The methodical recommendations are designed to help the students studying English for scientific and technical purposes (ESP) at the correspondence department. The methodical recommendations are organized around grammar relevant to the Assignments for the first year students. Every section explores one grammar point and contains practice exercises. There is a section with general classification of parts of speech in English, Russian and Ukrainian which is helpful in better understanding the grammar comments and tasks in Assignments. Most of the exercises provide the learner of English with authentic texts and focus on the English vocabulary in use.

I entertained John to a nice low calorie meal yesterday and at the end I offered him some jelly. 'What does “jelly” come under?' he asked looking at his chart. 'Half a litre of double cream, ' I said, pouring the stuff over my plate!

● Most street names do not have the in front of them: George Street, but the High Street.

● The is not used with at work, at home, at school, go to work, go home, go to school:
He goes to school at eight o 'clock. What time does she go home?

● The is not used with nouns used with a general meaning: Milk is good for you.
• When it is used with ordinary nouns (not names of unique places, pop groups etc) the meaning of *the* is to make the noun specific and definite. We use it to draw attention to something specific, for example:

   *My grandmother goes to church on Sundays.*
   — *Oh, which one?*
   *The big church in the centre of town.*

That is the easiest and most general rule. There are other rules but most have exceptions, so they are not always very helpful.

• To refer to unique nouns (the names of places, lakes, pop groups, organisations etc). It is very difficult to give general rules. It is best to learn the names. Here are some lists to help you.

1.8 Gender. Male and female word forms

- There is no grammatical gender for nouns in English. Though there can be exceptions we use only <he> and <she> to refer to people and <it> to refer to everything else. It is the pronouns, not the nouns, that tell us whether the reference is to male or female:

  He is the person you spoke to. She is the person you spoke to.

- We still have a few male and female word forms (<man/woman>) and a few -ess endings that refer to females: waiter/waitress, lion/lioness. In the case of people, this -ess ending is becoming rare. In the interests of sexual equality, words like author and manager refer to both sexes, rather than using 'authoress' or manageress for a woman.

Task A. Supply the missing words. Refer to this list as little as possible.

male or female until we hear the pronoun:

In many parts of the world, it is now unthinkable for a person to dress in (a coat made of the skin of a leopard)(2) _____. We realize that (the wildlife of the earth) 3) ____ needs protection. This affects such things as (clothing worn by children) (4)
If (a fur coat worn by an actress) attracts admiration these days, it is probably created from man-made materials. Of course, we still farm animals for their skins, but the notice I saw in a shop recently must have been (the revenge of the crocodiles) . It was selling crocodile-skin bags and offering the following service: ('skins of customers') made up'!

  - stupid, polite, common, gentle, narrow, clever
  - friendly, pleasant, happy, quiet, expensive, simple

- Ordinal numbers (first, second, third, etc.) go before cardinal numbers (one, two, three, etc.)
  
  e.g. the **first two** weeks

- We do not usually use a long list of adjectives before a single noun. A noun is usually described by one, two or three adjectives at the most.

  e.g. a **modern technological** progress

Task A. Look at each advertisement and write the information in a single sentence.

- This game is new. It’s for the family. And it's exciting.

  This is an exciting new family game.

1. This computer is for business. It’s Japanese. And it's powerful.

4 Why don't we have a break in the ________ weeks of May? (middle, two)
5 The ________ survivor of the air crash has died. (remaining, last)

2.1 Comparative and superlative patterns

2.1.1 Less and least

- Less and least are the opposites of more and most. We use less and least with both long and short. e.g. A bus is less expensive than a taxi.

(= A bus is cheaper than a taxi. / A bus isn’t as expensive as a taxi.)

I feel better today, less tired. I’m the least musical person in the world, I’m afraid.

We go out less often these days. You should do less work. You do too much.

2.1.2 Much faster

- We can put a word or phrase (e.g. much, far, a bit) before a comparative to say how much faster, cheaper, etc something is. Look at these examples.

It's much faster by tube. A bus is far cheaper than a taxi.
This bed is a bit more comfortable. Business is rather better this year.
I got up a little later than usual. This month’s figures are slightly less good.
I’ll need a lot more water. A computer will do it much more efficiently.

- Before a comparative we can use much, a lot, far; rather; slightly, a bit, a little.

- We can also use no and any. No has a negative meaning.
Your second throw at the basket was no nearer than your first.

- We can use any in negatives and questions and with if.
  
  Your second throw wasn't any nearer than your first.
  
  Are you sleeping any better since you've been taking the pills?
  
  If we leave any later than seven, we'll get caught in the rush hour.

2.1.3 Faster and faster

- We use expressions like faster and faster and more and more expensive to say that something is increasing all the time.

  The caravan was rolling faster and faster down the hill.
  
  The queue was getting longer and longer.
  
  Prices go up and up. Everything gets more and more expensive.

- The form depends on whether the comparative is with -er (e.g. louder) or with more (e.g. more expensive).

- We can also use less and less for something decreasing.

  As each new problem arose, we felt less and less enthusiastic.

2.1.4 The faster, the better

- We use this pattern to say that a change in one thing goes with a change in another. Look at these examples

  There's no time to lose. The faster you drive, the better.
  
  The higher the price, the more reliable the product.
  
  The more the customer complained, the ruder and more unpleasant the manager became.
  
  The sooner we leave, the sooner we'll get there.
2.1.5 As… as

- We use *as… as* to say that things are equal or unequal.

  *Our office is as big as yours.* (They are the same size.)

  *His qualification is as high as hers.* (They are the same level.)

In a negative sentence we can also use *so…as*, but this is less common than *as… as*.

  *This office isn't as big as our old one.*

  *The tax cut isn't as big as the price rise.*

Here are some more examples of *as … as*.

  *I don't earn as much money as I'd like.*

  *Changing the rules may do as much harm as damage.*

**Note:** also *the same as*.

  *The result of the competition was the same as last year.*

**Task A. Complete the sentences. Use less with these words:**

*attractive, busy, convenient, nervous, optimistic, painful, seriously*

1. David says his leg really hurt at first, but now it's _____.

2. Mark and Sarah normally have lots to do, but they're _____ this week.

4. Claire used to think Henry was very handsome, but now she finds him _____.

5. Matthew is always exercising. Maybe he should take his fitness _____.

6. With United’s best players injured, Tom feels _____ about their chances.
Task B. **Decide what to say. Use a phrase like *a bit better or a lot colder.*

- You were feeling unwell earlier. Say that you feel better now. A bit, anyway.

