Poverty problem has caused disparity between west and east Indonesia areas, as an effort to eliminate the difference of that, central government found 13 Kapet that expected can become Prime Mover for area of around him pass through what we called Trickle Down Effect (Spread Effect). One of the Kapet in East Indonesia area is Kapet Bima. In growth here in it seems investment in Kapet Bima very minim so that it is important to know "How Performance The Function of Kapet in Region Development in Sub-Province of Bima and what factors influencing him".

The method used in this research are: Scoring, Factor analysis, SWOT analysis and Analytical Hierachy Process (AHP). According to those analysis result which have been done Kapet Performance indicator are: Earnings Of Per capita, GDRP, Investment Value, Exports Value, Human Development Index and GDRP Percentage of Industry sector. Performance of Kapet in regional development at Bima West Nusa Tenggara is unsuccessful even disparity between Sub-Provinces in Province West Nusa Tenggara during range of time 1996-2003 progressively mounts. Performance influencing Factors of Kapet in Development of Region in Sub-Provinces of Bima are: Institute Performance of BP Kapet which not optimize yet in regional development of Kapet Bima (Sub-Province of Bima), Sub-Province of Bima imprecise as Growth Center, Lack of the siding from Local Government in supporting development of Kapet, Human Resource and low of bargain position of Pre eminent commodity (Natural Resources) and the last factor is Management of Kapet which still dominated by Central Government. To solve that problem are recommended to do 8 strategy of Kapet Development, and it recommended to reform Management of Kapet with Bottom up approach pass through Decentralize Regionalization which Regional Management (RM) as the manager.

The conclusion of this research is Kapet Performance In Regional Development at Bima West Nusa Tenggara is unsuccessful because influence by factors: Institute Performance of BP Kapet which not optimally yet in regional development of Kapet Bima (Sub-Province of Bima), Sub-Province of Bima imprecise as Growth Center, Lack of the siding from Local Government in supporting development of Kapet, Human Resource and low of bargain position of Pre eminent commodity (Natural Resources) and the last factor is Management of Kapet which still dominated by Central Government. To solve that problem are recommended to do 8 strategy of Kapet Development, and it recommended to reform Management of Kapet with Bottom up approach pass through Decentralize Regionalization which Regional Management (RM) as the manager.

More research about regional management in Kapet management Extending of Kapet area include Sub-province of Sumbawa and More Research about Location criterion of Kapet. To complete this research it was also recommended to do the research with stakeholders involve in decision making, Study of Kapet with larger area including Dompu and Bima City, Study of Kapet with Central government as a conceptor of Kapet and pay attention at data accuracy.
