Services and Ordering Information

About Our Services

The NASA Central Operation of Resources for Educators (CORE), established in cooperation with Lorain County Joint Vocational School, serves as the worldwide distribution center for NASA-produced educational materials. For a minimal charge, CORE will provide a valuable service to educators unable to visit one of the NASA Educator Resource Centers by making NASA educational audiovisual materials available through its mail order service.

Through CORE's distribution network, the public has access to more than 200 videocassette, slide, and CD-ROM programs, chronicling NASA's state-of-the-art research and technology. Through the use of these curriculum supplement materials, teachers can provide their students with the latest in aerospace information. NASA's educational materials on aeronautics and space provide a springboard for classroom discussion of life science, physical science, astronomy, energy, Earth resources, environment, mathematics, and career education.

Additional information about CORE can be obtained by calling the CORE office at (440) 774-1051, weekdays between 8:00 a.m. and 4:00 p.m. (Eastern Standard Time) or writing on school letterhead. We can also be reached through our web site at <http://spacelink.nasa.gov/CORE> or by e-mail to nasaco@leeca.esu.k12.oh.us.

How to Use This Catalog

Materials are divided by media type and subject. The videocassettes are classified by subject in the general topic section and by series title in the multiple-part series section. All multiple-part series are available by individual 30-minute programs or in complete condensed sets. For example, the 14-part series "Journey Through the Solar System" is available on 14 separate 30-minute videocassettes or as a complete series condensed onto four videocassettes. A considerable savings is made by purchasing the condensed series versus purchasing each videocassette individually. The prices of multiple-part series condensed sets are subject to change without notice as additional episodes are added to the series. Please note that condensed multiple series are only available in 1/2-inch VHS.

Preview Sites

NASA's Educator Resource Centers function as an information network serving educators nationwide. These centers are located at each of the NASA Field Centers, selected museums, and universities throughout the United States. Educators can preview audiovisual materials at these centers prior to placing orders through CORE. A listing of the NASA Educator Resource Centers is provided for your convenience at the back of this catalog.

No Return Policy

CORE regrets that it cannot accept the return of audiovisual materials unless they are defective or were shipped in error. CORE staff are available to answer questions about materials, prior to your purchase, to help you make an informed decision. Damaged or defective products must be returned to CORE within 21 days from the date of shipment.

Special Formats

Special orders for broadcast quality formats (Betacam, SVHS, Umatic) can be processed. Contact the NASA CORE office for pricing information.

How to Order

The materials listed in this catalog are distributed by the NASA Central Operation of Resources for Educators (CORE). Use the convenient order form at the back of this catalog and return to:

NASA CORE
Lorain County Joint Vocational School
15181 Route 58 South
Oberlin, OH 44074

E-mail: nasaco@leeca.esu.k12.oh.us
World Wide Web: <http://spacelink.nasa.gov/CORE>

Please help us fill your order promptly and accurately by providing the title, format, and item number for each selection. If paying cash, please submit payment with your order. Make checks payable to Lorain County JVS-NASA CORE. If you prefer to be billed, include an official purchase order with your request. VISA and MasterCard are also accepted. Prices and shipping charges are subject to change without notice. Special handling or additional shipping charges are to be paid by the user.

Delivery Time

Delivery for material is normally made in 4 weeks after receipt of your order. Expedited orders are available by paying additional charges and contacting the NASA CORE office.

International Orders

International orders are subject to additional shipping and customs charges. Please contact the NASA CORE office regarding these charges. Advance payment in U.S. currency is required on all international orders. Shipping charges must be included in the advance payment.

Special Note

Space technology changes at a rapid pace. The programs in this catalog were current and accurate at the time they were made; later events, however, may have caused some parts to become outdated. The information remains a part of the history of the space program and is available to interested viewers in its present form.

Revised March 1998

Videocassettes—General Topic

America's Wings

28 minutes/1976
Level: Grade 9-Adult

Format	Item No.	Price
1/2" VHS	001.0-01V	16.00

Discusses aerodynamics and airplane wing design. Presents commentaries from key research personnel whose contributions were historically significant in the development of the modern airplane wing: Igor Sikorsky, who invented the helicopter; James Osborne, whose small suggestion helped make jet transports flyable; Eastman Jacobs, whose wind tunnel work in the 1930's established the shape of airfoils; Adolph Busemann, who thought of the swept wing; Kelly Johnson, who designed 40 airplanes; and Richard Whitcomb, who conceived the idea for the supercritical wing, the "coke-bottle" fuselage, and the winglet.

Space Research & You: Your Health, Your Transportation

28 minutes/1981
Level: Grade 11-Adult

1/2" VHS	001.0-02V	16.00
----------	-----------	-------

Consists of two short programs. The first, "Space Research and Your Health," depicts a variety of medical advances made possible with the technology developed for the U.S. space programs. The second, "Space Research and Your Transportation," examines NASA research and its impact on land, sea, and space travel.

A Man's Reach Should Exceed His Grasp

23 minutes/1972
Level: Grade 4-9

1/2" VHS	001.0-03V	16.00
----------	-----------	-------

Presents the story of flight and our reach for new freedom through aviation and the exploration of space. From the Wright Brothers' flight at Kitty Hawk to the landing on the Moon and future missions to the planets, the tape depicts the fulfillment of the ancient dream of flight. Through the use of multiple images, the creative role of research is emphasized. Voices of scientists and statements by writers, poets, and philosophers document our search for knowledge. Narrated by Burgess Meredith.

Flying Machines

28 minutes/1978 (open captioned)
Level: Grade 9-Adult

1/2" VHS	001.0-04V	16.00
----------	-----------	-------

Flying Machines

28 minutes/1978
Level: Grade 9-Adult

1/2" VHS	001.0-05V	16.00
----------	-----------	-------

Examines aviation as it exists today and the technological advances that will impact aviation in the future. The tape briefly describes wind tunnels, power plants, safety, comfort, economy, and noise abatement. NASA aeronautical research has answered some tough questions and is looking forward to solving current problems innovatively.

Opening New Frontiers: The Orbital Flight Tests of the Space Transportation System

28 minutes/1982
Level: Grade 4-10

1/2" VHS	001.0-06V	16.00
----------	-----------	-------

Covers the first four test missions of the Space Shuttle *Columbia*, STS flights 1, 2, 3, and 4. Also includes events leading up to the first launch, President Reagan's speech after the fourth landing, and highlights of the Orbital Flight Test Program.

	Format	Item No.	Price
Sentinels in Space: The Environmental Satellites 29 minutes/1987 Level: Grade 9-12	1/2" VHS	002.2-07V	16.00

Produced by the National Oceanic and Atmospheric Administration (NOAA), this program explains how satellites monitor Earth conditions.

Earth Symphony 29 minutes/1987 Level: Grade 11-Adult	1/2" VHS	002.2-08V	16.00
---	----------	-----------	--------------

Displays (first half of program) pictures of aerial photography taken from the Landsat satellite set to the music of Vivaldi, "The Four Seasons." Also has the theme (second segment) of "Space—A New Place To Work," featuring footage from various Shuttle flights also presented with a musical background.

Portrait of Earth: The Story of Satellites 30 minutes/1981 (captioned at the 2nd grade level) Level: Grade 4-8	1/2" VHS	002.2-09V	16.00
--	----------	-----------	--------------

Portrait of Earth: The Story of Satellites 30 minutes/1981 (captioned at the 3rd grade level) Level: Grade 4-8	1/2" VHS	002.2-10V	16.00
--	----------	-----------	--------------

Portrait of Earth: The Story of Satellites 30 minutes/1981 (captioned at the 4th grade level) Level: Grade 4-8	1/2" VHS	002.2-11V	16.00
--	----------	-----------	--------------

Explains what satellites are and how they perform their daily tasks in orbit around our planet. In the fields of communications, meteorology, and Earth resources, they provide domestic and worldwide communications and early warning of hurricanes and forest fires. Satellites also monitor pollution, marine resources, oceanography, land use, and agriculture.

Landsat: 15 Years of Learning 8 minutes/1987 Level: Grade 9-Adult	1/2" VHS	002.2-12V	10.00
--	----------	-----------	--------------

Offers a brief look at the history of the Landsat satellite and how it helps scientists study Earth's environment.

TOPEX/POSEIDON: A Mission to Planet Earth 9 minutes/1992 Level: Grade 9-Adult	1/2" VHS	002.2-13V	10.00
--	----------	-----------	--------------

Explains the objectives of the joint U.S./French mission dedicated to the study of the circulation of Earth's oceans. This satellite will vastly improve our understanding of the ocean's role in global climate change and lay the foundation for long-term ocean monitoring from space.

	Format	Item No.	Price
Liftoff to Learning: The Atmosphere Below 16 minutes/1992 Level: Grade 5-12	1/2" VHS	002.2-14V	15.00

Shows that changes in Earth's atmosphere are investigated from outer space on board the Shuttle using the Atmospheric Laboratory for Applications and Science (ATLAS 1). Space Shuttle astronauts explain the questions scientists hope can be answered by studying Earth's atmosphere from space. Experiments discussed in this videotape focus on infrared detection of atmospheric remnants from volcanic eruptions, ozone concentration levels, and incoming solar ultraviolet radiation with respect to global warming, among others.

Blue Planet 42 minutes/1990 Level: Grade 4-Adult	1/2" VHS	002.2-15V	30.00
---	----------	-----------	--------------

Filmed by astronauts from five Space Shuttle missions with the IMAX camera, dramatically reveals the forces affecting Earth's fragile ecological balance: volcanoes, hurricanes, earthquakes, and, ultimately, humankind. Copyrighted by the Smithsonian Institution/Lockheed Corporation. For noncommercial private use only. Available in 1/2" VHS format only.

Glacier Bay, Alaska From the Ground, Air and Space 13 minutes/1996 Level: Grade 7-12	1/2" VHS	002.2-16V	15.00
---	----------	-----------	--------------

Demonstrates how satellite data can be used to measure glacier changes from space. Also explains how remote sensing can extend the records of historical ground-based measurements to the present. Examines how ground and satellite measurements can be integrated to yield information that may be used in the analysis of regional climate.

The GLOBE Program 10 minutes/1996 Level: Teachers	1/2" VHS	002.2-17V	10.00
--	----------	-----------	--------------

Presents a short overview of the Global Learning and Observations to Benefit the Environment (GLOBE) program. The GLOBE program is a hands-on international environmental science and education program that links students, teachers, and the scientific research community to learn more about our environment through student data collection and observation. Intended to provide general information for teachers about the objectives and logistics of GLOBE. For more information, visit the GLOBE Home Page at <http://www.globe.gov>.

Sun Splash Ozone Video 8 minutes/1997 Level: Grades 9-12	1/2" VHS	002.2-18V	10.00
---	----------	-----------	--------------

Uses computer graphics and animation to illustrate ozone depletion, explains how ozone in the stratosphere protects us from ultraviolet radiation, and demonstrates how chlorofluorocarbons (CFC's) cause destruction of Earth's protective ozone layer.

	Format	Item No.	Price
Hurricane Below 15 minutes/1974 Level: Grade 7-10	1/2" VHS	002.3-01V	15.00

Presents the plight of a commercial fishing vessel caught in the path of a killer hurricane. Dramatically depicts the birth of Hurricane Mimi off the coast of Africa and traces its growth and development as it brings destruction to the Central Atlantic States. These events are powerfully portrayed against the successful efforts of the crew of the dragger *Dante* to escape by navigating around the center of the storm with the aid of modern technology, ship-to-shore communications, and early-warning weather satellites monitoring the "hurricane below."

The Weather Watchers 15 minutes/1977 Level: Grade 7-11	1/2" VHS	002.3-02V	15.00
---	----------	-----------	--------------

Dramatically explains the importance of meteorological information obtained from NASA satellites for predicting and monitoring severe storms. Presents unusual footage of the formation of a tornado and its destructive force.

Tornado Below 14 minutes/1975 Level: Grade 7-10	1/2" VHS	002.3-03V	15.00
--	----------	-----------	--------------

Presents the story of a student pilot's narrow escape from the path of a tornado. This program details the formation of tornadoes, their destructive capabilities, and the important role early-warning weather satellites play in predicting severe weather.

	Format	Item No.	Price
Hubble Space Telescope Lecture 53 minutes/1988 Level: Adult	1/2" VHS	002.4-01V	21.00

Provides a videotape lecture on the Hubble Space Telescope that was developed for a teacher education course presented at U.S. Space Camp. The featured lecturer is Dr. Frank Six of NASA's Marshall Space Flight Center. He discusses the Space Telescope's capability for superior spectral coverage, sensitivity, resolution, and stability, while demonstrating practical ways to explain these concepts to students.

The Hubble Space Telescope 28 minutes/1989 Level: Grade 9-Adult	1/2" VHS	002.4-02V	16.00
--	----------	-----------	--------------

Offers an imaginative and entertaining look at how the Hubble Space Telescope will examine some of the mysteries of our universe, including: stellar evolution, expansion of the universe, supernovae, and quasars. This program combines animation, NASA footage, and interviews with NASA scientists to inform the audience about potential Space Telescope discoveries.

The Cosmic Background Explorer 13 minutes/1989 Level: Grade 9-Adult	1/2" VHS	002.4-03V	15.00
--	----------	-----------	--------------

Provides a brief overview of the mission that will launch the Cosmic Background Explorer (COBE), a unique satellite that will study cosmic background radiation. The mission's purpose is to discover how the once-smooth universe evolved into the planets, stars, and galaxies that exist today. The COBE mission will be used to gather evidence to prove or disprove the current theory of cosmic evolution. Includes animation depicting the satellite's deployment and orbit.

NASA'S Hubble Space Telescope: The Challenge & Complexity of Operations 18 minutes/1990 Level: Grade 11-Adult	1/2" VHS	002.4-04V	15.00
--	----------	-----------	--------------

Details how NASA uses scientists, researchers, and engineers throughout the world to meet the challenge of monitoring and maintaining the Hubble Space Telescope. Touches on procedures for sending commands to the telescope, archiving and distributing data, and scheduling observation time. Also includes a segment on some of the complex steps that were taken to deploy the telescope.

And Then There Was Voyager 30 minutes/1990 Level: Grade 11-Adult	1/2" VHS	002.4-05V	16.00
---	----------	-----------	--------------

Uses interviews with NASA scientists and computer graphics to highlight the major discoveries the Voyager spacecraft made about Jupiter, Saturn, Uranus, Neptune, and their satellites. Chronicles the Voyager missions using actual network newscasts.

	Format	Item No.	Price
Hubble Space Telescope: Rescue in Space 50 minutes/1994 Level: Grade 4-Adult	1/2" VHS	002.4-06V	25.00

Offers a journey into space on one of the most important and spectacular Space Shuttle missions ever with the astronauts on this critical mission to repair the Hubble Space Telescope. See the first dramatically improved deep space images from Hubble's newly repaired cameras. Produced by Finley-Holiday Films Corporation. Available in 1/2" VHS format only.

Hubble Video Tour of the Universe 8 minutes/1996	1/2" VHS	002.4-07V	10.00
--	----------	-----------	--------------

Provides a "video tour" of images and discoveries made possible by the Hubble Space Telescope. Progresses from near Earth with the first servicing mission through images of planets, the life cycle of stars, black holes, and distant galaxies. Animation and video sequences depict processes and changes occurring in the universe, such as the impact of a comet, Saturn at ring plane crossing, and the birth and death of a star. Although this video has no narration or sound, it is accompanied by a written script.

	Format	Item No.	Price
Animal Physiology in Space: Frog Embryology Experiment			
11 minutes/1994	1/2" VHS	003.1-01V	15.00
Level: Grade 9-12			

Provides an overview of the frog embryology experiment that flew on the STS-47 Spacelab-J mission.

Liftoff to Learning: From Undersea to Outer Space			
15 minutes/1994	1/2" VHS	003.1-02V	15.00
Level: Grade 5-9			

Tells the story of a life sciences experiment conducted on the first Spacelab Life Sciences mission flown on the Space Shuttle. More than 2,000 jellyfish were sent in space to learn about how living things adapt to the microgravity environment of Earth orbit. Scientists examined how microgravity affects the development of young jellyfish, especially their gravity receptors. The gravity receptors of jellyfish serve a purpose similar to the inner ear of human beings for balance and orientation.

Liftoff to Learning: Assignment Spacelab			
17 minutes/1995	1/2" VHS	003.1-03V	15.00
Level: Grade 5-8			

Shows how the unique microgravity environment of Earth orbit is used for scientific experiments and how the rules of scientific experimentation and safety that apply to research on Earth also apply to astronauts in space. On-orbit scenes were taken during the STS-58 mission of *Columbia*.

The Origin and Early Evolution of Life			
21 minutes/1995	1/2" VHS	003.1-04V	16.00
Level: Undergraduate & Graduate Students			

Explores Earth's early stages of existence and the theories proposed to explain the evolution of life on Earth.

SETI: The Search for Extraterrestrial Intelligence			
21 minutes/1996	1/2" VHS	003.1-05V	16.00
Level: Undergraduate & Graduate Students			

Examines how present-day technology is used to seek evidence of intelligent life elsewhere in the universe.

The Cardiovascular System in Space			
18 minutes/1994	1/2" VHS	003.1-06V	16.00
Level: Undergraduate & Graduate Students			

Provides a detailed account of the effects of gravity on the human circulatory system. Discusses how the loss of gravity-induced blood pressure gradients leads to medical problems associated with headward edema, reduced blood volume, and postflight orthostatic intolerance.

	Format	Item No.	Price
Reaching for the Stars (5-Part Videoconference Series)			
150 minutes/1993	1/2" VHS	004.0-10V	32.00
Level: Grade 6-12			

Features five young minority and female students discussing their research and academic preparation in science, math, and engineering. Encourages middle and high school students to consider careers in these fields and to prepare themselves academically to take advantage of future workforce opportunities. Includes a teacher's guide and printed support materials. Sponsored by the Virginia Space Grant Consortium, Old Dominion University, Academic Television Services, and NASA. For national distribution only.

	Format	Item No.	Price
Those Magnificent Wind Machines 30 minutes/1980 Level: Grade 7-10	1/2" VHS	005.2-01V	16.00

Traces the evolution of the NASA wind program from the first wind turbine at Sandusky, Ohio, to Block Island, Rhode Island, where NASA and the local power company demonstrated that wind turbines could provide power to an electrical system. The program concludes with a look at the largest, most powerful wind turbine ever built, located in Washington State.

	Format	Item No.	Price
Shuttle Life in the World of Weightlessness 29 minutes/1985 (open captioned) Level: Grade 4-12	1/2" VHS	006.3-01V	16.00
Shuttle Life in the World of Weightlessness 29 minutes/1985 Level: Grade 4-12	1/2" VHS	006.3-02V	16.00

Presents Dr. Sally Ride showing the problems and opportunities that orbiting the Earth aboard the Space Shuttle posed for daily living.

Eating and Sleeping in Space 30 minutes/1985 (open captioned) Level: Grade 4-12	1/2" VHS	006.3-03V	16.00
Eating and Sleeping in Space 30 minutes/1985 Level: Grade 4-12	1/2" VHS	006.3-04V	16.00

Presents Dr. Sally Ride discussing how astronauts eat and sleep aboard the Space Shuttle.

Astrosmiles 24 minutes/1986 Level: Grade 7-Adult	1/2" VHS	006.3-05V	16.00
---	----------	-----------	--------------

Contains footage from postflight press conferences of several missions showing life aboard the Shuttle, including daily living activities and scientific experiments. This video is educational and entertaining.

Toys in Space 17 minutes/1985 Level: Grade 4-8	1/2" VHS	006.3-06V	15.00
---	----------	-----------	--------------

Shows elementary students hypothesizing about how selected toys will perform in the weightless conditions of space. Classroom discussion is followed by footage of astronauts demonstrating these toys during a 1985 Space Shuttle flight. Four toys are highlighted: top, ball and jacks, slinky, and yo-yo.

Toys in Space: Mission 51-D Highlights 60 minutes/1985 Level: Grade 4-Adult	1/2" VHS	006.3-07V	21.00
--	----------	-----------	--------------

Offers 10 mini-segments during which astronauts give detailed explanations of how toys operated in the micro-gravity environment of the Space Shuttle. Demonstrations are followed by excerpts from the STS 51-D postflight press conference.

Toys in Space Activity Kit 10-piece set		006.3-07P	30.00
---	--	-----------	--------------

Contains the 10 toys Shuttle astronauts carried with them on STS 51-D. Designed to be used with the "Toys in Space" videotape programs.

	Format	Item No.	Price
The NASA Space Suit 15 minutes/1990 Level: Grade 7-Adult	1/2" VHS	006.3-08V	15.00

Examines the evolution and design of the NASA spacesuit from a 1930's pressure suit used by aviator Wiley Post to the current extravehicular maneuvering unit used on the Space Shuttle.

Suited for Space Videoconference 60 minutes/1991 Level: Grade 5-8	1/2" VHS	006.3-09V	24.00
--	----------	-----------	--------------

Shows an interactive Challenger Center videoconference on January 25, 1991. Features David Zahren, Challenger Center faculty member, demonstrating activities that illustrate the harshness of outer space. Astronaut Dr. Kathryn Sullivan explains the Shuttle space suit and extravehicular mobility unit. Students from around the United States called in to ask astronaut Colonel Frederick Gregory questions about living and working in space. Includes an activity book that contains directions for many of the activities demonstrated on the tape. Reproduced with permission from the Challenger Center. The tape and activity booklet may be reproduced for educational use only.

Launching the School Year With President Bush 60 minutes/1991 Level: Grade 3-6	1/2" VHS	006.3-10V	21.00
---	----------	-----------	--------------

Presents President George Bush and NASA Administrator Richard Truly teaching a unique math and science lesson aimed at elementary-level students. Third and fourth graders from Washington, D.C., and La Porte, Texas, ask the President questions and learn about living and working in space. Participants include astronauts Charlie Bolden and Tammy Jernigan and Spacemobile teacher Lisa McLeod. This program was broadcast live on September 17, 1991.

Liftoff to Learning: All Systems Go 34 minutes/1992 Level: Grade 5-12	1/2" VHS	006.3-11V	16.00
--	----------	-----------	--------------

Presents the astronauts on orbit during the first Spacelab Life Sciences mission discussing some of the physiological changes that occur in the human body while in a microgravity environment and attempts to answer important questions on how the body readapts to Earth's environment. The videotape shows research conducted aboard the Space Shuttle on six systems that examine the heart, lungs, blood, muscles, cells, and the immune system, among others. This program is segmented, enabling teachers to extract topics that are most relevant to current classroom studies.