  *I feel a bit better now.*

1 Mention that yesterday was colder than today. A lot colder, in fact.

2 Say that your coat is longer than is fashionable. A bit, anyway.

3 You left work earlier than usual this afternoon. Slightly, anyway. Tell your friend.

4 Say that the shop is more expensive than the supermarket. Much more.

3 NUMERALS

- Numerals include all numbers, whether as words or as digits. They may be divided into two major types.

CARDINAL numerals include words like:

- nought, zero, one, two, 3, fifty-six, 100, a thousand

ORDINAL numerals include

- first, 2nd, third, fourth, 500th

- We classify numerals as a **subclass of nouns** because in certain circumstances they can take plurals:

  five **twos** are ten
  he’s in his **eighties**

- They may also take **the**:

  the fourth of July
  a product of the 1960s

- And some plural numerals can **take an adjective** before them, just like other nouns:

  the house was built in the **late** 1960s
  he’s in his **early** twenties
  the temperature is in the **high** nineties
- In each of the examples, the numerals occur independently, that is, without a noun following them. In these positions, we can classify them as a type of noun because they behave in much the same way as nouns do. Notice, for example, that we can replace the numerals in our examples with common nouns:

  - *he is in his eighties*  
  - *he is in his bedroom*  
  - *the fourth of July*  
  - *the beginning of July*  
  - *a product of the 1960s*  
  - *a product of the revolution*

- Numerals do not always occur independently. They often occur before a noun, as in:

  - *one day*  
  - *three pages*  
  - *the fourth day of July*

In this position, we classify them as determiners.

1. adjectives
2. nouns
3. adverbs

FRACTIONAL NUMERALS

Fractional numeral is used to express parts of a whole. Commonly, it takes two forms:

1. COMMON FRACTION

Works according to the formula: **Wholes + Numerator/Denominator**

*Example:* $1 \frac{2}{3} = \text{(is equal to or means) one (whole) and/plus two thirds}

Note the "s" added to the denominator: "thirds".

2. DECIMAL NUMBERS

Work according to the formula: **Whole numbers (point) decimals**

*Example:* $12.15 = \text{(is equal to or means) twelve fifteen, or twelve point fifteen}

TECHNICAL (SCIENTIFIC) NUMERALS

Technical numerals are a new, needed addition due to technological development. Few of the most common forms are summarily presented in the following table:

**Grammar Comment**

**3.1 Difficulties in spelling**

four *BUT* forty, fortieth  
five *BUT* fifteen, fifty, fifth  
eight *BUT* eighth  
nine *BUT* ninth  
twelve *BUT* twelfth  
thirty *BUT* thirthieth

There is a hyphen between tens and digits, e.g. twenty-two, one hundred and eighty-seven

**3.2 General remarks about cardinal numbers**

**a.** 1,000,000,000 is a thousand million in British English, and a billion in American English. The American way of reading the number 1,000,000,000 is getting more and more common.

**b.** A comma is used instead of spaces or dots to separate the thousands. Spaces are possible in British English only.

**c.** In British English we say 'and' after the word 'hundred', e.g. 113 - *one hundred and thirteen*; 320,000 - *three hundred and twenty thousand*.

**d.** 'A' before 'hundred', 'thousand', 'million' etc. is more popular than 'one' if these numbers stand alone, e.g. 100 - *a hundred*. 

Otherwise 'one' is more popular, e.g. 1,140 - one thousand one hundred and forty

e. In bigger numbers, we put 'and' before the tens when the hundreds are missing, e.g. We have the year two thousand and five.

f. Round numbers between 1,100 and 1,900 are often read 'fifteen hundred', 'eighteen hundred' etc.

g. 12 is a dozen; 20 is a score; 60 is threescore; 144 is a gross

h. anything above 1 is already plural in English, e.g. 1.5 litres of water

i. centuries are given in Arabic numbers, e.g. we live in 21st century.

3.3 Fractions

½ - a half

2 ½ - two and a half

¼ - a quarter

⅓ - three quarters (three fourth)

⅛ - one eighth (an eighth)

⅞ - seven eighths

3.4 Decimals

NB: in English a 'point', not a comma, is used in decimal fractions!

We read the digits after the point separately.

0.5 - oh (OR: nought) point five

2.5 - two point five
0.75 - oh point seven five
15.735 - fifteen point seven three five

3.5 Ways of saying the number 0
- generally, the figure '0' is usually called 'nought' in BrE, and 'zero' in AmE.
- in a series of numbers (such as a credit card number or telephone number) you can pronounce 0 like the letter o;
- in mathematics, science, and technical contexts say nought or zero (sometimes also 'cipher');
- in temperatures say zero to refer to freezing point (0 Celsius or -32 Fahrenheit);
- in sports for scores of 0 say nil (BrE), zero or nothing (AmE) (in tennis say love - originally from French ['œuf'] – egg).

3.6 Ordinal numbers
a. The article 'the' normally precedes ordinal numbers, e.g. the seventh day of the week.
b. to make the pronunciation easier, we put /θ/ before the 'th' ending,
   e.g. 30th - ['θoːtið]
c. We use the ordinal numbers, preceded by 'the', in titles of kings in spoken English, e.g. Elizabeth the Second

3.7 Saying the numbers of years
1066 - ten sixty-six
1605 - sixteen oh five
1776 - seventeen seventy-six
1900 - nineteen hundred
2000 - (the year) two thousand
2001 - two thousand and one OR twenty oh one

We don't say 'year' after the number, we may say 'the year 2005' but before the number.

