economics; PhD, University of Wisconsin-Madison
- Polacco, Joseph**, professor emeritus, biochemistry; PhD, Duke University
- Polo Prada, Luis**, assistant professor, pharmacology and physiology; PhD, Case Western Reserve University
- Poor, Joel C.**, adjunct assistant professor, marketing; PhD, University of California-Irvine
- Popham, Holly J.**, adjunct assistant professor, plant sciences; PhD, University of Missouri
- Popejoy, Lori L.**, assistant professor, nursing; PhD, University of Missouri
- Porter, Eileen W.**, professor, nursing; PhD, University of Wisconsin-Milwaukee
- Porter, Michael Joseph**, associate professor, communication; PhD, University of Iowa
- Porter, Rosemary Therese**, professor, nursing; PhD, University of Missouri
- Powell, Larry Wayne**, professional practice assistant professor, advertising; BA, University of Texas
- Prager, Bradley J.**, associate professor, german and russian studies; PhD, Cornell University
- Prahlad, Anand**, professor, english; PhD, University of California-Los Angeles
- Prasad, Amit**, assistant professor, sociology, PhD, University of Illinois, Urbana-Champaign
- Prasad, Srirupa**, assistant professor, sociology, PhD, University of Illinois, Urbana-Champaign
- Prather, Randall S.**, professor, animal science; PhD, University of Wisconsin-Madison
- Prather-Kinsey, Jenice**, associate professor, accountancy; PhD, University of Alabama
- Prato, Anthony A.**, professor, agriculture economics; PhD, University of California-Berkeley
- Prelas, Mark A.**, professor, nuclear science and engineering institute; PhD, University of Illinois at Urbana-Champaign
- Presberg, Charles D.**, associate professor, romance languages and literature; PhD, Harvard University
- Presser, Nan**, clinical associate professor, psychological sciences; PhD, University of Texas
- Prestigiaco, C. Christopher**, associate teaching professor, accountancy; PhD, University of Missouri
- Prewitt, Michael Wesley**, associate professor, cardiopulmonary/diagnostic science; PhD, University of Missouri

- Price, Markita**, resident instruction assistant professor, computer science; PhD, University of Minnesota
- Procter, Brenda J.**, extension instructor, personal financial planning; MS, University of Missouri
- Prost, Evan**, instructor, physical therapy; BHS, University of Missouri
- Proulx, Christine**, assistant professor, human development and family studies, PhD, University of North Carolina-Greensboro
- Puckett, Walter “Andy”**, assistant professor, finance
- Puckett, Walter Anderson**, assistant professor, finance, PhD, University of Georgia
- Pullis, Michael**, associate professor, department chair, special education; PhD, University of California-Los Angeles
- Qin, Zhenbo**, professor, mathematics; PhD, Columbia University
- Qiu, Jing**, assistant professor, statistics; PhD, Cornell University
- Qiu, Wenping**, adjunct associate professor, plant sciences; PhD, North Carolina State University.
- Quackenbush, Stephen L.**, assistant professor, political science; PhD, New York University at Buffalo
- Quinn, Thomas**, professor, biochemistry; PhD, St. Louis University Medical School
- Quirk, Thomas Vaughan**, professor, english; PhD, University of New Mexico
- Raedeke, Maurine Darling**, resident instruction assistant professor, nutritional sciences; MS, University of Missouri
- Radhakrishnan, Nandhakumar**, assistant professor, communication science and disorders, PhD, Bowling Green State University
- Ragland, Ellie**, professor, english; PhD, University of Michigan Ann Arbor
- Randall, Douglas**, professor emeritus, biochemistry, PhD, Michigan State
- Randall, Linda Lea**, professor, and Wurdack chair, biochemistry; PhD, University of Wisconsin
- Ranly, Donald P.**, professor emeritus, magazine journalism; PhD, University of Missouri
- Rantz, Marilyn J.**, professor, nursing; PhD, University of Wisconsin-Milwaukee
- Ratneshwar, Srinivasan**, professor, marketing; PhD, Vanderbilt University
- Ratti, Ronald Andrew**, professor, economics; PhD, Southern Methodist University
- Rautman, Marcus**, professor, art history and classical archaeology; PhD, Indiana University Bloomington
- Ravert, Russell**, assistant professor, human development and family studies; PhD, Indiana University
- Ravosa, Matt**, professor, department of pathology and anatomical sciences, PhD, Northwestern University
- Raymon, Neil A.**, associate professor, economics; PhD, University of Colorado at Boulder
- Read, David T.**, professor, english; PhD, University of Chicago
- Read, III, J. Basil, Captain, USN**, professor in naval science, (1) national security, MA, Naval War College; (2) international relations, MA, Salve Regina University; (3) strategic resource management, MS, Defense University
- Reddy, Chada Sudershan**, associate professor, veterinary medicine; PhD, University of MS Medical Center
- Reed, Katherine**, assistant professor, newspaper journalism; MA, Hollins College
- Reed, Rita**, professional practice associate professor, photojournalism; MS, University of Missouri
- Reed, Robert Edward**, research associate professor, civil and environmental engineering; PhD, University of Missouri-Rolla
- Reeder, Linda S.**, associate professor, history; PhD, Rutgers University
- Rees, David L.**, professional practice associate professor, photojournalism; MA, University of Missouri
- Reeves, Jennifer Lee**, professional practice assistant professor, radio-television journalism; MA, Aquinas College
- Reeves, Randy A.**, professional practice assistant professor, radio-television journalism; MA, University of Missouri
- Reid Arndt, Stephanie A.**, clinical assistant professor, health psychology; PhD, University of Arizona
- Riek, James V**, adjunct instructor, radio-television journalism; BS, Missouri Southern State College
- Reilly, Thomas**, assistant professor, bacteriology; PhD, University of Illinois-Urbana-Champaign
- Renner, Lynette**, assistant professor, social work, PhD, University of Wisconsin-Madison
- Retzlloff, David George**, associate professor, chemical engineering; PhD, University of Pittsburgh
- Revelle, Sara M**, adjunct instructor, nursing; MD, University of Missouri-Columbia
- Reyna, Ivan Roberto**, assistant professor, romance languages and literature; PhD, University of California-Berkeley
- Reys, Barbara Bestgen**, professor, learning teaching and curriculum; PhD, University of Missouri
- Reys, Robert E.**, curators professor, learning teaching and curriculum; EDD, University of Missouri
- Rice-Edbauer, Jennifer Hope**, assistant professor, english; PhD, University of Texas at Austin
- Richins, Marsha L.**, professor, marketing; PhD, University of Texas at Austin
- Richter, Annett Claudia**, visiting assistant professor, music; PhD, University of Minnesota
- Ricketts, Rex E.**, professor, animal science; PhD, University of Missouri
- Rieman, Dwight W.**, associate professor emeritus, social work; MSW, Case Western Reserve University
- Ries, Lawrence D.**, associate teaching professor, statistics; PhD, University of Missouri
- Riggs, Charles A.**, adjunct professor, nuclear science and engineering institute; PhD, University of Missouri
- Rikoon, James S.**, professor, rural sociology; PhD, University of Indianapolis
- Riley, Lyanne**, clinical assistant professor, communication science and disorders; PhD, University of Missouri
- Rippeto, Jane**, adjunct instructor, human development and family studies
- Rivera, Rocia Melissa**, assistant professor, animal sciences; PhD, University of Florida
- Robbins, Philip**, associate professor, philosophy; PhD, University of Chicago
- Robert, Christopher**, assistant professor, psychological sciences; PhD, University of Illinois
- Robert, Christopher A.**, assistant professor, management; PhD, University of Illinois at Urbana-Champaign
- Roberts, Craig**, professor, plant sciences; PhD, University of Arkansas-Fayetteville
- Roberts, James**, assistant professor, communication; MA, Texas Christian University
- Roberts, Robert Michael**, professor, animal science; PhD, Oxford University, England
- Robertson, J. David**, professor, nuclear

