RIJKSUNIVERSITEIT GRONINGEN

# Computer assisted decision support in acutely ill patients

## Application in glucose management and quantification of myocardial reperfusion

Proefschrift

ter verkrijging van het doctoraat in de
Medische Wetenschappen
aan de Rijksuniversiteit Groningen
op gezag van de
Rector Magnificus, dr. F. Zwarts,
in het openbaar te verdedigen op
woensdag 21 mei 2008
om 14.45 uur

door

Mathijs Vogelzang

geboren op 15 augustus 1981
te Groningen

# Contents

**1 General introduction and aims of this thesis** **7**

## I Computer assisted analysis of clinical data

**2 Hyperglycemic index as a tool to assess glucose control: a retrospective study** **15**
*Crit Care* 2004, 8:R122–R127

**3 Hyperglycemia has a stronger relation with outcome in trauma patients than in other critically ill patients** **29**
*J Trauma* 2006, 60:873–877

**4 The impact of a reduced dose of dexamethasone on glucose control after coronary artery bypass surgery.** **43**
*Cardiovasc Diabetol* 2007, 6:39

**5a Refractory hyperglycemia induced by glucose-insulin-potassium infusion in acute myocardial infarction** **53**
*Neth Heart J* 2006, 14:46–48

**5b Glucose metabolism and acute myocardial infarction** **59**
*Eur Heart J* 2006, 27:1264–1265

**6 Computer assisted myocardial blush quantification in acute myocardial infarction** **65**
*Submitted*

## II Decision support in critically ill patients

**7 Design and implementation of GRIP: a computerized glucose control system at a surgical intensive care unit** **79**
*BMC Med Inform Decis Mak* 2005, 5:38

**8 Computer-assisted glucose control in critically ill patients** **97**
*Intensive Care Med 2008, accepted*

**9 Improved potassium control with a nurse-centered computerized protocol: a before and after study.** **111**
*Submitted*

**10 Summary and future perspective** **123**

**Nederlandse samenvatting** **129**

**Dankwoord** **133**

**Curriculum and list of publications** **137**
