Contents

| | | |
|-------------------|--|-----|
| Chapter 1 | General introduction | 9 |
| Chapter 2 | Diagnostic value of methylation markers in screening for cervical cancer: a systematic review. <i>Submitted for publication</i> | 21 |
| Chapter 3 | Clinical validation of the Cervista HPV HR test in comparison with the Hybrid Capture 2 test according to the guidelines for HPV test requirements for cervical cancer screening <i>Submitted for publication</i> | 57 |
| Chapter 4 | Comparing the Cervista HPV HR test and Hybrid Capture 2 assay in a Dutch screening population: improved specificity of the Cervista HPV HR test by changing default setting. <i>PLoS One 2014;9(7): e101930</i> | 69 |
| Chapter 5 | Discovery of new DNA methylation markers to improve screening for cervical intraepithelial neoplasia grade 2/3 <i>Manuscript in preparation</i> | 93 |
| Chapter 6 | DNA methylation analysis in self-sampled material as a triage test in hrHPV-positive women. <i>British Journal of Cancer, 2014</i> | 123 |
| Chapter 7 | Radical surgery in patients with residual disease after (chemo) radiation for cervical cancer. <i>Int J Gynecol Cancer. 2014;24(7):1276-1285.</i> | 139 |
| Chapter 8 | Inhibition of ATG13-mediated autophagy sensitized cervical cancer cells to irradiation <i>Submitted for publication</i> | 157 |
| Chapter 9 | Summary and future perspectives | 181 |
| Chapter 10 | Nederlandse samenvatting | 193 |
| | Dankwoord | 205 |
