P. DOYLE

F. J. GREGORY

J. S. GRIFFITHS

A. J. HARTLEY

R. E. HOLDSWORTH

J. A. HOWE

P. T. LEAT

A. C. MORTON

N. S. ROBINS

J. P. TURNER

### **Special Publication reviewing procedures**

The Society makes every effort to ensure that the scientific and production quality of its books matches that of its journals. Since 1997, all book proposals have been refereed by specialist reviewers as well as by the Society's Books Editorial Committee. If the referees identify weaknesses in the proposal, these must be addressed before the proposal is accepted.

Once the book is accepted, the Society has a team of Book Editors (listed above) who ensure that the volume editors follow strict guidelines on refereeing and quality control. We insist that individual papers can only be accepted after satisfactory review by two independent referees. The questions on the review forms are similar to those for *Journal of the Geological Society*. The referees' forms and comments must be available to the Society's Book Editors on request.

Although many of the books result from meetings, the editors are expected to commission papers that were not presented at the meeting to ensure that the book provides a balanced coverage of the subject. Being accepted for presentation at the meeting does not guarantee inclusion in the book.

Geological Society Special Publications are included in the ISI Index of Scientific Book Contents, but they do not have an impact factor, the latter being applicable only to journals.

More information about submitting a proposal and producing a Special Publication can be found on the Society's web site: [www.geolsoc.org.uk](http://www.geolsoc.org.uk).

It is recommended that reference to all or part of this book should be made in one of the following ways:

MARTÍN-HERNÁNDEZ, F., LÜNEBURG, C. M., AUBOURG, C. & JACKSON, M. (eds) 2004. *Magnetic Fabric: Methods and Applications*. Geological Society, London, Special Publications, **238**.

POKORNÝ, J., SUZA, P. & HROUDA, F. 2004. Anisotropy of magnetic susceptibility of rocks measured in variable weak magnetic fields using the KLY-4S Kappabridge. *In*: MARTÍN-HERNÁNDEZ, F., LÜNEBURG, C. M., AUBOURG, C. & JACKSON, M. (eds) 2004. *Magnetic Fabric: Methods and Applications*. Geological Society, London, Special Publications, **238**, 69–76.

GEOLOGICAL SOCIETY SPECIAL PUBLICATION NO. 238

# THE GEOLOGICAL SOCIETY

The Geological Society of London (GSL) was founded in 1807. It is the oldest national geological society in the world and the largest in Europe. It was incorporated under Royal Charter in 1825 and is Registered Charity 210161.

The Society is the UK national learned and professional society for geology with a worldwide Fellowship (FGS) of 9000. The Society has the power to confer Chartered status on suitably qualified Fellows, and about 2000 of the Fellowship carry the title (CGeol). Chartered Geologists may also obtain the equivalent European title, European Geologist (EurGeol). One fifth of the Society's fellowship resides outside the UK. To find out more about the Society, log on to [www.geolsoc.org.uk](http://www.geolsoc.org.uk).

**The Geological Society Publishing House** (Bath, UK) produces the Society's international journals and books, and acts as European distributor for selected publications of the American Association of Petroleum Geologists (AAPG), the American Geological Institute (AGI), the Indonesian Petroleum Association (IPA), the Geological Society of America (GSA), the Society for Sedimentary Geology (SEPM) and the Geologists' Association (GA). Joint marketing agreements ensure that GSL Fellows may purchase these societies' publications at a discount. The Society's online bookshop (accessible from [www.geolsoc.org.uk](http://www.geolsoc.org.uk)) offers secure book purchasing with your credit or debit card.

To find out about joining the Society and benefiting from substantial discounts on publications of GSL and other societies worldwide, consult [www.geolsoc.org.uk](http://www.geolsoc.org.uk), or contact the Fellowship Department at: The Geological Society, Burlington House, Piccadilly, London W1J 0BG: Tel. +44 (0)20 7434 9944; Fax +44 (0)20 7439 8975; E-mail: [enquiries@geolsoc.org.uk](mailto:enquiries@geolsoc.org.uk).

For information about the Society's meetings, consult *Events* on [www.geolsoc.org.uk](http://www.geolsoc.org.uk). To find out more about the Society's Corporate Affiliates Scheme, write to [enquiries@geolsoc.org.uk](mailto:enquiries@geolsoc.org.uk).