- science and engineering institute; PhD, University of Maryland
- Robertson, John D.**, professor, chemistry; PhD, University of Maryland College Park
- Robinson, Richard David**, professor, learning teaching and curriculum; EDD, University of Georgia
- Rodgers, Shelly Lanette**, assistant professor, strategic communication; PhD, University of Missouri
- Rodriguez, Alcala Maria**, instructor, applied social sciences; MD, University of Missouri-Columbia
- Rogers, Elizabeth**, assistant professor, biochemistry; Harvard University
- Rogers, Karyn L**, assistant professor, geological sciences; PhD, Washington University
- Rohrbach, Norman F.**, specialist, farm business management analysis, agricultural education, PhD, University of Missouri
- Romero, Anna Marie**, professional practice associate professor, radio-television journalism; BA, University of New Mexico
- Rose, Amanda J.**, associate professor, psychological sciences; PhD, University of Illinois at Urbana-Champaign
- Rosenblad, Brent Lyndon**, assistant professor, civil/environmental engineering; PhD, University of Texas at Austin
- Rosenholtz, Mitchell**, professor emeritus, department of pathology and anatomical sciences; MD, university of Minnesota
- Rouder, Jeffrey N.**, professor, psychological sciences; PhD, University of California-Irvine
- Rovetto, Michael J.**, professor, medical pharmacology & physiology, M.S., PhD, University of Idaho (MS), University of Virginia (PhD)
- Rowe, Jennifer L.**, assistant professor professional practice, journalism; MD, University of Missouri-Columbia
- Roy, Jessica Megan**, clinical instructor, cardiopulmonary/diagnostic sciences; BHS, University of Missouri
- Rubin, Leona Joyce**, joint professor, pharmacology and physiology; PhD, University of Colorado
- Rubinstein, Paula Sue**, instructor, physical therapy; BHS, University of Missouri
- Rudelson, Mark**, professor, mathematics; PhD, Hebrew University of Jerusalem
- Rudy, Duane**, associate professor, human development and family studies; PhD, University of Toronto
- Ruffin, Clyde**, professor, theatre; MFA, University of Iowa
- Russell, Cynthia Lorraine**, associate professor, nursing; PhD, Saint Louis University
- Rutledge, Patricia Carr**, research professor, psychological sciences; PhD, Washington University
- Ryan, Mark Russ-Ell**, professor, fisheries and wildlife sciences; PhD, Iowa State University
- Ryan, Sharon A.**, assistant teaching professor, economics; PhD, University of California-Davis
- Rymph, Catherine E.**, associate professor, history; PhD, University of Iowa
- Saab, Elias**, professor, mathematics; PhD, University of Illinois at Urbana-Champaign
- Saab, Paulette**, professor, mathematics; PhD, University of Illinois at Urbana-Champaign
- Saab, Youssef**, associate professor, computer science; PhD, University of Illinois
- Sable, Marjorie R.**, associate professor, social work; PhD, University of North Carolina at Chapel Hill
- Safranski, Timothy J.**, associate professor, animal science; PhD, University of Missouri
- Saguiguit, Leo Contreras**, assistant professor, music, saxophone; MM, Northwestern University
- Salim, Hani A.**, associate chair, associate professor, civil/environmental engineering; PhD, West Virginia University
- Salter, Christopher L.**, professor emeritus, geography; PhD, University of California-Berkeley
- Sample, Jacquelyn Marie**, adjunct instructor, occupational therapy and occupational science; BS, University of Missouri-Columbia
- Sampson, Cheri**, assistant professor, art; MFA, University of Iowa
- Sanders-Brown, Judith Lee**, adjunct instructor, nursing; MD, University of Maryland-Baltimore
- Sanders, Keith**, professor emeritus, journalism studies; PhD, University of Iowa
- Sandvol, Eric A.**, associate professor, geological sciences; PhD, New Mexico State University
- Santos, Sherod**, professor, english; PhD, University of Utah
- Santus, Sharon L.**, adjunct instructor, journalism studies
- Sarafianos, Stefan G.**, assistant professor, molecular microbiology and immunology; PhD, Georgetown University
- Satpathy, Sashi**, professor, physics; PhD, University of Illinois at Urbana-Champaign
- Sattenspiel, Lisa**, professor, anthropology; PhD, University of New Mexico
- Sayers, Stephen P.**, assistant professor, physical therapy; PhD, University of Massachusetts-Amherst
- Saylor, Charles Fredrick**, professor, classical studies; PhD, University of California-Berkeley
- Scanlon, Tom**, adjunct associate professor, department of pathology and anatomical sciences; PhD, University of Missouri
- Schachtman, Daniel**, adjunct associate professor, plant sciences; PhD, Australian National University.
- Schachtman, Todd R.**, professor, psychological sciences; PhD, State University of New York-Binghamton
- Schaeffer, Mary A.**, adjunct associate professor, plant sciences; PhD, Duke University.
- Scharf, Peter C.**, associate professor, plant sciences; PhD, Virginia Polytechnic Institute And State University
- Schatz, Gnid**, assistant professor, occupational therapy; PhD, University of Pennsylvania
- Scheer, Lisa K.**, associate professor, marketing; PhD, Northwestern University
- Scheneman, Mary Ann**, clinical assistant professor, communication science and disorders; MS,
- Schenker, David Joseph**, associate professor, classical studies; PhD, University of California-Berkeley
- Schilling, Donald**, associate professor emeritus, economics; PhD, University of North Carolina
- Schmidt, Francis**, professor, biochemistry; PhD, University of Wisconsin
- Schmidt, Olaf**, lecturer, german and russian studies; MS, Humboldt University
- Schnatterly, Karen A.**, assistant professor, management; PhD, University of Michigan
- Schneider, Keith A.**, assistant professor, psychological sciences; PhD, University of Rochester
- Schneller, John T.**, professional practice assistant professor, newspaper journalism; BS, University of Missouri
- Schnitzer, Patricia**, assistant professor, nursing; PhD, University of North Carolina-Chapel Hill
- Schoelz, James E.**, professor, plant sciences; PhD, University of Kentucky
- Scholes, Roberta**, clinical associate, education, school and counseling psychology; PhD, University of Missouri
- Schopp, Laura**, associate professor,

