**RIJKSUNIVERSITEIT GRONINGEN**

**Credit and liquidity risk of banks in stress conditions**

Analyses from a macro perspective

**Proefschrift**

ter verkrijging van het doctoraat in de  
Economie en bedrijfskunde  
aan de Rijksuniversiteit Groningen  
op gezag van de  
Rector Magnificus, dr. E. Sterken,  
in het openbaar te verdedigen op  
donderdag 27 oktober 2011  
om 11.00 uur

door

**Willem Adrianus van den End**  
geboren op 12 maart 1970  
te IJsselmuiden

Promotor: Prof. dr. J. de Haan

Beoordelingscommissie: Prof. dr. S.C.W. Eijffinger  
Prof. dr. S. Gerlach  
Prof. dr. M. Koetter

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Context . . . . .	1
1.2	Research questions . . . . .	3
1.3	Research approach . . . . .	4
1.4	Outline . . . . .	6
1.4.1	Bank behaviour during the crisis . . . . .	6
1.4.2	Macro stress-testing . . . . .	7
1.4.3	Policy responses . . . . .	8
 <b>Part I: Bank behaviour during the crisis</b>		
<b>2</b>	<b>When liquidity risk becomes a systemic issue: Empirical evidence of bank behaviour</b>	<b>9</b>
2.1	Introduction . . . . .	9
2.1.1	Dimensions of liquidity risk . . . . .	9
2.1.2	Modelling bank behaviour . . . . .	10
2.1.3	Contribution to the literature . . . . .	10
2.2	Data and trends . . . . .	11
2.2.1	Data . . . . .	11
2.2.2	Trends . . . . .	13
2.3	Empirical measures . . . . .	15
2.3.1	Instruments used to react . . . . .	15
2.3.2	Size of reactions . . . . .	17
2.3.3	Dependence of reactions . . . . .	19
2.3.4	Herding: aggregate number of reactions . . . . .	20
2.3.5	Herding: number of reactions by instrument . . . . .	21
2.3.6	Robustness . . . . .	22
2.4	Conclusions . . . . .	24
	Appendix 2.1 . . . . .	26
	Appendix 2.2 . . . . .	29
	Appendix 2.3 . . . . .	30

<b>3 Banks' responses to funding liquidity shocks:</b>	
<b>Lending adjustment, liquidity hoarding and fire sales</b>	<b>31</b>
3.1 Introduction . . . . .	31
3.2 Model . . . . .	33
3.3 Data and stylized facts . . . . .	36
3.4 Results . . . . .	39
3.4.1 Response of lending . . . . .	39
3.4.2 Liquidity hoarding . . . . .	42
3.4.3 Fire sales . . . . .	45
3.5 Robustness . . . . .	48
3.6 Conclusions . . . . .	50
Appendix 3.1 . . . . .	52
 <b>Part II: Macro stress-testing</b>	
<b>4 Macro stress-testing methods</b>	<b>53</b>
4.1 Introduction . . . . .	53
4.2 Micro stress-testing . . . . .	54
4.3 Bottom-up macro stress-testing . . . . .	55
4.4 Bottom-up stress-testing in the crisis: three approaches . . . . .	56
4.5 Top-down macro stress-testing . . . . .	57
4.5.1 Modelling the macro-micro link . . . . .	58
4.5.2 Integrated models . . . . .	59
4.6 Considerations on the use of stress-tests . . . . .	60
4.7 Conclusions . . . . .	61
<b>5 Modelling scenario analysis and macro stress-testing</b>	<b>63</b>
5.1 Introduction . . . . .	63
5.2 Scenario building . . . . .	64
5.3 Credit risk . . . . .	66
5.3.1 Model . . . . .	66
5.3.2 Data . . . . .	69
5.3.3 Estimation results . . . . .	69
5.4 Interest rate risk . . . . .	71
5.4.1 Model . . . . .	71
5.4.2 Data and estimation results . . . . .	72
5.5 Simulation of scenario effects . . . . .	73

