EBSCO Offers Complementary Access Tools to Gain Greater Value from the Discovery Solution

EBSCO A-to-Z

- A customizable, versatile knowledgebase and listing service that:
  - Enhances discovery
  - Brings more visibility to the library's collection
  - Get users to specific content
  - Makes it easier for librarians to manage e-resources
- An effective tool for end users who may gather information by:
  - Browsing (Journal lists, TOC, etc.)
  - Alerting (Journal alerts, RSS)
  - Known-item searching

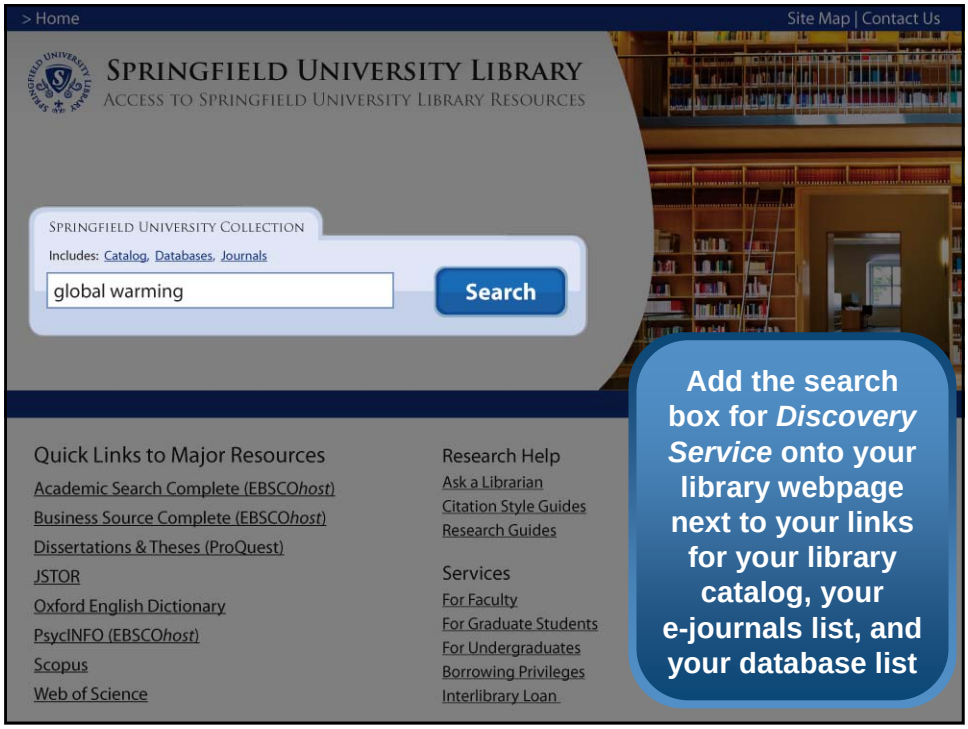
EBSCO Offers Complementary Access Tools to Gain Greater Value from the Discovery Solution

LinkSource

- When the Discovery Service provides a record for an item that for which full text is available elsewhere (databases, e-journal packages, etc.), LinkSource (an OpenURL link resolver) can bring the user to the full text
- LinkSource also:
  - Connects outside services to the library's full-text collection (e.g., Google Scholar, PubMed, etc.)
  - Interconnects the library's collection through library-controlled link menus based on article-level metadata
  - Provides libraries the ability to add notes, icons, help, etc.
  - Offers cohesive integration with EBSCO A-to-Z and EBSCO Discovery Service

The Complete Discovery Solution

- Fast, simple access to all of the library's full-text content (electronic and print) in a single search box
  - Journals
  - Magazines
  - Newspapers
  - Books
  - Library Catalog
  - And More...



What is included in the discovery service?

Thin Metadata

- Like other discovery services, a large index of thin metadata will be included
- This file includes tens of thousands of journals

The Most Comprehensive List of Primary Publisher Partners of Any Discovery Service

Author Supplied Abstracts and Author Supplied Keywords from All Major Journal Publishers, including but not limited to:

- American Association for the Advancement of Science
- American Chemical Society
- American Institute of Physics
- American Medical Association
- American Society for Biochemistry and Molecular Biology
- American Society of Civil Engineers
- American Statistical Association
- Association for Computing Machinery (ACM)
- Australian Academic Press
- Berkeley Electronic Press
- BioMed Central
- Blackwell Publishing Ltd
- BMJ Publishing Group
- Cambridge University Press (CUP)

