High-precision (p,t) reactions to determine reaction rates of explosive stellar processes

Andrija Matić

RIJKSUNIVERSITEIT GRONINGEN

High-precision (p,t) reactions to determine reaction rates of explosive stellar processes

Proefschrift

ter verkrijging van het doctoraat in de
Wiskunde en Natuurwetenschappen
aan de Rijksuniversiteit Groningen
op gezag van de
Rector Magnificus, dr. F. Zwarts,
in het openbaar te verdedigen op
maandag 11 juni 2007
om 16.15 uur

door

Andrija Matić
geboren op 2 december 1974
te Valjevo, Serbia

Promotor:
Prof. dr. M.N. Harakeh
Copromotor:
Dr. A.M. van den Berg

Beoordelingscommissie:
Prof. dr. G. P. A. Berg
Prof. dr. K. Hatanaka
Prof. dr. C. E. Rolfs

Contents

1 Introduction **1**

1.1 Explosive stellar scenarios 1

1.1.1 Supernovae type II 2

1.1.2 Novae 2

1.1.3 Supernovae type Ia 3

1.1.4 X-ray bursts 4

1.2 CNO cycles 4

1.3 NeNa and MgAl cycles 5

1.4 Astrophysical importance of ^{22}Na and ^{26}Al 7

1.4.1 ^{22}Na 7

1.4.2 ^{26}Al 7

1.5 Outline of this work 9

2 Theoretical model of stellar reaction rates **11**

2.1 Stellar reaction rates 11

2.2 Non-resonant reaction rates (direct reaction rates) 12

2.3 Resonance reaction rates through narrow resonances 17

2.4 Reactions through broad resonances 20

2.5 The astrophysically relevant excitation-energy regions for ^{22}Mg and ^{26}Si . . 22

3 Experimental setup and method **27**

3.1 Experimental area 27

3.2 The GR spectrometer 28

3.3 Matching between beam line and spectrometer 30

3.4 Over-focus mode 34

3.5 The detection and data-acquisition systems 36

3.6 Experimental settings for the (p,t) reaction 38

4 Calibration **43**
4.1 Software corrections . . . 43
4.2 Background subtraction . . . 45
4.3 Reference data . . . 47
4.4 Fits of the spectra . . . 49
4.5 Calibration function . . . 53
4.6 Calibration of ^{26}Si spectra . . . 58

5 ^{22}Mg data and their astrophysical implications **61**
5.1 The ^{24}Mg(p,t)^{22}Mg angular distributions . . . 61
5.2 ^{22}Mg and its mirror nucleus ^{22}Ne . . . 63
5.3 Calibration region (g.s. - 5.711 MeV) . . . 64
5.4 Region above the proton-emission threshold (5.5042 MeV- 8.142 MeV) . . . 65
5.5 Region above the α-emission threshold (8.142 MeV-10.5 MeV) . . . 74
5.6 Region above 10.5 MeV . . . 79
5.7 Astrophysical implications for the ^{18}Ne(α,p)^{21}Na reaction . . . 83
5.8 Astrophysical implications for the ^{21}Na(p,γ)^{22}Mg reaction . . . 91
5.9 Summary . . . 96

6 ^{26}Si data and their astrophysical implications **99**
6.1 ^{26}Si and its mirror nucleus ^{26}Mg . . . 99
6.2 Calibration region (g.s. - 5.5123 MeV) . . . 101
6.3 Region above the proton-emission threshold (5.5123 MeV - 9.164 MeV) . . . 104
6.4 Region above the α-emission threshold (9.164 MeV) . . . 111
6.5 Astrophysical implications for the ^{25}Al(p,γ)^{26}Si reaction . . . 111
6.6 Astrophysical implications for the ^{22}Mg(α,p)^{25}Al reaction . . . 116
6.7 Summary . . . 120

7 Summary and conclusion **123**

A DWBA and CC calculations **127**

Nederlandse samenvatting en vooruitblik **131**

Acknowledgment **135**

Bibliography **137**
