Table of Contents

Table of Contents	v
List of Tables	viii
List of Figures	xi
Preface	13
Chapter 1 Introduction	15
1.1 Europe's challenges	15
1.2 The costs of the euro and variations in business cycles	17
1.3 Competitiveness in Europe	23
1.4 An agenda for reform	27
Chapter 2 The euro area business cycle	29
2.1 Introduction	29
2.2 Methodology	31
The NBER method	33
The Generalized Dynamic Factor Model	34
2.3 Euro Area Business Cycle Indexes	36
EuroTCB	37
EuroCOIN	38
EuroIJR	39
2.4 Comparison	40
2.5 Driving Forces of the Euro Area Growth Rate Cycle	46
2.6 Concluding remarks	51
Appendix 2.A The Generalized Dynamic Factor Model	54
Choice of Q	56
Appendix 2.B Plots of Quarterly GDP and Business Cycle Indexes	58
Chapter 3 Business cycle synchronization	61
3.1 Introduction	61
3.2 Measuring business cycle synchronization	64
Data	64
Measuring business cycles	65

	Synchronization measures	69
3.3	Synchronization trends in OECD countries	73
3.4	Synchronization trends in U.S. states	79
3.5	The determinants of synchronization	83
	Methodology	85
	Data sources and methods	88
	Estimation results	93
	Sample heterogeneity and outliers	99
3.6	Concluding remarks	103
	Appendix 3.A Extreme bounds analysis	106
Chapter 4	Productivity growth and ICT use	109
4.1	Introduction	109
4.2	ICT and aggregate growth	111
	Data sources and methods	112
	Sources of aggregate labour productivity growth	115
4.3	Industry contributions to labour productivity growth	119
	Contribution and decomposition analysis	119
	Measurement issues	123
4.4	Patterns of ICT use in the U.S. and Europe	124
	ICT intensity measures	124
	Can a distinct group of ICT users be identified?	127
4.5	Industry-level growth accounts and the contribution of ICT to growth	130
	Growth accounting at the industry level	131
	Growth accounting results	132
	What is the evidence on TFP spillovers?	134
4.6	Concluding remarks	142
	Appendix 4.A ICT-production TFP	145
	Appendix 4.B Estimating TFP levels	146
	Appendix 4.C The reallocation effect	147
Chapter 5	Cyclical productivity	151
5.1	Introduction	151

5.2	Background	153
5.3	A model of cyclical productivity	155
5.4	Methods and data	158
	Econometric methodology	158
	Data	159
5.5	Results	160
	Production function estimates	162
	Cyclical productivity growth	166
	Adjusted productivity growth	170
5.6	Concluding remarks	172
	Appendix 5.A Appendix tables	174
Chapter 6	Summary and Conclusions	181
6.1	Introduction	181
6.2	Prospects for a common currency	181
6.3	What drives productivity growth?	184
6.4	An agenda for European reform	188
	References	191
	Acknowledgments	207
	Samenvatting (summary in Dutch)	209

List of Tables

Table 1.1 Output correlation of European and non-European countries with the euro area, 1999-2003	20
Table 1.2 Growth of output, employment and productivity in Europe and the U.S., 1987-2004	25
Table 2.1 Correlation between euro area GDP and business cycle indexes	42
Table 2.2 Business cycle turning points of euro area GDP and business cycle indexes	44
Table 2.3 Growth rate cycle turning points of euro area GDP and business cycle indexes	44
Table 2.4 Weights and contributions of the EuroIJR index	48
Table 3.1 Business cycle synchronization of 21 OECD countries with euro area aggregate, 1970-2003	75
Table 3.2 Business cycle synchronization of personal income in U.S. states with U.S. aggregate personal income, 1929-2004	80
Table 3.3 Correlation coefficients between trade intensity measures	90
Table 3.4 The effect of trade on business cycle synchronization, replication of the Frankel-Rose model with the current dataset	94
Table 3.5 Effect of trade on business cycle synchronization in a multivariate model	96
Table 3.6 Actual, predicted and projected output correlations between EMU countries based on the intra-industry regressions	99
Table 3.7 The effect of trade on business cycle synchronization, OLS versus LTS/RWLS estimation	101
Table 4.1 The cross-country relationship between ICT capital deepening and TFP growth for the EU-15 and the U.S.	118
Table 4.2 ICT intensity measures for major U.S. sectors in 1995	126
Table 4.3 Number of U.S. industries classified in high ICT intensity cluster and correlation between ICT intensity measures	128
Table 4.4 Sources of industry labour productivity growth, 1995-2003	133