Physics of Toys in Space 51 minutes/1993 Level: Grade K-12	1/2" VHS	006.3-12V	21.00
---	----------	-----------	--------------

Presents the astronauts on board Space Shuttle mission STS-54 using the laws of physics to demonstrate how toys perform in microgravity. The astronauts answer questions from four elementary schools while performing experiments. The featured toys include: swimming fish, frog, and submarine; balloon helicopter; gyroscope and gravitron; friction-engine car and circular track; magnetic marbles; Rat Stuff, the flipping mouse; basketball and hoop; and paper boomerang. Includes a *Video Resource Guide*.

	Format	Item No.	Price
Toys in Space II Activity Kit 7-piece set		006.3-12P	25.00

Contains seven of the toys Shuttle astronauts carried with them on mission STS-54. Designed to be used with the Physics of "Toys in Space" and "Toys In Space II" videotape programs. Contains the following toys: car and track, basketball with hoop, magnetic marbles, swimming toy, gravitron, flipping toy, and balloon helicopter.

Living and Working in Space: The Countdown Has Begun 60 minutes/1993 Level: Grade 4-Adult	1/2" VHS	006.3-13V	30.00
--	----------	-----------	--------------

Offers imaginative segments examining day-to-day activities that might occur in outer space sometime in the future. Includes dozens of interviews with today's space professionals. Includes a teacher's guide. Copyrighted by FASE Productions. Available in 1/2" VHS only.

Liftoff to Learning: Toys in Space II 37 minutes/1993 Level: Grade K-12	1/2" VHS	006.3-14V	16.00
--	----------	-----------	--------------

Provides a hands-on way for students to investigate the principles of mathematics and science that make many common toys function. The Space Shuttle crew invite students to experiment with similar toys in their classroom and hypothesize how these same toys will operate in microgravity. Scenes of the STS-54 astronauts operating the toys in space serve as data for students to confirm or reject their hypotheses. Includes a comprehensive guide.

Liftoff to Learning: Living in Space 10 minutes/1994 Level: Grade K-4	1/2" VHS	006.3-15V	10.00
--	----------	-----------	--------------

Demonstrates what it is like to live and work in space. Viewers are invited by the Space Shuttle crew to join the astronauts as they go through their daily routine living on board the Space Shuttle. Students see the similarities and differences in eating, exercising, relaxing, maintaining personal hygiene, sleeping, and working in space versus on Earth. Orbital scenes were taken during the STS-56 mission.

U.S. Microgravity Laboratory 2 Pre-flight Education Videotape 42 minutes/1995 Level: Grade K-4	1/2" VHS	006.3-16V	21.00
---	----------	-----------	--------------

Contains the ground-based experiments done by the astronaut crew aboard mission STS-73. The program is designed to show teachers and students hands-on experiments that can help them learn about microgravity research. A follow-up videotape after the September 1995 mission will show astronauts conducting many of the experiments in space. Includes *Microgravity Teacher's Guide With Activities for Physical Science* booklet.

Space: Home Away From Home 30 minutes/1996 Level: Grade 7-Adult	1/2" VHS	006.3-17V	16.00
--	----------	-----------	--------------

Explores the astronomical highway that is leading to living and working in space. Pioneer and former U.S. astronaut Jack Lousma tells the true and fascinating story of the Skylab adventure. Copyrighted by Glatz Film & Video, Inc. Available in 1/2" VHS only.

	Format	Item No.	Price
A New Era of Discovery: Plans for Research on the Space Station			
60 minutes/1994	1/2" VHS	006.4-05V	21.00

Highlights the first live videoconference, held on February 17, 1994, by the NASA Space Station program. Provides an overview of the plans, opportunities, and benefits of space-based research. Explains how the Space Station will provide a laboratory for research in life sciences, materials, fluid physics, combustion, and biotechnology research and technology development.

International Space Station Overview			
11 minutes/1997 Level: Grade 7-12	1/2" VHS	006.4-06V	10.00

Presents an overview of the International Space Station (ISS). Discusses how research conducted on board the ISS will have many benefits for humankind. Outlines the roles cooperating nations will play in the construction and maintenance of the ISS. Also discusses station design and orbit.

Go for Assembly: Building the International Space Station			
11 minutes/1997 Level: Grade 7-12	1/2" VHS	006.4-07V	10.00

Chronicles the logistics of building an orbiting laboratory in space. Contains interviews with many of the astronauts who will be assembling the International Space Station. Discusses new spacesuit and tool enhancements, the robotic arm and hand, neutral buoyancy training facilities at the Johnson Space Center, and the Crew Equipment Translation Assembly Cart, which will help astronauts slide along the truss structure during station assembly.

	Format	Item No.	Price
NASA . . . The 25th Year 50 minutes/1983 Level: Grade 9-Adult	1/2" VHS	007.0-01V	21.00

Chronicles, from Explorer I to the Space Shuttle, the numerous challenges and accomplishments that have marked a quarter century of air and space exploration.

Mercury/Gemini/Apollo Overview 13 minutes/1987 Level: Grade 7-Adult	1/2" VHS	007.0-02V	15.00
--	----------	-----------	--------------

Provides a concise summary of the Mercury, Gemini, and Apollo missions, including mission-by-mission accomplishments and historic footage of launches, on-orbit activities, and splashdowns.

History of Spaceflight 58 minutes/1992 Level: Grade 9-Adult	1/2" VHS	007.0-03V	25.00
--	----------	-----------	--------------

Uses a combination of rare paintings, historical footage, and the latest computer animation to trace the development of spaceflight. Shows how the vision and insight of rocket pioneer Wernher von Braun laid out the first serious blueprint for space, which led to the reality of manned spaceflight and provided much of the impetus for today's space programs. Hosted by astronaut Alan Shepard. Copyrighted by Finley-Holiday Films. Available in 1/2" VHS only.

Astronauts . . . U.S. Project Mercury 28 minutes/1960 Level: Grade 7-12	1/2" VHS	007.1-01V	16.00
--	----------	-----------	--------------

Presents the story of the seven original U.S. astronauts. Explains their selection, testing, and training for America's first manned space program.

The Flight of Apollo 11 (The Eagle Has Landed) 30 minutes/1969 Level: Grade 7-12	1/2" VHS	007.3-01V	16.00
---	----------	-----------	--------------

Presents the story of the first Moon landing in July 1969. Depicts the principal events of the mission, from the launching through the postrecovery activities of astronauts Armstrong, Aldrin, and Collins. Through television, motion pictures, and still photography, the program provides an "eyewitness" perspective of the Apollo 11 mission.

	Format	Item No.	Price
The Time of Apollo 28 minutes/1975 Level: Grade 4-Adult	1/2" VHS	007.3-02V	16.00

Offers a tribute to the historical accomplishments of the Apollo missions. As President Kennedy stated in 1961: "This nation should commit itself to achieving the goal, before this decade is out, of landing a man on the Moon and returning him safely to Earth."

On the Shoulders of Giants 28 minutes/1973 Level: Grade 7-Adult	1/2" VHS	007.3-03V	16.00
--	----------	-----------	--------------

Tells the story of Apollo 17, the final mission to the Moon. Includes an abundance of excellent footage of astronauts Cernan and Schmitt using the lunar rover, collecting more than 250 pounds of lunar rocks, and setting up experiments on the lunar surface.

Apollo 13—Houston We've Got a Problem 28 minutes/1970 Level: Grade 7-Adult	1/2" VHS	007.3-04V	16.00
---	----------	-----------	--------------

Depicts the dramatic voyage of Apollo 13, in which the most serious accident ever to occur in space changed the mission from a routine lunar landing to a desperate fight for crew survival. The film ends with worldwide relief and joy when astronauts James Lovell, John Swigert, and Fred Haise splash down on target in the Pacific Ocean.

Shuttle: A Remarkable Flying Machine 30 minutes/1981 Level: Grade 4-Adult	1/2" VHS	007.6-10V	16.00
--	----------	-----------	--------------

Features the first historic flight of the Space Shuttle *Columbia*. Highlights include the liftoff on April 12, 1981, the onboard activities of Young and Crippen, and a spectacular landing on Rogers Dry Lake bed in California.

We Deliver: Summary of Shuttle Flights 5, 6, 7 & 8 30 minutes/1983 Level: Grade 4-Adult	1/2" VHS	007.6-11V	16.00
--	----------	-----------	--------------

Covers the first four operational missions of the Space Transportation System, STS flights 5, 6, 7, and 8. It stresses the operational common denominator of these missions—satellite deployment—and includes significant secondary achievements, such as the first female astronaut, the first African-American astronaut, the first night launch and landing, and some of the more important onboard experiments.

Space Shuttle Demonstration 15 minutes/1983 (signed for the hearing impaired)	1/2" VHS	007.6-12V	15.00
--	----------	-----------	--------------

Prepared by the Kennedy Space Center, explains the Space Shuttle to hearing-impaired adults.

	Format	Item No.	Price
Mission STS-26: The Crew Report			
18 minutes/1988	1/2" VHS	007.6-13V	15.00
Level: Grade 5-Adult			

Provides an overview of the September 29, 1988, mission of *Discovery*, the first Space Shuttle mission after the *Challenger* accident. Narrated by mission astronauts, this program highlights the deployment of a communications satellite and the science experiments performed on board. It contains beautiful views of the Earth and an amusing look at Shuttle life set to popular music.

Return to Space			
15 minutes/1988	1/2" VHS	007.6-17V	15.00
Level: Grade 7-Adult			

Tells the story of how STS-26 returned America to space after the *Challenger* disaster. The program details the improvements made to the Space Shuttle and summarizes some of the major accomplishments of past Shuttle flights.

The Space Shuttle: America's Team Reaching for the Future			
24 minutes/1989	1/2" VHS	007.6-19V	16.00
Level: Grade 11-Adult			

Outlines how the NASA centers located throughout the United States contribute to the building of the Space Shuttle. It details the specific functions performed by each NASA facility.

The Dream Is Alive			
37 minutes/1985	1/2" VHS	007.6-22V	30.00
Level: Grade 4-Adult			

Narrated by Walter Cronkite, gives you a window seat on the Shuttle. The viewer can share the astronauts' experiences of working, eating, and sleeping in zero gravity and can look back at our magnificent Earth and witness an exciting satellite repair. Copyrighted by the Smithsonian Institution/Lockheed Corporation. Available in 1/2" VHS format only.

Liftoff! An Astronaut's Journey			
50 minutes/1990	1/2" VHS	007.6-23V	16.00
Level: Grade 7-Adult			

From astronaut training through the heart-pounding moments of rescuing a 12-ton satellite from low-Earth orbit, to landing the heaviest Shuttle ever, offers the key moments of Space Shuttle mission STS-32. With exclusive interviews and NASA footage, you will discover what really goes into being one of America's astronauts. Copyrighted by Space Media Network and Cimarron Productions, Inc. Available in 1/2" VHS format only.

Spacelab Life Sciences Missions 1 & 2			
8 minutes/1990	1/2" VHS	007.6-24V	10.00
Level: Grade 9-Adult			

Describes the Spacelab Life Sciences Shuttle missions dedicated to the study of immediate and long-term changes that occur in the human body during weightlessness. It outlines many of the experiments to be performed.

	Format	Item No.	Price
Liftoff to Learning: Space Basics 21 minutes/1991 Level: Grade 5-8	1/2" VHS	007.6-25V	16.00

Shows astronauts aboard Shuttle mission STS-41 using computer graphics and visual demonstration to answer four basic questions about spaceflight: How do spacecraft travel into space? How do spacecraft remain in orbit? Why do astronauts float in space? How do spacecraft return to Earth? Viewers learn how English scientist Isaac Newton formulated the basic science behind Earth's orbit more than 300 years ago. Includes a teacher resource guide.

Liftoff to Learning: Go for EVA 14 minutes/1991 Level: Grade K-8	1/2" VHS	007.6-26V	15.00
---	----------	-----------	--------------

Presents astronauts aboard *Atlantis* mission STS-37 discussing the reasons for wearing spacesuits during spacewalking missions, how spacesuits work, and what kinds of jobs astronauts perform while spacewalking. Actual footage of spacewalks—also known as extravehicular activities (EVA's)—illustrate how spacesuits allow astronauts to operate scientific apparatus, assemble equipment and structures, pilot the Manned Maneuvering Unit, take pictures, and service satellites and space hardware. Includes a teacher resource guide.

Liftoff to Learning: Newton in Space 13 minutes/1992 Level: Grade 5-8	1/2" VHS	007.6-27V	15.00
--	----------	-----------	--------------

Shows astronauts on orbit during Mission STS-39 demonstrating the importance of Newton's laws of motion to spaceflight. The program explains the difference between weight and mass, the basic principles of balanced and unbalanced forces, action and opposite reactions, and how the three laws of motions affect the way a rocket operates. Using the microgravity environment of Earth's orbit, Space Shuttle astronauts conduct simple force and motion demonstrations in ways not possible on Earth. Includes a teacher resource guide.

	Format	Item No.	Price
To Dream . . . To Learn 29 minutes/1985 (open captioned) Level: Grade 4-Adult	1/2" VHS	008.0-01V	16.00
To Dream . . . To Learn 29 minutes/1985 Level: Grade 4-Adult	1/2" VHS	008.0-02V	16.00

Documents two Ohio public schools that outfitted school buses as Space Shuttles (first segment of program). The school bus "ground shuttles" were sent on "missions" during which students learned much about space travel. Shows Shuttle astronauts demonstrating toys during Space Shuttle mission 51-D (second half of program). Students were asked to speculate as to how the toys would react in the weightless environment of space. Includes a video lesson guide.

1982 Aeronautics & Space Highlights 15 minutes/1982 Level: Grade 10-Adult	1/2" VHS	008.0-04V	15.00
--	----------	-----------	-------

Highlights the U.S. aeronautics and space efforts of 1982, including three missions of Space Shuttle *Columbia*, a new Landsat satellite, and the ADI scissor wing aircraft.

Marshall Space Flight Center: The First 25 Years 29 minutes/1986 Level: Grade 9-12	1/2" VHS	008.0-05V	16.00
---	----------	-----------	-------

Reviews several aerospace milestones of the last quarter century and their contributions to daily life.

Science Operations in Space: Lessons Learned 32 minutes/1988 Level: Adult	1/2" VHS	008.0-06V	16.00
--	----------	-----------	-------

Demonstrates how experiments can be more effectively designed to operate optimally aboard the Space Shuttle. Includes remarkable footage of the Remote Manipulator System and an extravehicular activity. Conceived by a group of veteran astronauts.

Seeing Beyond the Obvious: Understanding Perceptions in Everyday & Novel Environments 46 minutes/1990 Level: Adult	1/2" VHS	008.0-07V	21.00
---	----------	-----------	-------

Motivates student interest in basic issues of visual perception by showing how the development of current visual display technology has effected aerospace applications. Includes an instructor's guide.

Liftoff to Learning: Voyage of Endeavour—Then & Now 20 minutes/1992 Level: Grade 5-12	1/2" VHS	008.0-08V	16.00
--	----------	-----------	-------

Captures the excitement of the maiden flight of NASA's Space Shuttle *Endeavour* and contrasts it with its namesake, the 17th century research sailing vessel commanded by James Cook. Students will experience *Endeavour's* historic rescue of the stranded INTELSAT VI satellite and the first three-person extravehicular activity. Cook's voyage provides an apt parallel: charting unexplored land and waters in the South Pacific, New Zealand, and Australia and using scientists and artists to collect data on plants, wildlife, and native peoples. Orbital scenes were taken during the STS-49 mission in May 1992. Includes a teacher's resource guide.

Format	Item No.	Price
Liftoff to Learning: Geography From Space	008.0-09V	15.00
15 minutes/1997	1/2" VHS	
Level: Grade K-8		
Application: Earth and Space Science, Life Science in Personal and Social Perspectives		

Takes the viewer on a rapid tour of Earth's surface as seen from outer space. After explaining how the altitude of the viewer affects the amount of Earth's surfaces seen at one time, the video moves into a travelogue on some of the interesting features of Earth's continents as seen from space. Because the inclination of the Space Shuttle's orbit to Earth's equator did not carry the crew over Antarctica or the Arctic, these regions are not visited in the program.

	Format	Item No.	Price
Visions of Other Worlds 29 minutes/1984 Level: Grade 10-12	1/2" VHS	009.0-01V	16.00

Explores the work of 27 leading science fiction/science fact artists, including former astronaut Alan Bean and the first artist to travel in space.

	Format	Item No.	Price
Images of Earth and Space: The Role of Visualization in NASA Science 18 minutes/1996 Level: Grade 7-12	1/2" VHS	010.0-01V	15.00

Demonstrates how observations and supercomputer models are used as tools in studying the Earth and space sciences. Explains how researchers turn billions of bytes of data into colorful scientific visualizations. These pictorial representations are helping NASA and the scientists the Agency supports gain unprecedented insights into natural and physical phenomena.

Comet Halley Returns 29 minutes/1986 Level: Grade 11-Adult	1/2" VHS	010.1-01V	16.00
---	----------	-----------	--------------

Details Comet Halley's 1985-1986 rendezvous with the Earth and the Sun. Dr. Robert D. Chapman is interviewed at NASA's Lewis Research Center about Comet Halley's next visit to the vicinity of the Earth and the Sun.

Partnership Into Space: Mission Helios 28 minutes/1975 Level: Grade 7-10	1/2" VHS	010.1-02V	16.00
---	----------	-----------	--------------

Follows the development and launch of Helios, which orbited the Sun closer than any human-made object to date. With a montage of artwork depicting our fascination with the Sun, the tape discusses the present-day technological efforts to grasp the significance and influence of the Sun on our planet.

Universe 30 minutes/1976 Level: Grade 7-11	1/2" VHS	010.1-04V	16.00
---	----------	-----------	--------------

Universe 30 minutes/1976 (captioned at the 2nd grade level) Level: Grade 7-11	1/2" VHS	010.1-05V	16.00
---	----------	-----------	--------------

Universe 30 minutes/1976 (captioned at the 3rd grade level) Level: Grade 7-11	1/2" VHS	010.1-06V	16.00
---	----------	-----------	--------------

Universe 30 minutes/1976 (captioned at the 4th grade level) Level: Grade 7-11	1/2" VHS	010.1-07V	16.00
---	----------	-----------	--------------

Let's the viewer travel billions of years through time watching the universe evolve from one primordial mass into the stars and galaxies that we see today. Shows how the tremendous forces of gravity work, creating swirling clouds of gases and cosmic matter that are eventually transformed into stars and galaxies. What mysterious forces are behind such oddities as pulsars, quasars, and black holes? What causes the solar wind? What is a supernova? The answers to these and other questions are covered in this program. Narrated by William Shatner.

	Format	Item No.	Price
A View of the Sky 30 minutes/1967 Level: Grade 11-Adult	1/2" VHS	010.1-08V	16.00

Explores various historical theories of the origin and order of the solar system from Copernicus through Einstein with the use of symbolic photography and with a brief look at the modern scientific exploration of space.

Supernova II 10 minutes/1988 Level: Adult	1/2" VHS	010.1-09V	10.00
--	----------	-----------	--------------

Describes the recent discovery of the supernova SN 1987A on February 23, 1987. NASA scientists explain how natural nucleosynthesis (formation of heavy elements) occurs when a supernova is formed and how studying the death of stars will help explain the origin of the universe.

Space Classroom: Assignment the Stars 27 minutes/1992 Level: Grade 6-8	1/2" VHS	010.1-10V	16.00
---	----------	-----------	--------------

Details the NASA educational effort that brought the crew of the orbiting Astro-1 mission (December 1990) and groups of middle school students together for a live astronomy lesson from space. The astronauts teach students about the electromagnetic spectrum and how it relates to an astronomy mission. Includes a teacher's guide/activity book.

NASA's Hubble Space Telescope: The Best Is Yet to Come 8 minutes/1994	1/2" VHS	010.1-11V	10.00
---	----------	-----------	--------------

Encapsulates the come-from-behind human endeavor of restoring the Hubble Space Telescope to its original scientific potential. Features the most visually striking moments while interweaving stories told by the participants. This mission succeeded because of many individuals' efforts: their dedication in spite of failures, teamwork, relentless planning, and rehearsing, as well as the enthusiasm of the young scientists and engineers. The tape expresses emotions felt for the excitement of discovery and the beauty of science at the frontier of knowledge. Produced by BDM Feder, Inc. Communications Group.

Astronomy Village™: Investigating the Universe Multimedia Program 18 minutes/1995 Level: Grade 9-12	1/2" VHS	010.1-12V	24.00
--	----------	-----------	--------------

Supplements high school curricula. "Astronomy Village™: Investigating the Universe" is an exciting multimedia program, with 10 investigations covering a broad cross-section of current research areas in astronomy. Each investigation encourages students to participate in scientific inquiry as a member of a cooperative learning group. The introductory videotape is accompanied by a teacher's guide and CD-ROM. This requires a Macintosh LC III running System 7 with 8 megabytes (MB) of RAM, 20 MB on the hard drive, 13-inch RGB color monitor (640 x 480 pixels, 256 colors), CD-ROM drive, QuickTime 1.5, and HyperCard 2.2 (not the HyperCard Player).

Comet Chasers: On the Trail of a Comet 77 minutes/1997 Level: Grade 9-Adult	1/2" VHS	010.1-13V	24.00
--	----------	-----------	--------------

Presents a taping of a live conference celebrating the Comet Hale-Bopp flyby. This multicamera presentation is hosted by Leslie Loews and Catherine Collins of NASA's Jet Propulsion Laboratory. The main focus of this program is a panel discussion with astronomers Alan Hale, Thomas Bopp, David Levy, and Don Yeomans.

	Format	Item No.	Price
Our Solar System 29 minutes/1992 Level: Grade K-4	1/2" VHS	010.2-01V	16.00

Teaches the names, orbital positions, and characteristics of each planet using the phrase "my very educated mother just served us nine pizza pies." The program is partially animated, set to music, and appropriate for early elementary grades. Each tape contains four versions of the program: English, Spanish, sign language, and open captioned. Copyrighted by the Arizona Board of Regents.

Voyager, The Grand Tour 18 minutes/1990 Level: Grade 4-12	1/2" VHS	010.2-02V	15.00
--	----------	-----------	--------------

Highlights the significant features discovered by Voyagers 1 and 2 as these spacecraft traveled past the outer planets of Jupiter, Saturn, Uranus, and Neptune. A computer-animated video copyrighted by and reproduced with permission from Martin Marietta. For educational use only.