- health psychology; PhD, University of Missouri
- Schrader, Keith William**, professor emeritus, mathematics; PhD, University of Nebraska
- Schramm, David**, assistant professor, human development and family studies; PhD, Auburn University
- Schroeder, Walter A.**, associate professor emeritus, geography; PhD, University of Missouri
- Schul, Johannes**, associate professor, biological science; PhD, University of Marburg, Germany
- Schulte, Mitchell D.**, assistant professor, geological sciences; PhD, Washington University
- Schulz, David J.**, assistant professor, biological sciences; PhD, University of Illinois
- Schumacher, Leon G.**, professor, agriculture systems management, biological engineering; PhD, Iowa State University
- Schwain, Kristin A.**, associate professor, art history and classical archaeology; PhD, Stanford University
- Schwartz, Richard B.**, professor, english; PhD, University of Illinois
- Schwarz, Benyamin**, professor, architectural studies; PhD, University of Michigan-Ann Arbor
- Schwindt-Bayer, Leslie A.**, assistant professor, political science; PhD, University of Arizona
- Scott, Byron T.**, professor, magazine journalism; MA, Ohio University
- Scott-Cawiezell, Jill R.**, associate professor, nursing; PhD, University of Missouri
- Scott, Rebecca R.**, assistant professor, sociology; PhD, University of California-Santa Cruz
- Sebacher, Mary C.**, clinical assistant professor, cardiopulmonary/diagnostic sciences; MED, University of Missouri
- Sebesta, Judith Ann**, assistant professor, theatre; PhD, University of Texas-Austin
- Segal, Steven S.**, professor, pharmacology and physiology; PhD, University of Michigan
- Segert, Ines L.**, resident instruction assistant professor, psychological sciences; PhD, Princeton University
- Segert, Jan**, associate professor, mathematics; PhD, Princeton University
- Seitz, Christine O.**, assistant teaching professor, music; MA, University of Wisconsin-Madison
- Semlitsch, Raymond**, curator's professor, biological science; PhD, University of Georgia
- Sengupta, Shramik**, assistant professor, biological engineering; PhD, University of Minnesota
- Sentilles Jr, Francis D.**, professor emeritus, mathematics; PhD, Louisiana State University and Agriculture and Mechanical Herbert Laws Center
- Serfas, K.**, professor, occupational therapy; OTD, Creighton University
- Setzer, David R.**, professor, biological science; PhD, Stanford University
- Sexten, William Justin**, assistant professor, animal sciences; PhD, University of Illinois
- Sewell, Thomas Dan**, associate professor, chemistry; PhD, Oklahoma State University
- Seye, Cheikh**, research assistant professor, biochemistry; PhD, University of Paris
- Shang, Yi**, associate professor, computer science; PhD, University of Illinois
- Shannon, D. Kent**, extension associate, agriculture systems management; MS, University of Missouri
- Shannon, James Grover**, endowed professor, plant sciences; PhD, Purdue University
- Shannon, Marcia Carlson**, associate professor, animal science; PhD, Michigan State University
- Sharma, Gunjan**, assistant professor, economics; PhD, University of Maryland College
- Sharma, Krishna**, professor, biochemistry; PhD, University of Mysore, India
- Sharp, Paul R.**, professor, chemistry; PhD, Massachusetts Institute of Technology
- Sharp, Robert E.**, professor, plant sciences; PhD, University of Lancaster
- Sharpe, Deanna L.**, associate professor, personal financial planning; PhD, Iowa State University
- Shaw, Kenneth William**, associate professor, accountancy; PhD, University of Wisconsin
- Shaw, Richard**, adjunct associate professor, photojournalism; BJ, University of Missouri
- Shay, Robert**, school of music director, professor, PhD, University of North Carolina at Chapel Hill.
- Shelby, Kent S.**, adjunct assistant professor, plant sciences; PhD, Oklahoma State University.
- Sheldon, Kennon M.**, professor, psychological sciences; PhD, University of California-Davis
- Shelton, Kevin L.**, professor, geological sciences; PhD, Yale University
- Shenk, Mary**, assistant professor, anthropology; PhD, University of Washington
- Sher, Kenneth**, professor, psychological sciences; PhD, Indiana University Bloomington
- Sherlock, Jacob A.**, instructor, newspaper journalism; MA, University of Wyoming
- Sherman, Byron Wesley**, professor emeritus, electrical engineering; PhD, University of Missouri
- Shi, Huidong**, research associate professor, department of pathology and anatomical sciences; PhD, Kyushu Institute of Technology, Fukuoka, Japan
- Shigaki, Cheryl Lynn**, assistant professor, health psychology; PhD, University of South Florida
- Shin, Dima**, instructor, department of pathology and anatomical sciences, MS, Moscow State Academy of Instrument Engineering and Computer Science
- Shin, Doh C.**, professor, political science; PhD, University of Illinois at Urbana-Champaign
- Shiu, Patrick**, assistant professor, biological science; PhD, University of British Columbia
- Shukla, Shivendra D.**, professor, pharmacology and physiology; PhD, University of Liverpool
- Shultz, Jack C.**, professor, plant sciences; PhD, University of Washington
- Shyu, Chi Ren**, associate professor, computer science; PhD, Purdue University
- Siegel, Marcelle**, assistant professor, biochemistry, learning, teaching and curriculum; PhD, University of California-Berkeley
- Sievert, Donald Edward**, professor, philosophy; PhD, University of Iowa
- Silverman, Lewis Phillip**, instructor, chemistry; MS, University of Georgia
- Silvey, Yvette R.**, clinical instructor, physical therapy; MS, Nova University
- Simmons, Karla Peavy**, assistant professor, textile and apparel management; PhD, North Carolina State University
- Simonyi, Agnes**, research associate professor, biochemistry; PhD, University of Lorand Ectovos, Hungary
- Simpson, Sarah L.**, adjunct instructor, editorial
- Sims, Wendy L.**, director of music education, professor, music education/elementary-general; PhD, Florida State University
- Sipe, Daniel A.**, assistant professor, romance languages and literature; PhD, University of Minnesota
- Sir, Mustafa Yasar**, assistant professor, industrial and manufacturing systems engineering; PhD,

