**Novel aspects regarding mechanisms and
 consequences of albuminuria**

Proefschrift

ter verkrijging van de graad van doctor aan de
 Rijksuniversiteit Groningen
 op gezag van de
 rector magnificus, prof. dr. E. Sterken
 en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

woensdag 24 september 2014
 om 11.00 uur

door

Lieneke Scheven

geboren op 30 mei 1985
 te Groningen

Promotor Prof. Dr. P.E. de Jong, UMC Groningen

Copromotor Dr. R.T. Gansevoort, UMC Groningen

Beoordelingscommissie
Prof. dr. R.O.B. Gans, UMC Groningen
Prof. dr. K.A.H. Kaasjager, UMC Utrecht
Prof. dr. R.A. De Boer, UMC Groningen

Paranimfen

Drs. N.A.R. (Nankje) Vellinga

Dr. M.C.J. (Maartje) Slagman

Contents

Chapter 1	General introduction and aims of the thesis	9
Chapter 2	Consequences of the use of albumin to creatinine ratio instead of 24-hour urinary albumin excretion for albuminuria staging	19
Chapter 3	Isolated microalbuminuria indicates a poor medical prognosis	37
Chapter 4	Predictors of progression in albuminuria in the general population: results from the PREVEND cohort	59
Chapter 5	Glomerular and tubular damage markers in individuals with progressive albuminuria	85
Chapter 6	Association between sodium intake and change in uric acid, urine albumin excretion and the risk of developing hypertension	105
Chapter 7	The association of albuminuria with tubular reabsorption of uric acid. Results from a general population cohort.	129
Chapter 8	High-sensitive troponin T and N-terminal pro-B-type natriuretic peptide are associated with cardiovascular events despite the cross-sectional association with albuminuria and glomerular filtration rate	155
Chapter 9	Chapter Summary and general discussion	181
Nederlandse samenvatting		191
Dankwoord		201
