# wyle Customer Centric System

*IMM Database and Model offer one-stop shopping for the user of evidence-based reports and risk forecasts.*

# wyle Who are IMM Database Users?

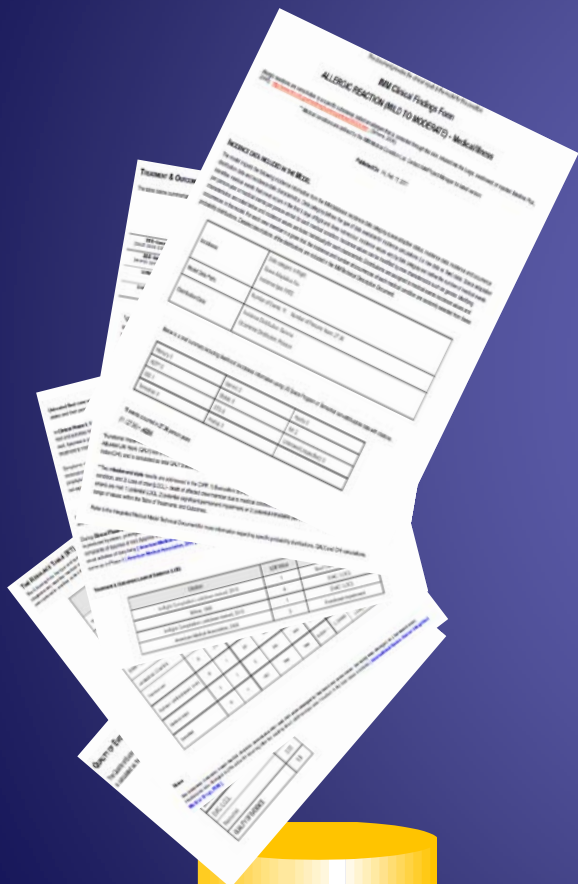

*IMM Database has a broad spectrum of capabilities to offer to an extensive user base.*

User Type	IMM Database Questions
Flight Surgeons	What is the likelihood that a crew member will develop nasal congestion?
Risk Managers	What medical conditions are associated with environmental factors that can lead to evacuation?
Vehicle Designers	For the assigned medical system mass allocation, what is the total mass for all of the injectable medications and their supplies?
Health Care System Designers	How many different medical conditions can potentially be diagnosed with ultrasound?
Trainers	What medical conditions will the crew be prepared to diagnosis and treat?
Requirement Managers	What is the mass and volume of the supplies needed for this crew health requirement?

*IMM has a broad spectrum of capabilities to offer to an extensive user base.*

User Type	Integrated Medical Model Questions
Flight Surgeons	What in-flight medical threats are greatest for reference mission A?
Risk Managers	What is the risk of evacuation - due to a medical event - for a 6-person, 180-day mission assuming the current in-flight medical capability?
Vehicle Designers	What's the optimum medical system mass allocation for a given level of risk?
Health Care System Designers	What medical items should we fly for a given mass/volume allocation?
Trainers	How do I prioritize limited medical training hours?
Requirement Managers	What's the rationale for this crew health requirement?

*IMM Database is a robust tool that supports IMM along with offering customers a user friendly evidence-based platform .*

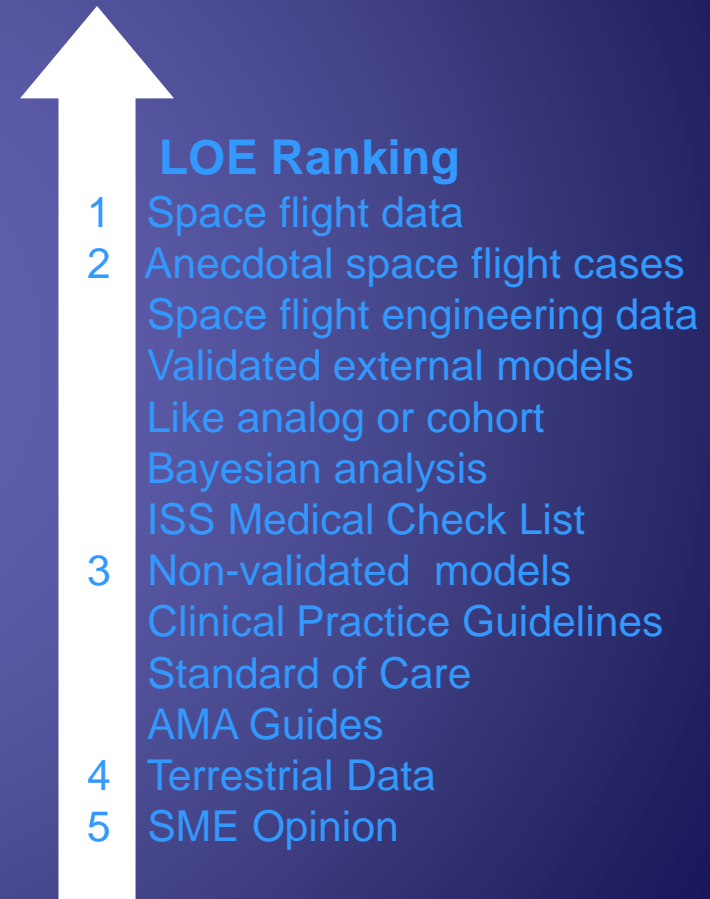

**IMM  
Database  
Application**

- **Objective; not subject to human error or “squeaky wheel” adage**
- **Input data are referenced and cited**
- **Organizational knowledge management tool**
- **Provides web accessibility for a customer friendly interface**

*The level of evidence (LOE) quantifies the model inputs according to a ranking based on highest value of data.*

- **Unique to Space Medicine**
- **Follows 5-point scale similar to many conventional LOE scales**
- **Population is so different; crew are exposed to austere conditions & medical care is limited**
- **Space flight data are the most relevant input for the model**

*A quality of evidence (QOE) score provides an assessment of the evidence base for each medical condition.*

Quality of Evidence	
Excellent	1-2
Good	2.1-3
Fair	3.1-4
Poor	4.1-5

- Calculation for QOE is the average of the categories of input data
- Averaging provides an objective assessment of the LOEs
- Allows IMM Team to manage evidence base
- Innovative practical use of the database

Assign LOE  
1-5 & 1 being  
the highest