- University of Michigan
- Sisikoglu, Esra**, assistant professor, industrial and manufacturing systems engineering; MD, University of Michigan
- Sites, Robert William**, professor, plant sciences; PhD, Washington State University
- Skinner, Jeremy B.**, clinical associate professor, psychological sciences; PhD, State University of New York at Buffalo
- Skubic, Marjorie**, associate professor, electrical engineering; PhD, Texas A&M University
- Slane, Kathleen W.**, professor, art history and classical archaeology; PhD, Bryn Mawr College
- Slansky, Pamela M.**, clinical instructor, communication science and disorders; MS, Indiana University of Pennsylvania
- Sleper, David Allen**, professor, plant sciences; PhD, University of Wisconsin-Madison
- Slutske, Wendy S.**, professor, psychological sciences; PhD, University of Minnesota
- Smale, Robert**, assistant professor, history; PhD, University of Texas at Austin
- Smeda, Reid J.**, associate professor, plant sciences; PhD, Purdue University
- Smith, A Mark**, curators professor, history; PhD, University of Wisconsin-Madison
- Smith, Lynn E.**, Commander, USN, associate professor, naval sciences, BS, MA, University of Florida, Naval War College respectively
- Smith, Cynthia Zoe**, professor, photojournalism; PhD, University of Iowa
- Smith, Diane**, assistant professor, occupational therapy and occupational science; PhD, Saint Louis University
- Smith, Douglas Earl**, associate professor, mechanical and aerospace engineering; PhD, University of Illinois at Urbana-Champaign
- Smith, George P.**, curators professor, biological science; PhD, Harvard University
- Smith, John Joseph**, adjunct instructor, advertising; BA, University of Missouri
- Smith, Matthew R.**, Captain, USMC, assistant professor, naval science, systems engineering; BS, U.S. Naval Academy
- Smith, Michael Fielding**, professor, animal science; PhD, Texas A&M University
- Smith, Patricia N**, adjunct instructor, journalism; MD, University of Missouri-Columbia
- Smythe, Mary Jeanette**, associate professor, communication; PhD, Florida State University
- Snella, Kathleen A.**, clinical associate professor, cardiopulmonary/diagnostic sciences, PharmD, University of Texas at Austin
- Snively, Carol A.**, assistant professor, social work; PhD, Ohio State University
- Snyder, Leon C.**, professor emeritus; MLA, University of Michigan
- Socarides, Alexander**, assistant professor, english; PhD, Rutgers State University-New Brunswick
- Solbrekken, Gary L.**, assistant professor, mechanical and aerospace engineering; PhD, University of Minnesota
- Song, Qisheng**, associate professor, plant sciences; PhD, University of Maryland College Park
- Sood, D.**, assistant professor, occupational therapy; OTD, Washington University
- Southall, Carey**, professor emeritus, learning, teaching & curriculum
- Southard, Amanda Nicol**, assistant instructor, human development and family studies
- Sowers, Linda Franz**, instructor, applied social sciences; BS, University of Missouri
- Spain, Jim N**, professor, division of animal sciences, vice provost; PhD, Virginia Tech
- Speck, Angela Karen**, associate professor, physics; PhD, University College London
- Speckman, Paul L.**, professor, statistics; PhD, University of California-Los Angeles
- Spence, Marcia L.**, professor, french horn; DMA, University of North Texas
- Sperber, Jonathan**, curators professor, history; PhD, University of Chicago
- Spiers, Donald E.**, associate professor, animal science; PhD, University of Michigan-Ann Arbor
- Spinka, Christine M**, assistant professor, statistics; PhD, Texas A&M University
- Spollen, Linda**, associate professor, department of pathology and anatomical sciences; MD, University of Kansas
- Springer, Gordon Kent**, associate professor, computer science; PhD, Pennsylvania State University
- Squire, Peverill**, professor, political science; PhD University of California
- Srinivasan, Hema**, professor, mathematics; PhD, Brandeis University
- Stacey, Gary**, professor, plant microbiology and pathology and molecular microbiology and immunology; PhD, University of Texas-Austin
- Stack, Sharon**, professor, department of pathology and anatomical sciences, PhD, Duke University
- Stacy, Carl**, assistant professor, department of pathology and anatomical sciences, MD, Oklahoma State University
- Stadler, Michael Allen**, associate professor, psychological sciences; PhD, Purdue University
- Stallmann, Judith I.**, professor, agriculture economics; PhD, Michigan State University
- Stam, Antonie**, professor, management; PhD, University of Kansas
- Stanley, David W.**, adjunct professor, sciences; PhD, University of California-Berkeley
- Stansfield, John**, teaching assistant professor, finance; PhD, University of Missouri
- Stanton, Anne R.**, chair, associate professor, art history and classical archaeology; PhD, University of Texas at Austin
- Stanton, Maureen**, assistant professor; english, MFA, Ohio State University
- Starbuck, Christopher J.**, associate professor, plant sciences; PhD, Oregon State University
- Stealey, Josephine**, professor, art; MED, PhD, University of Missouri
- Stevens, Barry Jerome**, professor, animal science; PhD, Oklahoma State University
- Steffens, Brian**, director and adjunct assistant professor, journalism; BS, Bowling Green State University
- Steffens, Martha M.**, professional practice professor, journalism studies; BA, Indiana University Bloomington
- Steiner, Axel L., Lieutenant, USN**, assistant professor, naval science, international affairs; BA, George Washington University
- Steinley, Douglas**, associate professor, psychological sciences; PhD, University of Illinois
- Stelzer, Henry Ellis**, associate professor, forestry; PhD, Purdue University
- Sterling, James**, professional practice professor, strategic communication; BS, University of Missouri
- Stevens, William Eugene**, extension associate professor, plant sciences; PhD, Mississippi State University
- Stewart, Bob R.**, professor emeritus, learning teaching and curriculum; EDD, University of Maryland College Park
- Stichter, Janine Peck**, associate professor, special education; PhD, University of Iowa
- Stone, Bethany**, teaching assistant professor, biological science; PhD,

