Travels to feed and food to breed

The annual cycle of a migratory raptor,
Montagu's harrier, in a modern world

This PhD project was carried out in the Animal Ecology Group, Centre for Ecological and Evolutionary Studies (CEES) according to the requirements of the Graduate School of Science (Faculty of Mathematics and Natural Sciences, University of Groningen), The Netherlands; the Institute of Avian Research "Vogelwarte Helgoland", Wilhelmshaven, Germany; and the Dutch Montagu's Harrier Foundation, Scheemda, The Netherlands.

The work was financially supported by the Dutch Montagu's Harrier Foundation, the Deutsche Bundesstiftung Umwelt, the Dutch Ministry of Agriculture, Nature and Food Quality, the Province of Groningen, the Province of Flevoland, Vogelbescherming Nederland (BirdLife Netherlands), the Prince Bernhard Cultural Foundation, the Faculty of Mathematics and Natural Sciences (University of Groningen), the Schure-Beijerink-Popping Fonds, the Nederlandse Aardolie Maatschappij, Microwave Telemetry Inc., L.A.M. Smits and Triodos Bank.

The production of this thesis was financially supported by the University of Groningen and the Faculty of Mathematics and Natural Sciences (University of Groningen).

geboren op 9 januari 1978
te Bad Kreuznach, Duitsland

Promotores: Prof. Dr. Ir. J. Komdeur
Prof. Dr. F. Bairlein

Copromotor: Dr. K.-M. Exo

Beoordelingscommissie: Prof. Dr. T. Alerstam
Dr. V. Bretagnolle
Prof. Dr. T. Piersma

Contents

Chapter 1	General introduction	9
Part I: Processes during the breeding season		
Box A	Food intake in a diurnal raptor revealed by two methods of pellet analysis - a feeding experiment	22
Chapter 2	Do voles make agricultural habitat attractive to Montagu's Harrier <i>Circus pygargus</i> ?	29
Chapter 3	Home range size and habitat selection of the endangered Montagu's harrier <i>Circus pygargus</i> in NW-Europe: implications for conservation	47
Chapter 4	Raptor foraging efficiency and agricultural management: mowing enhances hunting yield of the endangered Montagu's harrier	69
Part II: Processes during migration		
Chapter 5	Satellite tracking of two Montagu's Harriers (<i>Circus pygargus</i>): dual pathways during autumn migration	87
Chapter 6	Individual- and population-specific migration routes of Montagu's harriers revealed by satellite telemetry	95
Box B	Standardization of the analysis of ARGOS satellite tracking data in order to enhance interspecific comparisons of migrating birds	112
Box C	The global migratory system of Montagu's harrier <i>Circus pygargus</i> – insights from satellite telemetry and migration counts	124
Part III: Processes during the wintering season		
Chapter 7	Are movements of a Palearctic-African migratory raptor species in the Sahel driven by seasonal habitat changes?	139
Box D	Kernel estimates of raptor home range size using ARGOS satellite telemetry datasets	162
Part IV: Synthesis		
Chapter 8	Montagu's Harrier <i>Circus pygargus</i>	173
Box E	A population model based on Montagu's harrier's annual cycle: Nest protection, agri-environmental schemes and non-breeding season survival	192
Chapter 9	General discussion	203