On Robot Wings: A Flight Through the Solar System 30 minutes/1992	1/2" VHS	010.2-03V	25.00
---	----------	-----------	--------------

Shows that unmanned spacecraft have extended our knowledge of the solar system in ways that could only be dreamed of a few decades ago. Featuring amazing footage from NASA's Jet Propulsion Laboratory, you will fly "on robot wings" over planets and moons as if aboard a high-speed low-flying spacecraft and explore, close-up, the features of Earth, Venus, Mars, and Uranus' moon Miranda. As a special bonus, see the first ever images of Gaspra, a 12-mile-long asteroid encountered by Galileo. Copyrighted by Finley-Holiday Films Corporation. Available in 1/2" VHS format only. For noncommercial home, school, and library viewing only. All other rights reserved.

Solar System Exploration Videotape Collection 75 minutes/1992 Level: Grade 8-12	1/2" VHS	010.2-04V	24.00
--	----------	-----------	--------------

Presents a collection of highlights from the Voyager, Magellan, Galileo, and Ulysses missions. Includes a teacher's guide. The ten video features are: Voyager: A Retrospective, And Then There Was Voyager, Miranda: The Movie, Mars: The Movie, Magellan to Venus, Magellan Venus Radar Mapping Results, Galileo: The Jovian Lab, Galileo Earth Rotation Movie, Galileo Moon Rotation Movie, and Ulysses: A Solar Odyssey.

Magellan—Mapping the Planet Venus 10 minutes/1991 Level: Grade 7-Adult	1/2" VHS	010.2.3-01V	10.00
---	----------	-------------	--------------

Uses simple terms to explain how the sophisticated radar instruments on Magellan actually map the planet Venus and how the information is sent back to Earth and processed. Also takes the viewer on a computer-simulated flight over the planet highlighting important surface features. Since August 1990, the space probe Magellan has sent back more imaging data on the planet Venus than all U.S. planetary missions combined.

	Format	Item No.	Price
Collection of Magellan Venus Radar Mapping Results			
15 minutes/1992	1/2" VHS	010.2.3-02V	15.00

Shows that computer-animated techniques create simulated flights over the surface of Venus. Video sequences use radar-mapping data recorded by Magellan from September 1990 through February 1992.

Planet Mars

Mars, The Next Step

6 minutes/1986 (open captioned) Level: Grade 4-8 (hearing impaired)	1/2" VHS	010.2.4-01V	10.00
--	----------	-------------	--------------

Depicts a mission to Mars involving three vehicles launched from Earth, 6 months of interplanetary travel, and the establishment of a base on the Martian soil.

19 Minutes to Earth

15 minutes/1978 Level: Grade 9-12	1/2" VHS	010.2.4-02V	15.00
--------------------------------------	----------	-------------	--------------

Examines the scientific findings of the Viking missions to Mars. Viewers are introduced to a variety of information returned to Earth, including soil and atmospheric analysis and biological and geological data. Difficulties encountered in interpreting Viking's data are discussed. Actual photographs taken by the Viking 1 and 2 spacecraft are shown.

Planet Mars

30 minutes/1979 Level: Grade 7-Adult	1/2" VHS	010.2.4-03V	16.00
---	----------	-------------	--------------

Tells the story of the exploration of our celestial neighbor, Mars, from early investigations by telescope to the landing of the Viking robot lander on the Martian surface. Mars has been given top priority in planetary explorations. During the past decade, we have sent several spacecraft to observe and photograph the Red Planet.

Mars: The Search Begins

28 minutes/1973 Level: Grade 9-Adult	1/2" VHS	010.2.4-04V	16.00
---	----------	-------------	--------------

Uses the 7,000 pictures taken by the Mariner 9 spacecraft to analyze the planet Mars. Interesting comparisons are made between Martian geological features and similar Earth features. Narrated, in part, by Carl Sagan.

Mars Rover Sample Return Mission

5 minutes/1988 Level: Grade 7-Adult	1/2" VHS	010.2.4-05V	10.00
--	----------	-------------	--------------

Depicts, in computer-animated form, one possible scenario for NASA's plan to conduct an unmanned 3-year mission to Mars in the late 1990's. The purpose of this mission is to collect soil samples and return them to Earth.

	Format	Item No.	Price
Mapping the Martian World: The Mars Observer Mission 8 minutes/1992 Level: Grade 7-Adult	1/2" VHS	010.2.4-06V	10.00

Using computer animation and interviews with project scientists, gives an overview of the Mars Observer Mission, which began in 1992. Highlights include goals of the mission, spacecraft design, trajectory, and mission timeline.

Life on Mars? 30 minutes/1996	1/2" VHS	010.2.4-07V	15.00
---	----------	-------------	--------------

Presents persuasive evidence by NASA scientists of life on Mars. Includes a spectacular and detailed view of the planet itself and explores past, present, and future missions to the planet, including Mariner, Viking, Pathfinder, and Global Surveyor. Concludes with a history of Mars observations over the centuries and the foretelling of future space travel to Mars from noted astronomers, authors, and scientists. Produced and copyrighted by the Finley-Holiday Film Corporation. Available in 1/2" VHS format only.

Mars Mission Animation Compilation 25 minutes/1996 Level: Grade 7-12	1/2" VHS	010.2.4-08V	16.00
---	----------	-------------	--------------

Offers computer-animated scenarios of the following: Surveyor, Pathfinder, Mars: The Movie, Mars Precision Landing Animation, and Mars Global Surveyor Deployment.

Destination Mars 33 minutes/1997 Level: Grade 7-12	1/2" VHS	010.2.4-09V	16.00
---	----------	-------------	--------------

Depicts the first human mission to Mars in the year 2018. The story of the journey is told by the mission astronauts as they record entries in their journals. The program presents Mars geology and the search for life on the planet. It also illustrates the technologies being developed to transport humans to Mars and support life on the planet once humans have landed.

Project Galileo: A Jovian Odyssey 4 minutes/1987 Level: Grade 10-Adult	1/2" VHS	010.2.5-02V	10.00
---	----------	-------------	--------------

Presents an animated explanation of Project Galileo, a planetary exploration mission to provide an indepth investigation of Jupiter and its four satellites. Project Galileo will seek important information about the origin and evolution of the solar system.

Galileo: A Jovian Laboratory 12 minutes/1989 Level: Grade 10-Adult	1/2" VHS	010.2.5-03V	15.00
---	----------	-------------	--------------

Describes the advanced characteristics of the Galileo spacecraft, including the functions of the probe and orbiter. Explains how studying Jupiter may provide information about the origin of the universe. Includes animation sequences illustrating Galileo's trajectory, the lo encounter, and the probe entering Jupiter's atmosphere.

	Format	Item No.	Price
Ulysses Encounter With Jupiter 5 minutes/1992 Level: Grade 10-Adult	1/2" VHS	010.2.5-04V	10.00

Offers a computer-animated scenario of Ulysses' 10-day tour of Jupiter on its way to the Sun. Briefly explains Jupiter's magnetosphere, plasma ring, and the trajectory Ulysses will take on its journey.

Voyager 2/Saturn Encounter 30 minutes/1981 Level: Grade 7-Adult	1/2" VHS	010.2.6-01V	16.00
--	----------	-------------	--------------

Describes highlights of live television coverage of the Voyager 2 spacecraft's close encounter with Saturn. New discoveries about Saturn and its moons as well as other historical information and new analysis are presented. From the Jet Propulsion Laboratory in Pasadena, California, many representatives of the world's scientific press corps were present as new information about the solar system's second largest planet streamed in.

Uranus: I Will See Such Things 29 minutes/1986 Level: Grade 9-Adult	1/2" VHS	010.2.7-03V	16.00
--	----------	-------------	--------------

Begins with the history of William Herschel's discovery of Uranus in 1781. Project scientists discuss recent discoveries made about Uranus using pictures taken during the Voyager 2 flyby in 1986. Includes a comprehensive discussion of the planet's atmosphere, moons, and rings.

Voyager Uranus Encounter Parts I & II 60 minutes/1986 Level: Grade 11-Adult	1/2" VHS	010.2.7-04V	21.00
--	----------	-------------	--------------

Describes the Voyager flyby of Uranus and its moons, with two episodes condensed onto one tape.

Ulysses: A Voyage To The Sun 10 minutes/1985 Level: Grade 9-Adult	1/2" VHS	010.2.8-01V	15.00
--	----------	-------------	--------------

Describes the mission, planned jointly by NASA and the European Space Agency, to explore the atmosphere around the Sun. Using information obtained from Skylab, the program discusses the Sun's corona and electromagnetic field, as well as solar wind and solar flares.

Earth-Sun Relationship 6 minutes/1974 Level: Grade 7-Adult	1/2" VHS	010.2.8-02V	10.00
---	----------	-------------	--------------

Depicts in animation how the Sun and planets were formed. Explains how NASA's space probes discovered the Van Allen belt and provided information about solar wind and the magnetosphere. Also illustrates the death of a star.

	Format	Item No.	Price
Ulysses: An Expedition Over the Sun's Poles 10 minutes/1995 Level: Grade 9-Adult	1/2" VHS	010.2.8-03V	10.00

Describes the Ulysses spacecraft, which was launched in 1990 and made some fascinating discoveries as it flew over the Sun's poles. The main objective of this mission was to compare the particles and fields above the Sun's poles with those found near its equator. This program discusses new information learned about solar wind, cosmic rays, and the magnetic field. Includes an educator guide.

Reading the Moon's Secrets 16 minutes/1976 Level: Grade 7-12	1/2" VHS	010.3-01V	15.00
---	----------	-----------	--------------

Addresses in 10 short segments an important aspect of lunar knowledge. Designed to be used as a teaching aid in science classrooms for grades 7 and above, questions are presented in each segment.

Return to the Moon Videoconference 60 minutes/1990 Level: Grade 5-8	1/2" VHS	010.3-02V	24.00
--	----------	-----------	--------------

Offers a taping of an interactive teleconference on January 26, 1990. Students joined Apollo astronaut Michael Collins and NASA guest educator Dr. Lynn Bondurant on a "return to the Moon," participating in a series of unique problem-solving and hands-on activities. The program, created by the Challenger Center for Space Science Education, teaches students important concepts about the lunar voyages focusing on the journey (physics of spaceflight), exploration (lunar geology), and telecommunications and increases students' appreciation of the importance of teamwork. Students question astronaut Collins on such topics as lunar erosion, life on the Moon, and how best to prepare for space travel. Contains exciting footage of the Apollo 11 mission. Reproduced with permission from the Challenger Center. The tape and activity booklet may be reproduced for educational use only.

CRATERS! A Multi-Science Approach to Cratering and Impacts Book and CD-ROM/1995 Level: Grade 9-12		010.3-03P	24.95
--	--	-----------	--------------

Includes 20 ready-to-use, hands-on activities that use cratering to teach key concepts in physics, astronomy, biology and Earth science. Includes a custom Mac/Windows CD-ROM packed with supplemental images for classroom activities. Copyrighted by the National Science Teachers Association.

	Format	Item No.	Price
Extraterrestrial Intelligence			
The Quest for Contact: NASA's Search for Extraterrestrial Intelligence			
35 minutes/1988 Level: Adult	1/2" VHS	010.4-01V	16.00

Reviews NASA's plans to carry out the most sensitive, systematic search ever conducted for extraterrestrial civilizations. Explains a high spectral resolution search that will listen for faint signals originating near solar-type stars within 100 light-years distance from the Earth, searching the entire sky for strong signals from possible civilizations anywhere in the universe. This program features the NASA SETI program's project managers and scientists, as well as SETI pioneers Frank Drake, Phillip Morrison, and Carl Sagan. Copyrighted by and reproduced with permission from the SETI Institute, a nonprofit scientific and educational organization. Not for commercial use or international distribution.

Quest for Life, Who's Out There?			
29 minutes/1975 Level: Grade 10-12	1/2" VHS	010.4-02V	16.00

Features Orson Welles as the host of this extraordinary half-hour program. A number of distinguished scientists conclude that there is someone in outer space. From the monstrous Mars life forms of his famous 1938 radio broadcast, "The War of the Worlds," Orson Welles takes us through science fiction to science fact, to the new view of extraterrestrial life now emerging from probes to the planets and to the interstellar discoveries about the nature of life itself. This program is a fascinating portrayal of a contemporary scientific speculation that intelligent civilizations exist in the universe.

	Format	Item No.	Price
The Serendipity Machines 30 minutes/1987 Level: Grade 12-Adult	1/2" VHS	011.0-01V	16.00

Highlights some of the many innovative spinoffs invented by NASA, including a redesigned cable gripping device and more modern braking mechanism for the San Francisco cable cars, the development of a new firefighting suit, and a portable medical treatment system.

The House That NASA Built 15 minutes/1978 Level: Grade 7-12	1/2" VHS	011.0-02V	15.00
--	----------	-----------	--------------

Covers a unique lived-in house built at the NASA Langley Research Center in Virginia to demonstrate some of the new technologies available to home builders and home owners to enhance water conservation, safety, and security.

Optics—Making Light Work 20 minutes/1993 Level: Grade 4-9	1/2" VHS	011.0-03V	21.00
--	----------	-----------	--------------

Demonstrates that the basic science concepts taught in the classroom have applications in the very specialized work done by NASA. Includes a teacher's guide with hands-on math and science activities.

Global Quest: The Internet in the Classroom 15 minutes/1993 Level: Grade 4-Adult	1/2" VHS	011.1-01V	15.00
---	----------	-----------	--------------

Describes how schools will benefit by using the Internet. This video may be freely copied and distributed for educational uses. Produced by the Imaging Technology Branch of NASA Ames Research Center.

Connecting to the Future Today 22 minutes/1994 Level: Adult	1/2" VHS	011.1-02V	21.00
--	----------	-----------	--------------

Discusses planning strategies for incorporating the Internet into your school or organization. Includes *A Guide For Building a Network Infrastructure for Education*.

Global Quest II: Teaching With the Internet 22 minutes/1996 Level: Teachers	1/2" VHS	011.1-03V	15.00
--	----------	-----------	--------------

Presents teachers who tell how finding appropriate Internet resources and integrating them into their curricula has strengthened their classroom activities and how the Internet itself has become a tremendous resource. For more information on this and other NASA Internet projects, visit them on the World Wide Web at <http://quest.arc.nasa.gov>.

	Format	Item No.	Price
NASA Educator Kit for the Internet			
59 minutes/1997	1/2" VHS	011.1-04V	33.00
Level: Teachers			

Contains a videotape with the three Internet titles listed above, a CD-ROM, and written materials about NASA and the Internet. Produced to show schools how they can get connected to the Internet and what to do with it once service is established. The kit helps guide classroom teachers new to the Internet. The CD-ROM, "Exploring the Internet with NASA," was produced for young students and first-time adult users to the Internet. You will discover what the Internet is and what it is used for and gain hands-on experience navigating the Internet and the World Wide Web. For more information about NASA's Learning Technologies Project, see the program's World Wide Web site at <http://ita.ivv.nasa.gov>.

	Format	Item No.	Price
Project Mathematics! The Theorem of Pythagoras 20 minutes/1988 Level: Grade 9-12	1/2" VHS	012.0-01V	16.00

Explains the Pythagorean Theorem using computer animation. Shows real-life problems that can be solved using the Pythagorean Theorem, illustrates several different animated proofs, and weaves a historical perspective. Copyrighted by and reproduced with permission from the California Institute of Technology. For educational use only. Not for international distribution.

The Theorem of Pythagoras 30 pages Program Guide and Workbook		012.0-01P	4.50
--	--	-----------	-------------

Begins with a brief outline of the contents of the videotape, followed by suggestions of activities that can be done prior to showing the tape. The guide is divided into sections corresponding to capsule subdivisions in the tape. Each section summarizes important points and contains exercises that can be used to strengthen understanding. Photocopies of this workbook may be made for educational use.

Project Mathematics! The Story of Pi 25 minutes/1990 Level: Grade 9-12	1/2" VHS	012.0-02V	16.00
---	----------	-----------	--------------

Explains the story of pi with computer animation. The tape weaves a historical perspective, showing how the number pi (the ratio of the circumference to the diameter of any circle) appears in formulas for round objects and in contexts that seem to have no relation to geometry. Copyrighted by and reproduced with permission from the California Institute of Technology. For educational use only. Not for international distribution.

The Story of Pi 30 pages Program Guide and Workbook		012.0-02P	4.50
--	--	-----------	-------------

Begins with a brief outline of the contents of the videotape, followed by suggestions of activities that can be done prior to showing the tape. The guide is divided into sections corresponding to capsule subdivisions in the tape. Each section summarizes important points and contains exercises that can be used to strengthen understanding. Photocopies of this workbook may be made for educational use.

Project Mathematics! Similarity 25 minutes/1990 Level: Grade 9-12	1/2" VHS	012.0-03V	16.00
--	----------	-----------	--------------

Explains similarity with computer animation. Shows examples of similar objects from real life. Introduces scaling, the basis of all measurement, and shows its use in geometry, science, and technology. Copyrighted by and reproduced with permission from the California Institute of Technology. For educational use only. Not for international distribution.

Similarity 30 pages Program Guide and Workbook		012.0-03P	4.50
---	--	-----------	-------------

Begins with a brief outline of the contents of the videotape, followed by suggestions of activities that can be done prior to showing the tape. The guide is divided into sections corresponding to capsule subdivisions in the tape. Each section summarizes important points and contains exercises that can be used to strengthen understanding. Photocopies of this workbook may be made for educational use.

	Format	Item No.	Price
Project Mathematics! Polynomials			
25 minutes/1991 Level: Grade 9-12	1/2" VHS	012.0-04V	16.00

Opens by showing examples of polynomial curves that appear in real life, followed by a systematic description of polynomials by degree. Uses computer animation to discuss linear, quadratic, and cubic polynomials and addresses the intersections of lines and parabolas. Copyrighted by and reproduced with permission from the California Institute of Technology. For educational use only. Not for international distribution.

Polynomials

30 pages Program Guide and Workbook		012.0-04P	4.50
--	--	-----------	-------------

Begins with a brief outline of the contents of the videotape, followed by suggestions of activities that can be done prior to showing the tape. The guide is divided into sections corresponding to capsule subdivisions in the tape. Each section summarizes important points and contains exercises that can be used to strengthen understanding. Photocopies of this workbook may be made for educational use.

Project Mathematics! Sines and Cosines, Part I

28 minutes/1992 Level: Grade 9-12	1/2" VHS	012.0-05V	16.00
--------------------------------------	----------	-----------	--------------

Introduces the topic of trigonometry. The sine and cosine are first derived from the unit circle, and then their basic properties and identities are explored. The use of sine and cosine in the description of harmonic motion is illustrated visually and audibly with an electronic synthesizer and with musical instruments. The periodic nature of the sine wave is discussed, and the traditional triangular derivation of the sine and cosine is presented. Copyrighted by and reproduced with permission from the California Institute of Technology. For educational use only. Not for international distribution.

Sines and Cosines, Part I

30 pages Program Guide and Workbook		012.0-05P	4.50
--	--	-----------	-------------

Begins with a brief outline of the contents of the videotape, followed by suggestions of activities that can be done prior to showing the tape. The guide is divided into sections corresponding to capsule subdivisions in the tape. Each section summarizes important points and contains exercises that can be used to strengthen understanding. Photocopies of this workbook may be made for educational use.

Project Mathematics! Sines and Cosines, Part II

30 minutes/1993 Level: Grade 9-12	1/2" VHS	012.0-06V	16.00
--------------------------------------	----------	-----------	--------------

Focuses on the use of sines and cosines in trigonometry, with special emphasis on the law of cosines and the law of sines. They enable us to find all parts of a triangle if three parts are known and at least one of them is a side. Applications are described in astronomy, navigation, and surveying by triangulation. One of the major triumphs of surveying by triangulation is the survey of India, which took more than a century to complete. The program describes how the survey was done and how the height of Mt. Everest was determined. The program also outlines a brief history of surveying instruments, from the dioptra of ancient times to orbiting satellites of modern times. Copyrighted by and reproduced with permission from the California Institute of Technology. For educational use only. Not for international distribution.

Sines and Cosines, Part II 30 pages Program Guide and Workbook	012.0-06P	4.50

Begins with a brief outline of the contents of the videotape, followed by suggestions of activities that can be done prior to showing the tape. The guide is divided into sections corresponding to capsule subdivisions in the tape. Each section summarizes important points and contains exercises that can be used to strengthen understanding. Photocopies of this workbook may be made for educational use.

Project Mathematics! Sines and Cosines, Part III 30 minutes/1994 Level: Grade 9-12 Copyrighted by C.I.T.	1/2" VHS	012.0-07V	16.00
--	----------	-----------	--------------

Relates the sine and cosine of an angle with the lengths of chords on a circle. This leads to a derivation of addition formulas for determining the sine and cosine of a sum of two angles. One application shows that a combination of a sine wave and a cosine wave of the same frequency is another sine wave, possibly shifted. Another application shows how the addition formulas make it possible to determine exact expressions for sines and cosines of many angles in terms of square roots of integers. Copyrighted by and reproduced with permission from the California Institute of Technology. For educational use only. Not for international distribution.

Sines and Cosines, Part III 30 pages Program Guide and Workbook	012.0-07P	4.50
--	-----------	-------------

Begins with a brief outline of the contents of the videotape, followed by suggestions of activities that can be done prior to showing the tape. The guide is divided into sections corresponding to capsule subdivisions in the tape. Each section summarizes important points and contains exercises that can be used to strengthen understanding. Photocopies of this workbook may be made for educational use.

Project Mathematics! The Tunnel of Samos 30 minutes/1995 Level: Grade 9-12	1/2" VHS	012.0-08V	16.00
---	----------	-----------	--------------

Tells the story of a Greek engineer, Eupalinos of Megara. In the 6th century B.C., Eupalinos excavated a thousand meter tunnel straight through the heart of a mountain located on the Island of Samos in the Aegean Sea. This program describes the method used, as well as alternate methods proposed by scholars in modern times. The program also shows that the problem of delivering fresh water to large populations has been an ongoing human endeavor since ancient times. Copyrighted by and reproduced with permission from the California Institute of Technology. For educational use only. Not for international distribution.

Space Flight: The Application of Orbital Mechanics 35 minutes/1989 Level: Adult	1/2" VHS	012.0-20V	16.00

Explains in detail planetary motion and orbital mechanics. Following a brief look at early theories on planetary orbits, animation is used to illustrate various mathematical equations and theories, including Kepler's Laws of Planetary Motion and Newton's Laws of Motion. Explains many terms associated with orbits, including perigee, apogee, eccentricity, orbital inclination, launch window, and so on. Also includes animation of a full Earth rotating, planets in orbit around the Sun, satellites in orbit, and the Hubble Space Telescope. Animation is interspersed with footage from Shuttle missions, including launches, landings, Earth views, satellite deploys, and EVA's.

