Table of Contents

Chapter 1	General introduction	9
Chapter 2	Transforming Growth Factor (TGF)- β expression and activation mechanisms as potential targets for anti-tumor therapy and tumor imaging	17
Chapter 3	Human stromal cells are required for an anti-breast cancer effect of zoledronic acid	43
Chapter 4	PET imaging with ^{89}Zr labeled Transforming Growth Factor (TGF)- β antibody fresolimumab in tumor models	65
Chapter 5A	Bevacizumab-induced normalization of blood vessels in tumors hampers antibody uptake	85
Chapter 5B	Bevacizumab-induced vessel normalization hampers tumor uptake of antibodies – response	105
Chapter 6	VEGF pathway targeting agents, vessel normalization and tumor drug uptake: from bench to bedside	111
Chapter 7	Summary, discussion and future perspectives	127
Chapter 8	Nederlandse samenvatting (Summary in Dutch)	137
	Dankwoord (Acknowledgements)	145
