Contents

		<i>page</i>
Chapter 1	Introduction	9
Part I	Detrimental effects of ACE inhibition	
Chapter 2	Adverse renal effects of ACE inhibition during dietary sodium restriction in proteinuric and healthy rats <i>Journal of Pathology 2006;209(1):129-139</i>	27
Chapter 3	Tubulointerstitial inflammation and injury induced by ACE inhibition and low sodium in healthy rats mimics Ang II induced renal damage and induces sodium sensitivity <i>Submitted</i>	47
Part II	ACE2: a positive mediator in the RAAS	65
Chapter 4	The emerging role of ACE2 in physiology and disease <i>Journal of Pathology 2007; 212(1):1-11</i>	
Chapter 5	Tissue distribution of ACE2 protein, the functional receptor for SARS coronavirus. A first step to understanding SARS pathogenesis <i>Journal of Pathology 2004; 203(2):631-637</i>	89
Chapter 6	Renal ACE2 expression in human kidney disease <i>Journal of Pathology 2004; 204(5):587-593</i>	103
Chapter 7	Differential regulation of renal ACE2 and ACE during ACE inhibition and dietary sodium restriction in healthy rats <i>Experimental Physiology 2008;93(5):631-638</i>	117
Part III	(Pro)renin-receptor: renal regulation in high renin conditions	
Chapter 8	Antihypertensive therapy upregulates renin and the (pro)renin receptor in the clipped kidney of rats with 2 kidney, 1 clip hypertension. <i>Kidney International 2007; 72: 725-730</i>	133
Chapter 9	High (pro)renin is associated with renal inflammation and fibrosis through possible activation of the (pro)renin receptor. <i>Submitted</i>	147
Chapter 10	Summary & General discussion	165
	Appendix correspondence <i>Kidney International 2006;70(7):1377-1378</i>	181
