**Molecular Adaptations in Human Atrial Fibrillation:
Mechanisms of Protein Remodeling**

The studies described in this thesis were supported by grants 94.014 and 96.051 from the Netherlands Heart Foundation.

Publication of this thesis was financial supported by :
The Netherlands Heart Foundation
Groningen University Institute of Drug Exploration (GUIDE)
Faculteit Medische Wetenschappen RUG
Bristol-Myers Squibb BV
AstraZeneca BV
ASTA Medica BV
Novartis Pharma BV
Dr. Saal van Zwanenberg stichting

Cover:

Top of the picture shows the view from the ‘mountain’ of Kardingge (Groningen). Bottom of the picture shows electron microscopic detail of a human atrial myocyte (magnification x 4500).
Backside of the cover shows a picture of Captain Hook (Myrthe), Wendy (Jona) and Peter Pan (Joachim).

Fibrillation:
Mechanisms of Protein Remodeling**

Proefschrift

ter verkrijging van het doctoraat in
de Medische Wetenschappen
aan de Rijksuniversiteit Groningen
op gezag van de
Rector Magnificus, dr. D.F.J. Bosscher,
in het openbaar te verdedigen op
woensdag 29 november 2000
om 16.00 uur

door
Bianca Johanna Josephina Maria Brundel
geboren op 7 februari 1971
te Lichtenvoorde

Promotores:

Prof. Dr. H.J.G.M. Crijns

Prof. Dr. W.H. van Gilst

Referenten:

Dr. I.C. van Gelder

Dr. R.H. Henning

Beoordelingscommissie:

Prof. Dr. M. Borgers

Prof. Dr. A.A.M. Wilde

Prof. Dr. H.W.G.M. Boddeke

Table of contents

Chapter 1	Introduction	9
Part I Gene expression of proteins influencing calcium homeostasis		
Chapter 2	Gene expression of proteins influencing calcium homeostasis in patients with persistent and paroxysmal atrial fibrillation Cardiovascular Research 1999 (42) 443-454	21
Chapter 3	Alterations in gene expression of proteins involved in calcium handling in patients with atrial fibrillation Journal of Cardiovascular Electrophysiology 1999 (10) 552-560	39
Part II Gene expression of ion-channels		
Chapter 4	Alterations in potassium channel gene expression in atria of patients with persistent and paroxysmal atrial fibrillation Differential regulation of protein and mRNA levels for K ⁺ -channels Journal of the American College of Cardiology, provisionally accepted	55
Chapter 5	Ion channel remodeling is related to intra operative atrial refractory periods in patients with paroxysmal and persistent atrial fibrillation Circulation, in press	69
Part III Gene expression of neurohormones		
Chapter 6	Gene expression of the natriuretic peptide system in atrial tissue of patients with paroxysmal and persistent atrial fibrillation Journal Cardiovascular Electrophysiology 1999, (10) 827-835	85

Chapter 7	Endothelin-1 mRNA is upregulated in patients with persistent atrial fibrillation with underlying valve disease	
	Submitted	99
Part IV Calpain activation, a new adaptive mechanism in AF		
Chapter 8	Activation of proteolysis by calpain during paroxysmal and persistent atrial fibrillation	
	Submitted	113
Chapter 9	Calpain activity is related to ion-channel, structural and electrical remodeling in human paroxysmal and persistent atrial fibrillation	
	Submitted	121
Chapter 10	General discussion	137
Summary		153
Samenvatting		155
Dankwoord		157