Liftoff to Learning: Tethered Satellite: A Videotape for Physics and Physical Science Part 1: 22 minutes/1995; Part 2: 19 minutes/1997 Level: Grade 9-12	1/2" VHS	012.0-21V	16.00
--	----------	-----------	--------------

Part 1: Tethered Satellite Forces and Motion

Describes the tethered satellite concept and shows how the satellite is deployed and extended in space. The mathematics describing the forces acting on the tethered satellite/Space Shuttle orbiter system is presented.

Part 2: Electrical Circuits in Space: The Electrodynamics of the Tethered Satellite

Demonstrates how the tethered satellite and the Space Shuttle orbiter interact with Earth's magnetic field to produce an electric current. Future applications of the tethered satellite/Space Shuttle orbiter system as a motor are described.

Liftoff to Learning: Microgravity 24 minutes/1996 Level: Grade 5-12	1/2" VHS	012.0-22V	16.00
--	----------	-----------	--------------

Focuses on four scientific disciplines in microgravity studies: fluid physics, materials science, biotechnology, and combustion. Experiments within these disciplines explore how the effects of buoyancy-driven convection and sedimentation, seen in ground-based laboratories, are diminished in space, allowing scientists to expand their knowledge in these areas. "Microgravity" describes the restrictions that gravity imposes on scientific experimentation and how they can be greatly reduced in the exciting research environment of the Space Shuttle and later on in the International Space Station.

For your ordering convenience, the captioned videocassettes available for the hearing-impaired viewer are summarized below:			
Eating and Sleeping in Space 30 minutes (open captioned)	1/2" VHS	006.3-03V	16.00
Flying Machines 28 minutes (open captioned)	1/2" VHS	001.0-04V	16.00
Mars, The Next Step 6 minutes (open captioned)	1/2" VHS	010.2.4-01V	10.00
Our Solar System 29 minutes (open captioned)	1/2" VHS	010.2-01V	16.00
Portrait of Earth: The Story of Satellites 30 minutes (captioned at the 2nd grade level)	1/2" VHS	002.2-09V	16.00
Portrait of Earth: The Story of Satellites 30 minutes (captioned at the 3rd grade level)	1/2" VHS	002.2-10V	16.00
Portrait of Earth: The Story of Satellites 30 minutes (captioned at the 4th grade level)	1/2" VHS	002.2-11V	16.00
Shuttle Life in the World of Weightlessness 29 minutes (open captioned)	1/2" VHS	006.3-01V	16.00
Space Shuttle Demonstration 15 minutes (signed for hearing impaired)	1/2" VHS	007.6-12V	15.00
To Dream . . . To Learn 29 minutes (open captioned)	1/2" VHS	008.0-01V	16.00
Universe 30 minutes (captioned at the 2nd grade level)	1/2" VHS	010.1-05V	16.00
Universe 30 minutes (captioned at the 3rd grade level)	1/2" VHS	010.1-06V	16.00
Universe 30 minutes (captioned at the 4th grade level)	1/2" VHS	010.1-07V	16.00

Videocassettes—Series

	Format	Item No.	Price
History of Space Travel 14-part series condensed onto 4 videocassettes 7 hours with printed lesson guide	1/2" VHS	099.01 V	60.00

Individual Episodes

Episode 1: Space Shuttle: Overview 30 minutes/1980 Level: Grade 7-12	1/2" VHS	099.01-01V	16.00
---	----------	------------	--------------

Reports on the preparations for an early 1981 Space Shuttle launch. The program covers the mission, the flight crew training, rocket engine tests, problems involving the thermal protection system tiles, and efforts of the NASA industry team during the final launch stages.

Episode 2: Before Saturn & America in Space 30 minutes/1980 Level: Grade 7-12	1/2" VHS	099.01-02V	16.00
--	----------	------------	--------------

"Before Saturn": Provides a retrospective look at the development of rockets from the early Chinese efforts through the development of the Saturn I booster. "America in Space": Recounts the achievements in unmanned and manned space projects during the first 5 years of NASA's existence.

Episode 3: Astronauts . . . U.S. Project Mercury 30 minutes/1960 Level: Grade 7-12	1/2" VHS	099.01-03V	16.00
---	----------	------------	--------------

Reports on the original Mercury astronauts, explaining their selection, testing, and training for America's first manned space program.

Episode 4: Freedom 7 30 minutes/1961 Level: Grade 7-12	1/2" VHS	099.01-04V	16.00
---	----------	------------	--------------

Documents the first American manned space mission. Covers the training, preparation, launching, and recovery of astronaut Alan B. Shepard, Jr., for the first Project Mercury suborbital flight.

Episode 5: Friendship 7, Part I 30 minutes/1962 Level: Grade 7-12	1/2" VHS	099.01-05V	16.00
--	----------	------------	--------------

Illustrates in detail the first American orbital spaceflight by astronaut John H. Glenn in 1962. The program also provides background on Project Mercury and the tracking network planned for the one-person Mercury missions.

Episode 6: Friendship 7, Part II 30 minutes/1980 Level: Grade 7 - 12	1/2" VHS	099.01-06V	16.00
---	----------	------------	--------------

Continues the historical documentary illustrating the first American orbital spaceflight by astronaut John H. Glenn in 1962 and provides background on Project Mercury and the tracking network planned for the Mercury missions.

	Format	Item No.	Price
Episode 7: Your Share in Space 30 minutes/1980 Level: Grade 7-12	1/2" VHS	099.01-07V	16.00

Relates space science discoveries and their application in the daily lives of citizens. Describes booster evolution, payload development, instrumentation systems, TIROS, solar cells, data processing machines, Project Mercury, tracking and communication, X-15, Ranger, Surveyor, and Apollo. Industry participation in space research and development is also depicted.

Episode 8: Legacy of Gemini 30 minutes/1967 Level: Grade 7-12	1/2" VHS	099.01-08V	16.00
--	----------	------------	--------------

Illustrates, in the perspective of a single composite mission, the major accomplishments of the Gemini two-person space flights and the significance of these flights to the Apollo program. The film includes outstanding photography of the Earth and humans in space.

Episode 9: Debriefing—Apollo 8 30 minutes/1969 Level: Grade 7-12	1/2" VHS	099.01-09V	16.00
---	----------	------------	--------------

Tells the story of humankind's first orbit around the Moon, with commentary on the significance of the Apollo 8 flight by several prominent Americans. The program features photography of the lunar surface, the Earth as seen from the Moon, and the onboard activities of astronauts Borman, Lovell, and Anders.

Episode 10: The Flight of Apollo 11 (The Eagle Has Landed) 30 minutes/1969 Level: Grade 7-12	1/2" VHS	099.01-10V	16.00
---	----------	------------	--------------

Tells the story of our first lunar landing in July 1969. Depicts the principal events of the mission, from launch through the postrecovery activities of astronauts Armstrong, Aldrin, and Collins. Through television, motion pictures, and still photography, the film provides an "eyewitness" perspective of the Apollo 11 mission.

Episode 11: Apollo 16, Nothing So Hidden 30 minutes/1972 Level: Grade 7-12	1/2" VHS	099.01-11V	16.00
---	----------	------------	--------------

Provides a visual documentary account of the Apollo 16 lunar landing mission and exploration in the highland region of the Moon, near the crater Descartes. Through the use of cinema verite' techniques, the real-time anxieties and lighter moments of the support teams in Mission Control and the Science Support Room were captured. The film includes some of the most spectacular lunar photography of any Apollo mission.

Episode 12: Four Rooms Earthview 30 minutes/1975 Level: Grade 7-12	1/2" VHS	099.01-12V	16.00
---	----------	------------	--------------

Tells the story of the three Skylab missions, the nine astronauts, and their 171 days in the manned laboratory. Skylab was the first U.S. manned space station. Criss-crossing 70 percent of Earth's land area, Skylab sensors gathered information about many features of the planet.

	Format	Item No.	Price
Episode 13: The Mission of Apollo/Soyuz			
30 minutes/1975	1/2' VHS	099.01-13V	16.00
Level: Gade 7-12			

Stresses the spirit of cooperation and friendship, which helped make the Apollo-Soyuz mission a success. The mission was a precedent-setting event in the sphere of international manned spaceflight. The program generally follows the mission timeline, with appropriate flashbacks to detail the periods of development and training. The program concludes with a projection on the future of international cooperation in space featuring the Space Shuttle and the European development called Spacelab.

Episode 14: Teacher Silent Video Lesson Guide			
30 minutes/1980	1/2" VHS	099.01-14V	16.00
Level: Adult			

Consists of questions, definitions, and student activities that teachers can use to plan lessons around the "History of Space Travel" series.

	Format	Item No.	Price
Journey Through the Solar System 14-part series condensed onto 4 videocassettes 7 hours with printed lesson guide	1/2" VHS	099.02 V	60.00

INDIVIDUAL EPISODES

Episode 1: Our Star the Sun 30 minutes/1982 Level: Grade 7-Adult	1/2" VHS	099.02-01V	16.00
---	----------	------------	--------------

Examines pictures and observations from three Skylab missions of the 1970's. An analysis of the atmosphere, temperature, density, chemical composition, physics, and magnetic fields of the Sun is presented.

Episode 2: Mercury, Exploration of a Planet 30 minutes/1976 Level: Grade 7-Adult	1/2" VHS	099.02-02V	16.00
---	----------	------------	--------------

Provides excerpts from the NASA film *Mercury, Exploration of a Planet*, which uses animation and photography to depict the flight of the Mariner spacecraft to Venus and Mercury. Includes a NASA program *Our Solar System*, suitable for primary grades.

Episode 3: Venus Pioneer 30 minutes/1982 Level: Grade 7-Adult	1/2" VHS	099.02-03V	16.00
--	----------	------------	--------------

Documents the early Pioneer missions to Venus in the late 1970's through a series of animation, NASA photographs, and interviews with project scientists. Highlights some early discoveries about the planet's atmosphere and surface features.

Episode 4: Earth, The Planet 30 minutes/1982 Level: Grade 7-Adult	1/2" VHS	099.02-04V	16.00
--	----------	------------	--------------

Examines Earth from the vantage point of space, describing its atmosphere and magnetic fields and presenting a view of the world through the eyes of the Landsat observation satellite.

Episode 5: Assignment . . . Shoot for the Moon 30 minutes/1982 Level: Grade 7-Adult	1/2" VHS	099.02-05V	16.00
--	----------	------------	--------------

Illustrates how the Moon was surveyed by machines prior to our first lunar landing.

Episode 6: The Moon and Man 30 minutes/1982 Level: Grade 7-Adult	1/2" VHS	099.02-06V	16.00
---	----------	------------	--------------

Provides segments from a compilation of historic NASA films that document many of the manned expeditions to the Moon.

	Format	Item No.	Price
Episode 7: The Fourth Planet 30 minutes/1982 Level: Grade 7-Adult	1/2" VHS	099.02-07V	16.00

Shows how information gleaned from space missions began to separate fact from fiction concerning Mars, which has been the setting for many tales of science fiction.

Episode 8: Life on Mars? 30 minutes/1982 Level: Grade 7-Adult	1/2" VHS	099.02-08V	16.00
--	----------	------------	--------------

Describes the experiments conducted on the Martian surface in search for life.

Episode 9: Jupiter Odyssey 30 minutes/1974 Level: Grade 7-Adult	1/2" VHS	099.02-09V	16.00
--	----------	------------	--------------

Summarizes the Pioneer 10 results and highlights pictures of the largest planet in the solar system.

Episode 10: Jupiter—A Clearer Picture 30 minutes/1982 Level: Grade 7-Adult	1/2" VHS	099.02-10V	16.00
---	----------	------------	--------------

Reveals fascinating findings about the moons of Jupiter as a result of data collected by the Voyager spacecraft.

Episode 11: Pioneer—Saturn Encounter 30 minutes/1982 Level: Grade 7-Adult	1/2" VHS	099.02-11V	16.00
--	----------	------------	--------------

Offers views of Jupiter and Saturn from the Pioneer spacecraft.

Episode 12: Voyager 2/Saturn Encounter 30 minutes/1982 Level: Grade 7-Adult	1/2" VHS	099.02-12V	16.00
--	----------	------------	--------------

Highlights live television coverage from the Voyager 2 spacecraft's close encounter with Saturn. New discoveries about Saturn and its moons as well as other historical information and new analysis are presented. From the Jet Propulsion Laboratory, many representatives of the world's scientific press corps discuss new information about the solar system's second largest planet.

Episode 13: Uranus, Neptune, Pluto and Beyond 30 minutes/1982 Level: Grade 7-Adult	1/2" VHS	099.02-13V	16.00
---	----------	------------	--------------

Presents theories about the structure and nature of the three outer planets, comets, and asteroids. Spacecraft messages to "anybody out there" are reviewed.

	Format	Item No.	Price
Episode 14: Teacher Silent Video Lesson Guide			
30 minutes/1982	1/2" VHS	099.02-14V	16.00
Level: Adult			

Consists of questions, definitions, and student activities that teachers can use to plan lessons around the "Journey Through the Solar System" series.

	Format	Item No.	Price
Life in the Universe 14-part series condensed onto 4 videocassettes 7 hours with printed lesson guide	1/2" VHS	099.03 V	60.00
Episode 1: The Ingredients of Space Travel 30 minutes/1982 Level: Grade 11-Adult	1/2" VHS	099.03-01V	16.00
Stresses the need for regenerative systems for space travel. Regenerative systems for water and oxygen are explained in detail. Astronauts are shown in a free space simulator device. An oxygen recovery and thermal control system is also examined.			
Episode 2: Between the Atom and the Star 30 minutes/1982 Level: Grade 11-Adult	1/2" VHS	099.03-02V	16.00
Investigates gravity and its effects on humans. Biologists explain the kinds of experiments that were to be done on the Earth-orbiting biosatellite. The program shows how the experiments were completed and how the information gained is important to the manned space program and further experimentation in weightlessness.			
Episode 3: Zero-G and Space Suits 30 minutes/1982 Level: Grade 4-Adult	1/2" VHS	099.03-03V	16.00
Describes the space suit worn by Apollo astronauts. The three major parts of the suit are described. Weightlessness is also examined and explained with animation, and Newton's three laws of motion are presented. Astronauts are shown in zero-gravity and in an extravehicular activity (EVA).			
Episode 4: Project Mercury: An Early Step 30 minutes/1982 Level: Grade 4-Adult	1/2" VHS	099.03-04V	16.00
Summarizes the Project Mercury flights of the 1960's. Shows the designing and building of the spacecraft, the training of the seven original astronauts, the MR-2 launch with the chimp Ham, and highlights of Alan Shepard's first flight, as well as the flights of other Mercury astronauts.			
Episode 5: Gemini Science 30 minutes/1982 Level: Grade 4-Adult	1/2" VHS	099.03-05V	16.00
Presents explanations by scientists of life science experiments developed for the Gemini missions. Includes a brief synopsis of the missions.			

	Format	Item No.	Price
Episode 6: Life on the Moon?			
30 minutes/1982	1/2" VHS	099.03-06V	16.00
Level: Grade 1-Adult			

Focuses on the importance and function of the Lunar Receiving Lab. Moon rocks and soil samples are taken to the Lunar Receiving Lab in Houston, where vast amounts of geological and botanical work is conducted to determine whether the Moon will sustain life.

Episode 7: Our Laboratories in Space			
30 minutes/1982	1/2" VHS	099.03-07V	16.00
Level: Grade 4-Adult			

Examines some of the scientific and medical experiments that were completed on Skylab, the Apollo-Soyuz Test Project, and future experiments to be conducted on the Space Shuttle.

Episode 8: Examination of Life			
30 minutes/1982	1/2" VHS	099.03-08V	16.00
Level: Adult			

Focuses on university and NASA scientists of the 1960's exploring the origin of life.

Episode 9: Life Elsewhere?			
30 minutes/1982	1/2" VHS	099.03-09V	16.00
Level: Grade 12-Adult			

Explores the possibility of life on other planets.

Episode 10: Life on Three Planets Beyond Earth			
30 minutes/1982	1/2" VHS	099.03-10V	16.00
Level: Grade 11-Adult			

Explores the possibility of life on Jupiter, Venus, and Mars.

Episode 11: Universe			
30 minutes/1976	1/2" VHS	099.03-11V	16.00
Level: Grade 4-Adult			

Briefly examines the planets, with emphasis on Mars and Jupiter. Proceeds to explore our solar system, including galaxies, nebulae, pulsars, black holes, and the Sun.

Episode 12: Possible Futures in Space			
30 minutes/1982	1/2" VHS	099.03-12V	16.00
Level: Grade 9-Adult			

Contemplates futuristic ideas for our exploration and exploitation of space, including space tugs and space stations. Highlights terrafarming and methods of colonizing foreign worlds.

	Format	Item No.	Price
Episode 13: Extraterrestrials? 30 minutes/1982 Level: Grade 7-Adult	1/2" VHS	099.03-13V	16.00

Contemplates the imagination as it relates to the progress of humankind. Science fiction works, such as Jules Verne's *From the Earth to the Moon* and H. G. Wells' *The War of the Worlds*, have played a role in our progress. Copernicus and others whose images came true and changed our concept of the universe are featured.

Episode 14: Teacher Silent Video Lesson Guide 30 minutes/1982 Level: Adult	1/2" VHS	099.03-14V	16.00
---	----------	------------	--------------

Consists of questions, definitions, and student activities that teachers can use to plan lessons around the "Life in the Universe" series.

	Format	Item No.	Price
25 Years of Progress 14-part series condensed onto 4 videocassettes 7 hours with printed lesson guide	1/2" VHS	099.04 V	60.00

Individual Episodes

Episode 1: The Birth of NASA 30 minutes/1983 Level: Grade 7-12	1/2" VHS	099.04-01V	16.00
---	----------	------------	--------------

Highlights the beginning of NASA (1958) and its early programs, including the introduction of a quality control program.

Episode 2: The Moon a Goal 30 minutes/1983 Level: Grade 7-12	1/2" VHS	099.04-02V	16.00
---	----------	------------	--------------

Covers the fledgling organization, NASA, reaching several milestones in 1960-61. These milestones included two highly successful unmanned orbital flights, the world's first weather and passive communications satellite, and two manned suborbital flights.

Episode 3: Around the World and on the Way 30 minutes/1983 Level: Grade 7-12	1/2" VHS	099.04-03V	16.00
---	----------	------------	--------------

Details John Glenn's first Earth orbit.

Episode 4: Preparing for the Moon 30 minutes/1983 Level: Grade 7-12	1/2" VHS	099.04-04V	16.00
--	----------	------------	--------------

Illustrates continued improvements to the liquid hydrogen/oxygen rocket. Examines lunar photographs taken by Ranger 7, the tests performed on three Saturn rockets, and the plans that were made for Surveyor's landing on the Moon's surface.

Episode 5: Gemini—The Twins 30 minutes/1983 Level: Grade 7-12	1/2" VHS	099.04-05V	16.00
--	----------	------------	--------------

Details the 1964-66 two-person Gemini spaceflights, which provided scientists and astronauts with valuable information and experience. The soft landing of Surveyor I on the Moon in 1966 paved the way for manned lunar landings.

Episode 6: Around the Moon 30 minutes/1983 Level: Grade 7-12	1/2" VHS	099.04-06V	16.00
---	----------	------------	--------------

Details the events of a 1967 preflight test of Apollo spacecraft, during which a fire erupted in the command module, resulting in the death of three astronauts. Because of this tragedy, the Apollo spacecraft was redesigned. In 1968, the Apollo program gained momentum with two unmanned and two manned spaceflights. Apollo 8 astronauts circled the Moon 10 times.

	Format	Item No.	Price
<p>Episode 7: Moon Landing 30 minutes/1983 Level: Grade 7-12</p> <p>Focuses on the first lunar landing in 1969. Describes the steps NASA took to pursue research in aeronautics and satellite technology in the early 1970's.</p>	1/2" VHS	099.04-07V	16.00
<p>Episode 8: More Moon Exploration 30 minutes/1983 Level: Grade 7-12</p> <p>Provides highlights of 1972-73, when Mariner 9 mapped the entire surface of Mars and Pioneer 10 returned the first closeup pictures of Jupiter.</p>	1/2" VHS	099.04-08V	16.00
<p>Episode 9: Transition Years 30 minutes/1983 Level: Grade 7-12</p> <p>Depicts the Apollo-Soyuz mission, which marked the first joint U.S./USSR space mission. Highlights the two Viking spacecraft that landed on Mars to conduct the first extensive search for life on that planet.</p>	1/2" VHS	099.04-09V	16.00
<p>Episode 10: Shuttle Preparation and Planets 30 minutes/1983 Level: Grade 7-12</p> <p>Examines Voyager I and II, as they were launched toward Jupiter and Saturn. Each spacecraft carried a copper record, which was intended to serve as a greeting to other life forms.</p>	1/2" VHS	099.04-10V	16.00
<p>Episode 11: Planetary Discoveries 30 minutes/1983 Level: Grade 7-12</p> <p>Overviews NASA technology during 1979 and 1980. Some of the highlights include Voyager's flyby of Jupiter, Pioneer's flyby of Saturn, the building of the space telescope, preparations for the first Shuttle flight, the reentry of Skylab, the launch of SOLARMAX, and many NASA spinoffs.</p>	1/2" VHS	099.04-11V	16.00
<p>Episode 12: The Shuttle Era 30 minutes/1983 Level: Grade 7-12</p> <p>Presents the first years of the Space Shuttle. With the premier flight of <i>Columbia</i> in April 1981, the era of the reusable space transportation system began. Seven months later, <i>Columbia</i> was spaceborne again. Three more Shuttle flights followed in 1982.</p>	1/2" VHS	099.04-12V	16.00
<p>Episode 13: Space Shuttle Matures 30 minutes/1983 Level: Grade 7-12</p> <p>Covers NASA's 25th year (1983), when the space agency maintained its momentum of achievement. Pioneer 10 became the first artificial object to leave the solar system. <i>Challenger</i>, the second Shuttle in a fleet to eventually number four, embarked on its first flight in April 1983.</p>	1/2" VHS	099.04-13V	16.00

	Format	Item No.	Price
Episode 14: Teacher Silent Video Lesson Guide			
30 minutes/1983	1/2" VHS	099.04-14V	16.00
Level: Adult			

Consists of questions, definitions, and student activities that teachers can use to plan lessons around the "25 Years of Progress" series.