- University of Missouri
- Storey, Pamela**, assistant instructor, human development and family studies
- Stormont, Melissa**, associate professor, special education; PhD, Purdue University
- Storvick, Truman S.**, professor emeritus, chemical engineering; PhD, Purdue University
- Strathausen, Carsten**, associate professor, german and russian studies chair; PhD, University of Oregon
- Strathman, Alan J.**, resident instruction associate professor, psychological sciences; PhD, Ohio State University
- Stern, Reuben Joseph**, rji editor(print), journalism, BS, University of Missouri-Columbia
- Strickland, Donna**, assistant professor, english; PhD, University of Wisconsin-Milwaukee
- Strickland, Shawna L.**, clinical assistant professor, cardiopulmonary/diagnostic sciences; MEd, University of Missouri-St. Louis
- Striegler, Richard**, research associate professor, plant sciences; PhD, Michigan State University
- Stromhaug, Astrid**, resident instruction instructor, biochemistry; University of Oslo
- Stromhaug, Per Eivind**, assistant professor, biological science; PhD, University of Oslo
- Stubbs, Sue**, adjunct assistant professor, double bass; MM, University of Missouri
- Stucky, Renee**, clinical assistant professor, health psychology; PhD, University of Missouri
- Sudduth, Kenneth A.**, adjunct associate professor, biological engineering; PhD, University of Illinois-Urbana
- Summers, Gerald F.**, associate professor, biological science; PhD, University of Illinois at Urbana-Champaign
- Sun, Carlos Chung**, associate professor, civil/environmental engineering; PhD, University of California-Irvine
- Sun, Dongchu**, professor, statistics; PhD, Purdue University
- Sun, Grace**, professor, biochemistry, PhD, Oregon State University
- Sun, Jianguo**, associate professor, statistics; PhD, University of Waterloo
- Sundet, Paul A.**, associate professor emeritus, social work; PhD, University of Illinois at Urbana-Champaign
- Suppes, Galen**, professor, chemical engineering; PhD, Johns Hopkins University
- Sutovsky, Peter**, associate professor, animal science; PhD, Czech Academy of Science
- Swofford, Scott Cunningham**, professional practice assistant professor, newspaper journalism; BA, Truman State University
- Sweets, Laura Elizabeth**, extension associate professor, plant sciences; PhD, University of Minnesota-Twin Cities
- Swenson, John**, assistant teaching professor, management; JD, University of Missouri
- Swick, Marly A.**, professor, english; PhD, American University
- Sykuta, Michael E.**, associate professor, agriculture economics; PhD, Washington University
- Szekely, Eva Diana**, professor, violin; MS, Julliard School of Music
- Tabanelli, Roberta**, assistant professor, romance languages and literature; PhD, University of Wisconsin-Madison
- Taksar, Michael I.**, professor, mathematics; PhD, Cornell University
- Tan, Change**, assistant professor, biological sciences; PhD, University of Pennsylvania
- Tan, Jinglu**, professor, biological engineering; PhD, University of Minnesota
- Tang, Chun**, associate professor, biochemistry; PhD, University of Maryland
- Tang, Hui**, assistant professor, electrical engineering; PhD, University of Illinois at Urbana-Champaign
- Tanner, Jack**, professor, biochemistry chemistry; PhD, Brown University
- Tarkow, Theodore Alfred**, professor, classical studies; PhD, University of Michigan-Ann Arbor
- Tarr, James E.**, associate professor, learning teaching and curriculum; PhD, Illinois State University
- Taub, Haskell**, professor, physics; PhD, Cornell University
- Taylor, Chris**, adjunct assistant professor, plant sciences; PhD, North Carolina State.
- Taylor, Jeremy F.**, professor, biological science; PhD, University of New England, Australia
- Terjung, Ronald L.**, joint professor, pharmacology and physiology; PhD, University of Iowa
- Terry, H Robert**, professor, agricultural education; PhD, Texas A&M University
- Terry, Jeffrey H., Jr.**, adjunct instructor, nuclear science and engineering institute; PhD, Stanford University
- Tew, Patricia A.**, clinical assistant professor, cardiopulmonary/diagnostic sciences; MS, Colorado State University
- Thai, Louise S.**, resident instruction associate professor, molecular microbiology and immunology; MD, Sechenov Medical School, former USSR
- Tharp, John A.**, extension associate, agricultural systems management, biological engineering; MS, University of Missouri
- Thelen, Jay**, assistant professor, biochemistry; PhD, University of Missouri
- Thelen, Mark**, emeritus professor, psychological sciences; PhD, Michigan State University
- Thiher Jr., Ottah Allen**, emeritus professor, romance languages and literature; PhD, University of Wisconsin-Madison
- Thomas, Tom R.**, professor, nutritional sciences; PhD, University of Missouri
- Thombs, Lori Ann**, associate professor, statistics; PhD, Southern Methodist University
- Thompson, Allen L.**, associate professor, biological engineering; PhD, University of Nebraska
- Thompson, D. L.**, professor, chemistry; PhD, University of Arkansas
- Thompson, Julius**, professor of history and director of black studies program, history and black studies; PhD, Princeton University
- Thompson, Wyatt**, assistant professor, agricultural economics; PhD, University of Missouri
- Thornburg, Kathy**, professor emeritus, human development and family studies; PhD, University of Missouri
- Thorson, Esther L.**, professor, strategic communication; PhD, University of Minnesota
- Thyfault, John**, assistant professor, nutritional sciences and internal medicine; PhD, University of Kansas
- Tillema, Herbert Kendall**, professor emeritus, nuclear science and engineering; PhD, Harvard University
- Tindall, Kelly V.**, research assistant professor, plant sciences; PhD, Louisiana State University-Baton Rouge
- Tipton, Peter**, professor, biochemistry; PhD, University of Wisconsin
- Todd, Jo Ella**, professor, voice; MM, New England Conservatory of Music
- Tofle, Ruth Brent**, professor, architectural studies; PhD, University of Minnesota-Twin Cities
- Tompson, Robert V., Jr.**, associate

