ACKNOWLEDGEMENTS

We wish to thank all institutions; NGOs, Ministries, UN Organizations and Agencies for the necessary co operations and logistical support which made this inventory exercise possible.

Sincere thanks are due particularly to several Tanzania Food and Nutrition Centre (TFNC) staff who made important contributions from the preparation to the inventory exercise itself. These include TFNC management team, programme officers and support staff.

This inventory exercise could never have been completed without high-level commitment of many individuals and institutions so that they become real exchange partners of Food Nutrition and related issues materials

1.0 BACKGROUND

1.1 Rationale

Tanzania Food and Nutrition Centre (TFNC) has been producing publications to meet the needs of various stakeholders at different levels. These stakeholders include policy makers, trainers, researchers, students, extension workers and the general public. Others are the Ministries and its affiliated institutions that we collaborate with. These are the Ministries of Health and Social Welfare, Education and Vocational Training, Agriculture, Food Security and Co-operatives, Regional Administration and Local Government, Community Development Gender and Children. Also the Centre collaborate with the University of Dar es Salaam (UDSM), Muhimbili University College of Health Sciences (MUCHS), Sokoine University of Agriculture (SUA), The Open University of Tanzania (OUT), Hubert Kairuki Memorial University, Tanzania Commission for AIDS (TACAIDS), National AIDS Control Programme (NACP), National Institute of Medical Research (NIMR), National Bureau of Statistics (NBS), Commission for Science and Technology (COSTECH), Tanzania Bureau of Standards (TBS), Tanzania Drugs and Food Authorities (TFDA), Some NGOs, secondary schools (ordinary and advanced levels) particularly those teaching Home Economics and Human Nutrition and the Public Libraries which all receive TFNC publications.

Other stakeholders which the Centre collaborates with are International organizations. These include United Nation Children Funds (UNICEF), World Health Organization (WHO), Swedish International Development Agency (SIDA), Food and Agriculture Organization (FAO), Canadian International Development Agency (CIDA), United State of America International Development (USAID) The Technical Centre for Agricultural and Rural Cooperation (CTA), The International Baby Food Action Network Africa (IBFAN Africa), Natural Research Institute (NRI), World Alliance for Breastfeeding Action (WABA) and African Medical Research Foundation (AMREF).

The Centre over the years; has been distributing its publications to those stakeholders through various channels such as workshops, Books exhibitions, postal delivery on request or personal visits.

Since the distribution of TFNC publications has been carried out in that style for a long time, it was felt that there is a need to review the list of our stakeholders both inside and outside the country. We desired to review the list due to the fact that since contact persons may have moved, or scope of partners may have changed or even new partners may be interested in our products.

With that in mind therefore, the inventory exercise has enabled us modify the list to remove/add new users for improvement of the distribution for better knowledge sharing. Also through inventory we have been able to sensitize the institutions that produce publications of our interests and we have identified what we can get from them on exchange agreements.

The following activities were done so as to accomplish the inventory exercise:

- Development of a tool for the inventory
- Take inventory of local and international institutions that are relevant to the Centre.
- Take inventory of their existing websites
- Check list of existing contact persons in collaborating institutions
- Take stock of relevant publications produced by collaborating institutions
- Establish mode of communication with partners and their postal/physical addresses
- Compile an exhaustive list of exchange partners for the Centre
- Compile useful Websites to the Centre.

1.2 Objective of inventory exercise

1.2.1 General objective

To take inventory of Nutrition publications Exchange Partners with TFNC so as to strengthen TFNC Library collection as well as achieving a wider dissemination of Food and Nutrition Information.

1.2.2 Specific objectives:

1. To identify Nutrition information Exchange partners
2. To identify partners producing/generating information on nutrition or related matter for public use
3. To establish mode of communication with partners and their postal/physical addresses
4. To identify proportion of partner receiving publications from TFNC.

2.0 METHODOLOGY OF THE STUDY

2.1 Study population:

The target population comprised of all Ministries, NGOs, UN Agencies and Institutions involved in implementation and dissemination of Food, Nutrition Health and related information to the community based in Dar es Salaam. Also we targeted Development partners (International Organizations and bilateral and multilateral Agencies) outside Tanzania dealing with designation of Food Nutrition and related information.

2.2 Sampling procedures:

Purposive sampling techniques was used in selecting 7 Ministries, 10 NGOs, 10 UN Agencies and Bilateral Organizations and 14 Research, Service and Academic Institutions.