25 Years of Progress

	Format	Item No.	Price
NASA and the Airplane 13-part series condensed onto 4 videocassettes 6 1/2 hours with printed lesson guide	1/2" VHS	099.05 V	60.00

Episode 1: Golden Days of Flight (Paul Garber Interview)

30 minutes/1981
Level: Grade 9-Adult

1/2" VHS

099.05-01V

16.00

Traces the first days of powered flight. Narrated by Paul Garber, an aeronautical pioneer.

Episode 2: America's Wings

30 minutes/1976
Level: Grade 9-Adult

1/2" VHS

099.05-02V

16.00

Discusses aerodynamics and airplane wing design. Presents commentaries from key research personnel whose contributions were historically significant in the development of the modern airplane wing: Igor Sikorsky, who invented the helicopter; James Osborne, whose small suggestion helped make jet transports flyable; Eastman Jacobs, whose wind tunnel work in the 1930's established the shape of airfoils; Adolph Busemann, who thought of the swept wing; Kelly Johnson, who designed 40 airplanes; and Richard Whitcomb, who conceived the idea for the supercritical wing, the "coke-bottle" fuselage, and the winglet.

Episode 3: The 60's Strides Towards the Future

30 minutes/1984
Level: Grade 9-Adult

1/2" VHS

099.05-03V

16.00

Views one of the most progressive decades of the century for aeronautics. Details the use of wind tunnels for research and development.

Episode 4: X-15 Research

30 minutes/1966
Level: Grade 9-Adult

1/2" VHS

099.05-04V

16.00

Examines the remarkable half-plane, half-rocket and includes dramatic photography of flights to the edge of space.

Episode 5: Quieter, Faster and Safer Aircraft

30 minutes/1984
Level: Grade 9-Adult

1/2" VHS

099.05-05V

16.00

Describes NASA projects to reduce jet engine noise, develop planes that can travel faster, and improve aircraft safety.

Episode 6: Hang Gliders, Copters and Underwater Planes

30 minutes/1984
Level: Grade 9 - Adult

1/2" VHS

099.05-06V

16.00

Highlights research to decrease the number of air crashes with dramatic film. Includes land- and sea-based research, as well as airborne experiments.

	Format	Item No.	Price
Episode 7: Flying Machines 30 minutes/1978 Level: Grade 9-Adult	1/2" VHS	099.05-07V	16.00

Examines aviation as it exists today and the technological advances that will impact aviation in the future. The tape briefly describes wind tunnels, powerplants, safety, comfort, economy, and noise abatement. NASA aeronautical research has answered some tough questions and is looking forward to solving current problems innovatively.

Episode 8: Looking Ahead and Back 30 minutes/1984 Level: Grade 9-Adult	1/2" VHS	099.05-08V	16.00
---	----------	------------	--------------

Provides a look at the future and what it may hold for NASA, as well as a look at past accomplishments.

Episode 9: Setting the Stage for the Future 30 minutes/1984 Level: Grade 9-Adult	1/2" VHS	099.05-09V	16.00
---	----------	------------	--------------

Presents several NASA projects scheduled for the duration of the 1980's. Airplane computers and the XV-Tiltrotor are two of the subjects discussed.

Episode 10: Behind the Scenes at the Air & Space Museum 30 minutes/1984 Level: Grade 9-Adult	1/2" VHS	099.05-10V	16.00
---	----------	------------	--------------

Discusses the development of the Smithsonian's National Air and Space Museum in Washington, D.C. Presented by E. T. Wooldridge, Director of Aeronautics at the National Air and Space Museum.

Episode 11: Progress in Aeronautics 30 minutes/1984 Level: Grade 9-Adult	1/2" VHS	099.05-11V	16.00
---	----------	------------	--------------

Examines how NASA works to improve aircraft performance and safety. By using computer technology, physical sciences, testing, and human ingenuity, NASA continues to make aircraft safer, faster, and more economical.

Episode 12: The Ames Research Fleet 30 minutes/1984 Level: Grade 9-Adult	1/2" VHS	099.05-12V	16.00
---	----------	------------	--------------

Describes how various NASA Ames Research Center aircraft are used for research in the fields of astronomy and Earth studies.

Episode 13: Astounded at the Past 30 minutes/1987 Level: Grade 9-Adult	1/2" VHS	099.05-13V	16.00
---	----------	------------	--------------

Provides a montage of aviation research and technology development. Aircraft research has come a long way since the Wright Brothers and Kitty Hawk. Possible advantages in fuel saving and speed may be embodied in future commercial airliners with advanced high-speed propellers and smaller swing-wing aircraft.

	Format	Item No.	Price
Moonwalk 4-part series condensed onto 1 videocassette 2 hours	1/2" VHS	099.06 V	32.00

Produced and Directed by...

Episode 1: The Day Before 30 minutes/1970 Level: Grade 9-Adult	1/2" VHS	099.06-01V	16.00
---	----------	------------	--------------

Highlights the mood of the people during the long-awaited Apollo 11 mission. This unprecedented journey captured the heart of all the world.

Episode 2: Adapting to a Space Environment 30 minutes/1970 Level: Grade 4-Adult	1/2" VHS	099.06-02V	16.00
--	----------	------------	--------------

Examines the testing procedures Apollo operators used to simulate the space environment. Also details the functions of the different stages of the Moon rocket.

Episode 3: One Small Step 30 minutes/1970 Level: Grade 4-Adult	1/2" VHS	099.06-03V	16.00
---	----------	------------	--------------

Focuses on Neil Armstrong's historical first step on the Moon's surface.

Episode 4: The Moon on Earth 30 minutes/1970 Level: Grade 4-Adult	1/2" VHS	099.06-04V	16.00
--	----------	------------	--------------

Examines the research conducted on Moon rocks returned by the Apollo 11 mission. The studies revealed many aspects of the Moon's characteristics.

	Format	Item No.	Price
NASA Biology: On Earth and in Space 14-part series condensed onto 4 videocassettes 7 hours	1/2" VHS	099.07 V	60.00

Episode 1: Life in Space 30 minutes/1987 Level: Grade 10-Adult	1/2" VHS	099.07-01V	16.00
---	----------	------------	--------------

Highlights with Frederick Durant III, former Director of Aeronautics, National Air and Space Museum, the history of spaceflight.

Episode 2: Gravity and Life 30 minutes/1987 Level: Grade 10-Adult	1/2" VHS	099.07-02V	16.00
--	----------	------------	--------------

Presents Dr. Richard Keefe, professor of anatomy, Case Western Reserve University, explaining the role of gravity in the development of life.

Episode 3: Making Medicine in Space 30 minutes/1987 Level: Grade 10-Adult	1/2" VHS	099.07-03V	16.00
--	----------	------------	--------------

Explains how medicine can be made economically in space, with Dr. Charles Walker, Shuttle Payload Specialist, McDonnell Douglas Corporation.

Episode 4: Earth's Air 30 minutes/1987 Level: Grade 10-Adult	1/2" VHS	099.07-04V	16.00
---	----------	------------	--------------

Presents Joel Levine, Langley Research Center, who describes the composition of the Earth's atmosphere and its changes over geologic time, using video imagery.

Episode 5: Earth's Future Climate 30 minutes/1987 Level: Grade 10-Adult	1/2" VHS	099.07-05V	16.00
--	----------	------------	--------------

Presents Dr. James Kasting, Ames Research Center, who discusses Earth's carbon dioxide cycle and its relation to the "greenhouse effect."

Episode 6: Origins of Life on Earth 30 minutes/1987 Level: Grade 10-Adult	1/2" VHS	099.07-06V	16.00
--	----------	------------	--------------

Presents Dr. Antonio Lascano, the University of Mexico, who describes possible origins of life on Earth.

	Format	Item No.	Price
Episode 7: Exobiology 30 minutes/1987 Level: 10-Adult	1/2" VHS	099.07-07V	16.00
Discusses problems human beings may face during long spaceflights, with Dr. Donald DeVincenzi, Chief of Biological Research, NASA Headquarters.			
Episode 8: The Human Machine in Space 30 minutes/1987 Level: Grade 10-Adult	1/2" VHS	099.07-08V	16.00
Presents Dr. James Logan, Chief of the Medical Operations Branch, at Johnson Space Center, who discusses how human organisms function during space travel.			
Episode 9: The Viking Expeditions 30 minutes/1987 Level: Grade 10-Adult	1/2" VHS	099.07-09V	16.00
Describes unmanned missions to Mars and search for life, with Dr. Gerald Soffen, Goddard Space Flight Center.			
Episode 10: The Mars Panel Discussion, Part I 30 minutes/1987 Level: Grade 10-Adult	1/2" VHS	099.07-10V	16.00
Presents Dr. Carl Sagan moderating a discussion by five space research scientists on future exploration of Mars.			
Episode 11: The Mars Panel Discussion, Part II 30 minutes/1987 Level: Grade 10-Adult	1/2" VHS	099.07-11V	16.00
Presents Dr. Carl Sagan moderating a discussion by five space research scientists on future exploration of Mars.			
Episode 12: In Search of Extraterrestrial Intelligence (Dr. Seeger's View) 30 minutes/1987 Level: Grade 10-Adult	1/2" VHS	099.07-12V	16.00
Describes NASA's program for listening to radio signals from space in search of extraterrestrial intelligence, with Dr. Charles L. Seeger, professor of physics and astronomy, San Francisco State University.			
Episode 13: Planning for the Future 30 minutes/1987 Level: Grade 10-Adult	1/2" VHS	099.07-13V	16.00
Presents Jesco Von Putkamer, NASA Headquarters, who discusses the humanistic and intellectual benefits of space exploration. Focuses on NASA's plans for a permanent, manned space station.			
Episode 14: Space Policy 30 minutes/1987 Level: Grade 10-Adult	1/2" VHS	099.07-14V	16.00
Presents Dr. John Logsdon, Director of Graduate Programs in Science, Technology and Public Policy at George Washington University, discussing space policy and its importance.			

	Format	Item No.	Price
Mission EarthBound Videoconference Series			
6-part series condensed onto 3 videocassettes 6 hours with printed lesson guide	1/2" VHS	099.11 V	60.00

Offers distance-learning programming designed for participants to upgrade content knowledge and instructional skills through an Earth system science investigation relating human influence to global climate change. Serves as both student enrichment and staff development. Through animated vignettes, participants are introduced to the planet Earth and the Earth system from the perspective of two alien students—Baryon and Hadron—on the ultimate science field trip. Viewers accompany Baryon and Hadron in their exploration of specific aspects of global environmental change. In addition, Dr. Joel Levine, a NASA atmospheric science expert, offers viewers additional insight into global change issues engaging in dialog with both studio audiences and telephone viewers.

Episode 1: Mission EarthBound

Introduces the notion of global change, defines the term "atmosphere," and provides the foundation for deeper investigation in the remaining programs of the series.

Episode 2: Earth's Atmosphere: A Cosmic Perspective

Explores the origin, evolution, and resulting composition and dynamics of Earth's unique atmosphere. Includes contrasts and comparisons with atmospheres that have developed on the other planets of our solar system.

Episode 3: Atmospheric Ozone: What Is It and What Is Happening to It?

Describes the function and significance of ozone in safeguarding life on our planetary home. Models the interactions, both natural and human-induced, that result in the creation and destruction of atmospheric ozone.

Episode 4: Climate Systems/Climate Modeling

Examines the complex web of interacting variables that give rise to what is known as "climate." Includes historical trends and predictions of future temperatures and sea levels.

Episode 5: Green House Gasses/Climate Change

Investigates the origin and role of greenhouse gases that generate the Earth-warming greenhouse effect. Includes computer database modeling and the upbeat "Global Challenge" music video.

Episode 6: Challenges/Solutions to Global Atmospheric Change

Briefly summarizes content provided in programs one through five and addresses the impact on global change of political, social, and economic action and education from a worldwide perspective.

	Format	Item No.	Price
Space Age Series 6-part series packaged as a 6-piece set 6 hours with printed lesson guide	1/2" VHS	099.12 V	100.00

Shows that space is no longer a new frontier; is a vital part of our world. Takes a close-up view of that new world and tells the story of how it has changed our lives. From the dream-driven hopes of the early rocket pioneers to the far future, this series documents the latest advances in the age-old quest to go further, see deeper, and find out more. State-of-the-art special effects, "pre-creations" of future space missions, and worldwide location filming give each fascinating program an eye-opening view of the way space exploration has revolutionized how we see ourselves, our planet, and the universe beyond. As seen on PBS. Copyrighted by Public Media Video.

Episode 1: Quest for Planet Mars

Explore the possibilities on a fascinating voyage to Earth's haunting neighbor. Uncovers the unexpected dangers we would face on an extended journey to Mars, and shows researchers at work right now on the nuclear propulsion system that may power the first expeditions. We have always found the Red Planet fascinating—a mythic place of mystery and adventure. In the future, its exploration may turn out to be more than we bargained for. Is it truly a barren wasteland, or does it harbor yet unimagined life forms? Could it hold the clues to the origin of life and even to the early history of our own planet?

Episode 2: Celestial Sentinels

Shows how satellites have actually kept the peace and how new, nonmilitary uses may help developing nations move into the 21st century. Persian Gulf War reconnaissance, global navigation, and international communications instantly are all the work of the satellites that fill the skies above us. They have already drawn the world together. What new tasks will they undertake? Will the United States hold its technological edge as more nations vie for a piece of the sky? Will satellites help reverse the global destruction we have done?

Episode 3: The Unexpected Universe

Shows that for years telescopes offered us one very serene view of the heavens, but when scientists began using rockets to rise above the Earth's atmosphere, our perceptions were shattered. What we saw was astonishing: collision galaxies, exploding stars, and a universe that was unimaginably violent and chaotic. For the first time, we also caught a glimpse of just how large the universe is. As our vision improved, our imagination has soared. At last our minds have reached far enough to contemplate the Earth's fiery origin and, possibly, its fate.

Episode 4: To the Moon and Beyond

Helps us blast off where the Apollo missions ended and explore where humankind's "one giant leap" could take us next. Our first trip to the Moon was as a Cold War competitor in the space race. Now we are considering it as a place to colonize in peace, our minds captured by the potential of another world. Will we go back and reclaim it—developing outposts and then whole cities? How can we use the "stuff" of the Moon to build shelter, provide air and water, and even provide the energy to support those who might eventually live there?

Episode 5: Mission to Planet Earth

Presents scientists as they chart a course for a healthy planet and reveal our world in ways that were never possible before the space age. On the way to the Moon, we discovered another world: our own. The photo of Earth from space—perhaps the most important of the 20th century—began the transformation of humankind's understanding of Earth as a living system. Now the technology developed to explore other planets is being used to monitor this living system. How will satellites merged with powerful computers help peer into the future to help predict global temperature and changes in the cycles of life?

Episode 6: What's a Heaven For?

Delves into the fascinating question, So what is space really for?, and helps us learn where the space age is taking us. When military aims inspired the first rockets, did anyone foresee that the space race would give way to peaceful collaboration? How did telecommunications advances hasten the breakup of the Soviet Union? From *Sputnik* and Gagarin to *Challenger* and "Star Wars," space exploration has contributed to international political change, including helping to bring about the end of the Cold War. Today, the space age has entered an era of new motivations and challenges. Satellites might even be used to help developing countries.

	Format	Item No.	Price
Live From Antarctica Videoconference			
Purchase as a 4-part set on 2 videocassettes	1/2" VHS	099.13 V	40.00
Level: Grade 6-12	4 hours		

Tape 1**Program #1: The Coldest, Windiest, Iciest Place on Earth**

60 minutes

099.13-01V

21.00

Broadcast December 13, 1994

Introduces and explores the geology, climate, location, scale, and history of the coldest, windiest, highest continent on Earth; one with 70 percent of all the world's fresh water, 90 percent of Earth's ice, and regions drier than the Gobi Desert. Antarctica plays a crucial role in global climate and holds clues to our planet's future. And while today it seems locked into its icy identity, it was once very different, a reminder of how drastic planetary climate changes can be. In this program, students will learn how and why Antarctica has changed over time, how ancient continents formed and broke up, and what Antarctica can reveal about Earth today and in the future.

Program #2: Life in Antarctica, Then and Now

60 minutes

Broadcast December 15, 1994

Shows that as Antarctica changed from a tropical forest, its plants and creatures evolved and adapted or died out. David Harwood and his team go fossil hunting in the Transantarctic Mountains, the site of the most spectacular scenery on the continent. Looks at one of the most interesting contemporary Antarctic life forms, the Emperor penguin, with expert Gerry Kooyman, and in McMurdo's aquarium one particularly unique adaptation—fish with organic antifreeze! Explores one of Antarctica's most unusual areas, the Dry Valleys, where life survives inside rocks or at the bottom of lakes that are perpetually covered by ice. Diane Freckman of biologist Robert Wharton's Long-Term Ecological Research project shows us the ongoing environmental survey under way in the Dry Valleys, as well as what researchers hope to learn through careful observation over many years.

Tape 2**Program #3: Spaceship South Pole**

60 minutes

099.13-02V

21.00

Broadcast January 10, 1995

Shows that surviving at the South Pole is about as good an analogy for living and working in space as can be found anywhere on Earth. The video crew spent the holidays at America's Amundsen-Scott South Pole Station. Students, of course, know what the holiday is like at the North Pole, but this will be a revealing and realistic look at the other end of the planet! Shows what the 150 or so scientists and support staff in residence wake up to on December 24, as well as everyday life and work in some of the most extreme conditions anywhere on Earth. The National Science Foundation (NSF) has begun a total redesign of the South Pole Station, to make it safer, more energy-efficient, and better equipped with telecommunications tools to upgrade support for science. Reveals why the new living modules are raised high on stilts and why all other buildings will be situated "under ice." NASA is collaborating with NSF to make the new station far more self-sufficient in food and water, including ideas for an edible "park"!

Program #4: From Pole to Planet

60 minutes

Broadcast January 19, 1995

Proves that Antarctica is a place to not only study the history of our universe, as shown in Program #3, but also to consider the future of our home planet. Governed by international treaty and dedicated to peaceful scientific research, Antarctica is a unique resource for all Earth's people—a "canary in the mine shaft" that can alert us to the consequences of actions that may impact the global climate system. What are we learning from studies of the West Antarctic ice sheet? If climate change is driven to extremes, will the Antarctic ice caps start to melt and flood Earth's coastal cities? Shows what life is like at a 55-person deep field camp, where ice-drilling and seismic testing probe what lies beneath the surface. Flying in specially equipped aircraft, scientists try to determine whether volcanic heat drives the ice streams.

Format	Item No.	Price
Live From the Stratosphere Videoconference Level: Grade 6–12 Teacher's guide with activities	099.14 P	10.00

Tape 1: Science in the Stratosphere 30 minutes Broadcast September 19, 1995	099.14-01V	10.00
--	------------	--------------

Serves primarily as a teacher resource tape. Includes an introduction to the Kuiper Airborne Observatory (KAO), airborne astronomy, and the electromagnetic spectrum. Demonstrates hands-on activities found in the teacher's guide and information on on-line resources and how to access them.

Tape 2: The Pre-Flight Briefing 60 minutes Broadcast October 5, 1995	099.14-02V	16.00
---	------------	--------------

Offers a tour of the aircraft and shows how the telescope is mounted and how it operates. Describes where the KAO will fly and how students can plot its path. This live program originates from the hangar at NASA Ames Research Center, the KAO's home base, and includes live interaction from around the country by phone, fax, and e-mail.

Tape 3: The Jupiter Mission 150 minutes (on two tapes) Broadcast October 12, 1995	099.14-03V	21.00
--	------------	--------------

Allows the viewer to join the KAO in flight for observations of Jupiter and its moons. Live video uplinks feature on-camera interactions with astronomers, crew, teacher, and student on board the KAO. Includes demonstrations of hands-on activities relating to the KAO mission and on-line collaborations over the Internet with other live sites. The KAO will land in Houston just before 5:00 p.m. Eastern.

Tape 4: Night Flight to the Stars 300 minutes (on four tapes) Broadcast October 13, 1995	099.14-04V	36.00
---	------------	--------------

Explores the life cycle of the stars, studying the planet Saturn and its giant moon, Titan. Students control the airborne telescope remotely, over the Internet, in a demonstration of "telescience." Live pictures transmitted over the Internet from an observatory provide ground-based comparison images for some of the objects seen by the KAO in infrared. The KAO will land at NASA Ames, concluding the "Live From the Stratosphere" observing flights and the first ever interactive television project involving an aircraft in flight.

Tape 5: Return to the Stratosphere 60 minutes Broadcast October 31, 1995	099.14-05V	16.00
---	------------	--------------

Serves as a compilation of all the previous programming to provide a resource for teachers whose classes were unable to participate in the live events. The program also indicates the continuing availability of on-line materials and suggests ways to integrate print, video, and on-line materials to engage student interest.

	Format	Item No.	Price
Live From the Hubble Space Telescope Videoconference			
Visit their World Wide Web Site at http://quest.arc.nasa.gov/livefrom/hst.html			
Teacher's guide with activities		099.15 P	10.00

INDIVIDUAL TAPES

Tape 1: The Great Planet Debate

30 minutes		099.15-01V	10.00
Broadcast November 9, 1995			

Introduces the entire project and announces the on-line discussion that led to a December 1995 consensus decision about which planets to observe. The four astronomers who served as "planet advocates" for the on-line debate each presented reasons for using three Hubble orbits for "their" planet and summarized key scientific goals that could be achieved.

Tape 2: Making Your Observations

60 minutes		099.15-02V	16.00
Broadcast March 14, 1996			

Offers a live interactive telecast, linking students to the Space Telescope Science Institute to witness the acquisition of their data. Climaxes with a live "first look" at the original astronomical data acquired as a result of the "Passport to Knowledge" observations.

Tape 3: Announcing Your Results

60 minutes		099.15-03V	16.00
Broadcast April 23, 1996			

Interactively enables students to interpret and understand their observations, enhanced by image processing.

Skylab Science Demonstration 6-part series condensed onto 1 videocassette 1 1/2 hours	1/2" VHS	099.91 V	32.00

Covers the world's first laboratory in space. During the summer of 1973, astronauts Alan Bean, Jack Lowsna, and Dr. Owen Garriott spent almost 2 months aboard the Skylab spacecraft. During this mission, Dr. Garriott conducted a number of science experiments specifically intended for high school science students. The programs highlight these experiments and are accompanied by a printed teacher's guide.

Episode 1: Zero-G 17 minutes/1974 Level: Grade 9-Adult	1/2" VHS	099.91-01V	15.00
---	----------	------------	--------------

Provides an introduction to the Skylab environment, a laboratory above the Earth's atmosphere, effectively free from the Earth's gravitational field. Dr. Garriott briefly explains the dynamics of Earth orbit and the meaning of zero-gravity (weightlessness) and shows brief demonstrations of phenomena that can be observed only in zero-gravity.

