## TABLE OF CONTENTS

<b>Chapter 1</b>	General introduction	<b>9</b>
<i>Part 1</i>	<i>The temporal dynamics of HPA axis functioning in depression</i>	<i>23</i>
<b>Chapter 2</b>	Chronicity of depressive problems and the cortisol response to psychosocial stress in adolescents: The TRAILS study	<b>25</b>
<b>Chapter 3</b>	Cortisol and $\alpha$ -amylase secretion patterns between and within depressed and non-depressed individuals	<b>43</b>
<b>Chapter 4</b>	How to assess stress biomarkers for idiographic research?	<b>79</b>
<b>Chapter 5</b>	The temporal dynamics of cortisol and affective states in depressed and non-depressed individuals: an intensive time-series approach	<b>107</b>
<i>Part 2</i>	<i>HPA axis functioning as a mediator of the relationship between physical activity and depression</i>	<i>129</i>
<b>Chapter 6</b>	Markers of stress and inflammation as potential mediators of the relationship between exercise and depressive symptoms: The TRAILS Study	<b>131</b>
<b>Chapter 7</b>	Temporal dynamics of physical activity and mood in depressed and non-depressed individuals	<b>151</b>
<b>Chapter 8</b>	Cortisol as a potential mediator of the influence of physical activity on affective states in daily life	<b>173</b>
<b>Chapter 9</b>	General discussion	<b>185</b>
	Samenvatting (Dutch summary)	<b>203</b>
	Dankwoord	<b>213</b>
	Curriculum Vitae	<b>217</b>
