摘要

隨著資訊科技日新月異的發展，各國在資訊教育方面皆陸續投入許多努力。本文乃為作者於1999年秋季至大陸京津地區實地參訪三所全國資訊教育重點中學所得之考察結果（註），針對大陸目前資訊教育實施現況作一分析報導，同時進一步檢討兩岸資訊教育問題，並提出相關建議。

關鍵詞：資訊教育、資訊科技、電腦網路

ABSTRACT

Along with the rapidly change and development of information technology, computer education has been gaining great attention from governments of many countries in the world. This paper reports the implementation of computer education in Mainland China, as the result of authors' visiting 3 top high schools in Beijing and Tienjing areas. It further discusses problems encountered in current practice, and also makes recommendations to computer and information education in both Mainland China and Taiwan.

Keywords: Computer Education, Computer Network, Information Technology
