Contents

1	Introduction	1
1.1	Introduction	3
1.2	Innate immunity	4
1.3	Proteoglycans	7
1.4	Innate immunity and proteoglycans	9
1.5	Proteoglycans in kidney	16
1.6	Innate immunity, complement system in kidney	16
1.7	Possible targets for intervention in the kidney	18
1.8	Aim of this thesis	20
	References	22
2	Tubular heparan sulfates as a docking platform for properdin	31
2.1	Introduction	33
2.2	Experimental procedures	34
2.3	Results	37
2.4	Discussion	43
	References	48
3	Factor H and properdin bind different epitopes on tubular HS	53
3.1	Introduction	55
3.2	Experimental procedures	56
3.3	Results	59
3.4	Discussion	68
	References	72
4	Reduction of renal inflammation by non anticoagulant heparinoids	77
4.1	Introduction	79
4.2	Material & Methods	80
4.3	Results	82
4.4	Discussion	88
	References	90

5	Collagens XV/XVIII mediate leukocyte influx	95
5.1	Introduction	97
5.2	Experimental procedures	98
5.3	Results	99
5.4	Discussion	102
	References	104
6	Factor H polymorphisms and graft outcome in renal transplantation	107
6.1	Introduction	109
6.2	Materials and Methods	109
6.3	Results	111
6.4	Discussion	115
	References	117
7	General discussion, Conclusions and Future perspective	119
7.1	General discussion	120
7.2	Conclusions and Future perspective	124
	References	126
	Nederlandse samenvatting	129
	Acknowledgments	133