2.3 Data collection procedures.

A questionnaire to be used to collect relevant data was developed by 4 TFNC programme officers and later on distributed to the respondents who were required to fill in. These were the heads of communication, IEC units, Training units or Librarians under the institutions. Questionnaires were sent to respondents through postal channels as well as physical contacts. In most cases, there was physical dialogue between the investigators and the respondents on the importance of the assessment before it was accepted and affected.

The project staff were later on responsible for follow-up and collection of the completed questionnaires from the respondents. Some of the questionnaires were returned to TFNC by respondents themselves or via post.

Additionally, information was collected through documents, e-mail and through discussion with the relevant staff in the relevant institutions.

2.4 Data processing and Analysis:

Data collected from respondents were summarized manually on various sheets of papers. In summarizing the data great care was taken to make sure that it actually reflected the original meaning of information collected.

Numerical datas were summarized in tables using descriptive statistics of percentages for easy presentation and interpretation.

3.0 FINDINGS

3.1 Characteristics of Information Exchange Partners involved

Four categories of institutions were involved in the rapid assessment of nutrition information exchange partners. These are Government Ministries/ministerial departments; Non-Government Organizations, United Nations Agencies/bilateral Organizations as well as Research, Service and Academic Institutions.

The type of institutions under each category with its major purpose of establishment (goal) is clearly indicated below.

Table 1: Characteristics of Respondents

Nature of Partner	List of Respondents	Major purpose of Organisation
1. Ministries	Ministry of Health and Social Welfare (i) HQ (ii) NACP (iii) Elimu ya Afya kwa Umma	To promote Health Services of high quality, effective and accessible to all, delivered by a well performing and sustainable National Health System.
	Ministry of Agriculture Food Security and Cooperatives (i) Ukulima wa Kisasa (ii) National Food Security (iii) Nutrition Unit	To promote food crop production, improve food storage, processing and marketing through research, education and policy for the purpose of improving food security of Tanzania population.
	Ministry of Community Development Gender and Children (Policy and Planning)	To facilitate communities socio-economic development through partnership and Networking and to enhance Gender equality and equity and promote child rights.
	Ministry of Education and Vocation Training (Information Education and Communication)	Tanzania to be a nation with high level of education at all levels; a Nation which produces the quality and quantity of educated people sufficiently equipped with the requisite knowledge to solve the society's problems, in order to meet the challenges of development and attain competitiveness at regional and global levels.
2. NGOs	Tanzania Home Economics Association (TAHEA)	To enhance the needs of families in Rural areas through efficient Implementation of Home Economic programs.
	Research on Poverty Alleviation (REPOA)	Undertake and facilitate Research, Training and Promote dialogue and Development of Policy for Poverty alleviation.
	Legal and Human Rights Centre (LHRC)	Empower the Public, promote reinforce and safeguard Human Rights and good Governance in Tanzania.
	Counseling for Nutrition and Health (COUNSENUH)	Provide Nutrition Care and Counseling to Vulnerable groups at community level
	PASADA	To provide community education, home based care and treatment for PLWHA
	Helen Keller International (HKI)	To save sights and lives of the most vulnerable by combating the causes and consequences of Blindness and malnutrition
3. UN Agencies Bilateral Organizations	World Food Programme (WFP)	Food Aid for emergency and development.
	Food and Agriculture Organization (FAO)	Achieving food security for all-thru promotion of nutrition and agriculture productivity and bettering the lives of rural populations.
	United Nations Development Programme (UNDP)	Reduction of poverty in developing communities through provision of knowledge-based consulting services and building national, regional and global exaltations for change
	United Nation Children's Fund (UNICEF)	Development and protection of child survival rights interms of health nutrition and social wellbeing.
	World Health Organization (WHO)	Enable the world population to attain the highest possible level of health through policy development and advocacy education and training
	Swedish International Development Agency (SIDA)	To help create conditions that will enable the poor improve thanchures
	United States Agency for International Development (USAID)	Improving the health status of families especially poor countries.

