**GLOMERULAR ADENINE NUCLEOTIDASES**

**A STUDY INTO THE ANTI-THROMBOTIC AND ANTI-INFLAMMATORY  
ACTIVITY OF THE RAT KIDNEY**

PROEFSCHRIFT

ter verkrijging van het doctoraat in de Geneeskunde  
aan de Rijksuniversiteit Groningen  
op gezag van de Rector Magnificus Dr. S.K. Kuipers  
in het openbaar te verdedigen op  
woensdag 29 april 1992  
des namiddags te 1.15 uur precies  
door

**Klaas Poelstra**

geboren op 3 januari 1964  
te Dokkum

**Promotores:** Prof. Dr. M.J. Hardonk  
Prof. Dr. J.J. Weening

**Referent:** Dr. W.W. Bakker

**Promotiecommissie:** Prof.Dr. J.R. Brentjens  
Prof.Dr. M.R. Halie  
Prof.Dr. Ph.J. Hoedemaeker

## CONTENTS

	Page
<b>Voorwoord</b>	3
<b>Chapter 1</b> General Introduction	5
<b>Chapter 2</b> Demonstration of antithrombotic activity of glomerular adenosine diphosphatase. <i>Blood 78: 141-148, 1991</i>	11
<b>Chapter 3</b> Adriamycin induced decrease of ATPase activity in the glomerular basement membrane of the rat kidney is mediated by oxygen free radical species. <i>Progress in Basement Membrane Research, Renal and related Aspects in Health and Disease. M.C. Gubler &amp; M. Sternberg (Eds). John Libbey Eurotext Ltd, London, pp. 259-264, 1988</i>	27
<b>Chapter 4</b> Intraglomerular platelet aggregation and experimental glomerulonephritis. <i>Kidney International 37:1500-1508,1990</i>	35
<b>Chapter 5</b> Intraglomerular thrombotic tendency and glomerular ADPase. Unilateral impairment of ADPase elicits a proaggregatory microenvironment in experimental glomerulonephritis. <i>Laboratory Investigation 64:520-526, 1991</i>	53
<b>Chapter 6</b> Evidence for antithrombotic activity within the extracellular matrix of rat glomeruli. <i>Submitted</i>	67
<b>Chapter 7</b> Modulation of antiThy1 nephritis in the rat by adenine nucleotides. Evidence for an anti-inflammatory role for nucleotidases. <i>Laboratory Investigation, in press</i>	83
<b>Chapter 8</b> Attenuation of antiThy1 glomerulonephritis in the rat. anti-inflammatory activity of platelet inhibiting pharmaca. <i>Submitted</i>	101

<b>Chapter 9</b>	117
Potentialtion of glomerular ADPase activity by acetylsalicylic acid. <i>Submitted</i>	
<b>Chapter 10</b>	129
Summary and conclusions	
<b>Chapter 11</b>	135
Kort gezegd...	
<b>Additional Publications</b>	139