3.8 Dates

a. We have two ways of saying the dates, e.g. 10 March
   - the tenth of March (3 elements added in spoken English!) - British English
   - March (the) tenth (2 elements added in spoken English!) - American English

b. BC - Before Christ - after the date;
   AD - Anno Domini, or in the year of the Lord - before or after the date;

c. If we write dates in numbers only, we often use slashes, not dots, e.g. 3/11/99.
   Note: we do not use '0' before single digits.

d. in American English the month comes before the day, e.g. 5/3/94
   5th March in Britain
   3rd May in the USA

3.9 Weights

a. 'hundredweight' (GB=50.80 kg; US=45.36 kg) or 'stone' (6.53 kg) has no plural form
3.10 Telling the time

a. There are 3 ways of telling the time:

- the informal (e.g. at home)

  6.10 - ten past six (in the morning)
  7.03 - three minutes past seven (in the morning); *AmE* also: three minutes after seven
  8.55 - five to nine (in the morning)
  9.49 - eleven minutes to ten (in the morning)
  10.30 - half past ten (in the morning) - sometimes even 'half ten'
  11.15 - a quarter past eleven (in the morning)
  12.00 - noon OR midday
  18.45 - a quarter to seven (in the afternoon); *AmE* also: a quarter of seven
  20.00 - eight (o'clock) (in the afternoon)
  24.00 – midnight

- the quite formal (e.g. on the radio) - the 12-hour clock

  7.03 - seven oh three
  12.00 - twelve a.m.
  20.00 - eight p.m. OR twenty (hundred) hours
  24.00 - twelve p.m.

- the formal (e.g. for timetables) - the 24-hour clock

  6.10 - six ten
  10.30 - ten thirty
  18.45 - eighteen forty-five
b. The word 'minutes' is used ONLY for the number of minutes which is not divisible by 5. With uneven numbers we mustn’t omit it however.

c. We never use 'o'clock' together with 'a.m.' or 'p.m.'.

3.11 Money

a. we put the symbols before the number, e.g. $200, €500.

b. $46.80 is read forty-six dollars eighty cents; £25.16 - twenty-five pounds sixteen pence

c. a quid = £1 (one pound in money); a dime - a coin in the US and Canada worth ten cents; a nickel –a coin of the US and Canada worth 5 cents; a quarter - a coin of the US and Canada worth 25 cents; kilo - often means ‘a thousand’; in informal contexts ‘pound’ is not pluralized.

3.12 Telephone / room etc numbers

a. They are read separately, e.g. Room 106 - room number one oh six.

b. 'Oh' is used in British English, whereas 'zero' is used in American English.

c. shortenings in British English: 22 - double two; 999 - triple nine etc. (American English: 22 - two two)

6.1 British English vs American English Grammar

In British English, shall is sometimes used with I and we in place of will.

- I shall be in tough again soon.  
- I will be in tough again soon.

6.2 be going to

Predictions based on present  
Look at that wall. It looks as if it's going to fall down.

Intentions  

I'm going to get my degree, then get a well paid job.

- We use going to when there is external evidence for a future event and will when we state our own intuitions:

  Look at those clouds – it's going to rain.
  I expect he'll want to stay in the best hotel. (I know what kind of person he is)

Task A. Fill in the gaps with will or be going to.

1 Sonia looks like she _____ fall asleep right now.
2 What _____ the office of 2020 be like?
3 I think house prices _____ fall in about six months.
4 The airline industry _____ cut costs in the near future.
5 I’m sure you _____ enjoy your visit to our Head Office.

Task B. Making offers. How could you offer to help in these situations?

Example: 'It's too far to the station.' - 'I'll give you a lift if you like.'
1 'It's really hot and stuffy in here.' ________________________________
2  'I don't understand this English and it needs translating.' ___________________________
3  'This desk is too heavy. I can't move it.' ________________________________
4  'Damn! I’ve missed the last bus.' ________________________________
5  'I don't know how I’m going to find time to prepare any slides.' ______________

Task C. Read this email message to Professor Fox. Find and correct nine mistakes in the use of the future with will and be going to.

**Re: Travel Plans**

*won’t*

Harry – I'm sorry that we **will not** be able to get together in London. Martha will misses you, too. Perhaps we can get together sometime next month.

Martha and I am going to be in Birmingham until 15 July. After that, we are going visit our son in Brighton. His wife is pregnant and will have a baby in July. It's hard to believe that we going to be grandparents!

How exciting that you going to talk at the conference! I’m sure it will be great.

I’ve got to run now. The sky is getting really dark and there’ll be a storm. I want to get out of this office before then. More later. Greg.

Task A. Underline all forms of the verb to be:

TEACH YOUR BABY TO READ!

This headline has been seen in the newspapers this week. Every parent wants their baby to be a super-baby. It has been suggested that babies are faster and quicker
learners than adults believe they are. Babies were usually kept very quiet and some parents used to think that a good baby was a quiet baby. But now parents are told to speak and read a lot to very young children. Now teachers are saying that these children are learning faster than some of their classmates even when the children are as young as three or four years old. So if there is a young baby in your house, start today, and maybe in a few months time the baby will be reading this to you.

Task B. Fill in part of (be) in each of the spaces.

What do you want to (1) _____ when you grow up? What a silly question to ask a child! But it (2) _____ one if the commonest questions adults ask. The child doesn't know what (3) _____ possible. He cannot imagine all the different jobs that (4) _____ available to him in the modern world — thousands more than (5) _____ available to the silly adult asking the question. And how many more different kinds of jobs will there (6) _____ by the time the child (7) _____ an adult?

The child (8) _____ growing up in a world where we can never (9) _____ sure what (10) _____ round the next corner. And we expect him to (11) _____ sure about his or her future. No wonder many children answer, 'lorry driver'!

  *I have/I've got a good dentist. I have/I've got an appointment at 4.30 etc.*
Task A. Supply correct forms of have and have got. Give alternatives where possible.

THE SENTENCE

The basic word order of an English sentence is usually as follows:

<table>
<thead>
<tr>
<th>subject</th>
<th>verb</th>
<th>object</th>
<th>adverbials</th>
</tr>
</thead>
<tbody>
<tr>
<td>I</td>
<td>mended</td>
<td>the fax</td>
<td>How?</td>
</tr>
<tr>
<td>The employees</td>
<td>have gone</td>
<td>our meal</td>
<td>Where?</td>
</tr>
<tr>
<td>We</td>
<td>ate</td>
<td>in silence.</td>
<td>When?</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

We also put the time reference at the beginning: Yesterday I bought a hat.

The forms of a sentence

A sentence can take any one of four forms:

- a statement: The shops close / don't close at 7 tonight. (declarative)
- a question: Do the shops close at 7 tonight? (interrogative)
- a command: Shut the door. / Don't shut the door. (imperative)
- an exclamation: What a slow train this is! (exclamatory)

Negative sentences

The word order in negative sentences is the same as in affirmative sentences.