4. Research, service and academics Institutions	The Hubert Kairuki Memorial University	To educate liberally and broadly qualifying men and women to undertake research and provide service to the public
	Sokoine University of Agriculture: (Food Science and Technology Department)	Training, Research and outreach
	Tanzania Records and Archives	To provide Archival and records management services and to increase public awareness on the importance of written heritage to the nation
	Tanzania Food and Drugs Authority (TFDA)	To protect the public health by ensuring quality, safety and effectiveness of food, drugs, cosmetics and medical devices.
	Tanzania Institute of Education (TIE)	To conduct research evaluation designing and reviewing curricula, setting standards at pre-primary, primary, secondary and teacher education and provide professional advice to MOEVT and stakeholders.
	National Institute of Medical Research (NIMR)	To conduct research and provide evidence based information to the Ministry of Health and Social Welfare for solving health problems in Tanzania and Africa as a whole.
	Tanzania Commission for Science and Technology (COSTECH)	Provide science and technology for economic development, stimulate the generation of scientific and technological knowledge which is to be applied in socio-economic development.
	Open University of Tanzania (OUT) Home Economics, Faculty of Science)	Provide distance learning education on the field of home economics and human nutrition
	Jangwani Secondary School Food and Nutrition department)	To promote better understanding in matters concerning family relationship and child development consumption and improve nutrition in the context of selection, preservation, preparation and use of food
	Tanzania Library Service (TLS)	To provide and disseminate appropriate information to all people for education development cultural enrichment leisure and inculcate and promote reading habits.
	Benjamin William Mkapa Secondary School (Food and Nutrition department)	To teach food and nutrition subject from form one to form six.
	Tanzania Commission for AIDS	To provide strategic leadership for a national, multi-sectoral response to Tanzanians from the threat of HIV/AIDS and support those who are already infected and affected by HIV and AIDS.

Response rate was close to 60% with lowest status among United Nations Agencies/bilateral Organizations and highest among Research, Service and Academic Institutions.

Generally, the major purposes of establishment of almost all the respondents indeed reflect the key features of the conceptual approach to the problem of malnutrition among disadvantaged and developing communities designed and advocated by TFNC and UNICEF.

3.2 Partners involved in production and documentation of nutrition or related publications/information

Out of the 33 respondents, 17 (51.5%) deal with production and documentation of relevant publications. Among these, the ministries/departments and the UN Agencies/Bilateral Organizations rated higher compared to Non-government Organizations and Research Service and Academic institutions (Table 2).

Table 2: Proportion of respondents producing publication/generating nutrition or related information for public use.

Nature of Partner	Number of respondents	Production of relevant publications	Partners using publications for exchange or sale	
			Exchange	Sale
1. Ministries/departments	8	6(75%)	5(62.5%)	3(37.5%)
2. Non Government Organizations	6	3(50%)	4(66.7%)	3(50%)
3. UN Agencies/Bilateral Organizations	7	5(71.4%)	3(42.8%)	1(14.2%)
4. Research, Service and Academic Institutions	12	3(25%)	4(33.3%)	2(16.6%)
Total		17(51.5%)	16(48.5%)	9(27.3%)

Some of the UN Agencies/bilateral organizations (UNICEF, UNDP), Annex 1; and other Organizations in this category, reported that they produce such material in collaboration with relevant partners.

It is also worthwhile to note here that although Research Service and Academic Institutions are expected to lead the process of production and documentation materials in question, but according to this assessment they produce minimum number of such materials. At the same time they are the ones handling most of such publications (Table 3) indicating dependency on other institutions for their nutrition information needs.

Table 3: Proportion of respondents not producing/generating nutrition information but handling it

Nature of Partner	No of Respondents	Handling of relevant publications
1. Ministries/departments	8	4(50%)
2. Non-Government Organizations	6	3(50%)
3. UN Agencies/Bilateral Organizations	7	3(42.8%)
4. Research Service and Academic Institutions	12	7(58.3%)
Total	33	17(51.5%)

It could also be assumed here that there may be a considerable number of institutions under Research, Service and Academic Institutions generating information from research and related services but do not develop it into publication.

About half (51.5%) of all the institutions handle nutrition information although they may not have generated it themselves.

The good news here is that most of the publications under all categories of institutions are free for exchange (48.5%) and not for sale (27.3%) Table 2.

3.3 Nutrition information/publication needs by partners from TFNC and means of Acquisition.

Most institutions (75% - 85%) accepted to have acquired or come across TFNC publications or draft reports. The means of acquisitions of such materials was predominantly reported to be free (Table 4(a)).

