Specialization, evolution and coexistence in a community context

Ellen van Velzen

The research presented in this thesis was carried out at the Community and Conservation Ecology Group (COCON), which is part of the Centre for Ecological and Evolutionary Studies (CEES) of the University of Groningen. This research was financed by a personal VIDI grant from the Netherlands Organization of Scientific Research (NWO) to Rampal S. Etienne.

The printing of this thesis was funded by the University of Groningen and the Faculty of Mathematics and Natural Sciences.

Prof. dr. A.M. de Roos

CONTENTS

<i>Chapter 1</i>	General introduction	7
<i>Chapter 2</i>	The evolution and coexistence of generalist and specialist herbivores under between-plant competition	15
<i>Chapter 3</i>	The importance of ecological costs for the evolution of plant defense against herbivory	35
<i>Chapter 4</i>	The role of within-host competition in coexistence in multiparasitoid-host systems	57
<i>Chapter 5</i>	The evolution and coexistence of divergent parasitization strategies	75
<i>Chapter 6</i>	Synthesis and future directions	95
	Supplementary material	113
	References	123
	Summary	139
	Samenvatting	145
	Acknowledgements	151
