# Advancing Selectivity Control with Highly Reactive Organometallic Reagents

PhD thesis

to obtain the degree of PhD at the  
University of Groningen  
on the authority of the  
Rector Magnificus Prof. E. Sterken  
and in accordance with  
the decision by the College of Deans.

This thesis will be defended in public on

Friday 17 April 2015 at 11.00 hours

by

**Massimo Giannerini**

born on 25 April 1985  
in Pietrasanta, Italy

**Supervisor**

Prof. B.L. Feringa

**Assessment committee**

Prof. A.J. Minnaard

Prof. J.G. de Vries

Prof. M.J. Gaunt

# Table of Contents

<b>Chapter 1: Innovative approaches in organolithium chemistry</b>	<b>1</b>
1 Introduction	2
1.1 Properties of organolithium compounds	3
2 Direct use of organolithium compounds in catalytic processes	5
2.1 Cu-Catalyzed asymmetric allylic alkylation with organolithium compounds	5
2.2 Ni-Catalyzed polymerization with aryllithium compounds	6
3 Formation of reactive “ate” complex	7
4 Chiral organolithium reagents	9
5 Flow chemistry	11
6 Conclusions	13
7 Overview of the thesis	13
8 References	14
<b>Chapter 2: Z-Selective copper-catalyzed asymmetric allylic alkylation with Grignard reagents</b>	<b>17</b>
1 Introduction	18
1.1 Alkenes: the relevance of the geometrical aspect	18
1.2 <i>E,Z</i> Selectivity in Cu-mediated allylic alkylation	19
1.3 <i>E,Z</i> Selectivity in Cu-mediated asymmetric allylic alkylation	20
2 Goal	22
3 Results and discussion	23
3.1 Optimization	23
3.2 Scope and synthetic use	24
4 Conclusions and future perspectives	28
5 Experimental section	30
6 References	38
<b>Chapter 3: NHC-Cu(I)-catalyzed <math>\alpha</math>-selective allylic alkylation with organolithium reagents</b>	<b>41</b>
1 Introduction	42
2 Goal	44
3 Results and discussion	45
4 Conclusions and future perspectives	52
5 Experimental section	53
6 References	58

## **Chapter 4: Pd-Catalyzed direct cross-coupling of alkyllithium**

<b>reagents</b>	<b>61</b>
1 Introduction	62
1.1 Alkyl-metallic reagents in Pd-catalyzed cross-coupling: still a challenging Task	62
1.2 Alkyllithium reagents in Pd catalyzed cross-coupling	64
2 Goal	65
3 Results and discussion	66
3.1 Optimization	66
3.2 Secondary alkyllithium	72
4 Conclusions and future perspectives	77
5 Experimental section	77
6 References and notes	92

## **Chapter 5: Palladium catalyzed cross-coupling with aryllithium**

<b>reagents</b>	<b>95</b>
1 Introduction	96
1.1 Aryl coupling partners in Palladium catalyzed cross-coupling	96
1.2 Aryllithium: many advantages, few reported protocols	98
1.2.1 Directed <i>ortho</i> -metallation	100
2 Goal	101
3 Results and discussion	102
3.1 Pd-catalyzed cross-coupling of organolithium reagents with arylchlorides	106
3.1.1 Results and discussion	107
4 Conclusions and future perspectives	112
5 Experimental section	112
6 References	122

## **Chapter 6: Hindered aryllithium reagents as highly efficient partners in Pd-catalyzed cross-coupling: synthesis of tri- and tetra-*ortho*-**

<b>substituted biaryls under ambient conditions</b>	<b>125</b>
1 Introduction	126
1.1 Hindered biaryls: recurring motifs in nature	126
1.2 Hindered biaryls: Pd-catalyzed cross-coupling evolution toward protocol at room temperature	127
2 Goal	129
3 Results and discussion	129

3.1	Optimization of the cross-coupling reaction	129
3.2	Scope	131
3.2.1	Tri- <i>ortho</i> -substituted hindered biaryls	131
3.2.2	Tetra- <i>ortho</i> -substituted hindered biaryls	133
4	Conclusions and future perspectives	135
5	Experimental section	136
6	References	141

## **Chapter 7: Alkyl- and Aryl Ketones *via* Sequential 1,2-Addition / Cross-Coupling of Organolithium Reagents with Weinreb Amides** **143**

1	Introduction	144
1.1	Ketones: importance and synthetic approach <i>via</i> 1,2 addition	144
1.2	Weinreb Amide	145
2	Goal	146
3	Results and discussion	147
3.1	Optimization and scope	147
3.2	Raman analysis	153
4	Conclusions and future perspectives	155
5	Experimental section	157
6	References	163