Table 4(a): Proportion of partners receiving publications from TFNC and means of acquisition

Nature of Partner	No of Respondents	Acquisition	Means of Acquisition		
			Borrowing	Free	Purchase
1. Ministries/departments	8	6(75%)	0(0.0%)	5(62.5%)	2(25%)
2. Non-Government Organizations	6	5(83.3%)	0(0.0%)	5(83.3%)	0(0.0%)
3. UN Agencies/Bilateral Organizations	7	6(85.7%)	0(0.0%)	6(85.7%)	0(0.0%)
4. Research Service and Academic Institutions	12	9(75.6%)	1(8.3%)	9(75.6%)	0(0.0%)
Total	33	26(78.8%)	1(3.0%)	26(78.8%)	2(6.1%)

Among the respondents, UN Agencies/Bilateral Organizations appear to be the ones mostly acquiring our publications and freely. Since such institutions are also among the ones producing/documenting such kind of information/publications most it can be assumed that these are the ones mostly in need of such kind of collaboration (information exchange/sharing). Otherwise the difference in acquisition of such publications is minimal and therefore insignificant.

3.4. Reasons for not receiving TFNC publications/information

Among the few reasons provided by the respondents for not often receiving information from TFNC, was poor communication (lack of established network) which appeared to be a bigger problem than either lack of awareness or low priority assigned to such kind of information among TFNC partners. This was even more so under the ministries/departments despite the fact that such information needs for this group could be considered most essential. This is because most of the reliable extension workers up to the grassroot level are under the government ministries/departments.

Low priority assigned to nutrition information and therefore publications was not reported anywhere except under UN Agencies/Bilateral Organizations where it also appears to be insignificant.

Table 4(b): Reasons for not receiving TFNC publications/Information

Nature of Partner	No of Respondents	Reasons given		
		Lack of Awareness	Poor Communication	Low Priority Assigned
1. Ministries/departments	8	0(0.0%)	4(50%)	0(0.0%)
2. Non-Government Organizations	6	1(16.3%)	1(16.3%)	0(0.0%)
3. UN Agencies/Bilateral Organizations	7	1(14.2%)	1(14.2%)	1(14.2%)
4. Research Service and Academic Institutions	12	1(8.3%)	2(16.7%)	0(0.0%)
Total	33	3(9.1%)	8(24.2%)	1(3.0%)

3. 5. TFNC publication (information) exchange needs by partners

Generally all the partners contacted indicated great needs of nutrition information/publications from TFNC ranging from 63.6% - 90.9%. Out of nine titles presented, information on diet-related issues and household food security appear to be required most while that on Vitamin A Deficiency specifically, appear to be required least as shown by Table 5 below.

Table 5: Frequency of TFNC publications (information) exchange needs by partners

Nature of Partner	No of Respondents	Types and Proportion of TFNC publication/information needs								
		Diet related issues	Household Food Security	Infant and Young Child Nutrition	Iodine Deficiency Disorder	Maternal Nutrition	Nutrition and HIV/AIDS	Other Nutrition Publication	Nutrition anaemia	Vitamin A Deficiency
1. Ministries/ departments	8	8(100%)	8(100%)	6(75%)	6(75%)	7(87%)	6(75%)	6(75%)	6(75%)	6(75%)
2. Non-Government Organizations	6	5(83.3%)	6(100%)	5(83.3%)	4(66.7%)	4(66.7%)	6(100%)	6(100%)	6(100%)	4(66.7%)
3. UN Agencies/ Bilateral Organizations	7	5(71.4%)	5(71.4%)	5(71.4%)	5(71.4%)	5(71.4%)	5(71.4%)	5(71.4%)	5(71.4%)	5(71.4%)
4. Research Service and Academic Institutions	12	12(100%)	11(91.7%)	11(97.7%)	9(75%)	6(50.0%)	10(83.3%)	10(83.3%)	7(58.3%)	6(50.0%)
Total	33	30(90.9%)	29(87.9%)	27(81.8%)	24(72.7%)	22(66.7%)	28(84.8%)	27(81.8%)	22(66.7%)	21(63.6%)

Basing on the individual partners, full requirement (100%) of such information was indicated for Diet Related issues (Ministries/departments, Research, Service and Academic Institutions); Household Food Security (Ministries/departments and Non-Government Organizations); Nutrition and HIV/AIDS and other nutrition material publications (Non-Government Organizations).

