Fluorescence transient and optical free induction decay spectroscopy of pentacene in mixed crystals at 2 K. Determination of intersystem crossing and internal conversion rates

Vries, Harmen de; Wiersma, Douwe A.

Published in:
The Journal of Chemical Physics

DOI:
[10.1063/1.438845](https://doi.org/10.1063/1.438845)

Laboratory for Physical Chemistry, State University, Nyenborgh 16, 9747 AG Groningen, The Netherlands

On page 5816, 14 lines from below (right), one should read: "For the O₂ site (proto), for example, for relative power 1 we have for ...".

On page 5819, right below formula (A3), the correct sentence is: "Using the initial conditions $N_2(0) = N_3^f(0) = 0$, ...".
