Water Dynamics Explored by Femtosecond Infrared Spectroscopy

Proefschrift

ter verkrijging van het doctoraat in de
Wiskunde en Natuurwetenschappen
aan de Rijksuniversiteit Groningen
op gezag van de
Rector Magnificus, dr. F. Zwarts,
in het openbaar te verdedigen op
vrijdag 26 november 2004
om 13:15 uur

door

Sergiy Yeremenko

geboren op 7 april 1974
te Kharkov (Oekraïne)

Promotor: Prof. dr. D.A. Wiersma
Co-Promotor: Dr. M.S. Pshenichnikov

Beoordelingscommissie:
Prof. dr. K. Duppen
Prof. dr. J. Knoester
Prof. dr. H.J. Bakker

Contents

Chapter 1

<i>General Introduction</i>	1
1.1 Extraordinary properties of water	2
1.2 Infrared spectroscopy of water	3
1.3 Basics of nonlinear spectroscopy	8
1.4 Generation and characterization of femtosecond infrared pulses	11
1.5 Scope of this Thesis	13
References	14

Chapter 2

<i>Generation and characterization of tunable mid-infrared femtosecond pulses</i>	19
2.1 Introduction	20
2.2 Generation of the mid-infrared femtosecond pulses	21
2.3 Frequency-resolved pump–probe characterization of femtosecond infrared pulses	25
2.4 Conclusions	29
References	30

Chapter 3

<i>Theoretical formalism of ultrafast vibrational spectroscopy</i>	33
3.1 Introduction	34
3.2 Calculation of nonlinear polarization	34
3.3 Theoretical description of the photon echo experiment	45
3.4 Signal detection	47
3.5 The echo-peak shift	50
3.6 Summary	52
References	52

Chapter 4

<i>Early-time structural dynamics in water explored by heterodyne-detected photon echo</i>	55
4.1 Introduction	56
4.2 Experiment	58
4.3 Experimental results	61
4.4 Theoretical model	62
4.5 Analysis of experimental data	63
4.6 Study of water dephasing dynamics in acetonitrile solution	67
4.7 Summary and conclusions	70
References	71

Chapter 5

<i>Thermal effects in the nonlinear spectroscopy of water</i>	73
5.1 Introduction	74
5.2 Experiment	75
5.3 Results and discussion	77
5.3.1. Determination of the temperature shift using the pump-probe method	77
5.3.2. Heterodyne-detected transient grating measurements	80

5.3.3 Mechanism of thermal grating formation	83
5.3.4 Initial dynamics of the thermal solvent response	88
5.4 Theory	89
5.5 Numerical simulations	93
5.6 Summary and conclusions	97
References	98
Chapter 6	
<i>Dynamical Stokes shift and anharmonicity of the OH-stretch vibration of water molecules</i>	101
6.1 Introduction	102
6.2 Experiment	105
6.3. Experimental results and discussion	106
6.3.1 The vibrational Stokes shift	106
6.3.2 Characterization of the excited state transition	109
6.4 Summary and conclusions	113
Appendix 6A	113
References	117
Chapter 7	
<i>Long-time water dynamics explored by stimulated echo-peak shift measurements</i>	119
7.1 Introduction	120
7.2 Experiment	123
7.3 Experimental results	124
7.4 Numerical simulations and discussion	126
7.5 Study of water dephasing dynamics in acetonitrile solution	132
7.6 Discussion and comparison with other work	133
7.6 Summary	138
References	139
Chapter 8	
<i>Hydrogen Bonding and Vibrational Energy Relaxation in Water-Acetonitrile Mixtures</i>	141
8.1 Introduction	142
8.2 Experiment	145
8.3 Orientational dynamics of water molecules in acetonitrile	148
8.4 Population dynamics of water molecules in acetonitrile matrix	150
8.5 Signal analysis in terms of hydrogen bonded versus non-hydrogen bonded species	153
8.6 Pathways for vibrational energy relaxation	157
8.7 Summary and conclusions	162
References	163
Summary	165
Samenvatting	167
Acknowledgements	170
