## Contents

Chapter 1	General introduction	7
Chapter 2	Mucin1 expression is enriched in the human stem cell fraction of cord blood and is upregulated in majority of the AML cases. <i>Experimental Hematology, 2008; 36:1254-65.</i>	43
Chapter 3	Identification of HIF2 $\alpha$ as a STAT5 target gene in human hematopoietic stem cells involved in self-renewal. <i>Submitted for publication</i>	77
Chapter 4	Downregulation of signal transducer and activator of transcription 5 (STAT5) in CD34 <sup>+</sup> cells promotes megakaryocytic development, whereas activation of STAT5 drives erythropoiesis. <i>Stem Cells, 2008; 26:1732-42.</i>	109
Chapter 5	KRAS <sup>G12V</sup> enhances proliferation and initiates myelomonocytic differentiation in human stem/progenitor cells via intrinsic and extrinsic pathways. <i>Submitted for publication</i>	145
Chapter 6	Summary, discussion and future perspectives	179
Chapter 7	Summary in Dutch (Nederlandse samenvatting)	203
	List of abbreviations	209
	Acknowledgement	211
	List of publications	215