The Most Comprehensive List of Primary Publisher Partners of Any Discovery Service

Author Supplied Abstracts and Author Supplied Keywords from All Major Journal Publishers, including but not limited to:

- Cell Press
- CSIRO Publishing
- Duke University Press
- EDP Sciences
- Elsevier Science
- Emerald Group Publishing Ltd
- Institute of Electrical and Electronics Engineers, Inc. (IEEE)
- IOP Publishing Limited
- Johns Hopkins University Press
- Kluwer Law International
- Lippincott Williams & Wilkins (LWW)
- Massachusetts Medical Society
- MIT Press
- National Academy of Sciences
- Nature Publishing Group

The Most Comprehensive List of Primary Publisher Partners of Any Discovery Service

Author Supplied Abstracts and Author Supplied Keywords from All Major Journal Publishers, including but not limited to:

- NRC Research Press
- Oxford University Press
- Palgrave Macmillan
- Royal Society of Chemistry
- Royal Society of Medicine Press
- S Karger AG
- SAGE Publications
- Society for Industrial and Applied Mathematics
- Springer Science & Business Media
- Taylor & Francis Informa
- University of California Press
- University of Chicago Press
- University of Toronto Press
- Walter de Gruyter
- Wiley
- World Scientific

The Discovery Solution is Customized for Every Individual Institution

- The Library Catalog is loaded and updated regularly
- Weekly updates for catalog changes with real-time availability checks
- Full A&I (and in some cases, full text, too) is available for searching for all of the library's EBSCO*host* Database Subscriptions
- Partner content (metadata) for non-EBSCO*host* databases is also included:
  - Alexander Street Press
  - LexisNexis
  - NewsBank
  - Readex
  - Many others...

If the library has any of the following via EBSCO*host*, full indexing will be included in discovery searches

- *Academic Search*
- *AGRCIOLA*
- *AgeLine*
- *America: History & Life*
- *ABSEES*
- *Art & Architecture Complete*
- *ATLA Religion Database*
- *Avery Index to Architectural Periodicals*
- *Biological Abstracts*
- *Biological Abstracts Archive*
- *Business Source*
- *CAB Abstracts*
- *CAB Archive*
- *CINAHL*
- *Cochrane*
- *Communication & Mass Media Complete*
- *Computers & Applied Sciences Complete*
- *Dentistry & Oral Sciences Source*
- *DynaMed*
- *E-Journals Database*
- *EconLit*

If the library has any of the following via EBSCO*host*, full indexing will be included in discovery searches

- *Education Research Complete*
- *Environment Complete*
- *ERIC*
- *Family Studies Abstracts*
- *Film & Television Literature Index*
- *FRANCIS*
- *FSTA – Food Science & Technology Abstracts*
- *Fuente Academica*
- *Gender Studies Database*
- *GeoRef*
- *Global Health*
- *Health and Psychosocial Instruments (HaPI)*
- *Historical Abstracts*
- *Hospitality & Tourism Complete*
- *Humanities International Complete*
- *Index Islamicus*
- *Inspec*
- *Inspec Archive*
- *IPM – Index to Printed Music*
- *International Bibliography of Theatre & Dance*
- *LGBT Life*

If the library has any of the following via EBSCO*host*, full indexing will be included in discovery searches

- *LISTA*
- *Literary Reference Center*
- *MEDLINE*
- *Mental Measurements Yearbook*
- *MLA International Bibliography*
- *Music Index, The*
- *NCJRS Abstracts*
- *Newspaper Source*
- *NTIS*
- *PASCAL*
- *Philosopher's Index, The*
- *Political Science Complete*
- *Polymer Library*
- *PsycARTICLES*
- *PsycBOOKS*
- *PsycCRITIQUES*
- *PsycEXTRA*
- *PsycINFO*
- *Public Affairs Index*
- *RILM Abstracts of Music Literature*
- *RIPM*
- *RISM*
- *Social Work Abstracts*
- *SocINDEX*
- *SPORTDiscus*
- *Women's Studies International*