It may be predicted as such that the Ministries/departments and the Non-Government Organizations are the ones requiring our publications most. In the case of the UN Agencies/Bilateral Organizations where the rate of nutrition information needs is the same for all titles this is because two of the respondents (Sida & USAID) didn't indicate any needs of nutrition information from TFNC while the rest indicated full requirement of all the available information.

3.6 Nutrition Information exchange means/communication media

This quick assessment revealed that there may not be significant difference between the uses of various communication media suggested among the information exchange partners. Such media are visits, seminar/workshops, TV, radio, internet and book exhibitions whose response ranged from 21.2% (TV) to 48.5% (Internet).

Table 6: Information exchange means/communication media used by various partners

Nature of Partner	No of Respondents	Medium of Use for Info exchange and proportion						
		Visits	Postal	Seminar/Work shop meeting	TV	Radio	Internet Website	Book exhibition
1. Ministries/departments	8	8(100%)	2(25%)	6(75%)	5(62.5%)	6(75%)	6(75%)	7(87.5%)
2. Non-Government Organizations	6	2(33.3%)	3(50%)	2(33.3%)	0(0.0%)	1(16.3%)	1(16.2%)	1(16.3%)
3. UN Agencies/Bilateral Organizations	7	1(14.3%)	3(42.8%)	0(0.0%)	0(0.0%)	0(0.0%)	4(57.1%)	0(0.0%)
4. Research Service and Academic Institutions	12	0(0.0%)	3(25%)	4(33.3%)	2(16.7%)	2(16.7%)	5(41.7%)	3(25%)
Total	33	11(33.3%)	11(33.3%)	12(36.4%)	7(21.2%)	9(27.3%)	16(48.5%)	8(24.2%)

What can be noted here is that all the response rates are below 50% indicating perhaps inadequate experience on the use of such media. However, internet/website could be the best means of communication of nutrition information preferred by the TFNC partners.

Generally it is the ministries/departments who mostly have experience or confidence on the use of such communication means for exchange of such information. The UN Agencies/Bilateral Organizations on the other hand prefer the use of postal (42.8%) as well as internet services (57.1%).

4.0 CONCLUSION AND RECOMMENDATIONS

4.1 Conclusion.

- Production/generation of nutrition information among the institutions contacted (ref. Table 1) was around average |(51.5% of total respondents) and surprisingly it was not encouraging for Research, Service and Academic Institutions.
- Nutrition information was predominantly produced for exchange and not for sale.
- Research, Service and Academic Institutions seem to be the ones mostly handling nutrition publications/information although they were not producing it themselves.
- Most of the respondents (75% - 85%) had acquired or come across TFNC information materials and most of the information (78%) was freely acquired.
- Research, Service and Academic Institutions as well as Ministries/departments are lagging behind in acquiring TFNC information materials compared to UN Agencies/Bilateral Organizations and Non-Government Organizations.
- Poor communication (lack of established exchange means) appeared to be a bigger problem than either lack of awareness or low priority assigned to such kind of information among TFNC partners.

- All partners contacted indicated high needs of nutrition information/publications from TFNC especially those on diet-related issues and food security.
- Use of website/internet in information exchange was preferred most compared to other cited means of communication ie. visits, seminars/workshops, TV radio postal services and book exhibition.

4.2 Recommendations:

- TFNC as well as other Research oriented and Academic Institutions dealing with nutrition should be encouraged to generate, publish and share relevant information through established/reliable means.
- Free means of acquisition of nutrition information found among most of the institutions in question should be commended/encouraged since it promotes use of such information.
- More effort required in promoting awareness on what TFNC is doing and therefore nutrition information material documented at the institution among partners especially relevant ministries the Research, Service and Academic Institutions and even the general . This will raise awareness and create demand for nutrition information exchange. This could be achieved through socio-marketing strategies in electronic and non-electronic media.
- Ensuring regular participation in nutrition info exchange opportunities e.g. meetings of the national nutrition information documentation committee (stakeholders) joint publication exhibitions especially during annual events related to nutrition including national conferences and book exhibitions.
- Ensuring for regular exchange of scientific journals or newsletters and key official reports published by TFNC and partners.
- Finalize and publicize establishment of TFNC website among TFNC partners and the general public.

- Where possible most of the existing reports particularly those showing increased public demand (although unpublished) should be processed electronically for easy consumption.

3.0 ANNEXES

Annex 1: Proportion of respondents producing publications/generating nutrition or related information for public exchange or sale.