Note, however, that in negative sentences we usually need an auxiliary verb:

<table>
<thead>
<tr>
<th>subject</th>
<th>object</th>
<th>indirect object</th>
<th>direct object</th>
<th>place</th>
<th>time</th>
</tr>
</thead>
<tbody>
<tr>
<td>I</td>
<td>will not give</td>
<td>you</td>
<td>any explanation</td>
<td>at the office</td>
<td>tomorrow.</td>
</tr>
</tbody>
</table>

In Standard English, two negatives in the English language destroy each other and are equivalent to an affirmative. For instance, 'I do not disagree' could mean 'I certainly agree'.

- They aren't going anywhere special. (NOT They aren't going nowhere special)

9.4 Interrogative sentences

Interrogative sentences are used in asking questions:

<table>
<thead>
<tr>

<th>verb</th>
</tr>
</thead>
<tbody>
<tr>

<td></td>
</tr>
<tr>
<td>Did</td>
<td>you</td>
<td>travel</td>
<td>to Germany?</td>
<td>No, I didn't.</td>
<td></td>
</tr>
</tbody>
</table>

The examples above are specifically **Yes/No Interrogatives**, because they elicit a response which is either yes or no.

- **Alternative Interrogatives** offer two or more alternative responses:
  
  *Should I telephone you or send an email?*
  *Do you want tea, coffee, or espresso?*

- **Yes/no** interrogatives and **alternative** interrogatives are introduced by an auxiliary verb.

- **Wh - Interrogatives**, on the other hand, are introduced by a *wh-* word, and they elicit an open-ended response:

<table>
<thead>
<tr>
<th>Wh - word</th>
<th>auxiliary, modal, link-verb</th>
<th>subject</th>
<th>verb</th>
<th>object</th>
</tr>
</thead>
<tbody>
<tr>
<td>How often</td>
<td>can</td>
<td>they</td>
<td>communicate</td>
<td>with the boss?</td>
</tr>
<tr>
<td>How</td>
<td>must</td>
<td>a man</td>
<td>plan</td>
<td>his work?</td>
</tr>
<tr>

<td>may</td>
<td>a company</td>

<td>shall</td>
<td>we</td>
<td>respect?</td>
<td></td>
</tr>
<tr>
<td>When</td>
<td>did</td>
<td>you</td>
<td>travel</td>
<td>to Germany?</td>
</tr>
</tbody>
</table>

Questions are sometimes tagged onto the end of a declarative sentence:

- They are confident speaking English, aren't they?
- It's difficult to look after visitors, isn't it?
- He has given a sales presentation, hasn't he?

These are known as **Tag questions**. They consist of a main or auxiliary verb followed by a pronoun or existential *there*.

Please observe the safety rules at work.

Give advice or make suggestions

Read this instruction, please.

Give warnings

Be careful! Don't switch on the lights!!
Invite someone

Come and check the heating in the office.

We can make an imperative more polite or more urgent with *Do*. Compare:

- ordinary imperative: *Help yourself!*
- polite imperative: *Do help yourself!*
- Negative imperative: *Don’t help yourself!*

You can say *Let’s* … when you want people to do things with you. *Let’s = Let us.*

- *It’s a new machine!* Let’s a trained operator drive it.
- *There is no smoking here.* Let’s go out.

Task A. Match each imperative with the correct situation.

<table>

9.6 'There' + 'be'

- We use **there is**, etc. (Not 'it has' or 'it is') when we are talking about or asking about the existence of people, things, etc. It is more 'natural' to say: **There's a man at the door**, than to say: **A man is at the door.**
- We use **there is, there was, there will be, there has been/had been** when we want to: a announce or report events: **There'll be a meeting tomorrow. There's been**
an accident.
b set a scene for story-telling: *There had been* no rain for months. The earth was bare.

11 ACTIVE VOICE, PASSIVE VOICE

There are two special forms for verbs called voice:

- Active voice
- Passive voice

The active voice is the 'normal' voice. This is the voice that we use most of the time. You are probably already familiar with the active voice. In the active voice, the object receives the action of the verb:

<table>
<thead>
<tr>
<th>active</th>
<th>subject</th>
<th>verb</th>
<th>object</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>They</td>
<td>discuss</td>
<td>a problem.</td>
</tr>
</tbody>
</table>
The passive voice is less usual. In the passive voice, the subject receives the action of the verb:

<table>
<thead>
<tr>
<th>passive</th>
<th>subject</th>
<th>verb</th>
<th>object</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>A problem</td>
<td>is discussed</td>
<td>by them.</td>
</tr>
</tbody>
</table>

The object of the active verb becomes the subject of the passive verb:

<table>
<thead>
<tr>
<th>subject</th>
<th>verb</th>
<th>object</th>
</tr>
</thead>
<tbody>
<tr>
<td>active</td>
<td>Everybody</td>
<td>drinks</td>
</tr>
<tr>
<td>passive</td>
<td>Water</td>
<td>is drunk</td>
</tr>
</tbody>
</table>

The structure of the passive voice is very simple:

**subject + auxiliary verb (be) + main verb (past participle)**

The main verb is always in its past participle form.

<table>
<thead>
<tr>
<th>subject</th>
<th>(to be)</th>
<th>main verb (past participle)</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Water</td>
<td>is</td>
<td>drunk</td>
<td>by everyone.</td>
</tr>
<tr>
<td>100 people</td>
<td>are</td>
<td>employed</td>
<td>by this company.</td>
</tr>
<tr>
<td>I</td>
<td>am</td>
<td>paid</td>
<td>in euro.</td>
</tr>
<tr>
<td>We</td>
<td>are</td>
<td>not paid</td>
<td>in dollars.</td>
</tr>
<tr>
<td>They</td>
<td>are</td>
<td>paid</td>
<td>in yen.</td>
</tr>
</tbody>
</table>

We use the passive when:

- we want to make the active object more important
- we do not know the active subject

**Note** that we always use by to introduce the passive object (*A problem is discussed by them*).

Look at this sentence:

- *He was killed with a gun.*
Normally we use *by* to introduce the passive object. But the gun is not the active subject. The gun did not kill him. He was killed *by* somebody *with* a gun. In the active voice, it would be: Somebody killed him *with* a gun. The gun is the instrument. Somebody is the 'agent' or 'doer'.

