

## DDI-FlatDB: Next steps

*Claus-Peter Klas, Oliver Hopt, Alexander Mühlbauer*

EDDI 2017 – License [CC-BY 4.0](#)

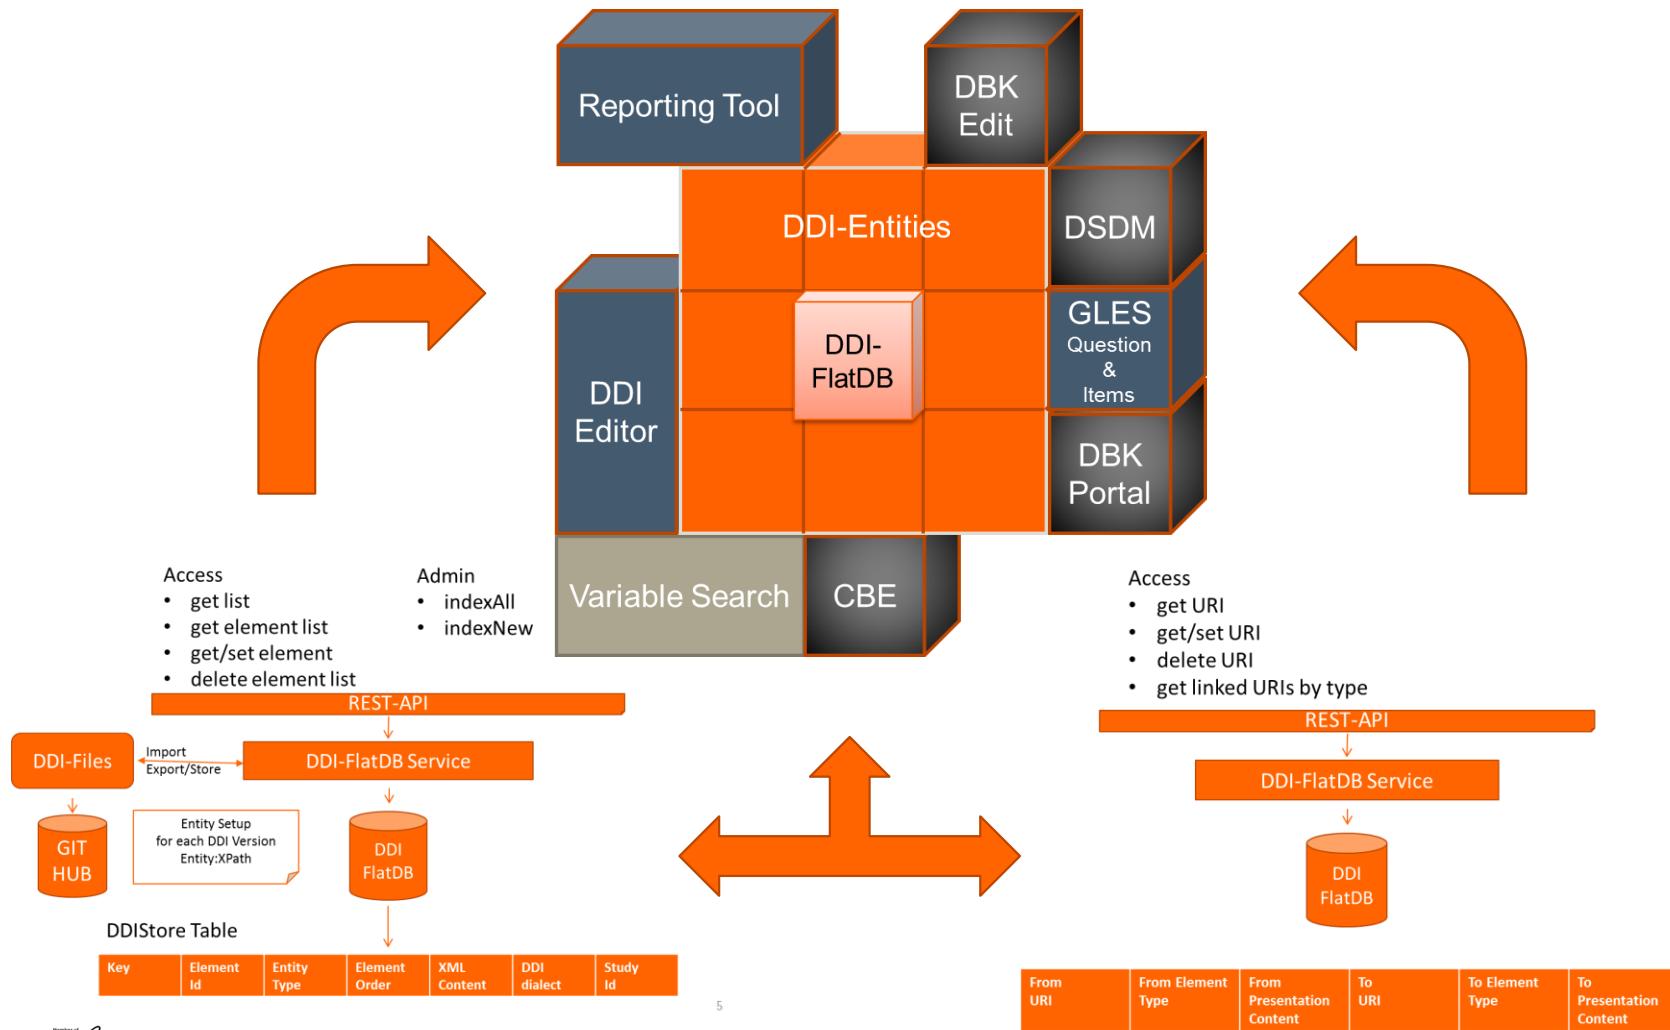

# Overview

- Efficency and effectiveness using DDI-Flat DB?
  - ▶ Links
  - ▶ Tool to create and edit property file for accessing DDI-FlatDB entites in Java
- Integration into GESIS documentation and long term preservation workflows

# Links: Use Cases

- Internal DDI links
  - ▶ Study description to variables
  - ▶ Variables to question texts
  - ▶ ... and vice versa and et al
- External DDI links
  - ▶ Variables in prior waves of studies
  - ▶ Controlled vocabulary, etc.
- Resolving/Presentation layer
- Good thing: <\*Reference>
  - ▶ <r:ExternalURLReference>
  - ▶ <dc:InterviewerInstructionReference>