5.5.1	Deterministic scenarios . . . . .	73
5.5.2	Stochastic simulation of credit risk in base scenario . . . . .	75
5.5.3	Stochastic simulation of credit risk in stress scenarios . . . . .	78
5.5.4	Stochastic simulation of interest rate risk in stress scenarios . . . . .	80
5.6	Conclusions . . . . .	81
	Appendix 5.1 . . . . .	83
<b>6</b>	<b>Liquidity Stress-Tester: A model for stress-testing banks' liquidity risk</b>	<b>85</b>
6.1	Introduction . . . . .	85
6.2	Literature . . . . .	86
6.3	Model . . . . .	88
6.3.1	Framework . . . . .	88
6.3.2	Data . . . . .	91
6.3.3	First round effects . . . . .	92
6.3.4	Banks' response to scenario (mitigating actions) . . . . .	93
6.3.5	Second round effects . . . . .	95
6.3.6	Impact different scenario rounds . . . . .	98
6.3.7	Influence of alternative distributional assumptions . . . . .	100
6.3.8	Parameter sensitivity . . . . .	100
6.4	Results . . . . .	102
6.4.1	Banking crisis scenario . . . . .	102
6.4.2	Credit crisis scenario . . . . .	103
6.4.3	Impact scenario length and market conditions . . . . .	105
6.4.4	Back-test . . . . .	106
6.5	Conclusions . . . . .	107
	Appendix 6.1 . . . . .	109
	Appendix 6.2 . . . . .	110
	Appendix 6.3 . . . . .	111
<b>7</b>	<b>Liquidity Stress-Tester: Do Basel III and unconventional monetary policy work?</b>	<b>113</b>
7.1	Introduction . . . . .	113
7.1.1	Context . . . . .	113
7.1.2	Contribution . . . . .	114
7.2	Model . . . . .	116
7.2.1	Framework . . . . .	116
7.2.2	Data . . . . .	118
7.2.3	Initial liquidity ratios . . . . .	119

7.2.4	First round effects . . . . .	120
7.2.5	Mitigating actions by banks . . . . .	121
7.2.6	Second round effects . . . . .	123
7.2.7	Central bank reaction function . . . . .	125
7.2.8	Parameter sensitivity . . . . .	126
7.3	Results . . . . .	128
7.3.1	Credit crisis scenario . . . . .	129
7.3.2	Wholesale and retail bank scenarios . . . . .	130
7.3.3	The impact on credit supply . . . . .	131
7.3.4	The influence of central bank interventions . . . . .	132
7.3.5	Effects of adjusting to the new liquidity regulation . . . . .	135
7.4	Conclusions . . . . .	136
	Appendix 7.1 . . . . .	138
	Appendix 7.2 . . . . .	141

### **Part III: Policy responses**

<b>8</b>	<b>Crisis measures and limiting possible distortions</b>	<b>143</b>
8.1	Introduction . . . . .	143
8.2	Crisis measures to address market failure . . . . .	144
8.3	Proper design of support policies essential but complicated . . . . .	146
8.4	Market conditions . . . . .	147
8.4.1	Impact on level playing field financial sector . . . . .	147
8.4.2	Distortionary effects on markets and business models . . . . .	149
8.4.3	Cross-border effects . . . . .	151
8.5	External effects, negative impact on confidence . . . . .	152
8.5.1	Investor confidence in supported institutions . . . . .	152
8.5.2	Confidence in the creditworthiness of governments . . . . .	153
8.5.3	Risks for the central bank . . . . .	154
8.6	Longer-term distortions . . . . .	155
8.6.1	Moral hazard among management . . . . .	155
8.6.2	Moral hazard among investors . . . . .	156
8.6.3	Moral hazard from deposit insurance . . . . .	157
8.6.4	Moral hazard from extremely low interest rates . . . . .	157
8.7	Policy instruments to limit distortions . . . . .	158
8.7.1	Market-compatible conditions . . . . .	158
8.7.2	International harmonisation . . . . .	158

8.7.3	The importance of providing clarity . . . . .	159
8.7.4	Relation between government and management . . . . .	159
8.7.5	Involvement of the private sector . . . . .	159
8.7.6	Temporary nature of support and exit . . . . .	160
8.7.7	Prudential supervision . . . . .	161
8.8	Conclusions . . . . .	161
<b>9</b>	<b>Macro-effects of higher capital and liquidity requirements for banks:</b>	
	<b>Empirical evidence for the Netherlands</b>	<b>163</b>
9.1	Introduction . . . . .	163
9.2	New regulatory standards . . . . .	164
9.3	Channels of effects during the transitional phase . . . . .	166
9.3.1	Direct consequences . . . . .	166
9.3.2	Effect on lending via interest rate channel . . . . .	166
9.3.3	Effect on credit supply via bank capital channel . . . . .	167
9.3.4	Influence on risk behaviour of banks . . . . .	168
9.3.5	Broader effects of liquidity requirements . . . . .	168
9.3.6	Impact on financial markets . . . . .	169
9.4	Effects during the transitional phase: model outcomes for the Netherlands . . . . .	169
9.4.1	Scenarios . . . . .	170
9.4.2	Satellite models . . . . .	170
9.4.3	Simulation outcomes . . . . .	173
9.4.4	Simulations using macro-econometric model . . . . .	175
9.4.5	Time series analysis using a VAR model . . . . .	176
9.4.6	International perspective . . . . .	178
9.5	Effects in a new steady state with higher buffers . . . . .	180
9.5.1	Higher buffer requirements: costs and benefits . . . . .	180
9.5.2	More stable economic development . . . . .	184
9.6	Conclusions . . . . .	185
	Appendix 9.1 . . . . .	186
	Appendix 9.2 . . . . .	187
<b>10</b>	<b>Summary and conclusions</b>	<b>189</b>
10.1	Introduction . . . . .	189
10.2	Bank behaviour . . . . .	190
10.3	Macro stress-testing models . . . . .	191
10.4	Policy responses to the crisis . . . . .	193

