Stress and the female brain

The effects of estradiol on the neurobiological
reactions to chronic stress

Marjolein Gerrits

The studies described in this thesis were performed at the Department of Psychiatry, University of Groningen, The Netherlands.

Publication of this thesis was financially supported by the Graduate school of Behavioral and Cognitive Neurosciences (BCN) and the University of Groningen.

Cover: Pointe du Raz, Brittany, France.
Week off with Karin van der Borgh & Nienke Beintema.
Photograph by Marjolein Gerrits, mei 2004.

Contents

- Chapter 1.** General introduction / 7
Gender differences and estrogen actions in stress-related neuronal systems
- Chapter 2.** The role of the mPFC in stress responses / 23
Increased stress vulnerability after a prefrontal cortex lesion in female rats
- Chapter 3.** Stress-induced PVN activation / 37
Cyclic estradiol replacement attenuates stress-induced c-Fos expression in the PVN of ovariectomized rats
- Chapter 4.** Limbic c-Fos and pERK1/2 induction after stress / 51
Increased limbic pERK1/2 expression after chronic stress is reduced by cyclic 17 β -estradiol administration
- Chapter 5.** Stress-induced c-Fos mRNA / 67
c-Fos mRNA expression in the PVN and mPFC does not habituate to chronic stress in ovariectomized and estradiol-replaced rats
- Chapter 6.** Recovery of stress-induced aberrations, possibilities of treatment / 75
Chronic stress-induced sensitization of the limbic system after recovery is partly restored by cyclic estradiol administration in ovariectomized rats
- Chapter 7.** General discussion / 93
- Abbreviations / 109
References / 111
Nederlandse samenvatting / 141
Dankwoord / 150
Curriculum Vitae / 153
Publications and Abstracts / 154
