Brief 68-10052

NASA TECH BRIEF

NASA Tech Briefs are issued to summarize specific innovations derived from the U.S. space program, to encourage their commercial application. Copies are available to the public at 15 cents each from the Clearinghouse for Federal Scientific and Technical Information, Springfield, Virginia 22151.

Multichannel Wireway Adapter Box

An adapter box has been designed to provide continuous separation of different electrical leads at points where their runs must intersect. Thus, multichannel conduits of standard commercial design may be used in a manner that prevents crossing of wire leads carrying different currents where the runs intersect and change direction.

Notes:

1. The adapter box may be fabricated from any suitably stiff material, as 14 gage hot rolled sheet. As illustrated, the box is a cardboard mockup.

2. Inquiries concerning this innovation may be directed to:

Technology Utilization Officer
Manned Spacecraft Center
Houston, Texas 77058
Reference: B68-10052

Patent status:

No patent action is contemplated by NASA.

NASA TECH BRIEF

The NASA Tech Briefs program is a series of short, concise, and easy-to-read articles that provide a quick overview of the latest in NASA technology. The program is designed to be a valuable resource for anyone interested in the latest in space technology.

Stationary Wayway Adapter Box

The Stationary Wayway Adapter Box is a new device that allows for the connection of a stationary wayway to a stationary wayway. The device is designed to be used in a variety of applications, including the connection of a stationary wayway to a stationary wayway.