## List of Figures

2.1 Development of balance sheet items . . . . .	13
2.2 Size: average relative change balance sheet adjustment . . . . .	18
2.3 Size: median relative change balance sheet adjustment . . . . .	18
2.4 Correlation of item changes across banks . . . . .	19
2.5 Number of banks, extreme balance sheet adjustments . . . . .	21
2.6 Number of banks, direction balance sheet adjustments . . . . .	21
2.7 Number of extreme balance sheet adjustments . . . . .	22
2.8 Direction of balance sheet adjustments . . . . .	22
2.9 Factor analysis . . . . .	23
3.1 Stylized bank balance sheet: Possible asset side responses . . . . .	32
3.2 Development of model variables . . . . .	38
3.3 Adjustment of lending, sample of 17 banks . . . . .	41
3.4 Liquidity hoarding . . . . .	44
3.5 Fire sales, sample of 17 banks . . . . .	46
3.6 Fire sales and solvency, sample of 17 banks . . . . .	47
3.7 Credit default swap spreads Dutch banks . . . . .	50
4.1 Dimensions of stress-testing . . . . .	62
5.1 Stress-testing framework . . . . .	65
5.2 Outcomes deterministic scenarios . . . . .	74
5.3 Robustness checks AR and VAR models . . . . .	77
5.4 Outcomes stochastic scenarios . . . . .	80
6.1 Flow chart of Liquidity Stress-Tester . . . . .	89
6.2 Systemic effects through contagion channels . . . . .	91
6.3 Frequency distributions of risk aversion indicators . . . . .	96
6.4 Relationships between model parameters . . . . .	97

6.5	Distribution of buffers after scenario rounds . . . . .	99
6.6	Bank-testing the scenario outcomes . . . . .	107
7.1	Model framework . . . . .	116
7.2	Effect asset purchases central bank . . . . .	126
7.3	Impact on credit supply . . . . .	132
7.4	Central bank interventions, mitigating influence . . . . .	134
7.5	Impact of exit from extended central bank operations . . . . .	134
7.6	Influence of stronger liquidity profiles . . . . .	136
8.1	Market shares Dutch deposit market . . . . .	148
8.2	Money market rate and trading volume (euro area) . . . . .	151
8.3	Stock prices supported vs. non-supported financial institutions, worldwide . . . . .	153
8.4	CDS premium supported vs. non-supported financial institutions, worldwide . . . . .	153
8.5	Dependence between banks and governments . . . . .	154
9.1	Effects of new supervisory standards . . . . .	166
9.2	Balance sheet adjustments, percentage point higher TCE/RWA ratio . . . . .	174
9.3	Impact on loan spread of rising liquidity ratio, percentage point higher TCE/RWA ratio .	175
9.4	Real GDP impact increase TCE / RWA ratio, structural model . . . . .	176
9.5	Real GDP impact increase liquidity ratio, structural model . . . . .	176
9.6	Real GDP impact increase TCE / RWA ratio, VAR model . . . . .	178
9.7	Probability of systemic crisis at various buffer levels . . . . .	182
9.8	Solvency and liquidity of Dutch banks in historical perspective, 1990-2009 . . . . .	184

## List of Tables

2.1 Pecking order of balance sheet adjustments . . . . .	17
3.1 Summary statistics . . . . .	37
5.1 Estimation result of regression of default rate (equation 5.1) . . . . .	70
5.2 Estimation result of regression of LLP (equations 5.5 - 7.7) . . . . .	71
5.3 Estimation result of regression of Net Interest Income (equation 5.8) . . . . .	73
6.1 Correlation between changes of buffer and balance sheet items . . . . .	94
6.2 Parameter sensitivity . . . . .	101
6.3 Outcomes scenario simulations . . . . .	105
6.4 Parameter sensitivity credit crisis scenario . . . . .	106
7.1 Parameter sensitivity . . . . .	127
7.2 Outcomes at different reaction triggers . . . . .	128
7.3 Outcomes scenario runs . . . . .	129
8.1 Government support to banks and central banks' balance sheet . . . . .	144
8.2 Policy measures during the crisis . . . . .	146
8.3 Distortions and mitigating instruments . . . . .	147
8.4 Composition collateral pledged at Eurosystem . . . . .	155
9.1 Scenarios . . . . .	170
9.2 Estimation outcomes satellite model for balance sheet adjustments . . . . .	172
9.3 Estimation outcomes satellite model for loan spread . . . . .	173
9.4 Equity of banks versus other enterprises in the Netherlands, 2000-2008 . . . . .	183
