## **CONTENTS**

### **CHAPTER 1**

Introduction	9
Scope of this thesis	26

### **CHAPTER 2**

Nuclear receptors: mediators and modifiers of inflammation induced cholestasis <i>Adapted from Frontiers in Bioscience, 2009; 14: 2599-2630</i>	33
--	----

### **CHAPTER 3**

Rosiglitazone attenuates suppression of RXRa-dependent gene expression in inflamed liver <i>Journal of Hepatology, 2007; 46(1):115-23</i>	81
--	----

### **CHAPTER 4**

The LXR-agonist T0901317 attenuates endotoxin-induced changes in hepatobiliary transporter gene expression in mice <i>Under revision</i>	97
---	----

### **CHAPTER 5**

Liver X receptor agonist T0901317 attenuates the inflammatory response in primary rat Kupffer cells <i>In preparation</i>	119
--	-----

### **CHAPTER 6**

Dysregulation of biliary cholesterol secretion during inflammation in mice <i>In preparation</i>	133
---	-----

### **CHAPTER 7**

General discussion	155
Future perspectives	162

### **APPENDICES**

English summary	169
Nederlandse samenvatting	172
List of abbreviations	177
Dankwoord	179
Curriculum vitae	183
Bibliography	184
