RIJKSUNIVERSITEIT GRONINGEN

**Structural studies on a secretion chaperone
from *Shigella flexneri***

and

crystallographic explorations with
a thermostable aldolase

Proefschrift

ter verkrijging van het doctoraat in de
Wiskunde en Natuurwetenschappen
aan de Rijksuniversiteit Groningen
op gezag van de
Rector Magnificus, dr. F. Zwarts,
in het openbaar te verdedigen op
vrijdag 22 juni 2007
om 16.15 uur

door

Jan Hendrik van Eerde

geboren op 21 maart 1978

te Hellendoorn

Promotor: Prof. dr. B.W. Dijkstra

Beoordelingscommissie: Prof. dr. E.J. Boekema
Prof. dr. A.J.M. Driessen

**Structural studies on a secretion chaperone
from *Shigella flexneri***

**and
crystallographic explorations
with a thermostable aldolase**

This Ph.D. study was carried out in the Groningen Biomolecular Sciences and Biotechnology Institute (Faculty of Mathematics and Natural Sciences, University of Groningen).

The research presented in this thesis was supported by the Netherlands Council for Chemical Sciences (CW), with financial aid from the Netherlands Organization for Scientific Research (NWO).

Table of contents

	Scope of the thesis	7
Chapter 1	The <i>Shigella</i> type III secretion system and the structural and functional properties of type III secretion chaperones	9
Chapter 2	Structure of Spa15, a type III secretion chaperone from <i>Shigella flexneri</i> with broad specificity	29
Chapter 3	The <i>Shigella</i> type III secretion chaperone Spa15 binds the effectors IpgB1 and IpaA in a functionally different yet structurally conserved fashion	39
Chapter 4	Biochemical and structural exploration of the catalytic capacity of <i>Sulfolobus</i> KDG aldolases	49
Chapter 5	Fortuitous structure determination of ‘as-isolated’ <i>E. coli</i> bacterioferritin in a novel crystal form	63
	List of abbreviations	73
	References	75
	Samenvatting	89
	Nawoord	93