- professor, nuclear science and engineering institute; PhD, University of Missouri
- Torres, Robert Matthew**, professor, agricultural education; PhD, Ohio State University
- Townsend, Martha**, associate professor, english; PhD, Arizona State University
- Tracy, Paul**, adjunct associate professor, plant sciences; PhD, Colorado State.
- Trauth, Kathleen M.**, associate professor, civil/environmental engineering; PhD, Texas Tech University
- Trindade, Vitor**, associate professor, economics; PhD, University of California-San Diego
- Trinklein, David Herbert**, associate professor, plant sciences; PhD, University of Missouri
- Triplett, Greg**, assistant professor, electrical and computer engineering; PhD, Georgia Institute of Technology
- Troske, Kenneth R.**, associate professor, economics; PhD, University of Chicago
- Trout, Dennis E.**, associate professor, classical studies; PhD, Duke University
- Trull, Timothy J.**, professor, psychological sciences; PhD, University of Kentucky
- Trzeciak, Joanna**, visiting assistant professor, german and russian studies; PhD, University of Chicago
- Tsika, Richard**, professor, biochemistry; PhD, University of California-Irvine
- Tsoi, Allanus**, professor, mathematics; PhD, University of Alberta
- Tucker, Sheryl A.**, professor, chemistry; PhD, University of North Texas
- Tuggle, Christopher S.**, assistant professor, management, PhD, Texas A&M University
- Tulberg, Ellsworth**, professor, aerospace studies
- Tummons, John David**, specialist, agricultural education; MD, University of Missouri-Columbia
- Turban, Daniel B.**, professor, management chair; PhD, University of Houston-University Park
- Turner, Carrie**, adjunct instructor, music history/theory; MM, University of Missouri
- Turner, Joseph**, assistant teaching professor, chemistry, PhD, University of Mo-Columbia
- Twaddle, Andrew Christian**, professor emeritus, sociology; PhD, Brown University
- Tyrer Jr., Harry Wakeley**, professor, electrical engineering; PhD, Duke University
- University
- Tzou, Robert D.**, professor, mechanical and aerospace engineering chair; PhD, Lehigh University
- Ugarte, Michael**, professor, romance languages and literature; PhD, Cornell University
- Uhlmann, Jeffrey**, associate professor, computer science; PhD, Oxford University, England
- Ulbrich, S.**, assistant teaching professor, clinical nursing; PhD, University of Missouri
- Ullrich, Carsten**, associate professor, physics and astronomy, PhD, Universitat Wurzburg, Germany
- Underwood, Michael B.**, professor, geological sciences; PhD, Cornell University
- Unklesbay, Kenneth**, professor emeritus, electrical engineering; PhD, University of Missouri
- Unrath, Kathleen**, assistant professor, learning teaching and curriculum; PhD, University of Missouri
- Urban, Michael A.**, associate professor, geography; PhD, University of Illinois at Urbana-Champaign
- Urton, Dan**, adjunct assistant professor, voice; MM, New England Conservatory
- Vajk, Owen P.**, assistant professor, physics and astronomy; PhD, Stanford University
- Valdivia, Corinne B.**, research associate professor, agriculture economics; PhD, University of Missouri
- Vale Jr., Joe Donald**, extension instructor, agricultural journalism; BJ, University of Missouri
- Vallentyne, Peter L.**, professor, philosophy; PhD, University of Pittsburgh
- Van Doren, Steve**, associate professor, biochemistry; PhD, University of Illinois-Urbana Champaign
- Van Garderen, Delinda**, assistant professor, special education; PhD, University of Miami
- vanMarle, Kristy L.**, assistant professor, psychological sciences; PhD, Yale University
- VanPool, Christine**, assistant professor, anthropology; PhD, University of New Mexico
- VanPool, Todd**, assistant professor, anthropology, PhD, University of New Mexico
- Vaughn, Paul Ray**, professor, agricultural education; PhD, Ohio State University
- Vaught, David R.**, assistant professor, parks recreation and tourism; MS, University of Missouri
- Verbitsky, Igor**, professor, mathematics; PhD, University of Kazan
- Viator, John A.**, assistant professor, biological engineering; PhD, Oregon Health & Science University
- Vignale, Giovanni**, professor, physics; PhD, Northwestern University
- Virkler, Mark Robert**, professor, civil/environmental engineering chair; PhD, University of Virginia
- Viswanath, Dabir S.**, professor emeritus, chemical engineering; PhD, University of Rochester
- Vogelsmeier, Amy**, assistant professor, nursing; PhD, University of Missouri-Columbia
- Volkert, Wynn A.**, director and curators' professor, nuclear science and engineering institute, biochemistry; PhD, University of Missouri
- Volkman, Mark J.**, associate professor, learning teaching and curriculum; PhD, Purdue University
- Volz, Michael**, lecturer, german and russian studies; MA, Stanford University; MEd, University of Minnesota
- Volz, Yong Z.**, assistant professor, journalism studies; PhD, University of Minnesota
- Vomsaal, Frederick Stephen**, curators professor, biological science; PhD, Rutgers University
- Von Schoenborn, Alexander**, associate professor, philosophy; PhD, Tulane University of Louisiana
- Wade, Jerry Lee**, associate professor emeritus, rural sociology; PhD, University of Missouri
- Wada, T.**, assistant professor, sociology, PhD, Columbia University
- Wadley, Reed L.**, associate professor, anthropology; PhD, Arizona State University
- Wagovich, Stacy A.**, professor, communication science and disorders; PhD, University of Georgia
- Waid, Timothy**, assistant teaching professor, management, PhD, University of Missouri
- Wakefield, Bonnie**, associate research professor, nursing; PhD, University of Iowa
- Walker, Bruce J.**, professor, marketing; PhD, University of Colorado at Boulder
- Walker, John Charles**, adjunct professor, biological science; PhD, University of Georgia
- Wall Jr., James Allen**, professor, management; PhD, University of North Carolina at Chapel Hill
- Wall, Davis Judy**, professor, microbiology and immunology, PhD, Duke University
- Wallace, Paul**, professor emeritus,