11.1 Conjugation for the Passive Voice

We can form the passive in any tense. In fact, conjugation of verbs in the passive tense is rather easy, as the main verb is always in past participle form and the auxiliary verb is always *be*. To form the required tense, we conjugate the auxiliary verb. So, for example:

- present simple: *It is made*.
- present continuous: *It is being made*.
- present perfect: *It has been made*.

Here are some examples with most of the possible tenses:

<table>
<thead>
<tr>
<th>infinitive</th>
<th>to be washed</th>
</tr>
</thead>
<tbody>
<tr>
<td>Simple</td>
<td></td>
</tr>
<tr>
<td>present</td>
<td><em>It is</em> washed.</td>
</tr>
<tr>
<td>past</td>
<td><em>It was</em> washed.</td>
</tr>
<tr>
<td>future</td>
<td><em>It will be</em> washed.</td>
</tr>
<tr>
<td>Continuous</td>
<td></td>
</tr>
<tr>
<td>present</td>
<td><em>It is being</em> washed.</td>
</tr>
<tr>
<td>past</td>
<td><em>It was being</em> washed.</td>
</tr>
<tr>
<td>future</td>
<td><em>It will be being</em> washed.</td>
</tr>
<tr>
<td>Perfect Simple</td>
<td></td>
</tr>
<tr>
<td>present</td>
<td><em>It has been</em> washed.</td>
</tr>
<tr>
<td>past</td>
<td><em>It had been</em> washed.</td>
</tr>
<tr>
<td>future</td>
<td><em>It will have been</em> washed.</td>
</tr>
<tr>
<td>Perfect Continuous</td>
<td></td>
</tr>
<tr>
<td>present</td>
<td><em>It has been being</em> washed.</td>
</tr>
<tr>
<td>past</td>
<td><em>It had been being</em> washed.</td>
</tr>
<tr>
<td>future</td>
<td><em>It will have been being</em> washed.</td>
</tr>
</tbody>
</table>

8. Customers put their orders by phone.___________________________________
9. Someone was listening my telephone conversation. _______________________
10. They paid reasonable salaries. _________________________________________

● When we write in informal style (e.g. report, minutes of meetings) we often choose an impersonal style by using the passive and beginning sentences with it.

1. It was agreed to increase the share capital.
It was considered to be an unacceptable alternative.

It has now been decided to postpone the proposed construction.

Another common way of reporting what is said or thought is to use

it + passive + that-clause

1. It was agreed that the share capital should be increased.
2. It was felt that some economies had to be made.

Other verbs used in this pattern include:

announce, claim, discover, estimate, expect, know, mention, propose, recommend, suggest, think, understand

There + passive + to be with e.g. believe, fair, report, say, suppose, think:

There is said to be plenty of oil off our own coast.

Subject (not it) + passive + to-infinitive with e.g. aliege, believe, consider, know, say:

Jane is said to know all there is to know about market and competitors.

Task C. Begin these sentences with it, There or a name/a noun + passive construction.

1. It is expected that prices will rise again this month. (expect)
2. ___________ that all the passengers had died in the crash. (fear)
3. ___________ to be an expert in financial matters. (suppose)
4. ___________ to manage their people at all levels. (think)

to be a fall in house prices, but I haven’t noticed it. (suppose)
that thousands of new jobs will be created in the computer industry. (say)

12 PARTICIPLES: present and past

● Present participles:
  
  breaking  going  drinking  making
  opening  working  stopping  beginning

When –ing forms are used like nouns, they are often called gerunds.

● Past participles:
  
  broken  gone  drunk  made
  opened  worked  stopped  begun

The names ‘present’ and ‘past’ are not very good (although they are used in most grammars). Both kinds of participle can be used to talk about the past, present or future.

She was interviewing an applicant when I saw her. (past)

Who’s the man talking to the manager? (present)

This time tomorrow I’ll be consulting my colleagues. (future)

He was awarded in 2006. (past)

You’re fired. (present)

The new office is going to be opened next week. (future)
• We use some past participles ending in *-ed* (e.g. *excited*) and some present participles ending in *-ing* (e.g. *exciting*) as adjectives. Common pairs of *-ed/-ing* adjectives are:

- *amazed/amazing*  
- *bored/boring*  
- *excited/exciting*  
- *pleased/pleasing*  
- *annoyed/annoying*  
- *enchanted/enchanting*  
- *interested/interesting*  
- *tired/tiring*

*It was a very** tiring** meeting.*

*There are broken tools all over the floor.*

*I thought the report was pretty** boring**.*

*You look terribly** frightened**.*

• Similar pairs are: *delighted/delightful, impressed/impressive, upset/upsetting.*

• Don’t confuse pairs of words like *tiring* and *tired*, *exciting* and *excited*, etc.

The present participle (*…-ing*) has an active meaning: if something is *interesting*, it *interests* you.

The past participle (*…-ed*) has a passive meaning: an *interested* person is *interested by* (or *in*) something.

Compare:

*I thought the lecture was interesting.*
*I was interested in the lecture.*

*Sheila’s party was pretty** boring**.*
*I went home early because I felt** bored**.*

*It was an exciting story.*
*When I read it I felt** excited**.*

*The explanation was confusing. I got** confused**.*
*It was a** tiring** day. It made me** tired**.*
● We often use -ed endings to describe people:

   The story interested John. → John was interested in the story.

● We often use -ing endings to describe things, events, etc.:

   The story was interesting.

● We can also use -ing endings to describe people:

   Isn’t John interesting!

Compare:

Gloria was interesting to be with. (= that was the effect she had on others)
Gloria was interested. (= that was the effect someone or something had on her)

Task A. Rewrite these sentences using -ed/-ing or other endings. Make necessary changes.

1 The coincidence amazed us. We were amazed by the coincidence.
2 The journey tired us. The journey _______________________
3 The experience upset Sylvia. Sylvia _______________________
4 The experience upset us. The experience _____________________
5 Gloria enchanted me. Gloria ____________________________
6 I enchanted Gloria. Gloria _____________________________
7 The children delighted us. The children____________________
8 The children delighted us. We __________________________
9 The new building impresses us. The new building____________________
10 The new building impresses everybody. Everybody ______________________

13 GERUND (Verb + -ing)

   A gerund is a form of a verb that is used in place of a noun or a pronoun. A gerund has the same function as a noun or a pronoun in that it names something; in the case of a gerund, it names an activity that is usually expressed by a verb.
A gerund may be used as the subject of a sentence. A subject gerund is used in statements such as opinions or for listing activities.

