# Resource Misallocation and Aggregate Productivity

**PhD Thesis**

to obtain the degree of PhD at the  
University of Groningen  
on the authority of the  
Rector Magnificus Prof. E. Sterken  
and in accordance with  
the decision by the College of Deans.

This thesis will be defended in public on  
Thursday 20 November 2014 at 14.30 hours

by

**Addisu Abebe Lashitew**

born on 11 August 1983  
in Chara, Ethiopia

**Supervisor**

Prof. M.P. Timmer

**Co-supervisor**

Dr. R.C. Inklaar

**Assessment Committee**

Prof. E.J. Bartelsman

Prof. C.L.M. Hermes

Prof. C.J. O'Donnell

# Acknowledgement

More than five years of hard work and many hundred cups of coffee later, my PhD research has finally come to a conclusion. I would like to thank a number of people who helped me on this long journey. Let me start by thanking Gerry van Nieuwenhoven, who recommended me for the MSc scholarship that brought me to the Netherlands in 2006. She did me a great favor but I never got the chance to thank her till now. Next, I want to thank the then department of International Economics, now GEM, for accepting me as a PhD student. Professor Bert Steenge was kind enough to help me around in my first year at Groningen. In 2009, I earnestly started working on my project under the supervision of Marcel Timmer and Robert Inklaar. Our proposal eventually won the NWO funding, which supported my extended stay in Groningen. I would like to thank Dirk Bezemer, Eric Diezenbacher and Tammo Bijmolt for their fruitful comments on the proposal. Gaaitzen de Vries was instrumental in introducing me to the misallocation literature, which I would keep reading much of the next five years.

I would also like to thank members of my assessment committee, Professors Eric Bartelsman, Niels Hermes and Chris O'Donnell for reading my thesis and providing helpful comments.

Most importantly, I want to thank Marcel for having been a very friendly and able supervisor. He was always attentive, giving me much degree of freedom generally but decisively correcting me when necessary. Starting from

the topic of my thesis, his fingerprints are present in many critical parts of the thesis even though his name does not appear as a co-author. I have learned a lot from his discerning view on what makes a good research, and benefitted from his exceptionally effective management. I also want to thank Robert for his excellent supervision. Robert helped me patiently through the nitty-gritty of the sometimes-mundane data work, and he showed earnest interest in my progress. He even came to my own office to ask how things were going when I became so entangled in the latest problems that I completely forget to update him. I want to thank both of you for the extraordinary trust and attention you gave for my work. There were many days when I went into a meeting with little faith on my work but came out invigorated and hopeful. I was lucky to have the chance of working with you and being your student.

I want to extend my gratitude to several supporting staff at the university, especially to the GEM secretaries Herma, Jenny and Sylvia who were very helpful at all times. At SOM office I want to thank Ellen, Arthur and Astrid, Rina and Hanneke for their friendly and unreserved help during the years.

At the end of 2011, I spent a research time visiting CEPA at the University of Queensland in Brisbane, Australia. I would like to thank people who made that visit possible, including Professors Prasada Rao and especially Chris O'Donnell, who eventually became my co-author and a member of my assessment committee. My visit to St Lucia was one of the most memorable parts of my PhD.

I would like to thank many colleagues whose paths crossed mine during my stay at the University of Groningen. Abdul Azeez Erumban and Ilya

Voskoboyinkov made wonderful office mates. Our friendship was a big part of my stay in Groningen, and I am sure it will survive even longer. I also want to thank many PhD students for their warm friendship, especially Anna and Marianna for being wonderful paranymphs. I also want to say thank you and goodbye to other members of our famous Bears for Tears group –Konstantinos, Javier and Yeliz. Among the Ethiopian community in Groningen, I want to thank several friends, especially Abdella, Misghina, Yehualashet, Yeshambel, Fitsum, Sol, Fasil, Wonde, Esubalew and Bini. I want also to extend my heartfelt thanks to old friends who always kept interest in my work through email and facebook: Garcia, Marcin and Abel. Finally, I want to pass my sincere gratitude for my family, especially for Etye and Gashe, for their sustained and unreserved support from the beginning.

# Contents

<b>1. Introduction</b>	<b>1</b>
1.1 Background.....	1
1.2 Motivation and Related Literature.....	4
1.3 Gaps and Research Goals .....	6
1.4 Thesis Outline.....	9
1.5 Concluding Remarks.....	15
<b>2. The Role of Resource Misallocation in Cross-country Differences in Manufacturing Productivity</b>	<b>19</b>
2.1 Introduction.....	19
2.2 Theoretical Framework.....	24
2.3 Data and Measurement.....	29
2.3.1 Manufacturing TFP levels .....	29
2.3.2 Measuring misallocation .....	36
2.3.3 Measures of misallocation.....	39
2.4 Analysis.....	42
2.5 Sensitivity Analysis .....	46
2.6 Conclusion .....	50
2.A Data Appendices.....	53

<b>3. Employment Protection and Misallocation of Resources across Plants:</b>	
<b>International Evidence</b>	<b>69</b>
3.1 Introduction .....	69
3.2 Empirical Methodology .....	74
3.2.1 Measures of misallocation.....	74
3.2.2 Regression framework.....	79
3.2.3 Control variables .....	85
3.3 Data and Measurement.....	87
3.3.1 The WBES dataset.....	87
3.3.2 Employment protection.....	94
3.4 Baseline Regressions Results.....	96
3.5 Sensitivity Tests.....	101
3.5.1 Data quality and model specification.....	101
3.5.2 Instrumental variable estimation .....	112
3.6 Conclusion .....	118
3.B Measuring Employment Protection .....	126
<b>4. The Effect of Political Connections on Credit Access: Does the Level of</b>	
<b>Financial Development Matter?</b>	<b>129</b>
4.1 Introduction .....	129
4.2 Related Literature .....	134
4.3 Empirical Strategy .....	135
4.4 Data and Measurement.....	142
4.4.1 The WBES dataset.....	142
4.4.2 Indicators of credit access.....	144
4.4.3 Indicators of political connections .....	145
4.4.4 Indicators of financial development.....	146
4.4.5 Summary statistics .....	148

---

4.5 Results .....	150
4.5.1 Baseline regression results .....	150
4.5.2 Sensitivity tests .....	157
4.6 Conclusion .....	162
4.A Appendix Tables.....	164
<b>5. Which Firms Are Financially Constrained? Evidence from Investment Analysis of Ethiopian Data</b>	<b>171</b>
5.1 Introduction.....	171
5.2 Theory and Related Literature.....	179
5.3 Methodology .....	182
5.3.1 The VAR model .....	182
5.3.2 Estimation.....	184
5.4 Data and Measurement.....	187
5.4.1 Data description.....	187
5.4.2 Measurement of variables .....	188
5.4.3 Descriptive statistics.....	189
5.5 Results .....	193
5.5.1 Full sample results .....	193
5.5.2 Results by firm groups.....	197
5.5.3 Sensitivity tests .....	203
5.6 Conclusion .....	209
5.A Calculation of Capital Stock.....	211
