## CONTENTS OF THIS THESIS

### CHAPTER 1

General introduction

### CHAPTER 2

Persistent fat malabsorption in cystic fibrosis; lessons from patients and mice

*Published*

### CHAPTER 3

Increase of serum gamma glutamyltransferase (GGT) associated with the development of cirrhotic cystic fibrosis liver disease

*Submitted*

### CHAPTER 4

Cholic acid induces a *Cftr* dependent biliary secretion and liver growth response in mice.

*Submitted*

### CHAPTER 5

Bile salt metabolism in a CF mice model with spontaneous liver disease

*Submitted*

### CHAPTER 6

Ursodeoxycholate modulates bile flow and bile salt pool independently from *Cftr* in mice

*Published*

### CHAPTER 7

General discussion and summary

### CHAPTER 8

Nederlandse discussie en samenvatting