Walking is good for your heart.

ESL students learn four important skills: listening, speaking, reading, and writing.

A gerund may be the object of a preposition.

The student is good at speaking.

A prepositional phrase beginning with by followed by a gerund explains how to do something.

You can model functional language for students by speaking naturally.

Some combinations of prepositions or prepositional phrases followed by gerunds give alternatives.

Instead of speaking, the students ought to be listening.

A gerund may be the object of a verb.

Verbs and phases used to express likes, dislikes, and feelings may be followed by object gerunds.

Helen enjoys playing basketball.

Object gerunds used in expressions related to recreational activities are frequently preceded by the verb go.

Do you ever go snowboarding?

'Would you mind, ' a common phrase used to express polite requests, may be followed by an object gerund.

Would you mind opening the door for me?
• Certain words like **adjectives, prepositions, verbs, nouns** are followed by an **ing-form (gerund)**.

15.1 The first use of modal verbs

- Verbs like can and may are modal auxiliaries. We often refer to them as modal verbs or just modals. We use them with other verbs, for example, to ask for permission:
  
  Can I use your phone, please? May I borrow your car, please?

There are ten modals: can, could, may, might, will, would, shall, should, must, ought to and three ‘semi-modal’ s: need, dare and used to.

- In their first use, modal verbs have basic meanings which are given in dictionaries.
  
  - can/could (= ability): I can lift 25 kg./ I can type.
  - may/might (= permission): You may leave early.
  - will/would (= prediction): It will rain soon.
  - shall after I/We (= prediction): Will we find our way? - I'm sure we shall.
  - should/ought to (= duty): You should do as you're told.
- **must**  (= total obligation): You must be quiet.
- **needn't**  (= no obligation): You needn't wait.

- Modal verbs are not 'complete verbs'. For example, we use verbs like **must** and **can** to refer only to the present or the future:

  
  I **must** go to the bank now. I **must** go to the bank tomorrow.

  
  This means we have to make up the 'missing parts' of **must** with **have to**.

So if we want to express the past of **must**, we say: I **had** to go to the bank yesterday.

In the same way, we use **be able to** to make up the 'missing parts' of **can**.

- Other important points about modal verbs:

  
  We can't use them as **to**-infinitives: I **want** to **be able to** type very fast.

  
  We do not use the **to**-infinitive after modals: You **must/mustn't** phone.

  
  There's no -(e)s in the 3rd person singular: The boss **can** see you now.

  
  **Task B. Use suitable forms of have to only when it is impossible to use must.**

1 You _____ take a taxi if you intend to catch the next train.

2 Since the new boss took over, we _____ change our working methods.
3 We _____ talk about this again tomorrow.
4 If you _____ bring up a large family, you wouldn't have had so much money to spend.
5 I was late for work this morning because I _____ go to the bank first.
6 I (not) _____ speak French since I was at school.
7 I hate _____ wait for people who don't know how to keep appointments
8 He _____ get up early tomorrow morning if he wants to see the sunrise.

15.2 The second use of modal verbs

● The second way we use modals is to express degrees of certainty or uncertainty. We use nine of the modals for this purpose (not shall), but we don't use them in a fixed order. We express the greatest uncertainty with might, the greatest certainty with must/can't.

*He might be right. He might know the answer. (very uncertain).*
*He could be right. He would know the answer. (fairly certain)*
*He must be right. He must know the answer. (almost certain)*
*He can't be right. He can't know the answer. (almost certain)*

We use be or an ordinary verb, not a modal, for 'absolute certainty'.

*You are right. You know the answer. (certain)*

● In their second use, modals have only two forms:
- present form: *He must be right. He must know the answer. (now)*
- perfect or past form: *He must have been right. He must have known the answer. (then)*

Task A. Put 'certain', 'almost certain', 'fairly certain' or 'very uncertain' beside these sentences.

1 The phone's ringing. It's Roland. ______
2 The phone's ringing. It might be Roland. _____________
A car is parking outside our house. That will be the Kennedys.

A car is parking outside our house. That must be the Kennedys.

From your description, the person you met would have been my cousin, Jeff.

From your description, the person you met can't have been my cousin Jeff.

If I have understood you correctly, Jeff should be my second cousin.

Are you saying it mightn't be possible for me to get a visa to visit the USA?

If he spent five years in America, he must speak English, I suppose.

15.3 Uses of modals (etc.) to express ability and inability

Expressing present and past ability: 'can' and 'be able to'

- We can use can (or sometimes am/is/are able to) to describe natural or learned ability:

  I can (I am able to) run 1500 metres in 5 minutes. (natural ability)

  I can't (I am not able to/I am unable to) drive. (learned ability)

- We can use could, couldn't or was/were (not) able to to describe 'general ability in the past':

  I could (I was able to) run very fast when I was a boy. (i.e. general ability)

Task A. Supply can, can't, could, couldn't, was/were able to. Alternatives are possible.

1 A good 1500-metre runner can run the race in under four minutes.
2 Bill is so unfit he can run at all!
3 Our baby is only nine months and he can already stand up.
4 When I was younger, I could speak Italian much better than I can now.
5 Can she speak German very well? - No, she can't speak German at all.
6 He could draw or paint at all when he was a boy, but now he's a famous artist.
7 After weeks of training, I could swim a length of the baths underwater.
8 It took a long time, but in the end Tony could save enough to buy his own hi-fi.
9 Did you buy any fresh fish in the market? - No, I couldn't get any.
For days the rescuers looked for the lost climbers in the snow. On the fourth day they saw them and _____ reach them without too much trouble.

15.4 'Can/could' with verbs of perception: 'I can see'

- Verbs of perception are verbs like see, hear, smell, etc.
- When we are describing something that is happening now, we do not use the progressive with these verbs: I see a bird in that tree.
- We often use can + verb in place of the simple present with verbs of perception:
  I can see a bird in that tree. (= I see) Can you see it? (= Do you see)
- We often use could + verb in place of the simple past with verbs of perception:
  I looked up, but couldn't see anything. (= didn't see)

Task A. Rewrite these sentences using can, can't, could or couldn't.