- political science; PhD, University of California-Berkeley
- Wallace, Richard Lee**, professor emeritus, economics; PhD, Vanderbilt University
- Wallach, Barbara Price**, associate professor, classical studies; PhD, University of Illinois at Champaign-Urbana
- Walter, Margaret Rose**, professional practice assistant professor, newspaper journalism; MA, Ball State
- Wang, Cuizhen**, assistant professor, geography; PhD, Michigan State University
- Wang, M.**, assistant professor, pathology and anatomical sciences, M.D., Lanzhou Medical College
- Wang, Shuguang**, associate professor, mathematics; PhD, Oxford University, England
- Wang, Xinghe**, professor, economics; PhD, University of Iowa
- Willet, Dan**, associate director, associate professor, MM, Michigan State University. Oboe.
- Waldhauser, Michael Gordon**, visiting professor, naval science; MS, Naval Postgraduate School
- Wanta, Wayne M.**, professor, journalism studies; PhD, University of Texas
- Ward, Carol V.**, professor, department of pathology and anatomical sciences; PhD, the Johns Hopkins University School of Medicine
- Warhover, Thomas A.**, associate professor, newspaper journalism; BJ, BA, University of Missouri
- Warmund, Michele Renee**, professor, plant sciences; PhD, University of Missouri
- Warner, Charles H.**, associate professor emeritus, radio-television journalism; MA, Southern Illinois University-Carbondale
- Washer, Glenn A.**, assistant professor, civil and environmental engineering; PhD, John Hopkins University
- Washington Jr., Lecolion**, assistant professor, music; MM, Manhattan Music
- Waters, Samuel Terrence**, assistant professor, biological sciences; PhD, University of Virginia Central
- Watson, Dorothy**, professor emeritus, learning, teaching & curriculum
- Watt, J. Wilson**, associate professor, social work; PhD, University of Illinois at Urbana-Champaign
- Watts, Steven**, professor, history; PhD, University of Missouri
- Weaber, Robert**, assistant professor, Animal Sciences, PhD, Cornell University
- Weagley, Robert O.**, associate professor, personal financial planning; PhD, Cornell University
- Weaver, Jan**, adjunct professor, biological sciences, PhD, University of Missouri
- Webber, David J.**, associate professor, political science; PhD, Indiana University Bloomington
- Weber Hardy, Lorilie**, clinical associate professor, cardiopulmonary/diagnostic sciences; MED, University of Missouri
- Weems Jr, Robert E.**, professor, history; PhD, University of Wisconsin-Madison
- Weher-Flowers, Erin**, visiting assistant professor, music education; PhD, University of Iowa
- Weinberg, Steven Robert**, professor, magazine journalism; MA, University of Missouri
- Weir, Robert B**, adjunct instructor, journalism; BS, University of Missouri
- Weirich, Paul**, professor, philosophy; PhD, University of California-Los Angeles
- Weisbrook, Christa M.**, resident assistant professor, mechanical and aerospace engineering; PhD, University of Missouri
- Weisman, Gary**, professor, biochemistry; PhD, University of Nebraska
- Welch, Sharon**, professor, religious studies; PhD, Vanderbilt University
- Wells, Kevin Dale**, assistant professor, animal sciences; PhD, NC State University
- Wenger, Janice Kay**, professor, piano/accompanying; DMA, University of Missouri-Kansas City
- Wescott, Daniel J.**, assistant professor, anthropology; PhD, University of Tennessee-Knoxville
- West, Nancy M.**, associate professor, english; PhD, University of North Carolina at Chapel Hill
- Westgren, Randall Edward**, professor, applied social sciences; PhD, Purdue University Main Campus
- Westhoff, Patrick**, research associate professor, agriculture economics; PhD, Iowa State University
- Weston, Dovey Ellen**, clinical instructor, occupational therapy; MED, University of Missouri
- Weston, Dana T.**, associate professor, mathematics; PhD, University of Illinois at Urbana-Champaign
- Wexler, Carlos**, associate professor, physics; PhD, University of Washington
- Wharton, Alexandra**, adjunct assistant professor, journalism
- Wheeler, Patrick Randolph**, assistant professor, accountancy; PhD, Georgia State University
- Whelove, Richard T.**, resident instructor, mechanical and aerospace engineering; MS, University of Missouri
- White, Henry W.**, professor, physics; PhD, University of California-Los Angeles
- Whites, Leann**, professor, history; PhD, University of California-Irvine
- Whittington, Alan Geoffrey**, associate professor, geological sciences; PhD, Open University (United Kingdom)
- Wicks, Carol M**, professor, geological sciences; PhD, University of Virginia
- Wiebold, William J.**, professor, plant sciences; PhD, University of Georgia
- Wiedemeier, Allison**, resident instructor, biological science; PhD, University of Missouri
- Wiegand, Bryon R**, associate professor, animal sciences; PhD, Iowa State University
- Wigger, John H.**, associate professor, history; PhD, University of Notre Dame
- Wikle, Christopher K.**, professor, statistics; PhD, Iowa State University
- Wilden, Peter A**, associate professor, pharmacology and physiology; PhD, University of Iowa
- Wiley, Suzanne E.**, clinical instructor, occupational therapy; BS, Ohio State University
- Wilkins, Amy C.**, assistant professor, sociology; PhD, University of Massachusetts - Amherst
- Will, Matthew**, assistant professor, psychological sciences; PhD, University of Colorado
- Willett, Dan L.**, associate director, associate professor, oboe; MM, Michigan State University
- Willett, Joseph Erwin**, professor, physics; PhD, Pennsylvania State University
- Williams, James E.**, professor, animal science; PhD, West Virginia University
- Williamson Jr., Handy**, professor, agriculture economics; PhD, University of Missouri
- Wilson, Catherine**, visiting assistant professor, learning, teaching and curriculum
- Wilson, Laurel E.**, professor, textile and apparel management; PhD, University of North Carolina at Greensboro
- Wilson, Richard A.**, assistant professor, art; MFA, University of Missouri
- Wilson, Robert Daniel**, visiting professor, naval science; MD, National Defense University
- Winfield, Betty Houchin**, curators' professor, journalism studies; PhD,

University of Washington
Wingert, Karen L., associate professor, physical therapy; PhD, Rocky Mountain University
Winholtz, Robert Andrew, associate professor, nuclear science and engineering; PhD, Northwestern University
Wipke Tevis, Deidre D., associate professor, nursing; PhD, University of California-San Francisco
Wise, Kevin, assistant professor, strategic communication; PhD, Stanford
Wise, Kim S., professor, molecular microbiology and immunology; PhD, University of Southern California
Wixom, Robert, professor emeritus, biochemistry; PhD, University of Illinois
Woelfel, Stacey, associate professor, radio-television journalism; MA, University of Missouri
Wohleber, Curt A., assistant instructor, convergence journalism; MA, Carnegie-Mellon University-Pittsburgh
Wollersheim, David E., professor, mechanical and aerospace engineering; PhD, University of Illinois
Womack, Abner Willis, professor, agriculture economics; PhD, University of Minnesota-Twin Cities
Wong, Tuck C., professor, chemistry; PhD, University of Michigan-Ann Arbor
Wood Turley, Sharon, resident instruction assistant professor, agricultural journalism; MS, University of Missouri
Wood, Phillip, professor, psychological sciences; PhD, University of Minnesota-Twin Cities
Woodbury, Karen L., teaching assistant professor, social work; MSW, University of Missouri
Worcester, David L., associate professor, biological science; PhD, Harvard University
Word, Deborah L., teaching assistant professor, social work; MSW, University of Missouri
Worthington, Ian, professor, history; PhD, Monash University, Australia
Wrather, James Allen, professor, plant sciences; PhD, University of Missouri
Wright, Dennis, professor emeritus, psychological sciences; PhD, University of California-Berkeley
Wright, Farroll Tim, professor, statistics; PhD, University of Missouri
Wright, Lisa Ann, assistant professor, physical therapy; PhD, University of

Curators, Administration and Leadership

UNIVERSITY OF MISSOURI BOARD OF CURATORS

Cheryl Walker, St. Louis, Board Chair
Buford M. Fraser, Columbia, Board Vice Chair
Marion H. Cairns, Webster Groves
John M. Carnahan III, Springfield
Warren K. Erdman, Kansas City
Judith G. Haggard, Kennett
Doug Russell, Lebanon
Don Walsworth, Marceline
David G. Wasinger, St. Louis
Kathleen M. Miller, Secretary of the Board of Curators

UNIVERSITY OF MISSOURI SYSTEM ADMINISTRATION

Gary Forsee, President UM System
Gary Allen, Vice President for Information Technology
Betsy Rodriguez, Vice President for Human Resources
Mike Nichols, Vice President for Economic Development and Research
Stephen C. Knorr, Vice President for Government Relations
Natalie “Nikki” Krawitz, Vice president for Finance and Administration
Steve Graham, Interim Vice President for Academic Affairs
Stephen J. Owens, General Council
David R. Russell, Chief of Staff