# Contents

MARTÍN-HERNÁNDEZ, F., LÜNEBURG, C. M., AUBOURG, C. & JACKSON, M. Magnetic fabric: methods and applications – an introduction	1
<b>Magnetic fabric characterization methods and mineral sources</b>	
JEZEK, J. & HROUDA, F. Determination of the orientation of magnetic minerals from the anisotropy of magnetic susceptibility	9
POTTER, D. K. A comparison of anisotropy of magnetic remanence methods – a user's guide for application to palaeomagnetism and magnetic fabric studies	21
MUXWORTHY, A. R. & WILLIAMS, W. Distribution anisotropy: the influence of magnetic interactions on the anisotropy of magnetic remanence	37
HROUDA, F. Problems in interpreting AMS parameters in diamagnetic rocks	49
NAKAMURA, N. & BORRADAILE, G. J. Metamorphic control of magnetic susceptibility and magnetic fabrics: a 3-D projection	61
POKORNÝ, J., SUZA, P. & HROUDA, F. Anisotropy of magnetic susceptibility of rocks measured in variable weak magnetic fields using the KLY-4S Kappabridge	69
<b>Sedimentary fabrics</b>	
DEBACKER, T. N., ROBION, P. & SINTUBIN, M. The anisotropy of magnetic susceptibility (AMS) in low-grade, cleaved pelitic rocks: influence of cleavage/bedding angle and type and relative orientation of magnetic carriers	77
HIRT, A. M., LOWRIE, W., LÜNEBURG, C., LEBIT, H. & ENGELDER, T. Magnetic and mineral fabric development in the Ordovician Martinsburg Formation in the Central Appalachian Fold and Thrust Belt, Pennsylvania	109
LARRASOÑA, J. C., PUEYO, E. L. & PARÉS, J. M. An integrated AMS, structural, palaeo- and rock-magnetic study of the Eocene marine marls from the Jaca-Pamplona basin (Pyrenees, N Spain); new insights into the timing of magnetic fabric acquisition in weakly deformed mudrocks	127
MATASOVA, G. G. & KAZANSKY, A. YU. Magnetic properties and magnetic fabrics of Pleistocene loess/palaeosol deposits along west-central Siberian transect and their palaeoclimatic implications	145
ANDERSON, M. W. & MORRIS, A. The puzzle of axis-normal magnetic lineations in folded low-grade sediments (Bude Formation, SW England)	175
PARÉS, J. M. How deformed are weakly deformed mudrocks? Insights from magnetic anisotropy	191
<b>Igneous fabrics</b>	
CAÑÓN-TAPIA, E. Anisotropy of magnetic susceptibility of lava flows and dykes: a historical account	205
CAÑÓN-TAPIA, E. & CHÁVEZ-ÁLVAREZ, M. J. Theoretical aspects of particle movement in flowing magma: implications for the anisotropy of magnetic susceptibility of dykes	227
PETRONIS, M. S., HACKER, D. B., HOLM, D. K., GEISSMAN, J. W. & HARLAN, S. S. Magmatic flow paths and palaeomagnetism of the Miocene Stoddard Mountain laccolith, Iron Axis region, Southwestern Utah, USA	251
ARCHANJO, C. J. & LAUNEAU, P. Magma flow inferred from preferred orientations of plagioclase of the Rio Ceará-Mirim dyke swarm (NE Brazil) and its AMS significance	285

**Tectonic fabrics**

- BORRADAILE, G. J. & JACKSON, M. Anisotropy of magnetic susceptibility (AMS): magnetic petrofabrics of deformed rocks 299
- CHADIMA, M., HANSEN, A., HIRT, A. M., HROUDA, F. & SIEMES, H. Phyllosilicate preferred orientation as a control of magnetic fabric: evidence from neutron texture goniometry and low and high-field magnetic anisotropy (SE Rhenohercynian Zone of Bohemian Massif) 361
- GIL-IMAZ, A. & BARBERO, L. Anisotropy of magnetic susceptibility in the Montes de Toledo area (Hercynian Iberian Belt, Spain) and its petrostructural significance 381
- PUEYO, E. L., ROMÁN-BERDIEL, M. T., BOUCHEZ, J. L., CASAS, A. M. & LARRASOAÑA, J. C. Statistical significance of magnetic fabric data in studies of paramagnetic granites 395
- AUBOURG, C., KLOOTWIJK, C. & KORSCH, R. J. Magnetic fabric constraints on oroclinal bending of the Texas and Coff's Harbour blocks: New England Orogen, eastern Australia 421
- LÓPEZ DE LUCHI, M. G., RAPALINI, A. E., SIEGESMUND, S. & STEENKEN, A. Application of magnetic fabrics to the emplacement and tectonic history of Devonian granitoids in central Argentina 447

**Complex fabrics: superposition and alteration**

- KADZIAŁKO-HOFMOKL, M., MAZUR, S., WERNER, T. & KRUCZYK, J. Relationships between magnetic and structural fabrics revealed by Variscan basement rocks subjected to heterogeneous deformation—a case study from the Kłodzko Metamorphic Complex, Central Sudetes, Poland 475
- DE WALL, H. & WARR, L. N. Oblique magnetic fabric in siderite-bearing pelitic rocks of the Upper Carboniferous Culm Basin, SW England: an indicator for palaeo-fluid migration? 493
- JUST, J., KONTNY, A., DE WALL, H., HIRT, A. M. & MARTÍN-HERNÁNDEZ, F. Development of magnetic fabrics during hydrothermal alteration in the Soultz-sous-Forêts granite from the EPS-1 borehole, Upper Rhine Graben 509
- HAMILTON, T. D., BORRADAILE, G. J. & LAGROIX, F. Sub-fabric identification by standardization of AMS: an example of inferred neotectonic structures from Cyprus 527