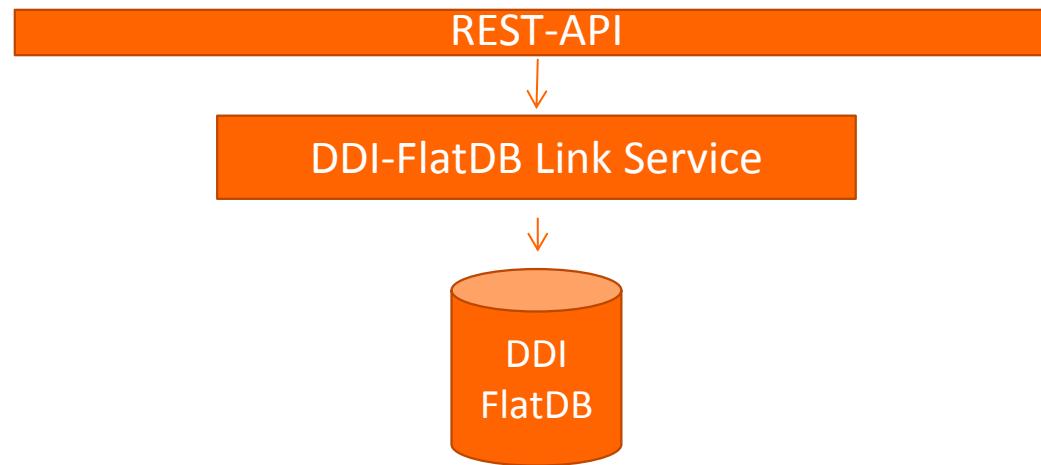

# Current DDI-FlatDB

# DDI-FlatDB Triple Store

## Access

- get URI / resolve URI
- get/set URI
- delete URI
- get linked URIs by type

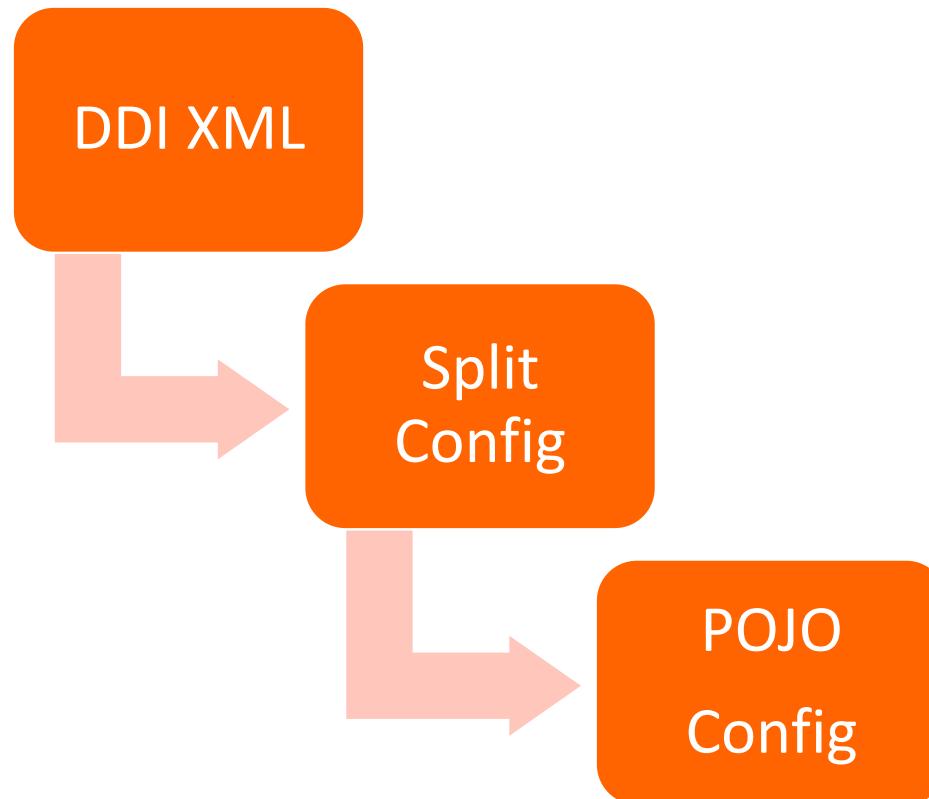

From URI	From Element Type	From Presentation Content	To URI	To Element Type	To Presentation Content
----------	-------------------	---------------------------	--------	-----------------	-------------------------

# Creating and edit property file for accessing DDI-FlatDB entites in Java

# Creating and edit property file for accessing DDI-FlatDB entites in Java

- DDI – File
- DDI – FlatDB and split config
- DDI – FlatDB, config file and POJOs
- Current status
  - ▶ Hand made
  - ▶ Error prone
  - ▶ Long developer turn arounds, because
    - Configured/implemented in application

# Accessing DDI/XML based metadata application depended

# The DDI file

```

Xpath: /

## Output

Beruf Partner/In (D11.1)

Welchen Beruf übt Ihr Partner/Ihre Partnerin aus? Darf ich Sie bitten, seinen/ihr

Antworten 13

- [1] sehr wahrscheinlich
- [2] ziemlich wahrscheinlich
- [3] eher unwahrscheinlich
- [4] sehr unwahrscheinlich
- [98] weiß nicht
- [99] keine Angabe

Intervieweranweisung[offene Antwort(en) anhand vorgegebener Parteiliste fü

EingangsfilterDies ist der neue Filter

if vw17=3

## Goals

- Efficient and error less creation of config files
- Better modelling
- Faster turn-around for developer

# GESIS: DDI Datasources

- DBK: StudyUnit
- DSDM: Variables
- CodeBookExlorer: Questions/Variables
- German Election Studies: StudyUnit/Questions
- CVManager (CESSDA):

*Application dependend DDI-FlatDBs*

*Next step: Connect/Integrate*

# New application several input points

- Early input
  - ▶ Creation of questionnaire
    - Existing wave
    - New study
- Late input
  - ▶ Existing study; new wave
  - ▶ Complete new study; (almost) only statistical file

# Decisions to be discussed

- Central resource packages or resources packages per study?
  - ▶ Duplicate data
- GESIS wide URI or DDI wide URI?
- How to SIP?
- ...

## Summary

- DDI FlatDB (2018)
  - ▶ Links will be handled
  - ▶ Developers will be supported using modelling DDI
  - ▶ Adopted into „real“ internal GESIS workflow

Thank you