LEADERSHIP OF THE UNIVERSITY OF MISSOURI

Brady J. Deaton, Chancellor
Michael Middleton, Deputy Chancellor
Brian Foster, Provost
Robert V. Duncan, Vice Chancellor for Research
Hal Williamson, Vice Chancellor for MU Health System
David Housh, Vice Chancellor for Development and Alumni Relations
Jackie Jones, Vice Chancellor for Administrative Services
Cathy Scroggs, Vice Chancellor for Student Affairs
Chris Koukola, Assistant to the Chancellor for University Affairs
Tim Rooney, Vice President for Academic Budget and Resource Officer
Todd McCubbin, Executive Director, MU Alumni Association
Kenneth Dean, Deputy Provost
Michael Quart, Vice Provost for Extension and Director, Cooperative Extension
Michael Alden, Director, Intercollegiate Athletics

Thomas Payne, Vice Chancellor and Dean, College of Agriculture, Food and Natural Resources
Michael J. O’Brien, Dean, College of Arts and Science
Bruce J. Walker, Dean, College of Business
Rose Porter, Interim Dean, College of Education
Carolyn Herrington, Dean, College of Education
James E. Thompson, Dean, College of Engineering
Pam Benoit, Vice Provost for Advanced Studies and Dean of the Graduate School
Richard Oliver, Dean, School of Health Professions
Steve Jorgensen, Dean, College of Human Environmental Sciences
R. Dean Mills, Dean, School of Journalism
Larry Dessem, Dean, School of Law
James Cogswell, Director, University Libraries
Robert Churchill, Dean, School of Medicine
Judith Miller, Dean, Sinclair School of Nursing
Neil Olson, Dean, College of Veterinary Medicine
James H. Ross, Chief Executive Officer of University of Missouri Health Care
Tom Phillips, Chair, Faculty Council
Marijo Dixon, Chair, Staff Advisory Council
Paul Jordan, President, Missouri Students Association
Alaine Arnott, President, Graduate Professional Council
Craig Lalumandier, President, MU Alumni Association

 Commencement11

Common University General	School of Health Professions.....371	Engineering.....356
Education Requirements for	School of Journalism.....431	Department of Mathematics.....194
all MU degrees.....35	School of Nursing.....451	Department of Mechanical and
Communication.....151	Degree Program.....12	Aerospace Engineering...361
Communication Courses.....153	Degree Requirements.....114	Department of Military Science and
Communication Science	Departmental Examinations..27,113	Leadership.....200
and Disorder Courses.....387	Departmental Honors... 53, 67, 120,	Department of Naval Science ...367
Completion of a Course.....27	130, 135, 141, 152,158, 163,	Department of Nutrition and Exer-
Component.....11	173, 174, 180, 192,195, 202,	cise Physiology.....412
Composition Track.....202	214, 219, 224, 233, 246,	Department of Occupational
Computer Engineering.....345	268, 272, 295, 426	Therapy & Occupational
Computer Science.....155	Department of Aerospace	Science.....389
Computer Science Courses.....344	Studies.....117	Department of Parks, Recreation
Concurrent Courses.....11	Department of Agricultural	and Tourism.....100
Conley Scholars Program (School	Economics.....52	Department of Personal Financial
of Medicine).....20	Department of Agricultural	Planning.....416
Consent Required.....12	Education.....56	Department of Philosophy.....214
Contents.....3	Department of Agricultural	Department of Physical
Cooperative Agreement between	Journalism.....60	Therapy.....393
MU and Columbia	Department of Anthropology.....119	Department of Physics and
College.....23	Department of Architectural	Astronomy.....218
Core Requirements.....12	Studies.....398	Department of Political Science.223
Counseling Center.....36	Department of Art.....125	Department of Psychological
Course-Numbering System.....15	Department of Art Courses.....126	Sciences.....228
Course Repeat Policy.....27	Department of Art History and	Department of Religious
Course Types.....12	Archaeology.....130	Studies.....234
Creative writing emphasis.....163	Department of Biological	Department of Romance Languages
Credit.....12	Engineering.....327	and Literature.....238
Credit by Exam.....12,26	Department of Cardiopulmonary	Department of Rural Sociology...87
Credit by Examination for	and Diagnostic Sciences .375	Department of Sociology.....246
Mathematics Courses.....26	Department of Chemical	Department of Soil, Environmental
Credit Hour Surcharges.....31	Engineering.....331	and Atmospheric
Credit Restrictions.....112	Department of Chemistry.....140	Sciences.....103
Crop Management.....82	Department of Civil and Environ-	Department of Statistics.....267
Cross-level Course.....12	mental Engineering.....337	Department of Textile and Apparel
Cross-listed Course.....12	Department of Classical Studies 144	Management.....420
Culture, Identity and the Media .245	Department of Communication..150	Department of Theatre.....271
Curators, Administration and	Department of Communication	Department of Theatre Courses .273
Leadership.....489	Science and Disorders.....386	Depth of Study in A&S.....115
Curriculum.....12	Department of Computer	Design/Technical Theatre.....271
Curriculum Abbreviations.....17	Science.....341	Diagnostic Medical Ultrasound .375
Curriculum and Instruction	Department of Economics.....157	Diagnostic Medical Ultrasound
Courses.....308	Department of Electrical	Courses.....381
D	Engineering and Computer	Disability Services.....36
DARS Report.....12	Engineering.....349	Discipline.....12
Dean's Signature.....12	Department of English.....163	Distance Education Courses.....27
Degree.....12,14	Department of Fisheries and	Division of Animal Sciences.....66
Degrees, Majors (Degree Pro-	Wildlife Sciences.....92	Division of Biochemistry.....71
grams), Emphasis Areas,	Department of Forestry.....96	Division of Biological Sciences.134
Minors, and Certificates.....9	Department of General	Division of Food Systems and
Degrees and Degree Programs.....14	Agriculture.....77	Bioengineering.....62,73
Degrees Offered	Department of Geography.....172	Division of Plant Sciences.....81
College of Agriculture, Food	Department of Geological	Double Majors.....116
and Natural Resources.....47	Sciences.....174	Double Majors and Dual
College of Arts and Science.....111	Department of German and	Degrees.....130
College of Business.....271	Russian Studies.....180	Dual Credit and AP Advanced
College of Education.....293	Department of History.....186	Placement Credit.....21
College of Engineering.....321	Department of Human Develop-	Dual Degree.....12
College of Human Environmental	ment and Family Studies 402	Dual Degrees
Sciences.....396	Department of Industrial and	College of Arts and Science.....115
	Manufacturing Systems
