Contents

Chapter 1	Introduction	1
Chapter 1.2	Scope of the thesis	23
Chapter 2	A sensitive method for quantifying cytomegalic endothelial cells in peripheral blood from cytomegalovirus-infected patients.	25
Chapter 3	Uninfected and cytomegalic endothelial cells in blood during cytomegalovirus infection: effect of acute rejection.	39
Chapter 4	Acute rejection before CMV infection enhances von Willebrand Factor and sVCAM-1 in blood.	47
Chapter 5.1	Cytomegalovirus pneumonitis after kidney transplantation is not caused by plugging of cytomegalic endothelial cells only.	65
Chapter 5.2	Pulmonary diffusion abnormalities in relation to cytomegalovirus antigenemia and cytomegalic endothelial cells in blood.	75
Chapter 6	Cytomegalovirus (CMV)-specific antibodies inhibit the <i>in vitro</i> generation of CMV pp65 antigenemia in polymorphonuclear cells.	83
Chapter 7	Uptake of pp65 in <i>in vitro</i> generated pp65 positive polymorphonuclear cells by phagocytosis and cell fusion?	91
Chapter 8	Cytomegalovirus infection increases the expression and activity of ecto-ATPase (CD39) and ecto-5' nucleotidase (CD73) on endothelial cells.	101
Chapter 9	Discussion	113
	Summary	125
	Nederlandse samenvatting	129
	Dankwoord	135
