

The background of the slide is a reproduction of Leonardo da Vinci's 'Vitruvian Man' drawing. It shows a male figure inscribed within a square and a circle, with arms and legs extended to the boundaries. The drawing is on aged, yellowish paper with some faint text visible in the background.

Human-Centered Design The STEAM Renaissance

Guy André Boy

Florida Institute of Technology

NASA Kennedy Space Center

“There is no difference (at the highest level) between the cold speculative intelligence and artist’s intuition. There is something artistic in scientific discovery and something scientific in what naive people call “artist’s genius intuitions.” What they have in common is the happiness of Abduction.”

(Umberto Eco, *Il superuomo di massa*, 1976)
