# Table of Contents

<b>Chapter 1 Mechanisms in manganese catalysed oxidation of alkenes with H<sub>2</sub>O<sub>2</sub></b>	<b>1</b>
1.1 Introduction	2
1.2 Studying mechanism in manganese catalysed oxidation chemistry: tools of the trade	2
1.3 Oxidations catalysed by ‘ligand free’ Mn systems	3
1.4 Quinoline based ligands for manganese catalysed oxidation	7
1.5 Polypyridyl amine based ligands for manganese catalysed oxidation	8
1.6 Trimethyl-triazacyclononane based ligands for manganese catalysed oxidation	12
1.7 Tetraazamacrocyclic based ligands for manganese catalysed oxidation	21
1.8 Conclusions	23
1.9 Overview of the thesis	23
1.10 References and notes	24
<b>Chapter 2 Selective catalytic oxidation of alcohols, aldehydes, alkanes and alkenes employing manganese catalysts and H<sub>2</sub>O<sub>2</sub></b>	<b>29</b>
2.1 Introduction	30
2.2 Results and discussion	31
2.2.1 Oxidation of secondary alcohols to ketones	31
2.2.2 Oxidation of primary and benzyl alcohols to carboxylic acids	34
2.2.3 Oxidation of aldehydes to carboxylic acids	36
2.2.4 Oxidation of alkenes	38
2.2.5 C-H activation	41
2.2.6 Oxidation of bifunctional substrates	43
2.2.7 Protecting group tolerance	48
2.3 Summary and conclusions	50
2.4 Experimental section	51
2.5 References and notes	66
<b>Chapter 3 The unexpected role of pyridine-2-carboxylic acid in manganese based oxidation catalysis with pyridin-2-yl based ligands</b>	<b>69</b>
3.1 Introduction	70
3.2 Results	73
3.2.1 Catalytic activity of Mn <sup>II</sup> with TPTN, 2 and 3	73
3.2.2 Stability of ligands 2 and 3 in the presence of iron salts and under acid and basic conditions	74
3.2.3 Catalytic activity of Mn <sup>II</sup> /ligand in relation to ligand structure	77
3.2.4 Ligand stability under reaction conditions	79

3.2.5 Oxidation catalysis with pyridine-2-carboxylic acid/Mn <sup>II</sup>	80
3.2.6 C-H activation and alcohol oxidation with pyridine-2-carboxylic acid/Mn <sup>II</sup> /NaOAc	82
3.3 Summary and conclusions	82
3.4 Experimental section	83
3.5 References and notes	95
<b>Chapter 4 Manganese catalysed <i>cis</i>-dihydroxylation of electron deficient alkenes with H<sub>2</sub>O<sub>2</sub></b>	<b>99</b>
4.1 Introduction	100
4.2 Results and discussion	101
4.2.1 <i>cis</i> -Dihydroxylation of electron deficient alkenes	101
4.2.2 <i>cis</i> -Dihydroxylation and epoxidation of electron rich alkenes	106
4.2.3 Catalyst composition	107
4.2.4 Solvent dependence	110
4.3 Mechanistic considerations	111
4.4 Summary and conclusions	112
4.5 Experimental section	113
4.6 References and notes	120
<b>Chapter 5 Mechanistic study of an <i>in situ</i> prepared Mn<sup>II</sup>/pyridine-2-carboxylic acid catalytic system</b>	<b>123</b>
5.1 Introduction	124
5.2 Mechanistic considerations	125
5.2.1 Information from substrate scope	125
5.2.2 Kinetic analysis: order of reaction with respect to various components and the rate determining step	126
5.2.3 Role(s) of ketone in the catalytic reaction	131
5.2.4 Effect of acetic acid on the catalytic oxidation of alkenes	138
5.2.5 Effect of other acids on catalysis with butanedione	141
5.2.6 <sup>18</sup> O-labelling studies	147
5.3 Proposed mechanism	149
5.4 Summary and conclusions	151
5.5 Experimental section	152
5.6 References and notes	153
<b>Chapter 6 General discussion and future perspectives</b>	<b>155</b>
6.1 References	158
<b>Summary</b>	<b>159</b>
<b>Samenvatting</b>	<b>165</b>
<b>Acknowledgements</b>	<b>171</b>
