# **The association between albuminuria and long-term renal risk**

How to improve the precision of drug effect estimates

PhD thesis

to obtain the degree of PhD at the  
University of Groningen  
on the authority of the  
Rector Magnificus Prof. E. Sterken  
and in accordance with  
the decision by the College of Deans.

This thesis will be defended in public on

Monday 21 March 2016  
at 12.45 hours

by

**Tobias Felix Kröpelin**

born on 11 December 1982  
in Offenbach am Main, Germany

**Supervisors**

Prof. D. de Zeeuw

Prof. H.J. Lambers Heerspink

**Assessment Committee**

Prof. R.T. Gansevoort

Prof. A.J. Rabelink

Prof. J.F. Mann

# Table of contents

Chapter 1 –	Introduction	7
<b>Part 1 –</b>	<b>Association between the initial albuminuria reduction and the risk for end stage renal disease</b>	<b>19</b>
Chapter 2 –	Drug-induced reduction in albuminuria is associated with subsequent renoprotection: A meta-analysis Journal of the American Society of Nephrology, 2015; 26(8):2055-2064	21
Chapter 3 –	Individual long-term albuminuria exposure during ARB therapy is the optimal predictor for renal outcome Nephrology Dialysis Transplantation, 2016 [Epub ahead of print]	45
<b>Part 2 –</b>	<b>Optimizing the use of albuminuria in clinical trials in nephrology</b>	<b>65</b>
Chapter 4 –	Number and frequency of albuminuria measurements in clinical trials in diabetic nephropathy Clinical Journal of the American Society of Nephrology, 2015;10:410–416	67
Chapter 5 –	The optimal protocol for measuring an albuminuria class transition in clinical trials in diabetic kidney disease Submitted: Journal of the American Society of Nephrology	87
Chapter 6 –	English: Summary and future perspectives Dutch: Samenvatting en toekomstperspectief German: Zusammenfassung und Zukunftsperspektiven	107
Supplement – (Chapter 7)	Early renin-angiotensin-system intervention is more beneficial than late intervention in delaying end-stage renal disease in patients with type 2 diabetes Diabetes, Obesity and Metabolism: 2016;18(1):64-71	129