Episode 2: Conservation Laws in Zero-G 17 minutes/1974 Level: Grade 9-Adult	1/2" VHS	099.91-02V	15.00
--	----------	------------	--------------

Demonstrates the concept of angular momentum conservation from the zero-gravity environment of the orbiting Skylab space station. Illustrations in space are related to more familiar examples on Earth. Also shows how the spinning motion of a satellite changes to tumbling by dissipation of rotational energy while angular momentum is conserved.

Episode 3: Fluids in Weightlessness 15 minutes/1974 Level: Grade 9-Adult	1/2" VHS	099.91-03V	15.00
---	----------	------------	--------------

Explores numerous fluid phenomena in orbit, including surface tension, cohesion, adhesion, and instability. Demonstrates how collisions and splittings of liquid drops in orbital zero-gravity can model systems ranging in size from an atomic nucleus to a galaxy.

Episode 4: Gyroscopes in Space 17 minutes/1974 Level: Grade 9-Adult	1/2" VHS	099.91-04V	15.00
--	----------	------------	--------------

Uses gyroscope demonstrations in the zero-gravity Skylab orbit to explain both the principles and applications of gyroscopes on Earth. The fascinating motion of gyroscopes is useful in everyday life and essential to aviation and space travel.

Episode 5: Magnetism in Space 20 minutes/1975 Level: Grade 9-Adult	1/2" VHS	099.91-05V	16.00
---	----------	------------	--------------

Opens with a montage of spectacular views of Skylab in orbit. Reviews familiar aspects of magnetism, touches lightly on its history, and explores the striking behavior of magnets in weightlessness.

	Format	Item No.	Price
Episode 6: Magnetic Effects in Space			
16 minutes/1974	1/2" VHS	099.91-06V	15.00
Level: Grade 9-Adult			

Demonstrates the effect of the Earth's magnetic field on small bar magnets Dr. Owen Garriott carried up in Skylab. He explains the tendency of magnets to line up with the Earth's magnetic field and shows the oscillating motions of magnets in various combinations and positions. Additionally, several demonstrations are performed with a nut spinning in space.

	Format	Item No.	Price
Starfinder Series			
30-part series condensed onto 4 videocassettes 7 1/2 hours with printed lesson guide Level: Grade 6-10	1/2" VHS	099.93 V	65.00

Complements existing physics and Earth science curricula and relates Hubble Space Telescope discoveries and science concepts in a timely and interesting fashion. The Maryland Department of Education, in cooperation with the Space Telescope Science Institute at Baltimore's John Hopkins University, has produced this 30-part video series to provide students with new insights into the size, formation, and make-up of the universe. Includes a 90-page teacher's guide.

Tape 1

- Program 1: Making Sense of Data
- Program 2: Pictures From Numbers
- Program 3: Why a Space Telescope?
- Program 4: The Expanding Universe
- Program 5: Laws of Motion
- Program 6: How Big Is the Universe?
- Program 7: Gravity in Space
- Program 8: Orbital Motion

Tape 3

- Program 17: The Hubble Instruments
- Program 18: Density of Matter
- Program 19: Ancient Astronomers
- Program 20: The Constellations
- Program 21: Using the Celestial Sphere
- Program 22: Magnetic Fields
- Program 23: Electromagnetic Radiation
- Program 24: Fingerprints of Light

Tape 2

- Program 9: Gravity and Weight
- Program 10: Fusion Energy
- Program 11: Evolution of a Star
- Program 12: Tapping the Sun's Power
- Program 13: Energy Transfer
- Program 14: Rotational Energy
- Program 15: The Nature of Light
- Program 16: Earthbound Telescopes

Tape 4

- Program 25: Solar System, Part I
- Program 26: Solar System, Part II
- Program 27: Conservation: Energy and Matter
- Program 28: Pulsars and Quasars
- Program 29: Diffraction
- Program 30: Cosmology

Project Mathematics! Series			
8-part series condensed onto 3 videocassettes 4 hours with printed lesson guide	1/2" VHS	099.94 V	48.00
	8 Booklet Set	7099.94 P	31.50

There videotapes and program guides are also listed individually on pages 41-43 under "Mathematics/Physics," with brief descriptions of each title. The printed lesson guides can be purchased as a set. Copyrighted by and reproduced with permission of the California Institute of Technology.

Episode 1: The Theorem of Pythagoras

20 minutes/1988 Level: Grade 9-12	1/2" VHS	012.0-01V	16.00
--------------------------------------	----------	-----------	--------------

Episode 2: The Story of Pi

25 minutes/1990 Level: Grade 9-12	1/2" VHS	012.0-02V	16.00
--------------------------------------	----------	-----------	--------------

Episode 3: Similarity

25 minutes/1990 Level: Grade 9-12	1/2" VHS	012.0-03V	16.00
--------------------------------------	----------	-----------	--------------

Episode 4: Polynomials

25 minutes/1991 Level: Grade 9-12	1/2" VHS	012.0-04V	16.00
--------------------------------------	----------	-----------	--------------

Episode 5: Sines and Cosines, Part I

28 minutes/1992 Level: Grade 9-12	1/2" VHS	012.0-05V	16.00
--------------------------------------	----------	-----------	--------------

Episode 6: Sines and Cosines, Part II

30 minutes/1993 Level: Grade 9-12	1/2" VHS	012.0-06V	16.00
--------------------------------------	----------	-----------	--------------

Episode 7: Sines and Cosines, Part III

30 minutes/1994 Level: Grade 9-12	1/2" VHS	012.0-07V	16.00
--------------------------------------	----------	-----------	--------------

Episode 8: The Tunnel of Samos

30 minutes/1994 Level: Grade 9-12	1/2" VHS	012.0-08V	16.00
--------------------------------------	----------	-----------	--------------

	Format	Item No.	Price
Liftoff to Learning 13-part series condensed onto 2 videocassettes 4 hours with printed lesson guide	1/2" VHS	099.95 V	48.00

Shows that every liftoff of the Space Shuttle is the beginning of a voyage of exploration and discovery. The experiences of Shuttle astronauts captures the imagination of students of all ages. Students study science, mathematics, and technology with crew members aboard Space Shuttle flights. Space becomes the departure point for learning, integrating many other subject areas, bringing them to life. Recognizing the potential of the Space Shuttle experience in the classroom, NASA's Education Division and the Johnson Space Center's Flight Crew Operations Directorate have joined forces to create a dynamic videotape series to support teachers in the classroom. The series captures the excitement of spaceflight and explains, in basic and practical terms, the scientific, mathematical, and technologic concepts that make spaceflight possible. These learning tools also provide concrete examples of the global perspective space flight offers and the new frontiers of research and exploration spaceflight has created. Taking advantage of state-of-the-art video production facilities and computer animation capabilities of NASA's Johnson Space Center, these programs combine the stunning visual images of spaceflight with clear and entertaining graphics. They may be purchased as a complete set condensed onto two tapes or individually as listed below.

Episode 1: Space Basics

21 minutes/1991

1/2" VHS

007.6-25V

16.00

Level: Grade 5-8

Application: History, Physical Science, Technology

Shows the astronauts aboard mission STS-41 using computer graphics and visual demonstration to answer four basic questions about spaceflight: How do spacecraft travel into space? How do spacecraft remain in orbit? Why do astronauts float in space? How do spacecraft return to Earth? Viewers learn how English scientist Isaac Newton formulated the basic science behind Earth orbit more than 300 years ago.

Episode 2: Go for EVA

14 minutes/1991

1/2" VHS

007.6-26V

15.00

Level: Grade K-8

Application: Life Sciences, Physical Science, Technology, History, Social Studies

Presents the astronauts aboard mission STS-37 discussing the reasons for wearing spacesuits during spacewalking missions, how spacesuits work, and what kinds of jobs astronauts perform while spacewalking. Actual footage of spacewalks—also known as Extravehicular Activities (EVA's)—illustrates how spacesuits allow astronauts to operate scientific apparatus, assemble equipment and structures, pilot the Manned Maneuvering Unit, take pictures, and service satellites and space hardware.

Episode 3: Newton in Space

13 minutes/1992

1/2" VHS

007.6-27V

15.00

Level: Grade 5-8

Application: Physical Science

Shows the astronauts on orbit during mission STS-39 demonstrating the importance of Newton's Laws of Motion to spaceflight. The program explains the difference between weight and mass, the basic principles of balanced and unbalanced forces, action and opposite reactions, and how the three laws of motions affect the way a rocket operates. Using the microgravity environment of Earth orbit, Space Shuttle astronauts conduct simple force and motion demonstrations in ways not possible on Earth.

	Format	Item No.	Price
Episode 4: All Systems Go			
34 minutes/1992	1/2" VHS	006.3-11V	16.00
Level: Grade 5-12			
Application: Biology, Life Sciences			

Presents the astronauts on orbit during the Spacelab Life Sciences mission discussing some of the physiological changes that occur in the human body while in a microgravity environment and attempts to answer important questions on how the body readapts to Earth's environment. The videotape shows research conducted aboard the Space Shuttle on six systems that examine the heart, lungs, blood, muscles, cells, and the immune system, among others. This program is segmented, enabling teachers to extract topics that are most relevant to current classroom studies.

Episode 5: The Atmosphere Below			
16 minutes/1992	1/2" VHS	002.2-14V	15.00
Level: Grade 5-12			
Application: Earth Sciences			

Shows that changes in Earth's atmosphere are investigated from outer space on board the Shuttle using the Atmospheric Laboratory for Applications and Science (ATLAS 1). Space Shuttle astronauts explain the questions scientists hope can be answered by studying Earth's atmosphere from space. Experiments discussed in this videotape focus on infrared detection of atmospheric remnants from volcanic eruptions, ozone concentration levels, and incoming solar ultraviolet radiation with respect to global warming, among others.

Episode 6: Voyage of Endeavour—Then & Now			
20 minutes/1992	1/2" VHS	008.0-08V	16.00
Level: Grade 5-12			
Application: History, Social Studies, Technology			

Captures the excitement of the maiden flight of NASA's Space Shuttle *Endeavour* and contrasts it with its namesake, the 17th century research sailing vessel commanded by James Cook. Students will experience *Endeavour's* historic rescue of the stranded INTELSAT VI satellite and the first three-person extravehicular activity. Cook's voyage provides an apt parallel: charting unexplored land and waters in the South Pacific, New Zealand, and Australia and using scientists and artists to collect data on plants, wildlife, and native peoples. Orbital scenes were taken during the STS-49 mission in May 1992.

Episode 7: Toys in Space II			
37 minutes/1993	1/2" VHS	006.3-14V	16.00
Level: Grade K-12			
Application: Mathematics, Physical Science, Technology			

Provides a hands-on way for students to investigate the principles of mathematics and science that make many common toys function. The Space Shuttle crew invite students to experiment with similar toys in their classroom and hypothesize how these same toys will operate in microgravity. Scenes of the STS-54 astronauts operating the toys in space serve as data for students to confirm or reject their hypotheses.

Episode 8: Living in Space			
10 minutes/1994	1/2" VHS	006.3-15V	10.00
Level: Grade K-4			
Application: Life Sciences, Physical Science			

Demonstrates what it is like to live and work in space. Viewers are invited by the Space Shuttle crew to join the astronauts as they go through their daily routine living on board the Space Shuttle. Students see the similarities and differences in eating, exercising, relaxing, maintaining personal hygiene, sleeping, and working in space versus on Earth. Orbital scenes were taken during the STS-56 mission.

	Format	Item No.	Price
Episode 9: From Undersea to Outer Space			
15 minutes/1994	1/2" VHS	003.1-02V	15.00
Level: Grade 5-8			
Application: Life Sciences			

Tells the story of a life sciences experiment conducted on the first Spacelab Life Sciences mission flown on the Space Shuttle. More than 2,000 jellyfish were sent in space to learn about how living things adapt to the microgravity environment of Earth orbit. Scientists examined how microgravity affects the development of young jellyfish, especially their gravity receptors. The gravity receptors of jellyfish serve a purpose similar to the inner ear of human beings for balance and orientation.

Episode 10: Tethered Satellite: A Videotape for Physics and Physical Science			
Level: Grade 9-12	1/2" VHS	012.0-21V	16.00
Application: Physical Science			

Part I: Tethered Satellite: Forces and Motion
22 minutes/1995

Describes the tethered satellite concept and shows how the satellite is deployed and extended in space. The mathematics describing the forces acting on the tethered satellite/Space Shuttle orbiter system is presented.

Part II: Electrical Circuits in Space: The Electrodynamics of the Tethered Satellite
19 minutes/1997

Demonstrates how the tethered satellite and the Space Shuttle orbiter interact with Earth's magnetic field to produce an electric current. Future applications of the tethered satellite/Space Shuttle orbiter system as a motor are described.

Episode 11: Assignment Spacelab			
17 minutes/1995	1/2" VHS	003.1-03V	15.00
Level: Grade 5-12			
Application: Life Sciences, Physical Science			

Shows how the unique microgravity environment of Earth orbit is used for scientific experiments and how the rules of scientific experimentation and safety that apply to research on Earth also apply to astronauts in space. On-orbit scenes were taken during the STS-58 mission of *Columbia*.

Episode 12: Microgravity			
24 minutes/1996	1/2" VHS	012.0-22V	16.00
Level: Grade 5-12			
Application: Physical Science			

Focuses on four scientific disciplines in microgravity studies: fluid physics, materials science, biotechnology, and combustion. Experiments within these disciplines explore how the effects of buoyancy-driven convection and sedimentation, seen in ground-based laboratories, are diminished in space, allowing scientists to expand their knowledge in these areas. "Microgravity" describes the restrictions that gravity imposes on scientific experimentation and how they can be greatly reduced in the exciting research environment of the Space Shuttle and later on in the International Space Station.

	Format	Item No.	Price
Episode 13: Geography From Space			
15 minutes/1997	1/2" VHS	008.0-09V	15.00
Level: Grade K-8			
Application: Earth and Space Science, Life Science in Personal and Social Perspectives			

Takes the viewer on a rapid tour of Earth's surface as seen from outer space. After explaining how the altitude of the viewer affects the amount of Earth's surface seen at one time, the video moves into a travelog on some of the interesting features of Earth's continents as seen from space. Because the inclination of the Space Shuttle's orbit to Earth's equator did not carry the crew over Antarctica or the Arctic, these are not visited in the program.

What's in the News—Space

12-part series condensed onto 3 videocassettes 1/2" VHS 099.96 V 48.00
3 hours with printed lesson guide
Level: Grade 4-Adult/1993

Offers 12 15-minute programs on space sciences and exploration that weave stunning NASA videos, demonstrations of scientific principles, and interviews with space scientists. Produced and copyrighted by WPSX-TV, Penn State's College of Education and the Pennsylvania Space Grant Consortium. Not for international or commercial distribution. Includes a comprehensive teacher's guide.

Episode 1: Introduction

Chronicles the history and milestones of flight and rocketry from the myth of Icarus to the building of an international space station.

Episode 2: Eyes on the Sky—Astronomy

Focuses on people's fascination with the universe and their study of it, from stargazing with the unaided eye to scientific exploration using the Hubble Space Telescope.

Episode 3: Gravity—A Force of Nature

Explains the concept of universal gravity, microgravity, and weightlessness using examples from Earth, such as a roller coaster, and from space, such as Skylab and Space Shuttle acrobatics.

Episode 4: Space Shuttle—Blast Off to the Future

Looks at the Space Shuttle in detail: its design and compartments, how it is fueled, and how it stays in orbit around the Earth.

Episode 5: Teamwork in Space

From astronaut to engineer to scientist, looks at the numerous people involved in the launching of a spaceship and the completion of a successful mission.

Episode 6: Spaceship Earth

Explains and compares natural and artificial ecosystems using the ocean and extravehicular mobility unit (spacesuit) as its two main examples. Includes a piece-by-piece examination of a spacesuit with a spacesuit technician.

Episode 7: Living in Space

Examines the physiological changes to the body in space, such as a shift in body fluids and the loss of calcium. Also looks at changes in everyday living, including washing, sleeping, eating, and going to the bathroom.

Format

Item No.

Price

Episode 8: Working in Space

Examines the effect of microgravity on astronauts' ability to work in space. Looks at important engineering designs from foothold inside the Space Shuttle to the mobile Manned Maneuvering Unit. Examines astronaut training on Earth, including tasks performed in a huge tank of water.

Episode 9: Eyes in the Sky—Communications Satellites

Looks at the ability of satellites to help us communicate with each other faster and over longer distances. Traces the path of a satellite signal from a ground station on Earth to an orbiting communications satellite in space and back down to a receiving station on Earth.

Episode 10: Eyes in the Sky—Landsurvey Satellites

Explains what a landsurvey satellite is and its ability to "see" changes in the Earth's geography over time, such as rainforest destruction and population growth. The main scientific concepts included are electromagnetic radiation and atmospheric absorption and reflection of radiation. The career focus segment features a geographer.

Episode 11: Eyes in the Sky—Weather Satellites

Looks at the changes in weather forecasting caused by advancements in satellite technology from the early TIROS I satellite to the most modern. Includes a brief look at weather on other planets.

Episode 12: Space Exploration—The Next Frontier

Summarizes the most important ideas and scientific concepts from the preceding 11 programs and challenges students to dream about new possibilities in exploration.

	Format	Item No.	Price
The Night Sky Series 8-part series condensed onto 1 videocassette 2 hours Level: Grade 6-12/1993	1/2" VHS	099.97 V	32.00

Produced at NASA's Jet Propulsion Laboratory (JPL) and hosted by David Seidel of the JPL Public Education Office, describes astronomy and space science topics, including the visibility of astronomical events, planets, stars and constellations, eclipses, observing tips, computer software, spacecraft missions, and special events. The program, produced and directed by John Stealey of the JPL Audio Visual Services Office, is produced weekly when Space Shuttle missions do not conflict, and it can be seen on NASA TV.

Episode 1: Types of Telescopes

Shows and explains refractors, binoculars, and the Newtonian, Cassegrain, and Schmidt Cassegrain telescopes.

Episode 2: A Binocular Tour Through the Night Sky

Discusses the operating principles of binoculars and the types of objects that can be viewed. Shows the planets and constellations for the week of July 12-18, 1993.

Episode 3: Observing the Night Sky

Shows "star parties" and night sky observing materials, such as star charts, from the Stoney Ridge Observatory in the southern California mountains.

Episode 4: A Conversation With John Dobson

Presents the inventor of the "Dobsonian" low-cost telescope and founder of the San Francisco Sidewalk Astronomers discussing his work to popularize astronomy.

Episode 5: Phases and Craters of the Moon

Discusses phases of the Moon and shows a simple classroom demonstration to accurately simulate phases. Another demonstration, that can be easily duplicated, illustrates impact cratering.

Episode 6: Meteors and Asteroids

Previews the 1993 Perseid meteor shower, including viewing tips and how to photograph the event. Because the Perseid meteor shower occurs annually, most of this information will be useful for years. A preview of the Galileo spacecraft encounter of the asteroid Ida is also discussed.

Episode 7: The Night Sky

Shows the stars, planets, and constellations for August 1993.

Episode 8: Total Lunar Eclipse

Presents detailed information about lunar eclipses in general and the November 1993 eclipse in particular.

	Format	Item No.	Price
The Biology and Space Exploration Video Series			
6-part series condensed onto 1 videocassette 2 hours Level: Undergraduate and Graduate Students	1/2" VHS	099.98 V	32.00

Highlights selected aspects of life sciences and contains spaceflight footage, graphics, charts, pictures, and interviews to make the materials interesting and intelligible to viewers. This video series is part of a joint effort of NASA Ames Research Center scientists to increase public awareness and understanding of life sciences in space.

Episode 1: The Origin and Early Evolution of Life			
21 minutes/1995	1/2" VHS	003.1-04V	16.00

Explores Earth's early stages of existence and the theories proposed to explain the evolution of life on Earth.

Episode 2: SETI: The Search for Extraterrestrial Intelligence			
21 minutes/1996	1/2" VHS	003.1-05V	16.00

Examines how present-day technology is used to seek evidence of intelligent life elsewhere in the universe.

Episode 3: The Cardiovascular System in Space			
18 minutes/1994	1/2" VHS	003.1-06V	16.00

Provides a detailed account of the effects of gravity on the human circulatory system. Discusses how the loss of gravity-induced blood pressure gradients led to medical problems associated with headward edema, reduced blood volume, and postflight orthostatic intolerance.

Episode 4: The Musculoskeletal System in Space			
21 minutes/1995	1/2" VHS	003.1-07V	16.00

Discusses changes that occur in our musculoskeletal system in the absence of weight-bearing, as well as the countermeasures that can be developed to reduce muscle atrophy, bone loss and back pain in space.

Episode 5: Group Interactions and Crew Performance			
23 minutes/1996	1/2" VHS	003.1-08V	16.00

Elaborates on group cohesion, open communication and overall well-being among crew members. Furthermore, shows how Earth analogs can be used as models to study the psychological effects of long-term confinement.

Episode 6: Life Support Systems in Space			
12 minutes/1995	1/2" VHS	003.1-09V	15.00

Outlines the potential hazards faced by astronauts on space missions and describes the equipment required for survival in environments hostile to life.

