Supplemental FIG. 1. Specific binding of ribosomes (panels A and B) and  $F_0C$ -RNCs (panels C and D) to YidC1 and YidC2 showing the sensograms of the channels loaded with the IMVs bearing overexpressed YidC1/2 (dashed lines) and the control channels loaded with IMVs bearing only the endogenous levels of the *E. coli* YidC (dotted lines). Also shown is the specific binding after subtraction of the control channel (solid lines). Further details are as in the legend of Figure 3 and the Experimental Procedures section.