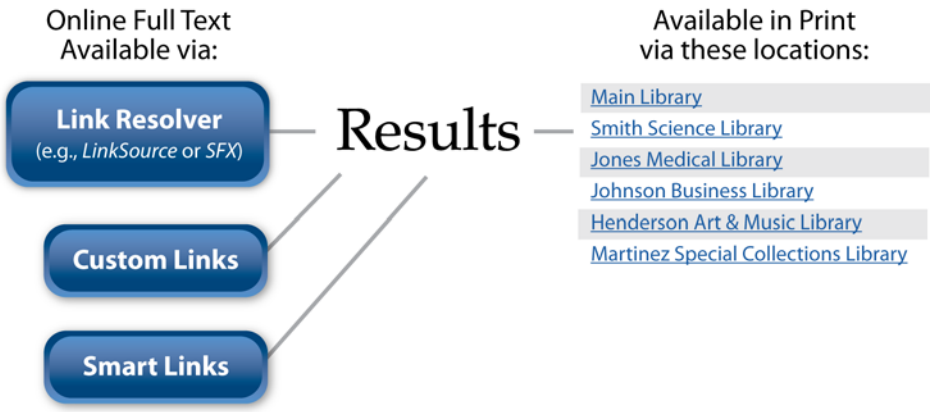
How do end users get to the full text?

Users gain greater access to the library's online full text and print holdings



How can institutions incorporate resources that are not fully covered in *EBSCO Discovery Service*?

Use EBSCO *Discovery Service* to quickly access and use EBSCO*host Integrated Search* (a new level of federated searching) for everything else

Subjects merged together from multiple databases to form a "super record"
Merged record provides the best abstract available

Publication Type:
journal article - research, tables/charts
NAICS/Industry Codes :
621330 Offices of Mental Health Practitioners (except Physicians)
Major Subjects:
Anxiety Disorders -- Diagnosis
Depression -- Diagnosis
Psychological Tests
Questionnaires
Somatoform Disorders -- Diagnosis
Minor Subjects:
Subject Terms:
*JOB stress
*EMOTIONS
*PSYCHOLOGY, Industrial
*PSYCHOMETRICS
DISTRESS (Psychology)
MENTAL health
Author-Supplied Keywords:
4DSQ; Anxiety; Depression; Distress; Four-Dimensional Symptom Quest
Somatization
Abstract:
In non-clinical (working) populations it is important to differen
one hand, and psychiatric symptoms--depression, anxiety an
Four-Dimensional Symptom Questionnaire (4DSQ) is a new
symptom dimensions (Terluin, 1996). This study aimed to in
the 4DSQ in a working population. A postal stress and healt
Dutch telecom company, 51% of whom responded (N=3852). The mailing included the 4DSQ, a set of questionnaires concerning job stress (e.g. psychological demands), coping style (e.g. problem-focused coping, avoidant coping), and indicators of strain (e.g. emotional exhaustion, fatigue). Cronbach's alpha for the four sub-scales of the 4DSQ ranged from .79 to .90. Factor analysis showed four factors corresponding to the four scales of the 4DSQ: distress, depression, anxiety, and somatization. The validity of the 4DSQ was assessed using (partial) correlations with job stress, coping, and strain. As expected, the distress scale showed the strongest correlations with the indicators of strain, as well as with job stress and coping. In conclusion, the 4DSQ is a reliable and valid instrument that can be used in a working population to distinguish between stress-related symptoms and psychiatric illness.
Journal Subset:
Biomedical; Online/Print; Peer Reviewed; UK & Ireland
Special Interest:
Psychiatry/Psychology
Instrumentation:
Four-Dimensional Symptom Questionnaire (4DSQ) [Dutch]
Job Content Questionnaire (JCQ) [Dutch]
Image Quick View provided in merged record (when available)

Abstract:
In non-clinical (working) populations it is important to differentiate between general distress, on the one hand, and psychiatric symptoms--depression, anxiety and somatization--on the other hand. The Four-Dimensional Symptom Questionnaire (4DSQ) is a new instrument that measures these four symptom dimensions (Terluin, 1996). This study aimed to investigate the psychometric properties of the 4DSQ in a working population. A postal stress and health survey was sent to all employees of a Dutch telecom company, 51% of whom responded (N = 3852). The mailing included the 4DSQ, a set of questionnaires concerning job stress (e.g. psychological demands), coping style (e.g. problem-focused coping, avoidant coping), and indicators of strain (e.g. emotional exhaustion, fatigue). Cronbach's α for the four sub-scales of the 4DSQ ranged from .79 to .90. Factor analysis showed four factors corresponding to the four scales of the 4DSQ: distress, depression, anxiety, and somatization. The validity of the 4DSQ was assessed using (partial) correlations with job stress, coping, and strain. As expected, the distress scale showed the strongest correlations with the indicators of strain, as well as with job stress and coping. In conclusion, the 4DSQ is a reliable and valid instrument that can be used in a working population to distinguish between stress-related symptoms and psychiatric illness.
