Bacterial mechanosensitive channels

What we can learn from a simple model system,
when we design it to be more complicated

Jan Peter Birkner

Cover front: *The BrainTree*
From bacterial osmoregulation
to ion channels of higher organisms?!

Cover back: A sketch of an MsCL subunit within the membrane plane
surface slice of the full pentameric complex

Cover design: Jan Peter Birkner

The work published in this thesis was carried out in the Biochemistry department of the Groningen Biomolecular Sciences and Biotechnology Institute (GBB) of the University of Groningen, The Netherlands. The research was financially supported by the Netherlands Organization for Scientific Research (NWO) and the European Research Council (ERC).

Bacterial mechanosensitive channels

What we can learn from a simple model system,
when we design it to be more complicated

Proefschrift

ter verkrijging van het doctoraat in de
Wiskunde en Natuurwetenschappen
aan de Rijksuniversiteit Groningen
op gezag van de
Rector Magnificus, dr. E. Sterken,
in het openbaar te verdedigen op
vrijdag 23 november 2012
om 12:45 uur

door

Jan Peter Birkner
geboren op 14 oktober 1980
te Minden, Duitsland

Promotor: Prof. dr. B. Poolman

Copromotor: Dr. A. Koçer

Beoordelingscommissie: Prof. dr. M. Bonn
Prof. dr. D. B. Janssen
Prof. dr. S. J. Marrink

Contents

Chapter 1	Introduction	1
Chapter 2	Probing individual subunits of homooligomeric proteins: Generating functional heterooligomers of a homooligomeric membrane protein <i>in vivo</i>	15
Chapter 3	The struggle of water in hydrophobic nanoscale confinement	41
Chapter 4	Hydrophobic gating of the mechanosensitive channel of large conductance evidenced by single-subunit resolution	49
Chapter 5	On the role of individual subunits in MscL gating: <i>"All for one, one for all?"</i>	65
Chapter 6	On the carboxyl-terminus of MscL	91
Chapter 7	Summary, Conclusions and Perspectives	103
	Nederlandse samenvatting voor geïnteresseerden buiten dit vakgebied	111
	Deutsche Zusammenfassung für den interessierten Laien	119
	Epilogue and acknowledgements	129