Table 4.5 The impact of ICT on TFP growth, annual growth rates for 1979-2003 in Europe and the U.S.	135
Table 5.1 Correlation between annual total factor productivity and GDP growth, Europe and the U.S., 1979-2003	153
Table 5.2 Comparing the fit of first-stage regressions explaining input growth, downstream indicator vs. Hall-Ramey instruments	161
Table 5.3 Estimates of returns to scale to inputs, unadjusted for unmeasured input utilization, for France, Germany, Netherlands and U.S., 1979-2003	163
Table 5.4 Returns to scale of inputs with a correction for unmeasured input utilization, 1979-2003	164
Table 5.5 Returns to scale of inputs with a correction for unmeasured input utilization, excluding average hours worked from aggregate inputs, 1979-2003	165
Table 5.6 Correlation between output growth and adjusted productivity growth for industry groups under variable returns to scale and corrected for unmeasured utilization	168
Table 5.7 Share of U.S. industries with significantly positive correlation between output growth and adjusted productivity growth for various specifications	169
Table 5.8 Productivity growth relaxing growth accounting assumptions	171
Appendix Table 3.1 Robustness of potential explanatory variables for synchronization	106
Appendix Table 5.1 Correlation between annual output growth and total factor productivity growth at the industry level, France, Germany, Netherlands and U.S., 1979-2003	174
Appendix Table 5.2 F-statistics for the first-stage regression of instruments on input growth	175
Appendix Table 5.3 Estimates of returns to scale of inputs for individual industries, 1979-2003	176
Appendix Table 5.4 Estimates of returns to scale of inputs without a utilization correction, using Hall-Ramey instruments, 1979-2003	177
Appendix Table 5.5 Returns to scale of inputs with a correction for unmeasured input utilization using Hall-Ramey instruments, 1979-2003	178

Appendix Table 5.6 Returns to scale of inputs with a correction for unmeasured input utilization, excluding average hours worked from aggregate input growth using Hall-Ramey instruments, 1979-2003	179
Appendix Table 5.7 Correlation between output and adjusted productivity growth, based on industry-by-industry estimates of returns to scale and unmeasured input utilization	179

List of Figures

Figure 1.1 Euro area cycle and the range of cycles for euro area countries, 1987-2003	18
Figure 1.2 The costs of a common currency for different levels of synchronization and flexibility	21
Figure 1.3 Trend growth in GDP per hour worked in the EU-15 and U.S., 1979-2004	24
Figure 2.1 Euro area GDP and monthly business cycle indexes (levels), 1988-2002, January 1988=100	42
Figure 2.2 Euro area GDP and monthly business cycle indexes (growth rates), 1988-2002	43
Figure 2.3 Contribution to EuroIJR by its components	50
Figure 3.1 Density estimates of bilateral output correlations, GDP 1970-2003	76
Figure 3.2 Density estimates of bilateral output correlations, industrial production 1970-2003	77
Figure 3.3 Average bilateral correlation between EMU countries and all other correlations for an 8-year moving window, GDP 1970-2003	78
Figure 3.4 Average bilateral correlation between EMU countries and all other correlations for an 8-year moving window, industrial production 1970-2003	79
Figure 3.5 Density estimates of the bilateral personal income correlations, 1929-2004	81
Figure 3.6 Average bilateral correlation between U.S. states for an 8-year moving window, personal income 1929-2004	82
Figure 3.7 The Relationship between business cycle correlation (C), trade (T), gravity variables (Z) and other variables (F)	87
Figure 3.8 Estimated density plots of untransformed and transformed business cycle correlations	89
Figure 3.9 Standardized coefficients of explanatory variables with 95% confidence intervals	97

Figure 3.10 Standardized coefficients of specialization measures with 95% confidence intervals	98
Figure 3.11 Scatter diagram of industrial production correlations and trade (after conditioning on other explanatory variables)	100
Figure 3.12 Quantile regression estimates of the effect of trade on synchronization, GDP correlations	102
Figure 3.13 Quantile regression estimates of the effect of trade on synchronization, industrial production correlations	103
Figure 4.1 Sources of labour productivity growth, EU-15 and U.S., 1987-2004	115
Figure 4.2 ICT contribution and non-ICT TFP growth, 2000-2004	116
Figure 4.3 ICT contribution and non-ICT TFP growth, 1995-2000	117
Figure 4.4 Contributions by industry groups to market economy labour productivity growth, EU-15 and U.S. 1987-2003	121
Figure 4.5 Difference in labour productivity contributions of market services, U.S. minus EU-15, 1995-2003	122
Figure 4.6 Share of ICT capital in total capital compensation in the United States for 1995	129
Figure 4.7 Effect of ICT on TFP growth in the EU-4 and U.S. at the industry level, 1-year to 23-year difference	137
Figure 4.8 Effect of ICT on TFP growth in the EU-4 and U.S. at the industry level, contemporaneous effect to 22-year lag	138
Figure 4.9 The relation between ICT contributions and TFP growth for subsequent sets of 5-year differences, 1979-1984 to 1998-2003	139
Figure 4.10 The relation between ICT contributions and TFP growth for subsequent sets of 5-year differences, Continental Europe vs. Anglo-Saxon countries	140
Appendix Figure 2.1 Percentage of variance explained by each eigenvalue (38 series, 189 observations)	57
Appendix Figure 2.2 Euro GDP and quarterly business cycle index levels, 1988-2002, January 1988=100	58
Appendix Figure 2.3 Euro GDP and quarterly business cycle index growth rates, 1988-2002	59