Slide Programs

	Item No.	Price
<p>Aeronautics: A History of Flight 46 slides with audio cassette Level: Grade 7–12</p> <p>Views flight from the earliest ideas to the latest airplanes. Chronicles aviation from ancient Chinese kites to the modern airplane.</p>	100.0-01	13.00
<p>Aeronautics: Principles of Flight 70 slides with audio cassette Level: Grade 7–12</p> <p>Explains aerodynamics in detail.</p>	100.0-02	18.50
<p>Human Space Flight: Living in Space 37 slides with audio cassette Level: Grade 4–12</p> <p>Explain how astronauts live and work in the Space Shuttle environment.</p>	100.0-03	11.00
<p>Human Space Flight: A History 78 slides with audio cassette Level: Grade 7–Adult</p> <p>Chronicles human spaceflight with emphasis on the lunar missions.</p>	100.0-05	21.00
<p>Propulsion: Principles of Rocketry 40 slides with audio cassette Level: Grade 7–12</p> <p>Explains a rocket propulsion system.</p>	100.0-06	11.50
<p>Propulsion: Launch Vehicles 53 slides with audio cassette Level: Grade 7–12</p> <p>Looks at past and present rockets used as launch vehicles.</p>	100.0-07	14.50
<p>Propulsion: Space Shuttle 48 slides with audio cassette Level: Grade 4–12</p> <p>Highlights the NASA Space Transportation System, its functions, and possible uses for the future.</p>	100.0-08	13.50
<p>Space Exploration: The Solar System 60 slides with audio cassette Level: Grade 5–12</p> <p>Analyzes information discovered about the planets.</p>	100.0-09	16.00
<p>Space Exploration: Communications Using Spacecraft 80 slides with audio cassette Level: Grade 9–12</p> <p>Focuses on communications satellites and how they benefit business, government, and the public.</p>	100.0-12	21.00

	Item No.	Price
<p>*America in Space: The First 25 Years 40 slides with audio cassette Level: Grade 4-12</p>	100.0-14	11.50
<p>Details America's long string of successful space accomplishments, including the Apollo 11 moon landing, the Voyager missions, and the Space Shuttle program.</p>		
<p>*Moon Landing—Apollo 11 40 slides with audio cassette Level: Grade 4-12</p>	100.0-15	11.50
<p>Tells the story of the most famous spaceflight in history, the first lunar landing.</p>		
<p>*Viking—Mars Landing 40 slides with audio cassette Level: Grade 4-12</p>	100.0-16	11.50
<p>Shows that the Viking 1 and 2 missions radically changed the scientific community's view of Mars, as scientists studied photos revealing giant mountains, canyons, and plains.</p>		
<p>*The Story of the Flight of Apollo-Soyuz 40 slides with audio cassette Level: Grade 4-12</p>	100.0-17	11.50
<p>Highlights the first meeting between America and Russia in space. Three astronauts and two cosmonauts rendezvoused in orbit, docked, and entered each other's craft.</p>		
<p>*Voyagers Encounter Jupiter 40 slides with audio cassette Level: Grade 4-12</p>	100.0-18	11.50
<p>Focuses on the flights of Voyagers 1 and 2 as one of the most successful and revealing unmanned spaceflight projects in history.</p>		
<p>*Voyager 2 Encounters Saturn 40 slides with audio cassette Level: Grade 4-12</p>	100.0-19	11.50
<p>Illustrates Voyager's most significant discoveries about Saturn, including incredible rings, erupting volcanoes, and cyclonic storms.</p>		
<p>*Best of the Space Shuttle 1977-1984 40 slides with audio cassette Level: Grade 4-12</p>	100.0-20	11.50
<p>Examines Space Shuttle highlights from the first dramatic flights to the ongoing array of spectacular spacewalks and experiments.</p>		
<p>*The Story of Our Universe 40 slides with audio cassette Level: Grade 4 - 12</p>	100.0-21	11.50
<p>Explores the universe and all of its other worldly phenomena.</p>		

*Produced by Finley-Holiday Films

	Item No.	Price
<p>*3 Flights of Skylab 20 slides with descriptions</p> <p>Recounts our first attempt to establish a permanent laboratory in space.</p>	100.0-23	8.00
<p>The Space Frontier 49 slides with audio cassette Level: Grade 7-12</p> <p>Begins with a detailed look at Skylab and proceeds to outline the development of the space station planned for the 1990's. Highlights the uses for the future station and explains its importance to our country's future.</p>	100.0-24	14.00
<p>Milestones of Flight 38 slides with descriptions</p> <p>Shows scenes from the National Air and Space Museum's "Milestones of Flight" Gallery. Produced by the Smithsonian Institution.</p>	100.0-25	11.00
<p>Fragile Earth 25 slides with descriptions</p> <p>Focuses on many of the conditions that affect Earth's crust, waters, and atmosphere. Space photographs and satellite images illustrate how both nature and people have changed Earth and not always for the better. Encourages students to become active participants in restoring our sick and injured Earth to good health. Produced by the Smithsonian.</p>	100.0-26	8.50
<p>Planets 11 slides with descriptions</p> <p>Presents a combination of pictures taken from spacecraft and artist's conceptions of the planets.</p>	100.0-27	4.00
<p>Stars & Galaxies 8 slides with descriptions</p> <p>Shows a collection of star clusters, nebula, and galaxies. Many photos are from the U.S. Naval Observatory. Provided by NASA's Public Affairs Office.</p>	100.0-28	3.50
<p>Earthview 4 slides with descriptions</p> <p>Presents photographs of Earth taken from four different Apollo missions. Provided by NASA's Public Affairs Office.</p>	100.0-29	3.00
<p>Full Earth 6 slides with descriptions</p> <p>Offers photographs of Earth taken by satellites and various Apollo missions. Provided by NASA's Public Affairs Office.</p>	100.0-30	3.50
<p>A Salute to Apollo 37 slides with audio cassette Level: Grade 7-12</p> <p>Chronicles the Apollo missions, highlighting Apollo 11, the first mission to land on the Moon.</p>	100.0-31	11.00

*Produced by Finley-Holiday Films

	Item No.	Price
Transformations of Flight 66 slides with descriptions Level: Grade K—3	100.0-32	22.00
Presents the numbers 1 through 10 being transformed into 10 different important air and spacecraft in the history of flight. These slides successfully complement the videotape also found in this catalog. Produced by the Smithsonian.		
*Voyager Encounters Neptune 20 slides with descriptions	100.0-33	8.00
Presents color photographs taken when Voyager encountered Neptune in August 1989. Includes pictures of the Great Dark Spot, Neptune's rings, and Triton.		
Astro 1: Seeing the Hidden Cosmos 24 slides with script & activity book Level: Grade 6 - 8	100.0-34	8.50
Describes the Astro 1 mission and basic concepts pertaining to the electromagnetic spectrum and astronomy, including x-rays, ultraviolet, visible, and infrared images of interesting astronomical objects.		
*Magellan Mission to Venus 20 slides with descriptions	100.0-37	8.00
Offers a variety of pictures taken of Venus when Magellan began its orbit on August 10, 1990. Synthetic aperture radar is the instrument used to look through the thick clouds perpetually shielding the surface of Venus.		
ATLAS 1: Studying Mysteries in Earth's Atmosphere 20 slides with descriptions and activity book Level: Grade 6—8	100.0-38	8.50
Describes the first Atmospheric Laboratory for Applications and Science (ATLAS) mission dedicated to a better understanding of the physics and chemistry of Earth's atmosphere.		
Volcanoes of Hawaii and the Planets 20 slides with descriptions	100.0-41	8.00
Compares landforms in Hawaii and on the planets. Prepared for the Hawaii Space Grant College by Peter J. Mougini-Mark.		
Earth Observing System 25 slides with descriptions	100.0-42	8.50
Presents a variety of images related to the Earth Observing System, the most ambitious science mission ever undertaken. This slide set is part of the Goddard Space Flight Center's Mission to Planet Earth.		
Science From New Worlds 20 slides with descriptions and activity guide	100.0-43	8.50
Features some of the best images captured by NASA's spacecraft, including images of comets, asteroids, and planets. Supporting notes provide background on the history of planetary exploration and information on major discoveries.		

*Produced by Finley-Holiday Films

	Item No.	Price
<p>Exploration of Venus 20 slides with descriptions</p> <p>Traces the history of the exploration of Venus from ground-based observations with telescopes, through radar measurements from Earth, to the Mariner, Pioneer, Venera, and Magellan spacecraft that have flown in the past and gone into orbit around the planet. Prepared by the Solar System Exploration Division at NASA Headquarters.</p>	100.0-44	8.50
<p>Microgravity Science 24 slides with descriptions Level: Grade 9-12</p> <p>Examines many of the microgravity experiments conducted on recent Shuttle missions and the potential benefits this research will have for humankind.</p>	100.0-45	8.50
<p>Comet Impact '94 20 slides with descriptions</p> <p>Features Hubble Space Telescope views of several of the fragment impacts when Comet Shoemaker-Levy 9 collided with Jupiter in July 1994. Includes additional images from other observatories.</p>	100.0-46	8.50
<p>Earth/Space Science Slide Set for Educators 122 slides with descriptions Level: Grade 5-Adult</p> <p>Contains slides and documentation on the most recent space-based observations NASA has obtained regarding Earth system science. The slides are organized around seven themes: Clouds and Radiation; Ocean Productivity, Circulation & Air-Sea Exchange; Greenhouse Gases, Changes in Land Use, Land Cover, Primary Productivity & the Water Cycle; The Role of Polar Ice Sheets & Sea Level; Ozone Depletion; and the Role of Volcanoes in Climate Change.</p>	100.0-47	60.00
<p>The Moon: The Geologic History and Future Exploration 36 slides with descriptions and teacher's guide</p> <p>Emphasis the Moon's geology, geologic history, and origin. Shows how the astronauts explored the Moon and gives a brief history lesson on what we know about the Moon from telescopic observations. Addresses some of the exciting possibilities that await us when humans return to the Moon to stay. All slides are from NASA, except where noted.</p>	100.0-48	15.00
<p>United States Geography: East Coast States, New England to Florida 20 slides with descriptions</p> <p>Presents photographs taken by astronauts from space aboard the Space Shuttle. Features human-made cities, roads, airports, and dams, as well as natural settings, including oceans, rivers, mountains, and plains. The list accompanying each set contains the photo number by which additional prints can be ordered.</p>	100.0-49	10.00
<p>United States Geography: Appalachians, Ohio River Valley, Great Lakes 20 slides with descriptions</p> <p>Offers photographs taken by astronauts from space aboard the Space Shuttle. Features human-made cities, roads, airports, and dams, as well as natural settings, including oceans, rivers, mountains, and plains. The list accompanying each set contains the photo number by which additional prints can be ordered.</p>	100.0-50	10.00

	Item No.	Price
United States Geography: Great Plains and Mississippi River Valley 20 slides with descriptions	100.0-51	10.00
Shows photographs taken by astronauts from space aboard the Space Shuttle. Features human-made cities, roads, airports, and dams, as well as natural settings, including oceans, rivers, mountains, and plains.		
United States Geography: Rocky Mountains and Southwest 20 slides with descriptions	100.0-52	10.00
Offers photographs taken by astronauts from space aboard the Space Shuttle. Features human-made cities, roads, airports, and dams, as well as natural settings, including oceans, rivers, mountains, and plains.		
United States Geography: West Coast States, Alaska, and Hawaii 20 slides with descriptions	100.0-53	10.00
Presents photographs taken by astronauts from space aboard the Space Shuttle. Features human-made cities, roads, airports, and dams, as well as natural settings, including oceans, rivers, mountains, and plains.		
United States Geography: United States Cities 60 slides with descriptions	100.0-54	26.00
Shows photographs taken by astronauts from space aboard the Space Shuttle. Features human-made cities, roads, airports, and dams, as well as natural settings, including oceans, rivers, mountains, and plains.		
Galileo Mission to Jupiter 20 slides with descriptions	100.0-55	8.00
Provides an overview of the Galileo mission prior to the probe's descent. Includes photographs taken during flybys of the Moon, Earth, Gaspra, Ida, and Dactyl. All images in this set are in the public domain.		
SIR-C/X-SAR Imaging Radar "Seeing the Earth in a New Way" 20 slides with descriptions	100.0-56	8.00
Features the Spaceborne Imaging Radar-C/X-Band Synthetic Aperture Radar (SIR-C/X-SAR), a joint mission of the German, Italian, and U.S. space agencies that is part of NASA's Mission to Planet Earth. The images contained in this set were collected on two Space Shuttle flights of SIR-C/X-SAR in April and October 1994. All images in this set are in the public domain.		
The Ultimate Field Trip: An Astronaut's View of the Earth 24 slides with descriptions	100.0-57	8.50
Includes a collection of 24 views of the Earth witnessed by NASA Astronaut Dr. Kathryn Sullivan while on orbit aboard the Space Shuttle.		
Expanding the Universe With the Hubble Space Telescope II 20 slides with descriptions	100.0-58	8.00
Offers images from the first 3 years of operation, including planets, stars, and distant galaxies. All images in this set are in the public domain.		

	Item No.	Price
<p>NASA's First Service Mission to the Hubble Space Telescope 20 slides with descriptions</p> <p>Details the most difficult servicing mission ever attempted. The astronaut crew of <i>Endeavour</i> replaced solar arrays and other components to fully restore the telescope's ability to image individual objects in distant crowded fields.</p>	100.0-59	8.00
<p>Expanding the Universe With the Hubble Space Telescope V 20 slides with descriptions</p> <p>Offers spectacular and unaberrated views of the solar system, our Milky Way galaxy, and galaxies beyond. All images in this set are in the public domain.</p>	100.0-60	8.00
<p>Expanding the Universe With the Hubble Space Telescope VI 20 slides with descriptions</p> <p>Provides spectacular images of the cosmos taken with the Hubble Space Telescope, contributing new and comprehensive information about the composition and evolution of the universe. All images in this set are in the public domain.</p>	100.0-61	8.00
<p>Hubble Space Telescope's Greatest Hits 20 slides with descriptions</p> <p>Includes some of the most spectacular images ever captured by the Hubble Space Telescope, including Venus, Saturn, star clusters, black holes, and peculiar galaxies. All images in this set are in the public domain.</p>	100.0-62	8.00
<p>Manned Space Flights 20 slides with descriptions</p> <p>Represents the era of the Mercury, Gemini, Apollo, and Skylab missions, 1961 through the mid-1970's.</p>	100.0-63	8.00
<p>Voyager Mission to Uranus 20 slides with descriptions</p> <p>Offers a selection of images of Uranus, its system of rings, and its moons from Voyager 2's encounter with Uranus in 1986.</p>	100.0-64	8.00
<p>Mars the Planet 40 slides with descriptions</p> <p>Presents a selection of Viking Orbiter red and violet filter images.</p>	100.0-65	16.00
<p>Exploring Meteorite Mysteries 48 slides with descriptions Level: Grade 5-12</p> <p>Highlights many of the meteorites that have been collected and studied by scientists. Also discusses impact craters and the classification and formation of meteorites.</p>	100.0-66	12.00

	Item No.	Price
The Hubble Space Telescope 1996		
30 slides with descriptions	100.0-67	35.00
Includes detailed views of Earth's neighboring planets, Martian dust storms, Saturn's ring plane, the surface of Pluto, the Helix Nebula, the Crab Nebula, and more. Produced by the Astronomical Society of the Pacific.		
The Search for Planets Around Other Stars		
30 slides with descriptions	100.0-68	35.00
Explains the methods used to detect planetary bodies that orbit nearby stars. Includes artist's impressions of how some of these planetary bodies might look. Inspired by the recent discoveries of Dr. Geoff Marcy and Paul Butler. Produced and copyrighted by the Astronomical Society of the Pacific.		
Mars Pathfinder/Sojourner Return to the Red Planet		
20 slides with descriptions	100.0-69	8.00
Contains an assortment of slides highlighting prelaunch preparations, trajectory, and launch and landing activities for Mars Pathfinder and Sojourner. Produced by the Finley Holiday Film Corporation. No copyright protection is asserted for these images. Photo credits to read "NASA/JPL" unless otherwise noted.		
Mars Pathfinder/Sojourner Success, July 1997		
20 slides with descriptions	100.0-70	8.00
Provides the first images of the rocky, barren Martian world. Images include the two double hills called "Twin Peaks" and the rocks "Yogi" and "Barnacle Bill." Produced by the Finley Holiday Film Corporation. No copyright protection is asserted for these images. Photo credits to read "NASA/JPL" unless otherwise noted.		

Computer Materials

Format	Item No.	Price
Space Shuttle Clip Art One 3 1/2" diskette Mac/MacPaint Format	400.0-20	5.00

Provides an assortment of public domain Space Shuttle Clip Art for use on an Apple Macintosh computer.

NASA Clip Art Six 3 1/2" diskettes Mac	400.0-21	20.00
---	----------	--------------

Offers a graphics resource developed for use in schools by both teachers and students at all levels. Contains a hard copy print-out of the clip art, an "electronic book" created with PageMaker 4.2 software, and three file copies of the clip art in the software program in which they were originally created. Compiled by NASA Classroom of the Future at Wheeling Jesuit College.

	Format	Item No.	Price
EOS I Program: Laserdisc, Computer Software, and Booklet			
Complete Package (1st Laserdisc Program)		400.0-60	55.00

Covers missions STS-1 through STS-44.

EOS II Program: Laserdisc, Computer Software, and Booklet			
Complete Package		400.0-61	55.00
Earth Observation Images			
STS missions flown from January 1992 through September 1993			
Press Release Images			
Mercury through STS-51 (September 1993)			

Provides the second in a series of laserdiscs produced by the Image Sciences Division Center Operations Directorate of the NASA Johnson Space Center. Contains approximately 5,500 Earth-looking still images taken during Shuttle missions STS-42 through STS-51 (1992-1993), as well as nearly 8,800 press release images covering the history of NASA's manned space program from Mercury through STS-51 (1961-1993). The images are grouped according to missions, with crew portraits and mission patches preceding the imagery from each mission. Includes the *Guide to Images* booklet and IBM-compatible data diskettes containing the image description database.

Astronomy Village™: Investigating the Universe			
Mac 3-piece set		010.1-12V	24.00

Offers an exciting multimedia program for the Macintosh that supplements high school science curricula. Although designed for ninth grade, the software can be used at other grade levels. Ten investigations cover a broad cross-section of current research areas in astronomy. Each investigation encourages students to participate in scientific inquiry as a member of a cooperative learning group. Purchase as a three-piece set or individually as listed below:

Astronomy Village™ Program Individual Selections			
Astronomy Village CD-ROM	(for Macintosh)	400.0-72C	5.00
Astronomy Village Teacher's Guide		400.0-72P	5.00
Introductory Videotape		400.0-72V	14.00

Astronomy Village requires at least:

- Macintosh LCIII running System 7, 8 megabytes (MB) of RAM
- 20 MB on the hard drive
- 13" RGB color monitor (640 x 480 pixels, 256 colors)
- CD-ROM drive
- QuickTime 1.5
- HyperCard 2.2 (not the HyperCard Player)

Astronomy Village™ was developed by NASA's Classroom of the Future at Wheeling Jesuit College. Contact their web site at <http://www.cotf.edu>.

	Format	Item No.	Price
Our Solar System	Mac/Windows 3.1	400.0-73	25.00

Offers an interactive exploration of the universe. More than 200 high-resolution images have been used to create this sight-and-sound voyage through space. Plays on either Mac or PC computers or TV-based CD players. Copyrighted by Finley Holiday Film Corporation.

Spaceborne Imaging Radar—Seeing the Earth in a New Way	Mac/Windows 3.1/ Unix	400.0-75	6.00
---	--------------------------	----------	-------------

Contains radar images of sites around the world as seen before and during the SIR-C missions of 1994. The CD-ROM contains handheld photographs from the Space Shuttle, QuickTime movies from the missions, and photographs from the ground. Using captivating examples such as the mountain gorilla habitats of Rwanda, a radar-generated flyby of the Galapagos Islands, the discovery of the Lost City of Ubar in the Arabian desert, and many others, the CD-ROM puts our Earth at students' fingertips. Teachers may use the CD-ROM in many ways, from activities as simple as viewing pictures or as complicated as performing science experiments with real data taken from Earth orbit. Students can learn about NASA's Mission to Planet Earth and imaging radar through the structured lesson plans or think up their own experiments and analyze radar image data from the SIR-C missions. This CD-ROM includes the Netscape World Wide Web browser interface. If your computer has Internet access, there are links provided to a companion "Home Page" to this CD-ROM, as well as to other NASA educational resources. The CD-ROM, produced by NASA's Jet Propulsion Laboratory, was designed for use by students at middle schools, high schools, and colleges. It was especially prepared for PC-compatible computers; however, it is ISO-9660 compliant, which means it is readable on Macintosh and Unix machines.

Welcome to the Planets	Mac/Windows 3.1	400.0-74	6.00
-------------------------------	-----------------	----------	-------------

Contains 190 selected images acquired over approximately 20 years of NASA planetary exploration. Images of all the planets, as well as comets, asteroids, meteorites, and lunar samples, are accompanied by information about the solar system bodies and the spacecraft that acquired the data. This was designed to provide an overview of planetary exploration at the high school and college levels. The CD-ROM runs on either Mac or Windows systems. A teacher's guide is included. For public and educational use only. A product of NASA's Planetary Data System.

The Hubble Library of Electronic PictureBooks	Mac/Windows 3.1/ Windows '95	400.0-70	39.95
--	---------------------------------	----------	--------------

Welcomes you to the next millenium with an escorted tour of our solar system, a trip to the mountains of Venus, a walk on the Moon with Neil Armstrong, and a long, deep view into the wilderness of space. Expand your knowledge of the universe and prepare for the discoveries to come, with spectacular pictures from the Hubble Space Telescope, interplanetary spacecraft, astronaut-held cameras, and more. With nearly 500 color images, descriptive captions, and more than 25 minutes of exciting digital video from space, provides an opportunity for you to explore the mysteries and marvels of our cosmic neighborhood, as well as the deepest reaches of space. Includes 16 programs and a free screen saver.

Format	Item No.	Price
Winds of Change: An Educational CD-ROM From the NASA Scatterometer Project		
Mac/Windows 3.1	400.0-76	5.00

Provides students a curriculum resource for thematic, interdisciplinary instruction, and self-investigation of global climate Earth science activities. Includes information about NASA's Scatterometer (NSCAT), a specialized microwave radar that will measure the speed and direction of winds over the global ocean surface to help predict weather patterns and climate systems. Copyrighted by the California Institute of Technology. For more information, contact their web site at <http://stargate.jpl.nasa.gov/~support/index.html> or send e-mail to support@stargate.jpl.nasa.gov.

Earth Observatorium: Mission to Planet Earth		
Mac/Windows 3.1/ Windows '95	400.0-77	24.00

Lets you look out a porthole of the Space Shuttle *Endeavour* during mission STS-68 to view 12,500 images of Earth, plus many of the radar images taken during the flight. A navigation interface lets you view images by timeline, country, geographic location, or photo ID. The astronauts discuss the flight's results in a 16-minute movie. Published and copyrighted by Rocky Mountain Digital Peeks. Volume 2: For Windows 3.1, Windows 95, or Macintosh OS (Sys 7+), this multimedia CD-ROM works best using a 16- or 24-bit color display with 5 MB for the application.

Views of the Solar System		
Mac/Windows 3.1/ Windows '95	400.0-78	21.95

Offers an extraordinary collection of images, animations, facts, and historical perspectives about the planets, moons, Sun, and other parts of our solar system. Includes a section with NASA-developed activities and National Science Teachers Association journal articles for educators. For a preview of the CD-ROM, visit <http://www.nsta.org/pubs/special/pb128x.htm>. Copyrighted by the National Science Teachers Association.

