Novel strategies for enhancing the efficacy of therapeutic immunization against cancer

Oana Draghiciu

The research described in this thesis was primarily performed at the Department of Medical Microbiology of the University Medical Center Groningen (UMCG) within the research institute GUIDE, programme Microbes in Health and Disease (GUIDE-MHD).

This study was supported by a grant funded by the Dutch Cancer Society (KWF Kanker Bestrijding).

The printing of this thesis was financially supported by:

Groningen Graduate School of Medical Sciences

Novel strategies for enhancing the efficacy of therapeutic immunization against cancer

PhD thesis

To obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. E. Sterken
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Wednesday 14th of January 2015, at 16:15 hours

by

Oana Draghiciu

born on 7th of December 1983
in Bucharest, Romania

Supervisors

Prof. C.A.H.H. Daemen

Prof. H. W. Nijman

Assessment committee

Prof. A.M.H. Boots

Prof. J.B. Haanen

Prof. J. de Vries

CONTENTS

Chapter 1	7
General introduction and outline	
Chapter 2	23
From tumor suppression to eradication – targeting homing and activity of immune effector cells to tumors <i>Clin. Dev. Immunol. 2011; 2011:439053.</i>	
Chapter 3	43
Therapeutic immunization and low-dose local tumor irradiation, a reinforcing combination <i>Int. J. Cancer 2013, 134: 859–872.</i>	
Chapter 4	65
Myeloid-derived suppressor cells – an overview of combat strategies to increase immunotherapy efficacy <i>Accepted for publication in Oncoimmunology</i>	
Chapter 5	83
Sunitinib depletes myeloid-derived suppressor cells and synergizes with a cancer vaccine to enhance antigen-specific immune responses and tumor eradication <i>Manuscript submitted</i>	
Chapter 6	107
A rationally designed combined treatment with an alphavirus-based cancer vaccine, sunitinib and low-dose tumor irradiation completely blocks tumor development <i>Manuscript in preparation</i>	
Chapter 7	123
PET imaging enables the monitoring of T cell infiltration into tumors in response to local tumor irradiation and immunization <i>Manuscript in preparation</i>	
Chapter 8	139
The value of tumor-infiltrating T-lymphocytes as prognostic biomarkers for locally advanced cervical cancer with radio(chemo)therapy <i>Study in progress</i>	
Chapter 9	153
Summarizing discussion and future perspectives	
Chapter 10	165
Nederlandse samenvatting	
Appendices	171