1. Do you see that man over there? ___Can you see that man over there?___
2. I smell something burning. ________________________________
3. I understood what he said. ________________________________
4. Did you understand what he said? __________________________
5. I don't see anyone. ________________________________
6. I didn't understand what he said. __________________________

15.5 Ability in tenses other than the present and the past

- Can and could are not 'complete verbs', so we use be able to if, for example, we want to express the future or the present perfect:
  I'll be able to pass my driving test after I have had a few lessons.

Task A. Supply suitable forms of be able to in these sentences.

1. Our teacher says we ___will be able to___ speak English fluently in a few months.
2 I've been trying for hours, but so far I (not) _____ get through on the phone.
3 I'm sure she would have helped you if she _____.
4 I think I _____ play table tennis better after a bit of practice.
5 He has managed to live in England for years without _____ speak English.
6 I'm practising hard because I want to _____ pass my driving test first time.
7 If I _____ sing, I would have loved to be an opera singer.

15.6 Uses of modals to express permission and prohibition.

Asking for permission with 'can', 'could', 'may' and 'might'

We use can, could, may and might to ask for permission, depending on the situation.

- **Can** is the commonest and most informal: Can I borrow your umbrella (please)?
- **Could** is more polite than can: Could I borrow your umbrella (please)?
- **May** is more 'respectful than can and could: May I borrow your umbrella (please)?
- **Might** is the most polite but the least common: Might I borrow your umbrella (please)?

We can add possibly and use expressions like Do you think and / wonder if to make requests even more polite:

- **Can/Could/May/Might I possibly** borrow your umbrella?
- **Do you think I could/Do you think I might (possibly)** borrow your umbrella?
- **I wonder if I could/I wonder if I might (possibly)** borrow your umbrella?

Task A. Make suitable requests for permission in these situations.

1 You are visiting a close friend and you want to make yourself some coffee.  
   __Can I make myself some coffee (please)?____________________________

2 You are visiting an acquaintance and want to use the lavatory.  
   _________________________________________________________________

3 You are at a party given by people you hardly know. You want to see their garden.  
   _________________________________________________________________

4 You are visiting people you know reasonably well. You want to make a phone call.  
   _________________________________________________________________
15.7 Giving and refusing permission/Expressing prohibition

- We personally give or refuse permission in everyday situations in the following ways:

<table>
<thead>
<tr>
<th>You can (not)</th>
<th>watch TV for as long as you like.</th>
</tr>
</thead>
<tbody>
<tr>
<td>You may (not)</td>
<td></td>
</tr>
</tbody>
</table>

We refer to 'some other authority' that gives/refuses permission like this:

- You can/cannot or You're allowed to/not allowed to
- You can/cannot or You're permitted to/not permitted to smoke here.
- You mustn't or You're forbidden to

Task A. Rephrase these notices to give or refuse permission. Begin each sentence with You ...

1. Thank you for not smoking. You may not smoke.
2. No camping or picnicking. ____________________________
3. Fishing strictly forbidden. __________________________
4. Campers welcome. _________________________________
5. Private - Keep Out. _______________________________
6. Do not lean out of the window. _____________________
7. Leave your litter here. ____________________________
8. No stopping. _________________________________

15.8 Permission/prohibition in tenses other than present and future

- May and must are not 'complete verbs', so we use be allowed to make up their 'missing parts':

  The children were allowed to watch TV last night.

Task A. Supply the correct tense form of be allowed to.

1. The children were allowed to stay at home from school yesterday because of the weather.
2 I___________ never stay up late when I was very young.
3 She_____ only _____ go to parties in the last few months.
4 He _____ just _____ go home after three hours at the police station.
5 Since he was admitted to hospital, we (not) _____ visit him.
6 His doctor (not) _______ him take any exercise in the year before he died.

15.9 Uses of modals to express certainty and possibility

• If we are certain of our facts, we use be or any full verb:
  
  *Jane is at home. Jane works at home.* (certain facts)

• If we are referring to possibility, we use may, might or could + be/have been:
  
  *Jane may/might/could be at home now.*
  
  *She may/might/could have been at home yesterday.*
  
  Or we use may, might, could + full verb:
  
  *Jane may/might/could work (or... may/might/could be working) at home.*
  
  *She may/might/could have worked (or... have been working) at home yesterday.*

Task A. Read these sentences and write C (= Certain) or P (= Possible) against each one.

1 My boss is away on holiday. _c_ 8 He could be swimming right now. ___
2 His wife may be with him. ___ 9 He'll come back in a good mood. ___
3 She will be back next week. ___ 10 He might leave this evening. ___

2 He will be at home tomorrow.
3 He was at home yesterday.
4 She leaves at 9.
5 She will leave tomorrow.

7 She left last night.
8 She will have left by 9.
9 He is working today.
10 He will be working today.
11 He was working today.
12 He has been working all day.

Task C. Write uncertain answers to these questions.

1 Where's Jim today? \(\text{He may/might/could be at home.}\)
2 Where was Jim yesterday?
3 Where will Jim be tomorrow?
4 What time does the train leave?
5 What time did the train leave last night?
6 What's Sue doing at the moment?
7 What was Sue doing yesterday?
8 What will Sue be doing tomorrow?
9 What has Sue been doing this week?
10 What has John had for breakfast?
11 Where has Ann parked the car?
12 What did that car cost?

15.10 Certain and uncertain answers to questions

- A 'certain' question may produce an 'uncertain' answer:

  \(\text{Does he like fish? - He might (do). He may (do). He could (do). He may not.}\)

- An 'uncertain' question may produce a ‘certain’ answer:

  \(\text{Can he still be working? - Yes, he is.}\)

- We use be and have been to answer questions with be:
Is he ill? - He may be. Was he ill? - He may have been.

- We use do/done to replace other verbs, though this is optional:
  
  Will you catch the early train? - I may. / I may do.
  
  Has he received my message? - He could have. / He could have done.

- We also answer Wh-questions with 'certainty' or 'uncertainty':
  
  What's his name? - It's Smith. (certain) It may/might be Smith. (uncertain)
  
  What was his name? - It was Smith. (certain)
  
  It may/might have been Smith. (uncertain)

Task A. Give uncertain answers to these questions.