Mars Navigator		
Mac/Windows 3.1/ Windows '95	400.0-79	6.00 (shipping only)

Introduces basic astronomy and aerospace engineering by examining the Mars Pathfinder and Mars Global Surveyor missions to Mars. There are hundreds of animations and narrations in addition to the detailed graphics and text. Included are six interactive laboratories to help understand such topics as the motion of planets and mission design. There are complete databases on planets, rockets, and past NASA missions. Detailed interviews with Jet Propulsion Laboratory scientists, engineers, and employees allow the user to know more about the people that make these Mars missions successful. The content covers six major areas: the solar system, stars, Mars, mission planning, traveling in space, and spacecraft design. The content is not tied to any curriculum or lesson plan, but it is intended to be an exploratory learning experience. Copyrighted by Kurt Gramoll, Ph.D., Georgia Tech.

The Heart in Space		
Level: Grades 9-12	Mac/Windows 3.1	400.0-80
		5.00

Examines interactively how microgravity affects the cardiovascular system. Covers basic anatomy and functions of the human heart. Also presents research findings about how scientists are addressing human physiology in space. Produced by the STELLAR Multimedia Curriculum project at the NASA Ames Research Center. Information about this CD-ROM can be obtained from <http://stellar.arc.nasa.gov>. For Macintosh 7.0 or greater; PC—386 processor/Windows 3.1 or greater.

	Format	Item No.	Price
Exploring the Internet	Mac/Windows 3.1/ Windows '95	400.0-81	5.00
Explains what the Internet is, how to get connected, and how to explore the World Wide Web. You will get hands-on experience navigating the Internet and discover its many uses. A fantasy voyage through the universe makes this CD fun for young users and adults alike. Produced and copyrighted by BDM Interactive.			

PC's in Space

Windows '95	400.0-82	6.00
-------------	----------	-------------

Offers an exciting collection of seven software programs, including:

- Exploring the Earth*
- Exploring the Sun*
- Exploring the Solar System*
- Exploring the Universe*
- Exploring North and South America*
- The Hubble Space Telescope First Servicing Mission*
- Exploring the States*

PC's in Space was produced by Jackson and Tull as a community outreach service to encourage student interest in space exploration. The software and manuals are free on the Internet. For more information, visit <http://muspin.gsfc.nasa.gov/pcinspace.html>. For technical support, e-mail pcinspace@jnt.com or call 1-800/375-2344.

Deep Space: Featuring the Hubble Space Telescope Images

Mac/Windows 3.1/ Windows '95	400.0-83	25.00
---------------------------------	----------	--------------

Provides an interactive menu that allows you to select from categories of deep space objects, such as galaxies and star clusters. Includes a complete collection of Hubble images from the Space Telescope Science Institute, sixteen planet views, and a glossary. Produced and copyrighted by Finley-Holiday Film Corporation.

Space Shuttle Flights: 100 Stock Photos

Mac/Windows 3.1/ Windows '95	400.0-84	15.00
---------------------------------	----------	--------------

Offers a collection of digital color photos selected from thousands of NASA images covering Shuttle missions from the first flight in 1981 to the second Hubble Space Telescope Servicing Mission in 1997. Includes photos of the Space Shuttle, astronauts in space, satellite launches, Earth from the Shuttle, and more. Compiled by Finley-Holiday Film Corporation. No copyright asserted for the images on this disc.

Pathfinder and the Best of Mars

Mac/Windows 3.1/ Windows '95	400.0-85	20.00
---------------------------------	----------	--------------

Provides a stunning collection of Pathfinder images of Mars and includes the best Mars images from all the Mars missions, including Mariner, Viking, and Hubble views. As a special bonus, the CD includes 5 motion video clips and 20 3-D images to view with enclosed 3-D glasses. Image Browser software allows the viewer to easily review photos, read the captions, and print them for handy reference. PC: Windows 3.x or Windows '95/NT with at least 8 MB of RAM. Macintosh: System 7.1 or later with 3 MB free of RAM.

	Format	Item No.	Price
Hubble Telescope CD-ROM	Mac/Windows 3.1/ Windows '95	400.0-86	20.00

Features more than 200 digital Hubble images released by the Space Telescope Science Institute and includes a Screen Saver and Image Browser software for the viewer to easily review the photos, read and search the captions, and print for handy reference. PC: Windows 3.x or Windows '95/NT with at least 8 MB of RAM. Macintosh: System 7.1 or later with 3 MB free of RAM.

NASA Memorabilia / Miscellaneous

- **Wonderful Gifts for Space Enthusiasts!**
- **Inexpensive Awards for Students!**
- **Great Ideas for Class Projects!**

006.3-07P Toys In Space I Activity Kit
(10 toys-to accompany "Toys In Space" videotape)*

300.0-13 Space Shuttle Erasers
(assorted colors)

300.0-06 NASA Vector Logo Pen
300.0-07 NASA Vector Logo Pencil

006.3-12P Toys in Space Activity Kit II
(7 toys-to accompany "Physics of Toys" videotape)*

300.0-18 Saturn V Replica with Apollo Patch
300.0-19 Shuttle Astronaut Replica with NASA Vector Patch
300.0-24 Space Shuttle Replica with Shuttle Patch

300.0-09 Astronaut Ice Cream
(all natural neopolitan flavor)

300.0-17 Space Shuttle Woodkit with Decals
(for older students, glue not included)

300.0-16 Die-Cast Metal Shuttle Pencil Sharpener
(contains small parts, ages 5 and older)

300.0-12 Full-Stack Space Shuttle Pencil Sharpener
(individually boxed, 3-1/2" high)

300.0-04G NASA Vector Logo Hat
(green and navy)
300.0-04B NASA Logo Hat
(khaki and black, brushed twill with embroidered design)

300.0-05B NASA Logo Patch
300.0-05W NASA Logo Patch
300.0-05F American Flag Patch
300.0-05V NASA Vector Patch
300.0-05S Space Shuttle Patch

*Contents of Toy Kits may differ slightly from photo. Toys subject to availability.

Item No.	Description	Ordering Info	Price
300.0-04B	NASA Vector Logo Hat	Khaki and Black	10.00
300.0-04G	NASA Vector Logo Hat	Green and Navy	10.00
300.0-05B	NASA Logo Patch	Black	1.75
300.0-05W	NASA Logo Patch	White	1.75
300.0-05V	NASA Vector Patch		1.75
300.0-05S	Space Shuttle Patch		1.75
300.0-05F	American Flag Patch		1.75
300.0-06	NASA Vector Logo Pen		0.80
300.0-07	NASA Vector Logo Pencil		0.25
300.0-09	Astronaut Ice Cream		1.75
300.0-12	Full-Stack Space Shuttle Pencil Sharpener		2.00
300.0-13	Space Shuttle Eraser		0.50
300.0-16	Die-Cast Metal Shuttle Pencil Sharpener		2.00
300.0-17	Space Shuttle Woodkit with Decals		3.00
300.0-18	Saturn V Replica with Apollo Patch		12.00
300.0-19	Shuttle Astronaut Replica with NASA Vector Patch		12.00
300.0-24	Space Shuttle Replica with Shuttle Patch		12.00
006.3-07P	*Toys in Space Activity Kit I	10-piece kit	30.00
006.3-12P	*Toys in Space Activity Kit II	7-piece kit	25.00

* Selected individual toys also available, see page 107.

Format	Item No.	Price
Toys in Space Activity Kit 10-piece set	006.3-07P	30.00
<p>Contains the ten toys Shuttle astronauts carried with them on mission 51-D. It is designed to be used with the "Toys in Space" videotape programs on microgravity. Contains the following toys: top, ball and jacks, slinky, yo-yo, gyroscope, paddleball, flipping toy, car and track, magnetic marbles, and wheelo.</p>		
Toys in Space II Activity Kit 7-piece set	006.3-12P	25.00
<p>Contains seven of the toys Shuttle astronauts carried with them on mission STS-54. It is designed to be used with the "Physics of Toys in Space" and "Toys in Space II" videotape programs on microgravity. Contains the following toys: car and track, basketball with hoop, magnetic marbles, swimming toy, gravitron, flipping toy, and balloon helicopter.</p>		
Toys in Space—Individual Toys (sold separately)		
Gyroscope	300.0-25	5.00
Car and Track	300.0-26	6.00
Magnetic Marbles	300.0-27	2.00
Wheelo	300.0-28	3.00
Gravitron	300.0-29	7.00
Balloon Helicopter	300.0-30	1.00

NASA Educator Resource Centers

NASA Educator Resource Center Network

To help disseminate educational materials, NASA's Education Division has established the NASA Educator Resource Center Network. In addition to the Educator Resource Centers listed below, NASA has formed partnerships with school systems, planetariums, museums, and other nonprofit organizations to serve as Regional Educator Resource Centers.

Educator Resource Centers

AL, AR, IA, LA, MO, TN

U.S. Space and Rocket Center

NASA Education Home Page

NASA On-line Resources for Educators provide current educational information and instructional resource materials to teachers, faculty, and students. A wide range of information is available, including science, mathematics, engineering, and technology education lesson plans, historical information related to the aeronautics and space program, current status reports on NASA projects, news releases, information on NASA educational programs, and useful software and graphics files. Educators and students can also use NASA resources as learning tools to explore the Internet, access information about educational grants, interact with other schools that are already on-line, participate in on-line interactive projects, and communicate with NASA scientists, engineers, and other team members to experience the excitement of real NASA projects.

Go to these resources through the NASA Education Home Page: <http://www.hq.nasa.gov/education>

NASA Spacelink

NASA Spacelink is one of NASA's electronic resources specifically developed for use by the educational community. This comprehensive electronic library contains current and historical information related to NASA's aeronautics

and space research. Teachers, faculty, and students will find that Spacelink offers not only information about NASA programs and projects, but also teacher guides with activities, images, and computer software that can enhance classroom instruction.

Spacelink also provides links to other NASA resources on the Internet. Educators can access materials chosen specifically for their educational value and relevance, including science, mathematics, engineering, and technology education lesson plans, information on NASA educational programs and services, current status reports on Agency projects and events, news releases, and television broadcast schedules for NASA Television.

Spacelink may be accessed at the following address:
<http://spacelink.nasa.gov>

World Wide Web: <http://spacelink.nasa.gov>
Gopher: <spacelink.nasa.gov>
Anonymous FTP: <spacelink.nasa.gov>
Telnet: <spacelink.nasa.gov>
TCP/IP address: 192.149.89.61

NASA Television

NASA Television (NTV) features Space Shuttle mission coverage, live special events, interactive education videoconferences, electronic field trips, aviation and space news, and historical NASA footage. Programming has a three-hour block—Video (News) File, NASA Gallery, and Education File—beginning at noon Eastern and repeated, with the last block beginning at midnight Eastern.

The Education File features programming for teachers and students on science, mathematics, and technology. You and your class can investigate exciting NASA research endeavors in aeronautics, microgravity, planetary sciences, human exploration of space, Earth systems, robotics, and more. Educators are welcome to videotape from NTV.

NTV Weekday Programming Schedules (Eastern Times)

Video File	NASA Gallery	Education File
12-1 p.m.	1-2 p.m.	2-3 p.m.
3-4 p.m.	4-5 p.m.	5-6 p.m.
6-7 p.m.	7-8 p.m.	8-9 p.m.
9-10 p.m.	10-11 p.m.	11-12 p.m.

Live feeds preempt regularly scheduled programming. Check the Internet for program listings at:

NTV Home Page

<http://www.hq.nasa.gov/ntv.html>

Select "Today at NASA" and "What's New on NASA TV?"

<http://www.nasa.gov/>

Select "TV Schedules"

Quest

Quest is the home of NASA's K-12 Internet Initiative, one of the electronic resources that the Agency has developed for the educational community. The project specializes in providing programs, materials, and opportunities for teachers and students to use NASA resources as learning tools to explore the Internet. Through Quest, teachers can access information about educational grants, interact with

other schools that are already on-line, and explore "links" to other NASA educational resources.

One of Quest's most unique endeavors is the "Sharing NASA" on-line interactive project. Students and educators are given the opportunity to communicate with NASA scientists and researchers to experience the excitement of real science in real time. In addition to these programs, the project also houses information about materials that accompany the K-12 Internet Initiative videos. These videos promote the Internet in schools and assist educators in acquiring and integrating the Internet into the classroom (for information about the videotapes, send an E-mail message to: **video-info@quest.arc.nasa.gov**).

Quest can be accessed via the Internet at:

<http://quest.arc.nasa.gov>

To stay informed about new opportunities in the Sharing NASA program, send an E-mail message to:

listmanager@quest.arc.nasa.gov

In the body of the message, write these words:

subscribe sharing-nasa

For additional information, send an E-mail message to:

info@quest.arc.nasa.gov

Liftoff to Learning: Newton in Space	27, 77
Liftoff to Learning Series.	77
Liftoff to Learning: Space Basics	27, 77
Liftoff to Learning: Tethered Satellite: A Videotape for Physics and Physical Science	44, 79
Liftoff to Learning: The Atmosphere Below	11, 78
Liftoff to Learning: Toys in Space II.	22, 78
Liftoff to Learning: Voyage of Endeavour—Then & Now.	28, 78
Live From Antarctica Videoconference	69
Live From the Hubble Space Telescope Videoconference	72
Live From the Stratosphere Videoconference	71
Living and Working in Space: The Countdown Has Begun.	22
Living in Space	81
Looking Ahead and Back.	62

Magellan—Mapping the Planet Venus	33
Magellan Mission to Venus	90
Magnetism in Space	73
Magnetic Effects in Space	74
Making Medicine in Space	64
Making Your Observations	72
Manned Space Flights	93
Mapping the Martian World: The Mars Observer Mission	35
Mars Mission Animation Compilation	35
Mars Navigator	100
Mars Pathfinder/Sojourner Return to the Red Planet	94
Mars Pathfinder/Sojourner Success, July 1997	94
Mars Rover Sample Return Mission	34
Mars, The Next Step	34, 45
Mars the Planet	93
Mars: The Search Begins	34
Marshall Space Flight Center: The First 25 Years	28
Mercury, Exploration of a Planet	52
Mercury/Gemini/Apollo Overview	24
Meteors and Asteroids	83
Microgravity Science	91
Milestones of Flight	8, 89
Mineral Exploration	9
Mission EarthBound	66
Mission EarthBound Videoconference Series	66
Mission to Planet Earth	68
Mission STS-26: The Crew Report	26
Moon Landing	59
Moon Landing—Apollo 11	88
Moonwalk Series	63
More Moon Exploration	59
NASA and the Airplane Series	61
NASA Biology: On Earth and in Space Series	64
NASA Clip Art	97
NASA Educator Kit for the Internet	40
NASA . . . The 25th Year	24
NASA's First Service Mission to the Hubble Space Telescope	93
NASA's Hubble Space Telescope: The Best Is Yet to Come	32
NASA's Hubble Space Telescope: The Challenge & Complexity of Operations	13
Night Flight to the Stars	71
Observing the Night Sky	83
On Robot Wings: A Flight Through the Solar System	33
On the Shoulders of Giants	25
One Small Step	63
Opening New Frontiers: The Orbital Flight Tests of the Space Transportation System	7
Optics—Making Light Work	39
Origins of Life on Earth	64
Our Laboratories in Space	56
Our Solar System	33, 45, 99
Our Star the Sun	52

PC's in Space	101
Pathfinder and the Best of Mars	101
Partnership Into Space: Mission Helios	31
Phases and Craters of the Moon	83
Physics of Toys in Space	21
Pioneer—Saturn Encounter	53
Planet Mars	34
Planetary Discoveries	59
Planets	89
Planning for the Future	65
Polynomials	42, 76
Portrait of Earth: The Story of Satellites	10, 45
Possible Futures in Space	56
Preparing for the Moon	58
Preparing Today for Your Tomorrow	17
Progress in Aeronautics	62
Project Galileo: A Jovian Odyssey	35
Project Mathematics! Polynomials	42, 76
Project Mathematics! Series	76
Project Mathematics! Similarity	41, 76
Project Mathematics! Sines and Cosines, Part I	43, 76
Project Mathematics! Sines and Cosines, Part II	43, 76
Project Mathematics! Sines and Cosines, Part III	43, 76
Project Mathematics! The Story of Pi	41, 76
Project Mathematics! The Theorem of Pythagoras	41, 76
Project Mathematics! The Tunnel of Samos	43, 76
Project Mercury: An Early Step	55
Propulsion: Launch Vehicles	87
Propulsion: Principles of Rocketry	87
Propulsion: Space Shuttle	87
Quest for Life, Who's Out There?	38
Quest for Planet Mars	67
Quieter, Faster and Safer Aircraft	61
Reaching for the Stars (Astronaut Training Tape)	17
Reaching for the Stars (5-Part Videoconference Series)	18
Reading the Moon's Secrets	37
Reduced Gravity Program	8
Return to Space	26
Return to the Moon Videoconference	37
Return to the Stratosphere	71
Science From New Worlds	90
Science in the Stratosphere	71
Science Operations in Space: Lessons Learned	28
Seeing Beyond the Obvious: Understanding Perceptions in Everyday & Novel Environments	28
Sentinels in Space: The Environmental Satellites	10
SETI: The Search for Extraterrestrial Intelligence	14, 84
Setting the Stage for the Future	62
Shuttle: A Remarkable Flying Machine	25
Shuttle Life in the World of Weightlessness	19, 45

Shuttle Preparation and Planets	59
Similarity	41, 76
Sines and Cosines, Part I	42, 76
Sines and Cosines, Part II	43, 76
Sines and Cosines, Part III	43, 76
SIR-C/X-SAR Imaging Radar "Seeing the Earth in a New Way"	92
Skylab Science Demonstration Series	73
Solar System Exploration Videotape Collection	33
Space Age Series	67
Space Classroom: Assignment the Stars	32
Space Exploration: Communications Using Spacecraft	87
Space Exploration—The Next Frontier	82
Space Exploration: The Solar System	87
Space Flight: The Application of Orbital Mechanics	44
Space for Women	17
Space: Home Away From Home	22
Space Policy	65
Space Research & You: Your Health, Your Transportation	7
Space Research & You: Your Home and Environment	9
Space Shuttle—Blast Off to the Future	81
Space Shuttle Clip Art	97
Space Shuttle Demonstration	25, 45
Space Shuttle Flights: 100 Stock Photos	101
Space Shuttle Matures	59
Space Shuttle: Overview	49
Spaceborne Imaging Radar—Seeing the Earth in a New Way	99
Spacelab Life Sciences Missions 1 & 2	26
Spaceship Earth	81
Spaceship South Pole	69
Starfinder Series	75
Stars & Galaxies	89
Suited for Space Videoconference	21
Sun Splash Ozone Video	11
Supernova II	32
Teacher Silent Video Lesson Guide	51, 54, 57, 60
Teamwork in Space	81
The 60's Strides Towards the Future	61
The Ames Research Fleet	62
The Biology and Space Exploration Video Series	84
The Birth of NASA	58
The Cardiovascular System in Space	15, 84
The Coldest, Windiest, Iciest Place on Earth	69
The Cosmic Background Explorer	13
The Day Before	63
The Dream Is Alive	26
The Flight of Apollo 11 (The Eagle Has Landed)	24, 50
The Fourth Planet	53
The GLOBE Program	11
The Great Planet Debate	72
The Heart in Space	100
The House That NASA Built	39

The Hubble Library of Electronic PictureBooks	99
The Hubble Space Telescope	12
The Hubble Space Telescope 1996	94
The Human Machine in Space	65
The Ingredients of Space Travel	55
The Jupiter Mission	71
The Mars Panel Discussion, Part I	65
The Mars Panel Discussion, Part II	65
The Mission of Apollo/Soyuz	51
The Moon a Goal.	58
The Moon and Man	52
The Moon on Earth.	63
The Moon: The Geological History and Future Exploration.	91
The Musculoskeletal System in Space	16, 84
The NASA Space Suit.	21
The Night Sky	83
The Night Sky Series.	84
The Origin and Early Evolution of Life	15, 84
The Pre-Flight Briefing	71
The Quest for Contact: NASA's Search for Extraterrestrial Intelligence	38
The Search for Planets Around Other Stars	94
The Serendipity Machines	39
The Shuttle Era.	59
The Space Frontier	89
The Space Shuttle: America's Team Reaching for the Future	26
The Story of the Flight of Apollo-Soyuz.	88
The Story of Our Universe	88
The Story of Pi	41, 76
The Time of Apollo	25
The Theorem of Pythagoras	41, 76
The Tunnel of Samos	43, 76
The Ultimate Field Trip: An Astronaut's View of the Earth	92
The Unexpected Universe.	67
The Viking Expeditions	65
The Weather Watchers	12
The Wet Look	9
The X-15: 1960-1980	8
Those Magnificent Wind Machines	19
To Dream . . . To Learn	28, 45
To the Moon and Beyond.	67
TOPEX/POSEIDON: A Mission to Planet Earth	10
Tornado Below.	12
Total Lunar Eclipse	83
Toys in Space	20
Toys in Space Activity Kit	20, 107
Toys in Space II Activity Kit.	22, 107
Toys in Space: Mission 51-D Highlights	20
Transformations of Flight	8, 90
Transition Years	59
Types of Telescopes.	83

Ulysses: A Voyage to the Sun	36
Ulysses: An Expedition Over the Sun's Poles	37
Ulysses Encounter With Jupiter	36
United States Geography: Appalachians, Ohio River Valley, Great Lakes	91
United States Geography: East Coast States, New England to Florida	91
United States Geography: Great Plains and Mississippi River Valley	92
United States Geography: Rocky Mountains and Southwest	92
United States Geography: United States Cities	92
United States Geography: West Coast States, Alaska, and Hawaii	92
U.S. Microgravity Laboratory 2 Pre-flight Education Videotape	22
Universe	31, 45, 56
Uranus: I Will See Such Things	36
Uranus, Neptune, Pluto and Beyond	53
Vegetation Assessment	9
Venus Pioneer	52
Views of the Solar System	100
Viking—Mars Landing	88
Visions of Other Worlds	30
Volcanoes of Hawaii and the Planets	90
Voyager Encounters Neptune	90
Voyager Mission to Uranus	93
Voyager, The Grand Tour	33
Voyager 2 Encounters Saturn	88
Voyager 2/Saturn Encounter	36, 53
Voyager Uranus Encounter Parts I & II	36
Voyagers Encounter Jupiter	88
We Deliver: Summary of Shuttle Flights 5, 6, 7 & 8	25
Welcome to the Planets	99
What's a Heaven For?	68
What's in The News—Space Series	81
Where Dreams Come True	17
Winds of Change: An Educational CD-ROM From the NASA Scatterometer Project	100
Winning: Aerospace—The Next Decade	17
Working in Space	82
X-15 Research	61
Your Share in Space	50
Zero-G	73
Zero-G and Space Suits	55