1 Does she still live in London? __Yes, he may (do).______________________________

8 When did he finish work? ___________________________________________________
9 Will you leave tomorrow? __________________________________________________
10 When will you leave? ______________________________________________________

15.11 Uses of modals to express deduction

- We express certainty with be or any full verb:
  
  He is here. He lives here. He is leaving.

- We express deduction with must be/can't he, must have been, cant/couldn't have been.
  
  He must be at home. He can't be out. He must have been at home today.

Or with verbs other than be:

  He must live abroad. He must have lived abroad.
Task A. Read these sentences and write C (= Certainty) or D (= Deduction) against each one.

1. John Wright is a man of action.  
   C

2. He was in the Galapagos ten years ago.  
   

3. Now he lives in an enormous house.

11. He must have done a lot of research for his book.  
    

12. He must enjoy life.  
    

15.12 Two kinds of ‘must be’

- We use **must be** in the present to express deduction:
  
  *You haven’t eaten for hours. You must be hungry!*

- The negative of **must be** (= deduction) is **can’t be**, not ‘**mustn’t be**’:
  
  *You’ve only just eaten. You can’t be hungry again! (Not ‘mustn’t be’)*

- We can also use **must (be)** to express total obligation:
  
  *This is a hospital. You must be quiet.*

- The negative of **must (be)** (= total obligation) is **mustn’t (be)** (= prohibition):
  
  *You mustn’t be noisy outside a hospital.*

Task A. a) Supply **must be**, **can’t be**, or **mustn’t be**.

   b) Write D (= Deduction) or O (= Obligation) beside each sentence.
The meeting is at 10 o'clock sharp and you _mustn't be_ late.

You _____ at the station ten minutes before the departure of the train.

The children ____tired already! We've only been walking for ten minutes.

We _____ late for the train or we'll miss our connection.

15.13 'Must have been', 'can't/couldn't have been';

'had to be/didn't have to be'

- We express deduction about the past with _must have been_:
  
  You hadn't eaten for hours. You _must have been_ hungry!

- The negative of _must have been_ is _can't/couldn't have been_.
  
  You had already eaten. You _can't/couldn't have been_ hungry!

- _Must_(= total obligation) is not a 'complete verb'. We use _had to_ in the past:
  
  The meeting was at 10 this morning and I _had to be_ there.

- The negative of _had to_ is _didn't have to_:
  
  It was a holiday yesterday, so I _didn't have to be_ at work.

Task A.  Supply _must have been, can't/couldn't have been, have to/had to (be),
didn't have to (be)._

15.19 'Must', 'have to' and 'have got to'

- We tend to prefer must
  - when we refer to ourselves (with I/we): I really must weed this garden.
  - with you to express urgency: You must phone home at once.
  - in public notices, etc.: Cyclists must dismount.
  - (= Can’t you stop yourself?): Must you interrupt?
  - pressing invitations or advice: You must come and see us. You must repair that fence.
- We often use have to (or have got to) to refer to outside authority:

15.20 Expressing necessity in other tenses

- **Must** can refer to the present or the future:
  
  *I must speak to him today. I must speak to him tomorrow.*

- **Must** is not a 'complete verb', so we use **have to** make up its 'missing parts':

  *I shall/will have to phone her tomorrow*  
  (or *I must phone her tomorrow.*) (future)  

  *I had to spend the day in a meeting.* (past)  

  *I have had to tell you before.* (present perfect)  

  *I am having to/I have been having to get up earlier this year.* (progressive forms)

- **Had to** shows that we couldn't avoid doing something:

  *I had to leave at six.* (and I did)

  *Should have* shown we've failed to do something:

  *I should have left at six.* (and I didn't)

Task A. Use a construction with **have to** in place of the words in italics.

1. *It will be necessary for him* to try harder if he wants to win the prize.
   
   **He will have to**  

2. *It has been necessary for them* to save hard to buy their new hi-fi.

16 SOME and ANY

16.1 Some and any go before a plural or uncountable noun.

There was a bowl and some cornflakes on the table, but there wasn’t any milk.

- We can also use some and any without a noun.
  
  Trevor wanted some milk, but he couldn't find any.

- We normally use some in positive sentences and any in negative sentences or ones with a negative meaning.

<thead>
<tr>
<th>POSITIVE</th>
<th>NEGATIVE</th>
</tr>
</thead>
<tbody>
<tr>
<td>I met some interesting people last night.</td>
<td>I never meet any interesting people nowadays.</td>
</tr>
<tr>
<td>We'll have some fun at Disneyland.</td>
<td>We won't have any fun without you.</td>

</tbody>
</table>

- We can also use any in a sentence with if.
  
  If you have any problems, you can discuss them with your group leaders.

  I can answer any questions. (= If there are any questions, ...)

- In questions we can use either some or any, but any is more common. We don't know whether the answer will be yes or no.

  Have we got any butter?  Will there be any food for the guests?

  Did you buy any clothes?

We normally use some in offers and requests to make them sound more positive.
Would you like some coffee? Could you post some letters for me? We can use some in questions when we think the answer might be yes. Did you buy some clothes? (Perhaps I know that you went out to buy some.

16.2 Someone, anything, etc

We choose between someone and anyone, something and anything, and somewhere and anywhere in the same way as between some and any.

17 GENERAL CLASSIFICATION OF THE PARTS OF SPEECH IN ENGLISH

The parts of speech differ from each other in meaning, form and function.

We distinguish between notional and structural parts of speech.

The notional parts of speech perform certain functions in the sentence: the functions of subject, predicate, attribute, object, or adverbial modifier.

The notional parts of speech are as follows:
The **notional** parts of speech serve either as **principal** or **secondary** parts of the sentence.

The **structural** parts of speech either express **relations** between words (e.g. the trees in the garden, Tom and Joe, etc.) or sentences or **emphasize the meaning** of words (e.g. the book, a book, etc.) or sentences. They never perform any independent function in the sentence. Here belong:

1. **the preposition** - прийменник - предлог
2. **the conjunction** - сполучник - союз
3. **the particle** - частка - частица
4. **the article** - артикль - артикль

In the English language the grammatical relations between words are expressed by means of the **form of words** and **word order**: e. g. a map of the location.

**The principal parts of the sentence:**

The subject - підмет - подлежащее
The predicate - присудок - сказуемое
The *secondary parts of the sentence*:

The object - додаток - дополнение

The attribute - визначения - определение

The adverbial modifier - обставина - обстоятельство
